Monica E. White
Latham & Watkins LLP
811 Main Street, Suite 3700
Houston, Texas 77002
(713) 546-5400

Approximate date of commencement of proposed sale to the public:
As soon as practicable after the effective date of this registration statement.

If any of the securities being registered on this Form are to be offered on a delayed or continuous basis pursuant to Rule 415 under the Securities Act of 1933, check the following box. ☐

If this Form is filed to register additional securities for an offering pursuant to Rule 462(b) under the Securities Act, please check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering. ☐

If this Form is a post-effective amendment filed pursuant to Rule 462(c) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering. ☐

If this Form is a post-effective amendment filed pursuant to Rule 462(d) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering. ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer	☐	Accelerated filer	☐
Non-accelerated filer	☒	Smaller reporting company	☐
		Emerging growth company	☒

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 7(a)(2)(B) of the Securities Act. ☒

The registrant hereby amends this registration statement on such date or dates as may be necessary to delay its effective date until the registrant shall file a further amendment which specifically states that this registration statement shall thereafter become effective in accordance with Section 8(a) of the Securities Act of 1933, as amended, or until the registration statement shall become effective on such date as the Securities and Exchange Commission, acting pursuant to said Section 8(a), may determine.

Subject to completion, dated , 2022

PRELIMINARY PROSPECTUS

Shares

BKV Corporation

Common Stock

This is the initial public offering of common stock of BKV Corporation, a Delaware corporation. Prior to this offering, there has been no public market for our common stock. We anticipate that the initial public offering price will be between $ and $ per share. We intend to apply to list our common stock on the New York Stock Exchange ("NYSE") under the symbol "BKV."

We have granted the underwriters a 30-day option to purchase up to additional shares from us at the initial public offering price, less the underwriting discounts and commissions.

We are an "emerging growth company" as the term is used in the Jumpstart Our Business Startups Act of 2012 and, as such, have elected to comply with certain reduced public company reporting requirements. See "*Prospectus Summary—Implications of Being an Emerging Growth Company.* "

Upon completion of this offering, affiliates of Banpu Public Company Limited will beneficially own approximately % of the voting power of the outstanding shares of our common stock. As a result, we will be a "controlled company" within the meaning of the NYSE rules. See "*Management—Controlled Company*."

Investing in our common stock involves risks, including those described under " *Risk Factors*" beginning on page 37 of this prospectus.

	Per Share	Total
Public offering price	$	$
Underwriting discount and commissions(1)	$	$
Proceeds to us before expenses	$	$

(1) The underwriters will also be reimbursed for certain expenses incurred in this offering. See "*Underwriting*" for additional information regarding underwriting compensation.

Neither the Securities and Exchange Commission nor any securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The underwriters expect to deliver the shares of our common stock on or about , 2022.

TABLE OF CONTENTS

Dealer Prospectus Delivery Obligation

Through and including , 2022 (the 25th day after the date of this prospectus), all dealers that effect transactions in our common stock, whether or not participating in this offering, may be required to deliver a prospectus. This delivery requirement is in addition to a dealer's obligation to deliver a prospectus when acting as an underwriter and with respect to unsold allotments or subscriptions.

You should rely only on the information contained in this prospectus or in any free writing prospectus that we authorize to be distributed to you. We and the underwriters have not authorized anyone to provide you with any information other than that contained in this prospectus or in any free writing prospectus prepared by or on behalf of us or to which we have referred you, and neither we, nor the underwriters take responsibility for any other information others may give you. We are offering to sell, and seeking offers to buy, shares of our common stock only in jurisdictions where such offers and sales are permitted. The information in this prospectus or any free writing prospectus is accurate only as of its date, regardless of its time of delivery or the time of any sale of shares of our common stock. Our business, financial condition, results of operations and prospects may have changed since that date.

Industry and Market Data

In this prospectus, we present certain market and industry data. This information is based on third-party sources which we believe to be reliable as of their respective dates. Neither we nor the underwriters have independently verified any third-party information. Some data is also based on our good faith estimates. Expectations of our and our industry's future performance are necessarily subject to a high degree of uncertainty and risk due to a variety of factors, including those described in "*Risk Factors*." These and other factors could cause future performance to differ materially from our expectations. See "*Cautionary Statement Regarding Forward-Looking Statements*."

Presentation of Financial, Reserve and Operating Data

Unless indicated otherwise, the historical financial information presented in this prospectus is that of BKV Corporation and its consolidated subsidiaries as of December 31, 2021 or September 30, 2022, as applicable. The pro forma financial information presented in this prospectus presents the combination of the historical consolidated financial statements of the Company, as adjusted to give effect to the Exxon Barnett Acquisition, the related financing under the Term Loan Credit Agreement and the $75 Million Loan Agreement (each as defined herein). Please see "*Unaudited Pro Forma Condensed Combined Consolidated Financial Statements*" included elsewhere in this prospectus.

The historical natural gas, NGL and oil reserves data presented in this prospectus as of September 30, 2022 and December 31, 2021 and 2020 is based on the reserve reports prepared by Ryder Scott Company, L.P., independent petroleum engineers.

In addition, unless indicated otherwise, the operational data presented in this prospectus is that of BKV Corporation and its consolidated subsidiaries on a consolidated basis as of and for the periods presented.

As a result of our acquisition transactions in recent years, our historical operating, financial and reserve data may not be comparable between periods presented in this prospectus. See "*Management's Discussion and Analysis of Financial Condition and Results of Operations — Factors that Affect Comparability of Our Results of Operations*."

Trademarks and Trade Names

We own or have rights to various trademarks, service marks and trade names that we use in connection with the operation of our business. This prospectus may also contain trademarks, service marks and trade names of third parties, which are the property of their respective owners. Our use or display of third parties' trademarks, service marks, trade names or products in this prospectus is not intended to, and does not imply a relationship with, or endorsement or sponsorship by us. Solely for convenience, the trademarks, service marks and trade names referred to in this prospectus may appear without the ®, ™ or SM symbols, but such references are not intended to indicate, in any way, that we will not assert, to the fullest extent under applicable law, our rights or the rights of the applicable licensor to these trademarks, service marks and trade names.

Rounding and Percentages

The financial information and certain other information presented in this prospectus have been rounded to the nearest whole number or the nearest decimal. Therefore, the sum of the numbers in a column may not conform exactly to the total figure given for that column in certain tables in this prospectus. In addition, certain percentages presented in this prospectus reflect calculations based upon the underlying information prior to rounding and, accordingly, may not conform exactly to the percentages that would be derived if the relevant calculations were based upon the rounded numbers or may not sum due to rounding.

Other Considerations

This prospectus contains forward-looking statements that are subject to a number of risks and uncertainties, many of which are beyond our control. See "*Risk Factors*" and "*Cautionary Statement Regarding Forward-Looking Statements*" for additional information regarding these risks.

You should read this prospectus and any written communication prepared by us or on our behalf in connection with this offering, together with the additional information described in the section of this prospectus titled "*Where You Can Find More Information*." We have not authorized anyone to provide you with information or to make any representation in connection with this offering other than those contained herein. If anyone makes any recommendation or gives any information or representation regarding this offering, you should not rely on that recommendation, information or representation as having been authorized by us, the underwriters or any other person on our behalf. The information contained in this prospectus is accurate only as of the date of which it is shown, or if no date is otherwise indicated, the date of this prospectus, regardless of the time of delivery of this prospectus or of any sale of our shares of common stock. We are offering to sell, and seeking offers to buy, shares of common stock only in jurisdictions where offers and sales are permitted. Our business, financial condition, results of operations and prospects may have changed since that date. Information contained on our website is not part of this prospectus.

No action is being taken in any jurisdiction outside the United States to permit a public offering of shares of common stock or possession or distribution of this prospectus in that jurisdiction. Persons who come into possession of this prospectus in jurisdictions outside the United States are required to inform themselves about and to observe any restrictions as to this offering and the distribution of this prospectus applicable to that jurisdiction.

Glossary of Oil and Natural Gas Terms

The following are abbreviations and definitions of certain terms used in this prospectus, which are commonly used in the oil and natural gas industry:

"***Bbl***" refers to one stock tank barrel, of 42 U.S. gallons liquid volume, used in this prospectus in reference to crude oil or other liquid hydrocarbons.

"***Bcf***" refers to one billion cubic feet of natural gas or CO_2.

"***Bcfe***" refers to one billion cubic feet of natural gas equivalent.

"***Btu***" refers to British thermal unit, which is the heat required to raise the temperature of one pound of liquid water by one degree Fahrenheit.

"***CCUS***" refers to carbon capture, utilization and sequestration.

"***CO_2***" refers to carbon dioxide.

"***CO_2e***" refers to carbon dioxide equivalent.

"***developed acreage***" refers to the number of acres that are allocated or assignable to productive wells or wells capable of production.

"***dry hole***" refers to a well found to be incapable of producing hydrocarbons in sufficient quantities such that proceeds from the sale of such production exceed production expenses and taxes.

"***Effective NRI***" refers to our share of leasehold ownership after all burdens, such as royalty and overriding royalty interests, have been deducted from the working interest, weighted by our net acres owned in the Barnett from the assets acquired in the Devon Barnett Acquisition and the Exxon Barnett Acquisition.

"***gross acres***" or "***gross wells***" refers to the total acres or wells, as the case may be, in which a working interest is owned.

"***IPIECA***" refers to the International Petroleum Industry Environmental Conservation Association.

"***lean gas***" refers to natural gas that contains a few or no liquefiable liquid hydrocarbons.

"***LNG***" refers to liquefied natural gas.

"***Maintenance Reinvestment Rate***" for any period refers to the maximum rate of our total cash paid for upstream capital expenditures (excluding leasehold costs and acquisitions) for such period as a percentage of Adjusted EBITDAX for the same period that is necessary to hold our production for such period flat.

"***MBbls***" refers to one thousand barrels of crude oil or other liquid hydrocarbons.

"***Mcf***" refers to one thousand cubic feet.

"***Mcf/d***" refers to one thousand cubic feet per day.

"***Mcfe***" refers to one thousand cubic feet of natural gas equivalent.

"***MMBtu***" refers to one million Btus.

"***MMcf***" refers to one million cubic feet.

"***MMcf/d***" refers to one million cubic feet per day.

"***MMcfe***" refers to one million cubic feet of natural gas equivalent, calculated by converting barrels of crude oil or other liquid hydrocarbons to natural gas at a ratio of one Bbl to six Mcf of natural gas. This is an energy content correlation and does not reflect a value or price relationship between the commodities.

"***MMcfe/d***" refers to one million cubic feet of natural gas equivalent per day.

"***MMscf***" refers to one million standard cubic feet.

"***MMscf/d***" refers to one million standard cubic feet per day.

"***MMscfe/d***" refers to one million standard cubic feet of natural gas equivalent per day.

"***Mtpa***" refers to million metric tons of LNG per year.

"***Mtpy***" refers to million metric tons per year.

"***net acres***" refers to the percentage of total acres an owner has out of a particular number of acres, or a specified tract. For example, an owner who has 50% interest in 100 acres owns 50 net acres.

"***net operated development well***" refers to a gross operated development well that has been drilled, proportionately reduced by our working interest in such well.

"***NGL***" refers to natural gas liquids.

"***NYMEX***" refers to the New York Mercantile Exchange.

"***OPEC***" refers to the Organization of the Petroleum Exporting Countries.

"***possible reserves***" means those additional reserves that analysis of geoscience and engineering data suggest are less likely to be recoverable than probable reserves. The total quantities ultimately recovered from the project have a low probability to exceed the sum of proved plus probable plus possible reserves, which is equivalent to the high estimate scenario. In this context, when probabilistic methods are used, there should be at least a 10% probability that the actual quantities recovered will equal or exceed the estimate of proved plus probable plus possible reserves.

"***probable reserves***" means those additional reserves that analysis of geoscience and engineering data indicate are less likely to be recovered than proved reserves but more certain to be recovered than possible reserves. It is equally likely that actual remaining quantities recovered will be greater than or less than the sum of the estimated proved plus probable reserves. In this context, when probabilistic methods are used, there should be at least a 50% probability that the actual quantities recovered will equal or exceed the estimate of proved plus probable reserves.

"***proved developed non-producing reserves***" means reserves (i) expected to be recovered from zones capable of producing but which are shut-in because no market outlet exists at the present time or whose date of connection to a pipeline is uncertain, (ii) wells not capable of producing for mechanical reasons or (iii) currently behind the pipe in existing wells and will require additional completion work or future re-completion, in each case, which are considered proved by virtue of successful testing or production of offsetting wells.

"***proved developed reserves***" or "***PDP reserves***" refers to reserves that can be expected to be recovered through existing wells with existing equipment and operating methods.

"***proved reserves***" refers to the estimated quantities of oil, natural gas and NGLs which geological and engineering data demonstrate with reasonable certainty to be commercially recoverable in future years from known reservoirs under existing economic and operating conditions and prior to the time at which contracts providing the right to operate expire, unless evidence indicates that renewal is reasonably certain, regardless of whether deterministic or probabilistic methods are used for the estimation. The project to extract the hydrocarbons must have commenced or the operator must be reasonably certain that it will commence the project within a reasonable time. For a complete definition of proved crude oil and natural gas reserves, refer to the SEC's Regulation S-X, Rule 4-10(a)(22).

"***proved undeveloped reserves"*** or "***PUD reserves***" refers to proved reserves that are expected to be recovered from new wells on undrilled acreage or from existing wells where a relatively major expenditure is required for recompletion. Undrilled locations can be classified as having proved undeveloped reserves only if a development plan has been adopted indicating that such locations are scheduled to be drilled within five years, unless specific circumstances justify a longer time.

"***rich gas***" refers to natural gas containing heavier hydrocarbons than a lean gas.

"***Scope 1 emissions***" refers to direct GHG emissions that occur from sources that are controlled or owned by an organization.

"***Scope 2 emissions***" refers to indirect GHG emissions associated with the purchase of electricity, steam, heat or cooling.

"***Scope 3 emissions***" refers to GHG emissions that result from the end use of an organization's products, as well as emissions from other business activities from assets not owned or controlled by the organization but that the organization indirectly impacts in its value chain.

"***Tcfe***" refers to one trillion cubic feet of natural gas equivalent.

"***undeveloped acreage***" refers to acreage under lease on which wells have not been drilled or completed such that there is not production of commercial quantities of hydrocarbons.

"***Upstream Reinvestment Rate***" for any period refers to our total cash paid for upstream capital expenditures (excluding leasehold costs and acquisitions) for such period as a percentage of Adjusted EBITDAX for the same period.

"***working interest***" refers to the right granted to the lessee of a property to explore for and to produce and own natural gas or other minerals. The working interest owners bear the exploration, development, and operating costs on either a cash, penalty, or carried basis.

Commonly Used Defined Terms

As used in this prospectus, unless the context indicates or otherwise requires, the terms listed below have the following meanings:

"***Banpu***" refers to our sponsor, Banpu Public Company Limited, a public company listed on the Stock Exchange of Thailand and the ultimate parent company of BKV Corporation, Banpu, Banpu Power and BPPUS.

"***Banpu Power***" refers to Banpu Power Public Company Limited, a public company listed on the Stock Exchange of Thailand. Banpu owns approximately 78.66% of Banpu Power as of September 30, 2022.

"***Barnett***" refers to the Barnett Shale in the Fort Worth Basin of Texas.

"***BKV Barnett***" refers to BKV Barnett LLC, a Delaware limited liability company and wholly owned subsidiary of BKV O&G.

"***BKV Chaffee***" refers to BKV Chaffee Corners, LLC, a Delaware limited liability company and wholly owned subsidiary of BKV O&G.

"***BKV Chelsea***" refers to BKV Chelsea, LLC, a Delaware limited liability company and wholly owned subsidiary of BKV O&G.

"***BKV dCarbon Ventures***" refers to BKV dCarbon Ventures, LLC, a Delaware limited liability company and the CCUS business of BKV Corporation.

"***BKVerde***" refers to BKVerde, LLC, a Delaware limited liability company and wholly owned subsidiary of BKV dCarbon Ventures.

"***BKV Midstream***" refers to BKV Midstream, LLC, a Delaware limited liability company and wholly owned subsidiary of BKV Corporation.

"***BKV O&G***" refers to BKV Oil and Gas Capital Partners, L.P., a Delaware limited partnership and wholly owned subsidiary of BKV Corporation.

"***BKV Operating***" refers to BKV Operating, LLC, a Delaware limited liability company and wholly owned subsidiary of BKV O&G.

"***BKV-BPP Power***" or "***BKV-BPP Power Joint Venture***" refers to BKV-BPP Power LLC, a Delaware limited liability company and the joint venture between BKV Corporation and BPPUS, in which we own a 50% interest.

"***BNAC***" refers to Banpu North America Corporation, a subsidiary of Banpu, our sponsor, and the majority stockholder of BKV Corporation.

"***BPPUS***" refers to Banpu Power US Corporation, a wholly owned subsidiary of Banpu Power and the owner of a 50% interest in the BKV-BPP Power Joint Venture.

"***bylaws***" refers to the amended and restated bylaws of BKV Corporation to be adopted in connection with the consummation of this offering.

"***certificate of incorporation***" refers to the second amended and restated certificate of incorporation of BKV Corporation to be adopted in connection with the consummation of this offering.

"***Code***" means the Internal Revenue Code of 1986, as amended.

"***Data Lake***" refers to a centralized cloud, large data technology that stores all company data and enables dashboards, visualizations, and analytics from a variety of systems and inputs.

"***ERCOT***" refers to the Electric Reliability Council of Texas.

"***ESG***" refers to environmental, social and governance.

"***FID***" refers to final investment decision.

"***GAAP***" refers to generally accepted accounting principles in the United States.

"***GHG***" refers to greenhouse gases.

"***governing documents***" refers to our certificate of incorporation and our bylaws.

"***HRCO***" refers to a contract for the financial purchase and sale of power based on a floating price of natural gas at a predetermined location using a predetermined conversion factor, or heat rate, required to turn the fuel input into electricity.

"***Kalnin Ventures***" refers to Kalnin Ventures LLC, a Colorado limited liability company and wholly owned subsidiary of BKV Corporation.

"***NEPA***" refers to the Marcellus Shale in the Appalachian Basin of Northeast Pennsylvania.

"***net zero***" refers to the full elimination and/or offset of Scope 1 and Scope 2 emissions in our owned and operated upstream businesses.

"***NGP***" refers to natural gas processing.

"***Ryder Scott***" refers to Ryder Scott Company, L.P., independent petroleum engineers.

"***SREC***" refers to Solar Renewable Energy Credit, which represents a form of environmental attribute associated with solar energy generation, which can be marketed for financial gain to improve project economics or retired to offset the SREC owners' Scope 2 emissions. For every 1000 kilowatt-hours of electricity produced by an eligible solar facility, one SREC is awarded. For a solar facility to be credited with that SREC, the system must be certified and registered by state agencies.

"***Temple I***" refers to the combined gas turbine and steam turbine power plant located in Temple, Texas and owned by the BKV-BPP Power Joint Venture.

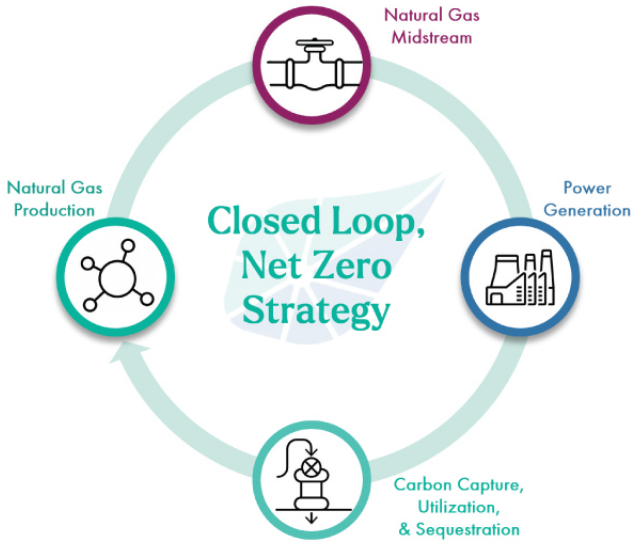
PROSPECTUS SUMMARY

This summary highlights certain information about us and this offering contained elsewhere in this prospectus, but it is not complete and does not contain all of the information you should consider before making an investment decision. In addition to this summary, you should read this entire prospectus carefully, including the sections titled "Risk Factors," "— Summary Historical Financial Information," "Management's Discussion and Analysis of Financial Condition and Results of Operations," and our historical consolidated financial statements and the related notes thereto included elsewhere in this prospectus, before making an investment decision. This summary contains forward-looking statements that involve risks and uncertainties. See "Cautionary Statement Regarding Forward-Looking Statements." References in this prospectus to "BKV," the "Company," "we," "us," "our" and like terms are to BKV Corporation, a Delaware corporation, and its wholly owned subsidiaries, unless the context otherwise requires or we otherwise state.

Our Company

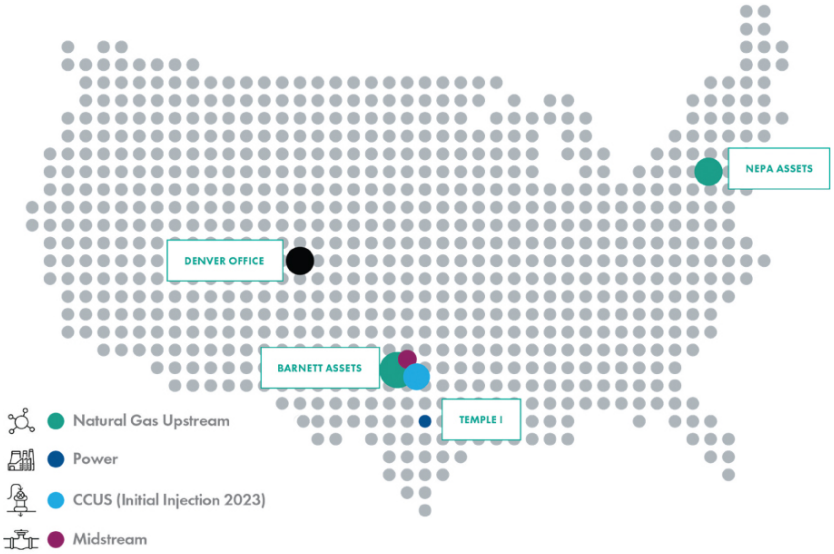
Overview

We are a forward thinking, growth driven energy company focused on creating value for our stockholders through the organic development of our properties as well as accretive acquisitions. Our core business is to produce natural gas from our owned and operated upstream businesses, which we expect to achieve net zero Scope 1 and Scope 2 emissions by the end of 2025. We maintain a "closed-loop" approach to our net zero emissions goal with our four business lines: natural gas production, natural gas gathering, processing and transportation (our "natural gas midstream business"), power generation and carbon capture, utilization and sequestration ("CCUS"). We are committed to building a vertically integrated business to reduce costs and improve overall commercial optimization of the full value chain. For instance, our natural gas production in the Barnett is gathered and transported through our midstream systems, and we are seeking to establish arrangements to supply our natural gas production directly to the BKV-BPP Power Joint Venture. We believe that our differentiated business model, net zero emissions focus, highly experienced management team and technology-driven approach to operating our business will enable us to create stockholder value.



We understand the impact climate change has on our community, the world and future generations, which is why addressing these impacts in how energy is produced is a top priority. In particular, it is one of our core values, “Be One BKV,” to create a unified team with a shared vision to achieve our ESG goals.

BKV Assets



Overview of BKV Assets

Natural Gas

	Nine Months Ending Sept '22 Net Production (MMcfe/d)	Sept '22 SEC 1P Reserves (Tcfe)	Producing Wells	Net Acres
Barnett	731	5.4	6,975	468,000
NEPA	133	0.93	408	37,000
Total	864	6.33	7,383	505,000

Operated Midstream

	As of Sept '22 Throughput (Mmcf/d)	Pipeline Miles	Midstream Compressors
Barnett	220	778	65

Power

	Location	Heat Rate Btu/kWh	Capacity MW+
Temple 1	Bell County, TX	6,950	755

Our Operations

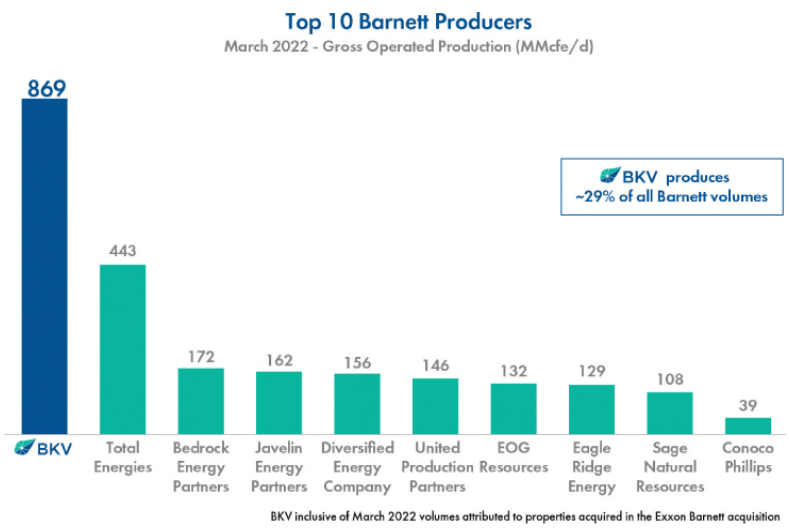
Natural Gas Production

We are engaged in the acquisition, operation and development of natural gas and NGL properties primarily located in the Barnett Shale in the Fort Worth Basin of Texas (the "Barnett") and in the Marcellus Shale in the Appalachian Basin of Northeastern Pennsylvania ("NEPA"). Our upstream assets are the core of our business and provide us with substantial Adjusted Free Cash Flow, which we expect will be sufficient to fund our capital expenditure program, enhance stockholder value and support future acquisitions across our four business lines while maintaining a conservative balance sheet. We have a balanced portfolio of low decline producing properties and undeveloped inventory, primarily in the Barnett. Additionally, our focus on operational efficiencies, access to BKV-owned and third-party midstream systems, and proximity to natural gas demand markets along the Gulf Coast and Northeast corridor allow us to generate high margins.

As of September 30, 2022, our total acreage position was approximately 505,000 net acres, 99% of which was held by production. As of September 30, 2022, our net daily production (after giving effect to the Exxon Barnett Acquisition) averaged 864 MMcfe/d, consisting of approximately 79% natural gas and approximately 21% NGLs. As of September 30, 2022, our total proved reserves of 6,332 Bcfe had an estimated 7% year-over-year average base decline rate over the next 10 years. We have more than 10 years of core inventory remaining, with attractive returns, based on a 1 to 1.5 rigs per year pace, including 196 proved undeveloped, 162 probable and 150 possible horizontal locations, and 652 proved developed non-producing, 738 probable, and 294 possible refracture ("refrac") candidates. Based on current commodity prices, the capital investment required to hold production flat year-over-year is less than approximately 30% of our annual Adjusted EBITDAX. Adjusted EBITDAX is not a financial measure calculated in accordance with GAAP. See "— *Summary Historical Financial Information — Non-GAAP Financial Measures*" for a description of this measure and a reconciliation to the most directly comparable GAAP measure.

We entered the Barnett in October 2020 with our acquisition of more than 289,000 net acres and 3,850 producing operated wells and related upstream assets (the "2020 Barnett Assets") from Devon Energy Corporation ("Devon Energy"). On June 30, 2022, we further scaled our Barnett position by acquiring approximately 175,000 net acres, 2,100 operated wells and related upstream, midstream and other assets in the Exxon Barnett Acquisition. As of September 30, 2022, our Barnett acreage position was approximately 468,000 net acres, which is approximately 99% held by production. Our average daily Barnett production of approximately 731 MMcfe/d for the nine months ended September 30, 2022 consisted of 75% natural gas and 25% NGLs. We had an average working interest in our operated wells in the Barnett of approximately 96.1% as of September 30, 2022 and an Effective NRI in the Barnett of approximately 80.37%.

We are the largest natural gas producer by gross operated volume in the Barnett. Based on information published by the Texas Railroad Commission ("TRRC"), the chart below illustrates our gross operated production volumes in the Barnett (including the Exxon Barnett Acquisition), which represent approximately 29% of the total Barnett production, and nearly double that of the next largest producer in the Barnett for the month of March 2022.



We entered NEPA in 2016 and have subsequently scaled our position through 12 acquisitions. As of September 30, 2022, our acreage position was approximately 37,000 net acres, which is approximately 94% held by production. Our average net daily production of 133 MMcfe/d for the nine months ended September 30, 2022 consisted entirely of natural gas. We had an average working interest in our operated wells in NEPA of 89%, as of September 30, 2022.

Natural Gas Midstream

Through our ownership in midstream systems, we are engaged in the gathering, processing and transportation of natural gas (which we refer to as our natural gas midstream business) that supports our upstream assets and third-party producers in the Barnett and NEPA. Our midstream assets improve our overall corporate returns by enhancing our margins and lowering our break-even operating costs while allowing us to manage the timing, development and optimization of production of our upstream assets. In the Barnett, as of September 30, 2022, approximately 220 MMcf/d of our gross production (approximately 29% of our total gross Barnett production) was gathered and processed by our owned Barnett midstream system, which includes approximately 778 miles of gathering pipeline, 65 midstream compressors and one amine processing unit. Additionally, our owned Barnett midstream system has over 200 MMcf/d in unutilized pipeline and processing capacity, providing room to increase throughput (from our own production and for third-party volumes) while maintaining optimal operating pressure with limited additional capital investment required. We also believe we have ample dedicated capacity on third party midstream systems for our expected production and future development. In NEPA, as of September 30, 2022, we had an approximate 29.4% non-operated ownership interest in a midstream system, which is operated by subsidiaries of Repsol Oil & Gas (“Repsol”), with throughput of approximately 174 MMcf/d, and we separately own and operate approximately 16 miles of natural gas gathering pipelines, 14 miles of freshwater distribution pipelines and six gas compression units.

Power Generation

We have a 50% ownership interest in the BKV-BPP Power Joint Venture, which owns Temple I, a newly-constructed, modern combined cycle gas and steam turbine power plant located in the Electric Reliability Council of Texas (“ERCOT”) North Zone in Temple, Texas. The remaining 50% interest is owned by BPPUS, a wholly owned subsidiary of Banpu Power and an affiliate of our sponsor, Banpu. Temple I has an annual average power generation capacity of 755 MW and delivers power to customers on the ERCOT power network in Texas. Temple I is among the most efficient generators supplying power to ERCOT, with a baseload design heat rate of approximately 6,950 Btu/kWh, which is well below the ERCOT Combined

Cycle Gas Turbines ("CCGT") average. Temple I's modern technology enables it to respond to rapidly changing market signals in real time by minimizing congestion risk and ensuring the highest operational readiness during the time when electricity consumption peaks (in winter and summer), making it well-suited to serve the various needs of the ERCOT market. We expect our power generation assets will be synergistic with our base upstream business. In the near term, we will seek to establish midstream contracts that allow us to supply our own natural gas directly to Temple I and its firm intrastate natural gas storage service at the Bammel storage facility. Supplying our own natural gas to Temple I will reduce gas transportation costs and create reciprocal natural hedges for both businesses via vertical integration. Additionally, we leverage our existing organization to provide marketing, engineering, finance, accounting and other administrative services to the BKV-BPP Power Joint Venture for an annual fee plus expenses. In addition, the BKV-BPP Power Joint Venture is in the process of developing a retail marketing business to sell electricity to commercial, industrial, and residential retail customers in Texas through its wholly owned subsidiary, BKV-BPP Retail, LLC, and has recently received the necessary approvals from the Public Utility Commission of Texas and ERCOT to do so. We intend to continue to build out our power generation business through opportunistic acquisitions of power generation assets and to expand into retail power, which would enable us to ultimately provide net zero wellhead-to-household energy to the end-consumer.

Carbon Capture, Utilization and Sequestration

Through our CCUS business, we aim to reduce man-made GHG emissions by capturing CO_2 emitted in connection with natural gas activities, whether from our own operations or third party operations, as well as from other energy and industrial sources. Our process involves capturing CO_2 before it is released into the atmosphere and then compressing the captured CO_2 and transporting it via pipeline to sites where it can be injected into underground injection control ("UIC") wells. Although we formally launched our CCUS business in March 2022 with the establishment of BKV dCarbon Ventures, we have been evaluating project opportunities and developing our CCUS business for over 20 months. The development of our CCUS business has progressed rapidly, supported by internal engineering, business development and regulatory professionals, along with academics and CCUS-focused partnerships. We believe that with a continued and timely execution of our business plans, we will begin generating positive CCUS business returns via tax credits and other tax benefits by the end of 2023, and we expect to begin generating positive Adjusted EBITDAX in 2025. We currently expect to be capable of funding our entire CCUS business with cash flows from operations, as well as from a variety of external sources, at our discretion, which may include joint ventures, project-based equity partnerships and federal grants.

We seek to execute CCUS projects with attractive standalone economics for high, medium and low CO_2 concentration streams that contribute to our goals of the full elimination and/or offset of the Scope 1 and 2 emissions in our owned and operated upstream businesses by the end of 2025 and of the Scope 1, 2 and 3 emissions from our owned and operated upstream businesses by the early 2030s. We estimate that our owned and operated upstream Scope 1 and 2 emissions were approximately 2.2 Mtpy CO_2e as of September 30, 2022 and that our owned and operated upstream Scope 1, 2 and 3 emissions were approximately 16.1 Mtpy CO_2e as of September 30, 2022. See "— *Path to Net Zero Emissions*" below for a description of how we estimate our Scope 1, 2 and 3 emissions. Additionally, we have identified twelve potential CCUS projects that we believe are commercially viable based on economics supported by the carbon tax credits available under Section 45Q of the Code ("Section 45Q tax credits") and that we believe can be completed by 2029 in order to achieve our Scope 1, 2 and 3 emissions goals. Of these twelve identified projects:

- we have reached FID and entered into definitive agreements with respect to the Barnett Zero Project and reached internal FID for the Cotton Cove Project, which have a combined forecasted sequestration volume of approximately 0.27 Mtpy CO_2e by the end of 2024;
- three are natural gas processing ("NGP") projects that we anticipate reaching FID by December 31, 2023 and, if FID is approved, achieving forecasted sequestration volume of approximately 1.39 Mtpy CO_2e by the end of 2025;
- three are higher concentration industrial projects that we anticipate reaching FID by the end of 2023 and, if FID is approved, achieving first sequestration between 2026 and 2029 and which have a combined forecasted sequestration volume of approximately 14.5 Mtpy CO_2e; and

- four other CCUS projects are under evaluation that have a combined forecasted sequestration volume of approximately 13.24 Mtpy CO_2e.

In addition, we expect to continuously identify and evaluate additional CCUS projects. While the aggregate forecasted volume of carbon capture and sequestration from our twelve identified potential CCUS projects is approximately 30 Mtpy CO_2e, which is more than our current Scope 1, 2 and 3 emissions from our owned and operated upstream businesses, we do not anticipate achieving an aggregate yearly volume of sequestration of 30 Mtpy CO_2e by the early 2030s and there can be no guarantee that we will be able to execute and complete any of the twelve identified CCUS projects (or any other CCUS projects) with sufficient volumes of CO_2e sequestration to achieve our Scope 1, 2 and 3 emissions goals on the timelines we anticipate. Our CCUS business and all of our CCUS projects are in the early stages of development and while we have reached FID and entered into definitive agreements with respect to the Barnett Zero Project and reached internal FID for the Cotton Cove Project, we have not reached FID or executed any definitive agreements with respect to the other ten potential projects we have identified above and may not be able to reach agreement on terms acceptable to us, or to achieve our projected timeline for commercial operations. In addition, the development of our CCUS business is expected to require material capital investments, and the commercial viability of our CCUS projects depends, in part, on certain financial and tax incentives provided by the U.S. federal government. In particular, we must meet certain wage and apprenticeship requirements in order to qualify for enhanced Section 45Q tax credits, the details of which have not yet been released and are to be included in future guidance. For more information about the risks involved in our CCUS business, see "*Risk Factors — Risks Related to Our CCUS Business* ."

Barnett Zero Project

In June 2022, we reached FID and entered into a definitive agreement in connection with our first high concentration CCUS project in the Barnett with EnLink Midstream, LLC ("EnLink"). This CCUS project, which we refer to as the Barnett Zero Project, will separate CO_2 from substantially all of our EnLink-gathered natural gas production. In the Barnett Zero Project, EnLink will transport our natural gas produced in the Barnett to its natural gas processing plant in Bridgeport, Texas, where the CO_2 waste stream will be captured, compressed and then sequestered via our nearby injection well. We expect the Barnett Zero Project to achieve an average sequestration rate of up to approximately 185,000 metric tons of CO_2e per year. We estimate this initial CCUS project will represent more than 8% of our estimated Scope 1 and 2 emissions from our owned and operated upstream businesses, with the first injection scheduled for the second half of 2023. Following commencement of commercial operations of our project with EnLink, we intend to use this project as a prototype for modular projects that can be repeated and quickly scaled.

Cotton Cove Project

On October 18, 2022, BKV dCarbon Ventures reached internal FID to develop our second CCUS project in the Barnett. This CCUS project, which we refer to as the Cotton Cove Project, will separate, dispose of, and geologically sequester CO_2 generated as a byproduct of our natural gas production in the Barnett and will utilize our newly acquired BKV Midstream assets to do so. We estimate the Cotton Cove Project will geologically sequester up to approximately 45,000 metric tons of CO_2e per year initially, which we expect will increase to an average of up to approximately 82,350 metric tons of CO_2e per year by the end of 2024 through ongoing well development in the area. We currently estimate the total investment required by us for the Cotton Cove Project to be between approximately $14.0 and $24.0 million. We intend to own or hold the source, the capture, the transportation pipeline and the lease to the pore space with respect to this project. We are targeting commencement of CO_2 sequestration activities by the first half of 2024, subject to our ability to secure all required permits, at which point we expect this project will be the second of our current modular line of identified potential NGP projects under evaluation as described above. As part of the Cotton Cove Project, we also seek to pilot, and then scale, post-combustion carbon capture technology that would allow us to sequester up to an additional approximately 250,000 metric tons per year of captured CO_2e from low concentration emissions from within our BKV Midstream operations. As part of this process, we intend to utilize compressor waste heat to reduce energy requirements and cost. We expect this project will offset our current Scope 1 and 2 annual emissions from our owned and operated upstream businesses by approximately 4% by 2025. Although the Barnett Zero Project and the Cotton Cove Project

represent approximately 8% and 4%, respectively, of our estimated Scope 1 and 2 emissions from our owned and operated upstream businesses, the emissions reductions from these two projects combined represent approximately 0.27 Mtpy CO_2e, or 45% of our remaining Scope 1 and 2 emissions after taking into account the expected reductions from our "Pad of the Future" program, emissions and leak surveys, and installation of solar power (estimated to be approximately 0.61 Mtpy CO_2e), bringing us closer to our goal of reaching net zero Scope 1 and 2 emissions across our owned and operated upstream businesses by the end of 2025. See "— *Path to Net Zero Emissions*."

BKVerde

In August 2022, we entered into a development agreement with Verde CO2 CCS, LLC ("Verde CO2"), an independent carbon capture and sequestration developer and operator, to identify, evaluate and develop additional CCUS projects throughout the United States. We believe our agreement with Verde CO2 will expand our CCUS and GHG emissions reduction efforts as we seek to decarbonize industrial point sources of various sizes through carbon capture and permanent sequestration. As of November 17, 2022, we have paid $8.3 million to Verde CO2 under the development agreement. We currently expect to invest up to $250.0 million over the next three years to fund efforts by BKVerde, LLC ("BKVerde"), a subsidiary of BKV dCarbon Ventures, to efficiently identify and evaluate a pipeline of feasible CCUS projects, and to execute on those projects. We expect to fund BKVerde through BKV's cash flow from operations. See "*— Recent Developments — CCUS Project Development with Verde CO2*."

Additional Projects

In addition to the Barnett Zero Project and the Cotton Cove Project, we have identified three potential NGP projects that we expect to reach FID by year end 2023. A significant portion of the carbon capture infrastructure and midstream infrastructure necessary to execute these potential NGP projects already exists. Therefore, if approved at FID, and assuming we are able to execute definitive agreements on the terms and timeline we believe are obtainable, we expect these projects to start sequestration operations before December 31, 2025. We expect these three NGP projects to have individual sequestration volumes of approximately 0.29, 0.5 and 0.6 Mtpy CO_2e, respectively, and a combined aggregate sequestration volume of approximately 1.39 Mtpy CO_2e. The volume of forecast sequestration from these projects, together with approximately 0.27 Mtpy CO_2e expected to be sequestered by the Barnett Zero Project and the Cotton Cove Project (all together having a combined forecast sequestration volume of approximately 1.66 Mtpy CO_2e), would be capable of offsetting more emissions by December 31, 2025 than our remaining Scope 1 and 2 emissions from our owned and operated upstream businesses (estimated to be approximately 0.61 Mtpy CO_2e, after taking into account the expected reductions from our "Pad of the Future" program, emissions and leak surveys, and installation of solar power). See "— *Path to Net Zero Emissions*." However, we have not reached FID or entered into definitive agreements for any of these three additional NGP projects and we may not complete all or any of these three additional NGP projects by December 31, 2025, in which case, we may not be able to achieve our goal of net zero Scope 1 and 2 emissions from our owned and operated upstream businesses by the end of 2025.

We are currently evaluating and have begun commercial discussions with respect to seven additional CCUS projects. Three of these seven additional CCUS projects are potential industrial projects that we anticipate will reach FID by the end of 2023. If approved at FID, and assuming definitive agreements are timely executed containing terms we believe are obtainable, we expect to initiate sequestration operations between 2026 and 2029. We expect these three potential industrial CCUS projects to have a combined aggregate sequestration volume of approximately 14.5 Mtpy CO_2e. We anticipate that the remaining four potential CCUS projects may reach FID during or after 2024. If approved at FID, and assuming definitive agreements are timely executed containing terms we believe are obtainable, we expect such projects to begin sequestration operations between 2026 and 2029. We expect these four potential CCUS projects to have a combined aggregate sequestration volume of approximately 13.24 Mtpy CO_2e. These seven potential CCUS projects have a combined forecasted sequestration volume of approximately 27.74 Mtpy CO_2e. We believe that we will be able to complete a sufficient number of these or other CCUS projects in order to meet our Scope 1, 2 and 3 emissions goals by the early 2030s. See "— *Path to Net Zero Emissions*" for a more detailed description of how we anticipate reaching our Scope 1, 2 and 3 emissions goals.

We estimate the aggregate investment required by us to offset all of our Scope 3 emissions through a sufficient number of the identified potential CCUS projects and associated carbon credits, to be between approximately $1.3 billion and $1.8 billion over the next seven to ten years. We expect to be capable of funding this investment cost through our cash flows from operations, as well as a variety of external sources, at our discretion, which may include joint ventures, project-based equity partnerships and federal grants. We are able to moderate the capital required to fund our CCUS business, as our CCUS business model provides flexibility for us to selectively invest in only the sequestration component of a project or in the capture, transportation and sequestration components, depending on the scope of the project. In addition, we anticipate that some of the project costs will be borne by third party investors in these projects, including emitters, landowners and other stakeholders.

We believe we can achieve our goal of net zero Scope 1, 2 and 3 emissions for our owned and operated upstream businesses by the early 2030s if we are able to complete the minimum number of these identified CCUS projects having a sufficient forecasted volume of carbon capture to offset those emissions on the timeline and upon terms that we believe are obtainable. However, large scale CCUS projects are subject to numerous risks and uncertainties, including reaching definitive agreements with third parties and obtaining necessary permits and other regulatory approvals, and we may be unable to execute on some or all of these projects on the timeline we anticipate, on terms acceptable to us or at all, in which case, we may not be able to achieve our net zero emissions goals on the timelines we have established.

To help us achieve our goal of becoming a leader in CCUS, we established a steering committee that includes two engineers renowned for their work in the development of CCUS projects: Dr. Paitoon (P.T.) Tontiwachwuthikul (Professor of Industrial & Process Systems Engineering & Fellow, Canadian Academy of Engineering) and Dr. Malcolm A. Wilson (Program Director, CO_2 Management, Office of Energy & Environment (OEE), Adjunct Professor of Engineering and Graduate Studies). These individuals are professors at the University of Regina, a leading carbon capture research institution, and each has been engaged in CCUS for over 30 years.

For more information on our CCUS business, see " *Business — Overview — Our Operations — Carbon Capture, Utilization and Sequestration," and "Business — Our Operations — Carbon Capture, Utilization and Sequestration*."

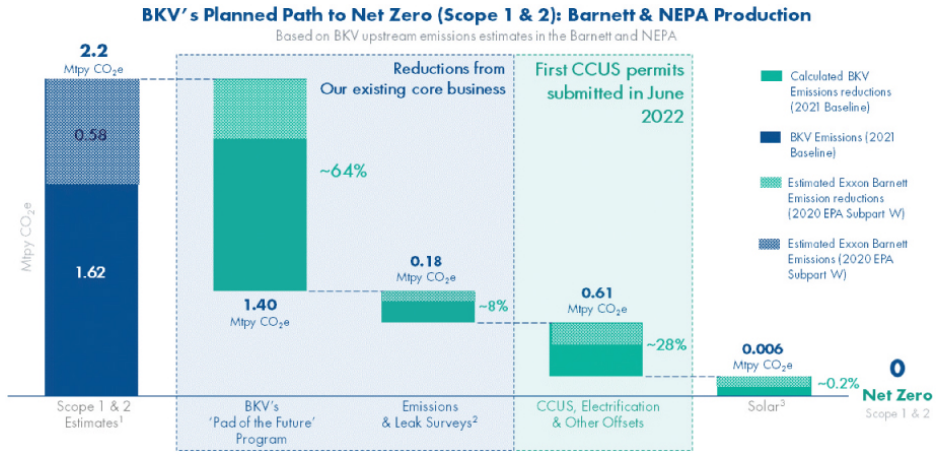
Path to Net Zero Emissions

We estimate that our owned and operated upstream Scope 1 and 2 emissions were approximately 2.2 Mtpy CO_2e as of September 30, 2022. Our estimates are based on information with respect to our operated assets in the Barnett and NEPA through fiscal year 2021 and reported by BKV pursuant to the Subpart W requirements of the federal Clean Air Act GHG reporting program regulations of the U.S. Environmental Protection Agency ("EPA") and supplemented with additional inventories that are not required to be reported under Subpart W, as well as 2020 Subpart W emission information submitted by XTO Energy, Inc. for the assets acquired in the Exxon Barnett Acquisition. We will further evaluate these estimates as a part of our combined Subpart W submission for calendar year 2022 and will factor in additional inventory efforts performed during 2022. These estimates fluctuate throughout the year and will be updated on an annual basis to reflect any changes in inventory, production throughput, and emissions reduction retrofits or equipment modifications.

We estimate that our owned and operated upstream Scope 3 emissions were approximately 13.9 Mtpy CO_2e as of September 30, 2022. Our Scope 3 GHG emissions are currently estimated in accordance with IPIECA's "Sustainability reporting guidance for oil and gas industry", dated March 2020, specifically for Scope 3 emissions as estimated per Category 11 (Use of Sold Product). Scope 3 emissions estimated using source Category 11 represent the majority of Scope 3 emissions from our operations with minor contributions from other source categories. Additionally, our estimated Scope 3 emissions calculations assume that all natural gas produced is combusted and does not account for other potential end use of natural gas. Scope 3 mass emissions are calculated using the EPA's prescribed emissions factors for the speciated natural gas (methane and ethane) as well as NGLs assuming Y-grade NGLs. CO_2e emissions are estimated using AR4 Global Warming Potentials, similar to those used by the EPA. Our projected Scope 3 CO_2e emissions are estimated at an approximated year-end production volume of 900 million standard cubic feet net equivalent per day of gas, with an approximate split of 80% natural gas (95% methane and 5% ethane)

and 20% NGLs. Our NGL constituents are estimated based on average constituent NGL barrel. Allocating the entire 900 million standard cubic feet net equivalent per day towards combustion as the end use, applying suitable combustion emission factors from the EPA, and using AR4 GWPs, Scope 3 emission from our owned and operated upstream operations are estimated to be approximately 13.9 Mtpy CO_2e. We currently engage third party consultants to develop, estimate and review our Scope 3 emissions.

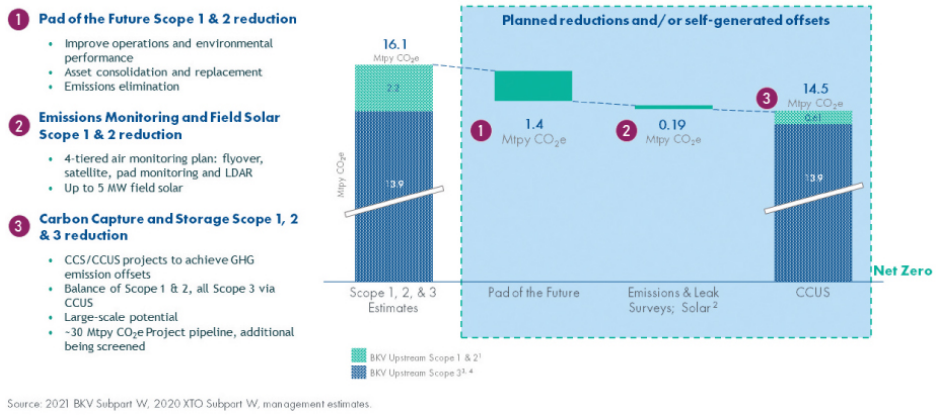
The charts below reflect (i) our owned and operated upstream Scope 1 and 2 emissions estimates as of September 30, 2022, including Scope 1 and 2 emissions estimates from the Exxon Barnett Acquisition, and (ii) our owned and operated upstream Scope 3 emissions estimates as of September 30, 2022, including Scope 3 emissions estimates from the Exxon Barnett Acquisition. These two charts also reflect our intended path to net zero Scope 1 and 2 emissions by the end of 2025 and net zero Scope 1, 2 and 3 emissions by the early 2030s, in each case, for our owned and operated upstream businesses. We intend to achieve these goals through our "Pad of the Future" emissions reductions, emissions and leak surveys, and installing solar power and executing CCUS projects.



(1) Scope 1 and 2 calculated emissions are based on 545 MMscf/d production volume for 2021 BKV Subpart W in the Barnett, 167 MMscf/d production volume for 2021 BKV Subpart W in NEPA, and 352 MMscf/d production volume with respect to the acquired Exxon Barnett assets based on 2020 Subpart W submissions.

(2) Emissions surveys to accomplish a one-to-two month leakage review period versus 12-month period which must have regulatory updates (current proposed OOOO.b,c) to include continuous flyover/satellite technology sensitivities.

(3) Installation of a 2.5 MW to 5 MW solar farm. We have obtained permits for 2.5 MW and are in the process of obtaining permits for the remaining 2.5 MW.



Source: 2021 BKV Subpart W, 2020 XTO Subpart W, management estimates.

(1) Scope 1 and 2 calculated emissions are based on 545 MMscf/d production volume for 2021 BKV Subpart W in the Barnett, 167 MMscf/d production volume for 2021 BKV Subpart W in NEPA, and 352 MMscf/d production volume with respect to the acquired Exxon Barnett assets based on 2020 Subpart W submissions.

(2) Emissions surveys to accomplish a one-to-two month leakage review period versus 12-month period which must have regulatory updates (current proposed OOOO.b,c) to include continuous flyover/satellite technology sensitivities. Installation of a 2.5 MW to 5 MW solar farm. We have obtained permits for 2.5 MW and are in the process of obtaining permits for the remaining 2.5 MW.

(3) Scope 3 calculated emissions are based on an estimated net production rate of approximately 900 MMscfe/d (approximately 730 MMscf/d of gas and 28,000 Bbl/day of NGLs).

(4) Scope 3 calculated emissions are estimated assuming fuel-based usage of all produced natural gas and NGLs. Approximately 58% of NGLs are assumed to be combusted for fuel while 100% of all natural gas produced is assumed to be combusted for fuel. Scope 3 emissions estimation methodology is therefore considered to be conservative.

Planned Path to Net Zero (Scope 1 and 2)

Our “Pad of the Future” program implements pad level design improvements to reduce pad level usage of natural gas, reduce GHG emissions, and maintain operational continuity. As of September 30, 2022, we had implemented elements of our “Pad of the Future” on approximately 2,200 of our existing wells, thereby eliminating an aggregate of approximately 0.51 Mtpy CO_2e in GHG emissions from commencement in the fourth quarter of 2021 through such date. These reductions are calculated by using our pneumatic and other pad inventories and such emissions are factored to be eliminated once the system has been converted from natural gas supplied to compressed air or electric. We expect to implement elements of our “Pad of the Future” program on more than 6,000 of our existing wells by the end of 2025 for an aggregate estimated cost of approximately $36.9 million. Once this expansion is completed, we expect to eliminate an aggregate of approximately 1.40 Mtpy CO_2e, or approximately 64%, of the currently estimated annual Scope 1 and 2 emissions from our owned and operated upstream businesses.

Our leak detection and repair emissions monitoring program involves continuous ground-based instrument monitoring, satellite-based monitoring, aerial flyovers, and on the ground leak detection and repair inspections. In addition, we expect to install a 2.5 MW to 5 MW solar farm, which is scheduled to begin generating power in the second quarter of 2023. We have obtained permits for 2.5 MW and are in the process of obtaining permits for the remaining 2.5 MW. For every 1,000 kilowatt-hours of electricity produced by an eligible solar facility, one SREC is awarded. For a solar facility to be credited with that SREC,

the system must be certified and registered by state agencies. The solar farm is expected to generate enough SRECs that, when combined with our leak detection and repair emissions monitoring program, is expected to eliminate or offset approximately 0.18 Mtpy CO_2e in GHG emissions.

Further, as discussed under "— *Carbon Capture, Utilization and Sequestration"* above, we believe that the Barnett Zero Project and the Cotton Cove Project, together with the three additional NGP projects that we have identified, are capable of offsetting more than the approximately 0.61 Mtpy CO_2e of the Scope 1 and 2 emissions from our owned and operated upstream businesses that we currently estimate will remain after taking into account the expected reductions from our "Pad of the Future" program, emissions and leak surveys, and installation of solar power. Although no definitive agreements have been entered into with respect to any of these additional NGP projects, we expect all three to reach FID by year end 2023. A significant portion of the carbon capture infrastructure and midstream infrastructure necessary to execute these potential NGP projects already exists. Therefore, if approved at FID, and assuming we are able to execute definitive agreements on the terms and timeline we believe are obtainable, we expect these projects to start sequestration operations before December 31, 2025. We expect these three NGP projects to have individual sequestration volumes of approximately 0.29, 0.5 and 0.6 Mtpy CO_2e, respectively, and a combined aggregate sequestration volume of approximately 1.39 Mtpy CO_2e. The volume of forecast sequestration from these projects, together with approximately 0.27 Mtpy CO_2e expected to be sequestered by the Barnett Zero Project and the Cotton Cove Project (all together having a combined forecast sequestration volume of approximately 1.66 Mtpy CO_2e), would be capable of offsetting more emissions by December 31, 2025 than our remaining Scope 1 and 2 emissions from our owned and operated upstream businesses (estimated to be approximately 0.61 Mtpy CO_2e, after taking into account the expected reductions from our "Pad of the Future" program, emissions and leak surveys, and installation of solar power). However, we have not reached FID or entered into definitive agreements for any of these additional potential CCUS projects and have not reached FID with respect to any of them. If we are unable to complete any of these three additional CCUS projects by December 31, 2025, we may not be able to achieve our goal of net zero Scope 1 and 2 emissions from our owned and operated upstream businesses by the end of 2025.

Planned Path to Net Zero (Scope 1, 2 and 3)

We also aspire to offset the Scope 3 emissions impact of our owned and operated upstream businesses by the early 2030s, which we estimate to be approximately 13.9 Mtpy CO_2e as of September 30, 2022. As discussed in "— *Carbon Capture, Utilization and Sequestration*," above, we have identified twelve potential CCUS projects that we believe are commercially viable, including the Barnett Zero Project, the Cotton Cove Project and the three potential NGP projects, that we estimate have a combined forecasted volume of carbon capture and sequestration of approximately 30 Mtpy CO_2e (which is more than our current Scope 1, 2 and 3 emissions from our owned and operated upstream businesses). However, there can be no guarantee that we will be able to execute and complete any of these identified CCUS projects. If we are not able to complete CCUS projects having a sufficient forecast volume of carbon capture to offset our Scope 1, 2 and 3 emissions on the timeline and upon terms that we believe are obtainable, we may not be able to achieve our goal of net zero Scope 1, 2 and 3 emissions from our owned and operated upstream businesses by the early 2030s. Large scale CCUS projects are subject to numerous risks and uncertainties and there can be no guarantee that we will be able to achieve our net zero Scope 1, 2 and 3 emissions goal.

In addition, although we believe our current path to net zero will be sufficient to reduce emissions related to our existing production, the future growth of our natural gas production, midstream and power assets will result in additional CO_2e emissions. We believe our approach to reducing the emissions of our direct operations is repeatable and scalable. Through continued investment and expansion of our "Pad of the Future" program, our emissions and leak surveys as well as additional CCUS and solar projects, we believe will be able to eliminate and/or offset any such additional emissions resulting from our continued growth.

Business Strategy

Our strategy is to create value for our stockholders by managing and growing our integrated asset base and focusing on our net zero objectives. Our strategy has the following principal elements:

- **Deliver robust returns to stockholders.** We intend to prioritize delivering strong returns to our stockholders through our dividend policy and focus on creating stockholder value. See "*Dividend*

Policy." We believe our operational expertise in successfully drilling and refracturing wells, acquiring and integrating assets purchased at attractive valuations and maintaining financial discipline will underpin our ability to meet our stockholder return goals. Our integrated businesses and natural gas-weighted, low-decline PDP reserves collectively reduce our downside risk while providing asymmetric upside returns from the confluence of commodity price uplift potential, operational improvement and development opportunities, and future accretive acquisition opportunities. The payment of any future dividends on our common stock will be at the discretion of our board of directors and may vary significantly from quarter to quarter and may be zero. Any determination to pay dividends and the amount of any such dividends will depend on, among other factors, the restrictions under our Term Loan Credit Agreement and the Revolving Credit Agreement, as described under "*Dividend Policy*." See "*Risk Factors — Risks Related to the Offering and Our Common Stock*."

- **Optimize the value of our core businesses.** We utilize technology and data analysis to enhance our assets and operations, which we believe improves operational efficiencies, reduces our emissions and helps us realize our operational and financial goals as we continue to scale our business. For example, our "Pad of the Future" program, which includes conversion of natural gas-powered instrument pneumatics to compressed air-powered instruments on existing pads, combined with emission and leak surveys, reduces our GHG emissions by 72%, based on current Scope 1 and 2 emissions from production in our owned and operated natural gas upstream business. Our "Pad of the Future" application also improves pad efficiencies and operating revenue. As of the year ended December 31, 2021, employing technology and operational excellence, we reduced our lease operating costs in the Barnett by 14% since October 2020, and in NEPA by 26% since January 2019, based on prior 12-month rolling averages. Additionally, our refrac and long lateral drill programs have allowed us to organically grow our reserves base. As of September 30, 2022, our Barnett refrac program has added 491 Bcfe of proved reserves since its inception in early 2021, with an estimated 516 Bcfe of probable reserves and 167 Bcfe of possible reserves, at an average of approximately $0.70/Mcfe finding and development costs during 2021. This refrac program employs specifically designed perforating technology and a suite of innovative refrac techniques, as well as advanced refrac designs and diversion methods to maximize reserve recovery and economics from legacy Barnett wells. Our Barnett new well drilling program has added 1.1 Tcfe of proved reserves since our entry into the Barnett, with a total estimate of approximately 669 Bcfe of probable reserves and 360 Bcfe of possible reserves. By combining our reserves into a growing asset base with vertically integrated components, we believe we can enhance margins and create a "closed loop" business that reduces Scope 1 and 2 emissions in our owned and operated upstream businesses and captures margin across the value chain. Estimates of probable and possible reserves are inherently imprecise and are more uncertain than proved reserves but have not been adjusted for risk due to that uncertainty, and therefore they may not be comparable with each other and should not be summed either together or with estimates of proved reserves. For more information regarding the presentation of probable and possible reserves, see "*Business — Preparation of Reserve Estimates and Internal Controls*."
- **Grow through opportunistic, synergistic acquisitions.** A significant element of our business strategy is gaining scale through accretive acquisitions. We have a track record of growth through acquisitions, which we believe have been at attractive valuations. Since 2016, we have completed 19 acquisitions and two CCUS partnerships, resulting in greater than a 100% compound annual growth rate of Adjusted EBITDAX as of September 30, 2022. We believe our business model, management team experience and application of technology enable us to quickly and efficiently integrate additional upstream, midstream and power assets into our business.
- **Maintain a disciplined financial strategy.** We believe we can execute on our business plan and grow our business while continuing to generate substantial Adjusted Free Cash Flow. We target a Maintenance Reinvestment Rate of less than 30% and an Upstream Reinvestment Rate of less than 40%. We are focused on our goal of maintaining a conservative financial profile, with a long-term leverage target of less than 1.0x Total Net Leverage Ratio. Although we may allow our leverage ratio to exceed our target in connection with a strategic acquisition, we would seek to return our leverage level to below 1.0x as soon as reasonably possible thereafter through Adjusted Free Cash Flow and, if needed, reduced activity levels. To support the generation of future Adjusted Free Cash Flow, we have a policy of hedging approximately 25% to 60% of our production volumes over a given

12 to 24-month period. We believe our capital efficient project inventory, low-decline natural gas production and multiple, integrated business lines will provide consistent returns through varying business cycles. We intend to apply our cash flows to manage our indebtedness in line with our leverage target, fund our capital expenditure program, enhance stockholder value and execute opportunistic acquisitions across our four business lines. Adjusted EBITDAX is not a financial measure calculated in accordance with GAAP. See "— *Summary Historical Financial Information — Non-GAAP Financial Measures*" for a description of this measure and a reconciliation to the most directly comparable GAAP measure.

- **Focus on our net zero objectives.** We seek to apply our integrated business model, CCUS projects, and carbon-negative initiatives to realize Scope 1 and 2 net zero upstream owned and operated emissions by the end of 2025. We believe we can achieve this through our "Pad of the Future" emissions reductions program, emissions surveys, installing solar power and executing CCUS projects. We believe that carbon emissions within the United States can be reduced substantially through carbon capture on natural gas production, power plants, processing facilities and other energy and industrial infrastructure. As such, in addition to lowering emissions in our direct operations, CCUS for third parties has become a core focus of our business plan. We expect our CCUS projects to represent a meaningful portion of our budgeted capital expenditures going forward as we advance our long-term goal of eliminating and/or offsetting Scope 3 emissions from our owned and operated upstream businesses.
- **Encourage innovation.** Our distinctive culture encourages innovation with a value-driven focus that feeds into our competitive advantage. For example, our emphasis on the efficient application of modern technology led to the development of our "Pad of the Future" program, our advancements in Barnett refracs and other operational improvements. We intend to continue to develop, retain and add to our already talented, experienced and forward-thinking employees. Our unified team and mantra of "Being a force for good" underpin our core values and provides us with confidence in our ability to successfully manage and grow our business.

Competitive Strengths

We have a number of strengths that we believe will help us successfully execute our business strategy, including:

- **Integrated asset base well positioned for sustainable growth.** Our upstream, midstream and power asset bases reside in geographically concentrated areas with numerous asset acquisition opportunities in close proximity. Our proven ability to successfully negotiate, close and integrate these acquisition opportunities quickly and cost effectively will allow us to continue to grow our portfolio of assets synergistically. We believe that scale and the continued application of technological developments and operational excellence, combined with stable, low-decline production profiles, will continue to generate significant capital efficient development opportunities in the Barnett and NEPA.
- **High quality, low decline assets serving key demand markets.** Through a series of accretive acquisitions we have established an extensive and largely contiguous acreage position in two key markets, the Barnett and NEPA. Our Barnett assets cover approximately 468,000 net acres, with an approximately 80.37% Effective NRI, and are located in close proximity to key Gulf Coast industrial and LNG demand centers. Our NEPA assets consist of 37,000 net acres in one of the most prolific parts of the Marcellus Shale and are located within less than 200 miles to key demand markets in the U.S. Northeast. We believe the geologic, operational and engineering risks associated with our leasehold acreage have been significantly mitigated through historical development activity. Our PDP reserves had an estimated 7% year-over-year average base decline rate over the next 10 years as of September 30, 2022. Additionally, we have an inventory of over 10 years of refrac and new drill locations within our core acreage that give us the flexibility to maintain or slightly grow current production levels, depending on the commodity cycle.
- **Lower emissions energy production.** We are focused on achieving Scope 1 and 2 net zero operational emissions from our owned and operated upstream production of natural gas by the end of 2025. We believe we have a comprehensive ESG program, which is overseen and directed by an executive ESG steering committee. In 2021, we certified our entire NEPA production and, in 2022, we certified

a portion of our Barnett production and, in each case, achieved a Gold rating with Project Canary's TrustWell environmental assessment (Project Canary is an environmental certification and ESG data company). This is the second highest rating a company can receive for its production, qualifying the certified portion of our NEPA and Barnett natural gas production as Responsibly Sourced Gas ("RSG"), which we believe could command a premium in the marketplace. In the future, we intend to expand beyond RSG, with aspirations for fully carbon neutral gas sales through net zero Scope 3 from our owned and operated upstream businesses, which we expect can be achieved by the early 2030s. Additionally, we have a plan to achieve net zero Scope 1 and 2 emissions by the end of 2025 based on our "Pad of the Future" emissions reductions, emissions surveys, installing solar power and executing CCUS projects. We believe BKV dCarbon Ventures will be able to capture and sequester at least 1.0 Mtpy CO_2e by the end of 2025, which exceeds the balance of our current Scope 1 and 2 emissions from our owned and operated upstream businesses. However, if we are not able to complete CCUS projects having sufficient forecasted volumes of CO_2e, we may not be able to achieve this goal.

- **Efficient use of capital.** Our deep, high-graded inventory of refrac opportunities coupled with our inventory of new drill locations allow us to create meaningful additional cash flow with comparatively modest additional capital investments. We utilize operational improvements such as operational process and procurement efficiencies, use of existing field infrastructure, innovative and cost-effective refrac techniques and designs (including diversion methods), drilling long laterals in the Barnett, and optimizing available midstream capacity to further maximize our capital efficiency. Through our midstream, power and CCUS business lines, we are capturing margin across the value chain.
- **Well capitalized and conservative balance sheet.** As of September 30, 2022, we had a Total Net Leverage Ratio of 1.3x. Following the completion of this offering, we intend to continue to maintain a strong balance sheet and fund our operations predominantly with internally generated cash flows. We believe that the low decline, predictable nature of our upstream production profile, combined with our hedging plan and reinvestment rate targets, will allow us to successfully meet our leverage goals.
- **High caliber and proven management team.** We maintain a highly experienced and knowledgeable management team with an average of over 25 years of experience among our senior management team. Our leadership team has significant experience managing integrated energy and power assets for large-scale enterprises, including companies such as PTT Exploration and Production Public Company Limited ("PTT Exploration") and BP p.l.c. ("BP"). Furthermore, our sponsor, Banpu, one of Asia Pacific's largest integrated energy companies, provides us with unique and valuable insights into optimizing our integrated energy business.

Recent Developments

Barnett Zero CCUS Project with EnLink

On June 8, 2022, BKV dCarbon Ventures and EnLink reached FID to develop our first CCUS project and entered into a definitive agreement to dispose of, and geologically sequester, CO_2 generated as a byproduct of the production of our natural gas in the Barnett and will utilize our newly acquired BKV Midstream assets. This CCUS project, which we refer to as the Barnett Zero Project, will separate CO_2 from substantially all of our EnLink-gathered natural gas production, which we expect to achieve an average sequestration rate of up to approximately 185,000 metric tons of CO_2e per year. We currently estimate the total investment required by us for the Barnett Zero Project to be between $20.0 and $22.0 million. We are targeting commencement of CO_2 sequestration activities by the second half of 2023, subject to our ability to secure all required permits, at which point we expect this project will be one of the first permanent commercial CO_2 disposal and sequestration projects to come online in the United States. We expect this project will offset our current Scope 1 and 2 annual emissions from our owned and operated upstream businesses by approximately 8%, bringing us closer to our goal of reaching net zero Scope 1 and 2 emissions across our owned and operated upstream businesses by the end of 2025.

Exxon Barnett Acquisition

On June 30, 2022, we closed the acquisition (the "Exxon Barnett Acquisition") of natural gas upstream and associated midstream infrastructure in the Barnett from XTO Energy, Inc. and Barnett Gathering LLC,

subsidiaries of Exxon Mobil Corporation, for a total purchase price of $750.0 million, plus additional contingent consideration of up to $50.0 million depending on future natural gas prices. Pursuant to the Exxon Barnett Acquisition, we acquired approximately 175,000 total net acres that are approximately 99% held by production, primarily in Tarrant, Johnson and Parker counties, and additional smaller positions in Jack, Wise, Denton, Erath, Hood and Ellis counties, Texas (our "2022 Barnett Assets"). These upstream assets include low decline wells, ideal for delivering consistent cash flow, and high average working interests of approximately 94% in over 2,100 operated wells. The Exxon Barnett Acquisition also included approximately 778 miles of gathering pipelines and compression and processing midstream infrastructure with, as of September 30, 2022, over 450 MMcf/d of throughput capacity and approximately 26 MMcf/d of third-party production being gathered on the system. In connection with the Exxon Barnett Acquisition, we entered into the Term Loan Credit Agreement (as defined herein) with a syndicate of banks and Bangkok Bank Public Company Limited (New York Branch), as the administrative agent. The Term Loan Credit Agreement includes up to $600.0 million of commitments for term loans to be used solely to fund a portion of the purchase price for the Exxon Barnett Acquisition and other costs and expenses associated with the acquisition. As of November 17, 2022, there was $570.0 million in aggregate principal amount outstanding under the Term Loan Credit Agreement. See "*Management's Discussion and Analysis of Financial Condition and Results of Operations — Liquidity and Capital Resources — Loan Agreements and Credit Facilities — Term Loan Credit Agreement*" for more information.

Amendment to Derivative Agreement

On August 4, 2022, we entered into an amendment to our ISDA Master Agreement with a counterparty to our derivative contracts pursuant to which we agreed to terminate or novate, at our election, at least $100.0 million of our derivative contracts. As of September 9, 2022, we terminated derivative contracts of $100.2 million with the counterparty to satisfy this requirement. In connection with such termination, we are required to make cash payments to the counterparty in an aggregate amount of $100.2 million, of which $30.0 million was paid in September 2022, an additional $30.0 million was paid on October 31, 2022, and the remaining $40.2 million must be paid by November 30, 2022. We intend to make the remaining payment with cash flows from operations. See "*Note 13 — Credit and Other Risk*" to our unaudited condensed consolidated financial statements included elsewhere in this prospectus for additional information regarding this agreement.

CCUS Project Development with Verde CO2

On August 22, 2022, we entered into a development agreement with Verde CO2 to identify, evaluate and develop CCUS projects throughout the United States. We believe our agreement with Verde CO2 will expand our CCUS and GHG emissions reduction efforts as we seek to decarbonize industrial point sources of various sizes through carbon capture and permanent sequestration. Pursuant to the development agreement, Verde CO2 will be responsible for the sourcing, development, performance and ongoing management of such CCUS projects and BKV dCarbon Ventures will provide funding for such projects. As of November 17, 2022, we have paid $8.3 million to Verde CO2 under the development agreement, and we currently expect to invest up to $250.0 million over the next three years to fund efforts by BKVerde, LLC ("BKVerde"), a subsidiary of BKV dCarbon Ventures, to efficiently identify and evaluate feasible CCUS projects, and to execute on those projects. We expect to fund BKVerde through BKV's cash flow from operations.

Revolving Credit Agreement

On August 24, 2022, we entered into a Revolving Credit Agreement (as amended by that certain First Amendment to Revolving Credit Agreement dated as of November 11, 2022, the "Revolving Credit Agreement") with Bangkok Bank Public Company Limited (New York Branch), as the administrative agent and sole initial lender. The Revolving Credit Agreement includes $100.0 million of commitments for unsecured revolving loans used for short-term working capital and operating needs. As of November 17, 2022, $45.0 million was outstanding under the Revolving Credit Agreement. See "*Management's Discussion and Analysis of Financial Condition and Results of Operations —Liquidity and Capital Resources — Loan Agreements and Credit Facilities — Revolving Credit Agreement*" for more additional information regarding the Revolving Credit Agreement.

Cotton Cove CCUS Project

On October 18, 2022, BKV dCarbon Ventures reached internal FID to develop our second CCUS project in the Barnett. This CCUS project, which we refer to as the Cotton Cove Project, will separate, dispose of, and geologically sequester CO_2 generated as a byproduct of our natural gas production in the Barnett and will utilize our newly acquired BKV Midstream assets to do so. We estimate the Cotton Cove Project will geologically sequester up to approximately 45,000 metric tons of CO_2e per year initially, which we expect will increase to an average of up to approximately 82,350 metric tons of CO_2e per year by the end of 2024 through ongoing well development in the area. We currently estimate the total investment required by us for the Cotton Cove Project to be between approximately $14.0 and $24.0 million. We intend to own or hold the source, the capture, the transportation pipeline and the lease to the pore space with respect to this project. We are targeting commencement of CO_2 sequestration activities by the first half of 2024, subject to our ability to secure all required permits, at which point we expect this project will be the second of our current modular line of identified potential NGP projects under evaluation as described in "*— Carbon Capture, Utilization and Sequestration.*" As part of the Cotton Cove Project, we also seek to pilot, and then scale, post-combustion carbon capture technology that would allow us to sequester up to an additional approximately 250,000 metric tons per year of captured CO_2e from low concentration emissions from within our BKV Midstream operations. As part of this process, we intend to utilize compressor waste heat to reduce energy requirements and cost. We expect this project will offset our current Scope 1 and 2 annual emissions from our owned and operated upstream businesses by approximately 4% by 2025. Although the Barnett Zero Project and the Cotton Cove Project represent approximately 8% and 4%, respectively, of our estimated Scope 1 and 2 emissions from our owned and operated upstream businesses, the emissions reductions from these two projects combined represent approximately 0.27 Mtpy CO_2e, or 45% of our remaining Scope 1 and 2 emissions after taking into account the expected reductions from our "Pad of the Future" program, emissions and leak surveys, and installation of solar power (estimated to be approximately 0.61 Mtpy CO_2e), bringing us closer to our goal of reaching net zero Scope 1 and 2 emissions across our owned and operated upstream businesses by the end of 2025. See "*— Path to Net Zero Emissions.*"

Letter of Intent with EEMNA

On November 11, 2022, we entered into a non-binding letter of intent with ENGIE Energy Marking NA, Inc ("EEMNA") to build a framework for verifiable environmental attributes with the use of carbon credits applied to natural gas energy. Under this framework, we intend to measure, reduce and verify emissions using operational technologies, such as continuous emissions monitoring. In addition, we expect to deliver sequestered carbon credits from our CCUS business to EEMNA under this marketing program. Project Canary, an environmental certification and ESG data company, will reconcile sensing technologies and measure, analyze, and report the environmental attributes of the sequestrated carbon to support decarbonization. This initiative strives to provide a market in which an LNG buyer, gas utility, power utility or other end-user can purchase measured and verified sequestrated carbon credits from a single, trusted company. These carbon credits would not apply toward a reduction of our own Scope 1, 2 or 3 owned and operated upstream emissions. We anticipate eventually selling to EEMNA, for marketing to end-users, net zero natural gas that incorporates measured, sequestrated carbon credits derived from our CCUS business.

Corporate Values, Management Team and Sponsor

The following corporate values underpin our corporate culture and decision-making: Deliver on Promises, Have Grit, Embrace Change, Show Courage, Solve Problems, Do Good and Be One BKV.

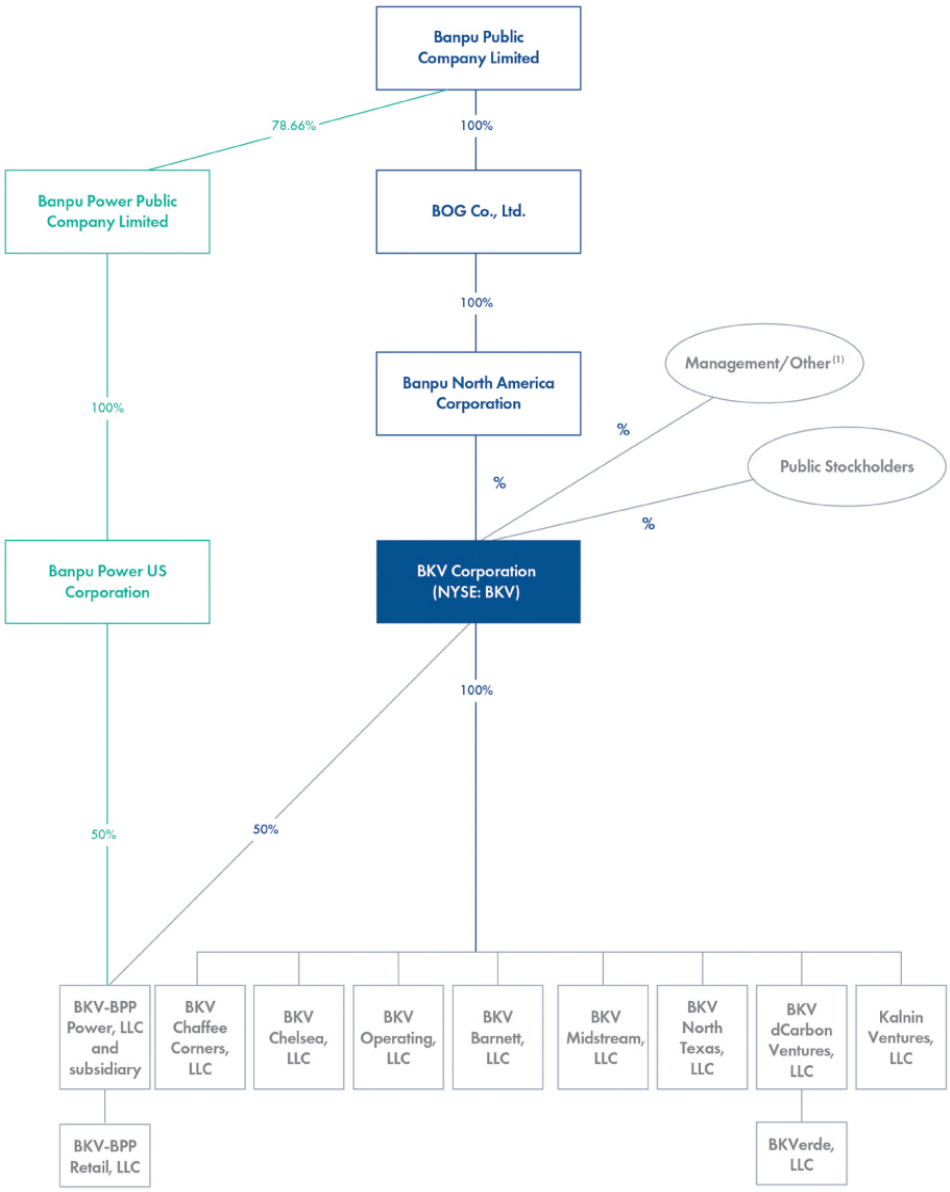
Our management team is led by our Chief Executive Officer and founder, Christopher P. Kalnin, who has approximately 22 years of experience in exploration and production ("E&P") (PTT Exploration & Production), management consulting (McKinsey & Company) and finance (Credit Suisse First Boston). Eric Jacobsen serves as our Chief Operating Officer with over 28 years of energy operational experience, including 11 years of experience in shale, 16 years of experience at BP and its predecessors and six years of experience at Noble Energy, Inc. John Jimenez serves as our Chief Financial Officer with over 30 years of international energy experience working with BP and Reliance Industries Limited.

BNAC, our majority stockholder, is an indirect, wholly owned subsidiary of Banpu, our ultimate parent company. Banpu is a multi-billion U.S. dollar market cap energy company publicly traded in

Thailand. With nearly four decades of experience in business operations covering 10 countries across the Pacific Rim region and the United States, Banpu is an international versatile energy provider committed to its Greener & Smarter strategy, which prioritizes environmentally sustainable businesses and leverages smart technologies and innovations. Upon completion of this offering, Banpu will beneficially own approximately % of our common stock (or approximately % if the underwriters exercise in full their option to purchase additional shares of our common stock). Banpu has informed us that although it may reduce a portion of its ownership position over time, it intends to remain a long-term stockholder and supporter of BKV. If, after this initial public offering, Banpu and its wholly owned subsidiaries cease to own at least 51% of our equity interests, or if they allow any lien to exist on our equity interests that they own, such event will be an event of default under the Term Loan Credit Agreement and the Revolving Credit Agreement. See "*Risk Factors — Risks Related to Our Relationship with Banpu and its Affiliates*."

Our Structure

The chart below displays a summary of our ownership structure after giving effect to this offering.



(1) Consists of management, directors and other employee and non-employee stockholders.

The information in the chart above does not include 10,000,000 additional shares of our common stock reserved for future awards pursuant to the BKV Corporation 2022 Equity and Incentive Compensation

Plan (the "2022 Plan"), including shares of common stock that may be issued upon vesting of equity awards that we expect to be granted in connection with this offering, and 1,000,000 shares of our common stock available for purchase by employees pursuant to the BKV Corporation Employee Stock Purchase Plan (the "ESPP").

Implications of Being an Emerging Growth Company

We qualify as an "emerging growth company" as defined in Section 2(a)(19) of the Securities Act of 1933, as amended (the "Securities Act"), including as modified by the Jumpstart Our Business Startups Act of 2012 (the "JOBS Act"). As a result, for so long as we qualify as an emerging growth company, we are eligible to take advantage of certain exemptions from various reporting requirements applicable to other public companies that are not emerging growth companies. These exemptions include:

- being permitted to present only two years of audited financial statements and only two years of related "*Management's Discussion and Analysis of Financial Condition and Results of Operations* " in this prospectus;
- not being required to comply with the auditor attestation requirements of Section 404 of the Sarbanes-Oxley Act of 2002, as amended (the "Sarbanes-Oxley Act");
- reduced disclosure obligations regarding executive compensation in our periodic reports, proxy statements and registration statements, including in this prospectus;
- not being required to comply with any new requirements adopted by the Public Company Accounting Oversight Board ("PCAOB") requiring a supplement to the auditor's report in which the auditor would be required to provide additional information about the audit and the financial statements of the issuer; and
- exemptions from the requirements of holding a nonbinding advisory vote on executive compensation and stockholder approval of any golden parachute payments not previously approved.

We have elected to take advantage of certain of the reduced disclosure obligations in this prospectus and may elect to take advantage of other reduced reporting requirements in our future filings with the Securities and Exchange Commission (the "SEC"). As a result, the information that we provide to our stockholders may be different than you might receive from other public reporting companies in which you hold equity interests.

The JOBS Act also provides that an emerging growth company can take advantage of an extended transition period for complying with new or revised accounting standards, but we have irrevocably elected not to avail ourselves of this exemption. Rather, we will adopt new or revised accounting standards on the relevant dates in which adoption of such standards is required for other public companies.

We may take advantage of these provisions until the last day of our fiscal year following the fifth anniversary of the date of the first sale of our common equity securities pursuant to an effective registration statement under the Securities Act. Such fifth anniversary will occur in 2027. However, if certain events occur prior to the end of such five-year period, including if we become a "large accelerated filer," our gross revenues for any fiscal year equal or exceed $1.235 billion or we issue more than $1.0 billion of non-convertible debt in any three-year period, we will cease to be an emerging growth company prior to the end of such five-year period.

We will remain an emerging growth company under the JOBS Act until December 31, 2022. While we continue to be an emerging growth company until the end of the 2022 fiscal year, we expect our revenues will exceed $1.235 billion during the year ending December 31, 2022 and we will no longer qualify as an emerging growth company as of December 31, 2022.

Controlled Company

We intend to apply to list our common stock on the NYSE under the symbol "BKV." Upon completion of this offering, BNAC will hold approximately % of our total outstanding shares of common stock (or approximately % if the underwriters exercise in full their option to purchase additional shares),

comprising more than 50% of the voting power of our outstanding common stock. As a result, we will be a “controlled company” within the meaning of the corporate governance rules of the NYSE. As a “controlled company,” we will be eligible to rely on exemptions from the obligation to comply with certain NYSE corporate governance requirements, including the requirements that:

- a majority of our board of directors consist of independent directors;
- we have a corporate governance and nominating committee that is composed entirely of independent directors with a written charter addressing the committee’s purpose and responsibilities; and
- we have a compensation committee that is composed entirely of independent directors with a written charter addressing the committee’s purpose and responsibilities.

These exemptions do not modify the independence requirements for our audit committee. As a controlled company, we will remain subject to the rules of the Sarbanes-Oxley Act and the NYSE that require us to have an audit committee composed entirely of independent directors. Under these rules, we must have at least one independent director on our audit committee by the date our common stock is listed on the NYSE, at least two independent directors on our audit committee within 90 days of the listing date, and at least three independent directors on our audit committee within one year of the listing date. We expect to have independent directors upon the closing of this offering.

While BNAC continues to control more than 50% of the voting power of our outstanding common stock, we qualify for, and intend to rely on, these exemptions. Accordingly, you will not have the same protections afforded to stockholders of companies that are subject to all of the corporate governance requirements of the NYSE.

If we cease to be a controlled company within the meaning of the applicable rules of the NYSE, we will be required to comply with these requirements after specified transition periods.

Contact Information

Our principal executive offices are located at 1200 17th Street, Suite 2100, Denver, Colorado 80202, and our telephone number at such address is (720) 375-9680. Our website address is *www.bkvcorp.com*. The contents of our website are not incorporated by reference herein and are not a part of, and shall not deemed to be a part of, this prospectus.

	The Offering
Issuer	BKV Corporation, a Delaware corporation
Securities offered	Common stock, par value $0.01 per share ("common stock")
Common stock offered by us	shares (or shares if the underwriters exercise in full their option to purchase additional shares)
Underwriters' option to purchase additional shares	The underwriters have an option for a period of 30 days to purchase up to an additional shares of our common stock.
Common stock outstanding immediately after this offering	shares (or shares if the underwriters exercise in full their option to purchase additional shares)
Use of proceeds	We estimate that the net proceeds to us from the sale of our common stock in this offering, after deducting underwriting discounts and commissions and estimated offering expenses payable by us, will be approximately $ million (or approximately $ million if the underwriters exercise in full their option to purchase additional shares), based on an assumed initial public offering price of $ per share (the midpoint of the price range set forth on the cover page of this prospectus). Of the net proceeds we receive from the sale of our common stock in this offering, we intend to use approximately $ million to repay in full the loan under the $75 Million A&R Loan Agreement (as defined herein) with BNAC, $ million to make additional contingent consideration payments payable in connection with the Devon Barnett Acquisition and the remainder for other general corporate purposes, including to fund the expansion of our CCUS business. See "*Use of Proceeds*."
Dividend policy	At or prior to the closing of this offering, our board of directors will adopt a written policy pursuant to which we intend to pay to stockholders, subject to the factors described herein, including the restrictions under the Term Loan Credit Agreement and the Revolving Credit Agreement, quarterly cash dividends and to consider the payment of additional special dividends from time to time. See "*Dividend Policy*."
Voting rights	Each share of common stock will entitle the holder to one vote per share. Generally, matters to be voted on by stockholders must be approved by a majority of the votes entitled to be cast at a meeting by holders of all shares of common stock present in person or represented by proxy. In addition, pursuant to the stockholders' agreement to be entered into upon the completion of this offering between BNAC and us (our "Stockholders' Agreement"), for so long as BNAC and Banpu beneficially own 10% or more of our voting stock, BNAC will be entitled to designate for nomination to our board of directors a number of individuals approximately proportionate to such beneficial ownership, provided that (i) from the completion of this offering until the first anniversary

	of the completion of this offering, at least three board seats will not be BNAC designees, (ii) from and after the first anniversary of the completion of this offering until the first date on which BNAC and Banpu beneficially own 50% or less of our voting stock, at least four board seats will not be BNAC designees, and (iii) from and after the first date on which BNAC and Banpu beneficially own 50% or less of our voting stock, a number of board seats equal to the minimum number of directors that would constitute a majority of the total number of directors comprising our board of directors will not be BNAC designees. See "*Management*," "*Principal Stockholders*," "*Description of Capital Stock*" and "*Certain Relationships and Related Party Transactions*" for additional information.
Risk factors	You should read the section of this prospectus titled " *Risk Factors*" and other information included in this prospectus for a discussion of factors to carefully consider before deciding to invest in shares of our common stock.
Controlled company	We will be a "controlled company" within the meaning of the corporate governance rules of the NYSE. Upon completion of this offering, BNAC will hold % of our common stock (or approximately % if the underwriters exercise in full their option to purchase additional shares), comprising more than 50% of the voting power of our outstanding common stock. See "*Management — Controlled Company*."
Listing and stock exchange symbol	We intend to list our common stock on the NYSE under the symbol "BKV."

The number of shares of common stock that will be outstanding immediately after the completion of this offering is based on shares of our common stock to be issued pursuant to this offering (assuming the underwriters do not exercise their option to purchase additional shares), and excludes 10,000,000 additional shares of our common stock reserved for future awards pursuant to our 2022 Plan and 1,000,000 shares of our common stock available for purchase by employees pursuant to the our ESPP, which will become effective upon the completion of this offering.

Unless otherwise indicated and except for our historical consolidated financial statements and related notes included elsewhere in this prospectus, the information in this prospectus:

- assumes the execution of our Stockholders' Agreement, as further described under " *Certain Relationships and Related Party Transactions*";
- assumes the amendment and restatement of our existing certificate of incorporation and the amendment and restatement of our existing bylaws in connection with the consummation of the offering;
- assumes an initial public offering price of $ per share of common stock (the midpoint of the price range set forth on the cover page of this prospectus); and
- assumes that the underwriters do not exercise their option to purchase additional shares of common stock.

Risk Factors Summary

Investing in our common stock involves risks, including those highlighted in the section titled " *Risk Factors*" immediately following this prospectus summary, of which you should be aware before making a decision to invest in our common stock. These risks may offset our competitive strengths or have a negative effect on our strategy or operating activities, which could cause a decrease in the price of our common stock and a loss of all or part of your investment. These risks include, among others, the following:

Risks Related to Our Upstream Business and Industry

- the volatility of natural gas and NGL prices due to factors beyond our control;
- our reliance on a single third party for all of our natural gas marketing and another third party for substantially all of our natural gas and NGL midstream services with respect to the Barnett assets we acquired from Devon Energy;
- our reserve estimates are based on assumptions that may prove to be inaccurate;
- our ability to find or acquire additional natural gas and NGL reserves that are economically recoverable, including development of our proved undeveloped reserves and associated capital expenditures;
- uncertainties in evaluating the expected benefits and potential liabilities of recoverable reserves;
- risks and uncertainties related to drilling operations, which are high-risk and operationally complex;
- the availability or cost of water, equipment, supplies, personnel and oilfield services;
- our limited control over activities on properties we do not operate;

Risks Related to Our Power Generation Business

- the operation of our power generation business through a joint venture which we do not control;
- risks and hazards related to the operation or maintenance of electric generation facilities;
- the lack of long-term power sales agreements for Temple I;
- our ability to fulfill our business plan to supply our own natural gas to Temple I;
- the disruption of the fuel supplies necessary to generate power at Temple I;

Risks Related to Our CCUS Business

- our ability to successfully pursue and develop our CCUS business, the associated material capital investments and any changes to financial and tax incentives;

Risks Related to Our Midstream Business

- risks and hazards related to midstream operations as complex activities;
- our dependence on our natural gas midstream system for the gathering and processing of our natural gas production;

Risks Related to Our Business Generally

- the geographical concentration of substantially all of our oil and gas and midstream properties;
- the effect of a deterioration in general economic, business or industry conditions and COVID-19 (including any variants thereof, “COVID-19”);
- our ability to achieve our near term and long term net zero goals on our anticipated time frame;
- our ability to generate cash flow to meet our debt obligations or fund our other liquidity needs;
- risks related to our debt and debt agreements and hedging arrangements that expose us to risk of financial losses and counterparty credit risk;
- our dependence, as a holding company, on our subsidiaries and our joint venture for cash;
- operating hazards that could result in substantial losses or liabilities for which we may not have adequate insurance coverage;
- our ability to make accretive acquisitions or successfully integrate acquired businesses or assets;

- our substantial capital requirements and our ability to obtain financing or fund working capital needs;
- the intense competition in the energy industry and our ability to compete with other companies;
- cybersecurity or physical security threats or disruptions or loss of our information systems;
- increased activism and negative investor sentiment regarding upstream activities and companies;
- the loss of our executive officers and technical personnel and our ability to retain technical personnel;
- exemptions from certain reporting requirements for as long as we are an emerging growth company;

Risks Related to Environmental, Legal Compliance and Regulatory Matters

- complex laws, regulations and initiatives related to our operations and the use of hydraulic fracturing;
- reductions in demand for natural gas, NGL and oil due to conservation measures and technological advances;
- the effect of increased attention to ESG matters, conservation measures and technological advances;
- risks related to climate change, including transitional, legal, political, financial and physical risks;
- significant costs and liabilities related to federal, state and local environmental, health and safety laws and regulations;
- potential tax law changes;
- complex and evolving laws and regulations regarding privacy and data protection;

Risks Related to Our Relationship with Banpu and its Affiliates

- the substantial influence of Banpu, our controlling stockholder, over us;
- our historical reliance on Banpu for capital investments to fund our business operations;
- we expect to be a “controlled company” within the meaning of the NYSE rules and, as a result, will qualify for and could rely on exemptions from certain corporate governance requirements;
- Banpu and its wholly owned subsidiaries ceasing to own at least 51% of our equity interests or allowing any lien to exist on the equity interests in us they own will be an event of default under the Term Loan Credit Agreement and the Revolving Credit Agreement;
- conflicts of interest between Banpu and us or our other stockholders or conflicts of interest of our directors as a result of their positions with, or ownership of common stock of, Banpu;

Risks Related to the Offering and Our Common Stock

- our actual operating results and activities could differ materially from our estimates;
- risks related to payment of dividends on our common stock, including the lack of sufficient available cash, the discretion of our board of directors, and restrictions in our debt agreements, with respect to payment of dividends and the impact of our dividend policy on our ability to grow;
- the costs of, and our ability to comply with, the requirements of being a public company;
- we have identified material weaknesses in our internal control over financial reporting;
- the lack of an existing market for our common stock;
- provisions in our governing documents and Delaware law that could discourage acquisition bids or merger proposals; and
- future sales of our common stock in the public market, or the perception that such sales may occur, could reduce our stock price.

Summary Historical and Unaudited Pro Forma Financial Information

The following table shows our summary historical consolidated financial information and summary unaudited pro forma condensed combined consolidated financial information for the periods and as of the dates indicated. The summary unaudited pro forma condensed combined consolidated financial information presents the combination of our historical consolidated financial information, as adjusted to give effect to the Exxon Barnett Acquisition, the related financing under the Term Loan Credit Agreement and the $75 Million Loan Agreement (collectively, the "Transaction").

The summary historical consolidated financial information as of and for the nine months ended September 30, 2022 and 2021 was derived from our unaudited historical consolidated financial statements, included elsewhere in this prospectus. The summary historical consolidated financial information as of and for the years ended December 31, 2021 and 2020 was derived from our audited historical consolidated financial statements, included elsewhere in this prospectus.

The summary unaudited pro forma condensed combined consolidated financial information was derived from the unaudited pro forma condensed combined consolidated financial statements included elsewhere in this prospectus. The unaudited pro forma combined consolidated statements of operations data for the year ended December 31, 2021 and the unaudited pro forma condensed consolidated statements of operations data for the nine months ended September 30, 2022 has been prepared to give pro forma effect to the Transaction as if it had been consummated on January 1, 2021. This information is subject to, and gives effect to, the assumptions and adjustments described in the notes accompanying the unaudited pro forma condensed combined consolidated financial statements included elsewhere in this prospectus. The pro forma financial information is provided for illustrative purposes only and is not intended to represent what our financial position or results of operations would have been had the Transaction occurred on the assumed date nor does it purport to project our future operating results or financial position following the Transaction. The summary pro forma financial information does not include pro forma balance sheet information because the Exxon Barnett Acquisition was consummated on June 30, 2022 and, therefore, the 2022 Barnett Assets and related financing are included in our historical balance sheet as of September 30, 2022, together with the related indebtedness under the Term Loan Credit Agreement and the $75 Million Loan Agreement.

The summary financial data is qualified in its entirety by, and should be read in conjunction with, "*Management's Discussion and Analysis of Financial Condition and Results of Operations* " and "*Unaudited Pro Forma Condensed Combined Consolidated Financial Statements*" included elsewhere in this prospectus, as well as our historical consolidated financial statements and related notes, the historical statements of revenues and direct operating expenses and related notes for the 2022 Barnett Assets acquired in the Exxon Barnett Acquisition and other financial information included in this prospectus. Historical and pro forma results are not necessarily indicative of results that may be expected for any future period.

Other Financial Data (unaudited)[4]						
Adjusted EBITDAX	$ 332,514	$ 237,417	$ 281,024	$ 65,148	$ 425,007	$ 413,698
Upstream Reinvestment Rate	38%	10%	24%	16%	**	**
Adjusted Free Cash Flow	$ 142,970	$ 89,108	$ 165,090	$ 56,604	**	**
Adjusted Free Cash Flow Margin	12%	16%	19%	34%	**	**
Total Net Leverage Ratio[5]	1.3x	0x	0.11x	0.10x	**	**

(1) Represents right of use liabilities related to office space, a pipe yard, and compressor leases.

(2) Represents contingent consideration liabilities as of the dates set forth above accruing as an earnout obligation under the terms of our purchase agreement with Devon Energy for the purchase of our 2020 Barnett Assets. This contingent consideration is stated at fair value on our consolidated balance sheet, with changes in fair value recorded in the consolidated statement of operations.

(3) Represents cash borrowed as of September 30, 2022 under the Term Loan Credit Agreement which can only be used for costs related to the Exxon Barnett Acquisition. We anticipate the restricted cash will be used for remaining transaction and integration costs related to the Exxon Barnett Acquisition.

(4) Adjusted EBITDAX and Adjusted Free Cash Flow are not financial measures calculated in accordance with GAAP. See "— *Non-GAAP Financial Measures*" for how we define each of these measures and a reconciliation to the most directly comparable GAAP measures. In addition, we define Upstream Reinvestment Rate as total cash paid for upstream capital expenditures (excluding leasehold costs and acquisitions) as a percentage of Adjusted EBITDAX, and we define Adjusted Free Cash Flow Margin as the ratio of Adjusted Free Cash Flow to total revenues excluding derivative gains and losses. Total Net Leverage Ratio represents the ratio of total debt less cash and cash equivalents to Adjusted EBITDAX.

(5) Total Net Leverage Ratio is the ratio of our total debt less cash and cash equivalents to Adjusted EBITDAX. For the nine months ended September 30, 2022 and for the pro forma nine months ended September 30, 2022, Adjusted EBITDAX has been annualized to $443.4 million and $566.7 million, respectively.

* Revenues with respect to the 2022 Barnett Assets (as defined herein) for the nine months ended September 30, 2022 and the year ended December 31, 2021 are reported only on a consolidated basis. Accordingly, the unaudited pro forma combined consolidated natural gas, NGL and oil sales revenues are presented only in the aggregate. See "*Unaudited Pro Forma Combined Consolidated Financial Statements*."

** The Exxon Barnett Acquisition was consummated on June 30, 2022, and, therefore, the 2022 Barnett Assets and related financing are included in the historical balance sheet of the Company as of September 30, 2022, and no pro forma balance sheet is presented. See "*Unaudited Pro Forma Combined Consolidated Financial Statements*."

Non-GAAP Financial Measures

Adjusted EBITDAX

We define Adjusted EBITDAX as net income (loss) before (1) non-cash derivative gain (loss), (2) accretion of asset retirement obligation, (3) accretion of right of use liability, (4) depreciation, depletion, and amortization, (5) exploration and impairment expense, (6) (loss) gain on contingent consideration liabilities, (7) interest expense, (8) income tax benefit (expense), (9) equity-based compensation expense, (10) bargain purchase gains, (11) income from equity affiliates, (12) early settlement of derivative contracts and (13) other nonrecurring transactions.

Adjusted EBITDAX is a supplemental non-GAAP financial measure that is used by our management and external users of our consolidated financial statements, such as industry analysts, investors, lenders, rating agencies and others to more effectively evaluate our operating performance and results of operation from period to period and against our peers, without regard to our financing methods, corporate form or capital structure. We exclude the items listed above from net income (loss) in arriving at Adjusted EBITDAX because these amounts can vary substantially from company to company within our industry depending upon accounting methods and book values of assets, capital structures and the method by which the assets were acquired. Adjusted EBITDAX should not be considered as an alternative to, or more meaningful than, net income (loss) determined in accordance with GAAP. Certain items excluded from Adjusted EBITDAX are significant components in understanding and assessing a company's financial performance, such as a company's cost of capital and tax burden, as well as the historic costs of depreciable assets, none of which are reflected in Adjusted EBITDAX. Our presentation of Adjusted EBITDAX should not be construed as an inference that our results will be unaffected by unusual or non-recurring items. Other companies, including other companies in our industry, may not use Adjusted EBITDAX or may calculate this measure differently than as presented in this prospectus, limiting its usefulness as a comparative measure.

The table below presents a reconciliation of Adjusted EBITDAX to net income, our most directly comparable GAAP financial measure for the periods indicated.

	Nine Months Ended September 30,		Year Ended December 31,		Pro Forma Nine Months Ended September 30, 2022	Pro Forma Year Ended December 31, 2021
	2022	2021	2021	2020	(in thousands)	(in thousands)

Income tax (benefit) expense	(2,989)	(107,918)	(40,526)	38,982	(16,722)	(34,325)

	Nine Months Ended September 30,		Year Ended December 31,		Pro Forma Nine Months Ended September 30, 2022	Pro Forma Year Ended December 31, 2021
	2022	2021	2021	2020	(in thousands)	(in thousands)
	(in thousands)		(in thousands)			
Equity-based compensation expense	29,320	22,838	30,387	—	29,320	30,387
Bargain purchase gain	(163,653)	—	—	—	(163,653)	—
Loss (income) from equity affiliates	(14,486)	—	(910)	—	(14,486)	(910)
Adjusted EBITDAX	$ 332,514	$ 237,417	$ 281,024	$ 65,148	$ 425,007	$ 413,698

(1) The forward month gas derivative settlement is derived from the Commodity derivative settlements payable/receivable line item in our condensed consolidated statements of cash flows. Natural gas derivative contracts settle and are realized in the month prior to the production covered by the contract. This adjustment removes the timing difference between the settlement date and the underlying production month that is hedged.

Adjusted Free Cash Flow

We define Adjusted Free Cash Flow as net cash provided by (used in) operating activities excluding changes in operating assets and liabilities, less total cash paid for capital expenditures and settlement of contingent consideration (excluding leasehold costs and acquisitions).

Adjusted Free Cash Flow is not a measure of net cash flow provided by or used in operating activities as determined by GAAP. Adjusted Free Cash Flow is a supplemental non-GAAP financial measure that is used by our management and other external users of our financial statements, such as industry analysts, investors, lenders, rating agencies and others to assess our ability to internally fund our capital program, service or incur additional debt and to pay dividends. We believe Adjusted Free Cash Flow is a useful liquidity measure because it allows us and others to compare cash flow provided by operating activities across periods and to assess our ability to internally fund our capital program (including acquisitions), to reduce leverage, fund acquisitions and pay dividends to our stockholders. Adjusted Free Cash Flow should not be considered as an alternative to, or more meaningful than, net income (loss) or net cash provided by (used in) operating activities determined in accordance with GAAP. Other companies, including other companies in our industry, may not use Adjusted Free Cash Flow or may calculate this measure differently than as presented in this prospectus, limiting its usefulness as a comparative measure.

The table below presents our reconciliation of Adjusted Free Cash Flow to net cash provided by (used in) operating activities, our most directly comparable GAAP financial measure for the periods indicated.

	Nine Months Ended September 30,		Year Ended December 31,	
	2022	2021	2021	2020
	(in thousands)			
Net cash provided by (used in) operating activities	$231,076	$ 274,488	$ 358,133	$ (7,405)
Changes in operating assets and liabilities	(8,381)	(162,671)	(126,862)	74,536
Cash paid for capital expenditures and settlement of contingent considerations (excluding leasehold costs and acquisitions)	(79,726)	(22,709)	(66,181)	(10,527)
Adjusted Free Cash Flow	$142,970	$ 89,108	$ 165,090	$ 56,604

Summary Reserve, Production and Operating Data

Ryder Scott, our independent petroleum engineers, prepared estimates of our natural gas, NGL and oil reserves as of December 31, 2021 and 2020, and as of September 30, 2022, including the assets we acquired in the Exxon Barnett Acquisition. These reserve estimates were prepared in accordance with the rules and regulations of the SEC regarding oil and natural gas reserve reporting using an average price equal to the unweighted arithmetic average of hydrocarbon prices on the first day of each month within the 12-month period as adjusted for location and quality differentials, unless prices are defined by contractual arrangements, excluding escalations based on future conditions ("SEC Pricing") (except for the table that provides our estimated reserves as of September 30, 2022 at "NYMEX strip pricing" using pricing based on NYMEX future prices as of market close on September 30, 2022). For more information about our reserve volumes and values, see "*Business — Preparation of Reserves Estimates and Internal Controls*" and Ryder Scott's summary reserve reports, which are filed as exhibits to the registration statement of which this prospectus forms a part.

The following table provides our estimated proved reserve, probable reserve and possible reserve information prepared by Ryder Scott as of September 30, 2022 and December 31, 2021 and 2020 and PV-10 Value and the standardized measure of discounted future net cash flows (the "Standardized Measure") for each period. The increase in our proved reserves and the PV-10 Value of those reserves as of September 30, 2022 as compared to December 31, 2021 is primarily due to the Exxon Barnett Acquisition, our refrac and restimulation program and the increase in natural gas prices used in preparing the December 31, 2021 reserve information. There are numerous uncertainties inherent in estimating quantities of natural gas, NGL and oil reserves and their values, including many factors beyond our control. In addition, estimates of probable and possible reserves are inherently imprecise and are more uncertain than proved reserves but have not been adjusted for risk due to that uncertainty, and therefore they may not be comparable with each other and should not be summed either together or with estimates of proved reserves. See "*Risk Factors — Risks Related to Our Upstream Business and Industry — Our estimated natural gas, NGL and oil reserve quantities and future production rates are based on many assumptions that may prove to be inaccurate. Any material inaccuracies in the reserve estimates or the underlying assumptions will materially affect the quantities and present value of our reserves.*"

Estimated Reserves at SEC Pricing [1]

	September 30, 2022	December 31, 2021	December 31, 2020
Estimated proved developed reserves:

Total estimated possible reserves (MMcfe) [5][8]	771,478	585,269	—
Standardized Measure (millions)	$ 324	$ 51	$ —
PV-10 (millions)[2][10]	$ 432	$ 75	$ —

(1) Prices for natural gas, oil and NGLs, respectively, used in preparing our estimated proved reserves and the associated PV-10 Value based on SEC Pricing (i) at September 30, 2022 were $6.127 per MMbtu (Henry Hub), $91.71 per Bbl (WTI Cushing) and pricing equal to 40% of WTI Cushing, (ii) at December 31, 2021 were $3.598 per MMbtu (Henry Hub), $66.56 per Bbl (WTI Cushing) and pricing equal to 39.5% of WTI Cushing and (iii) at December 31, 2020 were $1.985 per MMbtu (Henry Hub), $39.57 per Bbl (WTI Cushing) and pricing equal to 47% of WTI Cushing.

(2) PV-10 refers to the estimated future gross revenue to be generated from the production of proved reserves, net of estimated production and future development costs, using prices and costs in effect at the determination date, without giving effect to non-property related expenses such as general and administrative expenses, debt service and future income tax expense or to depreciation, depletion and amortization, discounted using an annual discount rate of 10%. PV-10 is not a financial measure calculated in accordance with GAAP because it does not include the effects of income taxes on future net revenues. PV-10 is derived from the Standardized Measure, which is the most directly comparable GAAP financial measure. Neither PV-10 nor Standardized Measure represent an estimate of the fair market value of our oil and natural gas properties. We believe that the presentation of PV-10 is relevant and useful to investors because it presents the discounted future net cash flows attributable to our estimated net proved reserves prior to taking into account future corporate income taxes, and it is a useful measure for evaluating the relative monetary significance of our oil and gas properties. It is not intended to represent the current market value of our estimated reserves. PV-10 should not be considered

in isolation or as a substitute for the Standardized Measure reported in accordance with GAAP, but rather should be considered in addition to the Standardized Measure.

(3) The following table provides a reconciliation of the Standardized Measure to PV-10 with respect to estimated proved developed reserves as of September 30, 2022 and December 31, 2021 and 2020:

	September 30, 2022	December 31, 2021	December 31, 2020
PV-10 (millions)	$ 7,844	$2,672	$552
Present value of future income taxes discounted at 10%	(1,694)	(553)	(48)
Standardized Measure	$ 6,150	$2,119	$504

(4) Proved undeveloped reserves as of December 31, 2021 and as of September 30, 2022 are part of a development plan that has been adopted by management indicating that such locations are scheduled to be drilled within five years.

(5) Sustained lower prices for oil and natural gas may cause us to forecast less capital to be available for development of our PUD, probable and possible reserves, which may cause us to decrease the amount of our PUD, probable and possible reserves we expect to develop within the allowed time frame. In addition, lower oil and natural gas prices may cause our PUD, probable and possible reserves to become uneconomic to develop, which would cause us to remove them from their respective reserve category.

(6) The following table provides a reconciliation of the Standardized Measure to PV-10 with respect to estimated proved undeveloped reserves as of September 30, 2022 and December 31, 2021 and 2020:

	September 30, 2022	December 31, 2021	December 31, 2020
PV-10 (millions)	$ 1,974	$ 403	$ 9
Present value of future income taxes discounted at 10%	(476)	(108)	(3)
Standardized Measure	$ 1,498	$ 294	$ 6

(7) The following table provides a reconciliation of the Standardized Measure to PV-10 with respect to estimated proved reserves as of September 30, 2022 and December 31, 2021 and 2020:

	September 30, 2022	December 31, 2021	December 31, 2020
PV-10 (millions)	$ 9,818	$3,074	$561
Present value of future income taxes discounted at 10%	2,170	(661)	(51)
Standardized Measure	$ 7,648	$2,413	$510

(8) Estimates of probable and possible reserves, respectively, and the respective future cash flows related to such estimates, are inherently imprecise and are more uncertain than proved reserves, and the future cash flows related to such estimates. For more information regarding the presentation of probable and possible reserves, see "*Business — Preparation of Reserve Estimates and Internal Controls*."

(9) The following table provides a reconciliation of the Standardized Measure to PV-10 with respect to estimated probable reserves as of September 30, 2022 and December 31, 2021 and 2020:

	September 30, 2022	December 31, 2021	December 31, 2020
PV-10 (millions)	$ 1,126	$202	$ —
Present value of future income taxes discounted at 10%	(275)	(56)	—
Standardized Measure	$ 851	$146	$ —

(10) The following table provides a reconciliation of the Standardized Measure to PV-10 with respect to estimated possible reserves as of September 30, 2022 and December 31, 2021 and 2020:

	September 30, 2022	December 31, 2021	December 31, 2020
PV-10 (millions)	$ 432	$ 75	$ —
Present value of future income taxes discounted at 10%	(108)	(24)	—
Standardized Measure	$ 324	$ 51	$ —

During the nine months ended September 30, 2022 and the year ended December 31, 2021, we incurred costs of approximately $26.0 million and $7.2 million, respectively, to convert 41.4 Bcfe and 19.4 Bcfe, respectively, of proved undeveloped reserves to proved developed reserves. Estimated future development costs relating to the development of our proved undeveloped reserves at September 30, 2022 and December 31, 2021 are approximately $963.2 million and $578.3 million, respectively, over the next five years, substantially all of which we expect to finance through cash flow from operations. Our development programs through the first three quarters of 2022 focused on refracturing under-stimulated wells and designing and drilling new wells in both our Barnett and Marcellus assets. All of our PUD reserves are scheduled to be developed within five years of their initial disclosure as PUDs. See "*Risk Factors — Risks Related to Our Upstream Business and Industry — The development of our estimated proved undeveloped reserves may take longer and may require higher levels of capital expenditures than we currently anticipate*."

2021 Activity

During the year ended December 31, 2021, the Company's proved reserves increased by 1,808.5 Bcfe. The increase in proved reserves was primarily due to increasing commodity pricing improving economics, and additions to the drilling schedule for both proved developed and undeveloped reserves. The Company produced 245.8 Bcfe during the year ended December 31, 2021.

Revisions of previous estimates primarily consisted of upward revisions to proved developed reserves and proved undeveloped reserves of 715.9 Bcfe and 245.6 Bcfe, respectively, as a result of higher average pricing during 2021 for natural gas, NGLs and oil. The remaining upward adjustment of 139.8 Bcfe relates to upward performance adjustments of 219.2 Bcfe to proved developed reserves offset by a downward revision of 79.4 Bcfe to proved developed reserves due to increased production costs.

Extensions and discoveries increased as a result of the completion of our of properties acquired through our Barnett Asset Acquisition, 550.1 Bcfe of proved undeveloped reserves was recognized for 123 gross (94.8 net) locations added to the Company's revised drilling schedule during 2021. Additional extensions consisted of proved undeveloped reserves of 143.2 Bcfe related to 13.0 gross (9.6 net) locations in the Marcellus Basin recognized from acquired acreage and the revised 2021 drilling plan. Extensions related to proved developed reserves of 34.8 Bcfe consisted of 14 gross (5.9 net) newly drilled wells.

Improved recoveries consisted of 205.4 Bcfe of proved developed reserves recognized as a result of the application of improved recovery techniques to producing wells during the year ended December 31, 2021.

2020 Activity

During the year ended December 31, 2020, the Company's proved reserves increased by 1,684.5 Bcfe. The increase in proved reserves was due to the Barnett Asset Acquisition offset by downward revisions primarily due to lower average pricing for natural gas during 2020.The Company produced 111.7 Bcfe during the year ended December 31, 2020.

Revisions of previous estimates of proved undeveloped reserves primarily consisted of a downward revision to proved undeveloped reserves of 146.7 Bcfe due to a combination of performance adjustments and lower average pricing of natural gas during 2020, and a downward revision of 186.5 Bcfe which removed locations due to lower average pricing of natural gas during 2020. Proved developed reserves were adjusted downward by 48.8 Bcfe due to lower average natural gas prices and performance.

There were no extensions and discoveries of proved developed or proved undeveloped reserves during the year ended December 31, 2020.

Estimated Reserves at NYMEX Strip Pricing

The following table provides our total estimated proved reserve, probable reserve and possible reserve information prepared by Ryder Scott as of September 30, 2022, using NYMEX strip prices as of market close on September 30, 2022 and PV-10 Value and the Standardized Measure for such period. We have included this information in order to provide an additional method of presentation of the fair value of our assets and the cash flows that we expect to generate from those assets based on the market's forward-looking pricing expectations as of September 30, 2022. The historical 12-month pricing average in our September 30, 2022 disclosures above does not reflect the prevailing natural gas and oil futures. We believe that the use of forward prices provides investors with additional useful information about our reserves, as the forward prices are based on the market's forward-looking expectations of natural gas and oil prices as of a certain date, although we caution investors that this information should be viewed as a helpful alternative, not a substitute, for the data presented based on SEC Pricing. In addition, we believe that NYMEX strip pricing provides relevant and useful information because it is widely used by investors in our industry as a basis for comparing the relative size and value of our reserves to our peers. Our estimated reserves based on NYMEX futures were otherwise prepared on the same basis as our SEC reserves for the comparable period. Actual future prices may vary significantly from the NYMEX strip prices on September 30, 2022. Actual revenue and value generated may be more or less than the amounts disclosed. There are numerous uncertainties inherent in estimating quantities of natural gas, NGL and oil reserves and their values, including many factors beyond our control. In addition, estimates of probable and possible reserves are inherently imprecise and are more uncertain than proved reserves but have not been adjusted for risk due to that uncertainty, and therefore they may not be comparable with each other and should not be summed either together or with estimates of proved reserves. See "*Risk Factors — Risks Related to Our Upstream Business and Industry — Our estimated natural gas, NGL and oil reserve quantities and future production rates are based on many assumptions that may prove to be inaccurate. Any material inaccuracies in the reserve estimates or the underlying assumptions will materially affect the quantities and present value of our reserves.*"

	September 30, 2022
Estimated proved developed reserves at NYMEX Strip Pricing:	
Natural gas (MMcf)	3,664,049

	September 30, 2022
PV-10 (millions)	$ 139
Present value of future income taxes discounted at 10%	(40)
Standardized Measure	$ 99

RISK FACTORS

Investing in our common stock involves risks. The information in this prospectus should be considered carefully, including the matters addressed under "Cautionary Statement Regarding Forward-Looking Statements" and the following risks, before making an investment decision. The risks and uncertainties described below are not the only ones we face. Additional risks not presently known to us or that we currently deem immaterial may also materially affect our business. The occurrence of any of the following risks or additional risks and uncertainties that are currently immaterial or unknown could materially and adversely affect our business, financial condition, liquidity, results of operations, cash flows, prospects or ability to pay dividends to holders of our common stock. The trading price of our common stock could decline due to any of these risks, and you may lose all or part of your investment.

Risks Related to Our Upstream Business and Industry

The volatility of natural gas and NGL prices due to factors beyond our control may materially and adversely affect our business, financial condition or results of operations and our ability to make required capital expenditures, meet our debt service obligations and other financial commitments and pay dividends on our common stock.

Our revenues, operating results, cash available to pay dividends and the carrying value of our natural gas properties, as well as our ability to make required capital expenditures (including the $20.0 to $22.0 million estimated total project cost of the Barnett Zero Project, the $14.0 to $24.0 million estimated total project cost of the Cotton Cove Project and the $250.0 million we expect to spend over the next three years in connection with our CCUS project development partnership with Verde CO2), meet our debt service obligations and other financial commitments and pay dividends on our common stock, depend significantly upon the prevailing market prices for natural gas and NGLs. Prices for natural gas and NGLs are subject to wide fluctuations in response to relatively minor changes in supply and demand, market uncertainty and a variety of additional factors beyond our control. These factors include, but are not limited to:

- worldwide and regional economic conditions impacting the global supply of, and demand for, natural gas and NGLs, including inflation;
- the price, amount, timing and quantity of foreign imports of natural gas and NGLs;
- political conditions in or affecting other producing countries, including the armed conflict between Russia and Ukraine and associated economic sanctions on Russia and conditions in China, the Middle East, Africa and South America;
- the level of global drilling, exploration and production;
- the level of global inventories;
- prevailing market prices on local price indexes in the areas in which we operate and expectations about future commodity prices;
- the impact on worldwide economic activity of an epidemic, outbreak or other public health events, such as the COVID-19 pandemic or threat of such epidemic or outbreak, or any government response to such occurrence or threat;
- increased associated natural gas and NGL production resulting from higher oil prices and the related increase in oil production;
- the proximity of our natural gas and NGL production to, and capacity and cost of, natural gas and NGL pipelines and other transportation and storage facilities, and other factors that result in differentials to benchmark prices;
- local and global supply and demand fundamentals and transportation availability;
- United States storage levels of natural gas and NGLs;
- weather conditions and other natural disasters;
- domestic and foreign governmental regulations, including environmental initiatives and taxation;

- overall domestic and global economic conditions;
- the value of the dollar relative to the currencies of other countries;
- stockholder activism or activities by non-governmental organizations to restrict the exploration, development and production of natural gas, NGLs and oil to minimize emissions of carbon dioxide, a GHG;
- the actions of OPEC and other oil producing countries, including Russia;
- speculative trading in natural gas and NGL derivative contracts;
- technological advances affecting energy consumption and energy supply;
- the price, availability and acceptance of alternative energy sources; and
- the impact of energy conservation efforts.

These factors and the volatility of the energy markets make it extremely difficult to predict future natural gas price movements accurately. Changes in natural gas and NGL prices have a significant impact on the amount of natural gas and NGLs that we can produce economically, the value of our reserves, our cash flows and our ability to satisfy obligations under our firm transportation and storage agreements. Historically, natural gas and NGL prices and markets have been volatile, and those prices and markets are likely to continue to be volatile in the future. For example, during the nine months ended September 30, 2022, the Henry Hub natural gas spot price reached a high of $9.85 per MMBtu in August 2022 and a low of $3.73 in January 2022, and during the year ended December 31, 2021, the Henry Hub natural gas spot price reached a high of $23.86 per MMBtu in February 2021 and a low of $2.43 per MMBtu in April 2021, in each case, according to the U.S. Energy Information Administration (the “EIA”).

A substantial percentage of our natural gas and NGL production is gathered, processed and transported by a single third party and all of our natural gas production is marketed by a single third party.

Approximately 99% of our natural gas and NGL production for the assets we acquired in the Devon Barnett Acquisition, which comprised approximately 72%, 77% and 44% of our total natural gas and NGL production for the nine months ended September 30, 2022 and the years ended December 31, 2021 and 2020, respectively, was gathered, processed and transported by EnLink using its gas gathering systems, gas transportation system and gas processing facilities. Any termination or sustained disruption in the gathering, processing and transportation of our natural gas and NGL production by EnLink on its systems and in its facilities would materially and adversely affect our financial condition and results of operations and may limit our ability to pay dividends on our common stock.

We utilize an unaffiliated third party to market all of our natural gas production to various purchasers, which consist of credit-worthy counterparties, including utilities, LNG producers, industrial consumers, major corporations and super majors, in our industry. We rely on the credit worthiness of such third-party marketer, who collects directly from the purchasers and remits to us the total of all amounts collected on our behalf less their fee for making such sales. Our business, financial condition, results of operations and ability to pay dividends on our common stock would be materially adversely affected if such third party fails to remit to us amounts collected by it on our behalf for such sales or if, in the future, it becomes necessary or advisable for us to replace our third-party marketer and we experience disruption in the marketing and sale of our natural gas production for so long as we are unable to find a replacement marketer.

Our estimated natural gas, NGL and oil reserve quantities and future production rates are based on many assumptions that may prove to be inaccurate. Any material inaccuracies in the reserve estimates or the underlying assumptions will materially affect the quantities and present value of our reserves.

Numerous uncertainties are inherent in estimating quantities of natural gas, NGL and oil reserves. The process of estimating natural gas, NGL and oil reserves is complex, requiring significant decisions and assumptions in the evaluation of available geological, engineering and economic data for each reservoir, including assumptions regarding future natural gas, NGL and oil prices, subsurface characterization, production levels and operating and development costs. For example, our estimates of our reserves at SEC

Pricing are based on the unweighted first-day-of-the-month arithmetic average commodity prices over the prior 12 months in accordance with SEC guidelines. Future prices received for production and costs may vary, perhaps significantly, from the prices and costs assumed for purposes of those estimates. Sustained lower natural gas, NGL and oil prices will cause the 12-month unweighted arithmetic average of the first-of-the-day price for each of the 12 months preceding to decrease over time as the lower natural gas, NGL and oil prices are reflected in the average price, which may result in the estimated quantities and present values of our reserves being reduced. To the extent that natural gas, NGL and oil prices become depressed or decline materially from current levels, such conditions could render uneconomic a portion of our proved natural gas, NGL and oil reserves, and we may be required to write down our proved reserves.

Furthermore, SEC rules require that, subject to limited exceptions, PUD reserves may only be recorded if they relate to wells scheduled to be drilled within five years after the date of booking. This rule may limit our potential to record additional PUD reserves as we pursue our drilling program. To the extent that natural gas, NGL and oil prices become depressed or decline materially from current levels, such condition could render uneconomic a number of our identified drilling locations, and we may be required to write down our PUD reserves if we do not drill those wells within the required five-year time frame or choose not to develop those wells at all.

As a result, estimated quantities of natural gas, NGL and oil reserves and projections of future production rates and the timing of development expenditures may prove to be inaccurate. Over time, we may make material changes to our reserve estimates. Any significant variance in our assumptions and actual results could greatly affect our estimates of reserves, the economically recoverable quantities of natural gas, NGL and oil attributable to any particular group of properties, the classifications of reserves based on risk of non-recovery and estimates of future net cash flows.

In addition, estimates of probable reserves, and the future cash flows related to such estimates, are inherently imprecise and are more uncertain than estimates of proved reserves, and the future cash flows related to such estimates, but have not been adjusted for risk due to that uncertainty. Because of such uncertainty, estimates of probable reserves, and the future cash flows related to such estimates, may not be comparable to estimates of proved and possible reserves, respectively, and the respective future cash flows related to such estimates, and should not be summed arithmetically with estimates of either proved or possible reserves, respectively, and the respective future cash flows related to such estimates. When producing an estimate of the amount of natural gas, NGLs and oil that is recoverable from a particular reservoir, an estimated quantity of probable reserves is an estimate of those additional reserves that are less certain to be recovered than proved reserves but which, together with proved reserves, are as likely as not to be recovered. Estimates of probable reserves are also continually subject to revisions based on production history, results of additional exploration and development, price changes and other factors. When deterministic methods are used, it is as likely as not that actual remaining quantities recovered will exceed the sum of estimated proved plus probable reserves. Probable reserves may be assigned to areas of a reservoir adjacent to proved reserves where data control or interpretations of available data are less certain, even if the interpreted reservoir continuity of structure or productivity does not meet the reasonable certainty criterion. Probable reserves may be assigned to areas that are structurally higher than the proved area if these areas are in communication with the proved reservoir. Probable reserves estimates also include potential incremental quantities associated with a greater percentage recovery of the hydrocarbons in place than assumed for proved reserves.

Estimates of possible reserves, and the future cash flows related to such estimates, are also inherently imprecise and are more uncertain than estimates of proved and probable reserves, respectively, and the respective future cash flows related to such estimates, but have not been adjusted for risk due to that uncertainty. Because of such uncertainty, estimates of possible reserves, and the future cash flows related to such estimates, may not be comparable to estimates of proved and probable reserves, respectively, and the respective future cash flows related to such estimates, and should not be summed arithmetically with estimates of either proved or probable reserves, respectively, and the respective future cash flows related to such estimates. When producing an estimate of the amount of natural gas, NGLs and oil that is recoverable from a particular reservoir, an estimated quantity of possible reserves is an estimate that might be achieved, but only under more favorable circumstances than are likely. Estimates of possible reserves are also continually subject to revisions based on production history, results of additional exploration and development, price

changes and other factors. When deterministic methods are used, the total quantities ultimately recovered from a project have a low probability of exceeding proved plus probable plus possible reserves. Possible reserves may be assigned to areas of a reservoir adjacent to probable reserve where data control and interpretations of available data are progressively less certain. Frequently, this will be in areas where geoscience and engineering data are unable to define clearly the area and vertical limits of commercial production from the reservoir. Possible reserves also include incremental quantities associated with a greater percentage of recovery of the hydrocarbons in place than the recovery quantities assumed for probable reserves. Possible reserves may be assigned where geoscience and engineering data identify directly adjacent portions of a reservoir within the same accumulation that may be separated from proved areas by faults with displacement less than formation thickness or other geological discontinuities and that have not been penetrated by a wellbore, and we believe that such adjacent portions are in communication with the known (proved) reservoir. Possible reserves may be assigned to areas that are structurally higher or lower than the proved area if these areas are in communication with the proved reservoir.

The present value of future net revenues from our proved natural gas, NGL and oil reserves, or PV-10, will not necessarily be the same as the current market value of our estimated proved natural gas, NGL and oil reserves.

You should not assume that the present value of future net revenues from our proved reserves is the current market value of our estimated natural gas, NGL and oil reserves. We currently base the estimated discounted future net revenues from our proved reserves on the 12-month unweighted arithmetic average of the first-day-of-the-month price for the preceding 12 months. Actual future net revenues from our natural gas, NGL and oil reserves will be affected by factors such as:

- actual prices we receive for natural gas, NGL and oil;
- actual cost of development and production expenditures;
- the amount and timing of actual production;
- transportation and processing; and
- changes in governmental regulations or taxation.

The timing of both our production and our incurrence of expenses in connection with the development and production of our natural gas, NGL and oil properties will affect the timing and amount of actual future net revenues from proved reserves, and thus their actual present value. In addition, the 10% discount factor we use when calculating discounted future net revenues may not be the most appropriate discount factor based on interest rates in effect from time to time and risks associated with us or the natural gas, NGL and oil industry in general. Actual future prices and costs may differ materially from those used in the present value estimate.

The development of our estimated proved undeveloped reserves may take longer and may require higher levels of capital expenditures than we currently anticipate.

Recovery of PUD reserves requires significant capital expenditures and successful drilling operations. As of September 30, 2022, approximately 1,857 Bcfe, or 29%, of our total estimated proved reserves were undeveloped or behind pipe. The reserve data included in our reserve report assumes that substantial capital expenditures will be made to develop non-producing reserves. We cannot be sure that the estimated costs attributable to our natural gas, NGL and oil reserves are accurate. We may need to raise additional capital to develop our estimated PUD reserves over the next five years and we cannot be certain that additional financing will be available to us on acceptable terms, or at all. Additionally, sustained or further declines in commodity prices will reduce the future net revenues of our estimated PUD reserves and may result in some projects becoming uneconomical. Further, our drilling efforts may be delayed or unsuccessful and actual reserves may prove to be less than current reserve estimates, which could have a material adverse effect on our financial condition, future cash flows, results of operations and ability to pay dividends on our common stock.

As part of our exploration and development operations, we have expanded, and expect to further expand, the application of horizontal drilling and multi-stage hydraulic fracture stimulation techniques. The utilization of these techniques requires substantially greater capital expenditures as compared to the

completion cost of a vertical well and therefore may result in fewer wells being completed in any given year. The incremental required capital expenditures are the result of greater measured depths and additional hydraulic fracture stages in horizontal wellbores.

Unless we replace our reserves with new reserves and develop those reserves, our reserves and production will decline, which would adversely affect our future cash flows, results of operations and ability to pay dividends on our common stock.

In general, the volume of production from natural gas, NGL and oil properties declines as reserves are depleted, with the rate of decline depending on each reservoir's characteristics. Except to the extent that we conduct successful exploration, exploitation and development activities or acquire properties containing proved reserves, or both, our proved reserves will decline as reserves are produced. Our future natural gas and NGL production is, therefore, highly dependent on our level of success in finding or acquiring additional reserves as well as the pace of drilling and completion of new wells. Additionally, the business of exploring for, exploiting, developing or acquiring reserves is capital intensive. Recovery of our reserves, particularly undeveloped reserves, will require significant additional capital expenditures and successful drilling operations. To the extent cash flow from operations is reduced and external sources of capital become limited or unavailable, our ability to make the necessary capital investment to maintain or expand our asset base of natural gas and NGL reserves would be impaired.

If natural gas and NGL prices become depressed for extended periods of time or decline materially from current levels, we may be required to record write-downs of the carrying value of our proved natural gas and NGL properties.

We follow the successful efforts method of accounting for natural gas producing activities. Impairment is indicated when a triggering event occurs and the sum of the estimated undiscounted future net cash flows of an evaluated asset is less than the asset's carrying value. If undiscounted future cash flows are insufficient to recover the net capitalized costs related to proved properties, then we recognize an impairment charge in our results of operations equal to the difference between the net capitalized costs related to proved properties and their estimated fair values based on the present value of the related future net cash flows. Triggering events could include, but are not limited to, an impairment of natural gas and NGL reserves caused by mechanical problems, faster-than-expected decline of reserves, lease-ownership issues, declines in commodity prices and changes in the utilization of midstream gathering and processing assets. If impairment is indicated, fair value is calculated using a discounted-cash flow approach and any excess of carrying value is expensed. Undeveloped natural gas and NGL properties are evaluated for impairment on a regular basis, based on the results of the exploratory activity and management's evaluation. If the assessment indicates an impairment, an impairment loss is recognized. Future price decreases could result in reductions in the carrying value of our assets and an equivalent charge to earnings.

We periodically evaluate our unproved natural gas, NGL and oil properties to determine recoverability of our costs and could be required to recognize non-cash charges in the earnings of future periods.

As of September 30, 2022, we carried unproved natural gas, NGL and oil property costs of $17.1 million. GAAP requires periodic evaluation of unproved natural gas, NGL and oil property costs on a project-by-project basis. These evaluations are affected by the results of exploration activities, commodity price outlooks, planned future sales or expirations of all or a portion of these leases and the contracts and permits relevant to such projects. If the quantity of potential reserves determined by such evaluations is not sufficient to fully recover the costs invested in each project, we will recognize non-cash charges in future periods.

Properties that we have acquired or which we may acquire in the future may not produce as projected, and we may be unable to determine reserve potential, identify liabilities associated with such properties or obtain protection from sellers against such liabilities.

Acquiring natural gas and NGL properties requires us to assess reservoir and infrastructure characteristics, including recoverable reserves, development and operating costs and potential liabilities, including environmental liabilities. Such assessments are inherently inexact and uncertain. For these reasons, the properties we have acquired or will acquire in the future may not produce as projected. Further, the

annual decline rates of reserves are estimated decline rates, which could ultimately be materially different than actual annual decline rates. We often are not entitled to contractual indemnification for environmental liabilities and acquire properties on an "as is" basis. We perform a review of the subject properties, but such a review will not reveal all existing or potential problems. In the course of our due diligence, we may not review every well, pipeline or associated facility. We cannot necessarily observe structural and environmental problems, such as pipe corrosion or groundwater contamination, when a review is performed. We may be unable to obtain contractual indemnities from the seller for liabilities created prior to our purchase of the property. We may be required to assume the risk of the physical condition of the properties in addition to the risk that the properties may not perform in accordance with our expectations.

Our failure to correctly assess reservoir and infrastructure characteristics of the natural gas and NGL properties that we acquire or have acquired, or to identify material defects or liabilities associated with such properties, or actual decline rates that differ materially from estimated decline rates, could have a material adverse effect on our financial condition, results of operations, cash flows and ability to pay dividends on our common stock.

Market conditions or operational impediments may hinder our access to natural gas and NGL markets or delay or curtail our natural gas and NGL production.

Market conditions or the unavailability of natural gas and NGL processing, transportation or storage arrangements may hinder our access to natural gas and NGL markets or delay or curtail our production. The availability of a ready market for our natural gas and NGL production depends on a number of factors, including the demand for and supply of natural gas and NGLs, the proximity of our natural gas and NGL production to and capacity of pipelines and storage facilities, gathering systems and other transportation, processing, fractionation, refining and export facilities, competition for such facilities and the inability of such facilities to gather, transport, store or process our natural gas and NGL production due to shutdowns or curtailments arising from mechanical, operational or weather related matters, including hurricanes and other severe weather conditions, or pandemics such as the COVID-19 pandemic or regulatory action related thereto.

Our firm transportation and storage agreements require us to pay demand charges for firm transportation and storage capacities that we do not utilize. If we fail to utilize our firm transportation and storage capacities due to production shortfalls or otherwise, then our margins, results of operations and financial performance could be adversely affected.

We enter into long-term firm transportation agreements, which as of September 30, 2022, provided us with a network of approximately 1,087,500 MMBtu/d of combined firm transportation capacity to East Coast, Gulf Coast, and Southeast markets as it relates to our upstream business units. Additionally, BKV-BPP Power has long-term firm transportation and storage agreements, which, as of September 30, 2022, provided BKV-BPP Power with 75,000 MMBtu/d of firm transportation and 2,812,500 MMBtu of firm storage with Energy Transfer. We are obligated under these arrangements to pay a demand charge for firm transportation and storage capacity rights on a majority these pipeline and storage systems regardless of the amount of pipeline or storage capacity we utilize, subject to our right to release all or a portion of our firm transportation or storage capacities to other shippers and reduce our exposure to demand charges. Our minimum aggregate required payments per year under firm gathering and transportation agreements are approximately $16.5 million for 2022, $58.0 million for 2023, $42.1 million for 2024, $22.3 million for 2025, $20.5 million for 2026 and $82.5 million for 2027 and beyond. See "*Business — Marketing and Differentials*."

If our anticipated production does not exceed the minimum quantities provided in the agreements, and we are unable to purchase natural gas and NGLs from third parties or release our capacity to other shippers, then our margins, results of operations and financial performance could be adversely affected.

Drilling for natural gas wells is a high-risk activity with many uncertainties that could adversely affect our business, financial condition or results of operations.

Drilling natural gas wells, including development wells, involves numerous risks, including the risk that we may not encounter commercially productive natural gas and NGL reserves (including "dry holes"). We

must incur significant expenditures to drill and complete wells, the costs of which are often uncertain. It is possible that we will make substantial expenditures on drilling and not discover reserves in commercially viable quantities.

Specifically, we often are uncertain as to the future cost or timing of drilling, completing and operating wells, and our drilling operations and those of our third-party operators may be curtailed, delayed or canceled. The cost of our drilling, completing and well operations may increase and our results of operations and cash flows from such operations may be impacted, as a result of a variety of factors, including:

- unexpected drilling conditions;
- title problems;
- pressure or irregularities in formations;
- equipment failures or accidents;
- adverse weather conditions, such as winter storms, flooding and hurricanes, and changes in weather patterns;
- compliance with, or changes in, environmental laws and regulations relating to air emissions, hydraulic fracturing and disposal of produced water, drilling fluids and other wastes, laws and regulations imposing conditions and restrictions on drilling and completion operations and other laws and regulations, such as tax laws and regulations;
- the availability and timely issuance of required governmental permits and licenses; and
- the availability of, costs associated with, and terms of contractual arrangements for, properties, including mineral licenses and leases, pipelines, facilities and equipment to gather, process, compress, store, transport and market natural gas and NGLs and related commodities.

For instance, in our drilling operations across NEPA and the Barnett from time to time we experience certain issues and the occurrence of risks, including, for example, mechanical and instrument or tool failures, drilling difficulties associated with drilling in swelling clay or shales and unconsolidated formation, particularly in certain parts of our Barnett development acreage, wellbore instability and other geological hazards, loss of well control, loss of drilling fluids, inability to establish fluid circulation, loss of drill pipe, loss of casing integrity, stuck tools and drill pipes, insufficient cementing of casing, among other typical shale drilling challenges.

Our failure to recover our investment in wells, increases in the costs of our drilling operations or those of our third-party operators, and/or curtailments, delays or cancellations of our drilling operations or those of our third-party operators in each case due to any of the above factors or other factors, may materially and adversely affect our business, financial condition and results of operations.

Drilling, completions, workover and hydraulic fracturing operations are operationally complex activities which present certain risks that could adversely affect our business, financial condition or results of operations.

In our drilling operations, from time to time we experience certain issues and encounter risks, including, for example, mechanical and instrument or tool failures; drilling difficulties associated with drilling in swelling clay or shales and unconsolidated formation, particularly in select parts of our Barnett development acreage; wellbore instability and other geological hazards; loss of well control and associated hydrocarbon release and/or natural gas clouds; loss of drilling fluids circulation; surface spills of various drilling or well fluids; subsurface collision with existing wells; proximity of adjacent water wells or aquifers; inability to establish drilling fluid circulation; loss or compromise of drill pipe or casing integrity; surface pumping operations and associated pressure and hydrocarbon hazards; stuck and lost-in-hole tools, drill pipe or casing; large drilling equipment and machinery including electrical hazards; insufficient cementing of casing causing unwanted casing pressure or fluid migration; surface overpressure events from large machinery (horsepower), equipment or well pressure; fines and violations related to relevant laws and regulations; fires and explosions; personnel safety hazards such as working at heights, driving or equipment operation, energy isolation, excavation and trenching and more; structural damage and collapse to large equipment

and machinery; major damage or malfunction to key equipment or processes; in certain instances, close proximity of operations to residences and/or communities; among other typical shale basin drilling challenges and risks.

In our hydraulic fracturing, workover and completions activities, from time to time we experience certain issues and encounter risks, including, for example, mechanical and instrument or tool failures; loss of well control and associated hydrocarbon release and/or natural gas clouds; well kick or flowback during completion or fracturing operations; lost or stuck in hole wireline, coiled tubing or workover strings and tools; loss or compromise of workover string, tubing or casing integrity; large completions, wireline, coiled tubing and workover rig equipment and machinery including electrical hazards; insufficient cementing of casing causing unwanted casing pressure or fluid migration while fracturing or thereafter; proximity of adjacent water wells or aquifers and adjacent producing wells; surface spills of various fracturing, freshwater or well fluids or chemicals; surface pumping and flowback operations and associated pressure and hydrocarbon hazards; surface overpressure events from large machinery (horsepower), equipment or well pressure; fines and violations related to relevant laws and regulations; fires and explosions; personnel safety hazards such as working at heights, driving or equipment operation, energy isolation, excavation and trenching and more; structural damage and collapse to large equipment and machinery; major damage or malfunction to key equipment or processes; in certain instances, close proximity of operations to residences and/or communities; among other typical fracturing, workover and completion challenges and risks.

We may incur losses as a result of title defects in the properties in which we invest.

It is our practice in acquiring oil and natural gas leases or interests not to incur the expense of retaining lawyers to examine the title to the mineral interest at the time of acquisition. Rather, we rely upon the judgment of lease brokers or landmen who perform the fieldwork in examining records in the appropriate governmental office before attempting to acquire a lease or other interest in a specific mineral interest. The existence of a material title deficiency can render a lease or other interest worthless and can adversely affect our results of operations and financial condition. The failure of title on a lease, in a unit or any other mineral interest may not be discovered until after a well is drilled, in which case we may lose the lease and the right to produce all or a portion of the minerals under the property.

Our identified drilling locations are scheduled to be drilled over many years, making them susceptible to uncertainties that could materially alter the occurrence or timing of their drilling. In addition, we may not be able to raise the substantial amount of capital that would be necessary to drill such locations.

Our management team has identified drilling locations as an estimation of our future development activities on our existing acreage. These identified drilling locations represent a significant part of our growth strategy. Our ability to drill and develop these identified drilling locations depends on a number of factors, including commodity prices, the availability and cost of capital, drilling and production costs, availability of drilling services and equipment, drilling conditions, drilling results, lease expirations, gathering system, marketing and transportation constraints, regulatory approvals, urban growth and other factors. If commodity prices become depressed or decline materially from current levels, the number of locations would decrease as increasing numbers of locations would become uneconomic, and any such decrease may be significant. Even to the extent any locations remain capable of economic production, we may determine not to drill such locations until commodity prices recover. Because of these uncertain factors, we do not know if the identified drilling locations will ever be drilled or if we will be able to produce natural gas and NGLs from these drilling locations. In addition, unless production is established within the spacing units covering the undeveloped acres on which some of the identified locations are located, the leases for such acreage will expire. Therefore, our actual drilling activities may materially differ from those presently identified.

Part of our strategy involves drilling using the latest available horizontal drilling and completion techniques, which involves risks and uncertainties in their application.

To the extent we target emerging areas, the results of our horizontal drilling efforts in such areas will generally be more uncertain than drilling results in areas that are more developed and have more established production from horizontal formations. Because emerging areas and associated target formations have limited or no production history, we are less able to rely on past drilling results in those areas as a basis to

predict our future drilling results. In addition, horizontal wells drilled in shale formations, as distinguished from vertical wells, utilize multilateral wells and stacked laterals, all of which may be subject to well spacing, density and proration requirements, which requirements could adversely impact our ability to maximize the efficiency of our horizontal wells related to reservoir drainage over time. Further, access to adequate gathering systems or pipeline takeaway capacity and the availability of drilling rigs and other services may be more challenging in new or emerging areas. If our drilling results are less than anticipated or we are unable to execute our drilling program because of capital constraints, access to gathering systems, takeaway capacity constraints or otherwise, availability of drilling surface acreage, or commodity prices decline, our investment in these areas may not be as economic as we anticipate, we could incur material write-downs of unevaluated properties and the value of our undeveloped acreage could decline in the future.

Our operations are substantially dependent on the availability of water. Restrictions on our ability to obtain water may have an adverse effect on our financial condition, results of operations and cash flows.

Water is an essential component of both the drilling and hydraulic fracturing processes. Historically, we have been able to purchase water from local landowners and other sources for use in our operations. Some areas in which we have operations have experienced drought conditions that could result in restrictions on water availability or use. Such drought conditions and water stress may become more frequent or intense as a result of climate change. If we are unable to obtain water to use in our operations from local sources or are unable to transport and store such water, we may be unable to economically produce natural gas and NGLs in the affected areas, which could have an adverse effect on our financial condition, results of operations, cash flows and ability to pay dividends on our common stock.

The unavailability or high cost of equipment, supplies, personnel and oilfield services could adversely affect our ability to execute our development and exploitation plans on a timely basis and within budget, and consequently could adversely affect our anticipated cash flow.

We utilize third-party services to maximize the efficiency of our operations. The cost of oilfield services typically fluctuates based on demand for those services. While we currently have excellent relationships with oilfield service companies, there is no assurance that we will be able to contract for such services on a timely basis or that the cost of such services will remain at a satisfactory or affordable level. Shortages, quality or the high cost of equipment, supplies or personnel could delay or adversely affect our development and exploitation operations, which could have a material adverse effect on our business, financial condition or results of operations.

We have limited control over activities on properties we do not operate, which could reduce our production and revenues.

As of September 30, 2022, we operated approximately 93% of our net (70% of our gross) acreage. With respect to our natural gas midstream business, we do not operate the NEPA midstream entities, and in the Barnett, as of September 30, 2022, approximately 29% of our gross operated production volumes were gathered and processed by our owned and operated system. We have limited control over properties and midstream facilities which we do not operate or do not otherwise control operations. If we do not operate or otherwise control the properties and midstream facilities in which we own an interest, we do not have control over normal operating procedures, expenditures or future development of the underlying properties. The failure of an operator of wells in which we own a non-operating interest or an operator of midstream facilities in which we have an interest to adequately perform operations, an operator's financial difficulties, including as a result of price volatility or an operator's breach of the applicable agreements, could reduce our production and revenues. The success and timing of the drilling and development activities on properties operated by others, as well as the midstream activities with respect to our assets, therefore, depends upon a number of factors outside of our control, including the operator's timing and amount of capital expenditures, expertise and financial resources, inclusion of other participants in drilling wells and use of technology.

Risks Related to Our Power Generation Business

We operate our power generation business through a joint venture which we do not control.

We and BPPUS each have a 50% interest in the BKV-BPP Power Joint Venture. For the nine months ended September 30, 2022 and the year ended December 31, 2021, our interest in the BKV-BPP Power Joint Venture represented approximately 2.8% and approximately 0.2% of our revenues, respectively.

In accordance with the terms of the Limited Liability Company Agreement of BKV-BPP Power (the "BKV-BPP Power LLC Agreement"), the BKV-BPP Power Joint Venture is managed by a board of directors consisting of eight members, four of which are appointed by us and four of which are appointed by BPPUS. Consequently, BKV-BPP Power may not take certain material actions without the consent of BPPUS. For example, without the prior consent of BPPUS, the BKV-BPP Power Joint Venture may not:

- make distributions or determine the amount of cash to be distributed;
- make capital expenditures, including acquisitions; or
- incur indebtedness in an amount greater than $1,500,000.

See "*Certain Relationships and Related Party Transactions — BKV-BPP Power Limited Liability Company Agreement*."

We face certain risks associated with shared control, and BPPUS may at any time have economic, business or legal interests or goals that are inconsistent with ours.

We may be required to make additional capital contributions to the BKV-BPP Power Joint Venture.

In addition, BPPUS may be required to make additional capital contributions to fund items approved in the annual budget or other matters approved by the board of directors of BKV-BPP Power. We do not control the timing or the amount which we may be required to contribute. If we fail to make additional capital contributions to BKV-BPP Power, as approved by the board of directors, such failure could be deemed an event of default under the JV LLCA. If an event of default occurs, the non-defaulting party will be entitled to (i) sell the assets of the joint venture and dissolve the joint venture on reasonable terms deemed acceptable to the BKV-BPP board, (ii) obtain specific performance of the non-defaulting party's obligations, and/or (iii) exercise any other right or remedy provided in law or in equity. If we default on any obligation to make an additional capital contribution to BKV-BPP Power and any of these events were to occur, it could have a material adverse effect on the BKV-BPP Power Joint Venture and on our business, financial condition, results of operations, cash flows and ability to pay dividends on our common stock.

Operation of electric generation facilities involves significant risks and hazards customary to the power industry that could have a material adverse effect on our business, financial condition, results of operations, cash flows and ability to pay dividends on our common stock.

The ongoing operation of Temple I involves risks that include performance below expected levels of output or efficiency, as well as the unavailability of key equipment or breakdown or failure of equipment or processes (including an inability to obtain key equipment from Siemens natural gas generators and steam turbines and Benson heat recovery steam generators, which are used by Temple I), due to wear and tear, latent defect, design error or operator error or force majeure events, among other things. Unplanned outages of generating units, including extensions of scheduled outages due to mechanical failures or other problems, occur from time to time and are an inherent risk of the business. Unplanned outages typically increase operation and maintenance expenses and capital expenditures and may reduce revenue available to be distributed to BPPUS and us as a result of selling fewer megawatt hours or require us to incur significant costs as a result of obtaining replacement power from third parties in the open market to satisfy forward power sales obligations. Our inability to operate the BKV-BPP Power electric generation assets efficiently, manage capital expenditures and costs and generate distributions from Temple I could have a material adverse effect on our business, financial condition, results of operations, cash flows and ability to pay dividends on our common stock.

Maintenance, expansion and refurbishment of electric generation facilities involve significant risks that could result in unplanned power outages or reduced output.

Temple I may require periodic upgrading and improvement. Any unexpected operational or mechanical failure, including failure associated with breakdowns and forced outages, could reduce the facility's generating capacity below expected levels, reducing potential cash distributions to BPPUS and us. Unanticipated capital expenditures associated with maintaining, upgrading or repairing our facility may also reduce profitability.

If we make any major modifications to Temple I, we may be required to install the best available control technology or to achieve the lowest achievable emission rates as such terms are defined under and determined pursuant to the new source review provisions of the Clean Air Act ("CAA") at the time of such modifications. Any such modifications could likely result in substantial additional capital expenditures. We may also choose to repower, refurbish or upgrade our facility based on our assessment that such activity will provide adequate financial returns. Such facility requires time for development and capital expenditures before commencement of commercial operations, and key assumptions underpinning a decision to make such an investment may prove incorrect, including assumptions regarding construction costs, timing, available financing and future fuel and power prices. These events could have a material adverse effect on the BKV-BPP Power Joint Venture, and thus on our business, financial condition, results of operations, cash flows and ability to pay dividends on our common stock.

Temple I may operate, wholly or partially, without long-term power sales agreements.

Temple I may operate without long-term power sales agreements for some or all of its generating capacity and output and therefore be exposed to market fluctuations. Without the benefit of long-term power sales agreements for the facility, we cannot be sure that the BKV-BPP Power Joint Venture will be able to sell any or all of the power generated by the facility at commercially attractive rates or that the facility will be able to operate profitably. This could lead to less predictable revenues, future impairments of the facility's property, plant and equipment or the closing of the facility, resulting in economic losses and liabilities, which could have a material adverse effect on the BKV-BPP Power Joint Venture, and thus on our business, financial condition, results of operations, cash flows and ability to pay dividends on our common stock.

Our near-term business plan contemplates the execution of midstream contracts with certain third parties in order to allow us to supply our own natural gas directly to Temple I and its firm intrastate natural gas storage service at the Bammel storage facility. We cannot assure you that we will be successful in obtaining the commercial contracts necessary to facilitate direct delivery of our natural gas production to Temple I on commercially reasonable terms, or at all.

We cannot assure you that we will succeed in any effort to establish midstream contracts that would allow us to supply our own natural gas directly to Temple I and its firm intrastate natural gas storage service at the Bammel storage facility. Although the physical infrastructure exists to supply our own natural gas directly to Temple I and the Bammel storage facility, our ability to utilize that infrastructure depends on whether we can successfully negotiate and enter into new midstream contracts on satisfactory terms or at all. If we fail to enter into such contracts on satisfactory terms or at all, we may be unable to achieve the synergistic cost savings we anticipated in connection with the BKV-BPP Power Joint Venture, which could have a material adverse effect on the BKV-BPP Power Joint Venture, and thus on our business, financial condition, results of operations, cash flows and ability to pay dividends on our common stock.

Our long-term business plan involves the development of retail power business, which would enable us to ultimately provide net zero wellhead-to-household energy to the end-consumer.

We intend to continue to build out our power generation business through opportunistic acquisitions of power generation assets and expand into retail power, which would enable us to ultimately provide net zero wellhead-to-household energy to the end-consumer. We may be unable to execute on our business plans, demand for these new services may not develop on a large or economic scale, we may be exposed to market price risk if our supply obligations are not fully hedged or suppliers fail to perform, weather events could be more extreme or mild than expected, which could affect customer demand in a manner that adversely affects revenue, or we may fail to operate a retail power business effectively. If we were unable to develop a commercially successful retail power business effectively or at all, it could limit our future growth in retail energy markets, and any failure to do so in whole or in part or in any significant measure could have a material adverse effect on our retail power business.

BKV-BPP Power enters into financially settled Heat Rate Call Options ("HRCOs") that may expose it to basis and buyback risk in its operations.

To reduce its exposure to fluctuations in the market price of electricity and natural gas, BKV-BPP Power enters into financially settled HRCOs, which are contracts for the financial purchase and sale of

power based on a floating price of natural gas at a predetermined location using a predetermined conversion factor, or heat rate, required to turn the fuel input into electricity. BKV-BPP Power is exposed to basis risk in its operations when its derivative contracts settle financially, and it delivers physical electricity on different terms. For example, if BKV-BPP Power enters into an HRCO, it hedges its electricity production based on an agreed price for that electricity, but physical electricity must be delivered to delivery points in the market it serves. BKV-BPP Power is exposed to basis risk between the hub price specified in the HRCO and the price that it receives for the sales of physical electricity. BKV-BPP Power attempts to hedge basis risk where possible, but hedging instruments are sometimes not economically feasible or available in the quantities that it requires. BKV-BPP Power's hedging activities do not provide it with protection for all of its basis risk and could result in economic losses and liabilities, which could have a material adverse effect on the BKV-BPP Power Joint Venture, and thus on our business, financial condition, results of operations, cash flows and ability to pay dividends on our common stock.

Additionally, by using derivative instruments to economically hedge exposure to changes in power prices, we could limit the benefit we would receive from increases in the power prices, which could have an adverse effect on our financial condition. For example, as of September 30, 2022, we had unrealized losses of approximately $3.0 million on two HRCOs as a result of increased power pricing. In the event BKV-BPP Power is not able to satisfy its obligations under the HRCO, it must purchase power at prevailing market price to satisfy the HRCO. Likewise, increases in power pricing could limit the benefit we receive under HRCOs and result in losses. Either such event could have a material adverse effect on the BKV-BPP Power Joint Venture, and thus on our business, financial condition, results of operations, cash flows and ability to pay dividends on our common stock.

Our costs, results of operations, financial condition, cash flows and ability to pay dividends could be adversely impacted by the disruption of the fuel supplies necessary to generate power at Temple I, whether as a result of failure of contractual counterparties, disruption in fuel delivery infrastructure or otherwise.

Delivery of natural gas to fuel Temple I is dependent upon the infrastructure (including natural gas pipelines) available to serve such generation facility as well as upon the continuing financial viability of contractual counterparties. As a result, the BKV-BPP Power Joint Venture is subject to the risks of disruptions or curtailments in the production of power at our generation facility if a counterparty fails to perform or if there is a disruption in the fuel delivery infrastructure. Any such disruptions or curtailments could have a material adverse effect on the BKV-BPP Power Joint Venture, and thus on our business, financial condition, results of operations, cash flows and ability to pay dividends on our common stock.

Risks Related to Our CCUS Business

Our ability to establish large scale CCUS projects is subject to numerous risks and uncertainties. We may be unsuccessful in developing our CCUS business as currently anticipated, either wholly or in significant measure.

A key element of our business strategy includes the development of a CCUS business. We have no prior experience in the development and operation of a CCUS business, which poses different challenges and risks than our existing upstream and midstream businesses. We may be unable to execute on our business plans, demand for these new services may not develop on a large or economic scale, or we may fail to operate our CCUS business effectively. Our CCUS business may also present novel issues in law, taxation, emission offset accounting and accreditation, safety or environmental policy, subsurface storage, supply chain, project design and other areas that we may not be able to manage effectively or that could change considerably. Management's assessment of the risks in this line of business may be inexact and not identify or resolve all the problems that we would face. If we are unsuccessful in timely developing a commercially successful CCUS business, our future growth and results of operations may be materially and adversely affected, and we may be unable to realize much of our current business plans, including timely reaching our net zero goals of Scope 1, 2 and 3 emissions, either by the dates projected or at all.

Due to the early stage nature of CCUS projects and the sector generally, CCUS projects face considerable risks. In particular, the Barnett Zero Project, our BKV dCarbon Ventures CCUS project with EnLink, and the Cotton Cove Project face, and any of our potential CCUS projects in the future, including potential projects we expect to develop with Verde CO2 as well as the pipeline of CCUS projects currently under

evaluation, will face, operational, technological, regulatory and financial risks (including the risk that EnLink, or any of our other future counterparties to a CCUS project, will not meet their financial or performance obligations with respect to the CCUS project).

Although we have identified ten potential CCUS projects in addition to the Barnett Zero Project and Cotton Cove Project, these additional potential projects are in different stages of the evaluation process. We have not entered into any definitive agreements with respect to these potential projects and as such, we cannot assure you that we will reach FID, or complete, any of such potential projects. Our stated goals of timely achieving net zero Scope 1, 2 and 3 emissions are dependent, in part, on being able to commercially develop several of our existing pipeline of CCUS projects.

Further, our ability to successfully develop the Barnett Zero Project with EnLink, the Cotton Cove Project and any future potential CCUS projects, including projects we expect to develop with Verde CO2, depends on a number of factors that we are not able to fully control, including the following:

- Commercial scale carbon capture is an emerging sector, and there are not substantial precedents to gauge the likely range of structures or economic terms that will be necessary to reach agreeable terms.
- CCUS injection wells are currently subject to overlapping state and federal jurisdiction and new and evolving regulatory frameworks. The timetable for issuance of permits and authorizations required for a CCUS project is uncertain and could entail a multi-year process. The issuance of permits may be subject to regulatory delays and third-party challenges. We cannot guarantee that we will be able to obtain necessary permits on a timely basis, on favorable terms, or at all.
- As CCUS and carbon management represent an emerging sector, regulations may evolve rapidly, which could impact the feasibility of one or more of our anticipated projects. To the extent regulatory requirements are amended or more stringently enforced or new regulatory requirements are added, we may incur additional delays and/or costs in the pursuit of one or more of our carbon capture projects, which costs may be material or may render any one or more of our projects uneconomical.
- We may not own the pore space at all of our CCUS project sites, which may require us to enter into agreements with multiple owners to secure the necessary real estate rights for the extent of the geologic formation that may be utilized. The failure to obtain necessary pore space rights from all owners, in the absence of a state law mechanism for eminent domain or forced amalgamation, could have a material adverse effect on any proposed CCUS project.
- Robust monitoring, recordkeeping and reporting required in connection with CCUS projects may increase the costs of such operations. Different methodologies may be required to satisfy various regulatory and non-regulatory requirements regarding GHG emissions/sequestration at one or more of our projects, including but not limited to compliance with the EPA mandatory Greenhouse Gas Reporting Program.
- CCUS injection wells and carbon sequestration reservoirs or formations may experience integrity, operating or boundary breaches resulting in additional costs, liability and risk from undesired well casing pressures, breakthrough of injected CO_2 to the land surface, CO_2 plume migration outside of expected or modeled results into undesired or unwanted surface or subsurface areas, well integrity issues or various other outcomes.
- Carbon capture may be viewed as a pathway to the continued use of fossil fuels, notwithstanding that CO_2 emissions are intended to be captured. There may be organized opposition to carbon capture, including our projects, alleging concerns relating to the environment, environmental justice, health or safety, or the federal and state governments may cease supporting carbon capture and sequestration.
- The development of a CCUS project may require us to enter into long-term joint ventures with large carbon emitters (which may need to finance and build, often over a multi-year period, the equipment to capture CO_2 emissions from various industrial processes) and operators of infrastructure for transporting CO_2 (or other GHGs), and we may not be able to do so on agreeable terms or at all.

The development of our CCUS business is expected to require material capital investments.

We estimate the aggregate investment required by us to offset all of our Scope 3 emissions through a sufficient number of the identified potential CCUS projects and associated carbon credits, to be between

approximately $1.3 billion and $1.8 billion over the next seven to ten years. We currently estimate the total investment required by us for the Barnett Zero Project to be between $20.0 and $22.0 million and the total investment required by us for the Cotton Cove Project to be between approximately $14.0 and $24.0 million. In addition, we currently expect to invest up to $250.0 million over the next three years in connection with our CCUS project development partnership with Verde CO2. Our CCUS projects are expected to have material capital requirements, and there is no certainty that we will be able to timely finance these projects on commercially reasonable terms or at all, which could result in material delays or abandonment of certain projects, which in turn could negatively impact our ability to realize our business plan or to reach our near term and long term net zero goals on our anticipated time frame or at all. We similarly may not be able to reach out positive revenue goals for our CCUS business on the timeline we have predicted, which may likewise adversely impact our business or financial condition. CCUS activities subject us to the financial risks of rising costs of equipment and capital, possible delays in acquiring them, along with the financial impact of our expending capital on these activities in advance of realizing any CCUS cash flows, any of which could negatively impact our financial condition and operational results in future periods.

To the extent CO_2 transportation pipelines are not already present in proposed project areas, or if they do not extend to one or more of our project sites, we may be required to convert existing non-CO_2 pipelines, or build new CO_2 pipelines or lateral connections, which will require more time before we can bring together captured CO_2 emissions and transport them to appropriately tested and prepared sequestration sites, require much larger capital expenditures and may be subject to various environmental and other permitting requirements and authorizations as well as third-party easements that could be difficult or costly to obtain, which may render one or more projects uneconomical or impractical. The availability of eminent domain for carbon capture pipelines varies by state and can be highly controversial; there may be organized opposition to eminent domain for carbon capture pipelines, including those associated with our projects, from environmental or landowner groups. Additionally, even in areas where such pipelines are in place, our use of them may require reaching agreements on CO_2 transportation with operators of the pipelines.

The commercial viability of our CCUS projects depends, in part, on certain financial and tax incentives provided by the U.S. federal government.

The economics of CCUS projects depend on financial and tax incentives that could be changed or terminated and that may not currently be sufficient for our CCUS projects to be economical. For example, our qualification for enhanced Section 45Q tax credits is dependent upon our ability to meet certain wage and apprenticeship requirements, the details of which have not yet been released and which are expected to be included in future guidance. If we are unable to obtain the Section 45Q tax credits included in our financial assumptions, many of our proposed CCUS projects may no longer be commercially viable and may not be completed. We cannot assure you that we will be successful in obtaining any or all of the Section 45Q tax credits currently available.

CCUS projects will require storage of CO_2 in subterranean reservoirs over long periods of time. If accidental releases or subsurface migration of CO_2 from our CCUS activities were to occur in the course of operating one or more of our CCUS sites, there is the risk of government recapture of Section 45Q tax credits previously claimed by or issued to us, as well as a risk of trespass or other tort or property claims related to the accidental release or migration of CO_2 beyond the permitted boundaries of any anticipated project as well as the potential for fines and penalties for violations of environmental requirements.

A successful CCUS project in the United States must comply with what we anticipate will be a stringent regulatory scheme involving multiple federal and state permits applicable to the subsurface injection of CO_2 for geologic sequestration. Moreover, when we are the operator of a CCUS project, we must demonstrate and maintain levels of financial assurance sufficient to cover the cost of corrective action, injection well plugging, post-injection site care and site closure, and emergency and remedial response. There is no assurance that we will be successful in obtaining permits or adequate levels of financial assurance for one or more of our CCUS projects or that permits can be obtained on a timely basis, whether due to difficulty with the technical demonstrations required to obtain such permits, public opposition, undeveloped regulatory framework, or otherwise.

There can be no assurances that we will be able to execute on our CCUS strategy and successfully develop the Barnett Zero Project with EnLink in the Barnett, the Cotton Cove Project or any future CCUS

projects, including projects we expect to develop with Verde CO2, and any failure to do so in whole or in any significant measure could have a material adverse effect on our ability to reach our near term and long term net zero goals on our anticipated time frame or at all, as well as on our liquidity, financial condition, results of operations and ability to pay dividends on our common stock.

Risks Related to Our Midstream Business

Midstream operations are complex activities which present certain risks that could adversely affect our business, financial condition or results of operations.

In operating our midstream and production facilities, from time to time we experience certain issues and encounter risks, including, for example, mechanical and instrument or tool failures; loss of well, pressure vessel, tank or other related equipment control and associated hydrocarbon release and/or natural gas clouds; loss or compromise of casing integrity during production; unwanted casing pressure or fluid migration during production operations; unwanted migration of sequestered carbon dioxide or other fluids in injection wells; temporary and permanent surface facility operations and associated pressure and hydrocarbon hazards; surface overpressure events and other hazards resulting from machinery (horsepower), equipment or well pressure; fines and violations related to relevant laws and regulations; fires and explosions; pipeline loss of containment due to integrity issues, pipeline strikes or other reasons and associated hydrocarbon release; personnel safety hazards such as working at heights, driving or equipment operation, energy isolation, excavation and trenching and more; major damage or malfunction to key equipment or processes; structural damage and collapse to equipment and machinery; in certain instances, close proximity of operations to residences and/or communities; among other typical midstream and production facilities challenges and risks.

We depend on our natural gas midstream system for the gathering and processing of a substantial percentage of our natural gas production.

As of September 30, 2022, we own and operate approximately 778 miles of gathering pipeline, 65 midstream compressors and one amine processing unit. In the event that our natural gas midstream system is unable to process our natural gas production, or its operations are otherwise disturbed or curtailed, we could experience a disruption in our ability to transport our natural gas production, which could have a material adverse effect on our business, financial condition, results of operations, cash flows and ability to pay dividends on our common stock.

Construction of midstream projects subjects us to risks of construction delays, cost over-runs, limitations on our growth and negative effects on our financial condition, results of operations, cash flows and liquidity.

From time-to-time, we may plan and construct midstream projects, some of which may take a number of months before commercial operation, such as construction of natural gas, NGL and produced water gathering or transportation systems and construction of related facilities. These projects are complex and subject to a number of factors beyond our control, including delays from third-party landowners, the permitting process, government and regulatory approval, compliance with laws, unavailability of materials, labor disruptions, environmental hazards, financing, accidents, weather and other factors. Any delay in the completion of these projects could have a material adverse effect on our financial condition, results of operations, cash flows and ability to pay dividends on our common stock. The construction of these midstream facilities requires the expenditure of significant amounts of capital, which may exceed our estimated costs. Estimating the timing and expenditures related to these development projects is very complex and subject to variables that can significantly increase expected costs. Should the actual costs of these projects exceed our estimates, our liquidity and financial condition could be adversely affected. This level of development activity requires significant effort from our management and technical personnel and places additional requirements on our financial resources and internal financial controls. We may not have the ability to attract and/or retain the necessary number of personnel with the skills required to bring complicated projects to successful conclusions.

We do not own all of the land on which our pipelines and other midstream facilities are located, which could disrupt our operations.

We do not own all of the land on which our pipelines and other midstream facilities are located, and we are therefore subject to the possibility of more onerous terms and/or increased costs to retain necessary land use if we do not have valid rights-of-way or leases or if such rights-of-way or leases lapse or terminate. We sometimes obtain the rights to land owned by third parties and governmental agencies for a specific period of time. Our loss of these rights, through our inability to renew right-of-way contracts, leases, or otherwise, could cause us to cease operations on the affected land, increase costs related to continuing operations elsewhere, and reduce our revenue.

Risks Related to Our Business Generally

Substantially all of our oil and gas and midstream properties are concentrated in Texas and Northeast Pennsylvania, making us vulnerable to risks associated with operating in only two geographic areas.

Substantially all of our oil and gas and midstream properties are located in Texas and Northeast Pennsylvania. As a result of this geographic concentration, an adverse development in the natural gas, NGL and oil and/or midstream business in either or both of these operating areas could have a greater impact on our financial condition, results of operations and cash available to pay dividends on our common stock than if we were more geographically diversified. Due to the concentrated nature of our properties, we may be disproportionately exposed to the impact of regional supply and demand factors, delays or interruptions of production from wells in these areas caused by governmental regulation, processing or transportation capacity constraints, water shortages or other drought related conditions, availability of equipment, facilities, personnel or services market limitations or interruption of the processing or transportation of natural gas, NGLs and oil.

In addition, the weather in these areas can be extreme and can cause interruption in our operations. Severe weather can result in damage to our facilities entailing longer operational interruptions and significant capital expenditures. For instance, during 2021, Winter Storm Uri in Texas resulted in over 1.5 Bcfe of curtailed production and significant freezing and associated downtime across our facilities and equipment.

The effect of fluctuations on supply and demand may become more pronounced within specific geographic natural gas, NGL and oil producing areas, which may cause these conditions to occur with greater frequency or magnify the effects of these conditions. A number of our properties could experience any of the same conditions at the same time, resulting in a relatively greater impact on our results of operations than they might have on other companies that have a more diversified portfolio of properties. Such delays or interruptions could have a material adverse effect on our financial condition, results of operations, cash flows and ability to pay dividends on our common stock.

A financial crisis or deterioration in general economic, business or industry conditions could materially adversely affect our results of operations, financial condition and ability to pay dividends on our common stock.

Concerns over global economic conditions, stock market volatility, energy costs, geopolitical issues, inflation and U.S. Federal Reserve interest rate increases in response, the availability and cost of credit, and slowing of economic growth in the United States and fears of a recession have contributed and may continue to contribute to economic uncertainty and diminished expectations for the global economy.

Although inflation in the United States had been relatively low for many years, there was a significant increase in inflation beginning in the second half of 2021, which has continued into 2022, due to a substantial increase in the money supply, a stimulation focused fiscal policy, a significant rebound in consumer demand as COVID-19 restrictions were relaxed, the Russia-Ukraine war and worldwide supply chain disruptions resulting from the economic contraction caused by COVID-19 and lockdowns followed by a rapid recovery. Inflation rose from 5.4% in June 2021 to 7.0% in December 2021 to 8.2% in September 2022. We have experienced and expect for the foreseeable future to experience supply chain constraints and inflationary pressure on our cost structure. For example, since the end of the third quarter of 2021, our natural gas production business line has experienced 13% in inflationary cost increases. Our 2022 new drill

and completion program, in that same period, has experienced 22% overall inflationary cost increases. In addition, during such period, significant cost increases have occurred in services, labor, fuel, proppant and steel tubulars, with tubular cost increases exceeding 75%. These supply chain constraints and inflationary pressures will likely continue to adversely impact our operating costs and if we are unable to manage our supply chain, our ability to procure materials and equipment in a timely and cost-effective manner, if at all, may be negatively impacted, which could materially adversely impact our results of operations, financial condition and ability to pay dividends on our common stock.

In addition, continued hostilities between Russia and the Ukraine and the occurrence or threat of terrorist attacks in the United States or other countries could adversely affect the economies of the United States and other countries. The ongoing conflict in Ukraine could continue to have repercussions globally and in the United States by continuing to cause uncertainty, not only in the natural gas, NGL and oil markets, but also in the capital markets. Such uncertainty could result in stock price volatility and supply chain disruptions, as well as higher natural gas, NGL and oil prices which could potentially result in increased inflation worldwide and could negatively impact demand for natural gas, NGLs, oil and electricity.

Concerns about global economic growth can result in a significant adverse impact on global financial markets and commodity prices. In addition, any financial crisis may cause us to face limitations on our ability to borrow under our debt agreements, service our debt obligations, access the debt and equity capital markets and complete asset purchases or sales and may cause increased counterparty credit risk on our derivative instruments and such counterparties to cause us to post collateral guaranteeing performance.

Further, if there is a financial crisis or the economic climate in the United States or abroad deteriorates, worldwide demand for hydrocarbon-based products could materially decrease, which could impact the price at which natural gas and NGLs from our properties are sold, affect the ability of vendors, suppliers and customers associated with our properties to continue operations and ultimately materially adversely impact our results of operations, financial condition and ability to pay dividends on our common stock. If a material adverse change occurs in our business such that an event of default occurs under our debt agreements, the lenders under such agreements may be able to accelerate the maturity of our debt.

Events outside of our control, including an epidemic or outbreak of an infectious disease, such as COVID-19, or the threat thereof, could have a material adverse effect on our business, liquidity, financial condition, results of operations, cash flows and ability to pay dividends on our common stock.

We face risks related to pandemics, epidemics, outbreaks or other public health events, or the threat thereof, that are outside of our control, and could significantly disrupt our business and operational plans and adversely affect our liquidity, financial condition, results of operations, cash flows and ability to pay dividends on our common stock. The COVID-19 pandemic has adversely affected the global economy and has resulted in unprecedented governmental actions in the United States and countries around the world, including, among other things, social distancing guidelines, travel restrictions and stay-at-home orders, among other actions, which caused a significant decrease in activity in the global economy and the demand for oil, and to a lesser extent, natural gas and NGLs.

The nature, scale and scope of the above-described events, combined with the uncertain duration and extent of governmental actions, prevent us from identifying all potential risks to our business. Additionally, the effects of the COVID-19 pandemic might worsen the likelihood or the impact of other risks already inherent in our business. We believe that the known and potential impacts of the COVID-19 pandemic and related events include, but are not limited to, the following:

- disruption in the demand for natural gas, NGLs and oil and other petroleum products;
- intentional project delays until commodity prices stabilize;
- a potential future downgrade of our credit rating and potentially higher borrowing costs in the future;
- a need to preserve liquidity, which could result in reductions, delays or changes in our capital expenditures;

- supply chain disruptions, resulting in shortages of, and increased pricing pressures on, among other things, equipment, services and labor;
- liabilities resulting from operational delays due to decreased productivity resulting from stay-at-home orders affecting our workforce or facility closures resulting from the COVID-19 pandemic;
- future asset impairments, including impairment of our natural gas and NGL properties and other property and equipment; and
- infections and quarantining of our employees and the personnel of vendors, suppliers and other third parties.

New variants of COVID-19 could cause further commodity market volatility and resulting financial market instability, or any other event described above, and these are variables beyond our control that may adversely impact our operating cash flows, distributions from unconsolidated affiliates, our ability to pay dividends on our common stock and our ability to access the capital markets.

The success of our business plan depends, in part, on achieving our near term and long term net zero goals on our anticipated time frame.

The development of our CCUS business, as well as the expansion of our "Pad of the Future" program and the effectiveness of our leak detection and repair emissions monitoring program, are critical to our ability to achieve our emissions goal of the full elimination and/or offset of the Scope 1 and 2 emissions in our owned and operated upstream businesses by the end of 2025 and aspirations to offset Scope 3 emissions from our owned and operated upstream businesses by the early 2030s. We may not meet our near term or long term goals by our target date or at all. Likewise our estimated reduction and offsets expected from these initiatives may turn out to be inaccurate. Our CCUS business and all of our CCUS projects are in the early stages of development and while we have reached FID and entered into definitive agreements with respect to the Barnett Zero Project and reached internal FID for the Cotton Cove Project, we have not reached FID or executed any definitive agreements with respect to the other ten potential projects we have identified. In addition, the development of our CCUS business is expected to require material capital investments, and the commercial viability of our CCUS projects depends, in part, on certain financial and tax incentives provided by the U.S. federal government. In particular, we must meet certain wage and apprenticeship requirements in order to qualify for enhanced Section 45Q tax credits, the details of which have not yet been released and are to be included in future guidance. Our ability to establish large scale CCUS projects is subject to numerous risks and uncertainties, including reaching definitive agreements with third parties and obtaining necessary permits and other regulatory approvals, and we may be unable to execute on some or all of these projects on the timeline we anticipate, on terms acceptable to us or at all. We may not be successful in developing any of our currently identified potential CCUS projects or others, our actual costs with respect to any CCUS projects may exceed our current estimate and we may not be able to realize the anticipated reductions and offsets in emissions. There can be no assurances that we will be able to execute on our CCUS strategy and successfully develop the Barnett Zero Project with EnLink in the Barnett, the Cotton Cove Project or any future CCUS projects, and any failure to do so in whole or in any significant measure could have a material adverse effect on our ability to meet our Scope 1, 2 and 3 owned and operated upstream emissions goals. Even if we are able to successfully develop such projects, the underlying agreements may not apportion us the right to claim all emissions offsets, which may impact our net zero strategy. See "— *Risks Related to Our CCUS Business*."

Our revolving credit facilities are uncommitted and as a result the lenders under the facilities have no obligation to honor any request for a loan or the issuance of a letter of credit.

We maintain two revolving credit facilities for purposes of funding certain of our working capital needs: a $55.0 million uncommitted credit facility with Oversea-Chinese Banking Corporation Limited, which includes a $25.0 million sublimit for the issuance of standby letters of credit and a $25.0 million uncommitted credit facility with Standard Chartered Bank. We use these revolving credit facilities for letters of credit and working capital purposes. However, as uncommitted facilities, the lenders under these facilities are not obligated to honor any request for a loan or the issuance of a letter of credit. Further, our borrowings under these revolving credit facilities are repayable upon demand by the applicable lender and the

interest rates and fees under these revolving credit facilities can be changed by the applicable lender in its discretion. The refusal of either or both of the lenders under these revolving credit facilities to provide additional borrowings, or the demand by either of these lenders to demand repayment in full of any borrowings under either of these facilities, could materially and adversely affect our liquidity, capital resources or result of operations. Further any such occurrences could cause us to materially delay or abandon one or more capital projects or to fund dividends. Finally, we may not be able to timely replace these sources of liquidity at equivalent cost to us or at all.

We may not be able to generate enough cash flow to meet our debt obligations or fund our other liquidity needs.

As of November 17, 2022, we had total outstanding debt of $745.0 million, which consisted of (i) $75.0 million in aggregate principal amount under the Subordinated Intercompany Loan Agreements (as defined herein) with BNAC, a wholly owned subsidiary of our parent, Banpu, which are subordinated to our obligations under the Term Loan Credit Agreement, (ii) $570.0 million in aggregate principal amount under the Term Loan Credit Agreement, (iii) $45.0 million in aggregate principal amount under our OCBC Credit Facility, (iv) $10.0 million in aggregate principal amount under our SCB Credit Facility (as defined herein) and (v) $45.0 million in aggregate principal amount under our Revolving Credit Agreement. The Term Loan Credit Agreement, which we entered into in connection with closing of the Exxon Barnett Acquisition on June 30, 2022, allows us to borrow up to $600.0 million in the aggregate in the form of multiple loans during the period commencing with the effective date and ending on the date that is six months thereafter solely to finance the Exxon Barnett Acquisition, provides that amounts repaid may not be reborrowed, and requires annual amortization payments equal to 20% of the original balance. On June 30, 2022, we borrowed $570.0 million of term loans under the Term Loan Credit Agreement. In addition to interest expense and principal on our long-term debt, we have demands on our cash resources including, among others, operating expenses and capital expenditures.

In addition to the Term Loan Credit Agreement, we are party to the Revolving Credit Facilities (as defined herein), which include a $55.0 million uncommitted OCBC Credit Facility and a $25.0 million uncommitted SCB Credit Facility and the Revolving Credit Agreement. We use the Revolving Credit Facilities for letters of credit and working capital purposes and borrowings under the Revolving Credit Agreement for working capital purposes.

Our ability to pay the principal and interest on our long-term debt and to satisfy our other liabilities will depend upon future performance and our ability to repay or refinance our debt as it becomes due. Our future operating performance and ability to refinance will be affected by economic and capital market conditions, results of operations and other factors, many of which are beyond our control. Our ability to meet our debt service obligations also may be impacted by changes in prevailing interest rates, as borrowings under the Subordinated Intercompany Loan Agreements, the Term Loan Credit Agreement, the Revolving Credit Facilities and the Revolving Credit Agreement bear interest at floating rates.

We may not generate sufficient cash flow from operations. Without sufficient cash flow, there may not be adequate future sources of capital to enable us to service our indebtedness or to fund our other liquidity needs. If we are unable to service our indebtedness and fund our operating costs, we will be required to adopt alternative strategies that may include:

- reducing or delaying capital expenditures;
- seeking additional debt financing or equity capital;
- selling assets; or
- restructuring or refinancing debt.

We may not be able to complete such alternative strategies on satisfactory terms, if at all. Our inability to generate sufficient cash flows to satisfy our debt obligations and fund our liquidity needs, or to refinance our indebtedness on commercially reasonable terms, would materially and adversely affect our financial condition and results of operations and may limit our ability to pay dividends on our common stock.

We may be unable to achieve or maintain a low target level of indebtedness.

If we refinance all of our existing debt, or we receive the requisite consents from our existing lenders, we may incur significant additional indebtedness in the future in order to make acquisitions or to develop our properties or for other general corporate purposes.

Our level of indebtedness could affect our operations in several ways, including the following:

- a significant portion of our cash flows could be used to service our indebtedness;
- a high level of debt would increase our vulnerability to general adverse economic and industry conditions;
- the covenants contained in the agreements governing our outstanding indebtedness limit our ability to borrow additional funds, dispose of assets, pay dividends on our common stock, and make certain investments;
- a high level of debt may place us at a competitive disadvantage compared to our competitors that are less leveraged and therefore, may be able to take advantage of opportunities that our indebtedness would prevent us from pursuing;
- our debt covenants may also affect our flexibility in planning for, and reacting to, changes in the economy and in our industry; and
- a high level of debt may impair our ability to obtain additional financing in the future for working capital, capital expenditures, acquisitions, general corporate, or other purposes.

An increase in our level of indebtedness may further reduce our financial flexibility. Further, a high level of indebtedness increases the risk that we may default on our debt obligations. Our ability to meet our debt obligations and to reduce our level of indebtedness depends on our future performance. General economic conditions, commodity prices, and financial, business, and other factors affect our operations and our future performance. Many of these factors are beyond our control. We may not be able to generate sufficient cash flows to pay the interest on our debt and future working capital, borrowings, or equity financing may not be available to pay or refinance such debt. Factors that will affect our ability to raise cash through an offering of our capital stock or a refinancing of our debt include financial market conditions (including any financial crisis), the value of our assets, and our performance at the time we need capital.

The agreements governing our indebtedness contain restrictive covenants that may limit our ability to respond to changes in market conditions, pursue business opportunities or pay dividends to our stockholders.

The agreements governing our indebtedness contain restrictive covenants that limit our ability to, among other things:

- incur additional debt;
- incur additional liens;
- sell, transfer or dispose of assets;
- merge or consolidate, wind-up, dissolve or liquidate;
- pay dividends and distributions on, or repurchases of, equity;
- make acquisitions and investments, other than direct investments in natural gas, NGL and oil properties and other assets in permitted lines of business;
- enter into certain transactions with our affiliates;
- enter into sale-leaseback transactions;
- make optional or voluntary payment of subordinated debt;
- change the nature of our business;
- change our fiscal year to make changes to the accounting treatment or reporting practices;

- amend constituent documents; and
- enter into certain hedging transactions.

The Term Loan Credit Agreement and the Revolving Credit Agreement contain, and any future debt agreement may contain, covenants that prohibit us from paying dividends on our common stock under certain circumstances. For additional information regarding the restrictions contained in the Term Loan Credit Agreement and the Revolving Credit Agreement on our ability to pay dividends to our stockholders, see "— *Risks Related to the Offering and Our Common Stock — The agreements governing our indebtedness impose restrictions on dividend payments*."

In addition, the Term Loan Credit Agreement, the Revolving Credit Agreement and certain of our other debt agreements require us to maintain financial ratios and tests. Also, the administrative agent under the Term Loan Credit Agreement has approval rights over our annual budget and our quarterly cash forecasts for the succeeding 12-month period. In addition to customary events of default, the Term Loan Credit Agreement and the Revolving Credit Agreement include an event of default if there is a material adverse change in our business.

The requirement that we comply with these provisions may materially adversely affect our ability to react to changes in market conditions, take advantage of business opportunities we believe to be desirable, obtain future financing, fund needed capital expenditures, withstand a continuing or future downturn in our business or pay dividends to our stockholders.

If we are unable to comply with the restrictions and covenants in our debt agreements, there could be an event of default under the terms of such agreements, which could result in an acceleration of repayment.

If we are unable to comply with the restrictions and covenants in the Subordinated Intercompany Loan Agreements, Term Loan Credit Agreement, Revolving Credit Facilities, the Revolving Credit Agreement or any future debt agreement or if we default under the terms of the Subordinated Intercompany Loan Agreements, Term Loan Credit Agreement, Revolving Credit Facilities, the Revolving Credit Agreement or any future debt agreement, there could be an event of default. Our ability to comply with these restrictions and covenants, including meeting any financial ratios and tests, may be affected by events beyond our control. Further, if, after this initial public offering, Banpu and its wholly owned subsidiaries at any time cease to own at least 51% of our equity interests, or if any such holder allows any lien to exist on our equity interests that they own, such event will be an event of default under the Term Loan Credit Agreement and the Revolving Credit Agreement, which may result in amounts owed by us thereunder to become immediately due and payable. Banpu has no obligation to maintain any particular percentage of equity ownership in the Company (other than the 180-day lock-up agreement and other restrictions described in "*Shares Eligible for Future Sale*") may at any time sell all or any portion of its equity interests in us. As a result, we cannot assure that we will be able to comply with these restrictions and covenants or meet such financial ratios and tests. In the event of a default under the Subordinated Intercompany Loan Agreements, Term Loan Credit Agreement, Revolving Credit Facilities, the Revolving Credit Agreement or any future debt agreement, the lenders could terminate their commitments to lend or accelerate the loans and declare all amounts borrowed due and payable. If any of these events occur, our assets might not be sufficient to repay in full all of our outstanding indebtedness and we may be unable to find alternative financing. Even if we could obtain alternative financing, it might not be on terms that are favorable or acceptable to us. Additionally, we may not be able to amend the Term Loan Credit Agreement, Revolving Credit Facilities, the Revolving Credit Agreement or any future debt agreement or obtain needed waivers on satisfactory terms.

Our borrowings under the Subordinated Intercompany Loan Agreements, Term Loan Credit Agreement, Revolving Credit Facilities and Revolving Credit Agreement expose us to interest rate risk.

Our results of operations are exposed to interest rate risk associated with borrowings under the Subordinated Intercompany Loan Agreements, Term Loan Credit Agreement, Revolving Credit Facilities and Revolving Credit Agreement, which bear interest at rates based on the Secured Overnight Financing Rate ("SOFR") or an alternative floating interest rate benchmark. In response to inflation, the U.S. Federal Reserve has increased interest rates four times in 2022 and signaled that additional interest rate increases should be expected in 2022. On July 28, 2022, it raised interest rates by 0.75%, representing the fourth increase

in interest rates during 2022 to date. Raising or lowering of interest rates by the U.S. Federal Reserve generally causes an increase or decrease, respectively, in SOFR and other floating interest rate benchmarks. As such, if interest rates increase, so will our interest costs. If interest rates continue to increase, it may have a material adverse effect on our results of operations, financial condition and ability to pay dividends on our common stock.

Our hedging activities do not provide downside protection for all of our production and could result in financial losses or could reduce our net income. Further, our derivative contracts contain certain restrictions and covenants.

From time to time, we enter into derivatives contracts in connection with our natural gas and NGLs, including, for instance, swaps, producer collars and enhanced three-way collars. These derivative arrangements are subject to mark-to-market accounting treatment, and the changes in fair market value of our derivative contracts are reported in our statement of operations and comprehensive loss each quarter, which may result in significant non-cash gains or losses. Accordingly, our earnings may fluctuate significantly as a result of changes in fair value of our derivative instruments.

These derivative arrangements are designed to reduce our exposure to commodity price decreases. Therefore, to the extent our production is not hedged, we are exposed to declines in commodity prices. In addition, our derivative arrangements may be inadequate to protect us from continuing and prolonged declines in commodity prices. Further, while designed to reduce our exposure to commodity price decreases, these derivatives arrangements may also limit the potential gains we might otherwise receive from increases in commodity prices if such prices rise over the price established by our derivative contracts. For example, for the nine months ended September 30, 2022 and 2021, we incurred a realized loss on derivatives of approximately $561.6 million, $101.3 million of which related to early termination of hedges, and $123.6 million, respectively. We incurred a realized loss on derivatives of approximately $268.7 million for the year ended December 31, 2021 and a realized gain on derivatives of approximately $10.4 million for the year ended December 31, 2020. For the nine months ended September 30, 2022 and 2021, we incurred an unrealized loss on derivatives of approximately $158.7 million and $377.0 million, respectively. For the years ended December 31, 2021 and 2020, we had an unrealized loss on derivatives of approximately $115.2 million and an unrealized gain on derivatives of approximately $10.3 million, respectively. In trying to manage our exposure to commodity price risk, we may end up with too many or too few derivative contracts, depending upon where commodity prices settle relative to our derivative price thresholds and how our natural gas and NGL volumes fluctuate relative to our expectations when the derivatives were established.

As of September 30, 2022, we have hedged approximately 459,000 MMBtu/d and 304,000 MMBtu/d of our natural gas production for the remainder of 2022 and 2023, respectively. We have hedged approximately 15,000 Bbl/d and 5,300 Bbl/d of NGL production for the remainder of 2022 and 2023, respectively. Our results of operations, liquidity and financial condition would be negatively impacted if prices of natural gas and NGLs were to become depressed or decline materially from current levels, or there is otherwise an unexpected material impact on commodity prices, and we have experienced variances in our results of operations and financial condition due to our hedging transactions.

Our hedging activities do not provide downside protection for all of our production. In addition, our ability to use hedging transactions to protect us from future commodity price declines will be dependent upon commodity prices at the time we enter into future hedging transactions and our future levels of hedging and, as a result, our future net cash flows may be more sensitive to commodity price changes. Further, if commodity prices decline materially, we will not be able to replace our hedges or enter into new hedges at favorable prices.

Further, our derivative contracts contain certain restrictions and covenants customary for such types of instruments. For example, an ISDA Master Agreement for certain of our derivative contracts (the “Master Agreement”) previously contained a covenant that restricted us from creating, issuing, incurring or assuming additional indebtedness in excess of $75.0 million. In June 2022, in connection with the completion of the Exxon Barnett Acquisition, we borrowed $570.0 million of term loans under the Term Loan Credit Agreement. In connection with exceeding the $75.0 million indebtedness threshold, on August 4, 2022, we executed an amendment to the Master Agreement pursuant to which we are required to novate or terminate, at our election, at least $100.0 million in derivative contracts by October 4, 2022. As of September 9, 2022,

we terminated derivative contracts of $100.2 million with the counterparty to satisfy this requirement. In connection with such termination, we are required to make cash payments to the counterparty in an aggregate amount of $100.2 million, of which $30.0 million was paid in September 2022, an additional $30.0 million was paid on October 31, 2022, and the remaining $40.2 million must be paid by November 30, 2022. If we fail to satisfy our obligations under the amendment, the debt incurrence covenant in the Master Agreement would apply. This amendment also includes a cross-default provision pursuant to which a default by us of the covenants under our Term Loan Credit Agreement would cause a default under the Master Agreement. See "*Note 13 — Credit and Other Risk*" to our unaudited condensed consolidated financial statements included elsewhere in this prospectus for additional information regarding the Master Agreement.

Subject to restrictions in the Term Loan Credit Agreement and the Revolving Credit Agreement, our hedging strategy and future hedging transactions will be determined at our discretion and may be different than what we have done on a historical basis. In the future, we may enter into additional derivative arrangements or reduce our derivative arrangements. The prices at which we hedge our production in the future will be dependent upon commodities prices at the time we enter into these transactions, which may be substantially higher or lower than current prices. Accordingly, our price hedging strategy may not protect us from significant declines in prices received for our future production. Conversely, our hedging strategy may limit our ability to realize cash flows from future commodity price increases. It is also possible that a substantially larger percentage of our future production will not be hedged as compared with the next few years, which would result in our natural gas and NGL revenues becoming more sensitive to commodity price fluctuations.

Our hedging transactions could expose us to counterparty credit risk.

Our hedging transactions expose us to risk of financial loss if a counterparty fails to perform under a derivative contract. The risk of counterparty nonperformance is of particular concern in the event of disruptions in the financial markets or the significant decline in commodity prices, which could lead to sudden changes in a counterparty's liquidity and impair their ability to perform under the terms of the derivative contract. We are unable to predict sudden changes in a counterparty's creditworthiness or ability to perform. Even if we do accurately predict sudden changes, our ability to negate the risk may be limited depending upon market conditions. Furthermore, the bankruptcy of one or more of our hedge providers or some other similar proceeding or liquidity constraint might make it unlikely that we would be able to collect all or a significant portion of amounts owed to us by the distressed entity or entities.

During periods of falling commodity prices, our hedge receivable positions increase, which increases our exposure. If the creditworthiness of our counterparties deteriorates and results in their nonperformance, we could incur a significant loss.

We may experience difficulty in achieving and managing future growth.

Future growth may place strains on our resources and cause us to rely more on project partners and independent contractors, possibly negatively affecting our financial condition, results of operations, cash flows and ability to pay dividends on our common stock. Our ability to grow will depend on a number of factors, including:

- our ability to acquire additional assets and to successfully integrate acquisitions we may make;
- the results of our drilling program;
- commodity prices;
- our ability to develop existing prospects;
- our ability to obtain leases or options on properties for which we have seismic data;
- our ability to acquire additional seismic data;
- our ability to identify and acquire new exploratory prospects;
- our ability to continue to retain and attract skilled personnel;

- our ability to maintain or enter into new relationships with project partners and independent contractors; and
- our access to capital.

We are a holding company with no operations of our own, and we depend on our subsidiaries and our joint venture for cash to fund all of our operations, taxes and other expenses and any dividends that we may pay.

Our operations are conducted entirely through our subsidiaries and the BKV-BPP Power Joint Venture. Our ability to generate cash to meet our debt and other obligations, to cover all applicable taxes payable and to declare and pay any dividends on our common stock is dependent on the earnings and the receipt of funds through distributions from our subsidiaries and the BKV-BPP Power Joint Venture. Our subsidiaries' and the BKV-BPP Power's ability to generate adequate cash depends on a number of factors, including development of reserves, successful acquisitions of complementary properties, advantageous drilling conditions, natural gas, NGL and oil prices, successful production and sales of electricity, compliance with all applicable laws and regulations and other factors.

Our business is subject to operating hazards that could result in substantial losses or liabilities for which we may not have adequate insurance coverage.

Natural gas and NGLs operations are subject to many risks, including well blowouts, craterings, explosions, uncontrollable flows of natural gas, NGLs or well fluids, fires, pipe, casing or cement failures, abnormal pressure, pipeline leaks, ruptures or spills, vandalism, pollution, releases of toxic gases, adverse weather conditions or natural disasters and other environmental hazards and risks. If any of these hazards occur, we could sustain substantial losses as a result of:

- injury or loss of life;
- severe damage to or destruction of property, natural resources and equipment;
- pollution or other environmental damage;
- investigatory, monitoring, and cleanup responsibilities;
- regulatory investigations and penalties or lawsuits;
- loss of, or delay in revenue;
- suspension or impairment of operations; and
- repairs to resume operations.

We maintain insurance against some, but not all, potential losses or liabilities arising from our operations in accordance with what we believe are customary industry practices and in amounts and at costs that we believe to be prudent and commercially practicable. Our insurance includes deductibles that must be met prior to recovery, as well as sub-limits and/or self-insurance. Additionally, our insurance is subject to exclusions and limitations. Our insurance does not cover every potential risk associated with our operations, including the potential loss of significant revenues. We can provide no assurance that our coverage will adequately protect us against liability from all potential consequences, damages and losses.

We currently have insurance policies covering our operations that include coverage for general liability, property damage to certain of our real and personal property, and certain personal property of others, excess liability, physical damage to our upstream and midstream properties, operational control of wells, redrilling expenses, pollution and cleanup, site pollution incidents, damage to lease property, business and contingent business interruption, management liability, automobile liability, third-party liability, workers' compensation, employer's liability, kidnap and ransom and other coverages. Our insurance policies provide coverage for losses or liabilities relating to pollution, but are largely limited to coverage for sudden and accidental occurrences. For example, the site pollution incident policy we maintain includes coverage for obligations, expenses or claims that we may incur from a sudden incident that results in negative environmental effects, including obligations, expenses or claims related to seepage and pollution, cleanup and containment, evacuation expenses and control of the well (subject to policy terms and conditions). In the specific event of

a well blowout or out-of-control well resulting in negative environmental effects, such operator's extra expense coverage would be our primary source of coverage, with the general liability and excess liability coverage referenced above also providing certain coverage.

We may elect not to obtain insurance if we believe that the cost of available insurance is excessive relative to the risks presented. Some forms of insurance may become unavailable in the future or unavailable on terms that we believe are economically acceptable. No assurance can be given that we will be able to maintain insurance in the future at rates that we consider reasonable, and we may elect to maintain minimal or no insurance coverage. If we incur substantial liability from a significant event and the damages are not covered by insurance or are in excess of policy limits, then we would have lower revenues and funds available to us for our operations, that could, in turn, have a material adverse effect on our business, financial condition, results of operations and ability to pay dividends on our common stock.

Additionally, we rely to a large extent on transportation owned and operated by third parties and damage to, or destruction of, those third-party facilities could affect our ability to process, transport and sell our production. To a limited extent, we maintain business interruption insurance related to our processing plants where we are insured for potential losses from the interruption of production caused by loss of or damage to the processing plant.

We may be unable to make accretive acquisitions or successfully integrate acquired businesses or assets, and any inability to do so may disrupt our business and hinder our ability to grow.

There is intense competition for acquisition opportunities in our industry and we may not be able to identify attractive acquisition opportunities. Even if we do identify attractive acquisition opportunities, we may not be able to complete the acquisition or do so on commercially acceptable terms. We may not be able to obtain contractual indemnities from sellers for liabilities incurred prior to our purchase of the business, asset or property. No assurance can be given that we will be able to identify additional suitable acquisition or asset exchange opportunities, negotiate acceptable terms, obtain financing for acquisitions on acceptable terms or successfully acquire identified targets. In addition, there can be no assurance that Banpu will not engage in competition with us in the future. See "*Risk Factors — Risks Related to Our Relationship with Banpu and its Affiliates — Banpu's interests, including interests in certain corporate opportunities, may conflict with our interests and the interests of our other stockholders. Conflicts of interest between us and Banpu could be resolved in a manner unfavorable to us and our other stockholders*." Competition for acquisitions may increase the cost of, or cause us to refrain from, completing acquisitions.

We may make acquisitions of properties or businesses that complement or expand our current business in the future. The successful acquisition of natural gas and NGL properties requires an assessment of several factors, including:

- recoverable reserves;
- future commodity prices;
- operating costs; and
- potential environmental and other liabilities.

The accuracy of these assessments is inherently uncertain and rely on numerous assumptions and we may not be able to identify accretive acquisition opportunities. In connection with these assessments, we perform a review of the subject properties that we believe to be generally consistent with industry practices. Our review will not reveal all existing or potential problems, nor will it permit us to become sufficiently familiar with the properties to assess fully their deficiencies and capabilities. Reviews may not always be performed on every well, and environmental problems, such as groundwater contamination, are not necessarily observable even when a review is performed. Even when problems are identified, the seller may be unwilling or unable to provide effective contractual protection against all or part of the problems. Market forces often prevent us from negotiating contractual indemnification for environmental liabilities and require us to acquire properties on an "as is" basis.

The success of any of our acquisitions, including the Exxon Barnett Acquisition, will depend on our ability to integrate effectively the acquired business into our existing operations. The process of integrating

acquired businesses may involve unforeseen difficulties and may require a disproportionate amount of our managerial and financial resources which may divert management's attention from other business concerns. In addition, possible future acquisitions may be larger and for purchase prices significantly higher than those paid for earlier acquisitions. Our failure to achieve consolidation savings, to integrate the acquired businesses and assets into our existing operations successfully, or to minimize any unforeseen operational difficulties could have a material adverse effect on our financial condition, results of operations, cash flows and ability to pay dividends on our common stock.

In addition, the Subordinated Intercompany Loan Agreements, Term Loan Credit Agreement, Revolving Credit Facilities and the Revolving Credit Agreement will limit our ability to enter into mergers or combination transactions. These debt arrangements also limit our ability to incur indebtedness and liens, which could indirectly limit our ability to engage in acquisitions.

Our business requires substantial capital expenditures. We may be unable to obtain required capital or financing on satisfactory terms or be able to fund our working capital needs from cash flow from operations, which could lead to a decline in our reserves.

The energy industry is capital intensive. We have made and expect to continue to make substantial capital expenditures in our businesses for the acquisition, exploration, production and development of natural gas and NGL reserves, as well as the gathering, processing and transportation of natural gas and NGLs and the development of our CCUS business. Our capital expenditures in 2021 totaled $63.9 million, primarily relating to completion of drilled but uncompleted wells prior to January 1, 2021, projects to increase reserve recovery and investment in non-operated wells.

The actual amount and timing of our future capital expenditures may differ materially from our estimates as a result of, among other things, commodity prices, actual drilling results, the availability of drilling rigs and other services and equipment, the availability of CO_2 transportation pipelines in proposed CCUS project areas, and legal, regulatory, environmental, technological and competitive developments. A sustained decline in commodity prices may result in a decrease in our actual capital expenditures, which would negatively impact our ability to grow production. Although we intend to finance our future capital expenditures primarily through cash flow from operations and through available capacity under the Revolving Credit Facilities and the Revolving Credit Agreement, our future needs may require us to alter or increase our capitalization substantially through the increase in the size of our working capital facilities, issuance of additional debt or equity securities or the sale of assets.

Our cash flow from operations and access to capital are subject to a number of variables, including:

- the estimated quantities of our natural gas and NGL reserves;
- the amount of hydrocarbon we produce from existing wells;
- the prices at which we sell our production;
- the levels of our operating expenses;
- take-away and storage capacity;
- our ability to acquire, locate, develop and produce new reserves; and
- our ability to borrow under the Revolving Credit Facilities, the Revolving Credit Agreement and any additional working capital facilities that we obtain.

If our revenues decrease as a result of lower commodity prices, operating difficulties, declines in reserves or for any other reason, we may have limited ability to obtain the capital necessary to sustain our planned capital budget or operations at current levels. If additional capital is needed, we may not be able to obtain debt or equity financing on terms acceptable to us, if at all. If cash flow generated by our operations or available capacity under the Revolving Credit Facilities are not sufficient to meet our capital requirements, the failure to obtain additional financing could result in a curtailment of our operations relating to development of our properties, which in turn could lead to a decline in our reserves and production, and could adversely affect our business, financial condition, results of operations and ability to pay dividends on our common stock.

We may be unable to dispose of nonstrategic assets on attractive terms and may be required to retain liabilities for certain matters.

We regularly review our asset base to assess the market value versus holding value of existing assets with a view to optimizing deployed capital. Our ability to dispose of nonstrategic assets or complete dispositions, such as acreage that we do not intend to place on our production schedule prior to lease expirations, could be affected by various factors, including the availability of buyers willing to purchase the nonstrategic assets at prices acceptable to us. Sellers typically retain certain liabilities or agree to indemnify buyers for certain matters. The magnitude of any such retained liability or indemnification obligation may be difficult to quantify at the time of the transaction and ultimately may be material. Also, as is typical in divestiture transactions, third parties may be unwilling to release us from guarantees or other credit support provided prior to the sale of the divested assets.

As a result, after a sale, we may remain secondarily liable for the obligations guaranteed or supported to the extent that the buyer of the assets fails to perform these obligations.

We may be unable to compete effectively with larger companies, which may adversely affect our ability to generate sufficient revenues.

The energy industry is intensely competitive, and we compete with other companies that have greater resources than we do. Our ability to acquire additional properties, to discover reserves in the future and to execute on potential CCUS projects will be dependent upon our ability to evaluate and select suitable properties to consummate transactions in a highly competitive market. Many of our larger competitors not only drill for and produce natural gas, NGLs and oil, but they also engage in refining operations and market petroleum and other products on a regional, national or worldwide basis. Our competitors may be able to pay more for natural gas and NGL properties, evaluate, bid for and purchase a greater number of properties than our financial or human resources permit and attract capital at lower rates. In addition, these companies may have a greater ability to continue drilling, production and workover activities during periods of low natural gas and NGL prices, to contract for drilling, production and workover equipment, to pay more for and secure trained personnel, and to absorb the burden of present and future federal, state, local and other laws and regulations. The natural gas, NGL and oil industry has periodically experienced shortages of drilling rigs, equipment, hydraulic fracturing fleets, supply chain resources, pipelines and personnel, which has delayed development drilling and other exploitation activities and has caused significant price increases. Competition has been strong in hiring experienced personnel, particularly in the engineering and technical, accounting and financial reporting, tax and land departments. In addition, competition is strong for attractive natural gas, NGL and oil producing properties, natural gas, NGL and oil companies, undeveloped leases and drilling rights, and CCUS projects. Further, the current inflation may affect us more than it may affect some of our larger competitors. Our inability to compete effectively with our competitors could have a material adverse impact on our business activities, financial condition and results of operations.

The energy industry is characterized by rapid and significant technological advancements and introductions of new products and services using new technologies. As others use or develop new technologies, we may be placed at a competitive disadvantage or competitive pressures may force us to implement those new technologies at substantial costs. Further, competitors may obtain patents which might prevent us from implementing new technologies. In addition, other energy companies may have greater financial, technical and personnel resources that allow them to enjoy technological advantages and may in the future allow them to implement new technologies before we can. We may not be able to respond to these competitive pressures and implement new technologies on a timely basis or at an acceptable cost. If one or more of the technologies we use now or in the future were to become obsolete or if we are unable to use the most advanced commercially available technology, our business, financial condition and results of operations could be materially adversely affected.

The inability of one or more of our significant counterparties to meet their payment or performance obligations may adversely affect our financial results.

We are subject to certain credit risks associated with nonpayment or nonperformance by our counterparties, including joint interest partners and customers. Joint interest receivables arise from billing our joint interest partners who own a partial working interest in our natural gas and NGL wells. These entities

participate in our natural gas and NGL wells primarily based on their ownership in leases on which we operate, and we have limited ability to control their participation in our natural gas and NGL wells. Sales receivables arise from the sale of our natural gas and NGL production to our customers. We currently market, directly or indirectly, our natural gas and NGL production to energy marketing companies, refineries, gas processors, petrochemical companies, local distribution companies, power plants and other end users.

We maintain credit procedures and policies to mitigate the credit risks posed by our counterparties. However, our credit procedures and policies may not be adequate to fully eliminate the risk and we do not require all of our counterparties to post collateral. If we fail to adequately assess the creditworthiness of our existing or future significant counterparties, or their creditworthiness unexpectedly materially deteriorates, any resulting nonpayment or nonperformance by them could have a materially adverse effect on our financial condition, results of operations and ability to pay dividends on our common stock.

Our business could be negatively affected by security threats and disruptions, including electronic, cybersecurity or physical security threats and other disruptions.

Our businesses face various security threats, including cybersecurity threats to gain unauthorized access to sensitive information or to render data or systems unusable; threats to the security of our facilities and infrastructure or third-party facilities and infrastructure, such as processing plants and pipelines; and threats from terrorist acts. The potential for such security threats has subjected our operations to increased risks that could have a material adverse effect on our business. In particular, our implementation of various procedures and controls to monitor and mitigate security threats and to increase security for our information, facilities and infrastructure may result in increased capital and operating costs. Moreover, there can be no assurance that such procedures and controls will be sufficient to prevent security breaches from occurring. Security breaches could lead to losses of sensitive information, critical infrastructure or capabilities essential to our operations and could have a material adverse effect on our reputation, financial position, results of operations, cash flows and ability to pay dividends on our common stock. Cybersecurity attacks in particular are becoming more sophisticated and include, but are not limited to, malicious software, attempts to gain unauthorized access to data and systems and other electronic security breaches that could lead to disruptions in critical systems, unauthorized release of confidential or otherwise protected information and corruption of data. The risk of a cybersecurity attack may increase as a result of the increased volume of “remote” work due to workplace policy changes resulting from the spread of COVID-19. These events could damage our reputation and lead to financial losses from remedial actions, loss of business or potential liability.

We may face various risks associated with the long-term trend toward increased activism against natural gas, NGL and oil exploration and development activities.

Opposition toward natural gas, NGL and oil drilling and development activity has been growing globally. Companies in the natural gas, NGL and oil industry are often the target of activist efforts from both individuals and non-governmental organizations regarding safety, environmental compliance and business practices. Anti-development activists are working to, among other things, reduce access to federal and state government lands and delay or cancel certain projects such as the development of natural gas, NGL and oil shale plays. For example, environmental activists continue to advocate for increased regulations or bans on shale drilling and hydraulic fracturing in the United States, even in jurisdictions that are among the most stringent in their regulation of the industry. Future activist efforts could result in the following:

- delay or denial of drilling permits;
- shortening of lease terms and reduction in lease size;
- restrictions on installation or operation of production, gathering or processing facilities;
- restrictions on the use of certain operating practices, such as hydraulic fracturing, or disposal of related waste materials, such as hydraulic fracking fluids and production;
- increased severance and/or other taxes;
- cyber-attacks;
- legal challenges or lawsuits;

- negative publicity about our business or the natural gas, NGL and oil industry in general;
- increased costs of doing business;
- reduction in demand for our products; and
- other adverse effects on our ability to develop our properties and expand production.

We may need to incur significant costs associated with responding to these initiatives, and there is no guarantee that our responses will produce favorable outcomes or results. Complying with any resulting additional legal or regulatory requirements that are substantial could have a material adverse effect on our business, financial condition, cash flows, results of operations and ability to pay dividends on our common stock.

Prolonged negative investor sentiment toward upstream natural gas, NGL and oil focused companies could limit our access to capital funding, which would constrain liquidity.

Certain segments of the investor community have developed negative sentiment towards investing in our industry. Recent equity returns in the sector versus other sectors have led to lower natural gas, NGL and oil representation in certain key equity market indices. Some investors, including certain pension funds, university endowments and family foundations, have stated policies to reduce or eliminate their investments in the natural gas, NGL and oil sector based on social and environmental considerations. Certain other stakeholders have pressured commercial and investment banks to stop funding natural gas, NGL and oil projects. If this negative sentiment continues for a prolonged period of time, it may reduce the availability of capital funding for potential development projects, each of which could have a material adverse effect our financial condition, results of operations, cash flows and ability to pay dividends on our common stock.

We may be involved in legal proceedings that could result in substantial liabilities.

Like many energy companies, in the ordinary course of our business, we are from time to time involved in various disputes and disagreements that may lead to legal and other proceedings, such as title, royalty or contractual disputes, regulatory compliance matters and personal injury or property damage matters. Such legal proceedings are inherently uncertain and their results cannot be predicted. Regardless of the outcome, such proceedings could have an adverse impact on us because of legal costs, diversion of management and other personnel and other factors. In addition, it is possible that a resolution of one or more such proceedings could result in liability, penalties or sanctions, as well as judgments, consent decrees or orders requiring a change in our business practices, which could materially and adversely affect our business, prospects, financial condition, results of operations, cash flows and ability to pay dividends on our common stock. Accruals for such liability, penalties or sanctions may be insufficient, and judgments and estimates to determine accruals or range of losses related to legal and other proceedings could materially change from one period to the next.

Loss of our information and computer systems could adversely affect our business.

We are heavily dependent on our information systems and computer-based programs, including our well operations information, seismic data, electronic data processing and accounting data. If any of such programs or systems were to fail or create erroneous information in our hardware or software network infrastructure, possible consequences include our loss of communication links, inability to find, produce, process and sell natural gas and NGLs and inability to automatically process commercial transactions or engage in similar automated or computerized business activities. Any such consequence could have a material adverse effect on our business.

We are highly dependent on our executive officers and technical personnel, the loss of any of whom could adversely affect our operations. Additionally, the continued success of our business depends on our ability to attract and retain experienced technical personnel.

We depend on the services of our senior management and technical personnel. There can be no assurance that we would be able to replace such members of management with comparable replacements or that such replacements would integrate well with our existing team. Further, the loss of the services of our

senior management could have a material adverse effect on our business, financial condition and results of operations. We do not maintain, nor do we plan to obtain, any “key-man” life insurance against the loss of any of these individuals. As a result, we are not insured against any losses resulting from the death of our key employees. The loss of the services of our senior management or technical personnel could have a material adverse effect on our business, prospects, financial condition, results of operations, cash flows and ability to pay dividends on our common stock.

Our continued success will depend, in part, on our ability to attract and retain experienced technical personnel, including geologists, engineers and other professionals. Competition for these professionals is strong and will likely intensify as a significant portion of today’s engineers, geologists and other professionals working within the oil and natural gas industry will reach the age of retirement in the coming years. Acquiring and retaining these personnel could prove more difficult or cost substantially more than estimated.

For as long as we are an emerging growth company, we will not be required to comply with certain reporting requirements, including disclosure about our executive compensation, that apply to other public companies.

We are classified as an “emerging growth company” under the JOBS Act. In addition, we have reduced Sarbanes-Oxley Act compliance requirements, as discussed elsewhere, for as long as we are an emerging growth company, which may be up to five full fiscal years. Unlike other public companies, we will not be required to, among other things, (i) comply with any new requirements adopted by the PCAOB requiring mandatory audit firm rotation or a supplement to the auditor’s report in which the auditor would be required to provide additional information about the audit and the financial statements of the issuer, (ii) provide certain disclosure regarding executive compensation required of larger public companies or (iii) hold nonbinding advisory votes on executive compensation.

To the extent that we rely on any of the exemptions available to emerging growth companies, you will receive less information about our executive compensation and internal control over financial reporting than issuers that are not emerging growth companies. If some investors find our common stock to be less attractive as a result, there may be a less active trading market for our common stock and our stock price may be more volatile.

We will remain an emerging growth company under the JOBS Act until December 31, 2022. While we continue to be an emerging growth company until the end of the 2022 fiscal year, we expect our revenues will exceed $1.235 billion during the year ending December 31, 2022 and we will no longer qualify as an emerging growth company as of December 31, 2022.

Risks Related to Environmental, Legal Compliance and Regulatory Matters

We are subject to complex federal, state, local and other laws and regulations that could adversely affect the cost, manner or feasibility of conducting our operations.

Our natural gas and NGL exploration and production operations are subject to complex and stringent laws and regulations. To conduct our operations in compliance with these laws and regulations, we must obtain and maintain numerous permits, approvals and certificates from various federal, state and local governmental authorities. Failure or delay in obtaining regulatory approvals or drilling and related permits could have a material adverse effect on our ability to develop our properties, and receipt of drilling and related permits with onerous conditions could increase our compliance costs or decrease our opportunities to execute projects and develop acreage. In addition, regulations regarding conservation practices and the protection of correlative rights affect our operations by limiting the quantity of natural gas and NGLs we may produce and sell.

We are subject to federal, state and local laws and regulations as interpreted and enforced by governmental authorities possessing jurisdiction over various aspects of the exploration, production and transportation of natural gas and NGLs. The possibility exists that new laws, regulations or enforcement policies could be more stringent and significantly increase our compliance costs or cause us to cease operations. If we are not able to recover the resulting costs through insurance or increased revenues, our financial condition and ability to pay dividends on our common stock could be adversely affected.

Increased attention to ESG matters and environmental conservation measures may adversely impact our business.

Increasing attention to climate change, societal expectations on companies to address climate change, investor and societal expectations regarding voluntary ESG initiatives and disclosures and consumer demand for alternative forms of energy may result in increased costs (including but not limited to increased costs related to compliance, stakeholder engagement, contracting and insurance), reduced demand for our products, reduced profits, increased investigations and litigation and negative impacts on our access to capital markets. Increasing attention to climate change, environmental justice and environmental conservation, for example, may result in demand shifts for natural gas, NGL and oil products and additional governmental investigations and private litigation against us. To the extent that societal pressures or political or other factors are involved, it is possible that such liability could be imposed without regard to our causation of or contribution to the asserted damage, or to other mitigating factors.

Moreover, while we may create and publish voluntary disclosures regarding ESG matters from time to time, many of the statements in those voluntary disclosures are based on hypothetical expectations and assumptions that may or may not be representative of current or actual risks or events or forecasts of expected risks or events, including the costs associated therewith. Such expectations and assumptions are necessarily uncertain and may be prone to error or subject to misinterpretation given the long timelines involved and the lack of an established single approach to identifying, measuring and reporting on many ESG matters. Such disclosures may also be at least partially reliant on third-party information that we have not verified, or cannot verify, independently. In addition, we expect there will likely be increasing levels of regulation, disclosure-related and otherwise, with respect to ESG matters, and increased regulation will likely lead to increased compliance costs as well as scrutiny that could heighten all of the risks identified in this risk factor. We may also take certain actions to improve the ESG profile of our company and/or products, but we cannot guarantee that such actions will have the desired effect.

In addition, we note that standards and expectations regarding carbon accounting and the processes for measuring and counting GHG emissions and GHG emission reductions are evolving, and it is possible that our approach to measuring both our emissions and our approaches to reducing emissions may be, either currently by some stakeholders or at some future point, considered inconsistent with common or best practices with respect to measuring and accounting for such matters, reducing overall emissions and/or achieving “net zero.” If our approaches to such matters fall out of step with common or best practice, we may be subject to additional scrutiny, criticism, regulatory and investor engagement or litigation, any of which may adversely impact our business, financial condition or results of operations.

Additionally, in March 2022, the SEC proposed a new rule relating to the disclosure of a range of climate-related data, risks and opportunities. We are currently assessing this rule, but we cannot predict the costs of implementation or any potential adverse impacts resulting from the rule. To the extent this rule is finalized as proposed, we or our customers could incur increased costs related to the assessment and disclosure of climate-related risks. In addition, enhanced climate disclosure requirements could accelerate the trend of certain stakeholders and lenders restricting or seeking more stringent conditions with respect to their investments in certain carbon intensive sectors.

In addition, organizations that provide information to investors on corporate governance and related matters have developed ratings processes for evaluating companies on their approach to ESG matters. Such ratings are used by some investors to inform their investment and voting decisions. Unfavorable ESG ratings and recent activism directed at shifting funding away from companies with energy-related assets could lead to increased negative investor sentiment toward us and our industry and to the diversion of investment to other industries, which could have a negative impact on our access to and costs of capital. Also, institutional lenders may decide not to provide funding for fossil fuel energy companies based on climate change and natural capital related concerns, which could affect our access to capital for potential growth projects. Moreover, to the extent ESG matters negatively impact our reputation, we may not be able to compete as effectively to recruit or retain employees. Such ESG matters may also impact our suppliers or customers, which may adversely impact our business, financial condition, or results of operations.

Energy conservation measures and technological advances could reduce demand for natural gas, NGL and oil.

Energy conservation measures, alternative fuel requirements, governmental requirements for renewable energy resources, increasing consumer demand for alternatives to natural gas, NGL and oil, technological

advances in fuel economy and energy generation devices could reduce demand for natural gas, NGLs and oil. The impact of the changing demand for natural gas, NGL and oil services and products may have a material adverse effect on our business, financial condition, results of operations, cash flows and ability to pay dividends on our common stock.

Significant physical effects of climatic change have the potential to damage our facilities, disrupt our production activities and cause us to incur significant costs in preparing for or responding to those effects.

Climate change could have an effect on the severity of weather (including hurricanes, droughts and floods), sea levels, the arability of farmland, changes in temperature and other meteorological patterns, and water availability and quality. If such effects were to occur, our development and production operations have the potential to be adversely affected. Potential adverse effects could include damages to our facilities from powerful winds or rising waters in low lying areas, disruption of our production activities either because of climate related damages to our facilities or in our costs of operation potentially arising from such climatic effects, less efficient or non-routine operating practices necessitated by climate effects or increased costs for insurance coverage in the aftermath of such effects. Significant physical effects of climate change could also have an indirect effect on our financing and operations by disrupting the transportation or process-related services provided by midstream companies, service companies or suppliers with whom we have a business relationship. We may not be able to recover through insurance some or any of the damages, losses or costs that may result from potential physical effects of climate change. We have developed and started to implement a plan to address the potential impacts of climate change on our operations, but we cannot assure you that our operations will not be negatively impacted by climate change.

Federal, state and local legislative and regulatory initiatives relating to hydraulic fracturing as well as governmental reviews of such activities could result in increased costs and additional operating restrictions or delays in the completion of natural gas and NGL wells and adversely affect our production.

Hydraulic fracturing is used in many of our operations to stimulate production of hydrocarbons, particularly natural gas and NGLs. The process involves the injection of water, sand and additives under pressure into a targeted subsurface formation to fracture the surrounding rock and stimulate production. The U.S. Congress (“Congress”) from time to time has considered legislation to amend the federal Safe Drinking Water Act (“SDWA”) to remove the exemption currently available to hydraulic fracturing, which would place additional regulatory burdens upon hydraulic fracturing operations, including requirements to obtain a permit prior to commencing operations adhering to certain construction requirements, to establish financial assurance, and to require reporting and disclosure of the chemicals used in those operations. This legislation has not passed.

Hydraulic fracturing (other than that using diesel) is currently generally exempt from regulation under the SDWA’s UIC program and is typically regulated by state oil and natural gas commissions or similar agencies. However, several federal agencies have asserted regulatory authority or pursued investigations over certain aspects of the process.

For example, in June 2016, the EPA adopted effluent limitations for the treatment and discharge of wastewater resulting from onshore unconventional natural gas, NGL and oil extraction facilities to publicly owned treatment works and, in 2014, the EPA asserted regulatory authority pursuant to the UIC program over hydraulic fracturing activities involving the use of diesel and issued guidance covering such activities.

Also, in December 2016, the EPA released its final report on the potential impacts of hydraulic fracturing on drinking water resources, concluding that “water cycle” activities associated with hydraulic fracturing may impact drinking water resources “under some circumstances.” The final report identified the following risks: water withdrawals for fracturing in times or areas of low water availability; surface spills during the management of fracturing fluids, chemicals or produced water; injection of fracturing fluids into wells with inadequate mechanical integrity; injection of fracturing fluids directly into groundwater resources; discharge of inadequately treated fracturing wastewater to surface waters; and disposal or storage of fracturing wastewater in unlined pits. To date, EPA has taken no further action in response to the December 2016 report.

In addition, some states have adopted, and other states are considering adopting, regulations that restrict or could restrict hydraulic fracturing in certain circumstances. Further, state and local governmental entities have exercised the regulatory powers to regulate, curtail or in some cases prohibit hydraulic fracturing. New laws or regulations that impose new obligations on, or significantly restrict hydraulic fracturing, could make it more difficult or costly for us to perform hydraulic fracturing activities and thereby affect our determination of whether a well is commercially viable and increase our cost of doing business. Such increased costs and any delays or curtailments in our production activities could have a material adverse effect on our business, prospects, financial condition, results of operations, liquidity and ability to pay dividends on our common stock.

Regulatory action may cause us to shut in or curtail production.

Our rate of production and access to transportation and storage options may also be affected by U.S. federal and state regulation of oil and natural gas production. In 2020, actions of foreign oil producers such as Saudi Arabia and Russia and the impact on global demand of the COVID-19 pandemic materially decreased global crude oil prices and generated a surplus of oil. As a result, regulatory action to curtail production has been contemplated in Texas. For example, the TRRC, which regulates the production of oil and natural gas in the State of Texas, held a hearing in April 2020 regarding potential production cuts for producers in Texas in light of the recent decline in oil prices globally. While the TRRC ultimately declined to institute mandatory production cuts, the agency may choose to revisit the issue. Global and domestic oil prices have recovered substantially to the point that TRRC curtailments are highly unlikely. However, if the TRRC decides to limit the production of crude oil in Texas in the future, our business and results of operations are not likely to be materially and adversely impacted given that our production comes from dry gas wells.

Any such production limitations will likely force us to shut in production. If we are forced to shut in production as a result of regulatory actions or otherwise, we will likely incur greater costs to bring the associated production back online. Cost increases necessary to bring the associated wells back online may be significant enough that such wells would become uneconomic at low commodity price levels, which may lead to decreases in our proved reserve estimates and potential impairments and associated charges to our earnings. If we are able to bring wells back online, there is no assurance that such wells will be as productive following recommencement as they were prior to being shut in. Any shut in or curtailment of the natural gas and NGLs produced from our fields could adversely affect our financial condition, results of operations, cash flows, ability to pay dividends on our common stock and ability to fulfill our obligations under our firm transportation service agreements.

Our operations are subject to a series of risks relating to climate change that could result in increased compliance or operating costs, limit the areas in which we may conduct natural gas and NGL exploration and production activities, and reduce demand for the natural gas and NGLs we produce.

Climate change continues to attract considerable public and scientific attention. As a result, numerous proposals have been made and are likely to continue to be made at the international, national, regional and state levels of government to monitor and limit emissions of carbon dioxide, methane and other GHGs. These efforts have included consideration of cap-and-trade programs, carbon taxes, GHG reporting and tracking programs and regulations that directly limit GHG emissions from certain sources.

In the United States, no comprehensive climate change legislation has been implemented at the federal level. However, the Inflation Reduction Act, recently passed by Congress, imposed several new climate-related requirements on oil and gas operations. Additionally, President Biden has highlighted addressing climate change as a priority of his administration and has issued several executive orders addressing climate change. In August 2022, the U.S. Congress passed, and President Biden signed into law, the Inflation Reduction Act of 2022, which appropriates significant federal funding for renewable energy initiatives and, for the first time ever, imposes a fee on GHG emissions from certain facilities. The emissions fee and funding provisions of the law could increase our operating costs and accelerate the transition away from fossil fuels, which could in turn adversely affect our business and results of operations.

Moreover, following the U.S. Supreme Court finding in 2007 that GHG emissions constitute a pollutant under the CAA, the EPA adopted regulations that, among other things, establish construction

and operating permit reviews for GHG emissions from certain large stationary sources, require the monitoring and annual reporting of GHG emissions from certain petroleum and natural gas system sources in the United States, and together with the DOT, imposing GHG emissions and fuel economy standards for vehicles in the United States. The regulation of methane from oil and gas facilities has been subject to uncertainty in recent years. The EPA previously had promulgated New Source Performance Standards ("NSPS") imposing limitations on methane emissions from sources in the oil and gas sector. Subsequently, in September 2020, the Trump Administration rescinded those methane standards and removed the transmission and storage segments from the oil and gas source category under the CAA's NSPS. However, on June 30, 2021, President Biden signed a resolution passed by Congress under the Congressional Review Act nullifying the September 2020 rule, effectively reinstating the prior standards. In addition, on November 15, 2021, the EPA proposed rules that would establish requirements for methane emissions from existing and modified oil and gas sources and impose additional requirements for new sources with respect to methane emissions ("2021 Proposed Methane Rules"). On November 11, 2022, the EPA issued a supplemental proposal to update, strengthen and expand the 2021 Proposed Methane Rules that would make the proposed requirements more stringent and include sources not previously regulated under the oil and gas source category. The EPA has announced that it plans to finalize these rulemakings in 2023. The reinstatement of direct regulation of methane emission for new sources, promulgation of requirements for existing oil and gas sources and enhanced requirements for new sources, and the expansion of sources covered by the EPA's rules, could result in increased compliance costs or otherwise impact our results of operations.

Various states and groups of states have adopted or are considering adopting legislation, regulations or other regulatory initiatives that are focused on such areas as GHG cap and trade programs, carbon taxes, reporting and tracking programs, and restriction of emissions. For example, several states, including Pennsylvania and New Mexico, have proposed or adopted regulations restricting the emission of methane from exploration and production activities. At the international level, President Biden has recommitted the United States to the Paris Agreement and, in April 2021, announced a goal of reducing the United States' economy-wide GHG emissions by 50-52% below 2005 levels by 2030. In November 2021, the international community gathered in Glasgow at the 26th Conference to the Parties on the UN Framework Convention on Climate Change ("COP26"), during which multiple announcements were made, including a call for parties to eliminate certain fossil fuel subsidies and pursue further action on non-CO_2 GHGs. Relatedly, the United States and European Union jointly announced the launch of the "Global Methane Pledge," which aims to cut global methane pollution at least 30% by 2030 relative to 2020 levels, including "all feasible reductions" in the energy sector. President Biden also agreed in November 2021 to cooperate with Chinese leader Xi Jinping on accelerating the transition to a global net zero economy. The impacts of these pledges, agreements and any legislation or regulation promulgated to fulfill the United States' commitments under the Paris Agreement, COP26, or other international conventions cannot be predicted at this time. However, to the extent these developments result in new restrictions on natural gas and NGL operations, increase operational costs, or otherwise reduce the demand for natural gas and NGLs, they could have a material adverse effect on our business.

Governmental, scientific, and public concern over the threat of climate change arising from GHG emissions has resulted in increasing political risks in the United States, including climate change related pledges made by certain candidates now in public office. On January 27, 2021, President Biden issued an executive order that calls for substantial action on climate change, including, among other things, the increased use of zero-emission vehicles by the federal government, the elimination of subsidies provided to the fossil fuel industry, and increased emphasis on climate-related risks across government agencies and economic sectors. The Biden Administration also issued orders temporarily suspending the issuance of authorizations, and suspending the issuance of new leases pending a study, for oil and gas development on federal lands, although such orders are no longer in effect. For more information, see "*Business — Government Regulation and Environmental Matters*." As a result, we cannot predict the full impact of these developments or whether the Biden Administration may pursue further restrictions. Other actions that could be pursued by the Biden Administration may include the imposition of more restrictive requirements for the establishment of pipeline infrastructure or the permitting of LNG export facilities, as well as more restrictive GHG emission limitations for oil and gas facilities.

Increasing attention to global climate change has resulted in increased investor attention and an increased risk of public and private litigation, which could increase our costs or otherwise adversely affect

our business. A number of parties have sought to bring suit against the largest oil and gas companies in state or federal court, alleging, among other things, that such companies created public nuisances by producing, handling or marketing fuels that contributed to global warming effects, such as rising sea levels, and therefore are responsible for roadway and infrastructure damages, or alleging that the companies have been aware of the adverse effects of climate change for some time but failed to adequately disclose those impacts. The ultimate outcome and impact to us of any such litigation cannot be predicted with certainty, and we could incur substantial legal costs associated with defending these and similar lawsuits in the future. Stockholder activism has also recently been increasing in our industry, and stockholders may attempt to effect changes to our business or governance, whether by stockholder proposals, public campaigns, proxy solicitations or otherwise. Any of these risks could result in unexpected costs, negative sentiments about us, disruptions in our operations, increases to our operating expenses and reduced demand for our products, which in turn could have an adverse effect on our business, financial condition and results of operations.

There are also increasing financial risks for fossil fuel producers as stockholders currently invested in fossil-fuel energy companies may elect in the future to shift some or all of their investments into other sectors. Institutional lenders who provide financing to fossil-fuel energy companies also have become more attentive to sustainable lending practices and some of them may elect not to provide funding for fossil fuel energy companies. For example, at COP26, the Glasgow Financial Alliance for Net Zero ("GFANZ") announced that commitments from over 450 firms across 45 countries had resulted in over $130 trillion in capital committed to net zero goals. The various sub-alliances of GFANZ generally require participants to set short-term, sector-specific targets to transition their financing, investing, and/or underwriting activities to net zero emissions by 2050. There is also a risk that financial institutions will be required to adopt policies that have the effect of reducing the funding provided to the fossil fuel sector. President Biden signed an executive order calling for the development of a "climate finance plan" and, separately, the Federal Reserve has joined the Network for Greening the Financial System, a consortium of financial regulators focused on addressing climate-related risks in the financial sector. More recently, in November 2021, the Federal Reserve issued a statement in support of the efforts of the NGFS to identify key issues and potential solutions for the climate-related challenges most relevant to central banks and supervisory authorities. Limitation of investments in and financings for fossil fuel energy companies could result in the restriction, delay or cancellation of drilling programs or development or production activities.

Additionally, in March 2022, the SEC proposed a new rule relating to the disclosure of a range of climate-related data, risks and opportunities. The proposed rule would impose several new disclosure obligations, including (i) disclosure on an annual basis of a registrant's Scope 1 and Scope 2 GHG emissions, with third-party independent attestation of such emissions for accelerated filers, (ii) disclosure on an annual basis of a registrant's Scope 3 GHG emissions for accelerated filers, (iii) disclosure on how the board of directors and management oversee climate-related risks and certain climate-related governance items, (iv) disclosure of information related to a registrant's publicly announced climate-related targets, goals and/or transition plans and (v) disclosure on whether and how climate-related events and transition activities impact line items above a threshold amount on a registrant's consolidated financial statements, including the impact of the financial estimates and the assumptions used. We are currently assessing this rule, but we cannot predict the costs of implementation or any potential adverse impacts resulting from the rule. To the extent this rule is finalized as proposed, we or our customers could incur increased costs related to the assessment and disclosure of climate-related risks. In addition, enhanced climate disclosure requirements could accelerate the trend of certain stakeholders and lenders restricting or seeking more stringent conditions with respect to their investments in certain carbon intensive sectors. The adoption and implementation of new or more stringent international, federal or state legislation, regulations or other regulatory initiatives that impose more stringent standards for GHG emissions from the oil and gas sector or otherwise restrict the areas in which this sector may produce oil and gas or generate GHG emissions could result in increased costs of compliance or costs of consuming, and thereby reduce demand for, oil and gas. Additionally, political, litigation and financial risks may result in us restricting or cancelling production activities, incurring liability for infrastructure damages as a result of climatic changes, or having an impaired ability to continue to operate in an economic manner. One or more of these developments could have a material adverse effect on our business, financial condition and results of operations.

Our ability to pursue our business strategies may be adversely affected if we incur costs and liabilities due to a failure to comply with environmental, health and safety laws or regulations or a release into the environment.

We may incur significant costs and liabilities as a result of environmental requirements applicable to the operation of our wells, gathering systems and other facilities. These costs and liabilities could arise under a wide range of federal, state and local environmental, health and safety laws and regulations, including, for example, the following federal laws and their state counterparts, as amended from time to time:

- the CAA, which regulates the emission of air pollutants from many sources, imposes various preconstruction, monitoring and reporting requirements and is relied upon by the EPA as authority for adopting climate change regulatory initiatives relating to GHG emissions;
- the Federal Water Pollution Control Act, also known as the Clean Water Act ("CWA"), which regulates discharges of pollutants from facilities to state and federal waters and establishes the extent to which waterbodies are subject to federal jurisdiction and rulemaking as protected waters of the United States;
- the SDWA, which is designed to protect the quality of the nation's public drinking water through adoption of drinking water standards and UIC over the subsurface injection of fluids into belowground formations;
- the federal Resource Conservation and Recovery Act, as amended ("RCRA"), which imposes requirements for the generation, treatment, storage, transport, disposal and cleanup of nonhazardous and hazardous wastes;
- the federal Comprehensive Environmental Response, Compensation, and Liability Act ("CERCLA"), which imposes liability on generators, and those who arrange for the transportation, treatment or disposal, of hazardous substances at sites where hazardous substance releases have occurred or are threatening to occur as well as on present and certain past owners and operators of those sites;
- the Emergency Planning and Community Right-to-Know Act, which requires facilities to implement a safety hazard communication program and disseminate information to employees, local emergency planning committees and response departments about toxic chemical uses and inventories; and
- the Endangered Species Act ("ESA"), which restricts activities that may affect federally identified endangered and threatened species or their habitats through the implementation of operating limitations or restrictions or a temporary, seasonal or permanent ban on operations in affected areas.

These U.S. laws and their implementing regulations, as well as state counterparts, generally restrict the level of pollutants emitted to ambient air, discharges to surface water and disposals or other releases or threats of release to surface, soils and groundwater. Failure to comply with these laws and regulations may result in the assessment of sanctions, including administrative, civil and criminal penalties, the imposition of investigatory, remedial and corrective action obligations, the incurrence of capital expenditures, the occurrence of delays in the permitting, development or expansion of projects and the issuance of orders enjoining some or all of our future operations in a particular area. Certain environmental laws impose strict joint and several liability, without regard to fault or legality of conduct, for costs required to clean up and restore sites where hazardous substances or other wastes have been disposed of or otherwise released. Moreover, it is not uncommon for neighboring landowners and other third parties to file claims for personal injury and property damage allegedly caused by the release of hazardous substances, wastes or other materials into the environment. In addition, these laws and regulations may restrict the rate of natural gas and NGL production or underground injection, disposal, and sequestration of CO_2. Historically, our environmental compliance costs have not had a material adverse effect on our results of operations; however, there can be no assurance that such costs will not be material in the future or that such future compliance will not have a material adverse effect on our business and operating results.

In addition, as a result of these environmental, health and safety laws and regulations, and their impact on our operations, we rely on specialized contracted companies to perform the majority of the specialized services inherent in the oil and gas industry. As such, we rely on the ability of these contractors to provide trained labor and properly designed and maintained equipment unique to their services. With the cyclical nature of the oil and gas business, the personnel used by these specialized contractors to perform these

services may differ significantly in experience levels. From time to time, these specialized contractors may use new personnel that are still in training or may further sub-contract these services to other companies or personnel. There is a risk that these sub-contractors are unqualified or under-trained or that their equipment is not properly designed or maintained, which could result in work being performed inadequately or unsafely.

Moreover, public interest in the protection of the environment has increased dramatically in recent years. The trend of more expansive and stringent environmental legislation and regulations applied to the oil and gas industry could continue, resulting in increased costs of doing business and consequently affecting profitability. To the extent laws are enacted or other governmental action is taken that restricts drilling or production or imposes more stringent and costly operating, waste handling, disposal and cleanup requirements, our business, prospects, financial condition or results of operations could be materially adversely affected.

Our gathering systems and processing, treating and fractionation facilities are subject to state regulation that could have a material adverse effect on our operations and cash flows.

State regulation of gathering systems and processing, treating and fractionation facilities includes safety and environmental requirements. In addition, several of our gas gathering systems are also subject to non-discriminatory take requirements and complaint-based state regulation with respect to our rates and terms and conditions of service. Our NGL gathering pipelines and operations may also be or become subject to state public utility or related jurisdiction which could impose additional safety and operational regulations relating to the design, siting, installation, testing, construction, operation, replacement and management of NGL gathering facilities. State and local regulation may cause us to incur additional costs, limit our operations, or prevent us from choosing the customers to which we provide service, any or all of which could have a material adverse effect on our operations and revenue.

Temple I is subject to the rules and regulations of the Public Utility Commission of Texas (the "PUCT") and ERCOT, which could have a material adverse effect on our operations and cash flows.

Temple I is subject to the rules and regulations of the PUCT and ERCOT. These regulations can impact the operations of generation facilities, which in turn can impact associated costs and revenues. For example, the PUCT is currently considering changes to its rules regarding weatherization of power plants, which could increase capital and operations and maintenance costs for generation facilities. In addition, from time to time, ERCOT makes changes to its protocols or takes out of market actions that impact the wholesale power market. These regulations may cause us to incur additional costs or face delays, or otherwise could have a material adverse effect on our operations and cash flows.

We may face unanticipated water and other waste disposal costs as a result of increased water-related regulations.

We may be subject to regulation that restricts our ability to discharge water produced as part of our natural gas and NGL production operations. Productive zones frequently contain water that must be removed for the natural gas and NGLs to produce, and our ability to remove and dispose of sufficient quantities of water from the various zones will determine whether we can produce natural gas and NGLs in commercial quantities. The produced water must be transported from the leasehold and/or injected into disposal wells. The availability of disposal wells with sufficient capacity to receive all of the water produced from our wells may affect our ability to produce our wells. Also, the cost to transport and dispose of that water, including the cost of complying with regulations concerning water disposal, may reduce our profitability. Where water produced from our projects fails to meet the quality requirements of applicable regulatory agencies, our wells produce water in excess of the applicable volumetric permit limits, the disposal wells fail to meet the requirements of all applicable regulatory agencies, or we are unable to secure access to disposal wells with sufficient capacity to accept all of the produced water, we may have to shut in wells, reduce drilling activities, or upgrade facilities for water handling or treatment. The costs to dispose of this produced water may increase if any of the following occur:

- we cannot obtain future permits from applicable regulatory agencies;

- water of lesser quality or requiring additional treatment is produced;
- our wells produce excess water;
- new laws and regulations require water to be disposed in a different manner; or
- costs to transport the produced water to the disposal wells increase.

In June 2016, the EPA adopted effluent limitations for the treatment and discharge of wastewater resulting from onshore unconventional natural gas, NGL and oil extraction facilities to publicly owned treatment works. The disposal of fluids gathered from natural gas, NGL and oil producing operations in underground disposal wells has been pointed to by some groups and regulators as a potential cause of increased induced seismic events in certain areas of the country, particularly in Oklahoma, Texas, Colorado, Kansas, New Mexico and Arkansas. Certain states have begun to consider or adopt laws and regulations that may restrict or otherwise prohibit oilfield fluid disposal in certain areas or underground disposal wells, and state agencies implementing those requirements may issue orders directing certain wells in areas where seismic incidents have occurred to restrict or suspend disposal well operations or impose standards related to disposal well construction and monitoring. Any one or more of these developments could also increase our cost to dispose of our produced water.

A change in the jurisdictional characterization of some of our assets by federal, state or local regulatory agencies or a change in policy by those agencies may result in increased regulation of our assets, which may cause our revenues to decline and operating expenses to increase.

Our natural gas gathering operations are generally exempt from the jurisdiction and regulation of the Federal Energy Regulatory Commission (“FERC”), except for certain anti-market manipulation provisions. Section 1(b) of the Natural Gas Act (“NGA”) exempts natural gas gathering facilities from regulation by FERC as a natural gas company as defined under that statute. We believe the natural gas pipelines in our gathering systems meet the traditional tests FERC has used to establish a pipeline’s status as a gathering pipeline not subject to regulation by FERC. However, the distinction between FERC-regulated transmission services and federally unregulated gathering services is fact intensive and the subject of ongoing litigation. If FERC were to consider the status of our gathering systems and determine that they are subject to FERC regulation, the rates for, and terms and conditions of, services provided by those gathering systems would be subject to modification by FERC under the NGA or the Natural Gas Policy Act (“NGPA”). Such regulation could decrease revenue, increase operating costs, and adversely affect our business, financial condition, and results of operations. In addition, if any of our facilities were found to have provided services or otherwise operated in violation of the NGA or NGPA, it could result in the imposition of civil penalties as well as a requirement to disgorge charges collected for such services in excess of the rates established by FERC.

The pipelines used to gather and transport natural gas we produce are subject to regulation by the U.S. Department of Transportation (“DOT”) under the Natural Gas Pipeline Safety Act of 1968, as amended, the Pipeline Safety Act of 1992, as reauthorized and amended, and the Pipeline Safety, Regulatory Certainty, and Job Creation Act of 2011 (“2011 Pipeline Safety Act”). The Pipeline and Hazardous Materials Safety Administration (“PHMSA”) has established a risk-based approach to determine which gathering pipelines are subject to regulation and what safety standards regulated gathering pipelines must meet. In April 2016, pursuant to one of the requirements of the 2011 Pipeline Safety Act, PHMSA published a proposed rulemaking that would expand integrity management requirements and impose new pressure testing requirements on currently regulated gas gathering and transmission pipelines. The proposal would also significantly expand the regulation of gas gathering lines, subjecting previously unregulated pipelines to requirements regarding damage prevention, corrosion control, public education programs, and maximum allowable operating pressure limits, among others. PHMSA later announced that the agency would issue three separate final rulemakings relating to the original proposed rule for natural gas pipelines. In October 2019, PHMSA submitted three major rules to the Federal Register, including rules focused on: the safety of gas transmission pipelines (the first of three parts of the so-called gas Mega Rule), the safety of hazardous liquid pipelines and enhanced emergency order procedures. The gas transmission rule requires operators of gas transmission pipelines constructed before 1970 to determine the material strength of their lines by reconfirming the maximum allowable operating pressure. In addition, the rule updates reporting and records retention standards for gas transmission pipelines. PHMSA is expected to issue the second and third parts

of the gas Mega Rule in the near future. The safety and hazardous liquid pipelines rule would extend leak detection requirements to all non-gathering hazardous liquid pipelines and require operators to inspect affected pipelines following extreme weather events or natural disasters to address any resulting damage. Finally, the enhanced emergency procedures rule focuses on increased emergency safety measures. In particular, this rule increases the authority of PHMSA to issue an emergency order that addresses unsafe conditions or hazards that pose an imminent threat to pipeline safety. Additional future regulatory action expanding PHMSA's jurisdiction and imposing stricter integrity management requirements is possible. The adoption of laws or regulations that apply more comprehensive or stringent safety standards could require us to install new or modified safety controls, pursue new capital projects, or conduct maintenance programs on an accelerated basis, all of which could require us to incur increased operating costs that could be significant. In addition, should we fail to comply with PHMSA or comparable state regulations, we could be subject to substantial fines and penalties. The maximum civil penalties PHMSA can impose are $239,142 per pipeline safety violation per day, with a maximum of $2,391,412 for a related series of violations.

Restrictions on drilling, completion, production or related activities intended to protect certain species of wildlife may adversely affect our ability to conduct drilling activities in some of the areas where we operate.

Natural gas and NGL operations in our operating areas can be adversely affected by seasonal or permanent restrictions on drilling activities designed to protect various wildlife, such as those restrictions imposed under the ESA. Seasonal restrictions may limit our ability to operate in protected areas and can intensify competition for drilling rigs, oilfield equipment, services, supplies and qualified personnel, which may lead to periodic shortages when drilling is allowed. These constraints and the resulting shortages or high costs could delay our operations and materially increase our operating and capital costs. Permanent restrictions imposed to protect endangered species could prohibit drilling in certain areas or require the implementation of expensive mitigation measures. The designation of previously unprotected species in areas where we operate as threatened or endangered could cause us to incur increased costs arising from species protection measures or could result in limitations on our exploration, development and production activities that could have an adverse impact on our ability to develop and produce our reserves. To the extent species are listed or re-designated under the ESA or similar state laws, or previously unprotected species are designated as threatened or endangered in areas where our properties are located, operations on those properties could incur increased costs arising from species protection measures and face delays or limitations with respect to production activities thereon. There is also increasing interest in nature-related matters beyond protected species, such as general biodiversity, which may similarly require us to incur costs or take other measures which may materially impact our business or operations.

Potential transactions that could benefit our stockholders may be subject to regulatory review and approval requirements, including pursuant to foreign investment regulations and review by governmental entities such as the Committee on Foreign Investment in the United States ("CFIUS"), or may be ultimately prohibited.

Potential transactions we consider may be subject to regulatory review and approval requirements by governmental entities, or ultimately prohibited. For example, CFIUS has authority to review direct or indirect foreign investments in U.S. companies. Among other things, CFIUS is empowered to require certain foreign investors to make mandatory filings, to charge filing fees related to such filings, and to self-initiate national security reviews of foreign direct and indirect investments in U.S. companies if the parties to that investment choose not to file voluntarily. In the case that CFIUS determines an investment to be a threat to national security, CFIUS has the power to unwind or place restrictions on the investment. Whether CFIUS has jurisdiction to review an acquisition or investment transaction depends on, among other factors, the nature and structure of the transaction, including the level of beneficial ownership interest and the nature of any information or governance rights involved. For example, investments that result in "control" of a U.S. business by a foreign person always are subject to CFIUS jurisdiction. CFIUS's expanded jurisdiction under the Foreign Investment Risk Review Modernization Act of 2018 and implementing regulations that became effective on February 13, 2020 further includes investments that do not result in control of a U.S. business by a foreign person but afford certain foreign investors certain information or governance rights in a U.S. business that has a nexus to "critical technologies," "critical infrastructure" and/or "sensitive personal data."

For so long as Banpu retains a material ownership interest in us, we may be deemed a "foreign person" under the regulations relating to CFIUS. As such, potential transactions involving a U.S. business or foreign business with U.S. subsidiaries that we may wish to pursue may be subject to CFIUS review. If a particular transaction falls within CFIUS's jurisdiction, we may determine that we are required to make a mandatory filing or that we will submit to CFIUS review on a voluntary basis, or to proceed with the transaction without submitting to CFIUS and risk CFIUS intervention, before or after closing the transaction. CFIUS may decide to block or delay transactions that could benefit our stockholders, impose conditions with respect to such transactions or request the President of the United States to order us to divest all or a portion of the assets or companies we acquired without first obtaining CFIUS approval, which may limit the attractiveness of, delay or prevent us from pursuing certain target companies or assets that we believe would otherwise be beneficial to us and our stockholders, any of which could have a material adverse effect on our financial condition, results of operations, cash flows and ability to pay dividends on our common stock.

Our sales of natural gas and NGLs, and any hedging activities related to such commodities, expose us to potential regulatory risks.

Sales of natural gas and NGLs are not currently regulated and are made at negotiated prices. However, the federal government historically has been active in the area of natural gas and NGL sales regulation. We cannot predict whether new legislation to regulate natural gas and NGL sales might be proposed, what proposals, if any, might actually be enacted by Congress or the various state legislatures and what effect, if any, the proposals might have on our operations.

Additionally, the Federal Trade Commission and the Commodity Futures Trading Commissions (the "CFTC") hold statutory authority to monitor certain segments of the physical and futures energy commodities markets relevant to our business. These agencies have imposed broad regulations prohibiting fraud and manipulation of such markets. With regard to our physical sales of natural gas and NGLs, and any hedging activities related to these energy commodities, we are required to observe the market-related regulations enforced by these agencies, which hold substantial enforcement authority. Failure to comply with such regulations, as interpreted and enforced, could materially and adversely affect our financial condition, results of operations, cash flows and ability to pay dividends on our common stock.

The adoption of derivatives legislation and regulations by Congress related to derivative contracts could have an adverse impact on our ability to hedge risks associated with our business.

Title VII of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act") establishes federal oversight and regulation of over-the-counter ("OTC") derivatives and requires the CFTC and the SEC to enact further regulations affecting derivative contracts, including the derivative contracts we use to hedge our exposure to price volatility through the OTC market. Although the CFTC and the SEC have issued final regulations in certain areas, final rules in other areas and the scope of relevant definitions and/or exemptions still remain to be finalized.

In one of its rulemaking proceedings still pending under the Dodd-Frank Act, the CFTC issued on December 5, 2016, a re-proposed rule imposing position limits for certain futures and option contracts in various commodities (including natural gas, NGL and oil) and for swaps that are their economic equivalents. Under the proposed rules on position limits, certain types of hedging transactions are exempt from these limits on the size of positions that may be held, provided that such hedging transactions satisfy the CFTC's requirements for certain enumerated "bona fide hedging" transactions or positions. A final rule has not yet been issued. Similarly, on December 2, 2016, the CFTC has reissued a proposed rule regarding the capital a swap dealer or major swap participant is required to set aside with respect to its swap business, but the CFTC has not yet issued a final rule.

The CFTC has also adopted final rules regarding aggregation of positions, under which a party that controls the trading of, or owns 10% or more of the equity interests in, another party will have to aggregate the positions of the controlled or owned party with its own positions for purposes of determining compliance with position limits unless an exemption applies. The CFTC's aggregation rules are now in effect, though CFTC staff have granted relief from various conditions and requirements in the final aggregation rules until the earlier of August 12, 2025 and the effective date of any rulemaking that codifies the relief. With the implementation of the final aggregation rules and upon the adoption and effectiveness of

final CFTC position limits rules, our ability to execute our hedging strategies described above could be limited. It is uncertain at this time whether, when and in what form the CFTC's proposed new position limits rules may become final and effective.

The CFTC issued a final rule on margin requirements for uncleared swap transactions on January 6, 2016, which includes an exemption from any requirement to post margin to secure uncleared swap transactions entered into by commercial end-users in order to hedge commercial risks affecting their business. In addition, the CFTC has issued a final rule authorizing an exemption from the otherwise applicable mandatory obligation to clear certain types of swap transactions through a derivatives clearing organization and to trade such swaps on a regulated exchange, which exemption applies to swap transactions entered into by commercial end-users in order to hedge commercial risks affecting their business. The mandatory clearing requirement currently applies only to certain interest rate swaps and credit default swaps, but the CFTC could act to impose mandatory clearing requirements for other types of swap transactions. The Dodd-Frank Act also imposes recordkeeping and reporting obligations on counterparties to swap transactions and other regulatory compliance obligations.

All of the above regulations could increase the costs to us of entering into financial derivative transactions to hedge or mitigate our exposure to commodity price volatility and other commercial risks affecting our business. While it is not possible at this time to predict when the CFTC will issue final rules applicable to position limits or capital requirements, depending on our ability to satisfy the CFTC's requirements for a commercial end-user using swaps to hedge or mitigate our commercial risks, these rules and regulations may require us to comply with position limits and with certain clearing and trade-execution requirements in connection with our financial derivative activities. When a final rule on capital requirements for swap dealers is issued, the Dodd-Frank Act may require our current swap dealer counterparties to post additional capital as a result of entering into uncleared financial derivatives with us, which capital requirements rule could increase the costs to us of future financial derivatives transactions. The Volcker Rule provisions of the Dodd-Frank Act may also require our current bank counterparties that engage in financial derivative transactions to spin off some of their derivatives activities to separate entities, which separate entities may not be as credit-worthy as the current bank counterparties. Under such rules, other bank counterparties may cease their current business as hedge providers. These changes could reduce the liquidity of the financial derivatives markets thereby reducing the ability of entities like us, as commercial end-users, to have access to financial derivatives to hedge or mitigate our exposure to commodity price volatility.

As a result, the Dodd-Frank Act and any new regulations issued thereunder could significantly increase the cost of derivative contracts (including through requirements to post cash collateral), which could adversely affect our capital available for other commercial operations purposes, materially alter the terms of future swaps relative to the terms of our existing bilaterally negotiated financial derivative contracts and reduce the availability of derivatives to protect against commercial risks we encounter.

If we reduce our use of derivative contracts as a result of the new requirements, our results of operations may become more volatile and cash flows less predictable, which could adversely affect our ability to plan for and fund capital expenditures. Finally, the legislation was intended, in part, to reduce the volatility of commodity prices, which some legislators attributed to speculative trading in derivatives and commodity instruments related to natural gas, NGLs and oil. Our revenues could therefore be adversely affected if a consequence of the legislation and regulations is to lower commodity prices. Any of these consequences could have a material adverse effect on our consolidated financial condition, results of operations, cash flows and ability to pay dividends on our common stock.

Potential future legislation or the imposition of new or increased taxes or fees may generally affect the taxation of natural gas, NGL and oil exploration and development companies and may adversely affect our cash flows.

During the past two years, there have been a significant number of federal and state level legislative proposals that, if enacted into law, would make significant changes to tax laws, including to certain key U.S. federal and state income tax provisions currently available to natural gas, NGL and oil exploration and development companies. For example, late last year the U.S. House of Representatives passed legislation that was not ultimately enacted and, earlier this year, the Biden administration set forth several tax proposals, that would, if ultimately enacted into law, make significant changes to U.S. tax laws. Such proposals

include, but are not limited to, (i) an increase in the U.S. federal income tax rates applicable to corporations, (ii) the repeal of the percentage depletion allowance for certain natural gas, NGL and oil properties, (iii) the elimination of current deductions for intangible drilling and development costs and (iv) an increase in the amortization period for geological and geophysical costs paid or incurred in connection with the exploration for, or development of, oil or natural gas, NGL and oil within the United States. It is unclear whether these or similar changes will be enacted and, if enacted, how soon any such changes could take effect. Additionally, the states in which we operate or own assets may impose new or increased taxes or fees on natural gas, NGL and oil extraction. The passage of any legislation as a result of these proposals and other similar changes in U.S. federal income tax laws or the imposition of new or increased taxes or fees on natural gas, NGL and oil extraction could adversely affect our operations and cash flows.

Our tax liabilities potentially are subject to periodic audits by U.S. federal, state and local taxing authorities. Although we believe we have used reasonable interpretations and assumptions in calculating our tax liabilities, the final determination of these tax audits and any related proceedings cannot be predicted with certainty. Any adverse outcome of any such tax audits or related proceedings could result in unforeseen tax-related liabilities that may, individually or in the aggregate, materially affect our cash tax liabilities, and, as a result, our business, financial condition, results of operations, and liquidity.

Our business is subject to complex and evolving laws and regulations regarding privacy and data protection.

The regulatory environment surrounding data privacy and protection is constantly evolving and can be subject to significant change. New laws and regulations governing data privacy and the unauthorized disclosure of personal or confidential information pose increasingly complex compliance challenges and could potentially elevate our costs. Any failure to comply with these laws and regulations could result in significant penalties and legal liability. We continue to monitor and assess the impact of these laws, which in addition to penalties and legal liability, could impose significant costs for investigations and compliance, require us to change our business practices and carry significant potential liability for our business should we fail to comply with any such applicable laws.

Risks Related to Our Relationship with Banpu and its Affiliates

Banpu is our controlling stockholder and exercises substantial influence over us, and your ability to influence matters requiring stockholder approval may be limited.

Upon completion of this offering, Banpu will indirectly own approximately % of our outstanding common stock (or approximately % if the underwriters exercise in full their option to purchase additional shares). Our outstanding common stock is entitled to one vote per share. As a result of its ownership of our common stock, Banpu will indirectly own approximately % of the combined voting power of our common stock immediately after completion of this offering (or approximately % if the underwriters exercise in full their option to purchase additional shares). As a result of this ownership, Banpu has a substantial influence on our affairs and its voting power will constitute a substantial percentage of any quorum of our stockholders voting on any matter requiring the approval of our stockholders. Such matters include the election of directors, the adoption of amendments to our certificate of incorporation and bylaws and the approval of mergers or the sale of all or substantially all of our assets. Banpu's control or significant influence over us also may delay, defer or prevent an acquisition by a third party or other change of control of our Company and may make some transactions more difficult or impossible without the support of Banpu, even if such events are in the best interests of our other stockholders.

In addition, pursuant to our Stockholders' Agreement, for so long as BNAC and Banpu beneficially own 10% or more of our voting stock, BNAC will be entitled to designate for nomination to our board of directors a number of individuals approximately proportionate to such beneficial ownership, provided that (i) from the completion of this offering until the first anniversary of the completion of this offering, at least three board seats will not be BNAC designees, (ii) from and after the first anniversary of the completion of this offering until the first date on which BNAC and Banpu beneficially own 50% or less of our voting stock, at least four board seats will not be BNAC designees, and (iii) from and after the first date on which BNAC and Banpu beneficially own 50% or less of our voting stock, a number of board seats equal to the minimum number of directors that would constitute a majority of the total number of directors comprising

our board of directors will not be BNAC designees. See " *Management — Controlled Company*," "*Principal Stockholders"* and "*Certain Relationships and Related Party Transactions — Stockholders' Agreement*."

In addition, we do not control the BKV-BPP Power Joint Venture. We and BPPUS jointly control BKV-BPP Power through a board of directors consisting of eight members, four of which are appointed by us and four of which are appointed by BPPUS. See "*Risks Related to Our Power Generation Business — We operate our power generation business through a joint venture which we do not control*." Further, if, after this initial public offering, Banpu and its wholly owned subsidiaries cease to own at least 51% of our equity interests, or if any such holder allows any lien to exist on our equity interests that they own, such event will be an event of default under the Term Loan Credit Agreement and the Revolving Credit Agreement, which may result in the amounts owed by us thereunder to become immediately due and payable.

The interests of Banpu may differ from our interests or those of our other stockholders and the concentration of control in Banpu will limit other stockholders' ability to influence corporate matters. Banpu may take actions that our other stockholders do not view as beneficial or decline to take actions that our other stockholders view as beneficial, which may adversely affect our business, financial condition, results of operations and our ability to pay dividends on our common stock. In addition, Banpu's control or significant influence over us may have an adverse effect on the price of our common stock.

Historically we have relied on Banpu and its affiliates for capital investments sufficient to fund our business operations. Banpu has no obligation to make any further capital investments or to provide additional loan proceeds.

Prior to the consummation of this offering, we have relied on Banpu and its affiliates for the capital investments necessary to fund our business through loan proceeds and other contributions. Following this offering, Banpu and its affiliates will have no obligation to provide any additional funding, and instead, we expect to fund our capital expenditures through cash flows from operations and from borrowings under our Revolving Credit Facilities and the Revolving Credit Agreement. Our future operating performance and to meet our debt service obligations will be affected by economic and capital market conditions, results of operations and other factors, many of which are beyond our control.

Restrictive covenants in the agreements governing the indebtedness of Banpu may limit our ability to incur additional debt.

The agreements governing the indebtedness of Banpu require it to maintain certain financial ratios and tests based on consolidated financial statements. Immediately after completion of this offering, Banpu, or a subsidiary of Banpu, will continue to have a substantial influence on our affairs and its voting power will constitute a substantial percentage of any quorum of our stockholders voting on any matter requiring the approval of our stockholders. As a result, Banpu may prevent us from taking corporate actions that could cause Banpu to fail to comply with the applicable provisions of its debt agreements, even when such actions are in our best interests and the interests of our other stockholders. This limitation may materially adversely affect our ability to obtain future financing or fund needed capital expenditures.

We expect to be a "controlled company" within the meaning of the NYSE rules and, as a result, will qualify for and could rely on exemptions from certain corporate governance requirements.

Upon the completion of this offering, Banpu will beneficially control a majority of the combined voting power of all classes of our outstanding voting stock. Pursuant to our Stockholders' Agreement, BNAC, through ownership interests in us held by BNAC and its affiliates, will have certain rights to designate individuals for nomination to our board of directors. "*Certain Relationships and Related Party Transactions — Stockholders' Agreement*" contains additional information regarding these risks. As a result, we expect to be a controlled company within the meaning of the NYSE corporate governance standards. Under the NYSE rules, a company of which more than 50% of the voting power is held by another person or group of persons acting together is a controlled company and may elect not to comply with certain NYSE corporate governance requirements, including the requirements that:

- a majority of the board of directors consist of independent directors;

- the corporate governance and nominating committee be composed entirely of independent directors with a written charter addressing the committee's purpose and responsibilities;
- the compensation committee be composed entirely of independent directors with a written charter addressing the committee's purpose and responsibilities; and
- there be an annual performance evaluation of the nominating and governance and compensation committees.

These requirements will not apply to us as long as we remain a controlled company. Following this offering, we may utilize some or all of these exemptions. Accordingly, you may not have the same protections afforded to stockholders of companies that are subject to all of the corporate governance requirements of the NYSE. "*Management — Controlled Company*" contains additional information regarding these risks.

Banpu's interests, including interests in certain corporate opportunities, may conflict with our interests and the interests of our other stockholders. Conflicts of interest between us and Banpu could be resolved in a manner unfavorable to us and our other stockholders.

Banpu could have interests that differ from, or conflict with, the interests of our other stockholders and could cause us to take certain actions even if the actions are not favorable to us or our other stockholders or are opposed by our other stockholders. Potential conflicts of interest or disputes may arise between Banpu and us in a number of areas relating to our past or ongoing relationships, including:

- tax, employee benefits, indemnification and other matters arising from this offering;
- employee retention and recruiting;
- corporate opportunities that may be attractive to both Banpu and us;
- the arrangements governing the BKV-BPP Power Joint Venture and any other new commercial arrangements between the Company and affiliates of Banpu in the future; and
- sales or other disposals by Banpu of all or a portion of its interest in us.

We may not be able to resolve potential conflicts and disputes with Banpu and even if we do, the resolution may be less favorable to us than if we were dealing with an unaffiliated third party. Because we are controlled or significantly influenced by Banpu, we may not have the leverage to negotiate amendments to the arrangements governing the BKV-BPP Power Joint Venture (if any are required) on terms as favorable to us as those we would negotiate with an unaffiliated third party.

Additionally, there can be no assurance that Banpu will not engage in competition with us in the future. Our certificate of incorporation provides that, to the fullest extent permitted by law, neither Banpu nor its affiliates or any director who is not employed by us (including any non-employee director who serves as one of our officers in both his or her director and officer capacities) or his or her affiliates will have any duty to refrain from (i) engaging in the same or similar business activities or lines of business in which we or our affiliates now engage or propose to engage or (ii) otherwise competing with us or our affiliates. In addition, to the fullest extent permitted by law, in the event that Banpu or its affiliates or any non-employee director acquires knowledge of a potential transaction or other business opportunity that may be a corporate opportunity for itself, himself or herself or its or his or her affiliates or for us or any of our affiliates, such person will have no duty to communicate or offer such transaction or business opportunity to us or any of our affiliates and they may take any such opportunity for themselves or offer it to another person or entity.

Our certificate of incorporation also renounces, to the fullest extent permitted by law, any interest or expectancy that we have in, or right to be offered an opportunity to participate in, specified business opportunities that are from time to time presented to our officers, directors or stockholders or their respective affiliates, other than those officers, directors, stockholders or affiliates who are our or our subsidiaries' employees.

Generally, neither Banpu nor our non-employee directors who also are directors, officers, employees, agents or affiliates of Banpu or its affiliates (other than us) will be liable to us or our stockholders for breach

of any fiduciary duty solely by reason of the fact that any such person pursues or acquires any corporate opportunity for, or recommends or transfer any corporation opportunity to, Banpu or its affiliates (other than us), rather than to us. This renunciation will not extend to corporate opportunities expressly offered to one of our non-employee directors solely in his or her capacity as our director or officer.

These provisions create the possibility that a corporate opportunity of our Company may be used for the benefit of Banpu and may significantly impair our ability to grow.

Certain of our directors may have actual or potential conflicts of interest because of their positions with Banpu and/or their ownership of common stock or equity awards in Banpu.

Following this offering, six of our directors will be employees of Banpu or its affiliates. In addition, such directors may own capital stock or equity awards in Banpu. For certain of these individuals, their holdings of common stock or equity awards in Banpu may be significant compared to their total assets. Their position at Banpu or its affiliates and the ownership of capital stock or equity awards in Banpu creates, or may create the appearance of, conflicts of interest when these directors and officers are faced with decisions that could have different implications for Banpu than for us. These decisions could include:

- corporate opportunities;
- the impact that operating or capital decisions (including the incurrence of indebtedness) relating to our business may have on Banpu's consolidated financial statements or current or future indebtedness (including related covenants);
- business combinations involving us;
- our dividend and stock repurchase policies;
- compensation and benefit programs and other human resources policy decisions;
- management stock ownership;
- the payment of dividends on our common stock; and
- determinations with respect to our tax returns.

As a result of these actual or apparent conflicts of interest, we may be precluded from pursuing certain growth initiatives or transactions that may be favorable to us or we may take certain actions even if the actions are not favorable to us or are opposed by our stockholders.

If Banpu experiences a change in control, you may not realize any change-of-control premium on shares of our common stock and we may become subject to the control of a presently unknown third party. Further, Banpu may sell, or pledge as collateral for its existing or future indebtedness, the shares of our common stock that it owns.

After this offering, Banpu will own approximately % of our outstanding common stock (or approximately % if the underwriters exercise in full their option to purchase additional shares). Subject to the provisions of the lock-up agreement entered into in connection with this offering, Banpu will not be restricted from selling some or all of its shares of our common stock in a privately negotiated transaction or otherwise, and a sale of its shares, if sufficient in size, could result in a change of control of our Company. Further, Banpu will not be restricted from pledging as collateral for its indebtedness the shares of our common stock held by it.

The ability of Banpu to sell its shares of our common stock, with no requirement for a concurrent offer to be made to acquire all of the shares of our common stock held by our other stockholders, could prevent you from realizing any change-of-control premium on your shares of our common stock that may otherwise accrue to Banpu on its sale of our common stock. In addition, if Banpu were to pledge as collateral for its indebtedness the shares of our common stock held by it, and Banpu were to default under such indebtedness, the lenders thereunder could foreclose upon and sell such shares to satisfy Banpu's obligations under such indebtedness.

Further, any acquiror or successor of all or a substantial number of Banpu's shares of our common stock will be entitled to exercise Banpu's voting control with respect to us. Such third party may have interests that conflict with those of our other stockholders. Any acquiror or successor to which Banpu transfers a controlling interest in us may attempt to cause us to revise or change our plans and strategies, as well as the agreements between Banpu and us described in this prospectus.

Risks Related to the Offering and Our Common Stock

Our actual operating results and activities could differ materially from the guidance we have disclosed herein.

We have presented herein certain forecasted operating results, costs and activities, including, without limitation, our future expected drilling activity and production. Any such forward-looking guidance represents our management's estimates as of the date hereof, is based upon a number of assumptions that are inherently uncertain and is subject to numerous business, political, economic, competitive, financial and regulatory risks, including the risks described under "*Risk Factors*" and "*Cautionary Statement Regarding Forward-Looking Statements.*" Many of these risks and uncertainties are beyond our control, such as declines in commodity prices and the speculative nature of estimating natural gas and NGL reserves and in projecting future rates of production. If any of these risks and uncertainties actually occur or the assumptions underlying our guidance are incorrect, our actual operating results, costs and activities may be materially and adversely different from our guidance. In addition, investors should also recognize that the reliability of any guidance diminishes the farther in the future that the data is forecast. In light of the foregoing, investors are urged to put our guidance in context and not to place undue reliance upon it.

We may not have sufficient available cash to pay any dividends on our common stock.

Holders of our common stock do not have a right to dividends on such shares unless declared or set aside for payment by our board of directors. Under Delaware law, cash dividends on capital stock may only be paid from "surplus" or, if there is no "surplus," from the corporation's net profits for the then-current or the preceding fiscal year. Unless we operate profitably, our ability to pay dividends on our common stock would require the availability of adequate "surplus," which is defined as the excess, if any, of net assets (total assets less total liabilities) over capital.

We may not have sufficient available cash to enable us to pay any dividends to our stockholders. The actual amount of available cash we will have to pay dividends will be reduced by the cost to fund acquisitions without issuing additional equity or debt, payments in respect of our debt instruments, other contractual obligations, operating expenses, general and administrative expenses, maintenance capital expenditures and reserves for future capital needs that our board of directors may determine are appropriate.

The payment of regular dividends on our common stock is subject to the discretion of our board of directors.

Our stockholders will have no contractual or other legal right to dividends. The payment of future dividends on our common stock will be at the discretion of our board of directors and any determination to pay dividends and the amount of any such dividends will depend on general economic and business conditions, our financial condition, capital requirements, results of operations, contractual limitations, legal, tax, regulatory and contractual restrictions and implications on the payment of dividends by us to our stockholders or by our subsidiaries to us, including the restrictions under our current and any future debt agreements, potential acquisition opportunities and the availability and desirability of financing alternatives, the need to service our indebtedness or other current and anticipated cash needs and any other factors our board of directors deem relevant. Events may occur, including a reduction in anticipated production volumes or realized prices or other events, which could materially impact the actual amount of any dividends we pay. Our board of directors will have the authority to establish cash reserves for the prudent conduct of our business, and the establishment of or increase in those reserves could result in a reduction in cash available for distribution to pay dividends on our common stock at anticipated levels. Accordingly, we may not be able to make, or may have to reduce or eliminate, the payment of dividends on our common stock, which could adversely affect the market price of our common stock. Investors are cautioned not to place undue reliance on the permanence of a dividend policy in making an investment decision.

The agreements governing our indebtedness impose restrictions on dividend payments.

The Term Loan Credit Agreement and the Revolving Credit Agreement contain, and any future debt agreement may contain, covenants that prohibit us from paying dividends on our common stock under certain circumstances. Both the Term Loan Credit Agreement and the Revolving Credit Agreement permit us to pay quarterly dividends to our stockholders if, among other things, (1) we have earned sufficient free cash flow (as defined in the Term Loan Credit Agreement), (2) our pro forma available cash is greater than $100.0 million and (3) our adjusted stockholders' equity (as defined generally to mean our stockholders' equity as determined in accordance with GAAP determined in the most recently delivered financial statements, adjusted to exclude certain unrealized earnout obligations and unrealized gains or losses resulting from hedging agreements and the application of the applicable accounting standard for the hedging instruments) is not less than $800.0 million. There can be no assurance that we will generate sufficient cash flow to permit us to pay dividends in compliance with the Term Loan Credit Agreement, the Revolving Credit Agreement or any other debt agreement.

Restrictions on distributions to us by our subsidiaries and affiliates under agreements governing their future indebtedness could limit our ability to pay dividends to holders of our common stock. These agreements contain financial tests and covenants that our subsidiaries and affiliates must satisfy prior to making distributions. If any of our subsidiaries or affiliates is unable to satisfy these restrictions or is otherwise in default under such agreements, it would be prohibited from making distributions to us that could, in turn, limit our ability to pay dividends to holders of our common stock.

The amount of our quarterly cash dividends, if any, may vary significantly both quarterly and annually and will be directly dependent on the performance of our business.

Investors who are looking for an investment that will pay regular and predictable quarterly dividends should not invest in our common stock. Our future business performance may be volatile and our cash flows may be unstable and we do not intend to maintain excess dividend coverage for the purpose of maintaining stability or growth in our dividends nor do we intend to reserve cash for dividends in future periods or incur debt to pay dividends. Because our dividends will be dependent upon the amount of cash we generate each quarter after payment of our fixed and variable expenses and after reserves for (i) debt service and other contractual obligations and fixed charges and (ii) future operating and capital needs, any future quarterly dividends paid to our stockholders will vary significantly from quarter to quarter, and may be zero, and our stockholders have no contractual or other legal right to dividends. See "*Dividend Policy*."

Our board of directors will initially adopt a policy to pay dividends to our stockholders, which could limit our ability to grow and make acquisitions.

As a result of our dividend policy, we will have limited cash available to fund acquisitions, and we will rely primarily upon external financing sources, including commercial bank borrowings and the issuance of debt and equity securities, to fund our acquisitions. As such, to the extent we are unable to finance growth externally, our dividend policy may significantly impair our ability to grow.

To the extent we issue additional shares of common stock in connection with any acquisitions or as in-kind dividends, the payment of dividends on those additional shares of common stock may increase the risk that we will be unable to maintain or increase our per share dividend level. The incurrence of commercial borrowings or other debt to finance our growth strategy would result in increased interest expense, which, in turn, would reduce the available cash that we have to distribute to our stockholders.

The requirements of being a public company, including compliance with the reporting requirements of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), and the requirements of the Sarbanes- Oxley Act, may strain our resources, increase our costs and distract management, and we may be unable to comply with these requirements in a timely or cost-effective manner.

Upon becoming a public company, we will be required to comply with new laws, regulations and requirements, certain corporate governance provisions of Sarbanes-Oxley Act, related regulations of the SEC and the requirements of the NYSE, with which we were not required to comply as a private company.

Complying with these statutes, regulations and requirements will occupy a significant amount of our time and will significantly increase our costs and expenses. We will need to:

- institute a more comprehensive compliance function to test and conclude on the sufficiency of our internal control over financial reporting;
- comply with rules promulgated by the NYSE;
- prepare and distribute periodic public reports;
- establish new internal policies, such as those relating to insider trading; and
- involve and retain to a greater degree outside professionals in the above activities.

Furthermore, while we generally must comply with Section 404 of the Sarbanes-Oxley Act, we are not required to have our independent registered public accounting firm attest to the effectiveness of our internal control over financial reporting until our first annual report subsequent to our ceasing to be an "emerging growth company." At any time, we may conclude that our internal controls, once tested, are not operating as designed or that the system of internal controls does not address all relevant financial statement risks. Once required to attest to the effectiveness of our internal control over financial reporting, our independent registered public accounting firm may issue a report that concludes it does not believe our internal control over financial reporting is effective. Compliance with Sarbanes-Oxley Act requirements may strain our resources, increase our costs and distract management; and we may be unable to comply with these requirements in a timely or cost-effective manner.

As a public company, we will be subject to significant regulatory oversight and reporting obligations under U.S. federal securities laws and the continuous scrutiny of securities analysts and investors. In addition, most members of our management team have limited experience managing a public company, interacting with public company investors, and complying with the increasingly complex laws pertaining to public companies. Our management team may not successfully or efficiently manage us as a public company. These new obligations and constituents require significant attention from our management team and could divert our management team's attention away from the day-to-day management of our business, which could adversely affect our business, results of operations and financial condition.

Further, we expect that being a public company subject to these rules and regulations may make it more difficult and more expensive for us to obtain director and officer liability insurance and we may be required to accept reduced policy limits and coverage or incur substantially higher costs to obtain the same or similar coverage. As a result, it may be more difficult for us to attract and retain qualified individuals to serve on our board of directors or as executive officers. We are currently evaluating these rules, and we cannot predict or estimate the amount of additional costs we may incur or the timing of such costs.

We have identified material weaknesses in our internal control over financial reporting and may identify additional material weaknesses in the future, or otherwise fail to maintain effective internal controls over financial reporting, which could result in a restatement of our financial statements or cause us to fail to meet our reporting obligations.

We have identified several material weaknesses in our internal control over financial reporting as of December 31, 2021, as described below. A "material weakness" is a deficiency, or combination of deficiencies, in internal control over financial reporting such that there is a reasonable possibility that a material misstatement of the annual or interim financial statements will not be prevented or detected on a timely basis.

We did not design and maintain effective controls to communicate relevant information among departments to completely and accurately record and disclose transactions in the financial statements. This material weakness contributed to two additional material weaknesses in our internal controls. We did not design and maintain effective controls related to (i) the accounting for stock awards and common stock with certain put rights, including the value and classification of such arrangements, and (ii) the communication and evaluation of terms and conditions set forth in complex contracts, including certain of our commodity derivative contracts, relevant to our compliance with financial covenants and related disclosures.

Finally, we did not design and maintain effective controls related to the accounting for income taxes, which were not designed at a sufficient level of precision or rigor to prepare and review the tax rate reconciliation, return to provision, income tax provision, related income tax assets and liabilities, and disclosures in the consolidated financial statements, which also resulted in a material weakness in our internal control over financial reporting.

The material weaknesses described above resulted in audit adjustments to share capital and other mezzanine equity accounts, liquidity disclosures, income tax benefit, income taxes payable to related party and deferred tax assets. Additionally, each of the material weaknesses described above could result in a misstatement of the aforementioned account balances or disclosures that would result in a material misstatement to the annual or interim consolidated financial statements that would not be prevented or detected.

We have begun to take steps towards remediating these material weaknesses primarily by designing and implementing additional internal controls, including those related to (i) the communication of relevant information across departments, (ii) the valuation and classification of stock awards and common stock with certain put rights, (iii) the communication and evaluation of terms and conditions included in complex contracts relevant to our compliance with financial covenants and related disclosures, and (iv) the preparation and review of the income tax rate reconciliation, return to provision, income tax provision, related income tax assets and liabilities, and income tax disclosures. Although we believe we are addressing the internal control deficiencies that led to the material weaknesses, the measures we have taken, and plan to take, may not be effective.

Effective internal controls are necessary for us to provide reliable financial reports, prevent fraud and operate successfully as a public company. We cannot be certain that our efforts to develop and maintain our internal controls will be successful, that we will be able to maintain adequate control over financial reporting in the future, or that we will be able to comply with our obligations under Section 404 of the Sarbanes-Oxley Act.

We cannot assure you that we have identified all, or that we will not in the future have additional, material weaknesses. Material weaknesses may still exist when we report on the effectiveness of our internal control over financial reporting as required by reporting requirements under Section 404 of the Sarbanes-Oxley Act after the completion of this offering. If material weaknesses emerge related to financial reporting, we encounter difficulties in implementing or improving our internal controls or we otherwise fail to develop and maintain effective internal control over financial reporting, our reputation and operating results could be harmed, we could fail to meet our reporting obligations, or we may have a restatement of our financial statements. Ineffective internal control over financial reporting could also cause current and potential investors to lose confidence in our reported financial information, which would harm our business and likely have a negative effect on the trading price of our shares of common stock.

There is no existing market for our common stock, and we do not know if one will develop.

Prior to this offering, there has not been a public market for our common stock. We cannot predict the extent to which investor interest in the Company will lead to the development of an active trading market on the stock exchange on which we list our common stock or otherwise or how liquid that market might become. If an active trading market does not develop, anyone purchasing our common stock may have difficulty selling it. The initial public offering price for the common stock was determined by negotiations between us and the representatives of the underwriters and may not be indicative of prices that will prevail in the open market following this offering. Consequently, purchasers of our common stock may be unable to sell it at prices equal to or greater than the price paid.

The following factors could affect our stock price:

- quarterly variations in our financial and operating results;
- public reaction to our press releases, our other public announcements and our filings with the SEC;
- strategic actions by our competitors;

- changes in revenue or earnings estimates, or changes in recommendations or withdrawal of research coverage, by equity research analysts;
- speculation in the press or investment community;
- the failure of research analysts to cover our common stock;
- sales of our common stock by us or our stockholders, or the perception that such sales may occur;
- changes in accounting principles, policies, guidance interpretations or standards;
- additions or departures of key management personnel;
- actions by our stockholders;
- general market conditions, including, among other things, fluctuations in commodity prices;
- domestic and international political, economic, legal and regulatory factors unrelated to our performance; and
- the realization of any risks described in this " *Risk Factors*" section.

The stock markets in general have experienced extreme volatility that has often been unrelated to the operating performance of particular companies. These broad market fluctuations may adversely affect the trading price of our common stock. Securities class action litigation has often been instituted against companies following periods of volatility in the overall market and in the market price of a company's securities. Such litigation, if instituted against us, could result in very substantial costs, divert our management's attention and resources and harm our business, operating results and financial condition.

Our governing documents, as well as Delaware law, contain provisions that could discourage acquisition bids or merger proposals, which may adversely affect the market price of our common stock. The existence of significant stockholders, such as Banpu, may have similar effects.

Some provisions of our governing documents could make it more difficult for a third party to acquire control of us, even if the change of control would be beneficial to our stockholders, including:

- providing for a classified board of directors;
- limitations on the removal of directors;
- limitations on the ability of our stockholders to call special meetings;
- establishing advance notice provisions for stockholder proposals and nominations for elections to the board of directors to be acted upon at meetings of stockholders;
- the requirement that the affirmative vote of the holders of at least 66 ⅔% in voting power of all the then-outstanding shares of our stock be obtained to amend and restate our existing bylaws or to remove directors;
- the requirement that the affirmative vote of the holders of at least 66 ⅔% in voting power of all the then-outstanding shares of our stock (or, if approved by at least 60% of our board of directors, a majority in voting power of all the then-outstanding shares of our stock) be obtained to amend our certificate of incorporation; and
- providing that the board of directors is expressly authorized to make, repeal, alter, amend and rescind our bylaws.

In addition, the existence of significant stockholders, such as Banpu, may have the effect of deterring hostile takeovers, delaying or preventing changes in control or changes in management, or limiting the ability of our other stockholders to approve transactions that they may deem to be in the best interests of the Company. Moreover, Banpu's concentration of stock ownership in us may adversely affect the trading price of our common stock to the extent investors perceive a disadvantage in owning stock of a company with a significant stockholder.

Investors in this offering will experience immediate and substantial dilution of $ per share.

Based on an assumed initial public offering price of $ per share (the midpoint of the price range set forth on the cover of this prospectus), purchasers of our common stock in this offering will experience an immediate and substantial dilution of $ per share in the as adjusted net tangible book value per share of common stock from the initial public offering price. After giving effect to the sale of the shares in this offering and further assuming the receipt of the estimated proceeds (after deducting estimated underwriting discounts and commissions and estimated offering expenses), our as adjusted net tangible book value as of September 30, 2022 would have been approximately $ per share. This dilution is due in large part to earlier investors having paid substantially less than the initial public offering price when they purchased their shares. "*Dilution*" contains additional information.

Future sales of our common stock in the public market, or the perception that such sales may occur, could reduce our stock price, and any additional capital raised by us through the sale of equity or convertible securities may dilute your ownership in us.

We may issue additional shares of common stock or convertible securities in subsequent public offerings. After the completion of this offering, assuming the underwriters' option to purchase additional shares is fully exercised, we will have outstanding shares of common stock. This number includes shares of common stock that we are selling in this offering and shares of common stock that we may sell in this offering if the underwriters' option to purchase additional shares is fully exercised, which may be resold immediately in the public market. Immediately following the completion of this offering, Banpu will own shares of common stock, representing approximately % of our total outstanding common stock (or % if the underwriters' option to purchase additional shares is exercised in full) and management, directors and other employee and non-employee stockholders, collectively, will own shares of common stock, representing approximately % of our total outstanding common stock (or % if the underwriters' option to purchase additional shares is exercised in full). All such shares are restricted from immediate resale under the federal securities laws and all such shares are subject to the lock-up agreements between such parties and the underwriters described in "*Underwriting*" but may be sold into the market in the future.

Our Stockholders' Agreement will provide BNAC and its affiliates with the right, in certain circumstances, to require us to register their shares of our common stock constituting registrable securities under the Securities Act for sale into the public markets at any time following the date that is six months after the consummation of this offering. "*Shares Eligible for Future Sale*" and "*Certain Relationships and Related Party Transactions — Registration Rights*" contain additional information regarding such rights.

In addition, in connection with this offering, we intend to file a registration statement with the SEC on Form S-8 providing for the registration of shares of our common stock issued or reserved for issuance under our equity incentive plans. Subject to the satisfaction of vesting conditions and the expiration of lock-up agreements, shares registered under the registration statement on Form S-8 will be available for resale immediately in the public market without restriction.

We cannot predict the size of future issuances of our common stock or securities convertible into common stock or the effect, if any, that future issuances and sales of shares of our common stock will have on the market price of our common stock. Sales of substantial amounts of our common stock (including shares issued in connection with an acquisition or shares owned by Banpu and such other stockholders), or the perception that such sales could occur, may adversely affect prevailing market prices of our common stock.

Our common stock will not be entitled to preemptive rights to buy shares from us. As a result, stockholders will not have the automatic ability to avoid dilution in their percentage ownership of us.

Terms of subsequent financings may adversely impact stockholder equity.

If we raise more equity capital from the sale of common stock, institutional or other investors may negotiate terms more favorable than the current prices of our common stock. If we issue debt securities, the holders of the debt would have a claim to our assets that would be prior to the rights of stockholders until the debt is paid. Interest on these debt securities would increase costs and could negatively impact our operating results.

In accordance with Delaware law and the provisions of our certificate of incorporation, we may issue one or more classes or series of preferred stock that ranks senior in right of dividends, liquidation or voting

to our common stock. Preferred stock may have such designations, preferences, limitations and relative rights, including preferences over our common stock respecting dividends and distributions, as our board of directors may determine, and the issuance of preferred stock would dilute the ownership of our existing stockholders. The terms of one or more classes or series of preferred stock could adversely impact the voting power or value of our common stock. For example, we might grant holders of preferred stock the right to elect some number of our directors in all events or on the happening of specified events or the right to veto specified transactions. Similarly, the repurchase or redemption rights or liquidation preferences we might assign to holders of preferred stock could affect the residual value of the common stock. The terms of any series of preferred stock may also reduce or eliminate the amount of cash available for payment of dividends to our holders of common stock or subordinate the claims of our holders of common stock to our assets in the event of our liquidation. Our common stock will not be subject to conversion, redemption or sinking fund provisions.

The representatives of the underwriters of this offering may waive or release parties to the lock-up agreements entered into in connection with this offering, which could adversely affect the price of our common stock.

We, Banpu and all of our directors and executive officers have entered into lock-up agreements with respect to their ownership of our common stock, pursuant to which we and they are subject to certain resale restrictions for a period of 180 days following the effectiveness date of the registration statement of which this prospectus forms a part. The representatives of the underwriters, at any time and without notice, may release all or any portion of the common stock subject to the foregoing lock-up agreements. If the restrictions under the lock-up agreements are waived, then common stock will be available for sale into the public markets, which could cause the market price of our common stock to decline and impair our ability to raise capital. "*Underwriting*" provides additional information regarding the lock-up agreements.

If securities or industry analysts do not publish research or reports about our business, if they adversely change their recommendations regarding our common stock or if our operating results do not meet their expectations, our stock price could decline.

The trading market for our common stock will be influenced by the research and reports that industry or securities analysts publish about us or our business. If one or more of these analysts cease coverage of the Company or fail to publish reports on us regularly, we could lose visibility in the financial markets, which in turn could cause our stock price or trading volume to decline. Moreover, if one or more of the analysts who cover the Company downgrades our common stock or if our operating results do not meet their expectations, our stock price could decline.

Our certificate of incorporation will designate the Court of Chancery of the State of Delaware as the sole and exclusive forum for certain types of actions and proceedings that may be initiated by our stockholders, which could limit our stockholders' ability to obtain a favorable judicial forum for disputes with us or our directors, officers, employees or agents.

Our certificate of incorporation will provide that unless we consent in writing to the selection of an alternative forum, the Court of Chancery of the State of Delaware will, to the fullest extent permitted by law, be the sole and exclusive forum for any (i) derivative action or proceeding brought on behalf of the Company, (ii) action asserting a claim of breach of a fiduciary duty owed by any director, officer or employee of the Company to the Company or our stockholders, (iii) action asserting a claim against the Company or any director or officer of the Company arising pursuant to any provision of the Delaware General Corporation Law (the "DGCL") or our governing documents, or (iv) action asserting a claim against the Company or any director, officer or employee of the Company, which claim is governed by the internal affairs doctrine. Notwithstanding the foregoing sentence, the federal district courts of the United States of America shall be the exclusive forum for the resolution of any complaint asserting a cause of action arising under U.S. federal securities laws, including the Securities Act and the Exchange Act. This choice of forum may limit a stockholder's ability to bring a claim in a judicial forum that it finds favorable for disputes with us or our directors, officers, employees or agents, which may discourage such lawsuits against us and such persons. Alternatively, if a court were to find these provisions of our governing documents inapplicable to, or unenforceable in respect of, one or more of the specified types of actions or proceedings, we may incur additional costs associated with resolving such matters in other jurisdictions, which could adversely affect our financial condition, results of operations, cash flows and ability to pay dividends on our common stock.

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

This prospectus contains certain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. All statements, other than statements of historical fact included in this prospectus, regarding our strategy, future operations, financial position, estimated revenue and losses, projected costs, prospects, plans and objectives of management and dividend policy are forward-looking statements. When used in this prospectus, words such as “expect,” “project,” “estimate,” “believe,” “anticipate,” “intend,” “budget,” “plan,” “seek,” “envision,” “forecast,” “target,” “predict,” “may,” “should,” “would,” “could,” “will,” the negative of these term and similar expressions are intended to identify forward-looking statements, although not all forward-looking statements contain such identifying words. These forward-looking statements are based on our current expectations and assumptions about future events and are based on currently available information as to the outcome and timing of future events. When considering forward-looking statements, you should keep in mind the risk factors and other cautionary statements described under “*Risk Factors*.” These forward-looking statements are based on management’s current belief, based on currently available information, as to the outcome and timing of future events.

Forward-looking statements may include statements about, among other things:

- our business strategy;
- our reserves;
- our financial strategy, liquidity and capital required for our development programs;
- our relationship with Banpu, including future agreements with Banpu;
- estimated natural gas, NGL and oil prices;
- our dividend policy;
- the timing and amount of future production of natural gas, NGL and oil;
- our hedging strategy and results;
- our drilling plans;
- competition and government regulation;
- legal, regulatory or environmental matters;
- marketing of natural gas, NGL and oil;
- business or leasehold acquisitions and integration of acquired businesses;
- our ability to develop existing prospects;
- costs of developing our properties and of conducting our operations;
- our plans to establish midstream contracts that allow us to supply our own natural gas directly to Temple I;
- our plan to continue to build out our power generation business and to expand into retail power;
- our ability to effectively operate and grow our CCUS business;
- our ability to reach FID and execute and complete any of our pipeline of identified CCUS projects;
- our ability to identify and complete additional CCUS projects as we expand our upstream operations;
- our anticipated Scope 1, Scope 2 and Scope 3 emissions from our owned and operated upstream businesses and our plans to offset our Scope 1, Scope 2 and Scope 3 emissions in our owned and operated upstream business;
- the impact of the COVID-19 pandemic and its effects on our business and financial condition;
- general economic conditions;
- cost inflation;

- credit markets;
- our ability to service our indebtedness;
- our ability to expand our business, including through the recruitment and retention of skilled personnel;
- our future operating results;
- the remediation of our material weaknesses; and
- our plans, objectives, expectations and intentions.

The forward-looking statements included in this prospectus are based on current expectations and involve numerous risks and uncertainties, most of which are difficult or impossible to predict and many of which are beyond our control, incident to the exploration for and development, production and sale of natural gas, NGLs and oil. Assumptions relating to these forward-looking statements involve judgments, risks and uncertainties with respect to, among other things, market factors (including competition and inflation), market prices (including geographic basis differentials) of natural gas, NGLs and oil, results of future drilling and marketing activity, future production and costs (including availability of drilling and production equipment and services), legislative and regulatory initiatives, electronic, cyber or physical security breaches, drilling and other operating risks, environmental risks (including weather-related events), future business decisions, the uncertainty inherent in estimating natural gas, NGL and oil reserves and the other risks described under "*Risk Factors*."

Reserve engineering is a process of estimating underground accumulations of natural gas, NGLs and oil that cannot be measured in an exact way. The accuracy of any reserve estimate depends on the quality of available data, the interpretation of such data and price and cost assumptions made by reserve engineers. In addition, the results of drilling, testing and production activities may justify revisions of estimates that were made previously. If significant, such revisions would change the schedule of any further production and development drilling. Accordingly, reserve estimates may differ significantly from the quantities of natural gas, NGLs and oil that are ultimately recovered.

Although we believe that the assumptions underlying these forward-looking statements are reasonable, should one or more of the risks or uncertainties described in this prospectus occur, or should underlying assumptions prove incorrect, actual outcomes and our results and financial condition may differ materially from those indicated in any forward-looking statements. In light of the significant uncertainties inherent in these forward-looking statements, the inclusion of such information should not be regarded as a representation by us or any other person that our objectives and plans will be achieved.

All forward-looking statements, expressed or implied, included in this prospectus are expressly qualified in their entirety by this cautionary statement. This cautionary statement should also be considered in connection with any subsequent written or oral forward-looking statements that we or persons acting on our behalf may issue.

All forward-looking statements, expressed or implied, in this prospectus are based only on information currently available to us and speak only as of the date on which they are made. Except as otherwise required by applicable law, we disclaim any duty to publicly update any forward-looking statement, each of which is expressly qualified by the statements in this section, to reflect events or circumstances after the date of this prospectus.

USE OF PROCEEDS

We estimate that the net proceeds to us from the sale of our common stock in this offering, after deducting underwriting discounts and commissions and estimated offering expenses payable by us, will be approximately $ million (or approximately $ million if the underwriters exercise in full their option to purchase additional shares), based on an assumed initial public offering price of $ per share (the midpoint of the price range set forth on the cover page of this prospectus).

Each $1.00 increase (decrease) in the assumed initial public offering price of $ per share (the midpoint of the price range set forth on the cover page of this prospectus) would increase (decrease) the net proceeds to us from this offering by $ million, assuming that the number of shares offered by us, as set forth on the cover page of this prospectus, remains the same and after deducting underwriting discounts and commissions and estimated offering expenses payable by us. We may also increase or decrease the number of shares we are offering. Each increase (decrease) of 1.0 million shares in the number of shares we are offering would increase (decrease) the net proceeds to us from this offering by $ million, assuming that the assumed initial public offering price of $ per share (the midpoint of the price range set forth on the cover page of this prospectus) remains the same, and after deducting underwriting discounts and commissions and estimated offering expenses payable by us.

Of the net proceeds we receive from the sale of our common stock in this offering, we intend to use approximately $ million to repay in full the loan under the $75 Million A&R Loan Agreement with BNAC, $ million to make additional contingent consideration payments payable in connection with the Devon Barnett Acquisition and the remainder for other general corporate purposes, including to fund the expansion of our CCUS business.

On March 10, 2022, we borrowed $75.0 million under the $75 Million Loan Agreement with BNAC to fund the deposit for the Exxon Barnett Acquisition. On June 15, 2022, we entered into the $75 Million A&R Loan Agreement, which amended and restated the $75 Million Loan Agreement to, among other things, subordinate the $75.0 million term loan owed to BNAC thereunder to the term loans we borrowed under the Term Loan Credit Agreement. Interest on the outstanding principal is SOFR + 5.25% and is payable on a semi-annual basis. The principal balance of $75.0 million is due on December 31, 2027, including any unpaid interest. For additional information, see "*Management's Discussion and Analysis of Financial Condition and Results of Operations — Liquidity and Capital Resources — Loan Agreements and Credit Facilities — Subordinated Intercompany Loan Agreements*."

For additional information on the contingent consideration payments described above, see " *Note 15 — Commitments and Contingencies*" to our audited consolidated financial statements included elsewhere in this prospectus and "*Note 14 — Commitments and Contingencies*" to our unaudited condensed consolidated financial statements included elsewhere in this prospectus.

DIVIDEND POLICY

We currently do not pay a fixed cash dividend to holders of our common stock. Although we will not be required by any law, our certificate of incorporation or our bylaws to pay dividends, at or prior to the closing of this offering, our board of directors will adopt a written policy pursuant to which we intend to pay to stockholders, subject to the factors described below, including the restrictions under the Term Loan Credit Agreement and the Revolving Credit Agreement, quarterly cash dividends and to consider the payment of additional special dividends from time to time.

All dividends will be subject to the sole discretion of our board of directors and the considerations discussed below. We intend to pay dividends out of cash flows from operations to the extent available, and our stockholders have no contractual or other legal right to dividends.

Any determination to declare and pay a regular or special dividend, as well as the amount of any such dividends, will depend on our board of directors' consideration of general economic and business conditions, our financial condition and results of operations, capital requirements, restrictions under our indebtedness, potential acquisition opportunities and other current and anticipated cash needs and any other factors our board of directors deems relevant. Events may occur, including a reduction in anticipated production volumes or realized prices or other events, which could materially impact the actual amount of any dividends we pay. In addition, our board of directors may be required to, or may elect to, reduce, or eliminate our dividends during periods of reduced prices or demand for oil and natural gas, among other reasons.

Our dividend policy may change from time to time, and there can be no assurance that we will declare any regular or special cash dividends at all or in any particular amounts.

Each of the Term Loan Credit Agreement and the Revolving Credit Agreement permits us to pay quarterly dividends to our stockholders if, among other things, (1) we have earned sufficient free cash flow (as defined in the Term Loan Credit Agreement and the Revolving Credit Agreement), (2) our pro forma available cash is greater than $100.0 million and (3) our adjusted stockholders' equity (as defined generally to mean our stockholders' equity as determined in accordance with GAAP as determined in the most recently delivered financial statements, adjusted to exclude certain unrealized earnout obligations and unrealized gains or losses resulting from hedging agreements and the application of the applicable accounting standard for the hedging instruments) is not less than $800.0 million.

CAPITALIZATION

The following table shows our capitalization as of September 30, 2022:

- on an actual basis; and
- on an as adjusted basis, after giving effect to the sale of shares of our common stock in this offering (which assumes that the underwriters do not exercise their option to purchase additional shares), at an assumed initial public offering price of $ per share (the midpoint of the price range set forth on the cover page of this prospectus), our receipt of the estimated net proceeds of this offering and after deducting underwriting discounts and commissions and estimated offering expenses payable by us and the application of such net proceeds as described under "*Use of Proceeds*."

The as adjusted information set forth in the table below is illustrative only and will adjust based on the actual initial public offering price and other terms of this offering determined when the initial public offering price is determined. You should read the following table together with "*Prospectus Summary — Summary Historical Consolidated Financial Data*," "*Management's Discussion and Analysis of Financial Condition and Results of Operations*," "*Prospectus Summary — Summary Reserve, Production and Operating Data*," and our historical consolidated financial statements and the related notes thereto included elsewhere in this prospectus.

	As of September 30, 2022	
	Actual	As Adjusted
	(in thousands)	
Cash and cash equivalents, including restricted cash[1]	$ 184,616	$
Debt:		
Notes payable to related party[2]	$ 75,000	$
Term Loan Credit Agreement	563,703	
Credit facilities	130,000	
Total debt[3]	$ 768,703	$
Mezzanine equity[4]:		
Common stock-minority ownership puttable shares	$ 68,102	$
Equity-based compensation	91,128	
Total mezzanine equity	$ 159,230	$
Stockholders' equity:		
Common stock, par value $.01 per share; 300,000,000 authorized shares; 117,325,797 shares issued and outstanding, actual; and shares issued and outstanding, as adjusted[5]	$ 1,132	$
Treasury stock, shares at cost; 386,000 shares	(3,974)	
Additional paid-in capital	886,460	
Accumulated deficit	(105,568)	
Total stockholders' equity	$ 778,050	$
Total capitalization	$1,890,599	$

(1) Includes approximately $17.5 million of restricted cash, which represents cash borrowed as of September 30, 2022 under the Term Loan Credit Agreement which can only be used for costs related to the Exxon Barnett Acquisition. We anticipate the restricted cash will be used for remaining transaction and integration costs related to the Exxon Barnett Acquisition. The as adjusted amount reflects the payment of $ million in contingent consideration payments to be paid in 2023 with respect to the Devon Barnett Acquisition (as described in "*Note 15 — Commitments and Contingencies*" to our audited consolidated financial statements and " *Note 14 — Commitments and Contingencies*" to our unaudited condensed consolidated financial statements included elsewhere in this prospectus).

(2) Represents the term loans under the $75 Million Loan Agreement with BNAC. See " *Management's Discussion and Analysis of Financial Condition and Results of Operations — Liquidity and Capital Resources — Loan Agreements and Credit Facilities*."

(3) As of November 17, 2022, we had total outstanding debt of $745.0 million, which consisted of (i) $75.0 million in aggregate principal amount under the Subordinated Intercompany Loan Agreements, (ii) $570.0 million in aggregate principal amount under the Term Loan Credit Agreement, which excludes $6.3 million of debt issuance costs, (iii) $45.0 million in aggregate principal amount under our OCBC Credit Facility, (iv) $10.0 million in aggregate principal amount under our SCB Credit Facility and (v) $45.0 million in aggregate principal amount under our Revolving Credit Agreement.

(4) Holders of certain minority ownership shares of our common stock, shares of our common stock issued as stock compensation and shares of common stock purchased through our employee stock purchase program have the right, at their respective option, to require the Company to repurchase the shares upon the occurrence of certain events. As a result, the fair value of these common shares is recognized within mezzanine equity in our consolidated balance sheets. In connection with the closing of this offering, the put rights with respect to these shares will be terminated and the related shares of common stock will be reclassified as permanent equity.

(5) The number of shares of our common stock issued and outstanding on an as adjusted basis assumes that the underwriters will not exercise their option to purchase additional shares. If the underwriters exercise in full their option to purchase additional shares, as adjusted cash and cash equivalents, additional paid-in capital, total stockholders' equity, total capitalization and shares of common stock outstanding as of September 30, 2022 would have been $, $, $, $, and $, respectively.

The number of shares of our common stock set forth in the table above excludes an aggregate of 10,000,000 additional shares of our common stock reserved for future awards pursuant to the 2022 Plan, including shares of common stock that may be issued upon vesting of equity awards that we expect to be granted in connection with this offering, and 1,000,000 shares of our common stock available for purchase by employees pursuant to the ESPP.

DILUTION

Purchasers of the common stock in this offering will experience immediate and substantial dilution in the net tangible book value per share of the common stock for accounting purposes. Our net tangible book value as of September 30, 2022 was $ million, or $ per share. Net tangible book value per share is determined by dividing our tangible net worth (tangible assets less total liabilities) by the total number of shares of common stock that were outstanding as of September 30, 2022. After giving effect to the sale of the shares in this offering and further assuming the receipt of the estimated net proceeds (after deducting estimated underwriting discounts and commissions and estimated offering expenses), our as adjusted net tangible book value as of September 30, 2022 would have been approximately $ million, or $ per share. This represents an immediate increase in the net tangible book value of $ per share to our existing stockholders and an immediate dilution (*i.e.*, the difference between the initial public offering price per share of our common stock and the as adjusted net tangible book value per share of our common stock after this offering) to new investors purchasing shares of common stock in this offering of $ per share.

The following table illustrates the per share dilution to new investors purchasing shares of common stock in this offering:

Assumed initial public offering price per share		$
Net tangible book value per share as of September 30, 2022	$	
Increase in net tangible book value per share attributable to new investors in this offering		
Less: As adjusted net tangible book value per share of common stock after giving effect to this offering		
Dilution in as adjusted net tangible book value per share to new investors from this offering		$

A $1.00 increase (decrease) in the assumed initial public offering price of $ per share (the midpoint of the price range set forth on the cover page of this prospectus), would increase (decrease) the as adjusted net tangible book value per share after this offering by $ per share and increase (decrease) the dilution in net tangible book value per share to new investors in this offering by $ per share, in each case assuming the number of shares of common stock offered by us, as set forth on the cover page of this prospectus, remains the same and less estimated underwriting discounts and commissions and estimated offering expenses payable by us (and if the underwriters exercise in full their option to purchase additional shares, the as adjusted net tangible book value per share would be $ per share, and the dilution in net tangible book value per share to new investors in this offering would be $ per share).

The following table summarizes, as of September 30, 2022, the differences between the number of shares issued as a result of this offering, the total amount paid by existing shareholders and the average price per share to be paid by investors in this offering, based upon an assumed initial public offering price of $ per share (the midpoint of the price range set forth on the cover page of this prospectus).

	SHARES		TOTAL CONSIDERATION		AVERAGE PRICE PER SHARE
	NUMBER	PERCENT	AMOUNT	PERCENT	
Existing stockholders					
Existing common stock stockholders		%		%	$
Existing mezzanine equity stockholders[(1)]		%		%	$
Total existing stockholders		%		%	$
New investors		%		%	
Total		100%	$	100%	$

(1) Holders of certain minority ownership shares of our common stock have the right, at their option, to

require the us to repurchase the shares upon the occurrence of certain events. As a result, the fair value of these common shares is recognized within mezzanine equity in our consolidated balance sheets. In connection with the closing of this offering, the put rights with respect to these shares will be terminated and the related shares of common stock will be reclassified as permanent equity.

The above tables and related discussion are based on the number of shares of our common stock to be outstanding as of the closing of this offering. If the underwriters' option to purchase additional shares is exercised in full, the number of shares held by new investors will be increased to , or approximately % of the total number of shares of common stock. The above tables and related discussion exclude an aggregate 10,000,000 of additional shares of our common stock reserved for future awards pursuant to the 2022 Plan and 1,000,000 additional shares reserved to be available for purchase by employees pursuant to the ESPP.

UNAUDITED PRO FORMA CONDENSED COMBINED CONSOLIDATED FINANCIAL STATEMENTS

On June 30, 2022, the Company closed the Exxon Barnett Acquisition pursuant to which it acquired certain natural gas upstream assets and associated midstream infrastructure in the Barnett (the "2022 Barnett Assets") from XTO Energy, Inc. and Barnett Gathering LLC, subsidiaries of Exxon Mobil Corporation, for an adjusted cash purchase price of $627.5 million, plus additional contingent consideration of up to $50.0 million depending on future natural gas prices. In connection with the Exxon Barnett Acquisition, the Company entered into a Term Loan Credit Agreement with a syndicate of banks and Bangkok Bank Public Company Limited (New York Branch), as the administrative agent. On June 30, 2022, the Company borrowed $570.0 million of term loans under the Term Loan Credit Agreement to fund a portion of the purchase price and other costs and expenses associated with the Exxon Barnett Acquisition. Additionally, in March 2022, the Company borrowed $75.0 million under a Loan Agreement (the "$75 Million Loan Agreement") with Banpu North America Corporation ("BNAC"), which owns 96.1% of the Company's shares of common stock, to fund the deposit for the Exxon Barnett Acquisition.

The following unaudited pro forma condensed combined consolidated financial statements (the "pro forma financial statements") present the combination of the historical condensed consolidated financial statements of the Company, as adjusted to give effect to the Exxon Barnett Acquisition, the related financing under the Term Loan Credit Agreement and the $75 Million Loan Agreement (collectively the "Transaction"). The Exxon Barnett Acquisition was consummated on June 30, 2022 and, therefore, the 2022 Barnett Assets and related financing are included in the historical balance sheet of the Company as of September 30, 2022, together with the related indebtedness under the Term Loan Credit Agreement and the $75 Million Loan Agreement, and no pro forma balance sheet is presented. The unaudited pro forma condensed combined consolidated statements of operations (the "pro forma statements of operations") present the historical audited consolidated statements of operations of the Company for the year ended December 31, 2021 and the historical unaudited condensed consolidated statements of operations of the Company for the nine months ended September 30, 2022, in each case, after giving effect to the Transaction as if it had been consummated on January 1, 2021. As the Exxon Barnett Acquisition was consummated on June 30, 2022, the Company's historical unaudited condensed consolidated statements of operations for the nine months ended September 30, 2022 include three months of revenues and expenses attributable to the 2022 Barnett Assets.

The pro forma financial statements were prepared in accordance with Article 11 of Regulation S-X under the Securities Act. The unaudited pro forma adjustments reflecting the Exxon Barnett Acquisition have been prepared in accordance with the acquisition method of accounting in accordance with FASB ASC Topic 805, *Business Combinations*, which requires all assets acquired and liabilities assumed to be recorded at fair value at the acquisition date. The purchase price adjustments recorded on June 30, 2022 are preliminary and are subject to change as additional information becomes available and as additional analysis is performed. For more information on the fair value of assets acquired and liabilities assumed see "*BKV Corporation Unaudited Condensed Consolidated Financial Statements* ." Upon consummation of the Transaction, management did not identify any differences in accounting policies that would have a material impact on the pro forma financial statements.

Certain of the historical amounts with respect to the 2022 Barnett Assets have been reclassified to conform to the Company's financial statement presentation.

Assumptions and estimates underlying the pro forma adjustments are described in the accompanying notes, which should be read in conjunction with the pro forma financial statements. In the Company's opinion, all adjustments that are necessary to present fairly the pro forma information have been made.

The pro forma financial statements are provided for illustrative purposes only and are not intended to represent what the Company's financial position or results of operations would have been had the Transaction occurred on the assumed date nor do they purport to project the future operating results or the financial position of the Company following the Transaction. The pro forma financial statements do not reflect projected synergies or future events that may occur after the Transaction, including, but not limited to, the anticipated realization of savings from potential operating efficiencies, asset dispositions, cost savings, or

economies of scale that the Company may achieve as a result of the Transaction or the costs that may be necessary to incur in order to achieve such synergies or savings.

The pro forma adjustments reflecting the consummation of the Transaction are based on certain currently available information and certain assumptions and methodologies that the Company believes are reasonable under the circumstances. The pro forma adjustments, which are described in the accompanying notes, may be revised as additional information becomes available and is evaluated. Therefore, it is likely that the actual results will differ from the pro forma adjustments and it is possible the difference may be material. The Company believes that its assumptions and methodologies provide a reasonable basis for presenting all of the significant effects of the Transaction based on information available to management at this time and that the pro forma adjustments give appropriate effect to those assumptions and are properly applied in the unaudited pro forma condensed combined consolidated financial information.

Additionally, the Company cannot assure that it will not incur charges in excess of those included in the pro forma total consideration related to the Transaction or that the Company's efforts to integrate the operations of the 2022 Barnett Assets will be successful.

The pro forma financial statements should be read in conjunction with " *Management's Discussion and Analysis of Financial Condition and Results of Operations*," as well as the Company's historical consolidated financial statements and related notes, the historical statements of revenues and direct operating expenses and related notes for the 2022 Barnett Assets acquired in the Exxon Barnett Acquisition and other financial information included elsewhere in this prospectus. Historical and pro forma results are not necessarily indicative of results that may be expected for any future period.

(1) Upon consummation of the Transaction, management did not identify any differences in accounting policies that would have a material impact on the unaudited pro forma combined consolidated financial information.

NOTES TO UNAUDITED PRO FORMA CONDENSED COMBINED CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1. Basis of Presentation

The accompanying pro forma financial information was prepared based on the historical condensed consolidated financial statements of the Company and the historical statements of revenues and direct operating expenses for the 2022 Barnett Assets acquired in the Exxon Barnett Acquisition. The pro forma financial statements were prepared in accordance with GAAP and Article 11 of Regulation S-X under the Securities Act. The Exxon Barnett Acquisition was consummated on June 30, 2022 and, therefore, the 2022 Barnett Assets are included in the historical balance sheet of the Company at fair value as of September 30, 2022, together with the related indebtedness under the Term Loan Credit Agreement and the $75 Million Loan Agreement, and no pro forma balance sheet is presented. Additionally, as the Exxon Barnett Acquisition was consummated on June 30, 2022, the Company's historical unaudited condensed consolidated statements of operations for the nine months ended September 30, 2022 include three months of revenues and expenses attributable to the 2022 Barnett Assets.

The fair value of assets acquired and liabilities assumed and the fair value of contingent consideration as of June 30, 2022, the date the acquisition was completed, are as follows (in thousands):

Cash	$ 627,527
Contingent consideration	17,150
Total consideration	$ 644,677
Assets acquired and liabilities assumed:	
Inventory	150
Natural gas properties-developed	664,665
Midstream assets	254,813
Other property and equipment	8,907
Property taxes	(9,039)
Deferred tax liability	(49,789)
Revenues payable	(16,612)
Asset retirement obligations	(44,765)
Total identifiable net assets	$ 808,330
Bargain purchase gain	$(163,653)

The pro forma statements of operations present the historical audited consolidated statements of operations of the Company for the year ended December 31, 2021 and the historical unaudited condensed consolidated statements of operations for the nine months ended September 30, 2022, in each case, after giving effect to the Transaction as if it had been consummated on January 1, 2021.

NOTE 2. Adjustments to the Unaudited Pro Forma Condensed Combined Consolidated Statements of Operations

The pro forma adjustments reflected in the pro forma statements of operations are based on preliminary estimates and assumptions that are subject to change. The following adjustments have been reflected in the pro forma statements of operations:

(aa) Certain reclassification adjustments have been made to conform historical direct revenues and operating expenses with respect to the 2022 Barnett Assets to the financial statement presentation method of the Company.

- Reclassification of 2022 Barnett Assets historical Oil and condensate, gas and NGL sales to Natural gas, NGL and oil sales to conform with the Company’s presentation of upstream revenues.
- Reclassification of 2022 Barnett Assets historical Midstream operating revenues to Non-operated midstream revenues to conform with the Company’s presentation of midstream revenues.

- Reclassification of 2022 Barnett Assets historical Other revenues to Other to conform with the Company's presentation of other revenues.
- Reclassification of 2022 Barnett Assets historical Lease operating expense to Lease operating and workover to conform with the Company's presentation of lease operating and workover expense.
- Reclassification of 2022 Barnett Assets historical Overhead costs to Lease operating and workover to conform with the Company's presentation of lease operating and workover expense.
- Reclassification of 2022 Barnett Assets historical Cost of goods sold to Gathering and transportation expense to conform with the Company's presentation of gathering and transportation expense.
- Reclassification of 2022 Barnett Assets historical Production and property taxes to Taxes other than income to conform with the Company's presentation of Taxes other than income.

Upon consummation of the Transaction, management did not identify any differences in accounting policies that would have a material impact on the pro forma statements of operations.

(bb) Reflects the non-recurring transition services expense under the terms of the Transition Service Agreement, entered into between the Company and XTO Energy, Inc. in connection with the Exxon Barnett Acquisition. Under the terms of the Transition Services Agreement, XTO Energy Inc. agreed to provide certain services to the Company to aid in the transitional period from July 1, 2022 through October 31, 2022. Services include marketing, accounting and tax, information systems, division orders, ownership changes, compliance and land administration. Transition services expenses of $5.1 million were incurred and included in the historical income statement of the Company for the nine months ended September 30, 2022, these actual costs have been reversed from the nine months ended September 30, 2022 and are reflected in the year ended December 31, 2021. An additional $1.0 million of transaction services expenses were incurred subsequent to September 30, 2022, which have been reflected in the year ended December 31, 2021.

(cc) Reflects the pro forma depreciation, depletion and amortization expense based on the preliminary purchase price allocation. The historical financial statements for the 2022 Barnett Assets did not include historical depreciation, depletion and amortization due to the abbreviated presentation. As a result, this adjustment reflects the full go forward expense related to these items based on the fair value of the assets acquired as of June 30, 2022 and the relevant remaining useful life of those assets.

Depletion for natural gas properties is calculated using the units of production method of accounting for oil and gas properties. Pro forma depletion expense for the year ended December 31, 2021 and the nine months ended September 30, 2022 was $51.4 million and $20.5 million, respectively. As the Exxon Barnett Acquisition was consummated on June 30, 2022, the Company's historical unaudited condensed consolidated statements of operations for the nine months ended September 30, 2022 include three months of depletion expense attributable to the 2022 Barnett Assets. Therefore, the pro forma depletion expense for the nine months ended September 30, 2022 represents depletion expense attributable to the 2022 Barnett Assets for the six months ended June 30, 2022. Pro forma depletion expense for the year ended December 31, 2021 was calculated based on production volumes attributable to the natural gas properties in the 2022 Barnett Assets and the depletion rate reflecting the reserve volumes acquired.

Depreciation and amortization expense for other property and equipment is calculated using the straight line method. Pro forma depreciation and amortization expense for the year ended December 31, 2021 and the nine months ended September 30, 2022 was $8.3 million and $4.1 million, respectively. As the Exxon Barnett Acquisition was consummated on June 30, 2022, the Company's historical unaudited condensed consolidated statements of operations for the nine months ended September 30, 2022 include three months of depreciation and amortization expense attributable to the 2022 Barnett Assets. Therefore, the pro forma depreciation and amortization expense for the nine months ended September 30, 2022 represents depreciation and amortization expense attributable to the 2022 Barnett Assets for the six months ended June 30, 2022. The following table sets forth a listing of useful lives for other property and equipment:

	Useful Life
Pipelines	40 years
Compressors	25 years
Buildings	39 years
Furniture, fixtures, equipment, vehicles and other	5 years
Computer hardware and software	3 – 5 years

(dd) Reflects the pro forma accretion expense based on the preliminary purchase price allocation of the estimated fair value of the acquired proved natural gas properties included in the 2022 Barnett Assets. As the Exxon Barnett Acquisition was consummated on June 30, 2022, the Company's historical unaudited condensed consolidated statements of operations for the nine months ended September 30, 2022 include three months of accretion expense attributable to the 2022 Barnett Assets. Therefore, the pro forma accretion expense for the nine months ended September 30, 2022 represents accretion expense attributable to the 2022 Barnett Assets for the six months ended June 30, 2022. The present value of the estimated asset retirement obligation associated with the acquired natural gas producing properties as of September 30, 2022 is $45.6 million, which was calculated using an interest rate of 8.01%, inflation rate of 2.50% and the expected remaining useful life of each well, estimated as a range of 5 – 50 years.

(ee) Reflects the impact of the interest expense, inclusive of debt issuance cost amortization, that would have been recognized as a result of the incurrence of $570.0 million in new debt under the Term Loan Credit Agreement used to fund a portion of the purchase price for the Exxon Barnett Acquisition and other costs and expenses associated with the acquisition, as well as the issuance of the $75 Million Loan Agreement with BNAC used to fund the deposit on the Exxon Barnett Acquisition.

The term loans mature five years after their initial incurrence and require the prepayment of 20% of their original principal amount on each anniversary of their initial incurrence. Loans under the Term Loan Credit Agreement bear interest at six-month term SOFR plus a credit spread adjustment of 0.10%, plus 4.75% per annum. The interest rate used for pro forma purposes is 7.43%, based on the six-month term SOFR on June 22, 2022 (established prior to funding). Pursuant to the terms of the Term Loan Credit Agreement, the rate will be adjusted every six months. As a result, the actual interest rate could vary for the year ended December 31, 2021 and the nine months ended September 30, 2022, and a one-eighth of a percent variance in the interest rate would cause a change in interest expense of approximately $0.7 million and $0.4 million, respectively.

The $75 Million Loan Agreement matures five years after the initial incurrence and requires repayment of 20% of the original principal amount on each anniversary of the initial incurrence. The $75 Million Loan Agreement bears interest at six-month term SOFR plus 5.25% per annum. The interest rate used for pro forma purposes is 5.30%, based on the six-month term SOFR on March 10, 2022 (established prior to funding). The actual interest rate could vary for the year ended December 31, 2021 and the nine months ended September 30, 2022, and a one-eighth of a percent variance in the interest rate would cause a change in interest expense by an immaterial amount.

(in thousands)	Nine Months Ended September 30, 2022	Year Ended December 31, 2021
Term Loan Credit Agreement		
Interest expense calculated for the period	$ 32,119	$ 42,943
Less: Actual interest expense included in historical financial statements	(11,648)	—
Adjustment related to incremental interest expense [(1)]	$ 20,471	$ 42,943
$75 Million Loan Agreement		
Interest expense calculated for the period	$ 3,014	$ 4,030
Less: Actual interest expense included in historical financial statements	(2,197)	—
Adjustment related to incremental interest expense	$ 817	$ 4,030

(1) Excludes debt issuance cost amortization for the nine months ended September 30, 2022 and year ended December 31, 2021 of $0.6 million and $1.9 million, respectively. As the Exxon Barnett Acquisition was consummated on June 30, 2022, the Company's historical unaudited condensed consolidated statements of operations for the nine months ended September 30, 2022 include three months of debt issuance cost amortization attributable to the 2022 Barnett Assets. Therefore, the pro forma debt issuance cost amortization for the nine months ended September 30, 2022 represents debt issuance cost amortization attributable to the 2022 Barnett Assets for the six months ended June 30, 2022.

(ff) Reflects the adjustment for the income tax provision for transaction accounting adjustments related to the nine months ended September 30, 2022 and for the year ended December 31, 2021 of $24.7 million expense and $17.4 million expense, respectively. Income tax impacts of transaction accounting adjustments include adjustments to record depreciation, depletion and amortization (see adjustment (cc) above), accretion of asset retirement obligation (see adjustment (dd) above), and reflects estimated incremental income tax provision associated with the pro forma results of operations assuming the 2022 Barnett Asset's earnings had been subject to federal and state income tax. The pro forma estimated blended statutory rate for the periods presented is 23.0%. As the Exxon Barnett Acquisition was consummated on June 30, 2022, the Company's historical unaudited condensed consolidated statements of operations for the nine months ended September 30, 2022 include three months of income tax expense attributable to the ongoing operations of the 2022 Barnett Assets. Therefore, the pro forma income tax expense for the nine months ended September 30, 2022 represents income tax expense attributable to the ongoing operations of the 2022 Barnett Assets for the six months ended June 30, 2022.

(gg) Reflects the adjustment for the income tax provision for financing adjustments related to the nine months ended September 30, 2022 and for the year ended December 31, 2021 of $5.0 million benefit and $11.2 million benefit, respectively. The pro forma estimated blended statutory rate used for the periods presented is 23.0%. As the Exxon Barnett Acquisition was consummated on June 30, 2022, the Company's historical unaudited condensed consolidated statements of operations for the nine months ended September 30, 2022 include three months of income tax benefit attributable to the financing of the 2022 Barnett Assets. Therefore, the pro forma income tax benefit for the nine months ended September 30, 2022 represents income tax benefit attributable to the financing of the 2022 Barnett Assets for the six months ended June 30, 2022.

(hh) The pro forma adjustments on the Company's common stock and basic and diluted earnings per share are summarized below (in thousands except per share amounts):

	Nine Months Ended September 30, 2022	Year Ended December 31, 2021
Pro forma basic EPS		
Numerator		
Basic combined pro forma net income (loss) attributable to Company common stockholders	$ 220,115	$ (149,956)
Denominator		
Historical basic weighted average Company shares outstanding	117,316	116,904
Pro forma basic weighted average Company shares outstanding	117,316	116,904
Pro forma basic net income (loss) per share attributable to Company common stockholders	$ 1.88	$ (1.28)
Pro forma diluted EPS		
Numerator		
Diluted combined pro forma net income (loss) attributable to Company common stockholders	$ 220,115	$ (149,956)
Denominator		
Historical diluted weighted average Company shares outstanding	124,597	116,904
Pro forma diluted weighted average Company shares outstanding	124,597	116,904
Pro forma diluted net income (loss) per share attributable to common Company stockholders	$ 1.77	$ (1.28)

NOTE 3. Supplemental Pro Forma Oil and Gas Reserves Information

Natural Gas, NGL and Oil Reserve Quantities

The following tables present the estimated pro forma combined net proved developed and undeveloped natural gas, NGLs and oil reserves information as of December 31, 2021, along with a summary of changes in quantities of net remaining proved reserves during the year ended December 31, 2021.

The following estimated pro forma combined natural gas, NGLs and oil reserves information is not necessarily indicative of the results that might have occurred had the Transactions been completed on January 1, 2021 and is not intended to be a projection of future results. Future results may vary significantly from the results reflected because of various factors, including those discussed in the section entitled "*Risk Factors*" within this prospectus.

The Company's estimates of total proved reserves at December 31, 2021 were based on studies performed by the Company's internal engineering function, and Ryder Scott, the Company's third-party reserve engineer. The estimates were computed using the 12-month average index price, calculated as the unweighted arithmetic average for the first day of the month price for each month during the year. The estimates were prepared by the Company's independent third party engineers, Ryder Scott. The process of estimating quantities of "proved" and "proved developed" natural gas, NGL and oil reserves is very complex, requiring significant subjective decisions in the evaluation of all available geological, engineering, and economic data. The process also includes estimating the net cost of abandonment after salvage and was estimated and included for all properties for which an asset retirement obligation exists. The data may change substantially over time as a result of numerous factors including, but not limited to, additional development activity, evolving production history and continual reassessment of the viability of production under varying economic conditions. As a result, revisions to existing reserve estimates may occur from time to time. Although every reasonable effort is made to ensure that reserve estimates reported represent the most accurate assessments possible, the subjective decisions and variances in available data make these estimates generally less precise than other estimates included within the consolidated financial statements.

The estimates of proved natural gas, NGL and oil reserves from the Exxon Barnett Acquisition has been completed in accordance with professional engineering standards. The estimates also include the net cost of abandonment after salvage and was included for all properties for which an asset retirement obligation exists. The estimates of proved natural gas, NGL and oil reserves were prepared by the Company's petroleum engineers for the year ended December 31, 2021. Those proved reserves estimates were calculated by adding back production (rolled back) and adjusting for pricing from a reserve report prepared by Ryder Scott, as of June 30, 2022.

2021 Activity

During the year ended December 31, 2021, the pro forma combined proved reserves increased by 2,127.1 Bcfe. The increase in proved reserves was primarily due to increasing commodity pricing improving economics, and additions to the drilling schedule for both proved developed and undeveloped reserves. The pro forma combined production for the year ended December 31, 2021 was 327.6 Bcfe.

Revisions of previous estimates primarily consisted of upward revisions to proved developed reserves and proved undeveloped reserves of 1,116.4 Bcfe and 245.6 Bcfe, respectively, as a result of higher average pricing during 2021 for natural gas, NGLs and oil. The remaining upward adjustment of 139.8 Bcfe relates to upward performance adjustments to proved developed reserves of 219.2 Bcfe offset by a downward revision to proved developed reserves of 79.4 Bcfe due to increased production costs.

Extensions and discoveries increased as a result of the completion of our evaluation of properties acquired through our Barnett Asset Acquisition, 550.1 Bcfe of proved undeveloped reserves was recognized for 123 gross (94.8 net) locations added to the Company's revised drilling schedule during 2021. Additional extensions consisted of proved undeveloped reserves of 143.2 Bcfe related to 13.0 gross (9.6 net) locations in

the Marcellus Basin recognized from acquired acreage and the revised 2021 drilling plan. Extensions related to proved developed reserves of 34.8 Bcfe consisted of 14 gross (5.9 net) newly drilled wells.

Improved recoveries consisted of 205.4 Bcfe of proved developed reserves recognized as a result of the application of improved recovery techniques to producing wells during the year ended December 31, 2021.

Standardized Measure of Discounted Future Net Cash Flows

The following tables present the estimated pro forma discounted future net cash flows at December 31, 2021. The pro forma standardized measure information set forth below gives effect to the Transaction as if the Transaction had been completed on January 1, 2021. With respect to the disclosures below for BKV Corporation and the Exxon Barnett Acquisition, the amounts were determined by referencing the "Unaudited Supplemental Oil and Gas Disclosures" reported in BKV Corporation's annual financial statements for the year ended December 31, 2021 and the ExxonMobil Barnett Assets statements of revenues and direct operating expenses and related notes, included in this prospectus. See "*Where You Can Find More Information*" within this prospectus. The calculations assume the continuation of existing economic, operating and contractual conditions at December 31, 2021.

Therefore, the following estimated pro forma standardized measure is not necessarily indicative of the results that might have occurred had the Transactions been completed on January 1, 2021 and is not intended to be a projection of future results. Future results may vary significantly from the results reflected herein and because of various factors, including those discussed in the section entitled "*Risk Factors*" within this prospectus.

Discounted Future Net Cash Flows

The standardized measure of discounted future net cash flows relating to proved oil and natural gas reserves for the year ended December 31, 2021 are as follows:

	For the Year Ended December 31, 2021		
(in thousands)	**BKV Corporation Historical**	**2022 Barnett Assets Historical**	**Pro Forma Combined**
Future cash inflows	$ 15,029,839	$ 2,724,244	$17,754,083
Future production costs	(6,840,969)	(1,190,931)	(8,031,900)
Future development costs[(1)]	(1,051,911)	(121,966)	(1,173,877)
Income tax expense	(1,501,984)	(14,302)	(1,516,286)
Future net cash flows	5,634,975	1,397,045	7,032,020
10% annual discount for estimated timing of cash flows	(3,222,086)	(688,067)	(3,910,153)
Standardized measure of discounted future net cash flows related to proved reserves	$ 2,412,889	$ 708,978	$ 3,121,867

(1) Includes abandonment costs.

Sources of Change in Discounted Future Net Cash Flows

The changes in the pro forma standardized measure of discounted future net cash flows relating to proved oil and natural gas reserves for the year ended December 31, 2021 are as follows:

	For the Year Ended December 31, 2021		
(in thousands)	BKV Corporation Historical	2022 Barnett Assets Historical	Pro Forma Combined
Beginning of period	$ 510,410	$ 26,375	$ 536,785
Net change in sales and transfer prices and in production (lifting) costs related to future production	1,768,893	574,114	2,343,007
Changes in estimated future development costs	(393,235)	148	(393,087)
Sales and transfers of natural gas, NGLs and oil produced during the period	(522,403)	(188,565)	(710,968)
Net change due to extensions, discoveries and improved recovery	183,332	—	183,332
Purchase of minerals in place	19,050	—	19,050
Net change due to revisions in quantity estimates	1,266,086	278,939	1,545,025
Previously estimated development costs incurred during the period	60,406	—	60,406
Net change in future income taxes	(611,031)	(4,558)	(615,589)
Accretion of discount	56,096	2,815	58,911
Changes in timing and other	75,285	19,710	94,995
End of period	$ 2,412,889	$ 708,978	$3,121,867

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with our historical consolidated financial statements and related notes included elsewhere in this prospectus. The following discussion contains "forward-looking statements" that reflect our future plans, estimates, beliefs and expectations. "Cautionary Statement Regarding Forward-Looking Statements" and "Risk Factors" (included elsewhere in this prospectus) contain important information. We disclaim any duty to publicly update any forward-looking statements except as otherwise required by applicable law.

In this section, references to "BKV," the "Company," "we," "us," and "our" refer to BKV Corporation and its subsidiaries, unless otherwise indicated or the context otherwise requires. For more information on our organizational structure, see "Note 1 — General Information" to our historical consolidated financial statements included elsewhere in this prospectus.

Overview

We are a forward thinking, growth driven energy company focused on creating value for our stockholders through the organic development of our properties as well as accretive acquisitions. Our core business is to produce natural gas from our owned and operated upstream businesses, which we expect to achieve net zero Scope 1 and Scope 2 emissions by the end of 2025. We maintain a "closed-loop" approach to our net zero emissions goal with our four business lines: natural gas production, natural gas gathering, processing and transportation, power generation and CCUS. We are committed to building a vertically integrated business to reduce costs and improve overall commercial optimization of the full value chain. For instance, our natural gas production in the Barnett is gathered and transported through our midstream systems, and we are seeking to establish arrangements to supply our natural gas production directly to the BKV-BPP Power Joint Venture. Our business is operated as one reportable segment.

Recent Developments

Barnett Zero CCUS Project with EnLink

On June 8, 2022, BKV dCarbon Ventures and EnLink reached FID to develop our first CCUS project and entered into a definitive agreement to dispose of, and geologically sequester, CO_2 generated as a byproduct of the production of our natural gas in the Barnett and will utilize our newly acquired BKV Midstream assets. This CCUS project, which we refer to as the Barnett Zero Project, will separate CO_2 from substantially all of our EnLink-gathered natural gas production, which we expect to achieve an average sequestration rate of up to approximately 185,000 metric tons of CO_2e per year. We currently estimate the total investment required by us for the Barnett Zero Project to be between $20.0 and $22.0 million. We are targeting commencement of CO_2 sequestration activities by the second half of 2023, subject to our ability to secure all required permits, at which point we expect this project will be one of the first permanent commercial CO_2 disposal and sequestration projects to come online in the United States. We expect this project will offset our current Scope 1 and 2 annual emissions from our owned and operated upstream businesses by approximately 8%, bringing us closer to our goal of reaching net zero Scope 1 and 2 emissions across our owned and operated upstream businesses by the end of 2025.

Exxon Barnett Acquisition

On June 30, 2022, we closed the acquisition (the "Exxon Barnett Acquisition") of natural gas upstream and associated midstream infrastructure in the Barnett from XTO Energy, Inc. and Barnett Gathering LLC, subsidiaries of Exxon Mobil Corporation, for a total purchase price of $750.0 million, plus additional contingent consideration of up to $50.0 million depending on future natural gas prices. Pursuant to the Exxon Barnett Acquisition, we acquired approximately 175,000 total net acres that are approximately 99% held by production, primarily in Tarrant, Johnson and Parker counties, and additional smaller positions in Jack, Wise, Denton, Erath, Hood and Ellis counties, Texas. These upstream assets include low decline wells, ideal for delivering consistent cash flow, and high average working interests of approximately 94% in over 2,100 operated wells. The Exxon Barnett Acquisition also included approximately 778 miles of gathering pipelines and compression and processing midstream infrastructure with, as of September 30, 2022, over

450 MMcf/d of throughput capacity and approximately 26 MMcf/d of third-party production being gathered on the system. In connection with the Exxon Barnett Acquisition, we entered into the Term Loan Credit Agreement with a syndicate of banks and Bangkok Bank Public Company Limited (New York Branch), as the administrative agent. The Term Loan Credit Agreement includes up to $600.0 million of commitments for term loans to be used solely to fund a portion of the purchase price for the Exxon Barnett Acquisition and other costs and expenses associated with the acquisition. As of November 17, 2022, there was $570.0 million in aggregate principal amount outstanding under the Term Loan Credit Agreement. See "*— Liquidity and Capital Resources — Loan Agreements and Credit Facilities — Term Loan Credit Agreement*" for more information.

Amendment to Derivative Agreement

On August 4, 2022, we entered into an amendment to our ISDA Master Agreement with a counterparty to our derivative contracts pursuant to which we agreed to terminate or novate, at our election, at least $100.0 million of our derivative contracts. As of September 9, 2022, we terminated derivative contracts of $100.2 million with the counterparty to satisfy this requirement. In connection with such termination, we are required to make cash payments to the counterparty in an aggregate amount of $100.2 million, of which $30.0 million was paid in September 2022, an additional $30.0 million was paid on October 31, 2022, and the remaining $40.2 million must be paid by November 30, 2022. We intend to make the remaining payment with cash flows from operations. See "*Note 13 — Credit and Other Risk*" to our unaudited condensed consolidated financial statements included elsewhere in this prospectus for additional information regarding this agreement.

CCUS Project Development with Verde CO2

On August 22, 2022, we entered into a development agreement with Verde CO2 to identify, evaluate and develop CCUS projects throughout the United States. We believe our agreement with Verde CO2 will expand our CCUS and GHG emissions reduction efforts as we seek to decarbonize industrial point sources of various sizes through carbon capture and permanent sequestration. Pursuant to the development agreement, Verde CO2 will be responsible for the sourcing, development, performance and ongoing management of such CCUS projects and BKV dCarbon Ventures will provide funding for such projects. As of November 17, 2022, we have paid $8.3 million to Verde CO2 under the development agreement, and we currently expect to invest up to $250.0 million over the next three years to fund efforts by BKVerde, a subsidiary of BKV dCarbon Ventures, to efficiently identify and evaluate feasible CCUS projects, and to execute on those projects. We expect to fund BKVerde through BKV's cash flow from operations.

Revolving Credit Agreement

On August 24, 2022, we entered into the Revolving Credit Agreement with Bangkok Bank Public Company Limited (New York Branch), as the administrative agent and sole initial lender, and on November 11, 2022, we entered into the First Amendment to Revolving Credit Agreement. The Revolving Credit Agreement includes $100.0 million of commitments for unsecured revolving loans used for short-term working capital and operating needs. As of November 17, 2022, $45.0 million in aggregate principal amount was outstanding under the Revolving Credit Agreement. See "*— Liquidity and Capital Resources — Loan Agreements and Credit Facilities — Revolving Credit Agreement*" for more additional information regarding the Revolving Credit Agreement.

Cotton Cove CCUS Project

On October 18, 2022, BKV dCarbon Ventures reached internal FID to develop our second CCUS project in the Barnett. This CCUS project, which we refer to as the Cotton Cove Project, will separate, dispose of, and geologically sequester CO_2 generated as a byproduct of our natural gas production in the Barnett and will utilize our newly acquired BKV Midstream assets to do so. We estimate the Cotton Cove Project will geologically sequester up to approximately 45,000 metric tons of CO_2e per year initially, which we expect will increase to an average of up to approximately 82,350 metric tons of CO_2e per year by the end of 2024 through ongoing well development in the area. We currently estimate the total investment required by us for the Cotton Cove Project to be between approximately $14.0 and $24.0 million. We intend to own or

hold the source, the capture, the transportation pipeline and the lease to the pore space with respect to this project. We are targeting commencement of CO_2 sequestration activities by the first half of 2024, subject to our ability to secure all required permits, at which point we expect this project will be the second of our current modular line of identified potential NGP projects under evaluation as described in "— *Carbon Capture, Utilization and Sequestration*." As part of the Cotton Cove Project, we also seek to pilot, and then scale, post-combustion carbon capture technology that would allow us to sequester up to an additional approximately 250,000 metric tons per year of captured CO_2e from low concentration emissions from within our BKV Midstream operations. As part of this process, we intend to utilize compressor waste heat to reduce energy requirements and cost. We expect this project will offset our current Scope 1 and 2 annual emissions from our owned and operated upstream businesses by approximately 4% by 2025. Although the Barnett Zero Project and the Cotton Cove Project represent approximately 8% and 4%, respectively, of our estimated Scope 1 and 2 emissions from our owned and operated upstream businesses, the emissions reductions from these two projects combined represent approximately 0.27 Mtpy CO_2e, or 45% of our remaining Scope 1 and 2 emissions after taking into account the expected reductions from our "Pad of the Future" program, emissions and leak surveys, and installation of solar power (estimated to be approximately 0.61 Mtpy CO_2e), bringing us closer to our goal of reaching net zero Scope 1 and 2 emissions across our owned and operated upstream businesses by the end of 2025. See "*Business — Path to Net Zero Emissions*."

Letter of Intent with EEMNA

On November 11, 2022, we entered into a non-binding letter of intent with EEMNA to build a framework for verifiable environmental attributes with the use of carbon credits applied to natural gas energy. Under this framework, we intend to measure, reduce and verify emissions using operational technologies, such as continuous emissions monitoring. In addition, we expect to deliver sequestered carbon credits from our CCUS business to EEMNA under this marketing program. Project Canary, an environmental certification and ESG data company, will reconcile sensing technologies and measure, analyze, and report the environmental attributes of the sequestrated carbon to support decarbonization. This initiative strives to provide a market in which an LNG buyer, gas utility, power utility or other end-user can purchase measured and verified sequestrated carbon credits from a single, trusted company. These carbon credits would not apply toward a reduction of our own Scope 1, 2 or 3 owned and operated upstream emissions. We anticipate eventually selling to EEMNA, for marketing to end-users, net zero natural gas that incorporates measured, sequestrated carbon credits derived from our CCUS business.

Operational and Financial Highlights

Below are some highlights of our operating and financial results for the nine months ended September 30, 2022 and 2021 and the years ended December 31, 2021 and 2020:

- Production of natural gas, NGLs, and oil was approximately 197.4 Bcfe and 178.2 Bcfe during the nine months ended September 30, 2022 and 2021, respectively. Production of natural gas, NGLs and oil was approximately 245.8 Bcfe and 111.7 Bcfe during the years ended December 31, 2021 and 2020, respectively.
- Average realized product prices were $6.20 per Mcfe and $2.90 per Mcfe for the nine months ended September 30, 2022 and 2021, respectively. Average realized product prices were $3.38 per Mcfe and $1.03 per Mcfe for the years ended December 31, 2021 and 2020, respectively.
- For the nine months ended September 30, 2022 and 2021, production revenues were $1,224.5 million and $516.4 million, respectively, and midstream revenues were $6.1 million and $5.5 million, respectively. For the years ended December 31, 2021 and 2020, production revenues were $829.7 million and $115.0 million, respectively, and midstream revenues were $6.9 million and $7.5 million, respectively.
- Lease operating expense was $82.0 million, or $0.42 per Mcfe, and $60.9 million, or $0.34 per Mcfe, for the nine months ended September 30, 2022 and 2021, respectively. For the years ended December 31, 2021 and 2020, lease operating expense was $84.3 million, or $0.34 per Mcfe, and $30.1 million, or $0.27 per Mcfe, respectively.

- Net income for the nine months ended September 30, 2022 was $154.1 million, and net loss for the nine months ended September 30, 2021 was $375.9 million. Net loss for the years ended December 31, 2021 and 2020 was $170.7 million and $43.8 million, respectively.
- Net cash provided by operating activities for the nine months ended September 30, 2022 and 2021 was $231.1 million and $274.5 million, respectively. Net cash provided by operating activities for the year ended December 31, 2021 was $358.1 million, and net cash used in operating activities for the year ended December 31, 2020 was $7.4 million.
- Adjusted EBITDAX was $332.5 million and $237.4 million for the nine months ended September 30, 2022 and 2021, respectively. Adjusted EBITDAX was $281.0 million and $65.1 million for the years ended December 31, 2021 and 2020, respectively.
- Adjusted Free Cash Flow was approximately $143.0 million and $89.1 million for the nine months ended September 30, 2022 and 2021, respectively. Adjusted Free Cash Flow was approximately $165.1 million and $56.6 million for the years ended December 31, 2021 and 2020, respectively.
- Net cash used in investing activities was $756.3 million for the nine months ended September 30, 2022, $627.5 million of which was used to acquire assets in the Exxon Barnett Acquisition. The remaining cash outflow included $125.0 million attributable to development activities and $3.7 million of other investing activities. Net cash used in investing activities was $161.9 million for the year ended December 31, 2021, $88.4 million of which was used on the initial investment in the BKV-BPP Power Joint Venture. The remaining $73.5 million included $63.9 million attributable to development activities and $7.6 million for developed property and undeveloped acreage acquisition.
- During the year ended December 31, 2021 we paid a dividend to common stockholders of $88.1 million, or $0.75 per share of our common stock. No dividends were paid during the nine months ended September 30, 2022.

Adjusted EBITDAX and Adjusted Free Cash Flow are not financial measures calculated in accordance with accounting principles generally accepted in the United States of America ("GAAP"). See "*Prospectus Summary — Summary Historical Financial Information — Non-GAAP Financial Measures"* below for a description of each of these measures and a reconciliation of each of these measures to their most directly comparable GAAP measure.

Market Outlook

The natural gas and NGL industry is cyclical and commodity prices are highly volatile. According to the EIA, during the period from January 1, 2021 through September 30, 2022, the Henry Hub natural gas spot price reached a high of $23.86 per MMBtu on February 17, 2021 and a low of $2.43 per MMBtu on April 5, 2021. Since the Russia-Ukraine conflict first commenced, Henry Hub natural gas spot prices have trended higher, rising from $4.78 per MMBtu on February 24, 2022 to a high of $9.85 per MMBtu on August 22, 2022, according to the EIA.

We expect the natural gas and NGL markets will continue to be volatile in the future. Our revenue, profitability and future growth are highly dependent on the prices we receive for our natural gas and NGL production. See "*Risk Factors — Risks Related to Our Upstream Business and Industry — The volatility of natural gas and NGL prices due to factors beyond our control may materially and adversely affect our business, financial condition or results of operations, and our ability to make required capital expenditures, meet our debt service obligations and other financial commitments and to pay dividends on our common stock*."

Although inflation in the United States had been relatively low for many years, there was a significant increase in inflation beginning in the second half of 2021, which has continued into 2022, due to a substantial increase in the money supply, a stimulation focused fiscal policy, a significant rebound in consumer demand as COVID-19 restrictions were relaxed, the Russia-Ukraine war and worldwide supply chain disruptions resulting from the economic contraction caused by COVID-19 and lockdowns followed by a rapid recovery. Inflation rose from 5.4% in June 2021 to 7.0% in December 2021 to 8.2% in September 2022. Global, industry-wide supply chain disruptions have resulted in widespread shortages of labor, materials and services. Such shortages have resulted in our facing significant cost increases for labor, materials and

services. We do not expect these shortages and cost increases to reverse in the short term. Typically, as prices for natural gas, NGLs and oil increase, so do associated costs. Conversely, in a period of declining prices, associated cost declines are likely to lag and may not adjust downward in proportion to prices. We cannot predict the future inflation rate but to the extent inflation remains elevated, we may experience further cost increases in our operations, including costs for drill rigs, workover rigs, hydraulic fracturing fleets, tubulars and other well equipment, as well as increased labor costs. If we are unable to recover higher costs through higher commodity prices, our current revenue stream, estimates of future reserves, impairment assessments of natural gas and oil properties, and values of properties in purchase and sale transactions would all be significantly impacted. The recent increase to prices for natural gas, NGLs and oil have more than offset the inflationary related increases to our costs. However, we are monitoring the situation and assessing its impact on our business, including to our customers and our partners. These inflationary pressures are not expected to have a significant impact on our liquidity position when considered in isolation or when combined with the impact of rising interest rates on our variable rate debt. We expect to continue to achieve our business strategy by remaining vigilant in maintaining a disciplined financial strategy and in optimizing the value of our core business.

How We Evaluate Our Business

We use a variety of financial and operational metrics to assess performance of our operations, including:

- Adjusted EBITDAX;
- Upstream Reinvestment Rate;
- Adjusted Free Cash Flow;
- Adjusted Free Cash Flow Margin;
- Production Volume; and
- Total Net Leverage Ratio.

Adjusted EBITDAX. We define Adjusted EBITDAX as net income (loss) before (1) non-cash derivative gain (loss), (2) accretion of asset retirement obligation, (3) accretion of right of use liability, (4) depreciation, depletion, and amortization, (5) exploration and impairment expense, (6) (loss) gain on contingent consideration liabilities, (7) interest expense, (8) income tax benefit (expense), (9) equity-based compensation expense, (10) bargain purchase gains, (11) income from equity affiliates, (12) early settlement of derivative contracts and (13) other nonrecurring transactions. Adjusted EBITDAX is a supplemental non-GAAP financial measure that is used by our management and external users of our consolidated financial statements, such as industry analysts, investors, lenders, rating agencies and others to more effectively evaluate our operating performance and results of operation from period to period and against our peers. We believe Adjusted EBITDAX is a useful performance measure because it allows us to effectively evaluate our operating performance and results of operation from period to period and against our peers, without regard to our financing methods, corporate form or capital structure. See "*Prospectus Summary — Summary Historical Financial Information — Non-GAAP Financial Measures*" for a description of Adjusted EBITDAX and for a reconciliation of Adjusted EBITDAX to net loss, its most directly comparable GAAP measure.

Upstream Reinvestment Rate. Upstream Reinvestment Rate for any period is our total cash paid for upstream capital expenditures (excluding leasehold costs and acquisitions) for such period as a percentage of Adjusted EBITDAX for the same period. We use this metric to evaluate from period to period the efficient use of our upstream capital expenditures to maintain or grow our upstream production. We target an Upstream Reinvestment Rate of 40% or less to allow for funding of strategic initiatives. In addition, we target a Maintenance Reinvestment Rate of less than 30%.

Adjusted Free Cash Flow. We define Adjusted Free Cash Flow as net cash provided by (used in) operating activities excluding changes in operating assets and liabilities, less total cash paid for capital expenditures and settlement of contingent consideration (excluding leasehold costs and acquisitions). Adjusted Free Cash Flow is a supplemental non-GAAP financial measure that is used by our management and other external users of our financial statements, such as industry analysts, investors, lenders, rating

agencies and others to assess our ability to internally fund our capital program, service or incur additional debt and to pay dividends. We believe Adjusted Free Cash Flow is a useful liquidity measure because it allows us and others to compare cash flow provided by operating activities across periods and to assess our ability to internally fund our capital program (including acquisitions), to reduce leverage, fund acquisitions and pay dividends to our stockholders. See "*Prospectus Summary — Summary Historical Financial Information — Non-GAAP Financial Measures*" for a description of Adjusted Free Cash Flow and for a reconciliation of Adjusted Free Cash Flow to net loss and net cash provided by (used in) operating activities, its most directly comparable GAAP measures.

Adjusted Free Cash Flow Margin. We define Adjusted Free Cash Flow Margin as the ratio of Adjusted Free Cash Flow for any period to total revenues, excluding derivative gains and losses, for such period. We use this metric to assess our liquidity relative to our revenues. Adjusted Free Cash Flow Margin illustrates the efficiency with which the Company generates Adjusted Free Cash Flow.

Production Volume. Production Volume for any period is defined as the volume of natural gas, NGLs or oil we extract from our Barnett and NEPA natural gas properties. We use this metric to monitor the efficiency and effectiveness of our upstream operations.

Total Net Leverage Ratio. Total Net Leverage Ratio is the ratio of our total debt less cash and cash equivalents to Adjusted EBITDAX. We use this metric to evaluate our total debt relative to our ability to generate cash through Adjusted EBITDAX. We target a Total Net Leverage Ratio of 1.0x or less to ensure adequate liquidity to meet debt obligations and a low debt burden to protect Adjusted Free Cash Flow. This metric also provides management with a benchmark of debt levels while considering growth opportunities and our ability to manage periods of commodity price volatility.

Factors that Affect Comparability of Our Results of Operations

Our historical financial condition and results of operations for the periods presented may not be comparable, either from period to period or going forward primarily for the following reasons:

Acquisitions. We intend to continue to grow our operations and financial results through strategic acquisitions like the Devon Barnett Acquisition and the Exxon Barnett Acquisition. Additionally, we may from time to time effect divestitures of certain of our non-core assets. As a result of our Devon Barnett Acquisition, the acquisition of Temple I by the BKV-BPP Power Joint Venture, as well as our recent Exxon Barnett Acquisition, our historical reserve, operating and financial data may not be comparable from period to period. For example, for the nine months ended September 30, 2022 and 2021, our total revenues were approximately $519.4 million and $72.5 million, respectively. For the years ended December 31, 2021 and 2020, our total revenues were approximately $505.7 million and $143.3 million, respectively. As of September 30, 2022 and 2021, our total assets were approximately $2,748.4 million and $1,585.9 million, respectively, and our total liabilities were $1,811.1 million and $973.7 million, respectively. For the nine months ended September 30, 2022 and 2021, our income from the BKV-BPP Power Joint Venture was approximately $14.5 million and zero, respectively. For the years ended December 31, 2021 and 2020, our income from the BKV-BPP Power Joint Venture was approximately $0.9 million and zero, respectively.

Supply, demand, market risk and the impact on natural gas, NGLs and oil prices. As discussed above in "— *Market Outlook*," the natural gas and oil industry historically has been cyclical with highly volatile commodity prices. Natural gas and oil prices are subject to large fluctuations in response to relatively minor changes in the demand for natural gas, NGLs and oil. Prices are affected by current and expected supply and demand dynamics, including the market disruptions resulting from the Russian-Ukraine war, the impact of the COVID-19 pandemic and related erosion of demand for natural gas, NGLs and oil, U.S. supply growth driven by advances in drilling and completion technologies, and the delay of an agreement on production levels by members of OPEC and other oil producing countries, including Russia, resulting in increased supply in the global market. Other factors impacting supply and demand include weather conditions (including severe weather events), pipeline capacity constraints, inventory storage levels, basis differentials, export capacity, supply chain quality and availability, strength of the U.S. dollar as well as other factors, the majority of which are outside of our control. These commodity prices are likely to remain volatile in the future.

Public company expenses. We expect to incur incremental, non-recurring costs related to our transition to a publicly traded company, including the costs of this initial public offering and the costs associated with the initial implementation of our Sarbanes-Oxley Section 404 internal control implementation and testing. We also expect to incur additional significant and recurring expenses as a publicly traded corporation, including costs associated with the employment of additional personnel, compliance under the Exchange Act, annual and quarterly reports to common stockholders, registrar and transfer agent fees, national stock exchange fees, audit fees, legal fees, incremental director and officer liability insurance costs and director and officer compensation.

Winter Storm Uri. Our marketing revenues consist of our portion of net profits earned through an agreement we have in place with a third party who operates a commodity trading book. In 2021, we received higher than normal marketing revenues due to the pricing volatility surrounding abnormal weather events. Although the agreement remains in effect, we consider such levels of marketing revenues to be unusual and may not recur in future periods.

Factors that Significantly Affect Our Financial Condition and Results of Operations

We derive almost all of our revenues from the sale of natural gas and NGLs produced from our interests in properties located in the Barnett and NEPA. Our revenues, cash flow from operations and future growth depend substantially on factors beyond our control, such as economic, political and regulatory developments and competition from other sources of energy. Natural gas and NGL prices have historically been volatile and may fluctuate widely in the future due to a variety of factors, including but not limited to, prevailing economic conditions, supply and demand of hydrocarbons in the marketplace and geopolitical events such as wars or natural disasters. In the future, we will also be subject to fluctuations in commodity prices. Sustained periods of low natural gas prices could materially and adversely affect our financial condition, our results of operations, the quantities of natural gas and NGLs that we can economically produce and our ability to access capital.

From time to time, we utilize derivative contracts in connection with our natural gas operations to provide an economic hedge of our exposure to commodity price risk associated with anticipated future natural gas and NGL production. The derivative contracts we enter into consist of swaps, producer collars and enhanced three-way collars, subject to master netting agreements with each individual counterparty. While these arrangements are structured to reduce our exposure to commodity price decreases, they can also limit the benefit we might otherwise receive from commodity price increases. For example, for the nine months ended September 30, 2022 and 2021, we had derivative losses, net of approximately $720.3 million and $500.6 million, respectively. For the years ended December 31, 2021 and 2020, we had derivative losses, net of approximately $383.8 million, and derivative gains, net of approximately $20.8 million, respectively. We elected not to designate our current portfolio of commodity derivative contracts as hedges for accounting purposes. Therefore, changes in fair value of these derivative instruments are recognized in earnings. See "*—Quantitative and Qualitative Disclosures About Market Risk — Commodity Price Risk and Hedging Activities*" for additional discussion of our commodity derivative contracts. Our results of operations, liquidity and financial condition would be negatively impacted if natural gas prices were to become depressed or decline materially from current levels, or there is otherwise an unexpected material impact on commodity prices, and we have experienced variances in our results of operations and financial condition due to our hedging transactions.

Businesses engaged in the exploration and production of natural gas and NGLs, such as ours, face the challenge of natural production declines. As initial reservoir pressures are depleted, natural gas and NGL production from a given well naturally decreases. Thus, as does any natural gas exploration and production company, we deplete part of our asset base with each unit of natural gas and NGLs we produce. We attempt to overcome this natural decline by drilling and refracturing to unlock additional reserves and acquiring more reserves than we produce. Our future growth will depend on our ability to enhance production levels from our existing reserves and to continue to add reserves in excess of production in a cost effective manner, through development of existing assets and acquisitions. Our ability to make capital expenditures to increase production from our existing reserves and to add reserves through drilling is dependent on our capital resources and can be limited by many factors, including our ability to access capital in a cost effective manner and to timely obtain drilling permits and regulatory approvals.

Other factors significantly affecting our financial condition and results of operations include, among others:

- success in drilling new wells;
- the availability of attractive acquisition opportunities and our ability to execute them;
- the amount of capital we invest in the leasing and development of our properties;
- facility or equipment availability and unexpected downtime; and
- delays imposed by or resulting from compliance with regulatory requirements.

Sources of Revenues

Currently, substantially all of our revenues are derived from the sale of our natural gas production and the NGLs that are extracted from processing our natural gas, though we also generate a portion of our revenues from the sale of crude oil, midstream and surface operations, a minority equity interest in a midstream system and certain marketing revenue and other income. Our midstream and surface operations primarily support our own exploration and production operations, with revenues generated primarily from fees charged for midstream and surface services, including transportation, freshwater sourcing and disposal and other services to us and our affiliates and, to a lesser extent, third parties.

We sell natural gas, NGLs and oil at specific delivery points. To deliver our products, we may incur third party fees for gathering and transportation. Fees incurred prior to transfer of control are recorded as gathering and transportation expenses. Fees incurred after transfer of control are recognized as a reduction to our transaction price. Pricing of commodities is subject to supply and demand as well as to seasonal, political and other conditions that we generally cannot control. Our revenues may vary significantly from period to period as a result of changes in volumes of production sold or changes in commodity prices.

Natural gas, NGL and oil sale revenues

Approximately 98.8% and 90.1% of our total revenues, excluding net derivative losses, for the nine months ended September 30, 2022 and 2021, respectively, were derived through the production and sale of natural gas, NGLs and oil. Approximately 93.3% and 93.8% of our total revenues, excluding net derivative (losses) gains, for the years ended December 31, 2021 and 2020, respectively, were derived through the production and sale of natural gas, NGLs and oil. Production of these resources occurs exclusively within the Barnett and NEPA. The following table presents the breakdown of our revenues from the production and sale of natural gas, NGLs and oil for periods presented:

	Nine Months Ended September 30,		Year Ended December 31,	
	2022	2021	2021	2020
Natural gas sales	79%	70%	72%	89%
NGL sales	20%	29%	27%	10%
Oil sales	1%	1%	1%	1%

Our revenues are influenced by production volumes as well as commodity prices. The following table presents our historical production volumes for the periods presented:

	Nine Months Ended September 30,		Year Ended December 31,	
	2022	2021	2021	2020
Production data				
Natural gas (MMcf)	151,721	138,326	186,055	96,159
NGLs (MBbls)	7,529	6,545	9,829	2,565
Oil (MBbls)	82	93	123	29
Total volumes (MMcfe)	197,386	178,154	245,767	111,722
Average daily total volumes (MMcfe/d)	723.0	652.6	673.3	306.1

Non-operated midstream revenues, net

Approximately 0.5% and 1.0% of our total revenues, excluding net derivative losses, for the nine months ended September 30, 2022 and 2021, respectively, were generated from our approximate 29.4% non-operated interest in a midstream system operated by Repsol. For the years ended December 31, 2021 and 2020, these non-operated midstream revenues amounted to approximately 0.7% and 6.1% of our total revenues, excluding net derivative (losses) gains, respectively. Revenues from our non-operated interest are recognized when services are rendered based on quantities transported and measured according to the underlying contract.

Marketing revenues

Approximately 0.6% and 8.9% of our total revenues, excluding net derivative losses, for the nine months ended September 30, 2022 and 2021, respectively, and approximately 5.9% and zero of our total revenues, excluding net derivative (losses) gains, for the years ended December 31, 2021 and 2020, respectively, consists of our portion of net profits earned through an agreement with Concord Energy, LLC, the third-party marketer of all of our natural gas production. Pursuant to this arrangement, we receive a fixed percentage of all net income realized in the resale of our and other producers' hydrocarbons. In February 2021, we received higher than normal marketing revenues due to the pricing volatility surrounding the events of Winter Storm Uri. Although the agreement remains in effect, we consider such levels of marketing revenues to be unusual and may not recur in future periods.

Other revenues

We generate a portion of our revenues from other sources including surface and midstream operations and a management fee from the BKV-BPP Power Joint Venture. Our midstream and surface operations primarily support our exploration and production operations, with revenues generated primarily from fees charged for surface and midstream services, including transportation, freshwater sourcing and disposal, and other services to us and our affiliates and, to a lesser extent, third parties.

Realized commodity prices

Our results of operations are heavily influenced by commodity prices. Natural gas, NGL and oil prices have historically been volatile and are currently at near record-high levels. On December 31, 2021, the Henry Hub natural gas spot price was $3.82 per MMBtu, though during the period from January 1, 2021 through September 30, 2022, natural gas prices reached a high of $23.86 per MMBtu and a low of $2.43 per MMBtu. A future decline in commodity prices may adversely affect our business, financial condition or results of operations. Lower commodity prices may not only decrease our revenues, but also the amount of natural gas and oil that we can produce economically.

NYMEX Henry Hub, for gas prices, and NYMEX WTI, for oil prices, are widely used benchmarks for the pricing of natural gas and oil in the United States. The price we receive for our natural gas and oil production is generally different than the NYMEX price because of adjustments for delivery location ("basis"), relative quality and other factors. As such, our revenues are sensitive to the price of the underlying commodity to which they relate. The following is a comparison of average pricing excluding and including the effects of derivatives:

	For the Nine Months Ended September 30,		For the Year Ended December 31,	
	2022	2021	2021	2020
Average prices:				
Natural gas (Mcf):				
Average NYMEX Henry Hub Price	$ 6.74	$ 3.61	$ 3.84	$ 2.08
Average Natural Gas Realized Price (excluding derivatives)	$ 6.39	$ 2.60	$ 3.21	$ 1.06
Average Natural Gas Realized Price (including derivatives)	$ 3.56	$ 2.01	$ 2.29	$ 1.17
Differential to NYMEX Henry Hub	$ (0.35)	$ (1.01)	$ (0.63)	$ (1.02)
NGLs (Bbl):				
Average NYMEX WTI Price	$ 98.96	$ 65.05	$ 67.92	$ 39.40
Average NGL Realized Price (excluding derivatives)	$ 32.86	$ 23.10	$ 22.90	$ 4.66
Average NGL Realized Price (including derivatives)	$ 28.71	$ 16.65	$ 16.03	$ 4.66
Differential to NYMEX WTI	$ (66.10)	$ (41.95)	$(45.02)	$(34.74)
Oil (Bbl):				
Average NYMEX WTI Price	$ 98.96	$ 65.05	$ 67.92	$ 39.40
Average Oil Realized Price (excluding derivatives)	$ 92.24	$ 58.82	$ 61.46	$ 46.67
Average Oil Realized Price (including derivatives)	$ 92.24	$ 58.82	$ 61.46	$ 46.67
Differential to NYMEX WTI	$ (6.72)	$ (6.23)	$ (6.46)	$ 7.27
High and low NYMEX prices:				
Oil (Bbl):				
High	$ 123.64	$ 75.54	$ 84.65	$ 63.27
Low	$ 75.99	$ 47.47	$ 47.62	$(37.63)
Natural gas (Mcf):				
High	$ 9.85	$ 23.86	$ 23.86	$ 3.35
Low	$ 3.73	$ 2.43	$ 2.43	$ 1.48

Commodity Price Risk and Derivatives and Hedging Activities

The volatility of energy markets makes it extremely difficult to predict future natural gas, NGL and oil price movements with any certainty, and our results of operations and cash flows are impacted by changes in market prices for natural gas, NGLs and oil. Lower natural gas, NGL and oil prices may reduce the amount of natural gas and oil that we can produce economically. This may also result in our having to make substantial downward adjustments to our estimated proved reserves. If this occurs or if our production estimates change or our exploration or development activities are curtailed, successful efforts accounting rules may require us to recognize impairment expense as a non-cash charge to earnings, and to the carrying value of our natural gas properties.

To achieve more predictable cash flow and to reduce our exposure to adverse fluctuations in commodity prices, from time to time we enter into derivative arrangements for our production. In most of our current positions, our hedging activity may also reduce our ability to benefit from increases in commodity prices. We will sustain losses to the extent our derivatives contract prices are lower than market prices, and conversely, we will recognize gains to the extent our derivatives contract prices are higher than market prices. The price we receive for sales of our natural gas, NGL, and oil is generally less than the NYMEX prices because of adjustments for basis, relative quality and other factors.

In the nine months ended September 30, 2022, our derivative settlements decreased our natural gas revenue by $429.0 million and our NGL revenue by $31.2 million, and early terminations of derivative contracts during the nine months ended September 30, 2022 decreased revenue by an additional $101.3 million. In the nine months ended September 30, 2021, our derivative settlements decreased our natural gas revenue by $81.4 million and decreased our NGL revenue by $42.2 million. In the year ended December 31,

2021, our derivative settlements decreased our natural gas revenue by $170.2 million and our NGL revenue by $67.6 million. In the year ended December 31, 2020, our derivative settlements increased natural gas revenue by $7.7 million and early terminations of derivative contracts increased revenue by an additional $2.7 million for a total increase of $10.4 million.

The following table summarizes our outstanding natural gas and NGL derivative positions as of September 30, 2022. Prices to be realized for hedged production will be less than these NYMEX prices because of location, quality and other adjustments.

Instrument	MMBTU	Weighted Average Price (USD)	Weighted Average Price Sub Floor	Weighted Average Price Floor	Weighted Average Price Ceiling	Weighted Average Price Sub Ceiling	Fair Value as of September 30, 2022 (in thousands)
2022							
Swap	11,209,000	$ 4.41					$ (27,462)
Enhanced three-way collars	8,235,000		$ 2.51	$ 2.54	$ 2.91	$ 3.18	$ (64,581)
Collars	305,000			$ 2.75	$ 3.30		$ (1,077)
2023							
Swap	52,674,600	$ 3.90					$ (67,647)
Enhanced three-way collars	9,125,000			$ 2.45	$ 3.15	$ 3.15	$ (41,317)
Collars	41,250,000			$ 2.85	$ 3.75		$ (55,843)

The following table represents natural gas liquids commodity derivatives for contracts expiring throughout the year ending December 31, 2022 and 2023 based on the applicable index listed below:

Instrument	Commodity Reference Price	Volumes	Weighted Average Price (USD)	Fair Value at September 30, 2022 (In thousands)
2022				
Swap	OPIS Purity Ethane Mont Belvieu	34,385,400	$ 0.34	$ (1,925)
Swap	OPIS IsoButane Mont Belvieu Non-TET	966,000	$ 0.99	$ (96)
Swap	OPIS Normal Butane Mont Belvieu Non-TET	1,932,000	$ 0.98	$ (11)
Swap	OPIS Pentane Mont Belvieu Non-TET	1,932,000	$ 1.46	$ (183)
Swap	OPIS Propane Mont Belvieu Non-TET	5,796,000	$ 0.86	$ (93)
2023				
Swap	OPIS Purity Ethane Mont Belvieu	38,325,000	$ 0.23	$ (4,289)
Swap	OPIS IsoButane Mont Belvieu Non-TET	3,832,500	$ 0.80	$ (571)
Swap	OPIS Normal Butane Mont Belvieu Non-TET	3,832,500	$ 0.80	$ (384)
Swap	OPIS Pentane Mont Belvieu Non-TET	7,665,000	$ 1.28	$ (1,522)
Swap	OPIS Propane Mont Belvieu Non-TET	22,995,000	$ 0.72	$ (2,004)

Principal Components of Cost Structure

Lease operating and workover

Lease operating and workover expenses reflect the costs incurred to maintain our production. Lease operating expenses represent the costs incurred for field employee salaries, saltwater disposal, repairs and maintenance, and other standard operating expenses. Workover expenses include those costs incurred to perform more substantial maintenance or remedial treatments on a well to restore or enhance production. Cost levels for certain of these expenses vary based on the volume of production, among other factors.

Taxes other than income

Taxes other than income consist of production taxes, severance taxes, impact fees and ad valorem taxes. Production and severance taxes are paid on produced natural gas and oil based on a percentage of

the market value or sales prices of the natural gas and oil or at fixed per-unit rates established by state authorities. Impact fees are based on drilling activities and natural gas market prices. We pay ad valorem taxes based on the value of our reserves as well as the value of property and equipment.

Gathering and transportation

Gathering and transportation expenses are incurred in connection with the natural gas, NGL and oil gathering and transportation contracts we enter into with third parties. Pursuant to these contracts, third parties agree to deliver the natural gas, NGLs and oil we produce to our customers for a fee. The fees incurred prior to control transfer are classified as gathering and transportation expenses on the consolidated statement of operations, whereas any fees incurred after transfer of control are included as a reduction of the associated revenues.

Accretion of asset retirement obligations

Accretion of asset retirement obligations reflects the expense related to accretion of our asset retirement obligations. Our obligations are accreted using the interest method over the period from initial measurement to the expected timing of settlement and are measured using our credit-adjusted risk-free rate applied when the liability was initially measured.

Depreciation, depletion, and amortization

Depreciation, depletion, and amortization reflects the systematic expensing of the costs capitalized in connection with our costs to acquire, explore and develop natural gas, NGLs and oil. We use the successful efforts method of accounting for natural gas producing activities. Accordingly, we capitalize all costs associated with our acquisition, drilling, development, and retirement efforts and all successful exploration efforts and allocate these costs using the units of production method. Depreciation of midstream assets and other property and equipment is computed over an asset's estimated useful life using a straight-line basis.

Exploration and impairment

Exploration costs are costs related to unsuccessful leasing efforts, as well as geological and geophysical costs, including seismic costs, costs of unsuccessful exploratory dry holes and costs of other exploratory activities. Impairment costs include impairment and costs associated with leases expirations, impairment of design and initial costs related to pads that are no longer planned to be placed into service and impairment of proved properties due to lower future commodity prices. We charge impairment expense for expired or soon-to-be expired leases when we determine they are impaired based on factors such as remaining lease terms, reservoir performance, commodity price outlooks and future plans to develop the acreage. We also record impairment charges for proved properties on a geological reservoir basis when events or changes in circumstances indicate that a property's carrying amount may not be recoverable.

General and administrative

General and administrative expenses typically represent costs for payroll and benefits for our work force, equity-based compensation expense, integration support, consulting fees, costs incurred to maintain our headquarters, and costs incurred for various legal proceedings which arise through the normal course of business, among others.

Accretion of right of use liabilities

For any contract deemed to include a leased asset, such as compressors and other equipment used in our upstream operations, that asset is capitalized on the balance sheet as a right of use asset and a corresponding lease liability is recorded at the present value of the known future minimum payments of the contract using a discount rate on the date of commencement. Accretion of right of use liabilities reflects the periodic accretion expense associated with the increase in the present value of the lease liability over the life of the underlying lease.

(Loss) gain on contingent consideration liabilities

In October 2020, we acquired Devon Energy's natural gas properties in the Barnett (the "2020 Barnett Properties"), and in June 2022, we acquired the 2022 Barnett Assets from XTO Energy, Inc. and Barnett Gathering LLC, subsidiaries of Exxon Mobil Corporation, pursuant to separate purchase agreements that each included an earnout obligation pursuant to which we agreed to make certain contingent consideration payments based on future prices of natural gas. As of September 30, 2022, we have paid Devon Energy $65.0 million in contingent consideration payments. We have not paid any contingent consideration payments to Exxon Mobil Corporation as of September 30, 2022. These contingent consideration payments are stated at fair value on our consolidated balance sheet, with changes in fair value recorded in the consolidated statement of operations.

Interest expense

We finance a portion of our capital expenditures, working capital requirements and acquisitions with borrowings under the Subordinated Intercompany Loan Agreements, Working Capital Facilities and the Term Loan Credit Agreement. As a result, we incur interest expense that is affected by both fluctuations in interest rates under our credit facilities and our financing decisions. We have not historically utilized interest rate swaps to mitigate fluctuations in interest rates.

Income tax benefit (expense)

We are subject to state and U.S. federal income taxes. The difference between our financial statement income tax expense and our U.S. federal income tax liability is primarily due to the differences in the tax and financial statement treatment of natural gas properties and the deferral of unsettled commodity derivative gains and losses for tax purposes until they are settled. We also pay certain state income or franchise taxes where state income or franchise taxes are determined on a basis other than income. We record deferred income tax expense to the extent our deferred tax liabilities exceed our deferred tax assets.

In the future, we expect we will be able to realize an additional income tax benefit from Section 45Q tax credits. For facilities placed in service on or after February 9, 2018 and before January 1, 2023, Section 45Q of the Code generally provides the capturing parties a tax credit that escalates until 2026, when it reaches $50 per ton for CO_2 directly stored in geologic formations, annually escalating for inflation thereafter. For facilities placed in service after December 31, 2022, the credit amount is increased to $85 per ton, subject to satisfaction or non-application of certain prevailing wage and apprenticeship requirements (or $17 per ton if such prevailing wage and apprenticeship requirements are not satisfied), with adjustments for inflation after 2026. In either case, the Section 45Q tax credits are available for a 12-year period for qualifying facilities that begin construction before January 1, 2033.

Results of Operations

The following tables present selected financial and operating information for the periods presented:

	Nine Months Ended September 30,	
(In thousands)	**2022**	**2021**
Revenues and other operating income		
Natural gas sales	$ 969,525	$ 359,716
NGL sales	247,404	151,165
Oil sales	7,544	5,491
Midstream revenues	6,080	5,529
Derivative losses, net	(720,312)	(500,604)
Marketing revenues	7,197	51,246
Other	2,008	—
Total revenues and other operating income	519,446	72,543
Operating expenses		
Lease operating and workover	86,870	64,244
Taxes other than income	86,164	28,453
Gathering and transportation	153,281	124,287
Accretion of asset retirement obligations	8,874	7,439
Depreciation, depletion and amortization	68,606	61,219
Exploration and impairment	—	34
General and administrative	107,341	62,653

Comparison of the Nine Months Ended September 30, 2022 and 2021

Operating revenues

Our operating revenues include revenues from the sale of natural gas, NGLs and oil, midstream revenues, gains and losses on our derivative contracts, marketing revenues and other revenues. The following table provides information on our revenues for the periods presented:

	Nine Months Ended September 30,			
(In thousands, other than percentages)	2022	2021	$ Change	% Change
Revenues				
Natural gas revenues	$ 969,525	$ 359,716	$ 609,809	170%
NGL revenues	247,404	151,165	$ 96,239	64%
Oil revenues	7,544	5,491	$ 2,053	37%
Midstream revenues	6,080	5,529	$ 551	10%
Derivative (losses) gains, net	(720,312)	(500,604)	$(219,708)	44%
Marketing revenues	7,197	51,246	$ (44,049)	(86)%
Other	2,008	—	$ 2,008	*
Total revenues and other operating income	$ 519,446	$ 72,543		

* *Percentage not meaningful*

Our aggregate sales volumes for natural gas, natural gas liquids and oil for the three months ended September 30, 2022 and 2021 were 78.2 Bcfe and 59.6 Bcfe, respectively.

Natural gas revenues

Our natural gas revenues increased by approximately $609.8 million to $969.5 million for the nine months ended September 30, 2022 from $359.7 million for the nine months ended September 30, 2021. Higher production volumes, primarily from the 2022 Barnett Assets, during the nine months ended September 30, 2022 accounted for a $34.8 million increase in period-over-period revenues (calculated as the change in period-to-period volumes times the prior period-end average price). The impact of commodity price increases, excluding the effect of derivative settlements, provided a $575.0 million increase in period-over-period revenues (calculated as the change in the period-to-period average price times current period production volumes).

NGL revenues

Our NGL revenues increased by approximately $96.2 million to $247.4 million for the nine months ended September 30, 2022 from $151.2 million for the nine months ended September 30, 2021. Higher production volumes, primarily from the 2022 Barnett Assets, during the nine months ended September 30, 2022 accounted for a $22.7 million increase in period-over-period revenues (calculated as the change in period-to-period volumes times the prior period-end average price). The impact of commodity price increases, excluding the effect of derivative settlements, provided a $73.5 million increase in period-over-period revenues (calculated as the change in the period-to-period average price times current period production volumes).

Oil revenues

Our oil revenues increased by approximately $2.1 million to $7.5 million for the nine months ended September 30, 2022 from $5.5 million for the nine months ended September 30, 2021. Lower production volumes during the nine months ended September 30, 2022 accounted for a $0.7 million decrease in period-over-period revenues (calculated as the change in period-to-period volumes times the prior period-end average price). This decrease was more than offset by the impact of commodity price increases, excluding the effect of derivative settlements, which provided a $2.7 million increase in period-over-period revenues (calculated as the change in the period-to-period average price times current period production volumes).

Midstream revenues

Our midstream revenues increased by approximately $0.6 million, or 10%, to $6.1 million for the nine months ended September 30, 2022 from $5.5 million for the nine months ended September 30, 2021. This increase was due to the midstream assets acquired in the Exxon Barnett Acquisition.

Derivative (losses) gains, net

For the nine months ended September 30, 2022, we had a loss on derivative contracts of $720.3 million compared to a loss on derivative contracts of $500.6 million for the nine months ended September 30, 2021. The loss for the nine months ended September 30, 2022 is attributable to increases in underlying commodity prices and volatility in energy markets, which resulted in higher realized and unrealized losses on derivative contracts as well as $101.3 million of early terminations.

Marketing revenues

Our marketing revenues decreased by approximately $44.0 million to $7.2 million for the nine months ended September 30, 2022 from $51.2 million for the nine months ended September 30, 2021. These revenues are generated in connection with our agreement with Concord Energy, LLC, the third-party marketer of all of our natural gas production. Pursuant to this arrangement, we receive a fixed percentage of all net income realized in the resale of our and other producers' hydrocarbons. In February 2021, we received higher than normal marketing revenues due to the pricing volatility surrounding the events of Winter Storm Uri. Although the agreement remains in effect, we consider such levels of marketing revenues to be unusual and may not recur in future periods.

Other revenues

Our other revenues were approximately $2.0 million for the nine months ended September 30, 2022 as compared to a negligible amount for the nine months ended September 30, 2021.

Operating Expenses

Our operating expenses reflect costs incurred in the development, production and sale of natural gas, NGLs and oil. The following table provides information on our operating expenses:

	Nine Months Ended September 30,			
(In thousands, other than percentages and average costs)	**2022**	**2021**	**$ Change**	**% Change**
Operating Expense				
Lease operating and workover	$ 86,870	$ 64,244	$22,626	35%
Taxes other than income	86,164	28,453	$57,711	*

Exploration and impairment	—	—	$ —	*
General and administrative	0.54	0.35	$ 0.19	54%
Total	$ 2.59	$ 1.95		

* *Percentage not meaningful*

Lease operating and workover

The following table summarizes our components of lease operating expenses for the periods presented:

	Nine Months Ended September 30,					
	2022		2021		$ Change	% Change
(In thousands, other than percentages and average costs)	Amount	Per Mcfe	Amount	Per Mcfe		
Lease operating expenses	$81,994	$ 0.42	$60,887	$ 0.34	$21,107	35%
Workover expenses	4,876	$ 0.02	3,357	$ 0.02	$ 1,519	45%
Total lease operating and workover expense	$86,870	$ 0.44	$64,244	$ 0.36	$22,626	35%

Lease operating and workover expenses were $86.9 million, or $0.44 per Mcfe, for the nine months ended September 30, 2022, which was an increase of $22.6 million, or 35%, from $64.2 million, or $0.36 per Mcfe, for the nine months ended September 30, 2021. The increase in lease operating and workover expenses during the nine months ended September 30, 2022 compared to the same period in 2021 was primarily due to the Exxon Barnett Acquisition, which closed on June 30, 2022. The acquired operations drove $15.1 million of incremental lease operating and workover expenses during the nine months ended September 30, 2022. The remaining $7.5 million of increased lease operating and workover expenses was driven by a $3.3 million increase in field employee salaries, a $2.5 million increase in disposal costs, and $1.7 million of individually immaterial net increases in other direct production costs incurred in connection with our operations of the 2020 Barnett Properties.

Taxes other than income

Taxes other than income were $86.2 million, or $0.44 per Mcfe, for the nine months ended September 30, 2022, which was an increase of $57.7 million from $28.5 million, or $0.16 per Mcfe, for the nine months ended September 30, 2021. The increase in taxes other than income during the nine months ended September 30, 2022 compared to the same period in 2021 was due primarily to increased natural gas and NGL production taxes associated with our operations of the 2020 Barnett Properties, which are subject to certain ad valorem and severance taxes which are not applicable to our NEPA natural gas properties. The Exxon Barnett Acquisition accounted for the remaining $12.4 million of increased property and production taxes during the nine months ended September 30, 2022 compared to the nine months ended September 30, 2021.

Gathering and transportation

Gathering and transportation expenses were $153.3 million, or $0.78 per Mcfe, for the nine months ended September 30, 2022 which was an increase of $29.0 million, from $124.3 million, or $0.70 per Mcfe, for the nine months ended September 30, 2021. Approximately $1.5 million of the increase was driven by the Exxon Barnett Acquisition. The remainder of the increase in gathering and transportation expenses

during the nine months ended September 30, 2022 compared to the same period in 2021 was due to gathering and transportation contracts entered into for our 2020 Barnett Properties during the second half of the year ended December 31, 2021. Pursuant to these contracts, fees for gathering and transportation for our Barnett natural gas are incurred prior to transfer of control of our natural gas production. The fees for gathering and transportation for our legacy NEPA natural gas are incurred subsequent to transfer of control and thus are included in revenues.

Accretion of asset retirement obligations

Accretion of asset retirement obligations was $8.9 million, or $0.04 per Mcfe, for the nine months ended September 30, 2022, which was an increase of $1.4 million, or 19%, from $7.4 million, or $0.04 per Mcfe, for the nine months ended September 30, 2021. Of this increase in accretion of asset retirement obligations during nine months ended September 30, 2022 compared to the same period in 2021, $7.1 million was due to additional accretion of the asset retirement obligations attributable to the 2020 Barnett Properties and the 2022 Barnett Assets.

Depreciation, depletion, and amortization

Depreciation, depletion, and amortization was $68.6 million, or $0.35 per Mcfe, for the nine months ended September 30, 2022, which was an increase of $7.4 million, or $0.12, from $61.2 million, or $0.34 per Mcfe, for the nine months ended September 30, 2021. The increase in depreciation, depletion, and amortization during the nine months ended September 30, 2022 on a per Mcfe basis compared to the nine months ended September 30, 2021 was due to the Exxon Barnett Acquisition, which accounted for an additional $8.7 million of depletion and fixed asset depreciation expense during the nine months ended September 30, 2022. This increase of $8.7 million was partially offset by $1.3 million of individually immaterial decreases.

Exploration and impairment

Exploration and impairment expenses were zero and a negligible amount for the nine months ended September 30, 2022 and 2021, respectively. This decrease in exploration and impairment expenses was due to slightly higher geological and geophysical costs in 2021 related to a completion program in NEPA which began in fiscal year 2020 and continued into 2021 but did not recur in 2022. There were no dry hole costs or impairment expenses incurred in either period.

General and administrative

General and administrative expenses were $107.3 million, or $0.54 per Mcfe,for the nine months ended September 30, 2022, which was an increase of $44.7 million, or 71%, from $62.7 million, or $0.35 per Mcfe, for the nine months ended September 30, 2021. The increase in general and administrative during the nine months ended September 30, 2022 compared to the same period in 2021 was primarily due to the Exxon Barnett Acquisition, which provided $7.5 million to the total increase, and increased professional service expenses for the nine months ended September 30, 2022 relative to those incurred for the same period ended in 2021, which provided $28.5 million to the overall increase. The remaining $8.7 million of the increase is attributable primarily to increased equity-based compensation and employee wages, offset by decreases in other general and administrative expenses.

Other Income and Expenses

Bargain purchase gain. Bargain purchase gain increased to $163.7 million for the nine months ended September 30, 2022 from zero for the nine months ended September 30, 2021. The Exxon Barnett Acquisition resulted in a bargain purchase gain, which was primarily caused by the increase in commodity pricing from the date the acquisition was originally negotiated through the closing date. Because the value of the purchase consideration transferred was less than the fair value of the assets acquired and liabilities assumed as of the closing date of the Exxon Barnett Acquisition, we recognized a bargain purchase gain for the difference.

Loss on contingent consideration liabilities. We recognized a loss on contingent consideration liabilities accruing as an earnout obligation under the purchase agreements executed in connection with the Devon Barnett Acquisition and the Exxon Barnett Acquisition. The loss on contingent consideration liabilities was $31.1 million for the nine months ended September 30, 2022, which was a decrease of $162.3 million from the $193.4 million loss for the nine months ended September 30, 2021. The $162.3 million decrease is primarily attributable to the contingent consideration liability associated with the Devon Barnett Acquisition. Increases in forward curve commodity pricing for natural gas (NYMEX) and oil (WTI) assumptions used in the Monte Carlo simulations during the nine months ended September 30, 2021 increased the fair market value of the liability associated with the Devon Barnett Acquisition and generated losses of $193.4 million during the period. Increases in forward curve commodity pricing for natural gas and oil continued into the nine months ended September 30, 2022; however, the fair value of the contingent consideration liability hit the maximum amount payable under the arrangement with Devon Energy. Accordingly, the associated loss during the nine months ended September 30, 2022 was limited to $30.2 million. The remaining $0.9 million of the current period loss on contingent consideration liabilities is attributable to the Exxon Barnett Acquisition, which is also driven by increases in forward curve commodity pricing.

Gain on settlement of litigation. Gain on settlement of litigation increased to $16.9 million for the nine months ended September 30, 2022 from zero for the nine months ended September 30, 2021 due to the settlement of a dispute between us and an operator related to a midstream gathering system. We agreed to settle with the operator in February 2022, receiving $35.0 million in the settlement. Of the $35.0 million received, $18.1 million was deemed the collection of accounts receivable. The remaining $16.9 million has been recognized as a gain on settlement of litigation on our consolidated statement of operations.

Interest expense. Interest expense was $22.3 million for the nine months ended September 30, 2022, which was an increase of $22.0 million from $0.3 million for the nine months ended September 30, 2021. The increase in interest expense during the nine months ended September 30, 2022 was driven by our increased outstanding debt balances as of September 30, 2022 relative to the outstanding debt balance as of September 30, 2021.

Income tax benefit. Income tax benefit was $3.0 million for the nine months ended September 30, 2022, which was a change of $104.9 million from an income tax benefit of $107.9 million for the nine months ended September 30, 2021. The period-over-period change was due primarily to the recording of deferred tax assets created by the increase in our commodity derivative liabilities during the nine months ended September 30, 2022.

Earnings from equity affiliates. Earnings from equity affiliates was $14.5 million for the nine months ended September 30, 2022, which was a change from zero for the nine months ended September 30, 2021. Earnings from equity affiliates is related to our investment in, and our proportionate share in the income or losses of, the BKV-BPP Power Joint Venture, which we entered into in November 2021.

Comparison of the Years Ended December 31, 2021 and 2020

Operating Revenues

Our operating revenues include revenues from the sale of natural gas, NGLs and oil, non-operated midstream revenues, gains and losses on our derivative contracts, marketing revenues and other revenues. The following table provides information on our revenues for the periods presented:

(In thousands)	Year Ended December 31, 2021	2020	$ Change	% Change
Revenues				
Natural gas revenues	$ 597,050	$101,758	$ 495,292	*
NGL revenues	225,135	11,952	$ 213,183	*
Oil revenues	7,560	1,333	$ 6,227	*
Non-operated midstream revenues, net	6,917	7,458	$ (541)	(7)%
Derivative (losses) gains, net	(383,847)	20,755	$(404,602)	*
Marketing revenues	52,616	—	$ 52,616	*
Other	251	33	$ 218	*
Total revenues and other operating income	$ 505,682	$143,289		

* *Percentage not meaningful*

Natural gas revenues

Our natural gas revenues increased by approximately $495.3 million to $597.1 million for the year ended December 31, 2021 from $101.8 million for the year ended December 31, 2020. Higher production volumes during the year ended December 31, 2021 accounted for a $95.1 million increase in year-over-year revenues (calculated as the change in year-to-year volumes times the prior year average price), due to an increase driven by inclusion of a full year of production from our 2020 Barnett Assets during the year ended December 31, 2021. Changes in commodity prices, excluding the effects of derivative settlements, accounted for an approximate $400.2 million increase in year-over-year revenues (calculated as the change in the year-to-year average price times current year production volumes).

NGL revenues

Our NGL revenues increased by approximately $213.2 million to $225.1 million for the year ended December 31, 2021 from $12.0 million for the year ended December 31, 2020. Higher production volumes during the year ended December 31, 2021 accounted for a $33.8 million increase in year-over-year revenues (calculated as the change in year-to-year volumes times the prior year average price), due to an increase driven by inclusion of a full year of production from our 2020 Barnett Assets during the year ended December 31, 2021. Changes in commodity prices, excluding the effects of derivative settlements, accounted for an approximate $179.4 million increase in year-over-year revenues (calculated as the change in the year-to-year average price times current year production volumes).

Oil revenues

Our oil revenues increased by approximately $6.2 million to $7.6 million for the year ended December 31, 2021 from $1.3 million for the year ended December 31, 2020. Higher production volumes during the year ended December 31, 2021 accounted for a $4.4 million increase in year-over-year revenues (calculated as the change in year-to-year volumes times the prior year average price), due to an increase driven by inclusion of a full year of production from our 2020 Barnett Assets during the year ended December 31, 2021. Changes in commodity prices, excluding the effects of derivative settlements, accounted for an approximate $1.8 million increase in year-over-year revenues (calculated as the change in the year-to-year average price times current year production volumes).

Non-operated midstream revenues, net

Our non-operated midstream revenues decreased by approximately $0.5 million, or 7%, to $6.9 million for the year ended December 31, 2021 from $7.5 million for the year ended December 31, 2020. This decrease was primarily due to decreases in the associated production of natural gas properties the midstream assets support.

Derivative (losses) gains, net

For the year ended December 31, 2021, we had a loss on derivative contracts of $383.8 million compared with a gain on derivative contracts of $20.8 million for the year ended December 31, 2020. The loss in 2021 is attributable to increases in underlying commodity prices, which resulted in higher realized and unrealized losses on derivative contracts.

Marketing revenues

Our marketing revenues increased by approximately $52.6 million, to $52.6 million for the year ended December 31, 2021 from zero for the year ended December 31, 2020. Our marketing revenues are derived under our marketing agreement with a third party pursuant to which we receive a fixed percentage of all net income realized in the resale of our and other producers' hydrocarbons. The increase in marketing revenues was primarily due to the pricing volatility surrounding the events of Winter Storm Uri, which resulted in $48.7 million of revenues for the year ended December 31, 2021.

Other revenues

We generate a portion of our revenues from other sources including surface and midstream operations. Our midstream and surface operations primarily support our own exploration and production operations, with revenues generated primarily from fees charged for surface and midstream services, including transportation, freshwater sourcing and disposal and other services to us and our affiliates and, to a lesser extent, third parties. Our other revenues were approximately $0.3 million for the year ended December 31, 2021 as compared to a negligible amount for the year ended December 31, 2020. The increase was minimal year over year.

Operating Expenses

Our operating expenses reflect costs incurred in the development, production and sale of natural gas, NGLs and oil. The following table provides information on our operating expenses:

	Year Ended December 31,			
(In thousands, other than percentages and average costs)	**2021**	**2020**	**$ Change**	**% Change**
Operating Expense				
Lease operating and workover	$ 88,105	$ 31,260	$ 56,845	182%

General and administrative	0.35	0.26	$ 0.09	32%
Accretion of right of use liabilities	—	—	$ —	(44)%
Total	$ 1.98	$ 1.38		

* *Percentage not meaningful*

Lease operating and workover

The following table summarizes our components of lease operating expenses for the years ended December 31, 2021 and 2020:

	Years Ended December 31,					
	2021		2020			
	Amount	Per Mcfe	Amount	Per Mcfe	$ Change	% Change
	(In thousands)		(In thousands)		(In thousands)	
Lease operating expenses	$ 84,303	$ 0.34	$ 30,130	$ 0.27	$ 54,173	179%
Workover expenses	3,802	0.02	1,130	0.01	2,672	236%
Total lease operating and workover expense	$ 88,105	$ 0.36	$ 31,260	$ 0.28	56,845	182%

Lease operating and workover expenses were $88.1 million, or $0.36 per Mcfe, for the year ended December 31, 2021, which was an increase of $56.8 million, or 182%, from $31.3 million, or $0.28 per Mcfe, for the year ended December 31, 2020. The increase in lease operating and workover during 2021 compared to 2020 was due to the acquisition of our 2020 Barnett Properties, which are included for the full year ended December 31, 2021, compared to three months during the year ended December 31, 2020.

Taxes other than income

Taxes other than income were $45.7 million, or $0.19 per Mcfe, for the year ended December 31, 2021, which was an increase of $40.5 million from $5.2 million, or $0.05 per Mcfe, for the year ended December 31, 2020. The increase in taxes during 2021 compared to 2020 was due to our acquisition of the 2020 Barnett Properties, which are included for the full year ended December 31, 2021, compared to three months during the year ended December 31, 2020. These 2020 Barnett Properties are subject to certain ad valorem and severance taxes which are not applicable to our NEPA natural gas properties.

Gathering and transportation

Gathering and transportation expenses were $173.6 million, or $0.71 per Mcfe, for the year ended December 31, 2021, which was an increase of $173.6 million, from zero for the year ended December 31, 2020. The increase in gathering and transportation during 2021 compared to 2020 was due to new contracts entered into for our 2020 Barnett Properties during the year ended December 31, 2021. Pursuant to these new contracts, fees for gathering and transportation for our Barnett natural gas are incurred prior to transfer of control of our natural gas production. The fees for gathering and transportation for our legacy NEPA natural gas are incurred subsequent to transfer of control and thus are included in revenues.

Accretion of asset retirement obligations

Accretion of asset retirement obligations was $10.0 million, or $0.04 per Mcfe, for the year ended December 31, 2021, which was an increase of $6.8 million, or 212%, from $3.2 million, or $0.03 per Mcfe, for the year ended December 31, 2020. The increase in accretion of asset retirement obligations during 2021 compared to 2020 was due to additional accretion associated with the additional asset retirement obligations associated with the 2020 Barnett Properties.

Depreciation, depletion, and amortization

Depreciation, depletion, and amortization was $82.0 million, or $0.33 per Mcfe, for the year ended December 31, 2021, which was a decrease of $1.4 million, or 2%, from $83.4 million, or $0.75 per Mcfe, for the year ended December 31, 2020. The decrease in depreciation, depletion, and amortization during 2021 on a per Mcfe basis compared to 2020 was due to an increase in proved reserves, lowering our depletion rate.

Exploration and impairment

Exploration and impairment expenses were $0.03 million, or less than $0.01 per Mcfe, for the year ended December 31, 2021, which was a decrease of $0.5 million, or 94%, from $0.6 million, or $0.01 per Mcfe, for the year ended December 31, 2020. The decrease in exploration and impairment during 2021 compared to 2020 was due to higher geological and geophysical costs in 2020 related to a completion program in NEPA during 2020 that did not recur in 2021. There were no dry hole costs or impairment expenses incurred in either period.

General and administrative

General and administrative expenses were $85.7 million, or $0.35 per Mcfe, for the year ended December 31, 2021, which was an increase of $56.3 million, or 191%, from $29.4 million, or $0.26 per Mcfe, for the year ended December 31, 2020. The increase in general and administrative during 2021 compared to 2020 was primarily due to equity-based compensation expense for our equity-based compensation plan introduced during the year ended December 31, 2021, and integration costs related to the Devon Barnett Acquisition incurred during the year ended December 31, 2021 after the conclusion of our transition services agreement with Devon Energy.

Other income and expenses

(Loss) gain on contingent consideration liabilities. We recognized a loss on contingent consideration liabilities of $195.0 million for the year ended December 31, 2021, which was an increase of $202.1 million from a $7.1 million gain for the year ended December 31, 2020. This fluctuation is due to increases in forward curve commodity pricing for natural gas (NYMEX) and oil (WTI) assumptions used in the Monte Carlo simulations increasing the fair market value as of December 31, 2021 as compared to December 31, 2020. The increase in the liabilities is reflected as the (loss) gain on contingent consideration liabilities line of the income statement. These contingent consideration liabilities were incurred pursuant to the terms of an earnout provision under the Devon Barnett Acquisition purchase agreement.

Interest expense. Interest expense was $2.1 million for the year ended December 31, 2021, which was an increase of $0.4 million, or 25%, from $1.7 million for the year ended December 31, 2020. The change in interest expense during 2021 compared to 2020 was due to the outstanding balances on our loans with BNAC the year ended December 31, 2021 exceeding the outstanding balances during the year ended December 31, 2020.

Income tax benefit (expense). Income tax benefit was $40.5 million for the year ended December 31, 2021, which was a change of $79.5 million, or 204%, from an income tax expense of $39.0 million for the year ended December 31, 2020. The change to an income tax benefit during 2021 from income tax expense in 2020 was due to the recording of deferred tax assets created by the increase on our commodity derivative liabilities and contingent consideration during the year ended December 31, 2021.

Income from equity affiliates. Income from equity affiliates was approximately $0.9 million for the year ended December 31, 2021, which was an increase from zero for the year ended December 31, 2020. Income from equity affiliates is related to the management fees received from the BKV-BPP Power Joint Venture and represents the entire increase from the prior year, as we entered into the BKV-BPP Power Joint Venture in 2021.

Liquidity and Capital Resources

Capital Commitments

Our primary needs for cash are to fund our upstream development, midstream, power and CCUS projects, fund operations and capital expenditures, fund acquisitions, fund asset retirement obligations, cover any debt interest or minimum volume commitment obligations, paydown debt, and return capital to stockholders. Our primary uses of cash during 2021 and 2020 were to fund our Devon Barnett Acquisition, our BKV-BPP Power Joint Venture and the development of our natural gas properties. We also used operating cash flows for the payment of a special dividend to our common stockholders, operating costs,

and general and administrative costs. The primary use of the cash received from BNAC was to fund the redemption of our outstanding preferred stock.

During the nine months ended September 30, 2022, capital expenditures for development of natural gas properties were $125.0 million. During the year ended December 31, 2021, capital expenditures for development of natural gas properties were $63.9 million. Capital expenditures for our operated properties are largely discretionary and within our control. We could choose to defer a portion of these planned capital expenditures depending on a variety of factors, including but not limited to the success of our drilling activities, prevailing and anticipated prices for natural gas and NGLs, the availability of equipment, infrastructure and capital, the receipt and timing of required regulatory permits and approvals, seasonal conditions, drilling and acquisition costs and the level of participation by other interest owners. We will continue to monitor commodity prices and overall market conditions and can adjust our rig cadence up or down in response to changes in commodity prices and overall market conditions.

Our adjusted capital budget for 2022 is approximately $266.0 million, of which we had expended approximately $128.4 million as of September 30, 2022.

Our operating leases consist of leases for office space and compressors. We do not have finance leases. Leases with an initial term of 12 months or less are not recorded on the balance sheet. Instead, the short-term leases are recognized in expenses on a straight-line basis over the lease term. Most leases include one or more options to renew, with renewal terms generally being one year, which are not recognized as part of the lease right-of-use (ROU) assets or liabilities as they are not reasonably certain to be exercised. The exercise of lease renewal options is at our discretion.

As of December 31, 2021, our undiscounted minimum cash payment obligations for operating lease liabilities are as follows (in thousands):

2022	$11,241
2023	947
2024	959
2025	972
2026	848
Thereafter	1,664
Total undiscounted future lease payments	$16,631
Present value adjustment	(1,226)
Net operating lease liabilities	$15,405

On August 4, 2022, we entered an amendment to our ISDA Master Agreement with a counterparty to our derivative contracts pursuant to which we have agreed to terminate or novate, at our election, $100.0 million of our derivative contracts with the counterparty. As of September 30, 2022, we terminated derivative contracts of $100.2 million with the counterparty to satisfy this requirement. In connection with such termination, we are required to make cash payments to the counterparty in an aggregate amount of $100.2 million, of which $30.0 million was paid in September 2022, an additional $30.0 million was paid on October 31, 2022, and the remaining $40.2 million must be paid by November 30, 2022. We intend to make the remaining payment with cash flows from operations, inclusive of our recent Exxon Barnett Acquisition. See "*Note 13 — Credit and Other Risk*" to our unaudited condensed consolidated financial statements included elsewhere in this prospectus for additional information regarding this agreement.

Capital Resources

Historically, our primary sources of capital resources and liquidity have consisted of internally generated cash flows from operations and loans with our majority stockholder, BNAC. We also enter into derivative contracts to reduce the financial impact of commodity price volatility and provide a level of certainty and stability to our cash flows. We currently believe that we will be able to fully fund our 2022 capital budget with cash on hand and cash flows from operations. The following table summarizes our cash flows for the nine months ended September 30, 2022 and 2021, as well as the years ended December 31, 2021 and 2020 (in thousands):

	Nine Months Ended September 30,		Year Ended December 31,	
	2022	2021	2021	2020
Net cash provided by (used in) operating activities	$ 231,075	274,488	$ 358,133	$ (7,405)
Net cash (used in) investing activities	(756,333)	(74,868)	(161,858)	(513,992)
Net cash provided by (used in) financing activities	575,206	(130,820)	(79,053)	442,723
Net increase (decrease) in cash and cash equivalents	$ 49,948	$ 68,800	$ 117,222	$ (78,674)

Cash flows provided by (used in) operating activities. Net cash provided by operating activities was $231.1 million for the nine months ended September 30, 2022, compared to $274.5 million of net cash provided by operating activities for the nine months ended September 30, 2021. Net cash provided by operating activities decreased in 2022 primarily due to our net income position as of September 30, 2022 versus our net loss position as of September 30, 2021, cash paid for settlement of contingent consideration, changes in the fair values of derivative and contingent consideration liability balances, the current year gain on bargain purchase, and decreased cash utilized for working capital.

Net cash provided by operating activities was $358.1 million for the year ended December 31, 2021, compared to $7.4 million of net cash used in operating activities for the year ended December 31, 2020. Net cash provided by operating activities increased in 2021 primarily due to increases natural gas and NGL volumes produced, increases in commodity prices both before and after the effects of settled commodity derivatives, changes in the fair values of derivative and contingent consideration liability balances, and decreased cash utilized for working capital.

Operating cash flow fluctuations are substantially driven by realized commodity prices, production volumes and operating expenses. Prices for natural gas and NGLs have historically been volatile, primarily as a result of supply and demand, pipeline infrastructure constraints, basis differentials, inventory storage levels and seasonal influences. We are unable to predict future commodity prices and therefore cannot provide assurance about future levels of cash provided by operating activities.

Cash flows used in investing activities. Net cash used in investing activities increased from $74.9 million for the nine months ended September 30, 2021 to $756.3 million for the nine months ended September 30, 2022. Driving $627.5 million of this increase is our acquisition of certain operated and non-operated interests in proved reserves and certain midstream support assets in the Exxon Barnett Acquisition. Approximately $125.0 million of the year-to-date cash outflow for the nine months ended September 30, 2022 is due to our increased expenditures in development of natural gas properties. The remainder of the cash outflow is attributable to other investing activities.

Net cash used in investing activities decreased from $514.0 million for the year ended December 31, 2020 to $161.9 million for the year ended December 31, 2021. The primary driver of the decreased cash outflow in 2021 relative to 2020 was our decreased investment in natural gas properties for production purposes in 2021. In 2021, we invested approximately $2.5 million in properties while in 2020, we invested approximately $501.7 million.

Contributing to the $161.9 million cash outflow in 2021 was our initial investment in BKV-BPP Power. In November of 2021, BKV-BPP Power purchased an operational power plant in Texas. The remaining activity in 2021 included $63.9 million attributable to development activities and $7.6 million for developed property and undeveloped acreage acquisition. Development activities have and are anticipated to continue to be funded through cash flows from operations.

Cash flows provided by (used in) financing activities. Net cash provided by financing activities changed from a $130.8 million outflow for the nine months ended September 30, 2021 to a $575.2 million inflow for the nine months ended September 30, 2022. The primary driver of the current period inflow is the $570.0 million of borrowings against the Term Loan Credit Agreement dated June 16, 2022. We also received $75.0 million of proceeds in connection with a related party note payable, offset by $166.0 million of repayments to the related party, and $190.0 million of advances received in connection with the Company's

credit facility, offset by $60.0 million of repayments on said facility. The remainder of the fluctuation consists primarily of contingent consideration settlements, debt issuance cost and deferred offering cost payments, and net share settlements.

Net cash used in financing activities was $79.1 million for the year ended December 31, 2021, compared to net cash flows provided by financing activities of $442.7 million for the year ended December 31, 2020. During the year ended December 31, 2021, we paid dividends to common stock stockholders of $88.1 million and dividends to preferred stockholders of $10.3 million. The Company elected to exercise its redemption option on all outstanding shares of preferred stock and the associated shares of common stock for $122.4 million, and puttable minority interest shares of common stock for $2.8 million. In addition, the Company issued common stock through the 2022 ESPP (as defined herein) and received proceeds of $3.2 million from shares sold under the ESPP. These cash outflows are partially offset by $166.0 million of proceeds received under the term loans from BNAC.

Working Capital

As of September 30, 2022, we had cash and cash equivalents of $167.1 million and restricted cash of $17.5 million, compared to $86.2 million of cash and cash equivalents and zero restricted cash as of September 30, 2021. Our net working capital deficit was $511.0 million as of September 30, 2022, compared to a deficit of $331.2 million as of September 30, 2021.

As of December 31, 2021, we had a cash and cash equivalents balance of $134.7 million, compared to $17.4 million as of December 31, 2020, and a net working capital deficit of $269.0 million as of December 31, 2021, compared to a net working capital surplus of $70.4 million as of December 31, 2020. As of December 31, 2021, our working capital deficit included $166.0 million of term loans under the $116 Million Loan Agreement and the $50 Million Loan Agreement (each as defined herein) that were due to BNAC by December 31, 2022.

Our working capital fluctuates based on the timing of cash collections on accounts receivable and payments on accounts payable. Our collection of receivables has historically been timely, and losses associated with uncollectible receivables have historically not been significant. As of September 30, 2022, we had a working capital deficit of $511.0 million, primarily driven by derivative settlements payable of $214.7 million, our outstanding accounts payable of $318.5 million, the $111.9 million current portion of our long-term debt instruments, and $63.4 million of contingent consideration payable. The payments relating to the contingent consideration and term loans are due in January and June of 2023, respectively. We intend to make these payments with cash flows from operations and availability under existing debt facilities and new debt facilities that we intend to enter into in the future. The current derivative liabilities will settle monthly during the twelve-month period ending June 30, 2023 in conjunction with the corresponding commodity sales, other than the $100.2 million cash payment to the counterparty to certain of our derivative contracts discussed below. We intend to use the proceeds from the corresponding commodity sales to pay the settlements of the derivative liabilities. As of December 31, 2021, we had a working capital deficit of $269.0 million primarily driven by our term loans with BNAC of $166.0 million under the $116 Million Loan Agreement and the $50 Million Loan Agreement, contingent consideration payable of $65.0 million, and derivative settlements payable of $91.2 million. Due to our derivative positions, outstanding loans to BNAC and our business being capital intensive, we may incur working capital deficits in the future.

On August 4, 2022, we entered into an amendment to our ISDA Master Agreement with the counterparty to certain of our derivative contracts pursuant to which we agreed to terminate or novate, at our election, at least $100.0 million of our derivative contracts. As of September 30, 2022, we terminated derivative contracts of $100.2 million with the counterparty to satisfy this requirement. In connection with such termination, we are required to make cash payments to the counterparty in an aggregate amount of $100.2 million, of which $30.0 million was paid in September 2022, $30.0 million was paid on October 31, 2022, and the remaining $40.2 million must be paid by November 30, 2022. We intend to make the remaining payment with cash flows from operations. See “*Note 13 — Credit and Other Risk*” to our unaudited condensed consolidated financial statements included elsewhere in this prospectus for additional information regarding this agreement.

On September 14, 2022, we received an advance of (i) $45.0 million in aggregate principal amount under our OCBC Credit Facility and (ii) $75.0 million in aggregate principal amount under our Revolving Credit Agreement. On October 14, 2022, we repaid the one month draw of $30.0 million that was outstanding under the Revolving Credit Agreement.

We believe our cash flow from operations, cash on hand and borrowings under our Revolving Credit Facilities will provide sufficient liquidity to fund our operations, capital expenditures, interest expense and debt repayments and commodity derivatives that are expected to settle during the next 12 months.

We expect that our pace of development, production volumes, commodity prices and differentials to NYMEX prices for our oil and natural gas production will be the largest variables affecting our working capital.

Loan Agreements and Credit Facilities

Intercompany Loan Agreements

On December 17, 2019, BKV O&G entered into a Loan Agreement (the "$10 Million Loan Agreement") with BNAC, a related party, which allowed for a single drawdown in the amount of $10.0 million. On June 23, 2020, we entered into a novation agreement with BKV O&G and BNAC, which transferred all of BKV O&G's rights and obligations under the $10 Million Loan Agreement to us. Also on June 23, 2020, we entered into a First Amendment to the Loan Agreement (the "First Amendment to $10 Million Loan Agreement"). On July 1, 2020, we borrowed $10.0 million thereunder for working capital purposes. The First Amendment to $10 Million Loan Agreement bore interest at a rate calculated monthly based on the outstanding principal balance as of the first of the month at the rate no less than the cost of funding of BNAC. Interest was payable on a monthly basis. During the year ended December 31, 2020, we paid $0.2 million in interest on the loan, and on December 31, 2020, we repaid $5.0 million of the outstanding principal amount of the loan. During the year ended December 31, 2021, we paid $0.1 million in interest on the loan and repaid the remaining outstanding principal amount of the loan in full. The First Amendment to $10 Million Loan Agreement terminated on June 20, 2021.

On September 28, 2020, we borrowed $119.0 million under a Loan Agreement (the "$119 Million Loan Agreement") with BNAC to partially fund the Devon Barnett Acquisition and for working capital. The $119 Million Loan Agreement bore interest at six-month LIBOR plus 5.25% per annum and was payable on a semi-annual basis. During the year ended December 31, 2020, we paid $1.5 million in interest on the loan, and on December 16, 2020, we repaid $100.0 million of the original outstanding principal amount of the loan. During the year ended December 31, 2021, we paid $0.2 million in interest on the loan, and on March 15, 2021. we repaid the remaining outstanding principal amount of the loan in full. The $119 Million Loan Agreement terminated concurrently with repayment of the remaining principal amount.

On November 8, 2021, we borrowed $50.0 million under a Loan Agreement (the "$50 Million Loan Agreement") with BNAC. On January 11, 2022, we repaid $15.0 million of the outstanding principal amount of the loan. On June 1, 2022, we paid $1.3 million in interest on the loan and repaid the remaining $35.0 million of the outstanding principal amount of the loan in full. The $50 Million Loan Agreement terminated concurrently with repayment of the remaining principal amount.

Subordinated Intercompany Loan Agreements

On October 14, 2021, we borrowed $116.0 million under a Loan Agreement (the "$116 Million Loan Agreement") with BNAC to redeem all of the outstanding preferred and common stock of the company owned by OCM BKV Holdings, LLC, an affiliate of Oaktree Capital Management L.P. Following such redemption, we do not have any issued and outstanding preferred stock. As of December 31, 2021, the full $116.0 million balance of the loan remained outstanding. On June 15, 2022, we entered into an Amended and Restated Loan Agreement (the "$116 Million A&R Loan Agreement"), which amended and restated the $116 Million Loan Agreement to, among other things, subordinate the $116.0 million term loan owed to BNAC thereunder to the term loans we borrowed under the Term Loan Credit Agreement. On August 24, 2022, BNAC entered into a Subordination Agreement with Bangkok Bank Public Company Limited, New York Branch, which subordinated the $116.0 million term loan owed to BNAC to the revolving loans

at any time outstanding under the Revolving Credit Agreement (the "August 2022 Subordination Agreement"). On September 16, 2022, we repaid the full $116.0 million balance of the loan.

On March 10, 2022, we borrowed $75.0 million under a Loan Agreement (the “$75 Million Loan Agreement”) with BNAC to fund the deposit for the Exxon Barnett Acquisition. On June 15, 2022, we entered into an Amended and Restated Loan Agreement (the “$75 Million A&R Loan Agreement” and, together with the $116 Million A&R Loan Agreement, the “Subordinated Intercompany Loan Agreements”), which amended and restated the $75 Million Loan Agreement to, among other things, subordinate the $75.0 million term loan owed to BNAC thereunder to the term loans we borrowed under the Term Loan Credit Agreement. The August 2022 Subordination Agreement provides for the subordination of the $75.0 million term loan owed to BNAC thereunder to the revolving loans at any time outstanding under the Revolving Credit Agreement. We intend to use a portion of the net proceeds from this offering to repay in full the $75 Million A&R Loan Agreement.

Our payment obligations under the Subordinated Intercompany Loan Agreements are unsecured and subordinated to our payment obligations under the Term Loan Credit Agreement and the Revolving Credit Agreement. The Subordinated Intercompany Loan Agreements bear interest at one-year term SOFR plus 5.25%. Interest on the term loans is payable annually, and the loans are repayable on December 31, 2027, in each case unless such payment is prohibited by the subordination terms of the Term Loan Credit Agreement. Subject to such subordination provisions, we are permitted to prepay the term loans at any time, with no prepayment premium.

The Subordinated Intercompany Loan Agreements include covenants that, among other things, prohibit us or any of our subsidiaries from merging, incurring liens or incurring any additional indebtedness or guarantees without consent from the lender. The Subordinated Intercompany Loan Agreements include financial covenants that require us to: (1) maintain a net worth (as defined in the Subordinated Intercompany Loan Agreements, but generally meaning total assets minus total liabilities) of at least $800.0 million at all times; and (2) not permit our trailing twelve month net borrowings to EBITDAX (as defined). in the Subordinated Intercompany Loan Agreements, but generally meaning the ratio of debt (minus cash) to earnings before interest, taxes, depreciation, depletion, amortization and exploration expenses) ratio to exceed 3.0 to 1.0 at any time. We are in compliance with all associated covenants under the $116 Million Loan Agreement and the $75 Million Loan Agreement as of September 30, 2022.

Term Loan Credit Agreement

On June 16, 2022, we entered into a Credit Agreement (as amended by that certain First Amendment to Credit Agreement dated as of November 11, 2022, the “Term Loan Credit Agreement”) with a syndicate of banks and Bangkok Bank Public Company Limited (New York Branch), as the administrative agent. The Term Loan Credit Agreement includes $600.0 million of commitments for term loans used solely to fund a portion of the purchase price for the Exxon Barnett Acquisition. On June 30, 2022, we borrowed $570.0 million of term loans under the Term Loan Credit Agreement to partially fund the Exxon Barnett Acquisition.

The term loans mature five years after their initial incurrence and require the prepayment of 20% of their original principal amount on each anniversary of their initial incurrence. Mandatory prepayments are required for casualty losses and asset dispositions in amounts equal to the net proceeds we receive in connection with such casualty loss or asset disposition above an aggregate $25.0 million during the term of the facility. In addition, we are required to prepay the term loans with any cash proceeds we receive from Banpu to cure a financial covenant default. The term loans are subject to a prepayment premium of 2.0% for optional prepayments, mandatory prepayments due to asset dispositions, and certain other mandatory prepayments.

The obligations under the Term Loan Credit Agreement are unsecured and guaranteed on an unsecured basis by all of our current and future subsidiaries. Loans under the Term Loan Credit Agreement bear interest at six-month term SOFR plus a credit spread adjustment of 0.10%, plus 4.75% per annum. Interest is payable on the last day of each interest period and at maturity. We are obligated to pay certain fees to the lenders and administrative agent under the Term Loan Credit Agreement, including commitment fees until the term loans are funded or the commitments are terminated.

The term loans were funded upon the closing of the Exxon Barnett Acquisition and satisfaction of other customary conditions.

In addition to customary reporting requirements for similarly situated companies, we are required to provide to the administrative agent, and receive its approval of, our annual budget and, commencing with the quarter ending March 31, 2023, each quarterly cash forecast for the succeeding 12-month period.

The Term Loan Credit Agreement contains various restrictive covenants that, among other things, limit our ability and the ability of our subsidiaries to: incur indebtedness (with an exception allowing us to incur, subject to certain limitations and after this initial public offering, up to $200.0 million of unsecured debt for working capital purposes); incur liens; acquire or merge with any other company; sell assets or equity interests of our subsidiaries; make investments (other than direct investments in oil and gas properties and other assets in permitted lines of business); pay dividends or make other restricted payments (see "*Dividend Policy*" and the next paragraph for further information regarding the permitted dividends under the Term Loan Credit Agreement); change our lines of business; enter into speculative hedge agreements; enter into transactions with affiliates; own any subsidiary that is not organized in the United States; prepay any debt under the Subordinated Intercompany Loan Agreements; engage in certain marketing activities; and allow, on a net basis, gas imbalances, take-or-pay or other prepayments with respect to our proved oil and gas properties.

The Term Loan Credit Agreement permits us to pay quarterly dividends to our stockholders if, among other things, (1) we have earned sufficient free cash flow (as defined in the Term Loan Credit Agreement), (2) our pro forma available cash is greater than $100.0 million, and (3) our adjusted stockholders' equity (as defined generally to mean our stockholders' equity as determined in accordance with GAAP as determined in the most recently delivered financial statements, adjusted to exclude certain unrealized earnout obligations and unrealized gains or losses resulting from hedging agreements and the application of the applicable accounting standard for the hedging instruments) is not less than $800.0 million.

Beginning with the fiscal quarter ending June 30, 2023, the Term Loan Credit Agreement will require us to always hedge not less than 50% of projected production from our proved developed producing reserves for the following 12 months and not less than 25% of the projected production from our proved developed producing reserves for the period beginning 13 months after the measurement date and ending 24 months after such date.

The Term Loan Credit Agreement also includes financial covenants that require us to maintain:

- on a semi-annual basis, a minimum asset coverage ratio (as defined in the Term Loan Credit Agreement, but generally meaning the ratio of the PV-10 value of our proved oil and gas properties to our funded debt) of 2.00 to 1.00;
- on a quarterly basis, a maximum net leverage ratio (as defined in the Term Loan Credit Agreement, but generally meaning the ratio of total funded debt, minus available cash of up to $100.0 million, to our earnings before interest, taxes, depreciation, depletion and amortization) of 2.50 to 1.00; and
- on a quarterly basis, a minimum fixed charge coverage ratio (as defined in the Term Loan Credit Agreement, but generally meaning the ratio of our earnings before interest, taxes, depreciation, depletion and amortization to certain fixed charges) of 1.30 to 1.00.

The Term Loan Credit Agreement includes customary equity cure rights that will enable us, in Banpu's sole discretion, to cure certain breaches of the maximum net leverage ratio covenant or the minimum fixed charge coverage ratio covenant.

The Term Loan Credit Agreement generally includes customary events of default for a syndicated credit facility, some of which allow for an opportunity to cure. In addition, the Term Loan Credit Agreement includes an event of default if there is a material adverse change in our business. If, after this initial public offering, Banpu and its wholly owned subsidiaries cease to own at least 51% of our equity interests, or if any such holder allows any lien to exist on our equity interests that they own, such event will be an event of default under the Term Loan Credit Agreement. If an event of default relating to bankruptcy or other

insolvency events occurs, the term loans will immediately become due and payable; if any other event of default exists, the administrative agent or the requisite lenders will be permitted to accelerate the maturity of the term loans.

Revolving Credit Facilities

We are party to a $55.0 million uncommitted credit facility with Oversea-Chinese Banking Corporation Limited, which includes a $25.0 million sublimit for the issuance of standby letters of credit. (the "OCBC Credit Facility"). As of November 17, 2022, $45.0 million in aggregate principal amount was outstanding under the OCBC Credit Facility. We are also party to a $25.0 million uncommitted credit facility with Standard Chartered Bank, which includes a $15.0 million sublimit for revolving loans (the "SCB Credit Facility" and, together with the OCBC Credit Facility, the "Revolving Credit Facilities"). As of November 17, 2022, $10.0 million in aggregate principal amount was outstanding under the SCB Credit Facility. We use the Revolving Credit Facilities for letters of credit and working capital purposes.

The Revolving Credit Facilities are uncommitted, such that the lender is not obligated to honor any request for a loan or the issuance of a letter of credit thereunder. Our obligations under the Revolving Credit Facilities are repayable upon demand by the applicable lender. The interest rates and fees under the Revolving Credit Facilities can be changed by the applicable lender in its discretion. Certain of our subsidiaries are co-borrowers or guarantors of our obligations under the Revolving Credit Facilities. The obligations under the Revolving Credit Facilities are unsecured.

Revolving Credit Agreement

On August 24, 2022, we entered into the Revolving Credit Agreement with Bangkok Bank Public Company Limited (New York Branch), as the administrative agent and sole initial lender, and on November 11, 2022, we entered into the First Amendment to Revolving Credit Agreement. The Revolving Credit Agreement includes $100.0 million of commitments for unsecured revolving loans used for short-term working capital and operating needs. As of November 17, 2022, $45.0 million in aggregate principal amount was outstanding under the Revolving Credit Agreement.

The revolving loans may be borrowed, repaid and reborrowed during the term of the Revolving Credit Agreement. The Revolving Credit Agreement will mature on September 30, 2027. Mandatory prepayments are required at any time the principal amount of outstanding revolving loans exceeds our receivables from the sales of hydrocarbons produced from our oil and gas properties. In addition, we are required to prepay the revolving loans with any cash proceeds we receive from Banpu to cure a financial covenant default to the extent such cash proceeds are in excess of the amount required to be prepaid under the Term Loan Credit Agreement.

The obligations under the Revolving Credit Agreement are unsecured and guaranteed on an unsecured basis by all of our current and future subsidiaries. Loans under the Revolving Credit Agreement bear interest at one, three or six-month term SOFR plus a credit spread adjustment of 0.10%, plus 4.75% per annum. Interest is payable on the last day of each interest period and at maturity. We are obligated to pay certain fees to the lenders and administrative agent under the Revolving Credit Agreement, including commitment fees on the average daily amount of the undrawn portion of the commitments.

Availability of the revolving loans is limited in amount and conditioned upon the administrative agent's and lenders' receipt and satisfaction with certain deliverables, including, among other things,

- receipt by the Administrative Agent of a certificate from us (i) certifying that the amounts owing to the applicable Payees (as such term is defined in the Revolving Credit Agreement, but generally, the payees of obligations incurred by us) have been paid to the respective Payees prior to the date of such borrowing, (ii) certifying and providing calculations that the requested borrowing does not exceed 110% of the sum of (x) amounts owed to such Payees and (y) Specified Royalty Payments (defined as royalty payments to be made by us or any of our subsidiaries to Payees after the date of such proposed borrowing but on or prior to the last day of the month in which such proposed borrowing occurs) and (iii) certifying that we will pay to the applicable Payees any Specified Royalty Payments prior to the last day of the month in which such borrowing occurs;

- receipt by the Administrative Agent of all documents and/or invoices to be paid by us from the requested borrowing in an amount equal to at least 90% of the requested borrowing; and
- receipt by the Administrative Agent of a certificate from us certifying (1) as to the estimated receivables from the sales of hydrocarbons from our oil and gas properties on the date of such borrowing and (2) that the amount of item (1) exceeds the sum of the principal amount of all outstanding revolving loans and the aggregate principal amount of the requested borrowing.

In addition to customary reporting requirements for similarly situated companies, we are required to provide to the administrative agent not later than thirty (30) days prior to the end of each fiscal year, a copy of a cash flow projection for each month in the following fiscal year and not later than 20 days after the end of each month, a summary of actual cash flow for such month.

The Revolving Credit Agreement contains various restrictive covenants that, among other things, limit our ability and the ability of our subsidiaries to: incur indebtedness (with an exception allowing us to incur, subject to certain limitations and after this initial public offering, up to $200.0 million of unsecured debt (including amounts under the Revolving Credit Agreement) for working capital purposes); incur liens; acquire or merge with any other company; sell assets or equity interests of our subsidiaries; make investments (other than investments in oil and gas properties and other assets in permitted lines of business); pay dividends or make other restricted payments (see "*Dividend Policy*" and the next paragraph for further information regarding the permitted dividends under the Revolving Credit Agreement); change our lines of business; enter into speculative hedge agreements; enter into transactions with affiliates; own any subsidiary that is not organized in the United States; prepay any debt under the Subordinated Intercompany Loan Agreements; engage in certain marketing activities; and allow, on a net basis, gas imbalances, take-or-pay or other prepayments with respect to our proved oil and gas properties.

The Revolving Credit Agreement permits us to pay quarterly dividends to our stockholders if, among other things, (1) we have earned sufficient free cash flow (as defined in the Revolving Credit Agreement), (2) our pro forma available cash is greater than $100.0 million and (3) our adjusted stockholders' equity (as defined generally to mean our stockholders' equity as determined in accordance with GAAP as determined in the most recently delivered financial statements, adjusted to exclude certain unrealized earnout obligations and unrealized gains or losses resulting from hedging agreements and the application of the applicable accounting standard for the hedging instruments) is not less than $800.0 million.

Beginning with the fiscal quarter ending June 30, 2023, the Revolving Credit Agreement will require us to always hedge not less than 50% of projected production from our proved developed producing reserves for the following 12 months and not less than 25% of the projected production from our proved developed producing reserves for the period beginning 13 months after the measurement date and ending 24 months after such date.

The Revolving Credit Agreement also includes financial covenants that require us to maintain:

- on a semi-annual basis, a minimum asset coverage ratio (as defined in the Revolving Credit Agreement, but generally meaning the ratio of the PV-10 value of our proved oil and gas properties to our funded debt) of 2.00 to 1.00;
- on a quarterly basis, a maximum net leverage ratio (as defined in the Revolving Credit Agreement, but generally meaning the ratio of total funded debt, minus available cash of up to $100.0 million, to our earnings before interest, taxes, depreciation, depletion and amortization) of 2.50 to 1.00; and
- on a quarterly basis, a minimum fixed charge coverage ratio (as defined in the Revolving Credit Agreement, but generally meaning the ratio of our earnings before interest, taxes, depreciation, depletion and amortization to certain fixed charges) of 1.30 to 1.00.

The Revolving Credit Agreement includes customary equity cure rights that will enable us, in Banpu's sole discretion, to cure certain breaches of the maximum net leverage ratio covenant or the minimum fixed charge coverage ratio covenant.

The Revolving Credit Agreement generally includes customary events of default for a syndicated credit facility, some of which allow for an opportunity to cure. In addition, the Revolving Credit Agreement includes

an event of default if there is a material adverse change in our business. If, after this initial public offering, Banpu and its wholly owned subsidiaries cease to own at least 51% of our equity interests, or if any such holder allows any lien to exist on our equity interests that they own, such event will be an event of default under the Revolving Credit Agreement. If an event of default relating to bankruptcy or other insolvency events occurs, the revolving loans will immediately become due and payable; if any other event of default exists, the administrative agent or the requisite lenders will be permitted to accelerate the maturity of the revolving loans.

BKV-BPP Power Joint Venture

Under the terms of the Limited Liability Agreement of BKV-BPP Power, we do not have the ability to unilaterally cause BKV-BPP Power to make distributions. As of September 30, 2022 and December 31, 2021, no distributions have been made by BKV-BPP Power. In addition, we may be required to make additional capital contributions to fund items approved in the annual budget or other matters approved by the board of BKV-BPP Power. Such additional capital contributions, which are not subject to any limit on the potential amount required, would reduce the amount of cash otherwise available for dividend payments by us on our common stock or require us to incur additional indebtedness. However, any additional capital contributions must be approved by a majority of BKV-BPP Power's eight member board of directors, four of which are appointed by us and four of which are appointed by BPPUS. See "*Certain Relationships and Related Party Transactions — BKV-BPP Power Limited Liability Company Agreement*." Also see "*Risk Factors — Risks Related to Our Power Generation Business — We operate our power generation business through a joint venture which we do not control*."

Internal Controls and Procedures

As an emerging growth company, we are not currently required to comply with the SEC's rules implementing Section 404 of the Sarbanes-Oxley Act, and therefore are not required to make a formal assessment of the effectiveness of our internal control over financial reporting for that purpose. Upon becoming a public company, we will be required to comply with the SEC's rules implementing Section 302 of the Sarbanes-Oxley Act, which will require our management to certify financial and other information in our quarterly and annual reports and provide an annual management report on the effectiveness of our internal control over financial reporting. Though we will be required to disclose material changes made to our internal controls and procedures on a quarterly basis, we will not be required to make our first annual assessment of our internal control over financial reporting pursuant to Section 404 of the Sarbanes-Oxley Act until the year following our first annual report required to be filed with the SEC. We will not be required to have our independent registered public accounting firm attest to the effectiveness of our internal controls over financial reporting until our first annual report subsequent to our ceasing to be an "emerging growth company" within the meaning of Section 2(a)(19) of the Securities Act.

We will remain an emerging growth company under the JOBS Act until December 31, 2022. While we continue to be an emerging growth company until the end of the 2022 fiscal year, we expect our revenues will exceed $1.235 billion during the year ending December 31, 2022 and we will no longer qualify as an emerging growth company as of December 31, 2022.

Material Weakness in Internal Control Over Financial Reporting

We have identified several material weaknesses in our internal control over financial reporting as of December 31, 2021, as described below. A "material weakness" is a deficiency, or combination of deficiencies, in internal control over financial reporting such that there is a reasonable possibility that a material misstatement of the annual or interim financial statements will not be prevented or detected on a timely basis. See "*Risk Factors — Risks Related to the Offering and Our Common Stock — We have identified material weaknesses in our internal control over financial reporting and may identify additional material weaknesses in the future, or otherwise fail to maintain effective internal controls over financial reporting, which could result in a restatement of our financial statements or cause us to fail to meet our reporting obligations.*"

We did not design and maintain effective controls to communicate relevant information among departments to completely and accurately record and disclose transactions in the financial statements. This material weakness contributed to two additional material weaknesses in our internal controls. We did not

design and maintain effective controls related to (i) the accounting for stock awards and common stock with certain put rights, including the value and classification of such arrangements; and (ii) the communication and evaluation of terms and conditions set forth in complex contracts, including certain of our commodity derivative contracts, relevant to our compliance with financial covenants and related disclosures.

Finally, we did not design and maintain effective controls related to the accounting for income taxes, which were not designed at a sufficient level of precision or rigor to prepare and review the tax rate reconciliation, return to provision, income tax provision, related income tax assets and liabilities, and disclosures in the consolidated financial statements, which also resulted in a material weakness in our internal control over financial reporting.

The material weaknesses described above resulted in audit adjustments to share capital and other mezzanine equity accounts, liquidity disclosures, income tax benefit, income taxes payable to related party and deferred tax assets. Additionally, each of the material weaknesses described above could result in a misstatement of the aforementioned account balances or disclosures that would result in a material misstatement to the annual or interim consolidated financial statements that would not be prevented or detected.

We have begun to take steps towards remediating these material weaknesses primarily by designing and implementing additional internal controls, including those related to (i) the communication of relevant information across departments, (ii) the valuation and classification of stock awards and common stock with certain put rights, (iii) the communication and evaluation of terms and conditions included in complex contracts relevant to our compliance with financial covenants and related disclosures, and (iv) the preparation and review of the income tax rate reconciliation, return to provision, income tax provision, related income tax assets and liabilities, and income tax disclosures. Although we believe we are addressing the internal control deficiencies that led to the material weaknesses, the measures we have taken, and plan to take, may not be effective.

Off-Balance Sheet Arrangements

As of September 30, 2022 and December 31, 2021 and 2020, we did not have any off-balance sheet arrangements.

Critical Accounting Policies and Estimates

Management's discussion and analysis of our financial condition and results of operations are based upon our historical consolidated financial statements, which have been prepared in accordance with GAAP. The preparation of our financial statements in conformity with GAAP requires us to make estimates and assumptions that affect the reported amounts of certain assets, liabilities and related disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. The following critical accounting policies relate to the more significant estimates and assumptions used in preparing the historical consolidated financial statements.

Accounting for Natural Gas and NGL Reserve Quantities and Standardized Measure of Future Cash Flows

We use the successful efforts method of accounting for natural gas producing activities. Under this method, the costs to acquire mineral interests in natural gas properties, to drill and equip exploratory leases that find proved reserves, and to drill and equip development leases and related asset retirement costs are capitalized. Costs to drill exploratory wells are initially capitalized but are charged to expense if and when we determine the exploratory wells do not contain resource reserves in commercially viable quantities. For exploratory wells that find reserves that cannot be classified as proved upon completion of drilling, costs continue to be capitalized as suspended exploratory drilling costs if sufficient reserves have been found to justify completion as a producing well and sufficient progress is being made in assessing the reserves and the economic and operational viability of the project. We reassess the operational viability of our exploratory wells on at least a quarterly basis, which may involve use of significant judgment. If we determine that future appraisal drilling or development activities are unlikely to occur, the associated suspended exploratory well costs are expensed. In some instances, this determination may take longer than one year.

The processes we use to estimate quantities of proved and unproved developed natural gas reserves and their values, future production rates, and future development costs are highly complex and requires significant subjectivity and estimation in the evaluation of available geological, engineering and economic data. The accuracy of any reserves estimate is a function of the quality of data available and of engineering and geological interpretation. The data used in developing reserve estimates may change significantly over time as a result of numerous factors, including but not limited to evolving production history, additional development activity, and continual reassessment of the viability of production under varying economic conditions. Although we take every reasonable effort to ensure our reserve estimates are representative of our actual reserves — for example, by involving independent reserve engineers in the assessment of the estimates — the subjective decisions and variances in the data available could give rise to revisions that could materially impact the accompanying historical consolidated financial statements.

Impairment of Natural Gas Properties

The evaluation of impairment of proved and unproved natural gas properties is considered a critical accounting policy due to the significant judgment and estimation involved in ascertaining the probability of future events, such as future market values of natural gas, NGLs and oil, future production costs, and future production volumes, as well as fair valuation of the properties in question. Changes in the judgments and estimates used in our evaluation of impairment, including but not limited to the expected future cash flows from natural gas reserves on our properties, could result in the cost of our proved and unproved properties not being recoverable and give rise to the need to record an impairment loss. Similarly, in the instance we determine the property is not recoverable, changes in the estimates and assumptions underlying the model used to derive the fair value of the properties in question may impact the output of the model, which could give rise to significant changes in the amount of impairment loss to record.

Revenue Recognition

We generate the majority of our revenues through the production and sale of natural gas and NGLs. The majority of these sales contracts are short term in duration and the associated revenue is recognized once control of the distinct good identified in the contract transfers to the customer at the delivery point specified within the contract. We must use a level of estimation in determining the initial amount of revenue to recognize in connection with the sale of natural gas and NGLs. Specifically, we must estimate the per-unit prices associated with a sales order, as they are variable and based on commodity pricing. Additionally, we must estimate the sales volumes using company-measured volume readings. We subsequently true up estimated revenue to actual revenue upon receipt of actual prices and volumes from our purchasers, which for natural gas and NGL sales occurs within one month of product delivery. Historically, differences between estimated revenue and actual revenue have not been material but have potential to be in the instance our price or volume estimates are inaccurate.

We also generate revenues through our non-operated midstream interests. Midstream revenues are recognized when services are rendered based on the stated contractual rates and the volumes of product transported and measured in accordance with the underlying contract. We must estimate the volume of products transported using third-party data in determining the initial amount of revenue to recognize. We subsequently adjust estimated revenue to actual revenue upon receipt of actual volume data from the operator, which is typically within three months of completion of product transportation. Historically, differences between estimated revenue and actual revenue have not been material but have potential to be in the instance our volume estimates are inaccurate.

Derivative Instruments

We enter into commodity derivative instruments to reduce the effect of price volatility on a portion of our future natural gas and NGL production. Derivative instruments are with counterparties of high credit quality and are subject to master netting agreements, and accordingly, the risk of nonperformance by the counterparties is low. However, these activities may prevent us from realizing the full benefits of price increases above the levels of the derivative instruments on a portion of our future natural gas and NGL production.

The accounting for the fair value of a derivative and changes thereto depends on the intended use of the derivative and the resulting designation. We have not designated any of our derivative contracts as fair value or cash flow hedges for accounting purposes and therefore we do not apply hedge accounting to the commodity derivative instruments. Rather, the changes in fair value are recognized in the consolidated statements of operations as net realized and unrealized gains and losses on derivative instruments in the period of change.

Acquisitions

We account for business combinations in accordance with ASC Topic 805, *Business Combinations*. Pursuant to the guidance, we allocate the aggregate purchase consideration transferred to affect the business combination to the assets acquired and liabilities assumed based on their fair values as of the acquisition date. Any excess or shortage of the purchase price over the fair value of the assets acquired and liabilities assumed is recognized as goodwill or a gain on bargain purchase, respectively. The amount of goodwill or gain on bargain purchase recorded in a business combination can vary significantly depending on the fair value allocated to the assets acquired and liabilities assumed. Further, in many cases, the valuation of these assets and liabilities requires use of various estimates and assumptions and the exercise of significant judgment about future events.

In transactions where substantially all the gross assets acquired are concentrated in a single identifiable asset or group of similar identifiable assets, the acquisition is treated as an asset acquisition rather than a business combination. We account for asset acquisitions using a purchase price allocation through which the total transaction value is determined by aggregating the base purchase price, certain closing adjustments, and contingent consideration, if any. The total transaction value is then allocated to the acquired assets on a pro rata basis based on their fair values. The determination of fair values of assets acquired requires the Company to make estimates and select valuation techniques, both of which require the exercise of management judgment.

The contingent consideration first reported in the year ended December 31, 2020 was generated from the Devon Barnett Acquisition. The fair value of the contingent consideration as of December 31, 2021 and 2020 represents management's best estimate if a third party were paid to assume the contingency. The fair value was determined using forecasted monthly Henry Hub prices, WTI prices and the application of Monte Carlo simulations. This contingency, including the settlement, is described further in "*Note 15 — Commitments and Contingencies*" to our audited historical consolidated financial statements and "*Note 14 — Commitments and Contingencies*" to our unaudited condensed consolidated financial statements included elsewhere in this prospectus. Future results of operations for any quarterly or annual period could be materially affected by changes in our assumptions.

Equity-based Compensation

Pursuant to the BKV Corporation 2021 Long Term Incentive Plan (the "2021 Plan"), time-vested restricted stock units ("TRSUs") and performance-vested restricted stock units ("PRSUs") may be granted to eligible participants. In each of January 2021 and 2022, we made annual grants of TRSUs under the 2021 Plan. The 2021 Plan will be terminated by the board of directors in connection with this offering and no further awards will be made thereunder. We recognize compensation cost related to these equity-based awards in the consolidated financial statements on a straight-line basis based on estimated grant date fair value, as if all four tranches of the TRSUs were granted at once, rather than being granted on an annual basis over four years. Under the 2021 Plan, if a participant's employment is terminated for any reason other than the participant's resignation or, if a participant's employment is terminated due to his or her voluntary resignation and more than 36 months has passed since the participant's first grant of an incentive award under the 2021 Plan, in each case where the Company had not repurchased the participant's shares of common stock acquired under the 2021 Plan, the participant will have the right to elect to sell such shares back to the Company at an amount equal to the fair market value of the shares at the time the election to sell was made. In November 2021, this put right was amended so that it could not be exercised for at least 181 days following the date the participant's award vests and a "Sell Fund Purchase Program" was implemented whereby, if specifically provided for in an award agreement, participants have the ability to tender shares for repurchase by the Company.

The TRSUs we are authorized to grant include service conditions and the PRSUs we are authorized to grant include service conditions, market performance conditions, and non-market performance conditions. In January 2021, we anticipated that we would have made four annual grants of TRSUs under the 2021 Plan in each of 2021, 2022, 2023 and 2024, subject to continued employment, the continuation of the 2021 Plan and other factors; however, there was and is no obligation to make any future grants and any such grants would require approval by our board of directors. Although the TRSUs anticipated to be granted in each of 2022, 2023 and 2024 were not actually granted to the participants when their initial TRSU award was granted, for accounting purposes, the grant date fair value of the anticipated (but not yet granted) TRSUs was determined, based on the service condition and utilizing the fair market value of common stock on the date the 2021 TRSUs were granted. The grant date fair value of the PRSUs was determined based on the service conditions, market performance conditions, and non-market performance conditions of the award on the grant and utilizing the fair market value of common stock on the grant date and Monte Carlo simulations, as well as probability assessments relative to the satisfaction of non-market performance conditions. In connection with the change to the put right to implement the 181-day holding period after vesting, an additional charge was recognized with respect to both the TRSUs and PRSUs, given that the fair market value of the common stock on the date of modification had increased from the fair market value on the original grant date.

Compensation cost is recognized ratably on a straight-line basis over the applicable service period. Forfeitures are estimated and recognized over the applicable service period and are re-evaluated at the end of each reporting period. We expect to recognize the forfeitures of the 2023 and 2024 anticipated TRSUs in connection with this offering and the subsequent termination of the 2021 Plan.

We believe that our board of directors, with input from management and the support of third-party valuations, has the relevant experience and expertise to determine the fair value of our common stock. Given the absence of a public trading market of our common stock, and in accordance with the American Institute of Certified Public Accountants Practice Aid, Valuation of Privately-Held Company Equity Securities Issued as Compensation, numerous objective and subjective factors were considered when determining the best estimate of the fair value of our common stock at each grant date. These factors include:

- the lack of marketability of our common stock;
- our operating and financial performance;
- current business conditions and projections;
- hiring of key personnel and the experience of our management;
- the history of the Company;
- the market performance of comparable publicly traded companies; and
- U.S. and global capital market conditions.

In valuing our common stock, the fair value of our business was determined using various valuation methods, including combinations of income and market approaches with input from management. The income approach estimates value based on the expectation of future cash flows that a company will generate. These future cash flows are discounted to their present values using a discount rate that is derived from an analysis of the cost of capital of comparable publicly traded companies in our industry or engaged in similar business operations as of each valuation date and is adjusted to reflect the risks inherent in our cash flows. The market approach estimates value based on a comparison of the subject company to comparable public companies engaged in similar business operations. From the comparable companies, a representative market value multiple is determined and then applied to the subject company's financial forecasts to estimate the value of the subject company.

Application of these approaches and methodologies involves the use of estimates, judgments, and assumptions that are highly complex and subjective, such as those regarding our expected future revenue, expenses, and future cash flows, discount rates, market multiples, the selection of comparable public companies, and the probability of and timing associated with possible future events. Changes in any or all of these estimates and assumptions or the relationships between those assumptions impact our valuations as of each valuation date and may have a material impact on the valuation of our common stock.

Once our stock is publicly traded, the fair value of each share of underlying common stock will be determined based on the closing price as reported on the date of grant on the primary stock exchange on which our common stock is traded.

Impairment of Goodwill

Goodwill represents the excess of the cost of an acquisition over the fair value of the net assets acquired through the Corporatization Event described in "*Note 19 — Corporatization Event*" to our historical consolidated financial statements included elsewhere in this prospectus. Impairment may occur if the reporting unit's carrying value exceeds its fair value. Due to the nature of the goodwill arising from the acquisition of Kalnin Ventures, as is described further in "*Note 19 — Corporatization Event*," the Company's goodwill is tested at the reporting unit level, which for the Company is at the consolidated level due to the Company having one identifiable operating segment or reporting unit. Under the provisions of ASC Topic 350, Intangibles — Goodwill and Other, we perform an impairment test for goodwill at least annually or when events and circumstances indicate the carrying value may not be recoverable. In performing the required impairment tests, we have the option to first assess qualitative factors to determine if it is necessary to perform a quantitative assessment for goodwill impairment. If the qualitative assessment concludes that it is more-likely-than-not that the fair value of a reporting unit is less than its carrying value, a quantitative assessment is performed.

Our quantitative assessment utilizes present value (discounted cash flow) methods to determine the fair value of the reporting units with goodwill. Determining fair value using discounted cash flows requires considerable judgment and is sensitive to changes in underlying assumptions and market factors. Key assumptions relate to revenue growth, projected operating income growth, terminal values, and discount rates. If current expectations of future growth rates and margins are not met, or if market factors outside of the Company's control, such as factors impacting the applicable discount rate, or economic or political conditions in key markets change significantly, then goodwill allocated to the reporting unit may be impaired. Management determined there were no circumstances indicating the carrying value may not be recoverable during the years ended December 31, 2021 and 2020. There have been no impairments recorded related to goodwill as the results of the annual quantitative impairment test indicated the fair value of the assets of the group to be greater than the carrying value as of December 31, 2021 and 2020.

Litigation and Environmental Contingencies

In the ordinary course of business, we may at times be subject to claims and legal actions. Management does not believe the impact of such matters will have a material adverse effect on our financial position or results of operations.

We are subject to extensive federal, state, and local environmental laws and regulations, which may materially affect our operations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require us to remove or mitigate the environmental effects of the disposal or release of petroleum or chemical substances at various sites.

In our acquisition of existing assets, we may not be aware of what environmental safeguards were taken during the time such assets were operated, and it is possible we may acquire certain environmental liabilities along with such assets.

We maintain comprehensive insurance coverage that we believe is adequate to mitigate the risk of any adverse financial effects associated with these risks. However, should it be determined that a liability exists with respect to any environmental cleanup or restoration, the liability to cure such a violation could still fall upon us. No claim has been made, nor are we aware of any liability which we may have, as it relates to any material environmental cleanup, restoration, or the violation of any rules or regulations relating thereto.

Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefits are expensed as incurred. Liabilities for expenditures of a noncapital nature are recorded when environmental assessment and/or remediation is probable, and the cost can be reasonably estimated.

Recent Accounting Pronouncements

See "*Note 2 — Summary of Significant Accounting Policies*" to our historical consolidated financial statements included elsewhere in this prospectus for more information about recent accounting pronouncements, the timing of their adoption, and our assessment, to the extent we have made one, of their potential impact on our financial condition and our results of operations.

Quantitative and Qualitative Disclosure About Market Risk

Commodity Price Risk and Hedging Activities

Our primary market risk exposure is in the price we receive for our natural gas and NGLs production. Pricing is primarily driven by spot regional market prices applicable to our U.S. natural gas production. Pricing for natural gas and NGLs has historically been volatile and unpredictable, and we expect this volatility to continue in the future. The prices we receive for our production depend on many factors outside of our control, including volatility in the differences between product prices at sales points and the applicable index price.

To mitigate some of the potential negative impact on our cash flows caused by changes in commodity prices, we enter into financial derivative instruments for a portion of our natural gas and NGLs production when management believes that favorable future prices can be secured.

Our financial hedging activities are intended to support natural gas and NGLs prices at targeted levels and to manage our exposure to natural gas and NGLs price fluctuations. These contracts may include commodity price swaps whereby we will receive a fixed price and pay a variable market price to the contract counterparty, producer collars that set a floor and ceiling price for the hedged production, enhanced three-way collars that set a floor and ceiling price for the hedged production with the potential for hedged volumes doubling above the ceiling price, or basis differential swaps. These contracts are financial instruments and do not require or allow for physical delivery of the hedged commodity. The derivative contracts outstanding as of September 30, 2022 and December 31, 2021 consisted of swaps, producer collars and enhanced three-way collars, subject to master netting agreements with each individual counterparty.

As of September 30, 2022 and December 31, 2021, we had in place natural gas swaps, producer collars, and enhanced three-way collars covering portions of our projected production through 2023. Our commodity hedge position as of December 31, 2021 is summarized in "*Note 5 — Derivative Financial Instruments*" to our historical consolidated financial statements included elsewhere in this prospectus.

We may enter into hedge contracts with a term greater than 24 months, and for no longer than 36 months, for up to 60% of our estimated production for the current year, 50% and 25% for the subsequent years, respectively. A $0.10 per Mcf decrease in NYMEX would have resulted in an $11.2 million increase in natural gas hedge revenues for the nine months ended September 30, 2022. A $1.00 decrease per Bbl of each NGL purity product price would have resulted in a $3.2 million increase in NGL hedge revenues for the nine months ended September 30, 2022. A $0.10 per Mcf decrease in NYMEX would have resulted in a $16.1 million increase in natural gas hedge revenues for the year ended December 31, 2021. A $1.00 decrease per Bbl of each NGL purity product price would have resulted in a $5.3 million increase in NGL hedge revenues for the year ended December 31, 2021.

Additionally, to reduce its exposure to fluctuations in the market price of electricity and natural gas, BKV-BPP Power enters into financially settled HRCOs, which are contracts for the financial purchase and sale of power based on a floating price of natural gas at a predetermined location using a predetermined conversion factor, or heat rate, required to turn the fuel input into electricity. BKV-BPP Power is exposed to basis risk in its operations when its derivative contracts settle financially and it delivers physical electricity on different terms. For example, if BKV-BPP Power enters into an HRCO, it hedges its electricity production based on an agreed price for that electricity, but physical electricity must be delivered to delivery points in the market it serves. BKV-BPP Power is exposed to basis risk between the hub price specified in the HRCO and the price that it receives for the sales of physical electricity. BKV-BPP Power attempts to hedge basis risk where possible, but hedging instruments are sometimes not economically feasible or available in the quantities that it requires. BKV-BPP Power's hedging activities do not provide it with protection for all of its basis risk and could result in economic losses and liabilities, which could have a material adverse effect on the BKV-BPP Power Joint Venture, and thus on our business, financial condition, results of operations,

cash flows and ability to pay dividends on our common stock. Additionally, by using derivative instruments to economically hedge exposure to changes in power prices, we could limit the benefit we would receive from increases in the power prices, which could have an adverse effect on our financial condition. For example, as of September 30, 2022, we had unrealized losses of approximately $3.0 million on two HRCOs as a result of increased power pricing. In the event BKV-BPP Power is not able to satisfy its obligations under the HRCO, it must purchase power at prevailing market price to satisfy the HRCO. Likewise, increases in power pricing could limit the benefit we receive under HRCOs and result in losses. Either such event could have a material adverse effect on the BKV-BPP Power Joint Venture, and thus on our business, financial condition, results of operations, cash flows and ability to pay dividends on our common stock.

All derivative instruments, other than those that meet the normal purchase and normal sale scope exception, are recorded at fair market value in accordance with GAAP and are included in our consolidated balance sheets as assets or liabilities. The fair values of our derivative instruments are adjusted for non-performance risk. Because we do not designate these derivatives as accounting hedges, they do not receive hedge accounting treatment; therefore, all mark-to-market gains or losses, as well as cash receipts or payments on settled derivative instruments, are recognized in our statements of operations. We present total gains or losses on commodity derivatives (for both settled derivatives and derivative positions which remain open) within operating revenues as “Derivatives (losses) gains, net.”

Mark-to-market adjustments of derivative instruments cause earnings volatility but have no cash flow impact relative to changes in market prices until the derivative contracts are settled or monetized prior to settlement. We expect continued volatility in the fair value of our derivative instruments. Our cash flows are only impacted when the associated derivative contracts are settled or monetized by making or receiving payments to or from the counterparty. As of September 30, 2022, the estimated fair value of our commodity derivative instruments was a net liability of $263.6 million, comprised of current assets and current and non-current liabilities. As of September 30, 2021, the estimated fair value of our commodity derivative instruments was a net liability of $366.7 million, comprised of noncurrent assets and current and non-current liabilities. As of December 31, 2021, the estimated fair value of our commodity derivative instruments was a net liability of $104.8 million, comprised of current and noncurrent assets and liabilities. As of December 31, 2020, the estimated fair value of our commodity derivative instruments was a net asset of $10.3 million, comprised of current and noncurrent assets and noncurrent liabilities.

By removing price volatility from a portion of our expected production through December 2023, we have mitigated, but not eliminated, the potential negative effects of changing prices on our operating cash flows for those periods. While mitigating the negative effects of falling commodity prices, these derivative contracts also limit the benefits we would receive from increases in commodity prices above the fixed hedge prices.

Counterparty Credit Risk

We routinely monitor and manage our exposure to counterparty risk related to derivative contracts by requiring specific minimum credit standards for all counterparties, actively monitoring counterparties’ public credit ratings, and avoiding concentration of credit exposure by transacting with multiple counterparties. Our commodity derivative contract counterparties are typically financial institutions with investment-grade credit ratings.

We enter into International Swap Dealers Association Master Agreements (“ISDA”) with each of our derivative counterparties prior to executing derivative contracts. The terms of the ISDA provide, among other things, the Company and the counterparties with rights of set-off upon the occurrence of defined acts of default by either us or counterparty to a derivative contract.

In addition, we utilize an unaffiliated third party to market all of our natural gas production to various purchasers, which consist of credit-worthy counterparties, including utilities, LNG producers, industrial consumers, major corporations and super majors, in our industry. We rely on the credit worthiness of such third party marketer, who collects directly from the purchasers and remits to us the total of all amounts collected on our behalf less their fee for making such sales. See “*Business — Customers and Product Marketing”* and “*Risk Factors — Risks Related to Our Upstream Business and Industry — A substantial percentage of our natural gas and NGL production is gathered, processed, and transported by a single third party and all of our natural gas production is marketed by a single third party*.”

Interest Rate Risks

As of September 30, 2022, our primary exposure to interest rate risk results from our outstanding related party borrowings with BNAC, the Term Loan Credit Agreement and the Revolving Credit Facilities, which have floating interest rates. As of September 30, 2022, we had outstanding borrowings with BNAC of $75.0 million, $130.0 million outstanding borrowings on our credit facilities, and an additional $570.0 million outstanding borrowings under the Term Loan Credit Agreement. The average annualized interest rate incurred on our outstanding borrowings during the nine months ended September 30, 2022 was approximately 6.2%. We estimate that a 1.0% increase in the applicable average interest rates for the nine months ended September 30, 2022 would have resulted in an immaterial increase in interest expense.

As of December 31, 2021, we had outstanding borrowings with BNAC of $166.0 million under the $116 Million Loan Agreement and the $50 Million Loan Agreement. As of December 31, 2021, we had no outstanding borrowings under the OCBC Credit Facility. The average annualized interest rate incurred on the BNAC borrowings during the year ended December 31, 2021 was approximately 5.4%. We estimate that a 1.0% increase in the applicable average interest rates for the year ended December 31, 2021 would have resulted in an immaterial increase in interest expense.

INDUSTRY

We primarily produce natural gas from our owned and operated upstream businesses, which we expect to achieve net zero Scope 1 and Scope 2 emissions by the end of 2025. The company was founded on acquiring and producing natural gas and we have expanded into a total of four business lines: natural gas production, natural gas gathering, processing and transportation, power generation and CCUS. We formally launched our CCUS business, BKV dCarbon Ventures, in March 2022, and then, in June 2022, we reached FID and entered into a definitive agreement with EnLink in connection with our first high concentration CCUS project in the Barnett, which we refer to as the Barnett Zero Project. Subsequently, in October 2022, we reached internal FID on our second CCUS project, which we refer to as the Cotton Cove Project. In addition, we expect to continuously identify and evaluate additional CCUS projects. CCUS projects and the sector generally are in their early stages and continue to evolve since the 2015 Paris Climate Agreement (the "Paris Agreement") drew global commitment to delivering a net-zero emission economy.

Our CCUS business and all of our CCUS projects are in the early stages of development and while we have reached FID and entered into definitive agreements with respect to the Barnett Zero Project and reached internal FID for the Cotton Cove Project, we have not reached FID or executed any definitive agreements with respect to the other ten potential projects we have identified above and may not be able to reach agreement on terms acceptable to us, or to achieve our projected timeline for commercial operations. In addition, the development of our CCUS business is expected to require material capital investments, and the commercial viability of our CCUS projects depends, in part, on certain financial and tax incentives provided by the U.S. federal government. In particular, we must meet certain wage and apprenticeship requirements in order to qualify for enhanced Section 45Q tax credits, the details of which have not yet been released and are to be included in future guidance. For more information about the risks involved in our CCUS business, see "*Risk Factors — Risks Related to Our CCUS Business*." In addition, we continue to evaluate the potential expansion of our integrated energy platform into retail power connectivity, while monitoring the potential impact the LNG industry may have on our business.

Carbon Capture, Utilization and Sequestration

CCUS involves the capture of CO_2 emissions and the processing of such emissions for reuse or permanent storage in subsurface geological formations, and is recognized as a primary means of reducing CO_2 emissions from large-scale energy and industry sources.

To advance the objectives outlined in the Paris Agreement, the United States released goals in 2021 that included delivering a net-zero emission economy by no later than 2050 (and 2035 for the electric power sector). According to the Global CCS Institute, the global CCUS industry must grow by more than a factor of 100 by the year 2050 to achieve Paris Agreement climate targets, equating to approximately 70 to 100 new facilities per year. As of September 2021, approximately 37 Mtpa of capture capacity is operational worldwide across 27 facilities, with an additional approximately 111 Mtpa planned in various development stages across 106 facilities. According to Global CCS Institute's Global Status of CCS 2021 ("Global Status of CCS 2021"), achieving long-term emissions targets will require installed CCUS capacity to increase to over 5,600 Mtpa by 2050 and an estimated capital investment of $655 billion to $1.280 trillion by 2050.

In Energy Technology Perspectives 2020, published by the International Energy Agency ("IEA"), the IEA estimated 80% of industrial facilities and power plants accounting for 85% of emissions are located within 100 kilometers of a potential storage site.

To stimulate investment in CCUS, the US Energy Act of 2020 provided over $6 billion for CCUS research and development programs, and in 2021, the U.S. Treasury and the Internal Revenue Service ("IRS") issued critical guidance on Section 45Q tax credits for carbon capture and storage, expanding its applications to a wider range of CCUS activities. In addition, the Inflation Reduction Act of 2022, which was signed into law on August 16, 2022, provides significant incentives for CCUS investment.

The current CCUS industry can be described as highly fragmented with a wide range of technologies and processes being evaluated for long-term viability across the value chain including capture, separation, compression, liquefaction, transportation, storage and utilization. According to Global Status of CCS 2021,

in the U.S. Midwest and Mid-Continent regions, several CCUS networks have been created to provide shared transportation and storage solutions, benefiting smaller projects that lack vertical integration.

Power Generation

The United States electricity market starts with utility-scale generators that generate electricity from fossil fuels, nuclear energy and renewable energy. Utility scale plants and other renewable energy sources sell electricity to the wholesale market, including electric utility companies, competitive power providers and electricity marketers, who then sell electricity to retail end-users.

The power industry consists of a variety of companies that are engaged in the generation or distribution of power, with most electric utility companies relying on natural gas to generate a portion of their power. According to the IEA, overall demand for electricity decreased during the initial phases of COVID-19, but has since increased as lockdowns subsided and manufacturing activities re-bounded. According to the IEA, global electricity demand rose by 6% in 2021 and is expected to rise by 2.4% in 2022.

In the near future, demand for retail electricity is expected to grow modestly, driven by increased consumption from commercial and industrial customers recovering from the pandemic. As of summer 2022, the IEA expects total U.S. retail sales of electricity to end-use customers to be 0.4% higher than summer 2021, and retail sales to the industrial sector to be 2.8% higher than summer 2021. Short-term demand for electricity can vary with weather conditions and economic shocks, which increases unpredictability. Because long-term demand depends on economic growth and efficiency improvements, the growth of the national economy directly impacts U.S. power consumption.

The sources for U.S. electricity have increasingly consisted of natural gas and renewable energy sources. While coal and nuclear energy sources have been declining, natural gas and renewable sources have been expanding their share of total electricity generation in the United States. According to the IEA, in 2021, natural gas grew to account for the largest share of total utility-scale electricity generating capacity in the United States at 38%, followed by renewables at 27%. According to the IEA, the share of natural gas-based electricity generation more than tripled from 12% in 1990 to 38% in 2021. Given the multi-year highs in natural gas procurement pricing and supply chain constraints, capital spending budgets and customer affordability concerns are expected to increase.

Liquified Natural Gas

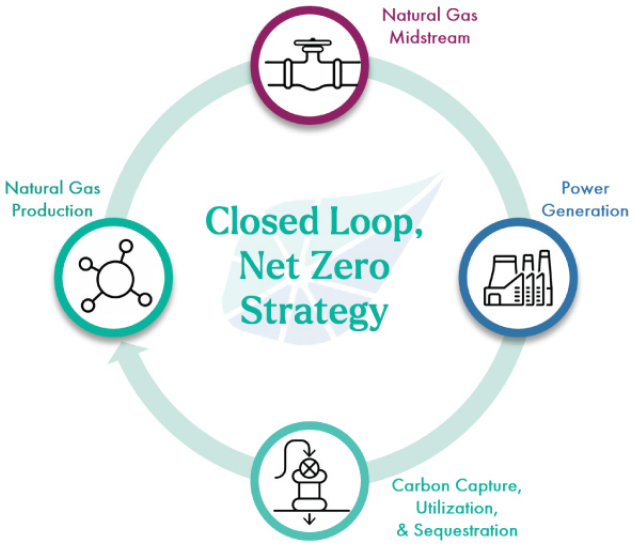
LNG is natural gas in its liquid phase after being super-cooled to -260°F. LNG is primarily used to store and transport gas between markets that have limited natural gas pipeline connectivity. Once natural gas is delivered to an LNG facility, the gas is liquified and shrunken to approximately $1/600^{th}$ of its original volume. Then, the LNG is loaded onto carriers that have large cryogenic tanks onboard for oceanic transport. At receiving terminals, the LNG is transitioned back into its original gaseous state. From there, the regassified gas is either stored or transported via pipeline to end-consumers like power plants, industrial facilities, and residential communities.

In the wake of the Russian invasion of Ukraine, Europe is diversifying its natural gas supply towards LNG alternatives because, according to the IEA, close to 40% of total EU gas demand is sourced from Russia. According to the IEA, the United States has exported 74% of its LNG to Europe though the first four months of 2022, representing more than double the 2021 average of 34%. According to the IEA and FERC, because U.S. LNG utilizations are at all-time highs at 91%, an additional 4 Bcf/d capacity is currently under construction, and another 27 Bcf/d in capacity has been approved by FERC. Current market dynamics have poised LNG for expansion, particularly in the U.S. Gulf Coast, where approximately 90% of the U.S. LNG build is slated, according to FERC. The Barnett region is approximately 300 miles from the Gulf Coast LNG market. Producers are capitalizing on these dynamics by entering into supply agreements that provide a take-or-pay style fixed liquefaction fee for the LNG facility and efficient access to the global gas markets. Upstream producers with exposure to international LNG natural gas prices are expected to provide a baseline of pricing support for Texas and Louisiana-based natural gas producers with pipeline connectivity to the Gulf Coast.

BUSINESS

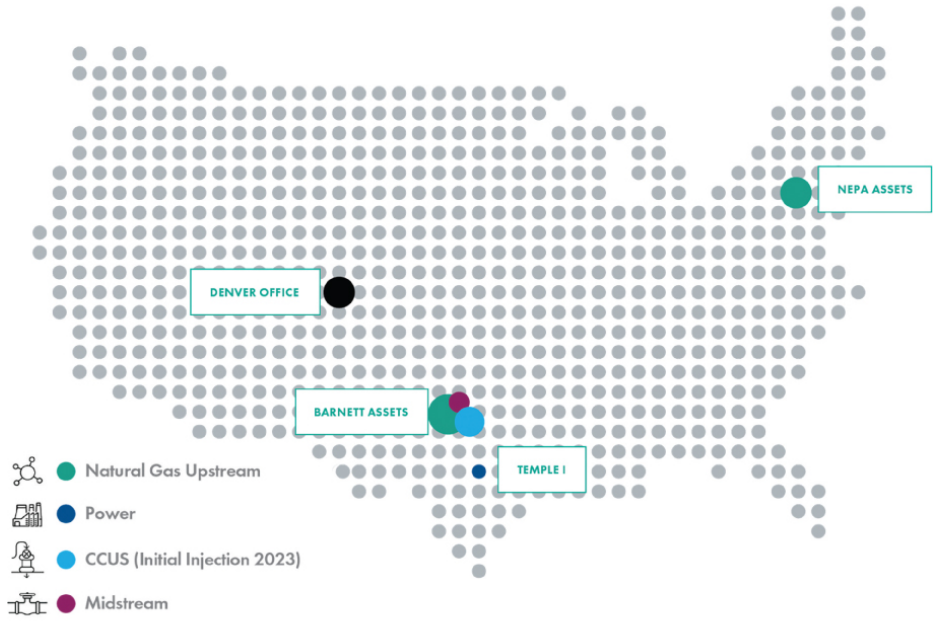
Overview

We are a forward thinking, growth driven energy company focused on creating value for our stockholders through the organic development of our properties as well as accretive acquisitions. Our core business is to produce natural gas from our owned and operated upstream businesses, which we expect to achieve net zero Scope 1 and Scope 2 emissions by the end of 2025. We maintain a "closed-loop" approach to our net zero emissions goal with our four business lines: natural gas production, natural gas gathering, processing and transportation (our "natural gas midstream business"), power generation and carbon capture, utilization and sequestration ("CCUS"). We are committed to building a vertically integrated business to reduce costs and improve overall commercial optimization of the full value chain. For instance, our natural gas production in the Barnett is gathered and transported through our midstream systems, and we are seeking to establish arrangements to supply our natural gas production directly to the BKV-BPP Power Joint Venture. We believe that our differentiated business model, net zero emissions focus, highly experienced management team and technology-driven approach to operating our business will enable us to create stockholder value.



We understand the impact climate change has on our community, the world and future generations, which is why addressing these impacts in how energy is produced is a top priority. In particular, it is one of our core values, "Be One BKV," to create a unified team with a shared vision to achieve our ESG goals.

BKV Assets



Overview of BKV Assets

Natural Gas

	Nine Months Ending Sept '22 Net Production (MMcfe/d)	Sept '22 SEC 1P Reserves (Tcfe)	Producing Wells	Net Acres
Barnett	731	5.4	6,975	468,000
NEPA	133	0.93	408	37,000
Total	864	6.33	7,383	505,000

Operated Midstream

	As of Sept '22 Throughput (Mmcf/d)	Pipeline Miles	Midstream Compressors
Barnett	220	778	65

Power

	Location	Heat Rate Btu/kWh	Capacity MW+
Temple 1	Bell County, TX	6,950	755

Our Operations

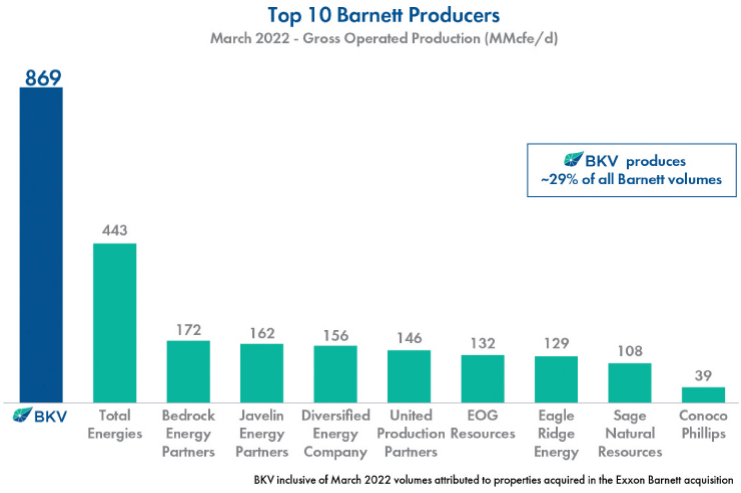
Natural Gas Production

We are engaged in the acquisition, operation and development of natural gas and NGL properties primarily located in the Barnett and in NEPA. Our upstream assets are the core of our business and provide us with substantial Adjusted Free Cash Flow, which we expect will be sufficient to fund our capital expenditure program, enhance stockholder value and support future acquisitions across our four business lines while maintaining a conservative balance sheet. We have a balanced portfolio of low decline producing properties and undeveloped inventory, primarily in the Barnett. Additionally, our focus on operational efficiencies, access to BKV-owned and third-party midstream systems, and proximity to natural gas demand markets along the Gulf Coast and Northeast corridor allow us to generate high margins.

As of September 30, 2022, our total acreage position was approximately 505,000 net acres, 99% of which was held by production. As of September 30, 2022, our net daily production (after giving effect to the Exxon Barnett Acquisition) averaged 864 MMcfe/d, consisting of approximately 79% natural gas and approximately 21% NGLs. As of September 30, 2022, our total proved reserves of 6,332 Bcfe had an estimated 7% year-over-year average base decline rate over the next 10 years. We have more than 10 years of core inventory remaining, with attractive returns, based on a 1 to 1.5 rigs per year pace, including 196 proved undeveloped, 162 probable and 150 possible horizontal locations, and 652 proved developed non-producing, 738 probable, and 294 possible refrac candidates. Based on current commodity prices, the capital investment required to hold production flat year-over-year is less than approximately 30% of our annual Adjusted EBITDAX. Adjusted EBITDAX is not a financial measure calculated in accordance with GAAP. See "— *Summary Historical Financial Information — Non-GAAP Financial Measures*" for a description of this measure and a reconciliation to the most directly comparable GAAP measure.

We entered the Barnett in October 2020 with our acquisition of the 2020 Barnett Assets from Devon Energy. On June 30, 2022, we further scaled our Barnett position by acquiring approximately 175,000 net acres, 2,100 operated wells and related upstream, midstream and other assets in the Exxon Barnett Acquisition. As of September 30, 2022, our Barnett acreage position was approximately 468,000 net acres, which is approximately 99% held by production. Our average daily Barnett production of approximately 731 MMcfe/d for the nine months ended September 30, 2022 consisted of 75% natural gas and 25% NGLs. We had an average working interest in our operated wells in the Barnett of approximately 96.1% as of September 30, 2022 and an Effective NRI in the Barnett of approximately 80.37%.

We are the largest natural gas producer by gross operated volume in the Barnett. Based on information published by the TRRC, the chart below illustrates our gross operated production volumes in the Barnett (including the Exxon Barnett Acquisition), which represent approximately 29% of the total Barnett production, and nearly double that of the next largest producer in the Barnett for the month of March 2022.



We entered NEPA in 2016 and have subsequently scaled our position through 12 acquisitions. As of September 30, 2022, our acreage position was approximately 37,000 net acres, which is approximately 94% held by production. Our average net daily production of 133 MMcfe/d for the nine months ended September 30, 2022 consisted entirely of natural gas. We had an average working interest in our operated wells in NEPA of 89%, as of September 30, 2022.

Natural Gas Midstream

Through our ownership in midstream systems, we are engaged in the gathering, processing and transportation of natural gas (which we refer to as our natural gas midstream business) that supports our upstream assets and third-party producers in the Barnett and NEPA. Our midstream assets improve our overall corporate returns by enhancing our margins and lowering our break-even operating costs while allowing us to manage the timing, development and optimization of production of our upstream assets. In the Barnett, as of September 30, 2022, approximately 220 MMcf/d of our gross production (approximately 29% of our total gross Barnett production) was gathered and processed by our owned Barnett midstream system, which includes approximately 778 miles of gathering pipeline, 65 midstream compressors and one amine processing unit. Additionally, our owned Barnett midstream system has over 200 MMcf/d in unutilized pipeline and processing capacity, providing room to increase throughput (from our own production and for third-party volumes) while maintaining optimal operating pressure with limited additional capital investment required. We also believe we have ample dedicated capacity on third party midstream systems for our expected production and future development. In NEPA, as of September 30, 2022, we had an approximate 29.4% non-operated ownership interest in a midstream system, which is operated by subsidiaries of Repsol, with throughput of approximately 174 MMcf/d, and we separately own and operate approximately 16 miles of natural gas gathering pipelines, 14 miles of freshwater distribution pipelines and six gas compression units.

Power Generation

We have a 50% ownership interest in the BKV-BPP Power Joint Venture, which owns Temple I, a newly-constructed, modern combined cycle gas and steam turbine power plant located in the Electric Reliability Council of Texas (“ERCOT”) North Zone in Temple, Texas. The remaining 50% interest is owned by BPPUS, a wholly owned subsidiary of Banpu Power and an affiliate of our sponsor, Banpu. Temple I has an annual average power generation capacity of 755 MW and delivers power to customers on the ERCOT power network in Texas. Temple I is among the most efficient generators supplying power to ERCOT, with a baseload design heat rate of approximately 6,950 Btu/kWh, which is well below the ERCOT CCGT average. Temple I’s modern technology enables it to respond to rapidly changing market signals in real time by minimizing congestion risk and ensuring the highest operational readiness during the time when electricity consumption peaks (in winter and summer), making it well-suited to serve the various needs of the ERCOT market. We expect our power generation assets will be synergistic with our base upstream business. In the near term, we will seek to establish midstream contracts that allow us to supply our own natural gas directly to Temple I and its firm intrastate natural gas storage service at the Bammel storage facility. Supplying our own natural gas to Temple I will reduce gas transportation costs and create reciprocal natural hedges for both businesses via vertical integration. Additionally, we leverage our existing organization to provide marketing, engineering, finance, accounting and other administrative services to the BKV-BPP Power Joint Venture for an annual fee plus expenses. In addition, the BKV-BPP Power Joint Venture is in the process of developing a retail marketing business to sell electricity to commercial, industrial, and residential retail customers in Texas through its wholly owned subsidiary, BKV-BPP Retail, LLC, and has recently received the necessary approvals from the Public Utility Commission of Texas and ERCOT to do so. We intend to continue to build out our power generation business through opportunistic acquisitions of power generation assets and to expand into retail power, which would enable us to ultimately provide net zero wellhead-to-household energy to the end-consumer.

Carbon Capture, Utilization and Sequestration

Through our CCUS business, we aim to reduce man-made GHG emissions by capturing CO_2 emitted in connection with natural gas activities, whether from our own operations or third party operations, as well as from other energy and industrial sources. Our process involves capturing CO_2 before it is released into

the atmosphere and then compressing the captured CO_2 and transporting it via pipeline to sites where it can be injected into UIC wells. Although we formally launched our CCUS business in March 2022 with the establishment of BKV dCarbon Ventures, we have been evaluating project opportunities and developing our CCUS business for over 20 months. The development of our CCUS business has progressed rapidly, supported by internal engineering, business development and regulatory professionals, along with academics and CCUS-focused partnerships. We believe that with a continued and timely execution of our business plans, we will begin generating positive CCUS business returns via tax credits and other tax benefits by the end of 2023, and we expect to begin generating positive Adjusted EBITDAX in 2025. We currently expect to be capable of funding our entire CCUS business with cash flows from operations, as well as from a variety of external sources, at our discretion, which may include joint ventures, project-based equity partnerships and federal grants.

We seek to execute CCUS projects with attractive standalone economics for high, medium and low CO_2 concentration streams that contribute to our goals of the full elimination and/or offset of the Scope 1 and 2 emissions in our owned and operated upstream businesses by the end of 2025 and of the Scope 1, 2 and 3 emissions from our owned and operated upstream businesses by the early 2030s. We estimate that our owned and operated upstream Scope 1 and 2 emissions were approximately 2.2 Mtpy CO_2e as of September 30, 2022 and that our owned and operated upstream Scope 1, 2 and 3 emissions were approximately 16.1 Mtpy CO_2e as of September 30, 2022. See "*— Path to Net Zero Emissions*" below for a description of how we estimate our Scope 1, 2 and 3 emissions. Additionally, we have identified twelve potential CCUS projects that we believe are commercially viable based on economics supported by Section 45Q tax credits and that we believe can be completed by 2029 in order to achieve our Scope 1, 2 and 3 emissions goals. Of these twelve identified projects:

- we have reached FID and entered into definitive agreements with respect to the Barnett Zero Project and reached internal FID for the Cotton Cove Project, which have a combined forecasted sequestration volume of approximately 0.27 Mtpy CO_2e by the end of 2024;
- three are NGP projects that we anticipate reaching FID by December 31, 2023 and, if FID is approved, achieving forecasted sequestration volume of approximately 1.39 Mtpy CO_2e by the end of 2025;
- three are higher concentration industrial projects that we anticipate reaching FID by the end of 2023 and, if FID is approved, achieving first sequestration between 2026 and 2029 and which have a combined forecasted sequestration volume of approximately 14.5 Mtpy CO_2e; and
- four other CCUS projects are under evaluation that have a combined forecasted sequestration volume of approximately 13.24 Mtpy CO_2e.

In addition, we expect to continuously identify and evaluate additional CCUS projects. While the aggregate forecasted volume of carbon capture and sequestration from our twelve identified potential CCUS projects is approximately 30 Mtpy CO_2e, which is more than our current Scope 1, 2 and 3 emissions from our owned and operated upstream businesses, we do not anticipate achieving an aggregate yearly volume of sequestration of 30 Mtpy CO_2e by the early 2030s and there can be no guarantee that we will be able to execute and complete any of the twelve identified CCUS projects (or any other CCUS projects) with sufficient volumes of CO_2e sequestration to achieve our Scope 1, 2 and 3 emissions goals on the timelines we anticipate. Our CCUS business and all of our CCUS projects are in the early stages of development and while we have reached FID and entered into definitive agreements with respect to the Barnett Zero Project and reached internal FID for the Cotton Cove Project, we have not reached FID or executed any definitive agreements with respect to the other ten potential projects we have identified above and may not be able to reach agreement on terms acceptable to us, or to achieve our projected timeline for commercial operations. In addition, the development of our CCUS business is expected to require material capital investments, and the commercial viability of our CCUS projects depends, in part, on certain financial and tax incentives provided by the U.S. federal government. In particular, we must meet certain wage and apprenticeship requirements in order to qualify for enhanced Section 45Q tax credits, the details of which have not yet been released and are to be included in future guidance. For more information about the risks involved in our CCUS business, see "*Risk Factors — Risks Related to Our CCUS Business.*"

Barnett Zero Project

In June 2022, we reached FID and entered into a definitive agreement in connection with our first high concentration CCUS project in the Barnett with EnLink. This CCUS project, which we refer to as the Barnett Zero Project, will separate CO_2 from substantially all of our EnLink-gathered natural gas production. In the Barnett Zero Project, EnLink will transport our natural gas produced in the Barnett to its natural gas processing plant in Bridgeport, Texas, where the CO_2 waste stream will be captured, compressed and then sequestered via our nearby injection well. We expect the Barnett Zero Project to achieve an average sequestration rate of up to approximately 185,000 metric tons of CO_2e per year. We estimate this initial CCUS project will represent more than 8% of our estimated Scope 1 and 2 emissions from our owned and operated upstream businesses, with the first injection scheduled for the second half of 2023. Following commencement of commercial operations of our project with EnLink, we intend to use this project as a prototype for modular projects that can be repeated and quickly scaled.

Cotton Cove Project

On October 18, 2022, BKV dCarbon Ventures reached internal FID to develop our second CCUS project in the Barnett. This CCUS project, which we refer to as the Cotton Cove Project, will separate, dispose of, and geologically sequester CO_2 generated as a byproduct of our natural gas production in the Barnett and will utilize our newly acquired BKV Midstream assets to do so. We estimate the Cotton Cove Project will geologically sequester up to approximately 45,000 metric tons of CO_2e per year initially, which we expect will increase to an average of up to approximately 82,350 metric tons of CO_2e per year by the end of 2024 through ongoing well development in the area. We currently estimate the total investment required by us for the Cotton Cove Project to be between approximately $14.0 and $24.0 million. We intend to own or hold the source, the capture, the transportation pipeline and the lease to the pore space with respect to this project. We are targeting commencement of CO_2 sequestration activities by the first half of 2024, subject to our ability to secure all required permits, at which point we expect this project will be the second of our current modular line of identified potential NGP projects under evaluation as described above. As part of the Cotton Cove Project, we also seek to pilot, and then scale, post-combustion carbon capture technology that would allow us to sequester up to an additional approximately 250,000 metric tons per year of captured CO_2e from low concentration emissions from within our BKV Midstream operations. As part of this process, we intend to utilize compressor waste heat to reduce energy requirements and cost. We expect this project will offset our current Scope 1 and 2 annual emissions from our owned and operated upstream businesses by approximately 4% by 2025. Although the Barnett Zero Project and the Cotton Cove Project represent approximately 8% and 4%, respectively, of our estimated Scope 1 and 2 emissions from our owned and operated upstream businesses, the emissions reductions from these two projects combined represent approximately 0.27 Mtpy CO_2e, or 45% of our remaining Scope 1 and 2 emissions after taking into account the expected reductions from our "Pad of the Future" program, emissions and leak surveys, and installation of solar power (estimated to be approximately 0.61 Mtpy CO_2e), bringing us closer to our goal of reaching net zero Scope 1 and 2 emissions across our owned and operated upstream businesses by the end of 2025. See "— *Path to Net Zero Emissions.*"

BKVerde

In August 2022, we entered into a development agreement with Verde CO2, an independent carbon capture and sequestration developer and operator, to identify, evaluate and develop additional CCUS projects throughout the United States. We believe our agreement with Verde CO2 will expand our CCUS and GHG emissions reduction efforts as we seek to decarbonize industrial point sources of various sizes through carbon capture and permanent sequestration. As of November 17, 2022, we have paid $8.3 million to Verde CO2 under the development agreement. We currently expect to invest up to $250.0 million over the next three years to fund efforts by BKVerde, a subsidiary of BKV dCarbon Ventures, to efficiently identify and evaluate feasible CCUS projects, and to execute on those projects. We expect to fund BKVerde through BKV's cash flow from operations. See "— *Recent Developments — CCUS Project Development with Verde CO2.*"

Additional Projects

In addition to the Barnett Zero Project and the Cotton Cove Project, we have identified three potential NGP projects that we expect to reach FID by year end 2023. A significant portion of the carbon capture

infrastructure and midstream infrastructure necessary to execute these potential NGP projects already exists. Therefore, if approved at FID, and assuming we are able to execute definitive agreements on the terms and timeline we believe are obtainable, we expect these projects to start sequestration operations before December 31, 2025. We expect these three NGP projects to have individual sequestration volumes of approximately 0.29, 0.5 and 0.6 Mtpy CO_2e, respectively, and a combined aggregate sequestration volume of approximately 1.39 Mtpy CO_2e. The volume of forecast sequestration from these projects, together with approximately 0.27 Mtpy CO_2e expected to be sequestered by the Barnett Zero Project and the Cotton Cove Project (all together having a combined forecast sequestration volume of approximately 1.66 Mtpy CO_2e), would be capable of offsetting more emissions by December 31, 2025 than our remaining Scope 1 and 2 emissions from our owned and operated upstream businesses (estimated to be approximately 0.61 Mtpy CO_2e, after taking into account the expected reductions from our "Pad of the Future" program, emissions and leak surveys, and installation of solar power). See "— *Path to Net Zero Emissions.*" However, we have not reached FID or entered into definitive agreements for any of these three additional NGP projects and we may not complete all or any of these three additional NGP projects by December 31, 2025, in which case, we may not be able to achieve our goal of net zero Scope 1 and 2 emissions from our owned and operated upstream businesses by the end of 2025.

We are currently evaluating and have begun commercial discussions with respect to seven additional CCUS projects. Three of these seven additional CCUS projects are potential industrial projects that we anticipate will reach FID by the end of 2023. If approved at FID, and assuming definitive agreements are timely executed containing terms we believe are obtainable, we expect to initiate sequestration operations between 2026 and 2029. We expect these three potential industrial CCUS projects to have a combined aggregate sequestration volume of approximately 14.5 Mtpy CO_2e. We anticipate that the remaining four potential CCUS projects may reach FID during or after 2024. If approved at FID, and assuming definitive agreements are timely executed containing terms we believe are obtainable, we expect such projects to begin sequestration operations between 2026 and 2029. We expect these four potential CCUS projects to have a combined aggregate sequestration volume of approximately 13.24 Mtpy CO_2e. These seven potential CCUS projects have a combined forecasted sequestration volume of approximately 27.74 Mtpy CO_2e. We believe that we will be able to complete a sufficient number of these or other CCUS projects in order to meet our Scope 1, 2 and 3 emissions goals by the early 2030s. See "— *Path to Net Zero Emissions*" for a more detailed description of how we anticipate reaching our Scope 1, 2 and 3 emissions goals.

We estimate the aggregate investment required by us to offset all of our Scope 3 emissions through a sufficient number of the identified potential CCUS projects and associated carbon credits, to be between approximately $1.3 billion and $1.8 billion over the next seven to ten years. We expect to be capable of funding this investment cost through our cash flows from operations, as well as a variety of external sources, at our discretion, which may include joint ventures, project-based equity partnerships and federal grants. We are able to moderate the capital required to fund our CCUS business, as our CCUS business model provides flexibility for us to selectively invest in only the sequestration component of a project or in the capture, transportation and sequestration components, depending on the scope of the project. In addition, we anticipate that some of the project costs will be borne by third party investors in these projects, including emitters, landowners and other stakeholders.

We believe we can achieve our goal of net zero Scope 1, 2 and 3 emissions for our owned and operated upstream businesses by the early 2030s if we are able to complete the minimum number of these identified CCUS projects having a sufficient forecasted volume of carbon capture to offset those emissions on the timeline and upon terms that we believe are obtainable. However, large scale CCUS projects are subject to numerous risks and uncertainties, including reaching definitive agreements with third parties and obtaining necessary permits and other regulatory approvals, and we may be unable to execute on some or all of these projects on the timeline we anticipate, on terms acceptable to us or at all, in which case, we may not be able to achieve our net zero emissions goals on the timelines we have established.

To help us achieve our goal of becoming a leader in CCUS, we established a steering committee that includes two engineers renowned for their work in the development of CCUS projects: Dr. Paitoon (P.T.) Tontiwachwuthikul (Professor of Industrial & Process Systems Engineering & Fellow, Canadian Academy of Engineering) and Dr. Malcolm A. Wilson (Program Director, CO2 Management, Office of Energy & Environment (OEE), Adjunct Professor of Engineering and Graduate Studies). These individuals are

professors at the University of Regina, a leading carbon capture research institution, and each has been engaged in CCUS for over 30 years.

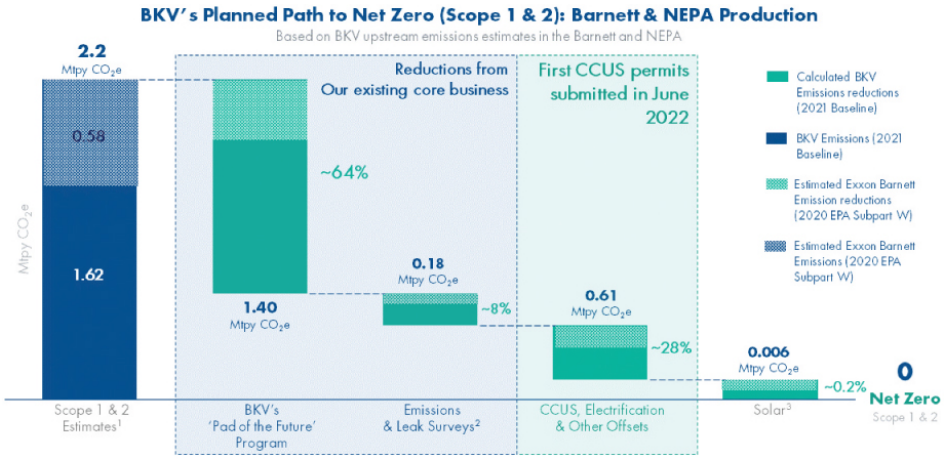
For more information on our CCUS business, see " *Business — Overview — Our Operations — Carbon Capture, Utilization and Sequestration," and "Business — Our Operations — Carbon Capture, Utilization and Sequestration*."

Path to Net Zero Emissions

We estimate that our owned and operated upstream Scope 1 and 2 emissions were approximately 2.2 Mtpy CO_2e as of September 30, 2022. Our estimates are based on information with respect to our operated assets in the Barnett and NEPA through fiscal year 2021 and reported by BKV pursuant to the Subpart W requirements of the federal Clean Air Act GHG reporting program regulations of the EPA and supplemented with additional inventories that are not required to be reported under Subpart W, as well as 2020 Subpart W emission information submitted by XTO Energy, Inc. for the assets acquired in the Exxon Barnett Acquisition. We will further evaluate these estimates as a part of our combined Subpart W submission for calendar year 2022 and will factor in additional inventory efforts performed during 2022. These estimates fluctuate throughout the year and will be updated on an annual basis to reflect any changes in inventory, production throughput, and emissions reduction retrofits or equipment modifications.

We estimate that our owned and operated upstream Scope 3 emissions were approximately 13.9 Mtpy CO_2e as of September 30, 2022. Our Scope 3 GHG emissions are currently estimated in accordance with IPIECA's "Sustainability reporting guidance for oil and gas industry", dated March 2020, specifically for Scope 3 emissions as estimated per Category 11 (Use of Sold Product). Scope 3 emissions estimated using source Category 11 represent the majority of Scope 3 emissions from our operations with minor contributions from other source categories. Additionally, our estimated Scope 3 emissions calculations assume that all natural gas produced is combusted and does not account for other potential end use of natural gas. Scope 3 mass emissions are calculated using the EPA's prescribed emissions factors for the speciated natural gas (methane and ethane) as well as NGLs assuming Y-grade NGLs. CO_2e emissions are estimated using AR4 Global Warming Potentials, similar to those used by the EPA. Our projected Scope 3 CO_2e emissions are estimated at an approximated year-end production volume of 900 million standard cubic feet net equivalent per day of gas, with an approximate split of 80% natural gas (95% methane and 5% ethane) and 20% NGLs. Our NGL constituents are estimated based on average constituent NGL barrel. Allocating the entire 900 million standard cubic feet net equivalent per day towards combustion as the end use, applying suitable combustion emission factors from the EPA, and using AR4 GWPs, Scope 3 emission from our owned and operated upstream operations are estimated to be approximately 13.9 Mtpy CO_2e. We currently engage third party consultants to develop, estimate and review our Scope 3 emissions.

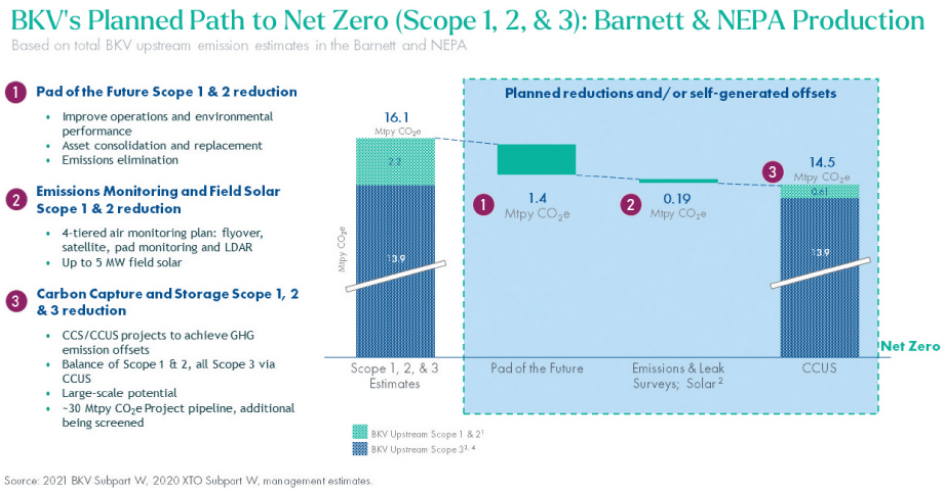
The charts below reflect (i) our owned and operated upstream Scope 1 and 2 emissions estimates as of September 30, 2022, including Scope 1 and 2 emissions estimates from the Exxon Barnett Acquisition, and (ii) our owned and operated upstream Scope 3 emissions estimates as of September 30, 2022, including Scope 3 emissions estimates from the Exxon Barnett Acquisition. These two charts also reflect our intended path to net zero Scope 1 and 2 emissions by the end of 2025 and net zero Scope 1, 2 and 3 emissions by the early 2030s, in each case, for our owned and operated upstream businesses. We intend to achieve these goals through our "Pad of the Future" emissions reductions, emissions and leak surveys, and installing solar power and executing CCUS projects.



(1) Scope 1 and 2 calculated emissions are based on 545 MMscf/d production volume for 2021 BKV Subpart W in the Barnett, 167 MMscf/d production volume for 2021 BKV Subpart W in NEPA, and 352 MMscf/d production volume with respect to the acquired Exxon Barnett assets based on 2020 Subpart W submissions.

(2) Emissions surveys to accomplish a one-to-two month leakage review period versus 12-month period which must have regulatory updates (current proposed OOOO.b,c) to include continuous flyover/satellite technology sensitivities.

(3) Installation of a 2.5 MW to 5 MW solar farm. We have obtained permits for 2.5 MW and are in the process of obtaining permits for the remaining 2.5 MW.



Source: 2021 BKV Subpart W, 2020 XTO Subpart W, management estimates.

(1) Scope 1 and 2 calculated emissions are based on 545 MMscf/d production volume for 2021 BKV Subpart W in the Barnett, 167 MMscf/d production volume for 2021 BKV Subpart W in NEPA, and 352 MMscf/d production volume with respect to the acquired Exxon Barnett assets based on 2020 Subpart W submissions.

(2) Emissions surveys to accomplish a one-to-two month leakage review period versus 12-month period which must have regulatory updates (current proposed OOOO.b,c) to include continuous flyover/satellite technology sensitivities. Installation of a 2.5 MW to 5 MW solar farm. We have obtained permits for 2.5 MW and are in the process of obtaining permits for the remaining 2.5 MW.

(3) Scope 3 calculated emissions are based on an estimated net production rate of approximately 900 MMscfe/d (approximately 730 MMscf/d of gas and 28,000 Bbl/day of NGLs).

(4) Scope 3 calculated emissions are estimated assuming fuel-based usage of all produced natural gas and NGLs. Approximately 58% of NGLs are assumed to be combusted for fuel while 100% of all natural gas produced is assumed to be combusted for fuel. Scope 3 emissions estimation methodology is therefore considered to be conservative.

Planned Path to Net Zero (Scope 1 and 2)

Our "Pad of the Future" program implements pad level design improvements to reduce pad level usage of natural gas, reduce GHG emissions, and maintain operational continuity. As of September 30, 2022, we had implemented elements of our "Pad of the Future" on approximately 2,200 of our existing wells, thereby eliminating an aggregate of approximately 0.51 Mtpy CO_2e in GHG emissions from commencement in the fourth quarter of 2021 through such date. These reductions are calculated by using our pneumatic and other pad inventories and such emissions are factored to be eliminated once the system has been converted from natural gas supplied to compressed air or electric. We expect to implement elements of our "Pad of the Future" program on more than 6,000 of our existing wells by the end of 2025 for an aggregate estimated cost of approximately $36.9 million. Once this expansion is completed, we expect to eliminate an aggregate of approximately 1.40 Mtpy CO_2e, or approximately 64%, of the currently estimated annual Scope 1 and 2 emissions from our owned and operated upstream businesses.

Our leak detection and repair emissions monitoring program involves continuous ground-based instrument monitoring, satellite-based monitoring, aerial flyovers, and on the ground leak detection and repair inspections. In addition, we expect to install a 2.5 MW to 5 MW solar farm, which is scheduled to begin generating power in the second quarter of 2023. We have obtained permits for 2.5 MW and are in the process of obtaining permits for the remaining 2.5 MW. For every 1,000 kilowatt-hours of electricity produced by an eligible solar facility, one SREC is awarded. For a solar facility to be credited with that SREC, the system must be certified and registered by state agencies. The solar farm is expected to generate enough SRECs that, when combined with our leak detection and repair emissions monitoring program, is expected to eliminate or offset approximately 0.18 Mtpy CO_2e in GHG emissions.

Further, as discussed under "— *Carbon Capture, Utilization and Sequestration*" above, we believe that the Barnett Zero Project and the Cotton Cove Project, together with the three additional NGP projects that we have identified, are capable of offsetting more than the approximately 0.61 Mtpy CO_2e of the Scope 1 and 2 emissions from our owned and operated upstream businesses that we currently estimate will remain after taking into account the expected reductions from our "Pad of the Future" program, emissions and leak surveys, and installation of solar power. Although no definitive agreements have been entered into with respect to any of these additional NGP projects, we expect all three to reach FID by year end 2023. A significant portion of the carbon capture infrastructure and midstream infrastructure necessary to execute these potential NGP projects already exists. Therefore, if approved at FID, and assuming we are able to execute definitive agreements on the terms and timeline we believe are obtainable, we expect these projects to start sequestration operations before December 31, 2025. We expect these three NGP projects to have individual sequestration volumes of approximately 0.29, 0.5 and 0.6 Mtpy CO_2e, respectively, and a combined aggregate sequestration volume of approximately 1.39 Mtpy CO_2e. The volume of forecast sequestration from these projects, together with approximately 0.27 Mtpy CO_2e expected to be sequestered by the Barnett Zero Project and the Cotton Cove Project (all together having a combined forecast sequestration volume of approximately 1.66 Mtpy CO_2e), would be capable of offsetting more emissions by December 31, 2025 than our remaining Scope 1 and 2 emissions from our owned and operated upstream businesses (estimated to be approximately 0.61 Mtpy CO_2e, after taking into account the expected reductions from our "Pad of the Future" program, emissions and leak surveys, and installation of solar power). However, we have not reached FID or entered into definitive agreements for any of these additional potential CCUS projects and have not reached FID with respect to any of them. If we are unable to complete any of these three

additional CCUS projects by December 31, 2025, we may not be able to achieve our goal of net zero Scope 1 and 2 emissions from our owned and operated upstream businesses by the end of 2025.

Planned Path to Net Zero (Scope 1, 2 and 3)

We also aspire to offset the Scope 3 emissions impact of our owned and operated upstream businesses by the early 2030s, which we estimate to be approximately 13.9 Mtpy CO_2e as of September 30, 2022. As discussed in "— *Carbon Capture, Utilization and Sequestration,* " above, we have identified twelve potential CCUS projects that we believe are commercially viable, including the Barnett Zero Project, the Cotton Cove Project and the three potential NGP projects, that we estimate have a combined forecasted volume of carbon capture and sequestration of approximately 30 Mtpy CO_2e (which is more than our current Scope 1, 2 and 3 emissions from our owned and operated upstream businesses). However, there can be no guarantee that we will be able to execute and complete any of these identified CCUS projects. If we are not able to complete CCUS projects having a sufficient forecast volume of carbon capture to offset our Scope 1, 2 and 3 emissions on the timeline and upon terms that we believe are obtainable, we may not be able to achieve our goal of net zero Scope 1, 2 and 3 emissions from our owned and operated upstream businesses by the early 2030s. Large scale CCUS projects are subject to numerous risks and uncertainties and there can be no guarantee that we will be able to achieve our net zero Scope 1, 2 and 3 emissions goal.

In addition, although we believe our current path to net zero will be sufficient to reduce emissions related to our existing production, the future growth of our natural gas production, midstream and power assets will result in additional CO_2e emissions. We believe our approach to reducing the emissions of our direct operations is repeatable and scalable. Through continued investment and expansion of our "Pad of the Future" program, our emissions and leak surveys as well as additional CCUS and solar projects, we believe will be able to eliminate and/or offset any such additional emissions resulting from our continued growth.

Business Our CCUS business and all of our CCUS projects are in the early stages of development and while we have reached FID and entered into definitive agreements with respect to the Barnett Zero Project and reached internal FID for the Cotton Cove Project, we have not reached FID or executed any definitive agreements with respect to the other ten potential projects we have identified. In addition, the development of our CCUS business is expected to require material capital investments, and the commercial viability of our CCUS projects depends, in part, on certain financial and tax incentives provided by the U.S. federal government. In particular, we must meet certain wage and apprenticeship requirements in order to qualify for enhanced Section 45Q tax credits, the details of which have not yet been released and are to be included in future guidance. Our ability to establish large scale CCUS projects is subject to numerous risks and uncertainties, including reaching definitive agreements with third parties and obtaining necessary permits and other regulatory approvals, and we may be unable to execute on some or all of these projects on the timeline we anticipate, on terms acceptable to us or at all, in which case, we may not be able to achieve our net zero emissions goals on the timelines we have established. For more information about the risks involved in our CCUS business, see "*Risk Factors — Risks Related to Our CCUS Business*."

Business Strategy

Our strategy is to create value for our stockholders by managing and growing our integrated asset base and focusing on our net zero objectives. Our strategy has the following principal elements:

- **Deliver robust returns to stockholders.** We intend to prioritize delivering strong returns to our stockholders through our dividend policy and focus on creating stockholder value. See "*Dividend Policy*." We believe our operational expertise in successfully drilling and refracturing wells, acquiring and integrating assets purchased at attractive valuations and maintaining financial discipline will underpin our ability to meet our stockholder return goals. Our integrated businesses and natural gas-weighted, low-decline PDP reserves collectively reduce our downside risk while providing asymmetric upside returns from the confluence of commodity price uplift potential, operational improvement and development opportunities, and future accretive acquisition opportunities. The payment of any future dividends on our common stock will be at the discretion of our board of directors and may vary significantly from quarter to quarter and may be zero. Any determination to pay dividends and the amount of any such dividends will depend on, among other factors, the restrictions under our

Term Loan Credit Agreement and the Revolving Credit Agreement, as described under " *Dividend Policy*." See "*Risk Factors — Risks Related to the Offering and Our Common Stock.* "

- **Optimize the value of our core businesses.** We utilize technology and data analysis to enhance our assets and operations, which we believe improves operational efficiencies, reduces our emissions and helps us realize our operational and financial goals as we continue to scale our business. For example, our "Pad of the Future" program, which includes conversion of natural gas-powered instrument pneumatics to compressed air-powered instruments on existing pads, combined with emission and leak surveys, reduces our GHG emissions by 72%, based on current Scope 1 and 2 emissions from production in our owned and operated natural gas upstream business. Our "Pad of the Future" application also improves pad efficiencies and operating revenue. As of the year ended December 31, 2021, employing technology and operational excellence, we reduced our lease operating costs in the Barnett by 14% since October 2020, and in NEPA by 26% since January 2019, based on prior 12-month rolling averages. Additionally, our refrac and long lateral drill programs have allowed us to organically grow our reserves base. As of September 30, 2022, our Barnett refrac program has added 491 Bcfe of proved reserves since its inception in early 2021, with an estimated 516 Bcfe of probable reserves and 167 Bcfe of possible reserves, at an average of approximately $0.70/Mcfe finding and development costs during 2021. This refrac program employs specifically designed perforating technology and a suite of innovative refrac techniques, as well as advanced refrac designs and diversion methods to maximize reserve recovery and economics from legacy Barnett wells. Our Barnett new well drilling program has added 1.1 Tcfe of proved reserves since our entry into the Barnett, with a total estimate of approximately 669 Bcfe of probable reserves and 360 Bcfe of possible reserves. By combining our reserves into a growing asset base with vertically integrated components, we believe we can enhance margins and create a "closed loop" business that reduces Scope 1 and 2 emissions in our owned and operated upstream businesses and captures margin across the value chain. Estimates of probable and possible reserves are inherently imprecise and are more uncertain than proved reserves but have not been adjusted for risk due to that uncertainty, and therefore they may not be comparable with each other and should not be summed either together or with estimates of proved reserves. For more information regarding the presentation of probable and possible reserves, see "*Business — Preparation of Reserve Estimates and Internal Controls.* "
- **Grow through opportunistic, synergistic acquisitions.** A significant element of our business strategy is gaining scale through accretive acquisitions. We have a track record of growth through acquisitions, which we believe have been at attractive valuations. Since 2016, we have completed 19 acquisitions and two CCUS partnerships, resulting in greater than a 100% compound annual growth rate of Adjusted EBITDAX as of September 30, 2022. We believe our business model, management team experience and application of technology enable us to quickly and efficiently integrate additional upstream, midstream and power assets into our business.
- **Maintain a disciplined financial strategy.** We believe we can execute on our business plan and grow our business while continuing to generate substantial Adjusted Free Cash Flow. We target a Maintenance Reinvestment Rate of less than 30% and an Upstream Reinvestment Rate of less than 40%. We are focused on our goal of maintaining a conservative financial profile, with a long-term leverage target of less than 1.0x Total Net Leverage Ratio. Although we may allow our leverage ratio to exceed our target in connection with a strategic acquisition, we would seek to return our leverage level to below 1.0x as soon as reasonably possible thereafter through Adjusted Free Cash Flow and, if needed, reduced activity levels. To support the generation of future Adjusted Free Cash Flow, we have a policy of hedging approximately 25% to 60% of our production volumes over a given 12 to 24-month period. We believe our capital efficient project inventory, low-decline natural gas production and multiple, integrated business lines will provide consistent returns through varying business cycles. We intend to apply our cash flows to manage our indebtedness in line with our leverage target, fund our capital expenditure program, enhance stockholder value and execute opportunistic acquisitions across our four business lines. Adjusted EBITDAX is not a financial measure calculated in accordance with GAAP. See "— *Summary Historical Financial Information — Non-GAAP Financial Measures*" for a description of this measure and a reconciliation to the most directly comparable GAAP measure.

- **Focus on our net zero objectives.** We seek to apply our integrated business model, CCUS projects, and carbon-negative initiatives to realize Scope 1 and 2 net zero upstream owned and operated emissions by the end of 2025. We believe we can achieve this through our "Pad of the Future" emissions reductions program, emissions surveys, installing solar power and executing CCUS projects. We believe that carbon emissions within the United States can be reduced substantially through carbon capture on natural gas production, power plants, processing facilities and other energy and industrial infrastructure. As such, in addition to lowering emissions in our direct operations, CCUS for third parties has become a core focus of our business plan. We expect our CCUS projects to represent a meaningful portion of our budgeted capital expenditures going forward as we advance our long-term goal of eliminating and/or offsetting Scope 3 emissions from our owned and operated upstream businesses.
- **Encourage innovation.** Our distinctive culture encourages innovation with a value-driven focus that feeds into our competitive advantage. For example, our emphasis on the efficient application of modern technology led to the development of our "Pad of the Future" program, our advancements in Barnett refracs and other operational improvements. We intend to continue to develop, retain and add to our already talented, experienced and forward-thinking employees. Our unified team and mantra of "Being a force for good" underpin our core values and provides us with confidence in our ability to successfully manage and grow our business.

Competitive Strengths

We have a number of strengths that we believe will help us successfully execute our business strategy, including:

- **Integrated asset base well positioned for sustainable growth.** Our upstream, midstream and power asset bases reside in geographically concentrated areas with numerous asset acquisition opportunities in close proximity. Our proven ability to successfully negotiate, close and integrate these acquisition opportunities quickly and cost effectively will allow us to continue to grow our portfolio of assets synergistically. We believe that scale and the continued application of technological developments and operational excellence, combined with stable, low-decline production profiles, will continue to generate significant capital efficient development opportunities in the Barnett and NEPA.
- **High quality, low decline assets serving key demand markets.** Through a series of accretive acquisitions we have established an extensive and largely contiguous acreage position in two key markets, the Barnett and NEPA. Our Barnett assets cover approximately 468,000 net acres, with an approximately 80.37% Effective NRI, and are located in close proximity to key Gulf Coast industrial and LNG demand centers. Our NEPA assets consist of 37,000 net acres in one of the most prolific parts of the Marcellus Shale and are located within less than 200 miles to key demand markets in the U.S. Northeast. We believe the geologic, operational and engineering risks associated with our leasehold acreage have been significantly mitigated through historical development activity. Our PDP reserves had an estimated 7% year-over-year average base decline rate over the next 10 years as of September 30, 2022. Additionally, we have an inventory of over 10 years of refrac and new drill locations within our core acreage that give us the flexibility to maintain or slightly grow current production levels, depending on the commodity cycle.
- **Lower emissions energy production.** We are focused on achieving Scope 1 and 2 net zero operational emissions from our owned and operated upstream production of natural gas by the end of 2025. We believe we have a comprehensive ESG program, which is overseen and directed by an executive ESG steering committee. In 2021, we certified our entire NEPA production and, in 2022, we certified a portion of our Barnett production and, in each case, achieved a Gold rating with Project Canary's TrustWell environmental assessment (Project Canary is an environmental certification and ESG data company). This is the second highest rating a company can receive for its production, qualifying the certified portion of our NEPA and Barnett natural gas production as Responsibly Sourced Gas ("RSG"), which we believe could command a premium in the marketplace. In the future, we intend to expand beyond RSG, with aspirations for fully carbon neutral gas sales through net zero Scope 3 from our owned and operated upstream businesses, which we expect can be achieved by the early 2030s. Additionally, we have a plan to achieve net zero Scope 1 and 2 emissions by the end of 2025

based on our “Pad of the Future” emissions reductions, emissions surveys, installing solar power and executing CCUS projects. We believe BKV dCarbon Ventures will be able to capture and sequester at least 1.0 Mtpy CO_2e by the end of 2025, which exceeds the balance of our current Scope 1 and 2 emissions from our owned and operated upstream businesses. However, if we are not able to complete CCUS projects having sufficient forecasted volumes of CO_2e, we may not be able to achieve this goal.

- **Efficient use of capital.** Our deep, high-graded inventory of refrac opportunities coupled with our inventory of new drill locations allow us to create meaningful additional cash flow with comparatively modest additional capital investments. We utilize operational improvements such as operational process and procurement efficiencies, use of existing field infrastructure, innovative and cost-effective refrac techniques and designs (including diversion methods), drilling long laterals in the Barnett, and optimizing available midstream capacity to further maximize our capital efficiency. Through our midstream, power and CCUS business lines, we are capturing margin across the value chain.
- **Well capitalized and conservative balance sheet.** As of September 30, 2022, we had a Total Net Leverage Ratio of 1.3x. Following the completion of this offering, we intend to continue to maintain a strong balance sheet and fund our operations predominantly with internally generated cash flows. We believe that the low decline, predictable nature of our upstream production profile, combined with our hedging plan and reinvestment rate targets, will allow us to successfully meet our leverage goals.
- **High caliber and proven management team.** We maintain a highly experienced and knowledgeable management team with an average of over 25 years of experience among our senior management team. Our leadership team has significant experience managing integrated energy and power assets for large-scale enterprises, including companies such as PTT Exploration and Production Public Company Limited (“PTT Exploration”) and BP p.l.c. (“BP”). Furthermore, our sponsor, Banpu, one of Asia Pacific’s largest integrated energy companies, provides us with unique and valuable insights into optimizing our integrated energy business.

Recent Developments

Barnett Zero CCUS Project with EnLink

On June 8, 2022, BKV dCarbon Ventures and EnLink reached FID to develop our first CCUS project and entered into a definitive agreement to dispose of, and geologically sequester, CO_2 generated as a byproduct of the production of our natural gas in the Barnett and will utilize our newly acquired BKV Midstream assets. This CCUS project, which we refer to as the Barnett Zero Project, will separate CO_2 from substantially all of our EnLink-gathered natural gas production, which we expect to achieve an average sequestration rate of up to approximately 185,000 metric tons of CO_2e per year. We currently estimate the total investment required by us for the Barnett Zero Project to be between $20.0 and $22.0 million. We are targeting commencement of CO_2 sequestration activities by the second half of 2023, subject to our ability to secure all required permits, at which point we expect this project will be one of the first permanent commercial CO_2 disposal and sequestration projects to come online in the United States. We expect this project will offset our current Scope 1 and 2 annual emissions from our owned and operated upstream businesses by approximately 8%, bringing us closer to our goal of reaching net zero Scope 1 and 2 emissions across our owned and operated upstream businesses by the end of 2025.

Exxon Barnett Acquisition

On June 30, 2022, we closed the Exxon Barnett Acquisition of natural gas upstream and associated midstream infrastructure in the Barnett from XTO Energy, Inc. and Barnett Gathering LLC, subsidiaries of Exxon Mobil Corporation, for a total purchase price of $750.0 million, plus additional contingent consideration of up to $50.0 million depending on future natural gas prices. Pursuant to the Exxon Barnett Acquisition, we acquired approximately 175,000 total net acres that are approximately 99% held by production, primarily in Tarrant, Johnson and Parker counties, and additional smaller positions in Jack, Wise, Denton, Erath, Hood and Ellis counties, Texas (our “2022 Barnett Assets”). These upstream assets include low decline wells, ideal for delivering consistent cash flow, and high average working interests of approximately 94% in over 2,100 operated wells. The Exxon Barnett Acquisition also included approximately

778 miles of gathering pipelines and compression and processing midstream infrastructure with, as of September 30, 2022, over 450 MMcf/d of throughput capacity and approximately 26 MMcf/d of third-party production being gathered on the system. In connection with the Exxon Barnett Acquisition, we entered into the Term Loan Credit Agreement (as defined herein) with a syndicate of banks and Bangkok Bank Public Company Limited (New York Branch), as the administrative agent. The Term Loan Credit Agreement includes up to $600.0 million of commitments for term loans to be used solely to fund a portion of the purchase price for the Exxon Barnett Acquisition and other costs and expenses associated with the acquisition. As of November 17, 2022, there was $570.0 million in aggregate principal amount outstanding under the Term Loan Credit Agreement. See "*Management's Discussion and Analysis of Financial Condition and Results of Operations — Liquidity and Capital Resources — Loan Agreements and Credit Facilities — Term Loan Credit Agreement*" for more information.

Amendment to Derivative Agreement

On August 4, 2022, we entered into an amendment to our ISDA Master Agreement with a counterparty to our derivative contracts pursuant to which we agreed to terminate or novate, at our election, at least $100.0 million of our derivative contracts. As of September 9, 2022, we terminated derivative contracts of $100.2 million with the counterparty to satisfy this requirement. In connection with such termination, we are required to make cash payments to the counterparty in an aggregate amount of $100.2 million, of which $30.0 million was paid in September 2022, an additional $30.0 million was paid on October 31, 2022, and the remaining $40.2 million must be paid by November 30, 2022. We intend to make the remaining payment with cash flows from operations. See "*Note 13 — Credit and Other Risk*" to our unaudited condensed consolidated financial statements included elsewhere in this prospectus for additional information regarding this agreement.

CCUS Project Development with Verde CO2

On August 22, 2022, we entered into a development agreement with Verde CO2 to identify, evaluate and develop CCUS projects throughout the United States. We believe our agreement with Verde CO2 will expand our CCUS and GHG emissions reduction efforts as we seek to decarbonize industrial point sources of various sizes through carbon capture and permanent sequestration. Pursuant to the development agreement, Verde CO2 will be responsible for the sourcing, development, performance and ongoing management of such CCUS projects and BKV dCarbon Ventures will provide funding for such projects. As of November 17, 2022, we have paid $8.3 million to Verde CO2 under the development agreement, and we currently expect to invest up to $250.0 million over the next three years to fund efforts by BKVerde, a subsidiary of BKV dCarbon Ventures, to efficiently identify and evaluate feasible CCUS projects, and to execute on those projects. We expect to fund BKVerde through BKV's cash flow from operations.

Revolving Credit Agreement

On August 24, 2022, we entered into a Revolving Credit Agreement (as amended by that certain First Amendment to Revolving Credit Agreement dated as of November 11, 2022, the "Revolving Credit Agreement") with Bangkok Bank Public Company Limited (New York Branch), as the administrative agent and sole initial lender. The Revolving Credit Agreement includes $100.0 million of commitments for unsecured revolving loans used for short-term working capital and operating needs. As of November 17, 2022, $45.0 million was outstanding under the Revolving Credit Agreement. See "*Management's Discussion and Analysis of Financial Condition and Results of Operations — Liquidity and Capital Resources — Loan Agreements and Credit Facilities — Revolving Credit Agreement*" for more additional information regarding the Revolving Credit Agreement.

Cotton Cove CCUS Project

On October 18, 2022, BKV dCarbon Ventures reached internal FID to develop our second CCUS project in the Barnett. This CCUS project, which we refer to as the Cotton Cove Project, will separate, dispose of, and geologically sequester CO_2 generated as a byproduct of our natural gas production in the Barnett and will utilize our newly acquired BKV Midstream assets to do so. We estimate the Cotton Cove Project will geologically sequester up to approximately 45,000 metric tons of CO_2e per year initially, which we

expect will increase to an average of up to approximately 82,350 metric tons of CO_2e per year by the end of 2024 through ongoing well development in the area. We currently estimate the total investment required by us for the Cotton Cove Project to be between approximately $14.0 and $24.0 million. We intend to own or hold the source, the capture, the transportation pipeline and the lease to the pore space with respect to this project. We are targeting commencement of CO_2 sequestration activities by the first half of 2024, subject to our ability to secure all required permits, at which point we expect this project will be the second of our current modular line of identified potential NGP projects under evaluation as described in "— *Carbon Capture, Utilization and Sequestration*." As part of the Cotton Cove Project, we also seek to pilot, and then scale, post-combustion carbon capture technology that would allow us to sequester up to an additional approximately 250,000 metric tons per year of captured CO_2e from low concentration emissions from within our BKV Midstream operations. As part of this process, we intend to utilize compressor waste heat to reduce energy requirements and cost. We expect this project will offset our current Scope 1 and 2 annual emissions from our owned and operated upstream businesses by approximately 4% by 2025. Although the Barnett Zero Project and the Cotton Cove Project represent approximately 8% and 4%, respectively, of our estimated Scope 1 and 2 emissions from our owned and operated upstream businesses, the emissions reductions from these two projects combined represent approximately 0.27 Mtpy CO_2e, or 45% of our remaining Scope 1 and 2 emissions after taking into account the expected reductions from our "Pad of the Future" program, emissions and leak surveys, and installation of solar power (estimated to be approximately 0.61 Mtpy CO_2e), bringing us closer to our goal of reaching net zero Scope 1 and 2 emissions across our owned and operated upstream businesses by the end of 2025. See "— *Path to Net Zero Emissions*."

Letter of Intent with EEMNA

On November 11, 2022, we entered into a non-binding letter of intent with EEMNA to build a framework for verifiable environmental attributes with the use of carbon credits applied to natural gas energy. Under this framework, we intend to measure, reduce and verify emissions using operational technologies, such as continuous emissions monitoring. In addition, we expect to deliver sequestered carbon credits from our CCUS business to EEMNA under this marketing program. Project Canary, an environmental certification and ESG data company, will reconcile sensing technologies and measure, analyze, and report the environmental attributes of the sequestrated carbon to support decarbonization. This initiative strives to provide a market in which an LNG buyer, gas utility, power utility or other end-user can purchase measured and verified sequestrated carbon credits from a single, trusted company. These carbon credits would not apply toward a reduction of our own Scope 1, 2 or 3 owned and operated upstream emissions. We anticipate eventually selling to EEMNA, for marketing to end-users, net zero natural gas that incorporates measured, sequestrated carbon credits derived from our CCUS business.

Our History

In June 2015, our Chief Executive Officer, Chris Kalnin, and Banpu founded our predecessor, BKV O&G, a Delaware partnership developed for oil and gas investments owned primarily by Banpu and managed by Kalnin Ventures LLC, with the goal of creating long-term sustainable value in the energy industry.

In 2016, BKV O&G acquired from Range Resources a 29.4% interest in certain midstream assets and an approximately 24% interest in certain upstream assets in the Marcellus Chaffee Corners area that are operated by Repsol. From 2017 to 2019, BKV completed a series of other accretive acquisitions, including two major acquisitions of upstream and midstream assets in NEPA from Carrizo Oil and Gas and its non-operated partner, Reliance Industries, and BKV O&G devoted its time to strengthening its technological, exploration, production and operational capabilities.

On May 1, 2020, we completed a corporate restructuring in which we converted all of the interests and assets owned by BKV O&G (the "BKV O&G Conversion") and also acquired Kalnin Ventures (the "KV Acquisition"). The BKV O&G Conversion and the KV Acquisition resulted in our formation as a new consolidated corporate entity, BKV Corporation. See "— *The Corporatization Event*" for more information about our corporate restructuring.

In October 2020, we became one of the largest natural gas producers by volume in the Barnett, following our acquisition of more than 289,000 net acres, 3,850 producing operated wells and related

upstream assets in the Barnett from Devon Energy (the "Devon Barnett Acquisition") for a cash purchase price of $570.0 million.

In July 2021, we launched our natural gas-based power generation business with the formation of BKV-BPP Power, a joint venture owned 50% by us and 50% by BPPUS, a wholly owned subsidiary of Banpu Power and an affiliate of our sponsor, Banpu. In November 2021, BKV-BPP Power acquired Temple Generation Intermediate Holdings II, LLC, the owner of 100% of the interests in Temple I, a combined cycle gas turbine and steam turbine power plant located in the ERCOT North Zone in Temple, Texas.

In September 2021, we purchased a non-operated interest spanning over 3,000 net acres from Black Falcon Energy, LLC, a managing company for Jamestown Resources, LLC, Larchmont Resources, LLC and Pelican Energy, LLC in the Barnett and NEPA.

In March 2022, we launched our CCUS business line, BKV dCarbon Ventures, and we reached FID and entered into a definitive agreement in June 2022 in connection with our first CCUS project, the Barnett Zero Project, with EnLink to dispose of, and geologically sequester, CO_2 generated as a byproduct of the production of our EnLink-gathered natural gas in the Barnett. Following commencement of commercial operations of our project with EnLink, we intend to use this project as a prototype for modular projects that can be repeated and quickly scaled.

In June 2022, we consummated the Exxon Barnett Acquisition, which also substantially grew our natural gas midstream business. Pursuant to the Exxon Barnett Acquisition, we acquired approximately 175,000 total net acres and 2,100 operated wells primarily in Tarrant, Johnson and Parker counties, and additional smaller positions in Jack, Wise, Denton, Erath, Hood and Ellis counties, Texas. The Exxon Barnett Acquisition also included the addition of 129 employees and approximately 778 miles of gathering pipelines, compression and processing midstream infrastructure.

In August 2022, we entered into a development agreement with Verde CO2 to identify, evaluate and develop CCUS projects throughout the United States. We believe our agreement with Verde CO2 will expand our CCUS and GHG emissions reduction efforts as we seek to decarbonize industrial point sources of various sizes through carbon capture and permanent sequestration and aligns with our goal to reach net zero owned and operated upstream emissions.

In October 2022, BKV dCarbon Ventures reached internal FID to develop our second CCUS project to dispose of, and geologically sequester, CO_2 generated as a byproduct of the production of our natural gas in the Barnett and will utilize our newly acquired BKV Midstream assets to do so.

In November 2022, we entered into a non-binding letter of intent with EEMNA to build a framework for verifiable environmental attributes with the use of carbon credits applied to natural gas energy. These carbon credits would not apply toward a reduction of our own Scope 1, 2 or 3 owned and operated upstream emissions. We anticipate eventually selling to EEMNA, for marketing to end-users, net zero natural gas that incorporates measured, sequestrated carbon credits derived from our CCUS business.

The Corporatization Event

Prior to May 1, 2020, BKV O&G held 100% of the outstanding equity interests in BKV Chaffee, BKV Chelsea, BKV Operating and BKV Barnett (the "BKV O&G Group"). During this period, Banpu held approximately 97% of BKV O&G's limited partner interests, and Kalnin Capital Partners, L.P. (the "General Partner") held BKV O&G's general partner interest.

On May 1, 2020, Banpu and the General Partner incorporated BKV Corporation and restructured BKV O&G through a contribution by Banpu, the other limited partners and the General Partner of all of the partnership interests in BKV O&G to BKV Corporation in exchange for common stock of BKV Corporation. In addition, Kalnin Ventures, which previously managed BKV O&G, was contributed to BKV Corporation in exchange for BKV Corporation common stock. As a result of these transactions, as of May 1, 2020, the BKV O&G Group and Kalnin Ventures became wholly-owned subsidiaries of BKV Corporation. We refer to this series of transactions collectively as the "Corporatization Event."

Our Relationship with Banpu

BNAC, our majority stockholder, is an indirect, wholly owned subsidiary of Banpu, our ultimate parent company. Immediately prior to this offering, Banpu owned approximately 96.1% of our common stock and will own approximately % at the completion of this offering (or approximately % if the underwriters exercise in full their option to purchase additional shares of our common stock). Banpu has informed us that although it may reduce a portion of its ownership position over time, it intends to remain a long-term stockholder and supporter of BKV. However, Banpu is not obligated to continue to hold all or any portion of its ownership in the Company. If, after this initial public offering, Banpu and its wholly owned subsidiaries cease to own at least 51% of our equity interests, or if they allow any lien to exist on our equity interests that they own, such event will be an event of default under the Term Loan Credit Agreement and the Revolving Credit Agreement. See "*Risk Factors — Risks Related to Our Relationship with Banpu and its Affiliates.*"

Banpu is a multi-billion U.S. dollar market cap energy company publicly traded in Thailand. With nearly four decades of experience in business operations covering 10 countries across the Pacific Rim region and the United States, Banpu is an international versatile energy provider committed to its Greener & Smarter strategy, which prioritizes environmentally sustainable businesses and leverages smart technologies and innovations.

Banpu also owns approximately 78.66% of Banpu Power. Banpu Power is a public company listed on the Stock Exchange of Thailand. Banpu Power is the owner of BPPUS, our 50/50 partner in BKV-BPP Power.

See "*Certain Relationships and Related Party Transactions*" for additional information regarding our relationship with Banpu.

Our Operations

Natural Gas Production

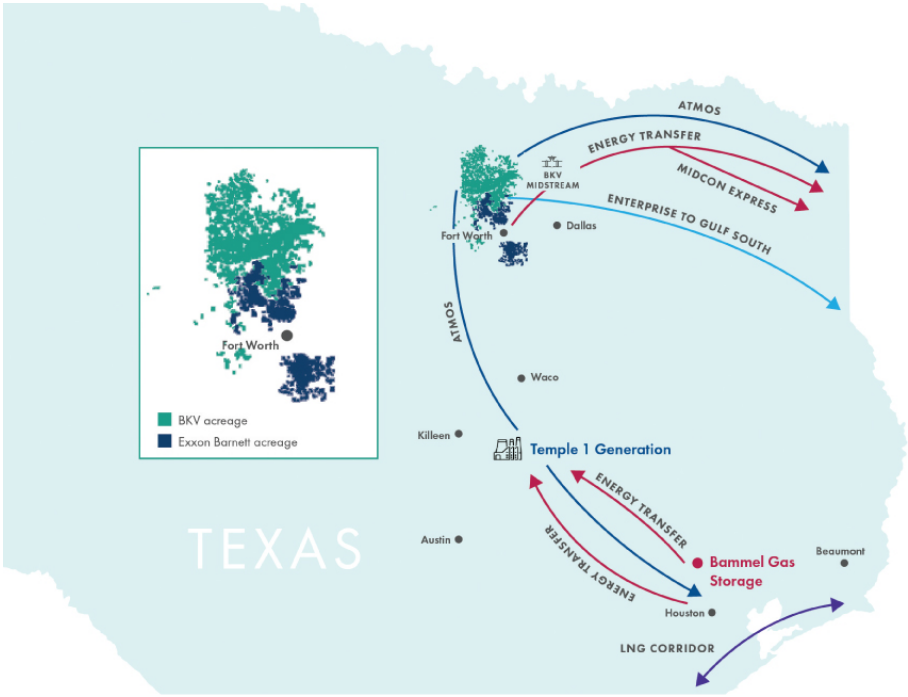
Our Geographic Focus

We are engaged in the acquisition, operation and development of natural gas and NGL properties located primarily in the Barnett (approximately 468,000 net acres) and NEPA (approximately 37,000 net acres) with a combined total company net production of approximately 864 MMcfe/d for the nine months ending September 30, 2022. In addition, we own an aggregate of approximately 4,500 net mineral fee acres located in the Barnett and NEPA. The Barnett has a diversified production stream of natural gas and NGLs located approximately 300 miles from major Gulf Coast industrial centers and LNG export markets. NEPA is composed predominantly of organically rich shale and is generally acknowledged as one of North America's largest and richest sources of natural gas.

Our upstream assets are predominantly located in the Barnett, which is where horizontal drilling was pioneered and which has the advantage of more than 15 years of technological advancements, proximity to demand hubs and a significant amount of midstream and other infrastructure in place. We also enjoy an average 6.5% 10-year Barnett base production decline on a current production base of approximately 731 MMcfe/d. Using modern technologies, we can drill and complete more profitably and successfully with longer laterals, optimal 750 foot down hole well spacing and latest shale fracturing designs. More than a decade of technological advancements since the discovery of the Barnett, combined with significant remaining gas and NGL resources in place, have created a highly capital efficient opportunity to re-stimulate legacy wellbores to meaningfully increase production and enhance recovery factors and reserves. We also have negotiated a midstream contract, covering 44% of our Barnett acreage, that offers incentive gathering and processing rates for new drills and restimulations, enhancing our margins and project economics alike. We entered the Barnett in October of 2020, through our completion of the Devon Barnett Acquisition. As of September 30, 2022, we had 169 proved undeveloped, 143 probable undeveloped and 118 possible horizontal locations and 642 proved developed non-producing, 738 probable and 294 possible horizontal refrac candidates in the Barnett, including those acquired in the Exxon Barnett Acquisition.

We are the largest producer of natural gas in the Barnett, based on publicly reported gross production volume as of March 31, 2022. During the nine months ended September 30, 2022, our Barnett properties, including both operated and non-operated wells, produced 161.0 Bcfe (or an average of 718.6 MMcfe/d). During the year ended December 31, 2021, we produced 190.1 Bcfe (or an average of 520.9 MMcfe/d) from our Barnett properties, including both operated and non-operated wells. We did not drill any of our own operated wells in our Barnett properties during 2021. However, in November 2020, we began a restimulation program to develop economic incremental reserves in existing wellbores and arrest the overall field production decline. In 2021, we led the industry in number of executed horizontal restimulations by completing 213, according to public completion reports.

The image below reflects our Barnett acreage that was acquired in the 2020 Barnett Acquisition (Green) and the Exxon Barnett Acquisition (Blue), with the arrows indicating the direction of flow to existing markets and identifying the respective third parties with which BKV has secured downstream capacities. The image reflects how we are now positioned in the core of the Barnett with transportation to key gulf coast markets. Transportation to the East and the South provide key flexibility and optionality for gas transportation out of the basin. This strategically positions us geographically to utilize existing infrastructure to the gulf without needing to rely on new-build pipelines such as in the Permian and Haynesville.



In NEPA, we have built our position through 12 accretive acquisitions since May 2016. We have an attractive production base comprising approximately 37,000 net acres located primarily in Wyoming, Susquehanna and Bradford counties, Pennsylvania, in one of the most prolific areas of the play. With respect to our operated and non-operated assets in NEPA, our position consists of average 89% working interest and 72% NRI on operated wells that yield 100% lean natural gas. We enjoy a significant non-operated position in NEPA. In addition, we have approximately 27 new well locations for near-term development in NEPA.

We are the eighth largest producer in NEPA, on a gross operated production basis. During the nine months ended September 30, 2022 and the year ended December 31, 2021, we produced 36.4 Bcf (or an average of 133.3 MMcf/d) and 56.1 Bcf (or an average of 153.7 MMcf/d), respectively, from our NEPA

properties, including both operated and non-operated wells. We did not drill any new wells in NEPA in 2021. During the nine months ended September 30, 2022, we drilled five wells in NEPA. However, we utilized a combination of compression projects and drilled but uncompleted (DUC) well completions to slow production declines and optimize production.

The image below reflects our NEPA acreage (Green), which spans the northeast portion of Pennsylvania and is comprised of both operated and non-operated assets, with the arrows indicating the direction of flow to existing markets and identifying the respective third parties with which BKV has secured downstream capacities. Our downstream transportation has the flexibility to move West and South into gulf coast markets via the Tennessee Gas Pipeline as well as into the northeast corridor via the Millenium pipeline while also maintaining intra-basin optionality.

Our Technology-Enabled Business

Our integrated business model allows us to develop, test and deploy new technologies to drive efficiencies across the business and to reduce our own emissions. We leverage technology in two important ways: we utilize our Data Lake and in-house data science team to drive efficiencies and insights across the business and we utilize probabilistic modeling approaches and advance risk management techniques to enhance our decision-making abilities, particularly with regards to potential acquisitions. We employ a technology-focused approach, such as utilization of our proprietary instrument air packages, satellite and perimeter pad emissions monitoring, and advanced production and emissions measurement, to enable methane measurement and mitigation, and emission elimination strategies, that reduce CO_2e emissions across our operations. We estimate an approximate 72% reduction in BKV Scope 1 and 2 CO_2e emissions (inclusive of the Exxon Barnett Acquisition) by the end of 2025 from our 2021 baseline using these technological innovations, based on management estimates. We expect that the balance of our Scope 1 and 2 emissions will be offset by CCUS, solar and other mitigations to achieve our goal of Scope 1 and 2 emissions by the end of 2025 for our owned and operated upstream businesses.

Our operations in the Barnett and NEPA have been increasingly automated through a program called “Autotune,” which is an effort to optimize and automate plunger lift systems to increase production through autonomous dynamic tuning of plunger control inputs. This Autotune method utilizes computer algorithms which toggle and optimize various input and control variables for plunger lift systems to increase production time for an average well as compared to a baseline (based on a manual method of managing plunger input and control variables).

We have implemented our “Pad of the Future” program in our upstream business, with the objectives of converting natural gas-powered instrument pneumatics to compressed air-powered functionality on existing pads, significantly reducing our GHG emissions and improving pad efficiencies and economics. In addition, we have implemented emissions surveys, an advanced four-tiered emissions monitoring and mitigation strategy utilizing specialized surveillance technology. We also are in the process of permitting 2.5 MW of commercial solar power, with plans to install up to 10 MW of commercial solar power within the next three years to offset our Scope 2 emissions from our electricity usage in our upstream operations.

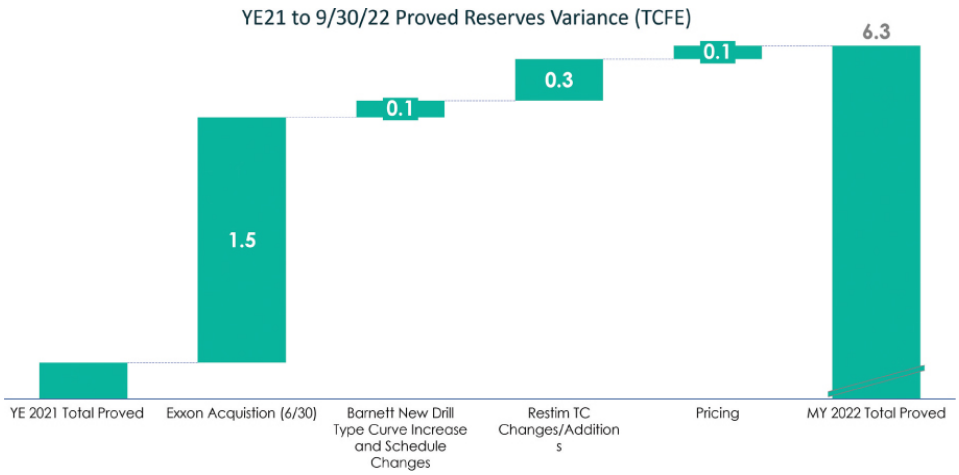
In 2021, we certified our NEPA production and achieved a Gold rating with Project Canary’s TrustWell environmental assessment (Project Canary is an environmental certification and ESG data company). This is the second highest rating a company can receive for its production, qualifying our NEPA natural gas production as RSG, which we believe could command a premium in the marketplace. Through RSG production, we provide reliable and affordable energy, while actively participating in the energy transition. In 2022, we plan to certify a portion of our Barnett assets through Project Canary, and anticipate achieving certification more broadly across our Barnett assets in the future.

Our Reserves

The following summarizes our natural gas and oil properties as of September 30, 2022 and our average net daily production for the nine months ended September 30, 2022, including the properties we acquired in the Exxon Barnett Acquisition.

	September 30, 2022							
	Estimated Total Proved Reserves							
Operating Region	Natural Gas (MMcf)	Natural Gas Liquids (MMBbls)	Oil (MMBbls)	Total (MMcfe)	Average Net Daily Production (MMcfe/d)[1]	Average Reserve Life (years)	Producing Wells	Net Acres
Barnett	4,073,171	220,587	1,743	5,407,155	730.6	20.3	6,975	467,925
NEPA	925,102	—	—	925,102	133.3	19.0	408	36,978
Total	4,998,273	220,587	1,743	6,332,257	863.9	20.1	7,383	504,904

(1) The production rate for the properties acquired in the Exxon Barnett Acquisition was based on management’s review of the historical accounting information with respect to such assets.



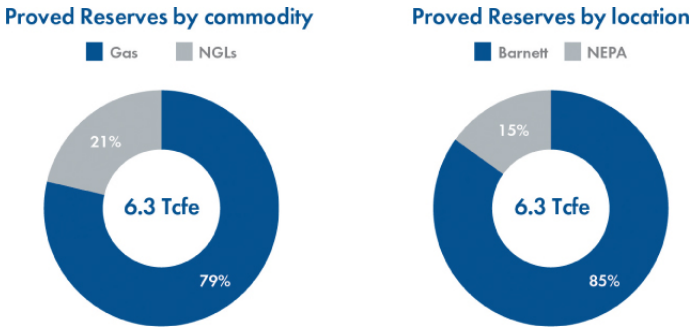
Based on forecasts used in our reserve reports, our PDP reserves as of September 30, 2022 had estimated average five-year and ten-year annual decline rates of approximately 8.1% and 7.0%. As a result of this overall low decline profile of our natural gas and oil assets, coupled with refrac opportunities that are capital efficient projects, we are able to maintain flat production year over year with relatively low reinvestment rate. We believe the combination of our high margin profile and our conservative reinvestment rate approach, supported by our low decline reserves, will allow us to generate significant Adjusted Free Cash Flow to (i) deliver stockholder returns and (ii) opportunistically fund value accretive growth opportunities.

The following table illustrates the weighted average decline profiles and total production in the first nine months of 2022 associated with our proved reserves as of September 30, 2022:

	September 30, 2022					
					Weighted Average Annual PDP Decline[1]	
Operating Region	Estimated Total Proved Reserves (MMcfe)	% Natural Gas	% Natural Gas Liquids	% Oil	Five Year	Ten Year
Barnett	5,407,155	75.3%	24.5%	0.2%	7.3%	6.5%
NEPA	925,102	100%	0%	0%	12.8%	9.9%
Total	6,332,257	78.9 %	20.9 %	0.2 %	8.1 %	7.0 %

(1) Reflects the estimated average year over year decline rates of our base reserves as of September 30, 2022 for the five-year period ending December 31, 2027 and the ten-year period ending December 31, 2032, in each case based on the forecasts used in estimating our proved reserves.

The following table summarizes our proved reserves by commodity and proved reserves by location at September 30, 2022:



The following table illustrates the weighted average decline profiles and total production in 2021 associated with our proved reserves as of December 31, 2021:

	December 31, 2021					
					Weighted Average Annual PDP Decline[1]	
Operating Region	Estimated Total Proved Reserves (MMcfe)	% Natural Gas	% Natural Gas Liquids	% Oil	Five Year	Ten Year
Barnett	3,496,235	71.5%	28.3%	0.2%	7.0%	6.3%
NEPA	945,528	100%	0%	0%	12.4%	9.9%
Total	4,441,763	77.6%	22.3%	0.1%	8.3%	7.2%

(1) Reflects the estimated average year over year decline rates of our base reserves as of December 31, 2021 for the five-year period ending January 31, 2027 and the ten-year period ending January 31, 2032, in each case based on the forecasts used in estimating our proved reserves.

Our Acreage

The following table summarizes our acreage position as of September 30, 2022:

	Developed		Undeveloped		Total	
Operating Region	Gross	Net	Gross	Net	Gross	Net
Barnett[1]	643,008	428,269	41,803	39,656	684,811	467,925
NEPA	61,971	28,162	20,890	8,816	82,862	36,978
Total	704,980	456,432	62,693	48,472	767,673	504,904

The following table summarizes our acreage position as of December 31, 2021:

	Developed		Undeveloped		Total	
Operating Region	Gross	Net	Gross	Net	Gross	Net
Barnett[1]	453,584	261,810	32,120	30,771	485,704	292,582
NEPA	61,971	28,162	20,890	8,816	82,862	36,978
Total	515,555	289,973	53,010	39,587	568,566	329,560

(1) Includes acreage acquired during 2021 from Jamestown Resources, L.L.C., Larchmont Resources, L.L.C., and Pelican Energy, L.L.C., for which acreage the leasehold interest is derived from unit-based assignments and includes 133,470.22 gross and 3,317.69 net developed acres, and no undeveloped acres.

The percentage of our net undeveloped acreage that is subject to lease expiration over the next three years, if such leases are not renewed, is less than 0.03% in 2022, approximately 2.52% in 2023 and 0.40% in 2024.

Our Productive Wells

The following table sets forth our gross and net productive natural gas and oil wells as of September 30, 2022:

	Producing Natural Gas Wells		Producing Oil Wells		Total		Average Working Interest
	Gross	Net	Gross	Net	Gross	Net	
Barnett	5,822	5,597	9	9	5,831	5,606	96.1%
NEPA	142	126	0	0	142	1262	88.9%
Total	5,964	5,724	9	9	5,973	5,733	96.0%
Non-operated Wells:							
Barnett	1,122	95	22	0.1	1,144	96	9.9%
NEPA	266	36	0	0	266	36	14.3%
Total	1,388	132	22	.1	1,410	132	10.8%
Total Wells:							
Barnett	6,944	5,693	31	9	6,975	5,702	83.9%
NEPA	408	163	0	0	408	163	41.0%
Total	7,352	5,855	31	9	7,383	5,864	81.5%

The following table sets forth our gross and net productive natural gas and oil wells as of December 31, 2021:

	Producing Natural Gas Wells		Producing Oil Wells		Total		Average Working Interest
	Gross	Net	Gross	Net	Gross	Net	
Operated Wells:							
Barnett	3,950	3,170	8	6	3,958	3,177	97.8%
NEPA	138	101	0	0	138	101	88.9%
Total	4,088	3,272	8	6	4,096	3,279	
Non-operated Wells:							
Barnett	838	672	8	6	846	679	3.5%
NEPA	256	189	0	0	256	189	13.9%
Total	1094	861	8	6	1102	868	
Total Wells:							
Barnett	4,788	3,843	16	12	4,804	3,856	81.2%
NEPA	394	291	0	0	394	291	39.9%

Drilling, Refrac and Restimulation Activity

During the years ended December 31, 2021 and 2020, we did not have an active drilling rig running in any of our operated properties, and therefore we did not drill any wells on these properties. During this period, we completed a total of six wells that were previously drilled but uncompleted wells in NEPA. During the nine months ended September 30, 2022, we drilled five wells in NEPA and nine wells in the Barnett, each of which constitutes a gross operated well and net operated development well, that, as of September 30, 2022, four wells were completed in Barnett and three wells were completed in NEPA all of which were net productive.

In November 2020, we began a restimulation program in the Barnett to develop economic incremental reserves in existing wellbores and arrest the overall field production decline. In 2021, we led the industry in number of executed horizontal restimulations by completing 213, according to public completion reports. Additionally, as of September 30, 2022, we had 169 proved undeveloped, 143 probable undeveloped and 118 possible horizontal locations and 642 proved developed non-producing, 738 probable and 294 possible horizontal refrac candidates in the Barnett, including those acquired in the Exxon Barnett Acquisition.

Sales Volumes and Unit Prices

The following table summarizes sales volumes, sales prices and production cost information for our net natural gas and production for the nine months ended September 30, 2022 and 2021.

	Nine Months Ended September 30,	
	2022	2021
Sales Volumes		
Barnett:		
Natural gas (MMcf)	115,339.7	96,787.4
Natural gas liquids (MBbl)	7,529.0	6,544.5
Oil (MBbl)	81.8	93.4
Total Barnett (Bcfe)	161.0	136.6
NEPA:		
Natural gas (MMcf)	36,381.6	41,538.9
Natural gas liquids (MBbl)	—	—
Oil (MBbl)	—	—
Total NEPA (Bcfe)	36.4	41.5
Total Company (Bcfe)	197.4	178.2
Average Sales Prices (excluding impact of derivative settlements)		
Barnett:		
Natural gas	$ 6.79	$ 2.95
Natural gas liquids (MBbl)	$ 32.86	$ 23.10
Oil (MBbl)	$ 92.22	$ 58.79
NEPA:		
Natural gas (MMcf)	$ 5.12	$ 1.80
Natural gas liquids (MBbl)	$ —	$ —
Oil (MBbl)	$ —	$ —
Total Company (per Mcf)	$ 6.20	$ 2.90
Average Sales Prices (Including the impact of derivative prices [1])		
Barnett:		
Natural gas	$ 3.07	$ 2.34
Natural gas liquids (MBbl)	$ 28.71	$ 16.65
Oil (MBbl)	$ 92.22	$ 58.79
NEPA:		
Natural gas (MMcf)	$ 5.12	$ 0.54
Natural gas liquids (MBbl)	$ —	$ —
Oil (MBbl)	$ —	$ —
Total Company (per Mcf)	$ 3.87	$ 2.20
Average Production Cost (per Mcfe) [2]		
Barnett	$ 1.42	$ 1.30
NEPA	$ 0.24	$ 0.23
Total Company	$ 1.67	$ 1.53

(1) Impact of derivatives prices excludes $101.3 million of derivative contract terminations.

(2) Excludes natural gas and oil ad valorem and production taxes.

The following table summarizes sales volumes, sales prices and production cost information for our net natural gas and production for the years ended December 31, 2021 and 2020.

	Year Ended December 31,	
	2021	2020
Sales Volumes		
Barnett:		
Natural gas (MMcf)	129,960.0	34,879.1
Natural gas liquids (MBbl)	9,829.3	2,565.2
Oil (MBbl)	123.0	28.6
Total Barnett (Bcfe)	190.1	50.4
NEPA:		
Natural gas (MMcf)	56,095.1	61,279.9
Natural gas liquids (MBbl)	0.0	0.0
Oil (MBbl)	0.0	0.0
Total NEPA (Bcfe)	56.1	61.3
Total Company (Bcfe)	245.8	111.7
Average Sales Prices (excluding impact of derivative settlements)		
Barnett:		
Natural gas (per Mcf)	$ 3.58	$ 1.62
Natural gas liquids (per Bbl)	$ 22.90	$ 4.66
Oil (per Bbl)	$ 61.46	$ 46.67
NEPA:		
Natural gas (per Mcf)	$ 2.34	$ 0.74
Natural gas liquids (per Bbl)	$ 0.00	$ 0.00
Oil (per Bbl)	$ 0.00	$ 0.00
Total Company (per Mcfe)	$ 3.38	$ 1.03
Average Sales Prices (including impact of derivative settlements)		
Natural gas (per Mcf)	$ 2.40	$ 1.87
Natural gas liquids (per Bbl)	$ 16.76	$ 12.57
Oil (per Bbl)	$ 61.46	$ 31.07
Total Company (per Mcfe)	$ 2.52	$ 1.90
Average Production Cost (per Mcfe) [(1)]		
Barnett	$ 1.31	$ 0.36
NEPA	$ 0.23	$ 0.22
Total Company	$ 1.06	$ 0.28

(1) Excludes natural gas and oil ad valorem and production taxes.

Base Production Optimization

We seek to be a leader in safe, efficient and accretive base production management. We are highly focused on flattening decline while minimizing costs all while reducing our environmental footprint. Automation and optimization play a pivotal role in this focused approach. Our plunger automation program, *i.e.*, "Autotune," improves the efficiency of our plunger lift systems, resulting in up to 2% improvement in production. Initiatives like automated equipment actuation and automated water call outs serve to minimize response times and reduce manpower requirements. BKV operates a steady and robust workover program, constantly reviewing candidate wells and maintaining a queue of prioritized jobs that provide economic and accretive production uplift. We operate a fleet of over 700 gas lift and wellhead compression units with real time optimization of this fleet. Ensuring our compressors are optimized for each specific facility allows us to maximize production and reduce costs. Other elements of our base management excellence include

automated data collection and analysis processes, including well reviews, surveillance dashboards, and process change alerts. Additionally, we monitor and mitigate pipeline pressures, evaluate and implement compression and pressure reduction projects jointly with our midstream partners. We seek to prudently manage and lower operating costs through, for example, purchasing and operating our own slickline units, bringing various maintenance activities in-house which are traditionally third party, negotiating and signing longer term supply and vendor contracts, establishing strategic and advantageous procurement partnerships, leveraging basin scale to achieve organizational and purchasing efficiencies, and maintaining an efficient organizational structure with high performing teams.

Natural Gas Midstream

Our natural gas midstream operations support our upstream assets as well as generate incremental revenue via gathering, processing and transportation of third-party production. In the Barnett, we have extensive infrastructure with capacity across the field and limited additional capital required to connect our wells. Our midstream system in the Barnett operates at low pressure with only approximately 50% utilization as of September 30, 2022. In the Barnett, as of September 30, 2022, approximately 220 MMcf/d of our gross production volumes (approximately 29% of our total gross Barnett production) were gathered and processed by our owned Barnett midstream system, with our remaining Barnett production primarily under an agreement with EnLink with no minimum volume commitments. Our owned Barnett midstream system includes approximately 778 miles of gathering pipeline, 64 gas compression units and one amine processing unit.

In NEPA, as of September 30, 2022, our gross operated production volumes were approximately 156 MMcf/d. The volumes flow into third-party gatherers in the following proportions:

- Williams Companies (“Williams”): 54%
- UGI Energy Services Midstream Services (“UGI”): 42%
- Energy Transfer LP (“Energy Transfer”): 4%

Our owned NEPA midstream system includes approximately 16 miles of gas gathering pipelines, 14 miles of freshwater distribution pipelines and six gas compression units. We also have a 29.4% non-operated ownership interest in a Repsol operated midstream system with over 100 miles of gathering pipelines with 450 MMcf/d of capacity and a compression station with approximately 14,000 horsepower. Repsol owns the remaining 70.6% of the system, which has a current throughput of approximately 174 MMcf/d and services both system owner gas and third-party gas.

Gas Gathering & Processing Agreements

The majority of our gross operated production volumes in NEPA are contractually further gathered and treated by three main third parties. As of September 30, 2022, approximately 54%, 42% and 4% of our gross operated volumes in NEPA were further gathered and treated on Williams, UGI, and Energy Transfer gathering systems, respectively. We have secured these services through acreage dedications, pursuant to which current and future production sourced from the specific acreage positions designated in each contract is required to be gathered and treated by each specific entity. Some of our NEPA gas gathering and processing contracts contain limited minimum volume commitment terms (“MVCs”), the earliest of which expire in the first quarter of 2025 and the second quarter of 2029. As of September 30, 2022, such MVCs require us to deliver 36 MMcf/d of natural gas, a majority of which flows into 95 MMcf/d of MVC related the gathering, central delivery point aggregation and intra-basin transport, which currently represents 61% of the gross volumes produced from covered acreage. Overall, the acreage dedication approach, coupled with limited MVCs, provides us strategic flexibility while also securing access to gathering, processing and transportation services. The use of third parties to contractually perform gathering and treating services also negates capital spending requirements for these services and allows us to focus our efforts and capital spend on our core energy and production business.

The terms of these contracts range from 10 and 20 years from original execution date, with an average term of seven years remaining between the various contracts, as of September 30, 2022. The specified rates within these contracts are generally escalated annually subject to a standard Consumer Price Index escalator.

These gathering and treating contracts offer deliverability to intra-basin markets, as well as multiple downstream pipelines that offer access to inter and intra-regional markets. This flexibility ultimately provides sufficient liquidity and market optionality that help facilitate the overall process of maximizing corporate netbacks.

For the assets we acquired in the Devon Barnett Acquisition, approximately 99% of our natural gas is gathered and transported by EnLink through various contracts that govern the services provided for the Bridgeport, Ponder and Jarvis systems. The Bridgeport system consists of both rich and lean gas governed by a market-rate based contract, as amended, with a term expiring in 2033. The gathering and processing fees under the Bridgeport contract contain an incentive mechanism pursuant to which we can achieve lower rates through refractured or new wells. All NGLs under the Bridgeport contract are sold to EnLink at Mont Belvieu pricing subject to a market-based transport and fractionation differential. There are no MVCs associated with the natural gas gathering agreements for the assets we acquired in the Devon Barnett Acquisition.

For the assets we acquired in the Exxon Barnett Acquisition, approximately 90% of our natural gas is gathered and transported through an agreement assigned to our subsidiary, BKV Midstream, through various market-rate based contracts that take lean gas to various delivery points into Energy Transfer's pipeline. All gas currently flows to Energy Transfer, where BKV is under an acreage dedication for its downstream takeaway. We have one MVC related to the assets acquired in the Exxon Barnett Acquisition for less than $1.0 million per year, which MVC is currently unfulfilled and results in immaterial unutilized gathering charges. However, produced gas that can currently flow through this contract and fulfill the MVC has been rerouted and now flows through BKV's (formerly XTO Energy, Inc.'s) owned and operated gathering and compression facilities. The decision to construct the facilities, reroute this gas and strand the MVC-based contract was based upon superior economics and results in lower overall gathering and compression fees, even with the inclusion of the unutilized gathering charges. The MVC-based contract expires in the third quarter of 2024.

Power Generation

We have a 50% ownership interest in the BKV-BPP Power Joint Venture, which owns Temple I, a newly-constructed, modern combined cycle gas and steam turbine power plant located in the ERCOT North Zone in Temple, Texas. The remaining 50% interest is owned by BPPUS, a wholly owned subsidiary of Banpu Power and an affiliate of our sponsor, Banpu.

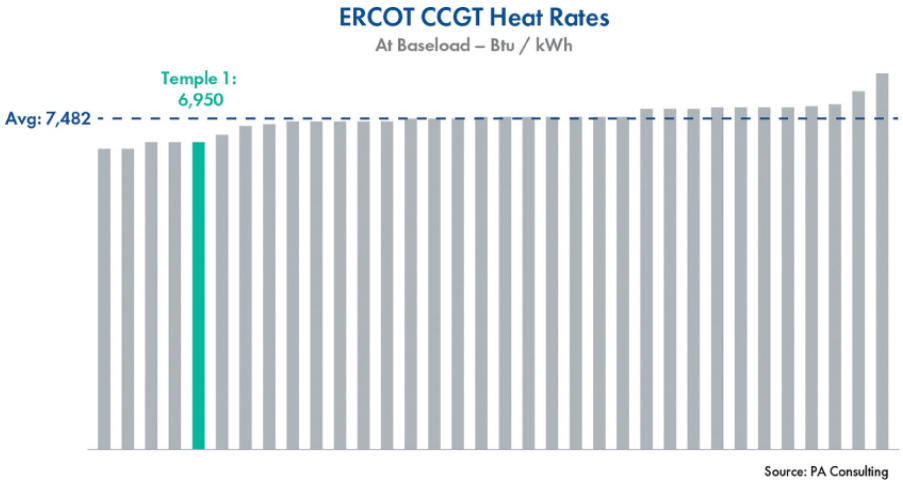
Temple I's power generation output is sold into the competitive wholesale bulk power market managed by ERCOT, Texas' electrical grid operator. ERCOT currently provides electric power to approximately 23 million people in Texas, with its customers using about 85% of the state's electric power. The operating flexibility of the power plant provides significant competitive advantages in the ERCOT market. Temple I can generate and supply the power needs of approximately 750,000 households in central Texas.

Operational since July 2014, Temple I's modern technology enables it to respond to rapidly changing market signals in real time, making it well-suited to serve the various needs of the ERCOT market. Temple I has an average power generation capacity of 755 MW. Key equipment at Temple I includes Siemens natural gas combustion turbine generators and steam turbine generators, as well as Benson heat recovery steam generators. The electrical transmission interconnection at Knob Creek Substation ensures minimal congestion risk. Temple I typically undergoes seasonal maintenance outages in spring and fall to ensure the highest operational readiness during the time when electricity consumption peaks (in winter and summer).

Temple I remained online at full capability during the historic February 2021 Winter Storm Uri and has since implemented incremental upgrades. Temple I has invested over $700,000, with an additional $140,000 in planned expenditures for 2022, to construct winterization enclosures, add insulation, and install heat tracing systems and back-up generators to provide freeze protection around at-risk piping, equipment and instrumentation in the power plant and gas yard. In 2021, a wet compression system was installed to increase the power plant's output while operating in high ambient temperatures. The system allows a larger volume of air to be compressed before being fed into the combustion process along with natural gas, thus increasing generation capacity during summer, the time when the ERCOT market's power demand typically peaks. Temple I deploys modern CCGT technology, which combines the working process of gas

combustion, turbine and steam turbine generation. It is one of the more flexible CCGTs supplying power the ERCOT system due to its ability to achieve 50% production within 10 minutes and full baseload capacity within 30 minutes. Temple I is also among the most efficient generators supplying power to ERCOT, with a baseload design heat rate of approximately 6,950 Btu/kWh, which is well below the ERCOT CCGT average, as shown in the chart below. Equipped with pollution control management systems to maintain low emissions, the power plant's high efficiency and flexible operations helps maintain its competitive position in the ERCOT market.

The following chart summarizes Temple I's realized heat rate as compared to other CCGT in ERCOT.



We expect our power generation assets will be synergistic with our base upstream business. In the near term, we will seek to establish midstream contracts that allow us to supply our own natural gas to Temple I and its firm intrastate natural gas storage service at the Bammel storage facility. Supplying our own natural gas to Temple I will reduce gas transportation costs and create reciprocal natural hedges for both businesses via vertical integration. Additionally, we leverage our existing organization to provide marketing, engineering, finance, accounting and other administrative services to the BKV-BPP Power Joint Venture for an annual fee plus expenses. In addition, the BKV-BPP Power Joint Venture is in the process of developing a retail marketing business to sell electricity to commercial, industrial, and residential retail customers in Texas through its wholly owned subsidiary, BKV-BPP Retail, LLC, and has recently received the necessary approvals from the Public Utility Commission of Texas and ERCOT to do so. We intend to continue to build out our power generation business through opportunistic acquisitions of power generation assets and to expand into retail power, which would enable us to ultimately provide net zero wellhead-to-household energy to the end-consumer.

In addition to 75,000 MMBtu/d of firm transportation services with Energy Transfer and its subsidiaries, Temple I's Bammel storage contract with Energy Transfer provides Temple I up to 2.8 Bcf of natural gas storage capacity, providing daily gas supply operating flexibility. The firm transportation and storage contracts with Energy Transfer and its subsidiaries also grant BKV-BPP Power the option to purchase and store in reserve excess natural gas, which can be released at times when gas prices are potentially higher, such as during seasonal price cycles or times of scarcity. Moreover, the potential to utilize our midstream assets to deliver and optimize natural gas feedstock to the power plant and to expand our CCUS business by sequestering post combustion CO_2 from the power plant are additional vertical integration opportunities that we intend to explore over time.

In addition, we are working with Project Canary, an environmental certification and ESG data company, to assess future development of emissions monitoring for the gas supply and combined-cycle electric production at Temple I and to explore the potential ability to certify reliability and low emissions from wellhead to electron. Furthermore, we believe there is significant opportunity from integrated retail gas

and power offerings directly to end-user customers and we are in the process of building this capability for the future. We believe we can create a differentiated offering to strategic buyers, retail and industrial customers.

BKV-BPP Power Limited Liability Company Agreement

Temple I is owned by Temple Generation Intermediate Holdings II, LLC, which is owned 100% by BKV-BPP Power, which, in turn, is owned 50% by us and 50% by BPPUS, a wholly owned subsidiary of Banpu Power. See "— *Our Relationship with Banpu*" and "*Certain Relationships and Related Party Transactions*."

We and BPPUS are each a party to the BKV-BPP Power LLC Agreement governing the BKV-BPP Power Joint Venture, which, among other things, provides that a general manager appointed by the BKV-BPP board will have the power to manage and administer the business and affairs of BKV-BPP Power, subject to specified matters reserved for approval by the BKV-BPP board. The appointment and removal of the general manager must be approved by both the BKV-BPP board and BPPUS. Transfer or encumbrance of a party's interest in BKV-BPP Power is permitted without prior approval of the other party or the BKV-BPP board. However, no transfer will be permitted if the transfer: (A) would subject BKV-BPP Power to U.S. federal securities law reporting requirements, (B) would cause BKV-BPP Power to lose its status as a U.S. partnership for federal income tax purposes or will cause BKV-BPP Power to be classified as a "publicly traded partnership," (C) would violate, give rise to a default under or cause any payment to become due under any credit agreement, guaranty, or similar credit document or any other material contract to which BKV-BPP Power or any affiliate is bound, or (D) occurs prior to the repayment by BKV-BPP Power of all loans and other amounts outstanding under the term loans.

In the event that either party admits in writing that it is unable to perform its obligations (including any obligation to provide additional capital contributions) under the BKV-BPP Power LLC Agreement, the non-defaulting party will be entitled to (i) sell the assets of the joint venture and dissolve the joint venture on reasonable terms deemed acceptable to the BKV-BPP board, (ii) obtain specific performance of the non-defaulting party's obligations, and/or (iii) exercise any other right or remedy provided in law or in equity.

The BKV-BPP board will determine the amount and timing of distributions of operating cash flow (which will be done no less frequently than once per quarter) and net capital proceeds (which will be distributed within three business days after becoming available for distribution). All distributions will be made on a pro-rata basis to us and BPPUS. As of September 30, 2022, no distributions have been made by BKV-BPP Power. Additional cash capital contributions will be required to be made by us and by BPPUS on a pro-rata basis upon 30 days written notice either by us or by BPPUS; provided that the additional contributions must be expended on items included in the annual approved budget, items in response to an emergency in the event that BKV-BPP Power does not have sufficient cash reserves to address such emergency, or any other matter approved by the BKV-BPP board. Otherwise, neither us nor BPPUS will be required to provide additional capital contributions without consent.

Major decisions and significant activities of BKV-BPP Power are reserved for approval by at least a majority of the members of the BKV-BPP board, such as, among other things, any merger, consolidation, amalgamation, conversion of BKV-BPP or any of its subsidiaries, into another form or entity or other business combination of any nature, wind up, the dissolution, liquidation, commencement or any filing or petition for a voluntary bankruptcy, reorganization, debt arrangement involving BKV-BPP Power, any plan to or initial sale of BKV-BPP Power or other equity interests to the public, any amendments, restatements or revocations of its organizational documents, execution, amendment or termination of a material contract, and any amendment to or deviation from the dividend policy of the joint venture or any of its subsidiaries. Under the terms of the BKV-BPP Power LLC Agreement:

- we do not have the power to unilaterally cause BKV-BPP Power to make distributions;
- we may be required to make additional capital contributions to fund items approved in the annual budget or other matters approved by the board of BKV-BPP Power at the request of BPPUS, which would reduce the amount of cash otherwise available for dividend payments by us on our common stock or require us to incur additional indebtedness; and

- BKV-BPP Power may incur additional indebtedness in an amount greater than $1,500,000 if approved by the board of BKV-BPP Power, which debt payments would reduce the amount of cash that might otherwise be available for distributions to us.

Carbon Capture, Utilization and Sequestration

BKV dCarbon Ventures is our business that is focused on driving CCUS innovations and project development. Through our CCUS business, we aim to reduce man-made GHG emissions by capturing CO_2 emitted in connection with natural gas activities, whether from our own operations or third party operations, as well as from other energy and industrial sources. Our process involves capturing CO_2 before it is released into the atmosphere and then compressing the captured CO_2 and transporting it via pipeline to sites where it can be injected into UIC wells. Although we formally launched our CCUS business in March 2022 with the establishment of BKV dCarbon Ventures, we have been evaluating project opportunities and developing our CCUS business for over 20 months. The development of our CCUS business has progressed rapidly, supported by internal engineering, business development and regulatory professionals, along with academics and CCUS-focused partnerships. We believe that with a continued and timely execution of our business plans, we will begin generating positive CCUS business returns via tax credits and other tax benefits by the end of 2023, and we expect to begin generating positive Adjusted EBITDAX in 2025. We currently expect to be capable of funding our entire CCUS business with cash flows from operations, as well as from a variety of external sources, at our discretion, which may include joint ventures, project-based equity partnerships and federal grants.

We seek to execute CCUS projects with attractive standalone economics for high, medium and low CO_2 concentration streams that contribute to our goals of the full elimination and/or offset of the Scope 1 and 2 emissions in our owned and operated upstream businesses by the end of 2025 and of the Scope 1, 2 and 3 emissions from our owned and operated upstream businesses by the early 2030s. We estimate that our owned and operated upstream Scope 1 and 2 emissions were approximately 2.2 Mtpy CO_2e as of September 30, 2022 and that our owned and operated upstream Scope 1, 2 and 3 emissions were approximately 16.1 Mtpy CO_2e as of September 30, 2022. See "— *Path to Net Zero Emissions*" below for a description of how we estimate our Scope 1, 2 and 3 emissions. Additionally, we have identified twelve potential CCUS projects that we believe are commercially viable based on economics supported by Section 45Q tax credits and that we believe can be completed by 2029 in order to achieve our Scope 1, 2 and 3 emissions goals. Of these twelve identified projects:

- we have reached FID and entered into definitive agreements with respect to the Barnett Zero Project and reached internal FID for the Cotton Cove Project, which have a combined forecasted sequestration volume of approximately 0.27 Mtpy CO_2e by the end of 2024;
- three are NGP projects that we anticipate reaching FID by December 31, 2023 and, if FID is approved, achieving forecasted sequestration volume of approximately 1.39 Mtpy CO_2e by the end of 2025;
- three are higher concentration industrial projects that we anticipate reaching FID by the end of 2023 and, if FID is approved, achieving first sequestration between 2026 and 2029 and which have a combined forecasted sequestration volume of approximately 14.5 Mtpy CO_2e; and
- four other CCUS projects are under evaluation that have a combined forecasted sequestration volume of approximately 13.24 Mtpy CO_2e.

In addition, we expect to continuously identify and evaluate additional CCUS projects. While the aggregate forecasted volume of carbon capture and sequestration from our twelve identified potential CCUS projects is approximately 30 Mtpy CO_2e, which is more than our current Scope 1, 2 and 3 emissions from our owned and operated upstream businesses, we do not anticipate achieving an aggregate yearly volume of sequestration of 30 Mtpy CO_2e by the early 2030s and there can be no guarantee that we will be able to execute and complete any of the twelve identified CCUS projects (or any other CCUS projects) with sufficient volumes of CO_2e sequestration to achieve our Scope 1, 2 and 3 emissions goals on the timelines we anticipate. Our CCUS business and all of our CCUS projects are in the early stages of development and while we have reached FID and entered into definitive agreements with respect to the Barnett Zero Project and reached internal FID for the Cotton Cove Project, we have not reached FID or executed any definitive

agreements with respect to the other ten potential projects we have identified above and may not be able to reach agreement on terms acceptable to us, or to achieve our projected timeline for commercial operations. In addition, the development of our CCUS business is expected to require material capital investments, and the commercial viability of our CCUS projects depends, in part, on certain financial and tax incentives provided by the U.S. federal government. In particular, we must meet certain wage and apprenticeship requirements in order to qualify for enhanced Section 45Q tax credits, the details of which have not yet been released and are to be included in future guidance. For more information about the risks involved in our CCUS business, see "*Risk Factors — Risks Related to Our CCUS Business.* "

Barnett Zero Project

In June 2022, we reached FID and entered into a definitive agreement in connection with our first high concentration CCUS project in the Barnett with EnLink. This CCUS project, which we refer to as the Barnett Zero Project, will separate CO_2 from substantially all of our EnLink-gathered natural gas production. In the Barnett Zero Project, EnLink will transport our natural gas produced in the Barnett to its natural gas processing plant in Bridgeport, Texas, where the CO_2 waste stream will be captured, compressed and then sequestered via our nearby injection well. We expect the Barnett Zero Project to achieve an average sequestration rate of up to approximately 185,000 metric tons of CO_2e per year. We estimate this initial CCUS project will represent more than 8% of our estimated Scope 1 and 2 emissions from our owned and operated upstream businesses, with the first injection scheduled for the second half of 2023. Following commencement of commercial operations of our project with EnLink, we intend to use this project as a prototype for modular projects that can be repeated and quickly scaled.

Cotton Cove Project

On October 18, 2022, BKV dCarbon Ventures reached internal FID to develop our second CCUS project in the Barnett. This CCUS project, which we refer to as the Cotton Cove Project, will separate, dispose of, and geologically sequester CO_2 generated as a byproduct of our natural gas production in the Barnett and will utilize our newly acquired BKV Midstream assets to do so. We estimate the Cotton Cove Project will geologically sequester up to approximately 45,000 metric tons of CO_2e per year initially, which we expect will increase to an average of up to approximately 82,350 metric tons of CO_2e per year by the end of 2024 through ongoing well development in the area. We currently estimate the total investment required by us for the Cotton Cove Project to be between approximately $14.0 and $24.0 million. We intend to own or hold the source, the capture, the transportation pipeline and the lease to the pore space with respect to this project. We are targeting commencement of CO_2 sequestration activities by the first half of 2024, subject to our ability to secure all required permits, at which point we expect this project will be the second of our current modular line of identified potential NGP projects under evaluation as described above. As part of the Cotton Cove Project, we also seek to pilot, and then scale, post-combustion carbon capture technology that would allow us to sequester up to an additional approximately 250,000 metric tons per year of captured CO_2e from low concentration emissions from within our BKV Midstream operations. As part of this process, we intend to utilize compressor waste heat to reduce energy requirements and cost. We expect this project will offset our current Scope 1 and 2 annual emissions from our owned and operated upstream businesses by approximately 4% by 2025. Although the Barnett Zero Project and the Cotton Cove Project represent approximately 8% and 4%, respectively, of our estimated Scope 1 and 2 emissions from our owned and operated upstream businesses, the emissions reductions from these two projects combined represent approximately 0.27 Mtpy CO_2e, or 45% of our remaining Scope 1 and 2 emissions after taking into account the expected reductions from our "Pad of the Future" program, emissions and leak surveys, and installation of solar power (estimated to be approximately 0.61 Mtpy CO_2e), bringing us closer to our goal of reaching net zero across our Scope 1 and 2 owned and operated upstream businesses by the end of 2025. See "— *Path to Net Zero Emissions*."

BKV Verde

In August 2022, we entered into a development agreement with Verde CO2, an independent carbon capture and sequestration developer and operator, to identify, evaluate and develop additional CCUS projects throughout the United States. We believe our agreement with Verde CO2 will expand our CCUS and GHG emissions reduction efforts as we seek to decarbonize industrial point sources of various sizes

through carbon capture and permanent sequestration. As of November 17, 2022, we have paid $8.3 million to Verde CO2 under the development agreement.We currently expect to invest up to $250.0 million over the next three years to fund efforts by BKVerde, a subsidiary of BKV dCarbon Ventures, to efficiently identify and evaluate feasible CCUS projects, and to execute on those projects. We expect to fund BKVerde through BKV's cash flow from operations. See "— *Recent Developments — CCUS Project Development with Verde CO2*."

Additional Projects

In addition to the Barnett Zero Project and the Cotton Cove Project, we have identified three potential NGP projects that we expect to reach FID by year end 2023. A significant portion of the carbon capture infrastructure and midstream infrastructure necessary to execute these potential NGP projects already exists. Therefore, if approved at FID, and assuming we are able to execute definitive agreements on the terms and timeline we believe are obtainable, we expect these projects to start sequestration operations before December 31, 2025. We expect these three NGP projects to have individual sequestration volumes of approximately 0.29, 0.5 and 0.6 Mtpy CO_2e, respectively, and a combined aggregate sequestration volume of approximately 1.39 Mtpy CO_2e. The volume of forecast sequestration from these projects, together with approximately 0.27 Mtpy CO_2e expected to be sequestered by the Barnett Zero Project and the Cotton Cove Project (all together having a combined forecast sequestration volume of approximately 1.66 Mtpy CO_2e), would be capable of offsetting more emissions by December 31, 2025 than our remaining Scope 1 and 2 emissions from our owned and operated upstream businesses (estimated to be approximately 0.61 Mtpy CO_2e, after taking into account the expected reductions from our "Pad of the Future" program, emissions and leak surveys, and installation of solar power). See "— *Path to Net Zero Emissions.*" However,we have not reached FID or entered into definitive agreements for any of these three additional NGP projects and we may not complete all or any of these three additional NGP projects by December 31, 2025, in which case, we may not be able to achieve our goal of net zero Scope 1 and 2 emissions from our owned and operated upstream businesses by the end of 2025.

We are currently evaluating and have begun commercial discussions with respect to seven additional CCUS projects. Three of these seven additional CCUS projects are potential industrial projects that we anticipate will reach FID by the end of 2023. If approved at FID, and assuming definitive agreements are timely executed containing terms we believe are obtainable, we expect to initiate sequestration operations between 2026 and 2029. We expect these three potential industrial CCUS projects to have a combined aggregate sequestration volume of approximately 14.5 Mtpy CO_2e. We anticipate that the remaining four potential CCUS projects may reach FID during or after 2024. If approved at FID, and assuming definitive agreements are timely executed containing terms we believe are obtainable, we expect such projects to begin sequestration operations between 2026 and 2029. We expect these four potential CCUS projects to have a combined aggregate sequestration volume of approximately 13.24 Mtpy CO_2e. These seven potential CCUS projects have a combined forecasted sequestration volume of approximately 27.74 Mtpy CO_2e. We believe that we will be able to complete a sufficient number of these or other CCUS projects in order to meet our Scope 1, 2 and 3 emissions goals by the early 2030s. See "— *Path to Net Zero Emissions*" for a more detailed description of how we anticipate reaching our Scope 1, 2 and 3 emissions goals.

We estimate the aggregate investment required by us to offset all of our Scope 3 emissions through a sufficient number of the identified potential CCUS projects and associated carbon credits, to be between approximately $1.3 billion and $1.8 billion over the next seven to ten years. We expect to be capable of funding this investment cost through our cash flows from operations, as well as a variety of external sources, at our discretion, which may include joint ventures, project-based equity partnerships and federal grants. We are able to moderate the capital required to fund our CCUS business, as our CCUS business model provides flexibility for us to selectively invest in only the sequestration component of a project or in the capture, transportation and sequestration components, depending on the scope of the project. In addition, we anticipate that some of the project costs will be borne by third party investors in these projects, including emitters, landowners and other stakeholders.

We believe we can achieve our goal of net zero Scope 1, 2 and 3 emissions for our owned and operated upstream businesses by the early 2030s if we are able to complete the minimum number of these identified CCUS projects having a sufficient forecasted volume of carbon capture to offset those emissions on the

timeline and upon terms that we believe are obtainable. However, large scale CCUS projects are subject to numerous risks and uncertainties, including reaching definitive agreements with third parties and obtaining necessary permits and other regulatory approvals, and we may be unable to execute on some or all of these projects on the timeline we anticipate, on terms acceptable to us or at all, in which case, we may not be able to achieve our net zero emissions goals on the timelines we have established.

For facilities placed in service on or after February 9, 2018 and before January 1, 2023, the current Section 45Q tax credit policy generally provides the capturing parties a tax credit that escalates until 2026, when it reaches $50 per ton for CO_2 directly stored in geologic formations, annually escalating for inflation thereafter. For facilities placed in service after December 31, 2022, the credit amount is increased to $85 per ton, subject to satisfaction or nonapplication of certain prevailing wage and apprenticeship requirements (or $17 per ton if applicable prevailing wage and apprenticeship requirements are not satisfied), with adjustments for inflation after 2026. In either case, the Section 45Q tax credit is available for a 12-year period for qualifying facilities that begin construction before January 1, 2033. These CCUS projects will capture and sequester sufficient emission quantities to achieve our upstream Scope 1 and 2 net zero goals (based upon current upstream production without giving effect to the Exxon Barnett Acquisition), in addition to offsetting a portion of our upstream Scope 3 emissions from our owned and operated upstream businesses.

To help us achieve our goal of becoming a leader in CCUS, we established a steering committee that includes two engineers renowned for their work in the development of CCUS projects: Dr. Paitoon (P.T.) Tontiwachwuthikul (Professor of Industrial & Process Systems Engineering & Fellow, Canadian Academy of Engineering) and Dr. Malcolm A. Wilson (Program Director, CO_2 Management, Office of Energy & Environment (OEE), Adjunct Professor of Engineering and Graduate Studies). These individuals are professors at the University of Regina, a leading carbon capture research institution, and each has been engaged in CCUS for over 30 years.

Our CCUS business and all of our CCUS projects are in the early stages of development and while we have reached FID and entered into definitive agreements with respect to the Barnett Zero Project and reached internal FID for the Cotton Cove Project, we have not reached FID or executed any definitive agreements with respect to the other ten potential projects we have identified. In addition, the development of our CCUS business is expected to require material capital investments, and the commercial viability of our CCUS projects depends, in part, on certain financial and tax incentives provided by the U.S. federal government. In particular, we must meet certain wage and apprenticeship requirements in order to qualify for enhanced Section 45Q tax credits, the details of which have not yet been released and are to be included in future guidance. Our ability to establish large scale CCUS projects is subject to numerous risks and uncertainties, including reaching definitive agreements with third parties and obtaining necessary permits and other regulatory approvals, and we may be unable to execute on some or all of these projects on the timeline we anticipate, on terms acceptable to us or at all, in which case, we may not be able to achieve our net zero emissions goals on the timelines we have established. For more information about the risks involved in our CCUS business, see "*Risk Factors — Risks Related to Our CCUS Business.*"

Summary of Our Reserve Estimates

Ryder Scott, our independent petroleum engineers, prepared estimates of our natural gas, NGL and oil reserves as of December 31, 2021 and 2020, and as of September 30, 2022, including the assets we acquired in the Exxon Barnett Acquisition. These reserve estimates were prepared in accordance with the rules and regulations of the SEC regarding oil and natural gas reserve reporting using SEC Pricing (except for the table that provides our estimated reserves as of September 30, 2022 at "NYMEX strip pricing" using pricing based on NYMEX future prices as of market close on September 30, 2022). For more information about our reserve volumes and values, see "*Business — Preparation of Reserves Estimates and Internal Controls*" and Ryder Scott's summary reserve reports, which are filed as exhibits to the registration statement of which this prospectus forms a part.

The following table provides our estimated proved reserve, probable reserve and possible reserve information prepared by Ryder Scott as of September 30, 2022 and December 31, 2021 and 2020 and PV-10 Value and the Standardized Measure for each period. The increase in our proved reserves and the PV-10 Value of those reserves as of September 30, 2022 as compared to December 31, 2021 is primarily due to the

Exxon Barnett Acquisition, our refrac and restimulation program and the increase in natural gas prices used in preparing the December 31, 2021 reserve information. There are numerous uncertainties inherent in estimating quantities of natural gas, NGL and oil reserves and their values, including many factors beyond our control. In addition, estimates of probable and possible reserves are inherently imprecise and are more uncertain than proved reserves but have not been adjusted for risk due to that uncertainty, and therefore they may not be comparable with each other and should not be summed either together or with estimates of proved reserves. See "*Risk Factors — Risks Related to Our Upstream Business and Industry — Our estimated natural gas, NGL and oil reserve quantities and future production rates are based on many assumptions that may prove to be inaccurate. Any material inaccuracies in the reserve estimates or the underlying assumptions will materially affect the quantities and present value of our reserves*." For more information about our proved reserves, see "*Business — Preparation of Reserves Estimates and Internal Controls*" and Ryder Scott's summary reserve reports, which are filed as exhibits to the registration statement of which this prospectus forms a part.

Estimated Reserves at SEC Pricing [(1)]

		December 31,	
	September 30, 2022	2021	2020
Estimated proved developed reserves:			
Natural gas (MMcf)	3,857,807	2,494,926	1,893,161
Producing	3,466,758	2,346,712	1,893,161
Non-producing	391,049	148,214	0
Natural gas liquids (MBbls)	177,692	151,433	107,234
Producing	163,830	142,961	107,234
Non-producing	13,862	8,472	0
Oil (MBbls)	1,123	867	723
Producing	1,019	876	723
Non-producing	104	0	0
Total estimated proved developed reserves (MMcfe)	4,930,696	3,408,723	2,540,901
Producing	4,455,853	3,209,679	2,540,901
Non-producing	474,843	199,044	0
Standardized Measure (millions)	$ 6,150	$ 2,119	$ 504
PV-10 (millions)[(2)(3)]	$ 7,844	$ 2,672	$ 552
Estimated proved undeveloped reserves:			
Natural gas (MMcf)	1,140,466	950,359	92,373
Natural gas liquids (MBbls)	42,896	13,722	—
Oil (MBbls)	620	58	—
Total estimated proved undeveloped reserves (MMcfe) [(4)(5)]	1,401,561	1,033,040	92,373
Standardized Measure (millions)	$ 1,498	$ 294	$ 6
PV-10 (millions)[(2)(6)]	$ 1,974	$ 403	$ 9
Estimated proved reserves:			
Natural gas (MMcf)	4,998,273	3,445,285	1,985,534
Natural gas liquids (MBbls)	220,587	165,155	107,234
Oil (MBbls)	1,743	925	723
Total estimated proved reserves (MMcfe)	6,332,257	4,441,763	2,633,274
Standardized Measure (millions)	$ 7,648	$ 2,413	$ 510
PV-10 (millions)[(2)(7)]	$ 9,818	$ 3,074	$ 561

	September 30, 2022	December 31, 2021	December 31, 2020
Estimated probable reserves:			
Natural gas (MMcf)	940,531	522,442	61,884
Natural gas liquids (MBbls)	67,117	31,227	—
Oil (MBbls)	1,625	486	—
Total estimated probable reserves (MMcfe) [5][8]	1,352,989	712,725	61,884
Standardized Measure (millions)	$ 851	$ 146	$ —
PV-10 (millions)[2][9]	$ 1,126	$ 202	$ —
Estimated possible reserves:			
Natural gas (MMcf)	552,597	381,941	—
Natural gas liquids (MBbls)	35,121	32,047	—
Oil (MBbls)	1,364	1,841	—
Total estimated possible reserves (MMcfe) [5][8]	771,478	585,269	—
Standardized Measure (millions)	$ 324	$ 51	$ —
PV-10 (millions)[2][10]	$ 432	$ 75	$ —

(1) Prices for natural gas, oil and NGLs, respectively, used in preparing our estimated proved reserves and the associated PV-10 Value based on SEC Pricing (i) at September 30, 2022 were $6.127 per MMbtu (Henry Hub), $91.71 per Bbl (WTI Cushing) and pricing equal to 40% of WTI Cushing, (ii) at December 31, 2021 were $3.598 per MMbtu (Henry Hub), $66.56 per Bbl (WTI Cushing) and pricing equal to 39.5% of WTI Cushing and (iii) at December 31, 2020 were $1.985 per MMbtu (Henry Hub), $39.57 per Bbl (WTI Cushing) and pricing equal to 47% of WTI Cushing.

(2) PV-10 refers to the estimated future gross revenue to be generated from the production of proved reserves, net of estimated production and future development costs, using prices and costs in effect at the determination date, without giving effect to non-property related expenses such as general and administrative expenses, debt service and future income tax expense or to depreciation, depletion and amortization, discounted using an annual discount rate of 10%. PV-10 is not a financial measure calculated in accordance with GAAP because it does not include the effects of income taxes on future net revenues. PV-10 is derived from the Standardized Measure, which is the most directly comparable GAAP financial measure. Neither PV-10 nor Standardized Measure represent an estimate of the fair market value of our oil and natural gas properties. We believe that the presentation of PV-10 is relevant and useful to investors because it presents the discounted future net cash flows attributable to our estimated net proved reserves prior to taking into account future corporate income taxes, and it is a useful measure for evaluating the relative monetary significance of our oil and gas properties. It is not intended to represent the current market value of our estimated reserves. PV-10 should not be considered in isolation or as a substitute for the Standardized Measure reported in accordance with GAAP, but rather should be considered in addition to the Standardized Measure. See "*Prospectus Summary —Summary*."

(3) The following table provides a reconciliation of the Standardized Measure to PV-10 with respect to estimated proved developed reserves as of September 30, 2022 and December 31, 2021 and 2020:

	September 30, 2022	December 31, 2021	December 31, 2020
PV-10 (millions)	$ 7,844	$2,672	$552
Present value of future income taxes discounted at 10%	(1,694)	(553)	(48)
Standardized Measure	$ 6,150	$2,119	$504

(4) Proved undeveloped reserves as of December 31, 2021 and as of September 30, 2022 are part of a development plan that has been adopted by management indicating that such locations are scheduled to be drilled within five years.

(5) Sustained lower prices for oil and natural gas may cause us to forecast less capital to be available for development of our PUD, probable and possible reserves, which may cause us to decrease the amount of our PUD, probable and possible reserves we expect to develop within the allowed time frame. In addition, lower oil and natural gas prices may cause our PUD, probable and possible reserves to become uneconomic to develop, which would cause us to remove them from their respective reserve category.

(6) The following table provides a reconciliation of the Standardized Measure to PV-10 with respect to estimated proved undeveloped reserves as of September 30, 2022 and December 31, 2021 and 2020:

	September 30, 2022	December 31, 2021	December 31, 2020
PV-10 (millions)	$ 1,974	$ 403	$ 9
Present value of future income taxes discounted at 10%	(476)	(108)	(3)
Standardized Measure	$ 1,498	$ 294	$ 6

(7) The following table provides a reconciliation of the Standardized Measure to PV-10 with respect to estimated proved reserves as of September 30, 2022 and December 31, 2021 and 2020:

	September 30, 2022	December 31, 2021	December 31, 2020
PV-10 (millions)	$ 9,818	$3,074	$561
Present value of future income taxes discounted at 10%	2,170	(661)	(51)
Standardized Measure	$ 7,648	$2,413	$510

(8) Estimates of probable and possible reserves, respectively, and the respective future cash flows related to such estimates, are inherently imprecise and are more uncertain than proved reserves, and the future cash flows related to such estimates. For more information regarding the presentation of probable and possible reserves, see "*Business — Preparation of Reserve Estimates and Internal Controls*."

(9) The following table provides a reconciliation of the Standardized Measure to PV-10 with respect to estimated probable reserves as of September 30, 2022 and December 31, 2021 and 2020:

	September 30, 2022	December 31, 2021	December 31, 2020
PV-10 (millions)	$ 1,126	$202	$ —
Present value of future income taxes discounted at 10%	(275)	(56)	—
Standardized Measure	$ 851	$146	$ —

(10) The following table provides a reconciliation of the Standardized Measure to PV-10 with respect to estimated possible reserves as of September 30, 2022 and December 31, 2021 and 2020:

	September 30, 2022	December 31, 2021	December 31, 2020
PV-10 (millions)	$ 432	$ 75	$ —
Present value of future income taxes discounted at 10%	(108)	(24)	—
Standardized Measure	$ 324	$ 51	$ —

During the nine months ended September 30, 2022 and the year ended December 31, 2021, we incurred costs of approximately $26.0 million and $7.2 million, respectively, to convert 41.4 Bcfe and 19.4 Bcfe, respectively, of proved undeveloped reserves to proved developed reserves. Estimated future development costs relating to the development of our proved undeveloped reserves at September 30, 2022 and December 31, 2021 are approximately $963.2 million and $578.3 million, respectively, over the next five years, substantially all of which we expect to finance through cash flow from operations. Our development programs through the first three quarters of 2022 focused on refracturing under-stimulated wells and designing and drilling new wells in both our Barnett and Marcellus assets. All of our PUD reserves are scheduled to be developed within five years of their initial disclosure as PUDs. See "*Risk Factors — Risks Related to Our Upstream Business and Industry — The development of our estimated proved undeveloped reserves may take longer and may require higher levels of capital expenditures than we currently anticipate*."

2021 Activity

During the year ended December 31, 2021, the Company's proved reserves increased by 1,808.5 Bcfe. The increase in proved reserves was primarily due to increasing commodity pricing improving economics, and additions to the drilling schedule for both proved developed and undeveloped reserves. The Company produced 245.8 Bcfe during the year ended December 31, 2021.

Revisions of previous estimates primarily consisted of upward revisions to proved developed reserves and proved undeveloped reserves of 715.9 Bcfe and 245.6 Bcfe, respectively, as a result of higher average pricing during 2021 for natural gas, NGLs and oil. The remaining upward adjustment of 139.8 Bcfe relates to upward performance adjustments of 219.2 Bcfe to proved developed reserves offset by a downward revision of 79.4 Bcfe to proved developed reserves due to increased production costs.

Extensions and discoveries increased as a result of the completion of our of properties acquired through our Barnett Asset Acquisition, 550.1 Bcfe of proved undeveloped reserves was recognized for 123 gross (94.8 net) locations added to the Company's revised drilling schedule during 2021. Additional extensions consisted of proved undeveloped reserves of 143.2 Bcfe related to 13.0 gross (9.6 net) locations in the Marcellus Basin recognized from acquired acreage and the revised 2021 drilling plan. Extensions related to proved developed reserves of 34.8 Bcfe consisted of 14 gross (5.9 net) newly drilled wells.

Improved recoveries consisted of 205.4 Bcfe of proved developed reserves recognized as a result of the application of improved recovery techniques to producing wells during the year ended December 31, 2021.

2020 Activity

During the year ended December 31, 2020, the Company's proved reserves increased by 1,684.5 Bcfe. The increase in proved reserves was due to the Barnett Asset Acquisition offset by downward revisions primarily due to lower average pricing for natural gas during 2020.The Company produced 111.7 Bcfe during the year ended December 31, 2020.

Revisions of previous estimates of proved undeveloped reserves primarily consisted of a downward revision to proved undeveloped reserves of 146.7 Bcfe due to a combination of performance adjustments and lower average pricing of natural gas during 2020, and a downward revision of 186.5 Bcfe which removed locations due to lower average pricing of natural gas during 2020. Proved developed reserves were adjusted downward by 48.8 Bcfe due to lower average natural gas prices and performance.

There were no extensions and discoveries of proved developed or proved undeveloped reserves during the year ended December 31, 2020.

Estimated Reserves at NYMEX Strip Pricing

The following table provides our total estimated proved reserve, probable reserve and possible reserve information prepared by Ryder Scott as of September 30, 2022, using NYMEX strip prices as of market close on September 30, 2022 and PV-10 Value and the Standardized Measure for such period. We have included this information in order to provide an additional method of presentation of the fair value of our assets and the cash flows that we expect to generate from those assets based on the market's forward-looking pricing expectations as of September 30, 2022. The historical 12-month pricing average in our September 30, 2022 disclosures above does not reflect the prevailing natural gas and oil futures. We believe that the use of forward prices provides investors with additional useful information about our reserves, as the forward prices are based on the market's forward-looking expectations of natural gas and oil prices as of a certain date, although we caution investors that this information should be viewed as a helpful alternative, not a substitute, for the data presented based on SEC Pricing. In addition, we believe that NYMEX strip pricing provides relevant and useful information because it is widely used by investors in our industry as a basis for comparing the relative size and value of our reserves to our peers. Our estimated reserves based on NYMEX futures were otherwise prepared on the same basis as our SEC reserves for the comparable period. Actual future prices may vary significantly from the NYMEX strip prices on September 30, 2022. Actual revenue and value generated may be more or less than the amounts disclosed. There are numerous uncertainties inherent in estimating quantities of natural gas, NGL and oil reserves and their values, including many factors beyond our control. In addition, estimates of probable and possible reserves are inherently imprecise

and are more uncertain than proved reserves but have not been adjusted for risk due to that uncertainty, and therefore they may not be comparable with each other and should not be summed either together or with estimates of proved reserves. See "*Risk Factors — Risks Related to Our Upstream Business and Industry — Our estimated natural gas, NGL and oil reserve quantities and future production rates are based on many assumptions that may prove to be inaccurate. Any material inaccuracies in the reserve estimates or the underlying assumptions will materially affect the quantities and present value of our reserves.*"

	September 30, 2022
Estimated proved developed reserves at NYMEX Strip Pricing:	
Natural gas (MMcf)	3,664,049
Producing	3,275,209
Non-producing	388,839
Natural gas liquids (MBbls)	167,260
Producing	153,398

(7) The following table provides a reconciliation of the Standardized Measure to PV-10 (applying NYMEX Strip Pricing) with respect to estimated probable reserves as of September 30, 2022:

	September 30, 2022
PV-10 (millions)	$ 423
Present value of future income taxes discounted at 10%	(50)
Standardized Measure	$ 373

(8) The following table provides a reconciliation of the Standardized Measure to PV-10 (applying NYMEX Strip Pricing) with respect to estimated possible reserves as of September 30, 2022:

	September 30, 2022
PV-10 (millions)	$ 139
Present value of future income taxes discounted at 10%	(40)
Standardized Measure	$ 99

Preparation of Reserves Estimates and Internal Controls

Our reserve estimates as of December 31, 2020, December 31, 2021 and September 30, 2022 included in this prospectus are based on reports prepared by Ryder Scott, our independent reserve engineer, in accordance with generally accepted petroleum engineering and evaluation principles and definitions and guidelines established by the SEC in effect at such time. We rely on Ryder Scott's expertise to ensure that our reserve estimates are prepared in compliance with SEC rules, regulations and disclosure guidelines and that appropriate geologic, petroleum engineering, and evaluation principles and techniques are applied in accordance with practices generally recognized by the petroleum industry as presented in the publication of the Society of Petroleum Engineers titled "Standards Pertaining to the Estimating and Auditing of Oil and Gas Reserves Information (Revision as of June 2019)." Copies of Ryder Scott's reserve reports are included as exhibits to the registration statement of which this prospectus forms a part.

The person at Ryder Scott responsible for the preparation of the reserve report is Stephen E. Gardner, a Licensed Professional Engineer in the State of Colorado (No. 44720). Mr. Gardner, an employee of Ryder Scott since 2006, is a Managing Senior Vice President responsible for ongoing reservoir evaluation studies worldwide. Before joining Ryder Scott, Mr. Gardner served in a number of engineering positions with Exxon Mobil Corporation. Mr. Gardner earned a Bachelor of Science degree in Mechanical Engineering from Brigham Young University in 2001 (summa cum laude). He is a licensed Professional Engineer in the States of Colorado and Texas. Mr. Gardner is a member of the Society of Petroleum Engineers and a former chairperson of the Society of Petroleum Evaluation Engineers for the Denver Chapter. He also currently serves on the latter organization's board of directors at the international level. Mr. Gardner has attained the professional qualifications as a Reserves Estimator set forth in the Standards Pertaining to the Estimating and Auditing of Oil and Gas Reserves Information promulgated by the Society of Petroleum Engineers.

Our internal staff of petroleum engineers, geoscience professionals, operations, land, finance and accounting, and marketing personnel prior to our annual reserves process, work closely together to ensure the integrity, accuracy and timeliness of data so that our reservoir engineering team can review such data and then furnish it to, and work with, our independent reserve engineers in their reserve evaluation process. Our internal reserves process follows a rigorous workflow where the multidisciplinary teams come together to vet our model assumptions and input and get final signoff before our technical team meets with the independent reserve engineers to review properties and discuss methods and assumptions used to prepare reserve estimates. Our Chief Technology Services Officer, Ethan Ngo, is primarily responsible for overseeing the independent reserve engineers during the process. Mr. Ngo has over 14 years of conventional and unconventional experience on and offshore across the lower 48 states with a major oil and gas company, independent oil and gas companies, and a private-equity-backed oil and gas company. Mr. Ngo has a BS in Civil Engineering and Masters in Petroleum Engineering and International Political Economy of Resources from the Colorado School of Mines, and a MBA from the University of Colorado, Denver.

Ryder Scott relies on various data provided by our internal reservoir engineering team in preparing its reserve estimates, including such items as oil and natural gas prices, ownership interests, production information, operating costs, planned capital expenditures and other technical data. Our internal reservoir engineering team consists of qualified petroleum engineers who maintain our internal evaluation of reserves and compare our information to the reserves prepared by Ryder Scott. Management is responsible for designing the internal control procedures used in the preparation of our oil and gas reserves, which include verification of data input into reserve forecasting and economics evaluation software, as well as multi-discipline management reviews. The internal reservoir engineering team reports directly to our Senior Vice President of Engineering.

Proved developed oil and gas reserves are reserves that can be expected to be recovered through existing wells with existing equipment and operating methods. Proved behind pipe (proved developed non-producing) oil and gas reserves are new reserves that can be expected to be recovered through existing wells,

active or shut-in, where expenditure is required to access the new reserves. Proved undeveloped oil and gas reserves are reserves that are expected to be recovered from new wells on undrilled acreage, or from existing wells where a relatively major expenditure is required for completion. Proved undeveloped reserves on undrilled acreage are limited to those locations on development spacing areas that are offsetting economic producers that are reasonably certain of economic production when drilled. Proved undeveloped reserves for other undrilled development spacing areas are claimed only where it can be demonstrated with reasonable certainty that there is continuity of economic production from the existing productive formation. Proved undeveloped reserves are included only if a development plan has been adopted indicating that such locations are scheduled to be drilled within five years.

Estimates of probable reserves, and the future cash flows related to such estimates, are inherently imprecise and are more uncertain than estimates of proved reserves, and the future cash flows related to such estimates, but have not been adjusted for risk due to that uncertainty. Because of such uncertainty, estimates of probable reserves, and the future cash flows related to such estimates, may not be comparable to estimates of proved and possible reserves, respectively, and the respective future cash flows related to such estimates, and should not be summed arithmetically with estimates of either proved or possible reserves, respectively, and the respective future cash flows related to such estimates. When producing an estimate of the amount of natural gas, NGLs and oil that is recoverable from a particular reservoir, an estimated quantity of probable reserves is an estimate of those additional reserves that are less certain to be recovered than proved reserves but which, together with proved reserves, are as likely as not to be recovered. Estimates of probable reserves are also continually subject to revisions based on production history, results of additional exploration and development, price changes and other factors. When deterministic methods are used, it is as likely as not that actual remaining quantities recovered will exceed the sum of estimated proved plus probable reserves. Probable reserves may be assigned to areas of a reservoir adjacent to proved reserves where data control or interpretations of available data are less certain, even if the interpreted reservoir continuity of structure or productivity does not meet the reasonable certainty criterion. Probable reserves may be assigned to areas that are structurally higher than the proved area if these areas are in communication with the proved reservoir. Probable reserves estimates also include potential incremental quantities associated with a greater percentage recovery of the hydrocarbons in place than assumed for proved reserves.

Estimates of possible reserves, and the future cash flows related to such estimates, are also inherently imprecise and are more uncertain than estimates of proved and probable reserves, respectively, and the respective future cash flows related to such estimates, but have not been adjusted for risk due to that uncertainty. Because of such uncertainty, estimates of possible reserves, and the future cash flows related to such estimates, may not be comparable to estimates of proved and probable reserves, respectively, and the respective future cash flows related to such estimates, and should not be summed arithmetically with estimates of either proved or probable reserves, respectively, and the respective future cash flows related to such estimates. When producing an estimate of the amount of natural gas, NGLs and oil that is recoverable from a particular reservoir, an estimated quantity of possible reserves is an estimate that might be achieved, but only under more favorable circumstances than are likely. Estimates of possible reserves are also continually subject to revisions based on production history, results of additional exploration and development, price changes and other factors. When deterministic methods are used, the total quantities ultimately recovered from a project have a low probability of exceeding proved plus probable plus possible reserves. Possible reserves may be assigned to areas of a reservoir adjacent to probable reserve where data control and interpretations of available data are progressively less certain. Frequently, this will be in areas where geoscience and engineering data are unable to define clearly the area and vertical limits of commercial production from the reservoir. Possible reserves also include incremental quantities associated with a greater percentage of recovery of the hydrocarbons in place than the recovery quantities assumed for probable reserves. Possible reserves may be assigned where geoscience and engineering data identify directly adjacent portions of a reservoir within the same accumulation that may be separated from proved areas by faults with displacement less than formation thickness or other geological discontinuities and that have not been penetrated by a wellbore, and we believe that such adjacent portions are in communication with the known (proved) reservoir. Possible reserves may be assigned to areas that are structurally higher or lower than the proved area if these areas are in communication with the proved reservoir.

Uncertainties are inherent in estimating quantities of proved, probable and possible reserves, including many factors beyond our control. Reserve engineering is a subjective process of estimating subsurface

accumulations of oil and natural gas that cannot be measured in an exact manner, and the accuracy of any reserve estimate is a function of the quality of available data and its interpretation. As a result, estimates by different engineers often vary, sometimes significantly. In addition, physical factors such as the results of drilling, testing, and production subsequent to the date of an estimate, as well as economic factors such as changes in product prices or development and production expenses, may require revision of such estimates. Accordingly, quantities of oil and natural gas ultimately recovered will vary from reserve estimates. See "*Risk Factors*" for a description of some of the risks and uncertainties associated with our upstream business and reserves.

Reserve estimates are based on production performance, data acquired remotely or in wells, and are guided by petrophysical, geologic, geophysical and reservoir engineering models. Estimates of our proved reserves were based on deterministic methods. In the case of mature developed reserves, reserve estimates are determined by decline curve analysis and in the case of immature developed and undeveloped reserves, by analogy, using proximate or otherwise appropriate examples in addition to volumetric and statistical analyses. The technologies and economic data used in estimating our proved reserves include empirical evidence through drilling results and well performance, well logs and test data, geologic maps and available surface and downhole pressure data, and production and reservoir data. Further, the internal review process of our wells and related reserve estimates includes but is not limited to the following:

- 3D seismic-based subsurface maps,
- Petrophysical estimates of original gas in place,
- Volumetric estimates for producing wells,
- Decline curve analysis,
- Rate transient and analytical model analysis,
- Statistical analysis and Monte Carlo simulation, and
- Fracture modeling.

Our estimated proved reserves were determined using average first-day-of-the-month prices for the prior 12 months in accordance with SEC guidance. Regional variations in pricing and related deductions are similarly obtained and a 12-month average is calculated at year end.

For the nine months ended September 30, 2022 and the years ended December 31, 2021 and 2020, Ryder Scott and our multidisciplinary team of technical and other professionals jointly reviewed our well performance and future development plans. Following that joint review, we furnished our internal reserve database and supporting data to Ryder Scott to facilitate their preparation of independent reserve estimates and final reports. Access to our database containing reserve information is restricted to select individuals from our engineering department.

Seasonality

Weather conditions have a significant impact on the demand for natural gas used for heating loads and natural gas-fired power generation. Demand for natural gas is generally at its lowest during the spring and fall months and peaks during the summer and winter months. Demand in the winter season peaks due to residential and commercial heating load demand, while the summer season peaks due to cooling loads, which calls on increased natural gas fired power generation loads. However, seasonal anomalies such as warmer than normal winters or cooler than normal summers can lessen the magnitude of the seasonal fluctuations in demand. In addition, natural gas storage facilities are utilized to bring additional supply to the market that is utilized to meet peak demand levels during both winter and summer seasons.

In addition to the demand side effects, specific seasonal weather events can also have an effect on available natural gas supply. In recent history, much colder than normal weather has induced wellhead freeze-offs in various regional supply markets, which ultimately lessens supply available to broader markets. Various weather events related to the summer months can similarly have detrimental effects on available supply also.

These seasonal anomalies can also increase competition for equipment, supplies and personnel during the spring and summer months, which could lead to shortages and increase costs or delay our operations. Similarly, winter months may bring about delays in operational capabilities and efficiency of execution related to new and existing supply.

Enterprise Risk Management (ERM)

We have a standing risk management committee ("RMC") which meets regularly and assesses, mitigates and provides direction on management of key enterprise risks. RMC members include executives and senior leaders within various functions such as legal, information technology, marketing, regulatory and sustainability, safety, security, operations, finance and accounting, and land.

COVID-19 Impact

Since the start of the COVID-19 pandemic, governments have tried to slow the spread of the virus by imposing social distancing guidelines, travel restrictions and stay-at-home orders, among other actions, which caused a significant decrease in activity in the global economy and the demand for oil, and to a lesser extent, natural gas and NGLs. As vaccines have become widely available, social distancing guidelines, travel restrictions and stay-at-home orders have eased, activity in the global economy has increased and demand for natural gas, NGLs and oil and related commodity pricing, has improved. However, new variants of the virus could cause further commodity market volatility and resulting financial market instability, and these are variables beyond our control that may adversely impact our operating cash flows, distributions from unconsolidated affiliates, our ability to pay dividends on our common stock and our ability to access the capital markets.

As a producer of natural gas and NGLs, we are recognized as an essential business under various federal, state and local regulations related to the COVID-19 pandemic. As such, we have continued to operate throughout the pandemic as permitted under these regulations while taking steps to protect the health and safety of our workers. We have implemented protocols to reduce the risk of an outbreak within our field operations and corporate offices, and these protocols have not reduced our production and our throughput in a significant manner. A substantial portion of our non-field level employees currently operate in remote work from home arrangements, and we have been able to effectively maintain our day-to-day operations. We continue to monitor the COVID-19 environment in order to protect the health and safety of our employees and contract workers.

Our supply chain has not experienced any significant interruptions as a result of the COVID-19 pandemic. The lack of a market or available storage for any one NGL product or oil could result in our having to delay or discontinue well completions and commercial production or shut-in production for other products because we cannot curtail the production of individual products in a meaningful way without reducing production of other products. Potential impacts of these constraints may include partial shut-in of production, although we are not able to determine the extent of shut-ins or for how long they may last. However, because some of our wells produce rich gas, which is processed, and some produce lean gas, which does not require processing, we can change the mix of products that we produce and wells that we complete to adjust our production to address takeaway capacity constraints for certain products. For example, we can shut-in rich gas wells and still produce from our lean gas wells if processing or storage capacity of NGL products becomes limited or constrained.

Customers and Product Marketing

We utilize an unaffiliated third party to market all of our natural gas and oil production to various purchasers, which consist of credit-worthy counterparties, including utilities, LNG producers, industrial consumers, major corporations and super majors, in our industry. This third party collects directly from the purchasers and remits to us the total of all amounts collected on our behalf less their fee for making such sales. We do not believe the loss of any customer would have a material adverse effect on our business, as other customers or markets are currently accessible to us.

Our ability to market oil and natural gas depends on many factors beyond our control, including the extent of domestic production and imports of oil and natural gas, available storage, the proximity of our

natural gas and oil production to pipelines and corresponding markets, the available capacity in such pipelines, the demand for natural gas and oil, the effects of weather, and the effects of state and federal regulation. While we have not experienced significant difficulty in finding a market for our production as it becomes available or in transporting our production to those markets, there is no assurance that we will always be able to market all of our production or obtain favorable prices.

Marketing and Differentials

In NEPA, we continually monitor ongoing market dynamics to ensure equity gas sales are well positioned in terms of market optionality and counterparty liquidity. Within our operating area, sales are generally exposed to indices (denoted in parentheses) located on Eastern Gas Pipeline (South), Millennium Pipeline (East Pool), Tennessee Gas Pipeline (Zone 4) and Transco Pipeline (Leidy). From time to time, we will enter into longer-term commitments with downstream pipelines for firm transportation service. As of September 30, 2022, we have multiple contracts for firm transportation services including a combined 90,000 MMBtu/d to various locations on Tennessee Gas Pipeline, 27,500 MMBtu/d on Millennium Pipeline and 20,000 MMBtu on Eastern Gas Pipeline, which provide access to premium markets in New England (Algonquin), the Northeast and Gulf Coast areas. The remaining term on these contracts range from one year to 15 years, with an average remaining duration of 7.5 years as of September 30, 2022.

In the Barnett, we have several firm transportation contracts specific to the Devon Barnett Acquisition to transport natural gas volumes out of the Barnett to premium markets, including 200,000 MMBtu/d to the Katy area, 200,000 MMBtu/d of intra-basin aggregation transport, which feeds 200,000 MMBtu/d of interstate transport to Transco Zone 4 Station 85, and 80,000 MMBtu/d to NGPL-TxOk with term end dates ranging through 2023 and 2024. The capacity to NGPL-TxOk is currently approximately 15,000 MMBtu/d deficient, however we reserve the right to tranche this capacity down annually to match production. BKV is currently negotiating an extension of several Barnett transport agreements to preserve optionality to transport volumes out of the Barnett.

We were assigned 270,000 MMBtu/d of firm transport on Energy Transfer and Houston Pipe Line Company LP in connection with the closing of the Exxon Barnett Acquisition, which contract will expire in 2027. The contract with Energy Transfer and Houston Pipe Line provides access to the NGPL-TxOk market. Additionally, we executed a transaction confirmation with XTO Energy, Inc., which had the structural effect of assigning 170,000 MMBtu/d of firm capacity on Midcontinent Express Pipeline providing access to premium markets at Transco Zone 4 Station 85, which contract will expire in late 2022.

As it relates to Temple I, in addition to 2,812,500 MMBtu of storage at Energy Transfer's Bammel storage facility which expires in late 2027, BKV-BPP Power holds 75,000 MMBtu/d of firm transport with Energy Transfer and its subsidiaries which supports receipt of gas from the Katy Area with delivery to the Temple Facility and expires in late 2027. Additionally, Temple I holds 125,000 MMBtu/d of interruptible transport with Atmos Pipeline for delivery to Temple I, which terminates upon cancellation by the parties.

Unless otherwise mentioned, under all firm transportation contracts, we pay reservation fees, regardless of usage, to hold transportation rights of the contracted volume on these pipelines for the duration of the contract. Our minimum aggregate required payments per year under firm gathering and transportation agreements are approximately $16.5 million for 2022, $58.0 million for 2023, $42.1 million for 2024, $22.3 million for 2025, $20.5 million for 2026 and $82.5 million for 2027 and beyond. The utilization and economic optimization of the upstream business units' firm transportation contracts are currently managed by Concord Energy, LLC, who acts as the marketing agent for all our upstream marketed volumes. We believe that all NEPA, Barnett and Temple I transport contracts are at competitive rates.

Competition

The oil and gas industry is very competitive, and we compete with a substantial number of other companies, many of which are large, well-established and have greater financial and operational resources than we do. We compete with several other onshore unconventional natural gas producers to deliver our products to the marketplace, some of which include TotalEnergies and Lime Rock Resources (operating in the Barnett), Chesapeake Energy Corporation, Repsol USA, Coterra Energy Inc. and Southwestern Energy Company (operating in NEPA), among others.

Some of our competitors not only engage in the acquisition, exploration, development and production of oil and gas reserves and electricity generation, but also carry-on refining operations and the marketing of refined products. In addition, the oil and gas industry in general competes with other industries supplying energy and fuel to industrial, commercial and individual consumers, including alternative energy sources. Competition is particularly intense in the acquisition of prospective oil and gas properties. We may incur higher costs or be unable to acquire and develop desirable properties at costs we consider reasonable because of this competition. We also compete with other oil and gas companies to secure drilling rigs, frac fleets, sand and other equipment and materials necessary for the drilling and completion of wells and in the recruiting and retaining of qualified personnel. Such materials, equipment and labor may be in short supply from time to time. Shortages of equipment, labor or materials may result in increased costs or the inability to obtain such resources as needed. Many of our larger competitors may have a competitive advantage when responding to commodity price volatility and overall industry cycles. Further, the current inflation may affect us more than it may affect some of our larger competitors.

Environmental, Health, Safety and Climate Change Considerations

We understand the impact climate change has on our community, the world and future generations, which is why addressing these impacts in how energy is produced is a top priority. In particular, it is one of our core values, “Be One BKV,” to create a unified team with a shared vision to achieve our ESG goals.

We have established a Working Team consisting of a cross-functional group of BKV leaders who specialize in ESG strategy that meets periodically to identify, assess and implement critical ESG program initiatives. In addition, we have a Risk Management Committee that includes representatives from our operations, legal, finance, investor relations, information technology, marketing and environmental compliance teams and meets periodically to review potential ESG and other risks, tracks how these risks may be changing and ensures they are being properly managed. Our executive short-term incentive plan is tied to ESG-related initiatives, such as operational safety goals, social goals related to employee engagement and the establishment and implementation of our ESG program. In 2021, we achieved our operational safety goals by having zero major incidents (such as well control issues or explosions), having zero regulatory reportable violations and having zero reportable incidents or injuries. In 2021, we achieved our social goals relating to employee engagement with greater than 80% employee participation in our employee engagement survey, which led to the identification of areas for improvement, including career development and recognition and feedback. And, we exceeded our ESG program goals by establishing our baseline score for transparent quantification of BKV’s emission inventory and developing and executing initial steps toward emission reduction. The baseline ESG impact will be utilized to measure our emission reduction goals in the future. In connection with our emissions reduction goals, we have established our baseline emissions inventory and are deploying our emissions monitoring ecosystem and executing our “Pad of the Future” and other emissions reduction programs. For example, we plan to utilize the upstream operations emissions baseline completed in 2021, and which was updated in connection with the Exxon Barnett Acquisition, to refine and measure our emission reductions goals, which include year-over-year step-down reductions through 2025. Additionally, we have completed emission reducing conversions on approximately 2,000 of the approximately 6,000 wells we plan to include in our “Pad of the Future” program by the end of 2025.

We also have established robust Environmental, Health, Safety and Regulatory (“EHSR”) goals with proven results. At the management level, our EHSR programs are overseen directly by our Chief Executive Officer and Chief Operating Officer. Our Director of EHSR reports to our Chief Operating Officer, providing direct access to executive management and decision-making with respect to our top priority focus of EHSR performance. Our safety performance ranks high in comparison to our peers, and we have achieved a Total Recordable Incident Rate (TRIR) of zero in 2019 through 2021, which includes both our employees and our contractors. In the past three years, our employees have driven a total average of nearly 3,000,000 miles per year, during which time we have had zero at-fault driving incidents. Regarding our environmental and safety performance, we have received zero notices of violation in 2020, 2021 and 2022 through the date of this prospectus that have carried a penalty. We have established a four-tiered emissions monitoring ecosystem through which we monitor our wells and facilities via satellite, fixed wing aircraft, continuous perimeter sensors (largely through our Project Canary partnership), and handheld Forward Looking Infrared (FLIR) cameras. We will self-audit our environmental management system in the third quarter of 2022 for alignment to ISO 14001 (a set of environmental management standards). We have certified

100% of our production in NEPA with Project Canary TrustWell and achieved a Gold rating for all wells; a strong rating that will enable us to sell RSG. As of September 2022, we have received TrustWell certification for 168 wells on 64 pads and have achieved Gold rating for these wells. We expect to continue the TrustWell certification process throughout our Barnett assets in the coming years.

As a top 20 gas-weighted natural gas producer in the U.S. market, we believe we have a significant opportunity to reduce our environmental footprint by reducing GHG emissions through a series of strategic projects and technological commitments, and by offsetting remaining operational emissions. We have set a goal of reaching net-zero emissions across Scopes 1 and 2 by the end of 2025. To address our Scope 1 and 2 emissions between 2021 and 2022, we are investing approximately $8.8 million in 2022 to reduce emissions from our operations. These investments will allow us to prototype and deploy electrified components into the production processes, convert pneumatic gas instruments, enhance measurement technology, remove redundant equipment and develop and draw on renewable energy sources, among other operational improvements. For our Scope 3 profile, we aspire to offset 100% of our combined Scope 1, 2 and 3 emissions from our owned and operated upstream businesses by the early 2030s. We believe we have a path to these net-zero goals through the expansion of our carbon negative businesses, such as significant expansion of our CCUS activities and our ongoing BKV dCarbon Ventures efforts. We believe we can achieve this goal if certain of the ten identified potential CCUS projects in our project pipeline are completed upon terms that we believe are obtainable. In addition to these identified projects, we expect to continuously identify and evaluate additional CCUS projects.

Our CCUS business and all of our CCUS projects are in the early stages of development and while we have reached FID and entered into definitive agreements with respect to the Barnett Zero Project and reached internal FID for the Cotton Cove Project, we have not reached FID or executed any definitive agreements with respect to the other ten potential projects we have identified above and may not be able to reach agreement on terms acceptable to us, or to achieve our projected timeline for commercial operations. In addition, the development of our CCUS business is expected to require material capital investments, and the commercial viability of our CCUS projects depends, in part, on certain financial and tax incentives provided by the U.S. federal government. In particular, we must meet certain wage and apprenticeship requirements in order to qualify for enhanced Section 45Q tax credits, the details of which have not yet been released and are to be included in future guidance. For more information on our CCUS business, see "*— Overview — Our Operations — Carbon Capture, Utilization and Sequestration" and "— Our Operations — Carbon Capture, Utilization and Sequestration*." For more information about the risks involved in our CCUS business, see "*Risk Factors — Risks Related to Our CCUS Business*." Another way we are enabling CO_2 emission reduction from our operations is by increasing our production of RSG. We received Project Canary's TrustWell environmental assessment Gold rating in 2021 across our entire Marcellus Shale (NEPA) operations, earning the highest score achieved for wells taken over by a new operator.

Human Capital Resources

As of December 31, 2021, we had a total of 219 employees. As of July 1, 2022, we had a total of 356 employees, which includes employees added following the completion of the Exxon Barnett Acquisition. We hire independent contractors on an as needed basis. We believe we have good relations with our employees. We and our employees are not subject to any collective bargaining agreements.

Safety. Safety is our highest priority, including the prevention of any releases from our operations. We conduct routine maintenance and inspections at our facilities, and we have established practices and operational infrastructure to control and mitigate potential spills or discharges. We also offer annual specialized training to staff on spill prevention and host routine Response Tabletop Sessions to ensure our teams are fully trained on our response plan in the event of any releases. We believe these measures continue to strengthen our process safety culture.

Compensation and Benefits. We recognize that our employees are our most valuable resource and that we must provide competitive compensation to ensure we attract and retain top talent. As part of our commitment to these efforts, we underwent a third-party evaluation to confirm our compensation was both competitive and reflective of the work our employees were performing. In 2021, we assessed our existing compensation strategy and have begun working towards standardizing salary ranges. We have implemented

a compensation framework that strives to pay employees fairly and consistently based on their skills, experience and performance and that we believe is competitive compared to other companies in our industry.

To foster the health and well-being of our employees and their families, we offer all of our full- and part-time employees access to financial, health and wellness programs. We also offer a matched 401(k) plan, short-term and long-term incentive plans, medical insurance coverage, parental leave, and paid time off for holidays, personal days and vacation.

Diversity and Inclusion. We strongly believe that a diverse workforce fosters new ideas and makes us stronger as a company. Providing a safe, inclusive working environment for our employees and contractors is among our top priorities. Our executive leaders are committed sponsors and supporters of programs that foster an increase in diverse demographic representation, nurture the careers of underrepresented groups and create a greater sense of inclusion and belonging.

In 2021, we implemented a new code of business conduct, updating our employee policies and completing an employee handbook refresh. Among the policies that were updated was our whistleblower policy. In conjunction with the update of the whistleblower policy, we launched our confidential ethics and compliance hotline (in addition to our online submission portal).

In 2022, we implemented a comprehensive manager and employee online training program across the Company that includes topics such as business ethics, human rights and diversity, equity and inclusion and that will be tracked to ensure participation.

We are also prioritizing the formal buildout of employee resource groups to create more opportunity for colleagues and peers to connect with others facing similar situations or challenges.

Human Rights. Providing a safe, inclusive working environment for our employees and contractors is a priority. We do not tolerate discrimination or harassment of any kind. We also have a Human Rights Policy that applies to all of our employees and is aligned with the UN Declaration of Human Rights and the UN Guiding Principles on Business and Human Rights. We continue to monitor the effectiveness of our human rights policy with the goal of growing and aligning our business to the dynamic rights of our workforce. Our Human Rights Policy extends to all our operations, as well as partners and suppliers, including security providers.

Recruitment, Retention and Development. We provide equal opportunity for all employees and consultants regardless of race, religion, gender, sexual orientation, age, ethnic or national origin, social origin, disability, family status or any other protected status and personal characteristics for all aspects of employment. This applies to recruitment and talent attraction, training and professional development opportunities, promotions and all employee benefits. Additionally, we prioritize local hiring for both employees and contractors, particularly in areas of field operations, to support employment opportunities in our local communities.

Government Regulation and Environmental Matters

Our operations are subject to extensive federal, state and local laws and regulations that govern oil and natural gas operations, regulate the discharge of materials into the environment or otherwise relate to the protection of the environment. These laws, rules and regulations may, among other things:

- require the acquisition of various permits before drilling commences;
- require notice to stakeholders of proposed and ongoing operations;
- require the installation of expensive pollution control equipment;
- restrict the types, quantities and concentration of various substances that can be released into the environment in connection with oil and gas drilling and production and saltwater disposal activities;
- limit or prohibit drilling activities on certain lands lying within wilderness, wetlands and other protected areas, or otherwise restrict or prohibit activities that could impact the environment, including water resources; and

- require remedial measures to mitigate pollution from former and ongoing operations, such as requirements to plug and abandon wells.

Numerous governmental departments issue rules and regulations to implement and enforce such laws that are often difficult and costly to comply with and which carry substantial administrative, civil and even criminal penalties, as well as the issuance of injunctions limiting or prohibiting our activities for failure to comply. Violations and liabilities with respect to these laws and regulations could also result in remedial clean-ups, natural resource damages, permit modifications or revocations, operational interruptions or shutdowns and other liabilities. The costs of remedying such conditions may be significant, and remediation obligations could adversely affect our financial condition, results of operations and cash flows. In certain instances, citizens or citizen groups also have the ability to bring legal proceedings against us if we are not in compliance with environmental laws or to challenge our ability to receive environmental permits that we need to operate. Some laws, rules and regulations relating to protection of the environment may, in certain circumstances, impose "strict liability" for environmental contamination, rendering a person liable for environmental and natural resource damages and cleanup costs without regard to negligence or fault on the part of such person. Other laws, rules and regulations may restrict the rate of oil and gas production below the rate that would otherwise exist or even prohibit exploration or production activities in sensitive areas. In addition, state laws often require some form of remedial action to prevent pollution from former operations, such as plugging of abandoned wells. As of September 30, 2022, we have recorded asset retirement obligations of $212.2 million attributable to these activities. The regulatory burden on the oil and gas industry increases its cost of doing business and consequently affects its profitability. These laws, rules and regulations affect our operations, as well as the oil and gas exploration and production industry in general.

We believe that we are in material compliance with current applicable environmental laws, rules and regulations and that continued compliance with existing requirements will not have a material impact on our financial condition, results of operations or cash flows. Nevertheless, changes in existing environmental laws or regulations or the adoption of new environmental laws or regulations, including any significant limitation on the use of hydraulic fracturing, could have the potential to adversely affect our financial condition, results of operations and cash flows. Federal, state or local administrative decisions, developments in the federal or state court systems or other governmental or judicial actions may influence the interpretation or enforcement of environmental laws and regulations and may thereby increase compliance costs. Environmental regulations have historically become more stringent over time, and thus, there can be no assurance as to the amount or timing of future expenditures for environmental compliance or remediation.

The following is a summary of the significant environmental laws to which our business operations are subject.

CERCLA. The Comprehensive Environmental Response, Compensation, and Liability Act, or CERCLA, is also known as the "Superfund" law. CERCLA and comparable state laws impose liability, without regard to fault or the legality of the original conduct, on parties that are considered to have contributed to the release of a "hazardous substance" into the environment. These persons include the current or former owner or operator of the site where the release occurred and anyone who disposed or arranged for the disposal of a hazardous substance released at the site. Such "responsible parties" may be subject to joint and several liability under CERCLA for the costs of cleaning up the hazardous substances that have been released into the environment and for damages to natural resources. It is not uncommon for neighboring landowners and other third parties to file claims for personal injury and property damage allegedly caused by the hazardous substances released into the environment. We currently own or lease properties that have been used for the exploration and production of natural gas, NGLs and oil for a number of years. Although operating and disposal practices that were standard in the industry at the time may have been utilized, it is possible that hydrocarbons or other wastes may have been disposed of or released on or under the properties currently owned or leased by us. Many of these properties have been operated by third parties whose treatment or release of hydrocarbons or other wastes was not under our control. These properties, and any wastes that may have been released on them, may be subject to CERCLA, and we could potentially be required to investigate and remediate such properties, including soil or groundwater contamination by prior owners or operators, or to perform remedial plugging or pit closure operations to prevent future contamination. States also have environmental cleanup laws analogous to CERCLA, including Texas.

RCRA. The Resource Conservation and Recovery Act, or RCRA, and comparable state statutes regulate the generation, transportation, treatment, storage, disposal and cleanup of hazardous and non-hazardous wastes. Under the auspices of the EPA, the individual states administer some or all of the provisions of RCRA. While there is currently an exclusion from RCRA for drilling fluids, produced waters and most of the other wastes associated with the exploration and production of oil or gas, it is possible that some of these wastes could be classified as hazardous waste in the future and therefore be subject to more stringent regulation under RCRA. For example, in December 2016, the EPA and certain environmental organizations entered into a consent decree to address the EPA's alleged failure to timely assess its RCRA Subtitle D criteria regulations exempting certain exploration and production-related oil and gas wastes from regulation as hazardous wastes under RCRA. The consent decree required the EPA to propose a rulemaking no later than March 15, 2019, for revision of certain Subtitle D criteria regulations pertaining to oil and gas wastes or to sign a determination that revision of the regulations is not necessary; the EPA ultimately determined that a revision was not necessary. Also, in the course of our operations, we generate some amounts of ordinary industrial wastes that may be regulated as hazardous wastes if such wastes have hazardous characteristics.

Oil Pollution Act. The Oil Pollution Act of 1990, or the OPA, contains numerous restrictions relating to the prevention of and response to oil spills into waters of the United States. The term "waters of the United States" has been interpreted broadly to include inland water bodies, including wetlands and intermittent streams. The OPA imposes certain duties and liabilities on certain "responsible parties" related to the prevention of oil spills and damages resulting from such spills in or threatening waters of the United States or adjoining shorelines. For example, operators of certain oil and gas facilities must develop, implement and maintain facility response plans, conduct annual spill training for certain employees and provide varying degrees of financial assurance. Owners or operators of a facility, vessel or pipeline that is a source of an oil discharge or that poses the substantial threat of discharge is one type of "responsible party" who is liable. The OPA subjects owners of facilities to strict, joint and several liability for all containment and cleanup costs, and certain other damages arising from a spill. As such, a violation of the OPA has the potential to adversely affect our business, financial condition, results of operations and cash flows.

Clean Water Act. The Clean Water Act and implementing regulations, which are primarily executed through a system of permits, also govern the discharge of certain pollutants into waters of the United States. Enforcement for failure to comply strictly with the Clean Water Act are generally resolved by payment of fines and correction of any identified deficiencies. However, regulatory agencies could require us to cease construction or operation of certain facilities or to cease hauling wastewaters to facilities owned by others that are the source of water discharges to resolve non-compliance. The Clean Water Act also requires the preparation and implementation of Spill Prevention, Control and Countermeasure Plans in connection with on-site storage of significant quantities of oil. In 2016, the EPA finalized new wastewater pretreatment standards that would prohibit onshore unconventional oil and gas extraction facilities from sending wastewater to publicly-owned treatment works. This restriction of disposal options for hydraulic fracturing waste may result in increased costs. In addition, state laws analogous to the Clean Water Act also may require permits for certain of our operations.

Safe Drinking Water Act. The SDWA and comparable local and state provisions restrict the disposal, treatment or release of water produced or used during oil and gas development. Subsurface emplacement of fluids (including oil and gas wastewater disposal wells or enhanced oil recovery) is governed by U.S. federal or state regulatory authorities that, in some cases, includes the state oil and gas regulatory authority or the state's environmental authority. The SDWA's Underground Injection Well Program requires that we obtain permits from the EPA or delegated state agencies for our disposal wells, establishes minimum standards for injection well operations, restricts the types and quantities of fluids that may be injected and prohibits the migration of fluid containing any contaminants into underground sources of drinking water. Any leakage from the subsurface portions of the injection wells may cause degradation of freshwater, potentially resulting in cancellation of operations of a well, imposition of fines and penalties from governmental agencies, incurrence of expenditures for remediation of affected resources, and imposition of liability by landowners or other parties claiming damages for alternative water supplies, property damages, and personal injuries. In addition, in some instances, the operation of underground injection wells has been alleged to cause earthquakes (induced seismicity) as a result of flawed well design or operation. This has resulted in stricter regulatory requirements in some jurisdictions relating to the location and operation of underground

injection wells, and regulators in some states have imposed or are seeking to impose additional requirements, including requirements regarding the permitting of produced water disposal wells or otherwise, to assess the relationship between seismicity and the use of such wells. The adoption of federal, state and local legislation and regulations intended to address induced seismic activity in the areas in which we operate could restrict our drilling and production activities, as well as our ability to dispose of produced water gathered from such activities, which could result in increased costs and additional operating restrictions or delays.

We engage third parties to provide hydraulic fracturing or other well stimulation services to us in connection with the wells in which we act as operator. Hydraulic fracturing is an important and commonly used process in the completion of oil and gas wells, particularly in unconventional plays, and is generally exempted from federal regulation as underground injection (unless diesel is a component of the fracturing fluid) under the SDWA. Concerns have been raised that hydraulic fracturing activities, separate and apart from use of injection wells, may be correlated to induced seismicity. In addition, EPA conducted a comprehensive study of the potential adverse impacts of hydraulic fracturing on drinking water and ground water and released its final report on this study in December 2016. The report found that hydraulic fracturing activities can impact drinking water resources under some circumstances, including large volume spills and inadequate mechanical integrity of wells. This study and other studies that may be undertaken by the EPA or other federal agencies could spur initiatives to further regulate hydraulic fracturing under the SDWA, the Toxic Substances Control Act, or other statutory and/or regulatory mechanisms, which could lead to operational delays, increased operating and compliance costs and additional regulatory burdens that could make it more difficult or commercially impracticable for us to perform hydraulic fracturing. Such costs and burdens could delay the development of unconventional gas resources from shale formations, which are not commercially feasible without the use of hydraulic fracturing.

Chemical Disclosures Related to Hydraulic Fracturing. A number of states, including Texas, have implemented chemical disclosure requirements for hydraulic fracturing operations. We currently disclose all hydraulic fracturing additives we use on www.FracFocus.org, a website created by the Ground Water Protection Council and Interstate Oil and Gas Compact Commission.

Prohibitions and Other Regulatory Limitations on Hydraulic Fracturing. There have been a variety of regulatory initiatives at the state level to restrict oil and gas drilling operations in certain locations.

In addition to chemical disclosure rules, some states have implemented permitting, well construction or water withdrawal regulations that may increase the costs of hydraulic fracturing operations. For example, Texas has water withdrawal restrictions allowing suspension of withdrawal rights in times of shortages while other states require reporting on the amount of water used and its source.

Increased regulation of and attention given by environmental interest groups, as well as state and federal regulatory authorities, to the hydraulic fracturing process could lead to greater opposition to oil and gas production activities using hydraulic fracturing techniques. Additional legislation or regulation could also lead to operational delays or increased operating costs in the production of oil and gas, including from developing shale plays, or could make it more difficult to perform hydraulic fracturing. These developments could also lead to litigation challenging proposed or existing wells. The adoption of federal, state or local laws or the implementation of regulations regarding hydraulic fracturing that are more stringent could cause a decrease in the completion of new oil and gas wells, as well as increased compliance costs and time, which could adversely affect our financial position, results of operations and cash flows. We use hydraulic fracturing extensively and any increased federal, state, or local regulation of hydraulic fracturing could reduce the volumes of oil and gas that we can economically recover.

Clean Air Act. Our operations are subject to the Clean Air Act, or the CAA, and comparable state and local requirements to control emissions from sources of air pollution. Federal and state laws require new and modified sources of air pollutants to obtain permits prior to commencing construction. Major sources of air pollutants are subject to more stringent, federally imposed requirements including additional permitting requirements. Federal and state laws designed to control toxic air pollutants and GHGs might require installation of additional controls. Payment of fines and correction of any identified deficiencies generally resolve any failures to comply strictly with air regulations or permits. However, in the event of non-compliance, regulatory agencies could also require us to cease construction or operation of certain

facilities or to install additional controls on certain facilities that are air emission sources. Further, stricter requirements could negatively impact our production and operations.

In 2012, the EPA published final New Source Performance Standards, or NSPS, and National Emission Standards for Hazardous Air Pollutants, or NESHAPS, that amended the existing NSPS and NESHAP for the oil and natural gas sector. In June 2016, the EPA published a final rule that updated and expanded the NSPS by setting additional emissions limits for volatile organic compounds and regulating methane emissions for new and modified sources in the oil and gas industry. In June 2017, the EPA proposed a two-year stay of certain requirements contained in the June 2016 rule. In March 2018, the EPA published a final rule that amended two narrow provisions of the NSPS, removing the requirement for completion of delayed repair during emergency or unscheduled vent blowdowns. In September 2020, the EPA published a final rule amending the 2012 and 2016 NSPS for the oil and natural gas sector that removed transmission and storage sources from the oil and natural gas industry source category and rescinded the methane requirements applicable to the production and processing sources. On June 30, 2021, President Biden signed into law a joint Congressional resolution under the Congressional Review Act nullifying the September 2020 rule amending the EPA's 2012 and 2016 NSPS standards for the oil and natural gas sector and effectively reinstating the prior standards. On November 15, 2021, the EPA proposed rules to reduce methane emissions from both new and existing oil and natural gas industry sources ("2021 Proposed Methane Rules"). On November 11, 2022, the EPA issued a supplemental proposal to update, strengthen and expand the 2021 Proposed Methane Rules that would make the proposed requirements more stringent and include sources not previously regulated under the oil and gas source category. The EPA has announced that it plans to finalize these rulemakings in 2023. The reinstatement of direct regulation of methane emission for new sources, promulgation of requirements for existing oil and gas sources and enhanced requirements for new sources, and the expansion of sources covered by the EPA's rules, could result in increased compliance costs or otherwise impact our results of operations. For additional information, see "*Risk Factors — Risks Related to Environmental, Legal Compliance and Regulatory Matters-Our operations are subject to a series of risks relating to climate change that could result in increased compliance or operating costs, limit the areas in which we may conduct natural gas exploration and NGL exploration and production activities, and reduce demand for the natural gas and NGLs we produce.*"

In October 2015, the EPA revised the existing National Ambient Air Quality Standards for ground level ozone to make the standard more stringent. The EPA finished promulgating final area designations under the new standard in 2018, which, to the extent areas in which we operate have been classified as non-attainment, may result in an increase in costs for emission controls and requirements for additional monitoring and testing, as well as a more cumbersome permitting process. Generally, it will take the states several years to develop compliance plans for their non-attainment areas. While we are not able to determine the extent to which this new standard will impact our business at this time, it has the potential to have a material impact on our operations and cost structure.

In June 2016, the EPA finalized a rule "aggregating" individual wells and other facilities and their collective emissions for purposes of determining whether major source permitting requirements apply under the CAA. These changes may introduce uncertainty into the permitting process and could require more lengthy and costly permitting processes and more expensive emission controls.

Collectively, these rules and proposed rules, as well as any future laws and their implementing regulations, may require a number of modifications to our operations. We may, for example, be required to install new equipment to control emissions from our well sites or compressors at initial startup or by the applicable compliance deadline. We may also be required to obtain pre-approval for the expansion or modification of existing facilities or the construction of new facilities. Compliance with such rules could result in significant costs, including increased capital expenditures and operating costs, and could adversely impact our business.

Greenhouse Gas and Climate Change Laws and Regulations. Scientific studies have concluded that increasing concentrations of GHGs in the Earth's atmosphere are producing climate changes that have significant physical effects. Potential physical risks resulting from climate change may be event driven (including increased severity of extreme weather events, such as hurricanes, droughts, or floods) or longer-term shifts in climate patterns that may cause sea level rise or chronic heat waves. Potential physical risks may cause direct damage to our assets as well as indirect impacts such as supply chain disruption and also could include changes in water availability, sourcing, and quality, which could impact drilling and completion

operations. These physical risks could cause increased costs, production disruptions, lower revenues and substantially increase the cost or limit the availability of insurance. In response to studies indicating that emissions of carbon dioxide and certain other GHGs, including methane, are contributing to global climate change, there is increasing focus by local, state, regional, national and international regulatory bodies as well as by investors and the public on GHG emissions and climate change issues.

While the United States has yet to adopt comprehensive climate change legislation, the federal government has taken a series of administrative actions aimed at curtailing GHG emissions. For example, in response to 2009 findings that emissions of CO_2, methane and other GHGs present an endangerment to public health and the environment, the EPA issued regulations to restrict emissions of GHGs under existing provisions of the CAA. These regulations include limits on tailpipe emissions from motor vehicles and preconstruction and operating permit requirements for certain large stationary sources.

In August 2015, the EPA promulgated the Clean Power Plan ("CPP") rule to limit CO_2 emissions from existing coal and natural-gas fired electric generating units. The CPP rule, which never went into effect, adopted a sector-wide, generation shifting approach and determined the best system of emissions reduction (BSER) for CO_2 at coal and natural-gas fired units included three components — heat rate improvement at existing coal-fired units, a shift in generation from coal-fired to natural-gas fired units, and a shift in generation from natural-gas fired facilities to renewables. Several industry groups and states challenged the CPP rule. On February 9, 2016, the U.S. Supreme Court stayed the implementation of the CPP rule pending judicial review. In August 2019, the EPA repealed the CPP rule and replaced it with the Affordable Clean Energy rule, or ACE rule, which adopted a narrower, source-based approach limited to designating heat rate improvement, or efficiency improvement, as the BSER for CO_2 from existing coal-fired electric generating units. The ACE rule and the repeal of the CPP rule were challenged by several states and private parties. On January 19, 2021, the D.C. Circuit vacated the ACE rule but at the EPA's request subsequently stayed issuance of the portion of the mandate that would have vacated the repeal of the CPP rule while the EPA decided whether it would promulgate a new rule instead of the CPP rule. On October 29, 2021, the U.S. Supreme Court agreed to review the D.C. Circuit's decision, and on June 30, 2022 the U.S. Supreme Court ruled that the generation-shifting approach included in the CPP rule exceeded EPA's statutory authority under the CAA. The EPA is expected to propose new rules to regulate GHG emissions from electric generating units, but whether and how such rules would affect our business is uncertain.

The EPA has issued the "Final Mandatory Reporting of Greenhouse Gases" Rule and a series of revisions to it, which requires operators of oil and gas production, natural gas processing, transmission, distribution and storage facilities and other stationary sources emitting more than established annual thresholds of carbon dioxide-equivalent GHGs to inventory and report annually their GHG emissions occurring in the prior calendar year on a facility-by-facility basis. The EPA widened the scope of annual GHG reporting to include not only activities associated with completion and workover of gas wells with hydraulic fracturing and activities associated with oil and gas production operations, but also completions and workovers of oil wells with hydraulic fracturing, gathering and boosting systems, and transmission pipelines. These rules do not require control of GHGs. However, the EPA has indicated that it will use data collected through the reporting rules to decide whether to promulgate future GHG limits. More recently, on November 15, 2021, the EPA proposed rules to reduce methane emissions from new and modified sources in the oil and gas sector ("2021 Proposed Methane Rules"). The 2021 Proposed Methane Rules proposal was supplemented by the EPA on November 11, 2022, to update, strengthen and expand the 2021 rule proposal. For more information, see "*Risk Factors — Our operations are subject to a series of risks relating to climate change that could result in increased compliance or operating costs, limit the areas in which we may conduct natural gas and NGL exploration and production activities, and reduce demand for the natural gas and NGLs we produce.*"

In certain circumstances, large sources of GHG emissions are subject to preconstruction permitting under the EPA's Prevention of Significant Deterioration program. This program historically has had minimal applicability to the oil and gas production industry. However, there can be no assurance that our operations will avoid applicability of these or similar permitting requirements, which impose costs relating to emissions control systems and the efforts needed to obtain the permit.

In April 2016, the United States signed the Paris Agreement, which requires countries to review and "represent a progression" in their intended nationally determined contributions ("NDC"), which set GHG

emission reduction goals, every five years beginning in 2020. In November 2019, the Trump Administration formally moved to exit the Paris Agreement, initiating the treaty-mandated one-year process at the end of which the United States officially exited the agreement. However, the current Presidential administration has made climate change a central priority and on January 20, 2021, his first day in office, President Biden announced its intention to rejoin the Paris Agreement. The United States officially rejoined the Paris Agreement on February 19, 2021, and in April 2021 submitted its NDC. The United States NDC sets an economy-wide target of net GHG emissions reduction from 2005 levels of 50-52% by 2030. The specific measures to be taken in furtherance of achieving this target have not been established, but the NDC submission indicated that an interagency approach will play an important role, including regulatory, technology and policy initiatives designed to reduce the generation of GHG emissions and to incentivize the capture and geologic sequestration or utilization of carbon dioxide that would otherwise be emitted in the atmosphere. Also on his first day in office, President Biden signed an executive order on climate action and reconvened an interagency working group to establish interim and final social costs of three GHGs: carbon dioxide, nitrous oxide, and methane. Carbon dioxide is released during the combustion of fossil fuels, including natural gas, NGLs and oil, and methane is a primary component of natural gas. The Biden Administration stated it will use updated social cost figures to inform federal regulations and major agency actions and to justify aggressive climate action as the United States moves toward a “100% clean energy” economy with net-zero GHG emissions.

The United States Congress has also passed a number of bills in recent years aimed at addressing climate change in a limited manner, primarily directed at funding climate change initiatives. The 2021 Infrastructure and Investment Jobs Act passed by Congress in November 2021 included measures aimed at decarbonization to address climate change, including funding for replacing transit vehicles, including buses, with zero- and low-emission vehicles and for the deployment of an electric vehicle charging network nationwide. This legislation, and other future laws, that promote a shift toward electric vehicles could adversely affect the demand for our products. Similarly, the Inflation Reduction Act, recently passed by Congress, imposed several new climate-related requirements on oil and gas operations. Moreover, in August 2022, the U.S. Congress passed, and President Biden signed into law, the Inflation Reduction Act of 2022, which appropriates significant federal funding for renewable energy initiatives and, for the first time ever, imposes a fee on GHG emissions from certain facilities. The emissions fee and funding provisions of the law could increase our operating costs and accelerate the transition away from fossil fuels, which could in turn adversely affect our business and results of operations.

In the absence of comprehensive climate change legislation at the federal level, a number of state and regional efforts have emerged. These include measures aimed at tracking and/or reducing GHG emissions through cap-and-trade programs, which typically require major sources of GHG emissions, such as electric power plants, to acquire and surrender emission allowances in return for emitting GHGs. In addition, a coalition of over 20 governors of U.S. states formed the United States Climate Alliance to advance the objectives of the Paris Agreement, and several U.S. cities have committed to advance the objectives of the Paris Agreement at the state or local level as well. To this end, the California governor issued an executive order on September 23, 2020 ordering actions to pursue GHG emissions reductions, including a direction to the California State Air Resources Board to develop and propose regulations to require increasing volumes of new zero-emission passenger vehicles and trucks sold in California over time, with a targeted ban of the sale of new gasoline vehicles by 2035.

If we are unable to recover or pass through a significant portion of our costs related to complying with current and future regulations relating to climate change and GHGs, it could materially affect our operations and financial condition. Any future laws or regulations that limit emissions of GHGs from our equipment and operations could require us to both develop and implement new practices aimed at reducing GHG emissions, such as emissions control technologies, which could increase our operating costs and could adversely affect demand for the oil and gas that we produce. To the extent financial markets view climate change and GHG emissions as a financial risk, this could negatively impact our cost of, and access to, capital. Future implementation or adoption of legislation or regulations adopted to address climate change could also make our products more or less desirable than competing sources of energy. At this time, it is not possible to quantify the impact of any such future developments on our business.

OSHA. We are subject to the requirements of the Occupational Safety and Health Act, or OSHA, and comparable state laws that regulate the protection of the health and safety of workers. In addition, the

OSHA hazard communication standard requires maintenance of information about hazardous materials used or produced in operations, and the provision of such information to employees, state and local government authorities and citizens. Other OSHA standards regulate specific worker safety aspects of our operations.

Endangered Species Act. The ESA was established to protect endangered and threatened species. Pursuant to the ESA, if a species is listed as threatened or endangered, restrictions may be imposed on activities adversely affecting that species' habitat. The U.S. Fish and Wildlife Service may designate critical habitat and suitable habitat areas it believes are necessary for survival of a threatened or endangered species. While some of our facilities are in areas that may be designated as a habitat for endangered species, we believe that we are in substantial compliance with the ESA. The presence of any protected species or the final designation of previously unprotected species as threatened or endangered in areas where we operate could result in increased costs from species protection measures or could result in limitations, delays, or prohibitions on our exploration and production activities that could have an adverse effect on our ability to develop and produce our reserves.

National Environmental Policy Act. Oil and gas exploration and production activities on federal lands trigger review under the National Environmental Policy Act. The National Environmental Policy Act requires federal agencies, including the U.S. Department of Interior, to evaluate major agency actions having the potential to significantly impact the environment. In the course of such evaluations, an agency will prepare an environmental assessment of the potential direct, indirect and cumulative impacts of a proposed project and, if necessary, will prepare a more detailed environmental impact statement that may be made available for public review and comment. This process has the potential to delay or even halt development of some of our oil and gas projects.

Operating Hazards and Insurance

Natural gas, NGLs and oil operations are subject to many risks, including well blowouts, craterings, explosions, uncontrollable flows of oil, natural gas or well fluids, fires, pipe, casing or cement failures, abnormal pressure, pipeline leaks, ruptures or spills, vandalism, pollution, releases of toxic gases, adverse weather conditions or natural disasters and other environmental hazards and risks.

In accordance with what we believe to be industry practice, we maintain insurance against some, but not all, of the operating risks to which our business is exposed. We cannot provide assurance that any insurance we obtain will be adequate to cover our losses or liabilities. We have elected to self-insure for certain items for which we have determined that the cost of available insurance is excessive relative to the risks presented. In addition, pollution and environmental risks generally are not fully insurable. The occurrence of an event not fully covered by insurance could have a material adverse effect on our financial position, results of operations and cash flows.

The insurance policies we currently maintain, and their respective policy limits, are as follows:

- *Commercial General Liability*: $2,000,000 annual general aggregate policy limit or $1,000,00 per occurrence.
- *Property*: annual aggregate policy limits of $1,575,715 for personal property and $50,000 to $3,200,000 for certain real property.
- *Operators Extra Expense*:
  - $25,000,000 per occurrence limit for wells located in Pennsylvania *;*
  - $15,000,000 per occurrence limit for wells located in Texas;
  - $30,000,000 per occurrence additional limit for property under our care, custody or control;
  - $2,500,000 per occurrence additional limit for certain materials and supplies; and
- *Oil Lease Property*: $314,293,392 annual aggregate policy limit for physical loss and/or physical damage to certain scheduled onshore property.

- *Business and Contingent Business Interruption* : $64,240,000 annual aggregate limit per accident or occurrence, or $176,000 per day.
- *Site Pollution Incident Legal Liability*: $11,000,000 annual aggregate policy limit, with a $10,000,000 limit per incident.
- *Management Liability*:
  - $5,000,000 annual aggregate policy limit for director, officer and organizational liability, with an additional $1,000,000 of coverage for claims against certain insured persons;
  - $2,000,000 annual aggregate policy limit for employment practices liability;
  - $1,000,000 aggregate policy limit for fiduciary liability; and
  - $1,000,000 for certain crime liability.
- *Automobile Liability*: $1,000,000 aggregate policy limit.
- *Workers' Compensation*: limited to the value of the benefits required under Colorado, Montana, Oregon, Pennsylvania or Texas law, as applicable.
- *Employer's Liability*: $1,000,000 limit per accident for bodily injury by accident, and $1,000,000 aggregate policy limit for bodily injury by disease.
- *Umbrella Excess Liability*: $75,000,000 aggregate policy limit covering damages in excess of policy limits for commercial general liability, automobile liability, employee benefits liability and employer's liability.
- *Cybersecurity and Identity Fraud Liability*: $3,000,000 aggregate policy limit for cybersecurity incidents and $5,000 per victim of identity fraud.
- *Kidnap and Ransom*: $10,000,000 limit per insured event.

For more information about potential risks that could affect us, see " *Risk Factors — Risks Related to Our Business Generally — Our business is subject to operating hazards that could result in substantial losses or liabilities for which we may not have adequate insurance coverage*."

Other Facilities

Our corporate headquarters are located at 1200 17th Street, Suite 2100, Denver, Colorado 80202, and our telephone number at such address is (720) 375-9680. Our corporate headquarters are leased and our field office facilities are owned, and we believe that they are adequate for our current needs.

Title to Properties

Title to our oil and gas properties is subject to royalty, overriding royalty, carried, net profits, working, and similar interests customary in the oil and gas industry. Our properties may also be subject to liens incident to operating agreements, as well as other customary encumbrances, easements, and restrictions, and for current taxes not yet due. Our general practice is to conduct title examinations on material property acquisitions. Prior to the commencement of drilling operations, a title examination and, if necessary, curative work is performed. The methods of title examination that we have adopted are reasonable in the opinion of management and are designed to ensure that production from our properties, if obtained, will be salable by us. We believe that title to our oil and natural gas properties is good and defensible, subject only to such exceptions that we believe do not materially interfere with the use of such properties.

Legal Proceedings

From time to time, we may be subject to various claims, title matters and legal proceedings arising in the ordinary course of business, including environmental contamination claims, personal injury and property damage claims, claims related to joint interest billings and other matters under natural gas operating agreements and other contractual disputes. While the outcome and impact on the Company cannot be predicted with certainty, we believe that our ultimate liability with respect to any such matters will not have

a significant impact or material adverse effect on our financial positions, results of operations or cash flows. Our results of operations and cash flows, however, could be significantly impacted in the reporting periods in which such matters are resolved.

MANAGEMENT

Directors and Executive Officers

The following table provides information regarding the individuals who are expected to constitute our executive officers and directors upon completion of this offering. Executive officers serve at the discretion of our board of directors and until their successors are elected and qualified. Messrs. C. Vongkusolkit and S. Vongkusolkit are father and son, respectively.

Name	Age	Current Position(s) with the Company
Christopher P. Kalnin	45	Chief Executive Officer and Director
John T. Jimenez	53	Chief Financial Officer
Eric S. Jacobsen	52	Chief Operating Officer
Brid C. Kealey	59	Chief Human Resources Officer
Lindsay B. Larrick	40	Chief Legal Officer
Ethan Ngo	41	Chief Technical Services Officer
Chanin Vongkusolkit	70	Chairman of the Board
Somruedee Chaimongkol	61	Director
Joseph R. Davis	72	Director
Akaraphong Dayananda	63	Director
Carla S. Mashinski	59	Director
Thiti Mekavichai	61	Director
Charles C. Miller III	70	Director
Sunit S. Patel	60	Director
Anon Sirisaengtaksin	69	Director
Sinon Vongkusolkit	32	Director

Christopher P. Kalnin has served as Chief Executive Officer and a director of the Company since its formation in May 2020 and founded the Company in 2015. He also worked at Kalnin Ventures, the fund manager of BKV O&G, owned by Banpu (SET: BANPU), as Managing Director from June 2014 to May 2020 and Group CEO from January 2019 to May 2020. Prior to that, Mr. Kalnin served in multiple roles at Level 3 Communications, Inc. ("Level 3 Communications"), a global provider of high-capacity communications services to businesses, serving as Vice President of Strategic Business Operations and Planning from January 2014 to June 2014 and Senior Director from February 2012 to December 2013. From January 2010 to July 2011, he served as a Strategy Advisor and Chief of Staff to the Chief Executive Officer at PTT Exploration (SET: PTTEP), a petroleum exploration and production company based in Thailand. Additionally, he served as Engagement Manager at McKinsey & Company, a management consulting firm, from October 2005 to January 2010 and Senior Analyst at Credit Suisse First Boston, the investment banking division of Credit Suisse Group, from July 2000 to July 2003. Mr. Kalnin received a BA in Finance from the University of Western Ontario and an MBA from Northwestern University's Kellogg School of Management. We believe that Mr. Kalnin's extensive industry experience and demonstrated leadership capabilities throughout our growth make him qualified to serve on our board of directors.

John T. Jimenez has served as Chief Financial Officer of the Company since April 2021. Prior to joining the Company, he served as Chief Financial Officer of BP Gas and Power Trading Americas and a member of the board of directors of BP Energy Company, a subsidiary of BP (NYSE: BP), from January 2019 to April 2021. Mr. Jimenez also served as interim Chief Executive Officer and a member of the board of directors of VAKT Global Ltd, a venture established by some of the world's leading energy majors, trading houses and banks to develop a blockchain-based digital platform for post-transaction management of physical energy commodities, from January 2018 to December 2018 and Chairman of the board of directors of VAKT Holdings Ltd from January 2019 to April 2021. Prior to that, he served in various positions at various affiliates of BP, including, most recently, Vice President and Head of IST Global Finance Services from January 2016 to December 2017, Transformation Director from March 2014 to December 2015, Chief

of Staff and Vice President of HR Strategy and Planning from May 2012 to March 2014 and Finance Director — Group HR from January 2006 to April 2012. In addition, he has held various leadership roles in international business environments, ranging from start-up operations to corporate head offices, in the US, UK, Mexico, Poland, Bulgaria and India. He has led a range of commercial activities, including large scale transformations, systems implementations, business turnarounds, business start-ups, analytics, strategy and business development. Mr. Jimenez received a BA in Accounting from Saint Mary's University of Minnesota and an MBA from Northwestern University's Kellogg School of Management.

Eric S. Jacobsen has served as Chief Operating Officer of the Company since its formation in May 2020. He also served as Chief Operating Officer of Kalnin Ventures from February 2020 to May 2020. Prior to that, he served as Senior Vice President of Extraction Oil & Gas, Inc. (previously NASDAQ: XOG), an independent oil and gas company focused on the acquisition, development and production of oil, natural gas and NGL reserves, from October 2016 to December 2019 and Director of Planning and Development, Director of Exploration and Production and Well Engineering Manager of Noble Energy, Inc. (previously NASDAQ: NBL), an independent energy company engaged in worldwide crude oil and natural gas exploration and production, where he led large-scale shale development efforts of the DJ Basin in Colorado, from January 2011 to October 2016. From June 1993 to January 2011, Mr. Jacobsen worked at BP (NYSE: BP) and its heritage companies, Atlantic Richfield Company and Vastar Resources, Inc., in Montana, Texas, Louisiana, Gulf of Mexico, Algeria, Azerbaijan and other locations and in various positions, including Operations Manager, Offshore Installation Manager and Reservoir Engineer. Mr. Jacobsen received a BS in Environmental Engineering and an MS in Petroleum Engineering from Montana Tech University.

Brid C. Kealey has served as Chief Human Resources Officer of the Company since February 2021. Prior to joining the Company, she co-founded and served as Senior Partner of Vector Human Capital Services, a provider of human resources strategy and operational services, from January 2012 to January 2021. In addition, Ms. Kealey served as Chief Human Resources Officer and Vice President, PEO Services of MedSynergies, a provider of business services to Physician Networks, from November 2010 to December 2012 and Chief Learning Officer of Atmos Energy Corporation (NYSE: ATO), a gas utilities company, from March 2009 to May 2010. Previously, she held global human resources leadership roles at Google Inc. (now Alphabet Inc. (NASDAQ: GOOGL, GOOG)) from June 2007 to July 2008, Nokia Corporation (NYSE: NOK) from March 2000 to June 2007 and PepsiCo, Inc. (now NASDAQ: PEP) from 1995 to 2000. Ms. Kealey received a Bachelor of Laws from Trinity College Dublin and a Masters in Business Studies from University College Dublin Michael Smurfit Graduate Business School.

Lindsay B. Larrick has served as Chief Legal Officer of the Company since July 2022 and as Vice President, General Counsel and Corporate Secretary of the Company since its formation in May 2020. She also served as Vice President and General Counsel of Kalnin Ventures from October 2018 to May 2020. Prior to that, she was a partner at national law firms Fox Rothschild LLP from July 2016 to October 2018 and Lathrop & Gage LLP from January 2007 to July 2016. During her time at such law firms, she specialized in the energy practice, served in various management positions, including Chair of the Energy Practice Group for both firms, and gained experience in structuring private equity funds and mergers, acquisitions and divestitures in the oil and gas industry. Ms. Larrick received a BS in Business Administration and a JD from the University of Denver.

Ethan Ngo has served as Chief Technical Services Officer of the Company since July 2022 and, prior to that, as Senior Vice President, Engineering of the Company since its formation in May 2020. He served at Kalnin Ventures as Senior Vice President, Engineering since December 2017 and Vice President, Engineering from March 2015 to December 2017. Prior to that, Mr. Ngo served as A&D Reservoir Engineer of Fidelity Exploration and Production Company, which is involved in the acquisition, exploration, development and production of natural gas and oil resources, from July 2014 to March 2015, Reservoir Engineer of Liberty Resources LLC, a Denver-based private equity backed oil and gas company, from April 2013 to June 2014 and Reservoir Engineer of Newfield Exploration Company (previously NYSE: NFX), an independent energy company, from April 2011 to April 2013. He also served as Senior Reservoir Engineer of ExxonMobil Production Company from February 2008 to March 2011. Mr. Ngo received a BS in Civil Engineering, an MS in International Political Economy and an ME in Petroleum Engineering from the Colorado School of Mines. Mr. Ngo also received an MBA from the University of Colorado, Denver.

Chanin Vongkusolkit has served as Chairman of the Board of the Company since May 2020. He founded Banpu (SET: BANPU) in 1983 and has served as its Chairman of the Board since April 2016. His other positions at Banpu include director and Senior Executive Officer from 2015 to 2016 and director and Chief Executive Officer from 1983 to 2015. In addition, Mr. Vongkusolkit has served as a director of The Erawan Group Public Company Limited (SET: ERW), a hotel investor, developer and operator, since November 2004, and Chairman of its board of directors since April 2018. He has also served as a director of Mitr Phol Sugar Corp., Ltd., a sugar and bio-energy producer, since 1983 and various subsidiaries of Banpu, including Banpu Power (SET: BPP). Additionally, Mr. Vongkusolkit serves as Chairman of the Thai Listed Companies Association and an advisor at the Thammasat Economics Association. He previously served as a Commissioner at the Securities and Exchange Commission of Thailand from 2016 to 2018 and a director of Ratchaburi Electricity Generating Holding Public Company Limited, an independent power producer, from November 2003 to March 2011. Mr. Vongkusolkit received a Bachelor in Economics from Thammasat University and an MBA in Finance from St. Louis University. Mr. Vongkusolkit brings broad expertise in corporate development and leadership to the board of directors. In addition, we believe that Mr. Vongkusolkit's extensive experience with international energy companies makes him qualified to serve on our board of directors.

Somruedee Chaimongkol has served as a director of the Company since May 2020. She has served as a director and Chief Executive Officer of Banpu (SET: BANPU) since May 2015 and a director of BNAC since February 2015. Prior to that, she worked at Banpu as Chief Financial Officer from 2006 to 2015 and Senior Vice President of Finance from 2001 to 2006. In addition, Ms. Chaimongkol has served as a director of various subsidiaries of Banpu, including Banpu Power (SET: BPP). She has also served as a commissioner of PT. Indo Tambangraya Megah Tbk (IDX: ITMG), an Indonesian coal supplier, since March 2022, and served as a director of Biofuel Development Holdings Co., Ltd., from November 2010 to December 2018. Ms. Chaimongkol received a Bachelor's degree in Accounting from Bangkok University. Ms. Chaimongkol brings broad expertise in corporate leadership and financial matters to the board of directors. In addition, we believe that Ms. Chaimongkol's extensive experience as an executive and director at international energy companies makes her qualified to serve on our board of directors.

Joseph R. Davis has served as a director of the Company since May 2020. He has served as a director of Reconnaissance Energy Africa Ltd. d/b/a ReconAfrica (TSXV: RECO), a Canadian oil and gas company engaged in the exploration and development of oil and gas in Mexico, Namibia and Botswana, since January 2022. In 2014, Mr. Davis began working with our Chief Executive Officer, Chris Kalnin, as a consultant, and upon the formation of BKV O&G in June 2015, he assumed the role of Vice President of Geosciences with Kalnin Ventures. He was later promoted to Senior Vice President of Kalnin Ventures, and in January 2019, he became Chief Operating Officer and served in that position until his retirement in March 2020. In addition, he served as Exploration Advisor for Digital Prospectors, LLC, an exploration consulting firm, from May 2009 to May 2015 and Vice President of Hyperion Oil Iraq, L.L.C., an international oil and gas exploration company involved in Iraq and Latin America, from August 2006 to May 2009. From 1992 to 2006, he had a consulting business specializing in evaluation of oil and gas exploration projects. Mr. Davis received an AB in Earth Science from Dartmouth College, an MS in Geology from Southern Methodist University and a PhD in Geology from the University of Texas at Austin. Mr. Davis brings broad expertise in strategic planning and operations. In addition, we believe that Mr. Davis's upstream industry experience and executive experience make him qualified to serve on our board of directors.

Akaraphong Dayananda has served as a director of the Company since May 2020. He has served as a director and President of BNAC since February 2015. Prior to that, Mr. Dayananda served in various positions at Banpu (SET: BANPU) and Banpu Power (SET: BPP), including a director of Banpu Power from July 2009 to December 2017, Chief Strategy Officer — Head of Strategy and Business Development of Banpu from 2011 to 2019, Senior Vice President — Head of Strategy and Business Development of Banpu from 2006 to 2011, Senior Vice President — Head of Corporate Strategic Planning of Banpu from 1999 to 2006 and Senior Vice President — Finance of Banpu Power from 1997 to 1999. Prior to that, he gained expertise in the financial service sector while serving as Managing Director of Peregrine Nithi Finance and Securities Company Limited from 1995 to 1997 and in various positions at Thai Investment and Securities Plc from 1984 to 1995, including most recently Senior Vice President of Corporate Lending and Marketing. Mr. Dayananda has also served as a director of various subsidiaries of Banpu, both internationally and domestically throughout his career. Mr. Dayananda received a BS in Engineering from Chulalongkorn

University and an MBA from Bowling Green State University. He also received certificates in various management and directorship programs, such as the Executive Program in Strategy and Organization from Stanford University and the Director Certificate Program from the Thai Institute of Directors. Mr. Dayananda brings broad expertise in strategic planning, business development and risk management to the board of directors. In addition, we believe that Mr. Dayananda's extensive experience as an executive and director and financial and investment experience make him qualified to serve on our board of directors.

Carla S. Mashinski has served as a director of the Company since September 1, 2022. Since 2019, she has served on the board of directors of Primoris Services Corporation (NASDAQ: PRIM), a specialty construction and infrastructure company in the United States, and has served as chair of its audit committee and a member of its compensation committee since 2021. Ms. Mashinski served as Chief Financial Officer of Cameron LNG, a liquefied natural gas terminal near the Gulf of Mexico, from 2015 to 2017, then was promoted to Chief Financial Officer and Administrative Officer and served in this role until her retirement in May 2022. Prior to that, she served as Chief Financial Officer and Vice President, Finance and Information Management, North American Operations, of Sasol Ltd. (JSE: SOL), an integrated energy and chemical company based in South Africa, from 2014 to 2015, Vice President, Finance and Administration and U.S. Chief Financial Officer of SBM Offshore (AMX: SBMO), a Dutch-based global group of companies servicing the offshore oil and gas industry, from 2008 to 2014 and Vice President, Accounting and Chief Accounting Officer/Controller of GulfMark Offshore, Inc., a global provider of marine transportation services, from 2004 to 2008. Her previous board experience includes serving as a director, and a member of the audit, compensation and nominating committees, of Carbo Ceramics Inc., a technology and services company servicing the oil and gas industry, from 2019 to 2020 and a director, and chair of the compensation committee and member of the audit committee, of Unit Corporation (OTC: UNTC), a diversified energy company, from 2015 to 2020. Ms. Mashinski received a BS in Accounting with high honors from the University of Tennessee at Knoxville and an Executive MBA from the University of Texas at Dallas. She is a Certified Public Accountant in the State of Texas, Certified Management Accountant and Project Management Professional. Ms. Mashinski brings broad experience in financial and accounting matters and corporate governance to the board of directors. In addition, we believe that Ms. Mashinski's financial and accounting experience, U.S. public company board experience and upstream industry experience make her qualified to serve on our board of directors.

Thiti Mekavichai has served as a director of the Company since May 2020. He has served as a director and Chief Executive Officer of BNAC since January 2019 and Head of Oil and Gas Business of Banpu (SET: BANPU) since November 2018. Prior to that, Mr. Mekavichai served as Executive Vice President of Human Resources and Business Services of PTT Exploration (SET: PTTEP) from October 2011 to September 2018 and Executive Vice President of Human Resources of Central Retail Corporation, Thailand's leading multi-format and multi-category retailing platform, from June 2008 to October 2011. From December 1992 to June 2008, he held various technical and human resources positions at subsidiaries of Shell plc (NYSE: SHEL), in both the upstream and downstream industries, and served as a director of Shell Company of Thailand Limited from February 2004 to May 2008. He also served as a director of Energy Complex Company Limited, a company responsible for the construction and operational management of an office building complex, from April 2012 to August 2018 and PTT Digital Solutions Co., Ltd., an information and communication technology company, from March 2014 to August 2018. Mr. Mekavichai received a BS in Geography from Srinakharinwirot University and a diploma in Hydrographic Surveying from Plymouth Polytechnic, U.K. Mr. Mekavichai brings broad expertise in oil and gas operations, risk management, human resources and corporate development to the board of directors. In addition, we believe that Mr. Mekavichai's extensive experience as an executive and director at international energy companies makes him qualified to serve on our board of directors.

Charles C. Miller III has served as a director of the Company since May 2020. He has served as a director of Global Healthcare Exchange, a provider of exchange and other electronic services to health care providers and their suppliers, since June 2017 and Equideum Health, a Web3 person-centered healthcare and research network provider, since December 2021. Mr. Miller was an executive in the telecommunications industry from 1987 to 2013. From 2000 to 2014, he was Vice Chairman of Level 3 Communications where his responsibilities included corporate strategy, mergers and acquisitions, business development, marketing and information services. Prior to that, Mr. Miller was an executive officer of BellSouth Corporation from 1987 to 2000, where his roles included Senior Vice President, Corporate Strategy and Development, as

well as President of BellSouth International, Inc. Before his telecommunications career, he practiced corporate law at King & Spalding LLP from 1979 to 1984 and Ropes & Gray LLP from 1977 to 1979. Mr. Miller received an AB from Harvard College and a JD from Harvard Law School. Mr. Miller brings broad expertise in strategic planning, business development and technology to the board of directors. In addition, we believe that Mr. Miller's U.S. public company board experience and legal expertise make him qualified to serve on our board of directors.

Sunit S. Patel has served as a director of the Company since September 1, 2022. Since February 2021, Mr. Patel has served as Chief Financial Officer of Ibotta, Inc., a consumer technology company. Prior to that, he served as Executive Vice President, Merger and Integration Lead, at T-Mobile US, Inc., a provider of mobile communications services, from October 2018 to April 2020. In addition, Mr. Patel served as Executive Vice President and Chief Financial Officer of CenturyLink, Inc., an international facilities-based communications company, from November 2017 to September 2018 and Executive Vice President and Chief Financial Officer of Level 3 Communications Inc. from 2003 until its merger with CenturyLink in November 2017. He also co-founded and served as Chief Financial Officer of Looking Glass Networks Inc., a facilities-based provider of metropolitan telecommunication transport services, from April 2000 to March 2003. Prior to that, he served in senior leadership positions in a number of telecom companies and began his professional career in investment banking. Mr. Patel received a B.S. in Chemical Engineering and Economics from Rice University and is a Chartered Financial Analyst (CFA). Mr. Patel brings broad experience in financial, accounting and technology matters and strategic planning and transactions to the board of directors. In addition, we believe that Mr. Patel's financial and accounting expertise, executive leadership experience and public company experience make him qualified to serve on our board of directors.

Anon Sirisaengtaksin has served as a director of the Company since May 2020. He has served as a director of Banpu (SET: BANPU) since April 2016 and an Executive Advisor to Banpu for its oil and gas business since 2014. He has also served as a director of Saha-Union Public Company Limited (SET: SUC), an investment company, since January 2020 and CIMB Thai Bank Public Company Limited (SET: CIMBT), a commercial bank in Thailand, since June 2020. In addition, he served as a director and Chief Executive Officer of PTT Global Chemical Public Company Limited (SET: PTTGC) from 2012 to 2013, President and Chief Executive Officer of PTT Exploration (SET: PTTEP) from 2008 to 2012, Senior Executive Vice President, Corporate Strategy and Development of PTT Public Company Limited ("PTT PCL") (SET: PTT) from 2002 to 2008, Executive Vice President, Natural Gas Supply and Trading, Gas Business Group, of PTT PCL from 2001 to 2002 and Deputy President, Natural Gas Marketing and Transmission of PTT Natural Gas Distribution Co., Ltd. from 1996 to 2001. Mr. Sirisaengtaksin received a BS in Geology from Chulalongkorn University and an MBA from Thammasat University. Mr. Sirisaengtaksin brings broad expertise in corporate leadership and strategic planning to the board of directors. In addition, we believe that Mr. Sirisaengtaksin's extensive experience as an executive at international energy companies makes him qualified to serve on our board of directors.

Sinon Vongkusolkit has served as a director of the Company since July 2022. He has served as Chief Executive Officer of Banpu NEXT Co. Ltd. since July 2022. Prior to that, he served at Banpu (SET: BANPU) in the Project Management Office team, where he executed financial and asset transactions, from January 2020 to June 2022. He also served as a financial analyst in the Corporate Finance team of Banpu, where he worked on funding for the Banpu group, from November 2014 to January 2020. Mr. Vongkusolkit received a BA in Business and Marketing Management from Oxford Brookes University and an MA in Global Management Finance from Regent's University London. Mr. Vongkusolkit brings broad expertise in strategic management and operations, including corporate finance, investments and project management, from his time at Banpu to the board of directors. In addition, we believe that Mr. Vongkusolkit's leadership skills, technological adeptness and growth mindset from his time at Banpu NEXT Co. Ltd. make him qualified to serve on our board of directors.

Controlled Company

We intend to apply to list our common stock on the NYSE under the symbol "BKV." Upon completion of this offering, BNAC will hold approximately % of our total outstanding shares of common stock (or approximately % if the underwriters exercise in full their option to purchase additional shares), comprising more than 50% of the voting power of our outstanding common stock. As a result, we will be a

"controlled company" within the meaning of the corporate governance rules of the NYSE. As a "controlled company," we will be eligible to rely on exemptions from the obligation to comply with certain NYSE corporate governance requirements, including the requirements that:

- a majority of our board of directors consist of independent directors;
- we have a corporate governance and nominating committee that is composed entirely of independent directors with a written charter addressing the committee's purpose and responsibilities; and
- we have a compensation committee that is composed entirely of independent directors with a written charter addressing the committee's purpose and responsibilities.

These exemptions do not modify the independence requirements for our audit committee. As a controlled company, we will remain subject to the rules of the Sarbanes-Oxley Act and the NYSE that require us to have an audit committee composed entirely of independent directors. Under these rules, we must have at least one independent director on our audit committee by the date our common stock is listed on the NYSE, at least two independent directors on our audit committee within 90 days of the listing date, and at least three independent directors on our audit committee within one year of the listing date. We expect to have three independent directors upon the closing of this offering.

While BNAC continues to control more than 50% of the voting power of our outstanding common stock, we qualify for, and intend to rely on, these exemptions. Accordingly, you will not have the same protections afforded to stockholders of companies that are subject to all of the corporate governance requirements of the NYSE.

If we cease to be a controlled company within the meaning of the applicable rules of the NYSE, we will be required to comply with these requirements after specified transition periods.

Board of Directors

We currently have eleven directors on our board of directors.

Pursuant to our Stockholders' Agreement, for so long as BNAC and Banpu beneficially own 10% or more of our voting stock, BNAC will be entitled to designate for nomination to our board of directors a number of individuals approximately proportionate to such beneficial ownership, provided that (i) from the completion of this offering until the first anniversary of the completion of this offering, at least three board seats will not be BNAC designees, (ii) from and after the first anniversary of the completion of this offering until the first date on which BNAC and Banpu beneficially own 50% or less of our voting stock, at least four board seats will not be BNAC designees, and (iii) from and after the first date on which BNAC and Banpu beneficially own 50% or less of our voting stock, a number of board seats equal to the minimum number of directors that would constitute a majority of the total number of directors comprising our board of directors will not be BNAC designees. The BNAC designees are Messrs. Kalnin, Davis, C. Vongkusolkit, Dayananda, Mekavichai, Sirisaengtaksin and S. Vongkusolkit and Ms. Chaimongkol.

Our board of directors will be divided into three classes of directors, with each class to be as equal in number as possible, and with the directors serving staggered three-year terms. The term of office of the Class I directors, consisting of , will expire at our first annual meeting of stockholders following the completion of this offering. The term of office of the Class II directors, consisting of , will expire at our second annual meeting of stockholders following the completion of this offering. The term of office of the Class III directors, consisting of , will expire at our third annual meeting of stockholders following the completion of this offering. See "*Description of Capital Stock — Anti-Takeover Provisions — Classified Board of Directors*" for more information.

Director Independence

Upon completion of this offering, three members of our board of directors will qualify as "independent" under the listing standards of the NYSE. Our board of directors has determined that each of is independent as defined under the NYSE corporate governance standards.

Committees of the Board of Directors

Our board of directors will establish standing committees in connection with the discharge of its responsibilities. Upon the completion of this offering, these committees will include an Audit & Risks Committee, a Compensation Committee and a Nominations & Governance Committee. The composition and responsibilities of each of the committees of our board of directors are described below. Members will serve on these committees until their resignation or until as otherwise determined by our board of directors.

Audit & Risks Committee

The Audit & Risks Committee will oversee the conduct of our financial reporting processes, including (i) reviewing with management and the outside auditors the audited financial statements included in our annual reports filed with the SEC, (ii) reviewing with management and the outside auditors the interim financial results included in our quarterly reports filed with the SEC, (iii) discussing with management and the outside auditors the quality and adequacy of internal controls and (iv) reviewing the independence of the outside auditors.

Our Audit & Risks Committee will have a minimum of three members. Upon the completion of this offering, we expect the members of our Audit & Risks Committee will be , and . will serve as the chair of the Audit & Risks Committee. All members of our Audit & Risks Committee will be "independent" as defined in the NYSE corporate governance standards and Rule 10A-3 of the Exchange Act. All members of our Audit & Risks Committee will, in the judgment of our board of directors, be financially literate, or become so within a reasonable period of time after appointment to the Audit & Risks Committee, and at least one member of the Audit & Risks Committee will qualify as an "audit committee financial expert" as defined under the Sarbanes-Oxley Act and applicable SEC regulations. The Audit & Risks Committee will operate under a written charter that satisfies the applicable rules and regulations of the SEC and the listing standards of the NYSE, and the Audit & Risks Committee will review the charter annually. A copy of the Audit & Risks Committee Charter will be available for review on the Company's website.

Nominations & Governance Committee

The Nominations & Governance Committee will be responsible for (i) advising our board of directors about the appropriate composition of our board of directors and its committees, (ii) identifying and evaluating candidates for board service, (iii) recommending director nominees for election at annual meetings of stockholders or for appointment to fill vacancies and newly created directorships, and (iv) recommending the directors to serve on each committee of our board of directors. The Nominations & Governance Committee will also be responsible for periodically reviewing and making recommendations to our board of directors regarding corporate governance policies and responses to stockholder proposals, for conducting an annual performance review of our board of directors and its committees, and for reviewing whether our directors satisfy applicable independence requirements. Pursuant to our Stockholders' Agreement, BNAC, through ownership interests in us held by BNAC and its affiliates, will have certain rights to designate individuals for nomination to our board of directors, subject to applicable corporate governance rules of the SEC and the NYSE (which may require BNAC to designate independent directors). See "*Certain Relationships and Related Party Transactions — Stockholders' Agreement*."

Upon the completion of this offering, we expect the members of our Nominations & Governance Committee will be , and . will serve as the chair of the Nominations & Governance Committee. As a "controlled company," our Nominations & Governance Committee is not required to be comprised of entirely independent directors. The Nominations & Governance Committee will operate under a written charter that satisfies the applicable rules and regulations of the SEC and the listing standards of the NYSE, and the Nominations & Governance Committee will review the charter annually. A copy of the Nominations & Governance Committee Charter will be available for review on the Company's website.

Compensation Committee

The Compensation Committee will review, evaluate and recommend to our board of directors compensation policies with respect to our directors, executive officers and senior management. The

Compensation Committee will also administer the 2022 Plan. The Compensation Committee will have the authority to approve the compensation of the directors, executive officers and senior management of the Company. The Compensation Committee will also have the authority to grant equity awards under the 2022 Plan.

Upon the completion of this offering, we expect the members of our Compensation Committee will be , and . will serve as the chair of the Compensation Committee. As a "controlled company," our Compensation Committee is not required to be comprised of entirely independent directors. The Compensation Committee will operate under a written charter that satisfies the applicable rules and regulations of the SEC and the listing standards of the NYSE, and the Compensation Committee will review the charter annually. A copy of the Compensation Committee Charter will be available for review on the Company's website.

Compensation Committee Interlocks and Insider Participation

None of our executive officers serve on the board of directors or compensation committee of another public company that has an executive officer that serves on our board or compensation committee. No member of our board is an executive officer of another public company in which one of our executive officers serves as a member of the board of directors or compensation committee of that company.

Code of Business Conduct and Ethics

Upon the completion of this offering, our board of directors will adopt a new Code of Business Conduct and Ethics applicable to all the Company's employees, officers and directors. The Code of Business Conduct and Ethics will cover compliance with law; fair and honest dealings with the Company, its competitors and others; full, fair and accurate disclosure to the public; and procedures for compliance with the Code of Business Conduct and Ethics. This Code of Business Conduct and Ethics will be available on the Company's website.

Corporate Governance Guidelines

Upon the completion of this offering, our board of directors will adopt corporate governance guidelines in accordance with the corporate governance rules of the NYSE.

EXECUTIVE COMPENSATION

This section describes the material elements of compensation awarded to, earned by or paid to the following named executive officers (our "NEOs") for calendar year 2021:

- Christopher Kalnin, Chief Executive Officer and interim Chief Financial Officer
- John Jimenez, Chief Financial Officer
- Eric Jacobsen, Chief Operating Officer

2021 Summary Compensation Table

Name and Position (as of December 31, 2021)	Year	Salary ($)	Bonus ($)[1]	Stock awards ($)[2]	Nonequity incentive plan compensation ($)[3]	All other compensation ($)[4]	Total ($)
Christopher Kalnin Chief Executive Officer[5]	2021	501,923	—	16,896,074	795,000	11,928	18,204,925
John Jimenez Chief Financial Officer[6]	2021	250,385	250,000	8,009,952	120,204	31,339	8,661,880
Eric Jacobsen Chief Operating Officer	2021	401,539	—	9,591,205	224,190	22,340	10,239,274

(1) Amount represents the one-time sign-on bonus paid to Mr. Jimenez in connection with the commencement of his employment.

(2) Amounts reported represent the aggregate grant date fair value of TRSUs and PRSUs under the 2021 Plan, computed in accordance with FASB ASC 718. Each of Messrs. Kalnin's, Jimenez's and Jacobsen's PRSUs were granted in 2021. Under the 2021 Plan, TRSUs are expected to be granted in four annual grants over a four-year period. The first annual grant of each of Messrs. Kalnin's, Jimenez's and Jacobsen's TRSUs were granted in 2021. In accordance with FASB ASC 718, for accounting purposes, the Company recognized a compensation expense for each of the four annual grants expected to be granted during the four-year period, although only the first annual grant was granted in 2021. Therefore, the grant date fair value of the TRSUs reflects not only the TRSUs granted in 2021, but also the TRSUs that were expected to be granted in 2022, 2023 and 2024, subject to the continuation of the 2021 Plan and continued employment through each such anticipated grant date, in addition to other factors. For more details relating to the assumptions used in calculating the grant date fair value of the TRSUs and PRSUs reported in this column, including modifications made thereto in November 2021, see "*Note 11 — Equity-based Compensation*" to our historical consolidated financial statements included elsewhere in this prospectus. The grant date fair value for the PRSUs reflected in this table are reported based upon the probable outcome of the performance conditions as of the grant date, and were $12,570,730, $5,959,428 and $7,135,885 for Messrs. Kalnin, Jimenez and Jacobsen, respectively, which amounts are the sum of the original grant date fair value of the PRSUs, assuming a stock price of $10.00 per share and assumptions made with respect to the achievement of the performance goals at that time, plus the incremental cost associated with a modification made to the awards in November 2021, assuming a stock price of $11.06 per share and changes to the assumptions made with respect to the achievement of the performance goals as of the date of modification. The value of the PRSUs granted in 2021, assuming achievement of the maximum performance would have been as follows: Mr. Kalnin: $20,184,942; Mr. Jimenez: $12,029,741; Mr. Jacobsen: $14,404,544, which amounts are the sum of the original grant date fair value of the PRSUs, assuming a stock price of $10.00 per share, plus the incremental cost associated with a modification made to the awards in November 2021, assuming a stock price of $11.06 per share.

(3) Amounts reported represent each NEO's annual performance-based bonus earned in 2021 but paid after the end of the fiscal year, upon certification of the applicable performance measures by our Compensation Committee. See "*— 2021 Performance-Based Bonuses*" for more information.

(4) Amounts reported include the amounts paid to the NEOs shown in the following table:

	Company 401(k) Contribution ($)[a]	Life Insurance Premiums ($)[b]	Relocation ($)[c]
Christopher Kalnin	11,808	120	—
John Jimenez	16,956	120	14,263
Eric Jacobsen	22,220	120	—

(a) The Company maintains a 401(k) plan that provides employees with an opportunity to save for retirement. The Company makes matching contributions of up to 6% of base salary, which contributions are immediately vested.

(b) Included in this column are the life insurance premiums paid on behalf of each NEO.

(c) Included in this column are the relocation expenses for which Mr. Jimenez was reimbursed in connection with his relocation to the Denver, Colorado area.

(5) Mr. Kalnin served as the Company's interim Chief Financial Officer from July 2020 until Mr. Jimenez assumed the role in April 2021. Mr. Kalnin was not separately compensated for his position as interim Chief Financial Officer.

(6) Mr. Jimenez assumed the role of Chief Financial Officer on April 16, 2021, and thus his base salary and non-equity incentive plan compensation information reflects only the period from April 16, 2021 through December 31, 2021.

Employment Agreements

CEO Employment Agreement

Mr. Kalnin and the Company entered into an employment agreement effective as of August 4, 2020 (the "CEO Employment Agreement"), which provides Mr. Kalnin with, among other things, (1) an annual base salary of $500,000, subject to annual review by our board of directors, (2) the eligibility to receive an annual cash bonus, with target payment equal to 100% of his base salary, but paid at an amount commensurate with the level at which the applicable performance goals are achieved (which may be higher or lower than the target level) and subject to continued employment through the end of the year, and (3) the opportunity to participate in the Company's equity incentive plan, with an annual restricted stock unit ("RSU") award to be made in each of 2020, 2021, 2022 and 2023 (each an "Annual RSU Grant") that is equal to, at least 325,900 RSUs per year; subject to the terms of the applicable plan. Mr. Kalnin's Annual RSU Grant has been satisfied in accordance with the 2021 Plan, by reference to Mr. Kalnin's four-year Annual RSU Grant opportunity, granted approximately 70% on January 1, 2021 in the form of PRSUs and the remaining 30% in TRSUs, the first and second annual grants of which were granted in each of January 1, 2021 and January 1, 2022. Each of the TRSU annual grants are subject to vesting requirements once granted, as described in more detail below in "— *Equity Awards Granted Under Our 2021 Long Term Incentive Plan*." Mr. Kalnin is also eligible to participate in and receive benefits offered to our employees, including paid and holiday time off, health insurance coverage and participation in our 401(k) plan. Mr. Kalnin is subject to customary confidentiality and invention assignment covenants, as well as non-competition and non-solicitation covenants which extend for 18 months after termination of employment. Additionally, Mr. Kalnin may receive compensation and benefits in connection with a termination of his employment or a change in control, which are discussed below in "— *Potential Payments Upon Termination or Change in Control — Separation Benefits in the CEO Employment Agreement*."

CFO Employment Agreement

Mr. Jimenez and the Company entered into an employment agreement effective as of January 11, 2021 (the "CFO Employment Agreement"), pursuant to which Mr. Jimenez assumed the role of the Company's Chief Financial Officer as of April 16, 2021 and which provides Mr. Jimenez with, among other things, (1) an annual base salary of $350,000, (2) the opportunity to receive a discretionary annual cash bonus based on the Company's performance (and taking into account Mr. Jimenez's individual effort and satisfactory

achievement of established performance goals) in an amount between 0% and 60% of his base salary, and (3) the opportunity to participate in the 2021 Plan, which was originally estimated to equate to equity awards with respect to approximately 618,000 shares over a four-year period and, which would be subject to the terms of the 2021 Plan and ultimately dependent based on Company performance and Mr. Jimenez's individual effort and satisfactory achievement of performance goals. The CFO Employment Agreement provided Mr. Jimenez with a one-time singing bonus of $250,000 in connection with the commencement of his employment with the Company and the payment of Mr. Jimenez's relocation expenses, up to a maximum of $30,000, incurred in connection with his relocation to the Denver, Colorado area. Mr. Jimenez is also eligible to participate in and receive benefits offered to other employees, including paid and holiday time off, health insurance coverage and participation, with a company match, in our 401(k) plan. Mr. Jimenez is subject to customary confidentiality and invention assignment covenants, as well as non-disparagement, non-competition and non-solicitation covenants which extend for 12 months after termination of employment. Additionally, Mr. Jimenez may receive compensation in connection with a termination of his employment, which is discussed below in "— *Potential Payments Upon Termination or Change in Control — Separation Benefits in the CFO Employment Agreement*."

COO Employment Agreement

Mr. Jacobsen and Kalnin Ventures entered into an employment agreement effective as of February 18, 2020 (the "COO Employment Agreement"), which provides Mr. Jacobsen with, among other things, (1) an annual base salary of $400,000 and (2) the opportunity to receive a discretionary annual cash bonus based on the Company's performance (and taking into account Mr. Jacobsen's individual effort and satisfactory achievement of established performance goals) in an amount between 0% and 40% of his base salary. Mr. Jacobsen is also eligible to participate in and receive benefits offered to other employees, including paid and holiday time off, health insurance coverage and participation, with a company match, in our 401(k) plan. Mr. Jacobsen is subject to customary confidentiality and invention assignment covenants, as well as non-disparagement, non-competition and non-solicitation covenants. Additionally, Mr. Jacobsen may receive compensation in connection with a termination of his employment, which is discussed below in "— *Potential Payments Upon Termination or Change in Control — Separation Benefits in the COO Employment Agreement*."

Equity Awards Granted Under Our 2021 Long Term Incentive Plan

During the year ending December 31, 2021, RSU awards were granted to our NEOs under the 2021 Plan, some of which are subject to service-based vesting conditions and some of which are subject to both performance-based and service-based vesting conditions. On January 1, 2021, Mr. Kalnin and Mr. Jacobsen were granted 97,770 and 55,500 TRSUs, respectively, and 912,520 and 518,000 PRSUs at the target payout level (which equate to 1,825,040 and 1,036,000 PRSUs at maximum payout level), respectively. On April 16, 2021, Mr. Jimenez was granted 46,350 TRSUs and 432,600 PRSUs at the target payout level (which equates to 865,200 PRSUs at maximum payout level). Approximately 25% of Messrs. Kalnin's and Jacobsen's TRSUs were vested at the time of grant and the remainder were set to vest in three roughly equal tranches on each of January 1, 2022, January 1, 2023 and January 1, 2024, in each case, subject to continued employment through such applicable vesting date. Approximately 25% of Mr. Jimenez's TRSUs were vested at the time of grant and the remainder were set to vest in three roughly equal tranches on each of April 16, 2022, April 16, 2023 and April 16, 2024, in each case, subject to continued employment through such applicable vesting date. Messrs. Kalnin's, Jacobsen's and Jimenez's PRSUs will vest based upon the level at which the performance measures described below in "— *BKV Corporation 2021 Long Term Incentive Plan*" are achieved over the period beginning January 1, 2021 and ending on the earliest of December 31, 2023, an IPO or Change in Control of the Company (each as defined in the 2021 Plan), so long as each of Messrs. Kalnin, Jacobsen and Jimenez remain employed by the Company through the end of such performance period.

2021 Performance-Based Bonuses

For 2021, our Compensation Committee recommended and our board of directors approved the adoption of an annual, performance-based bonus program for all of our employees, including each of our NEOs (the "2021 Annual Bonus"). Messrs. Kalnin, Jimenez and Jacobsen were assigned a target bonus opportunity equal to, for Mr. Kalnin, 100% of his base salary and for Messrs. Jimenez and Jacobsen, 30%

of each of their respective base salaries. Each employee's 2021 Annual Bonus was calculated by multiplying the individual's base salary by his target bonus opportunity and multiplied by an additional two components: the corporate multiplier, based on corporate performance goals, which were based off of the KPI Scorecard (discussed below), and an individual multiplier, based on individual performance goals determined by, for Mr. Kalnin, the board of directors and for Messrs. Jimenez and Jacobsen, Mr. Kalnin, subject to approval by our board of directors. Once both the corporate performance goals and the individual performance goals were scored and the corporate multiplier and individual multipliers were determined, the 2021 Annual Bonus earned by each of Messrs. Kalnin, Jimenez and Jacobsen were equal to the product of their respective target bonus opportunities and the corporate multiplier and individual multiplier assigned to the corporate performance goals and individual performance goals, respectively. Mr. Jimenez's 2021 Annual Bonus was prorated to reflect the number of full months worked during 2021.

Company Performance Measures

The company performance metrics were based on the "KPI Scorecard," which evaluated "lagging" indicators and "leading" indicators that were weighted at an aggregate of 70% and 30%, respectively. The "lagging "indicators measured the Company's key financial and operation metrics, including the Company's EBITDA, net income, free cash flow, net production, year-end reserves, break-even unit costs, costs of upstream subsurface development and environmental health safety and regulatory measures. Each of these metrics comprised between 5% and 20% of the overall "lagging" indicator category." The "leading" indicators measured the Company's achievement of strategic and business plan goals, including employee engagement, baseline ESG scores as measured by a third-party consultant, the successful completion of the integration of the Devon Barnett Acquisition, the number of acquisition opportunities identified by the Company, the Company's automation and use of big data tools, the process redesign implementation of EHSR and operations, the achievement of midstream projects, enhancements in the Company's value chain and the level at which future projects inventory is clearly planned and to go, each weighted equally at 10%.

The Compensation Committee determined that the "lagging" indicators, or the financial and operational metrics were met, in the aggregate, at 160% of target, resulting in a company multiplier of 1.12 (or the product of the 160% level of achievement and the 70% weighting of such metrics). The Compensation Committee determined that the "leading" indicators, or the Company's strategic goals, were met, in the aggregate, at 184% of target, resulting in a company multiplier of .55 (or the product of the 184% level of achievement and the 30% weighting of such metrics). These determinations would have resulted in a total company multiplier equal to 1.67. However, the Compensation Committee included in its analysis of the Company's performance during 2021 that, while not costs that affected the level at which the performance metrics of the KPI Scorecard were met, there were nonetheless certain other costs that affected the Company. As a result of these costs and in the Compensation Committee's discretion to determine the level at which the performance metrics of the KPI Scorecard were achieved, the Compensation Committee determined that the overall company multiplier should be lowered by approximately 5%, resulting in a company multiplier equal to 1.59.

Individual Performance Measures

The Compensation Committee set Mr. Kalnin's individual performance measures to be the same as the KPI Scorecard used for the company performance measures. The Compensation Committee determined that Mr. Kalnin's individual contributions to the KPI Scorecard, along with his guiding the Company to be ready for an IPO and the Company's employee satisfaction (measured through a survey of the employees) resulted in an individual multiplier of 1.000, which the board of directors approved. Mr. Kalnin set Messrs. Jimenez's and Jacobsen's individual performance goals to be based off the elements of the KPI Scorecard that directly related to each of their duties. For Mr. Jimenez, his individual performance goals included his leadership, people and culture skills, his finance and accounting foundational processes and his IPO readiness. Mr. Kalnin recommended to the board of directors that, based on the strong relationships Mr. Jimenez built with investors, his ability to address audit issues and his engagement of Deloitte to define strategy and baseline readiness, and to prepare a plan for the Company's IPO, Mr. Jimenez's individual multiplier should be 1.080, which the board of directors approved. Mr. Jacobsen's individual performance goals included his leadership, people and culture skills, his ESG foundations and his IPO readiness. Mr. Kalnin recommended to the board of directors that, based on the strong leadership skills Mr. Jacobsen showed in

both internal and external collaboration, his defined ESG strategy and implementation and his operations preparedness for an IPO in 2022, Mr. Jacobsen's individual multiplier should be 1.175, which the board of directors approved.

Outstanding Equity Awards at Fiscal Year-End

	Stock Awards

Eric Jacobsen	—	—	518,000[(1)]	6,086,500
Eric Jacobsen	41,625[(2)]	489,094	—	—

(1) Represents the target number of PRSUs outstanding as of December 31, 2021 (assuming the performance goals are determined to be met at target). The number of PRSUs outstanding (and the value thereof), as of December 31, 2021 assuming the performance goals are determined to be met at maximum was 1,825,040 (or $21,444,220); 865,200 (or $10,166,100); and 1,036,000 (or $12,173,000) for Messrs. Kalnin, Jimenez and Jacobsen, respectively.

(2) Represents the portion of the TRSUs granted on January 1, 2021 to Messrs. Kalnin and Jacobsen that remained outstanding and unvested as of December 31, 2021, which vest approximately one-third on each of January 1, 2022, January 1, 2023 and January 1, 2024.

(3) Represents the portion of the TRSUs granted on April 16, 2021 to Mr. Jimenez that remain outstanding and unvested as of December 31, 2021, which vest approximately one-third on each of April 16, 2022, April 16, 2023 and April 16, 2024.

Potential Payments Upon Termination or Change in Control

Separation Benefits in the CEO Employment Agreement

The CEO Employment Agreement provides that, if Mr. Kalnin's employment with the Company is terminated by the Company without "cause" or by Mr. Kalnin with "good reason," (1) any outstanding RSUs granted pursuant to his Annual RSU Grant will become vested and (2) Mr. Kalnin will receive a lump sum payment equal to 200% of the sum of (a) his base salary plus (b) his target annual cash bonus, each in effect at the time of Mr. Kalnin's termination. If Mr. Kalnin elects coverage under the Company's medical plan pursuant to COBRA, Mr. Kalnin will be reimbursed for the full amount of his and his eligible dependents' COBRA premiums for the 18-month period following his termination, unless he earlier becomes eligible for coverage under another employer's medical plan (together with the Annual RSU Grant acceleration and lump sum payment, the "CEO Separation Benefits"). "Cause," as defined in the CEO Employment Agreement, means Mr. Kalnin's (i) indictment for a felony or his commission of fraud against the Company; (ii) misconduct that brings the Company into substantial public disgrace or disrepute; (iii) gross negligence or gross misconduct with respect to the Company; (iv) insubordination to, or material failure to follow lawful directions of, the board of directors, in either case if not cured within 10 days of Mr. Kalnin's receipt of written notice of such event; (v) material violation of the restrictive covenants in the CEO Employment Agreement; (vi) material breach of any a Company work rule or internal policy that is not cured within 10 days of Mr. Kalnin's receipt of written notice of such event (if such event can be cured); (vii) a violation of the Foreign Corrupt Practices Act of 1977 or any state or federal anti-money laundering laws; or (viii) material breach of the CEO Employment Agreement that is not cured within 30 days of

Mr. Kalnin's receipt of written notice of such breach. "Good Reason," as defined in the CEO Employment Agreement, means (i) a material reduction in Mr. Kalnin's base salary or target annual bonus (other than as part of an across-the board reduction of no more than 10% applicable to all of the Company's executives); (ii) a material diminution in Mr. Kalnin's position, duties, authority, reporting or responsibilities; (iii) the Company's material breach of the CEO Employment Agreement; or (iv) the involuntary permanent relocation of Mr. Kalnin's principal place of business to a location more than 35 miles beyond the Company's current place of business.

Mr. Kalnin's receipt of the CEO Separation Benefits is subject to his execution and non-revocation of a release of claims in favor of the Company and his continued compliance with the restrictive covenants contained in the CEO Employment Agreement. Such restrictive covenants include non-competition, non-solicitation (of both employees or customers) and intellectual development prohibitions for 18 months following termination, along with a perpetual confidentiality prohibition.

Separation Benefits in the CFO Employment Agreement

The CFO Employment Agreement provides that, if Mr. Jimenez's employment with the Company is terminated by the Company without "cause" (as defined in the CFO Employment Agreement), Mr. Jimenez will receive 18 months of base salary, subject to his execution of a separation agreement and general release and his compliance with a 12 month non-competition and non-solicitation restriction.

Separation Benefits in the COO Employment Agreement

The COO Employment Agreement provides that, if Mr. Jacobsen's employment with the Company is terminated by the Company without "cause" (as determined by the Company in good faith), Mr. Jacobsen will receive a lump sum payment equal to three months of his base salary.

BKV Corporation 2021 Long Term Incentive Plan

The 2021 Plan was initially adopted by our board of directors on January 1, 2021 and was amended in November 2021. The 2021 Plan will be terminated by the board of directors in connection with this offering.

Purpose. The purpose of the 2021 Plan was to permit the grant of awards to our directors and employees of our Company or any of our subsidiaries, and to attract and retain such individuals who contribute to the achievement of the Company's economic objectives.

Administration. Our 2021 Plan was administered by our Compensation Committee (for purposes of this section, the "Committee") and subject to the board of director's approval. Subject to the terms of the 2021 Plan, the administrator had the authority to, among other things, select the persons to whom awards are granted, determine the nature, extent and timing of the awards to be granted, determine the duration of and restrictions and other conditions applicable to such awards. Any interpretation or determination by the Committee under the 2021 Plan will be final and conclusive. The Committee may delegate its administrative duties or powers to one or more of our officers.

Shares Available. There were 14,941,176 shares of our common stock authorized for grant under the 2021 Plan. The shares available for issuance may be shares authorized but unissued or treasury shares. The Chief Executive Officer had the authority to grant up to 60% of the available shares on or before December 31, 2022 (assuming target payout of the PRSUs). Assuming maximum payout of the PRSUs and based on the TRSUs that were legally outstanding as of September 30, 2022, 12,633,605 shares were underlying outstanding equity awards and 916,119 shares remained available for issuance under the 2021 Plan.

Share Counting. The aggregate number of shares of our common stock that were available for award under the 2021 Plan were reduced by one share of our common stock for every one share of our common stock subject to an award granted under the 2021 Plan. Shares of our common stock that were subtracted from the amount of available shares with respect to an award that ultimately lapsed, expired, was forfeited or for any reason was terminated or unvested were not automatically available again for issuance under the 2021 Plan.

Eligibility. Awards under the 2021 Plan could be granted to employees and directors of the Company or any of our subsidiaries. Eligible recipients who were either (1) the Chief Executive Officer or classified by the Company at the Senior Management level (those reasonably likely to be in the four most highly compensated during the next financial year or otherwise recommended by the Chief Executive Officer and approved by the board of directors as such) or (2) classified by the Company below the Senior Management level but who were recommended for an award by our Chief Executive Officer generally received PRSUs and TRSUs under the 2021 Plan.

Types of Awards Under the 2021 Plan. Pursuant to the 2021 Plan, we could grant TRSUs and PRSUs. Generally, with respect to the aggregate awards anticipated to be granted to participants over a four-year period, 70% of such aggregate award granted under the 2021 Plan were PRSUs and 30% were TRSUs.

Time-Vested Restricted Stock Units. The TRSUs were contemplated as being granted annually beginning on the effective date of the 2021 Plan and in each of the three (3) financial years thereafter or commencing upon an individual first becoming a participant under the 2021 Plan. The TRSUs were subject to the recipient's continued employment and are 25% vested on grant, with the remaining TRSUs vesting 25% on each of the first, second and third anniversaries of grant.

Performance-Vested Restricted Stock Units. The PRSUs were granted as a one-time grant on the effective date of the 2021 Plan or upon an individual first becoming a participant under the 2021 Plan. The PRSUs vest subject to the recipient's continued performance through the vesting date and based upon the level at which the performance metrics are attained, which metrics may be attained at a level between 0% and 100% of the maximum performance level. The performance period for the PRSUs began on the effective date of the 2021 Plan and will end on the earliest of December 31, 2023, the date of an IPO or the date of a Change in Control (as defined in the 2021 Plan), which means that the performance period will end in connection with the completion of this offering. The performance measures include total shareholder return, return on capital employed and the Company's IPO readiness.

Effect of Termination or Forfeiture. Unless otherwise provided in an award agreement, or unless the Committee determines otherwise, upon a participant's termination for any reason, awards held by the participant that have not vested as of the date of his or her termination were forfeited. If the Committee determines that the participant has committed an act that would constitute cause or an adverse action (each as defined in the 2021 Plan), either before or after such participant's termination of employment and regardless of whether such participant was terminated for cause, the Committee in its sole discretion may require that the participant surrender and return to the Company all or any shares of common stock received prior to his or her termination in settlement of any vested award under the 2021 Plan or to disgorge all or any profits or any other economic value made or realized by the participant, during the period beginning one year before the participant's termination in connection with any shares of stock issued upon vesting of any TRSUs and PRSUs granted under the 2021 Plan.

Repurchase, Put and Drag-Along Rights. If a participant (1) committed a material breach of his or her employment agreement or service contract with the Company that was not capable of being remedied or, if capable of being remedied, that was not remedied by the participant within 30 days, or (2) was terminated for any reason, then the Company had the right, which remained open for 90 days following termination, to repurchase all (but not less than all) of the vested shares of common stock acquired by the participant under the 2021 Plan. The purchase price of the vested shares so repurchased was equal to the fair market value of the shares at the time of repurchase. If a participant's employment was terminated for any reason other than the participant's resignation or, if a participant's employment terminated due to his or her voluntary resignation and more than 36 months had passed since the participant's first grant of an incentive award under the 2021 Plan, and, in each case, the Company had not repurchased the participant's shares of common stock acquired under the 2021 Plan, the participant had the right to elect to sell such shares back to the Company at an amount equal to the fair market value of the shares at the time the election to sell was made. In November 2021, both the Company's repurchase right and this put right were amended so that they could not be exercised for at least 181 days following the date the participant's award vests and a "Sell Fund Purchase Program" was implemented whereby, if specifically provided for in an award agreement, participants have the ability to tender shares for repurchase by the Company. Additionally, if Banpu proposed

to effect the sale of shares of common stock representing more than 80% of the total issued and outstanding shares of Banpu, it may have required the participation in such sale of all of the vested shares of common stock owned by participants.

Corporate Transactions; Change in Control. In the event of (1) any reorganization, merger, consolidation, recapitalization, liquidation, reclassification, stock dividend, stock split, combination of shares, rights offering, extraordinary dividend or divestiture or other similar change in corporate structure or shares, (2) any purchase, acquisition, sale, disposition or write-down of a significant amount of assets or a significant business, (3) any change in accounting principles or practices, tax laws or other such laws or provisions affecting reported results, (4) any uninsured catastrophic losses or extraordinary non-recurring items as described in Accounting Standards Codification 225-20, (5) an IPO or (6) any other similar change, in each case with respect to the Company or any other entity whose performance is relevant to the vesting of the PRSUs, the Committee may amend or modify the vesting criteria of any outstanding PRSUs to equitably reflect such event, with the desired result that the criteria for evaluating such financial performance of the Company or such other entity will be substantially the same following such event as prior to such event.

In the event of a Change in Control (as defined in the 2021 Plan), the board of directors or any corporation or entity assuming the obligations of the Company could have provided that awards outstanding under the 2021 Plan be vested in full or in part on the date of such Change in Control or could have provided that such awards be assumed or that an equivalent award be substituted by the acquiring or succeeding corporation. The performance period of the PRSUs would end as of the date of such Change in Control.

Transferability. Generally, awards under the 2021 Plan may not be transferred by a participant except by will or the laws of descent and distribution. However, the 2021 Plan allowed participants to designate a beneficiary that would receive payment or settlement of an award under the 2021 Plan in the event of the participant's death.

Market Standoff. Unless the Committee otherwise provides the participant with prior written consent, the 2021 Plan places market stand-off restrictions on shares of common stock acquired in connection with the grant, vesting or settlement of the PRSUs and TRSUs. The participant may not, without the consent of the Company or the representatives of any underwriters (for the duration determined by the Company and the representatives of the underwriters, but not to exceed 180 days from the date of the final prospectus), (1) sell, pledge, offer to sell, contract to sell, sell any option or contract to purchase, purchase any option or contract to sell, grant any option, right or warrant to purchase or otherwise transfer or dispose of, any shares of common stock or any securities convertible into or exercisable or exchangeable for common stock, or (2) enter into any swap or other arrangement that transfers to another, in whole or in part, any of the economic consequences of ownership of the common stock.

Amendment and Termination. The Committee has the authority to amend or modify for any reason the terms of any outstanding awards under the 2021 Plan, including the authority to modify the number of shares or other terms and conditions of an award, accept the surrender of an outstanding award or, to the extent to previously exercised or vested, authorize the grant of new awards in substitution for surrendered awards. However, the terms of any such amendments must be permitted by the 2021 Plan and such amendment may not (1) cause the award to become taxable under Section 409A of the Code or (2) adversely affect any participant without such participant's consent.

Our board of directors generally may amend, suspend or terminate the 2021 Plan in whole or in part. However, no termination, suspension or amendment of the 2021 Plan may adversely affect any outstanding award without the consent of the affected participant. The 2021 Plan shall terminate pursuant to its terms on the earlier of (1) six months following an IPO (including this offering) and (2) January 1, 2024; however, the board of directors acted to terminate the 2021 Plan in connection with the adoption of the 2022 Plan. Termination of the 2021 Plan pursuant to its terms will not affect the rights of the Company and participants and the Company's and participants' rights will remain in full force and effect as to all outstanding unvested or vested awards, and shares of common stock issued in settlement of awards.

BKV Corporation 2022 Equity And Incentive Compensation Plan

In connection with this offering, our board of directors adopted, and we anticipate our stockholders will approve, the 2022 Plan. The material terms of the 2022 Plan are as follows:

Purpose. The purpose of the 2022 Plan is to permit the grant of awards to our directors, officers and other employees and certain consultants, and to provide to such persons incentives and rewards for service and/or performance.

Administration; Effectiveness. The 2022 Plan will generally be administered by the Compensation Committee or any other committee of the board of directors designated by the board of directors to administer the 2022 Plan (for purposes of this section, the "Committee"). The Committee has the authority to determine eligible participants in the 2022 Plan, and to interpret and make determinations under the 2022 Plan. Any interpretation or determination by the Committee under the 2022 Plan will be final and conclusive. The Committee may delegate its administrative duties or powers to one or more of our officers. However, the board of directors shall have the same powers and authorities as the Committee with respect to grants of awards to non-employee directors and may, in its discretion, act in lieu of the Committee with respect to such awards.

Shares Available for Awards under the 2022 Plan. Subject to adjustment as described in the 2022 Plan, the number of shares of our common stock available for awards under the 2022 Plan is, in the aggregate, 10,000,000 shares of our common stock (which we refer to as the "Available Shares"), with such shares subject to adjustment to reflect any extraordinary cash dividend, stock dividend, split or combination of our common stock. The Available Shares may be shares of original issuance, treasury shares or a combination of the foregoing.

The 2022 Plan also contains limits on the maximum value at grant for awards to non-employee directors in any calendar year of $750,000.

Share Counting. The aggregate number of shares of our common stock available for award under the 2022 Plan will be reduced by one share of our common stock for every one share of our common stock subject to an award granted under the 2022 Plan.

Shares of our common stock subject to an award that is cancelled or forfeited, expires, is settled for cash or is unearned (in whole or in part) will be added back to the aggregate number of shares of our common stock available under the 2022 Plan, however, the following shares of our common stock will not be added back: (i) shares of our common stock withheld by us in payment of the exercise price of a stock option; (ii) shares of our common stock tendered or otherwise used in payment of the exercise price of a stock option; (iii) shares of our common stock withheld by us or tendered or otherwise used to satisfy a tax withholding obligation; (iv) shares of our common stock subject to share-settled appreciation rights that are not actually issued in connection with the settlement of such appreciation right; and (v) shares of our common stock reacquired by the Company on the open market or otherwise using cash proceeds from the exercise of stock options. In addition, if under the 2022 Plan a participant has elected to give up the right to receive cash compensation in exchange for shares of our common stock based on fair market value, such shares of our common stock will not count against the aggregate number of shares of our common stock available under the 2022 Plan.

Shares of our common stock issued or transferred pursuant to awards granted under the 2022 Plan in substitution for or in conversion of, or in connection with the assumption of, awards held by awardees of an entity engaging in a corporate acquisition or merger with us or any of our subsidiaries (which we refer to as "Substitute Awards") will not count against, nor otherwise be taken into account in respect of, the share limits under the 2022 Plan unless otherwise provided in the 2022 Plan. Additionally, shares of common stock available under certain plans that we or our subsidiaries may assume in connection with corporation transactions from another entity may be available for certain awards under the 2022 Plan, but will not count against, nor otherwise be taken into account in respect of, the share limits under the 2022 Plan.

Types of Awards Under the 2022 Plan. Pursuant to the 2022 Plan, we may grant stock options, appreciation rights, restricted stock, RSUs, performance shares, performance units, cash incentive awards, and certain other awards based on or related to shares of our common stock.

Each grant of an award under the 2022 Plan will be evidenced by an award agreement or agreements, which will contain such terms and provisions as the Committee may determine, consistent with the 2022 Plan. Those terms and provisions include the number of our shares of our common stock subject to each award, earning or vesting terms and any other terms consistent with the 2022 Plan. A brief description of the types of awards which may be granted under the 2022 Plan is set forth below.

Stock Options. Stock options granted under the 2022 Plan are non-qualified stock options and must have an exercise price per share that is not less than the fair market value of a share of our common stock on the date of grant. The term of a stock option may not extend more than 10 years after the date of grant. Each grant will specify the form of consideration to be paid in satisfaction of the exercise price.

Appreciation Rights. The 2022 Plan provides for the grant of appreciation rights. An appreciation right is a right to receive from us an amount equal to 100%, or such lesser percentage as the Committee may determine, of the spread between the base price and the value of shares of our common stock on the date of exercise. An appreciation right may be paid in cash, shares of our common stock or any combination thereof. Except with respect to Substitute Awards, the base price of an appreciation right may not be less than the fair market value of a share of common stock on the date of grant. The term of an appreciation right may not extend more than 10 years from the date of grant.

Restricted Stock. Restricted stock constitutes an immediate transfer of the ownership of shares of our common stock to the participant in consideration of the performance of services, entitling such participant to dividend, voting and other ownership rights, subject to the substantial risk of forfeiture and restrictions on transfer determined by the Committee for a period of time determined by the Committee or until certain management objectives specified by the Committee are achieved. Each such grant or sale of restricted stock may be made without additional consideration or in consideration of a payment by the participant that is less than the fair market value per share of our common stock on the date of grant. Any grant of restricted stock may specify the treatment of dividends or distributions paid on restricted stock that remains subject to a substantial risk of forfeiture. Any such dividends or other distributions on restricted stock shall be deferred until, and paid contingent upon, the vesting of such restricted stock.

Restricted Stock Units. RSUs awarded under the 2022 Plan constitute an agreement by us to deliver shares of our common stock, cash, or a combination thereof, to the participant in the future in consideration of the performance of services, but subject to the fulfillment of such conditions (which may include the achievement of management objectives) during the restriction period as the Committee may specify. Each grant or sale of RSUs may be made without additional consideration or in consideration of a payment by the participant that is less than the fair market value of shares of our common stock on the date of grant. During the applicable restriction period, the participant will have no ownership, transfer or voting rights in the shares of our common stock underlying the RSUs. Rights to dividend equivalents may be extended to and made part of any RSU award at the discretion of and on the terms determined by the Committee, provided that any dividend equivalents or other distributions on the shares of our common stock underlying the RSUs shall be deferred until and paid contingent upon the vesting of such RSUs. Each grant of RSUs will specify that the amount payable with respect to such RSUs will be paid in cash, shares of our common stock, or a combination of the two.

Cash Incentive Awards, Performance Shares, and Performance Units. Performance shares, performance units and cash incentive awards may also be granted to participants under the 2022 Plan. A performance share is a bookkeeping entry that records the equivalent of one share of our common stock, and a performance unit is a bookkeeping entry that records a unit equivalent to $1.00 or such other value as determined by the Committee. Each grant will specify the number or amount of performance shares or performance units, or the amount payable with respect to cash incentive awards, being awarded, which number or amount may be subject to adjustment to reflect changes in compensation or other factors.

These awards, when granted under the 2022 Plan, become payable to participants upon the achievement of specified management objectives and upon such terms and conditions as the Committee determines at the time of grant. Each grant will specify the management objectives regarding the earning of the award. Each grant will specify the time and manner of payment of cash incentive awards, performance shares or performance units that have been earned, and any grant may further specify that any such amount may be paid or settled in cash, shares of our common stock, or any combination thereof. Any grant of performance

shares or performance units may provide for the payment of dividend equivalents in cash or in additional shares of our common stock, provided that such dividend equivalents shall be subject to deferral and payment on a contingent basis based on the earning and vesting of the performance shares or performance units, as applicable, with respect to which such dividend equivalents are paid.

Other Awards. The Committee may authorize the grant of such other awards (which we refer to as "other awards") that may be denominated or payable in, valued in whole or in part by reference to, or otherwise based on, or related to, shares of our common stock or factors that may influence the value of such shares of our common stock, including, without limitation, convertible or exchangeable debt securities, other rights convertible or exchangeable into shares of our common stock, purchase rights for shares of our common stock, awards with value and payment contingent upon our performance or performance of specified subsidiaries, affiliates or other business units or any other factors designated by the Committee, and awards valued by reference to the book value of the shares of our common stock or the value of securities of, or the performance of our subsidiaries, affiliates or other business units.

Adjustments; Corporate Transactions. The Committee will make or provide for such adjustments in the: (i) number and kind of shares of our common stock covered by outstanding stock options, appreciation rights, restricted stock, RSUs, performance shares, performance units and, if applicable, other awards; (ii) exercise price or base price provided in outstanding stock options and appreciation rights; (iii) cash incentive awards; and (iv) other award terms, as the Committee determines to be equitably required in order to prevent dilution or enlargement of the rights of participants that otherwise would result from (a) any extraordinary cash dividend, stock dividend, stock split, combination of shares, recapitalization or other change in our capital structure, (b) any merger, consolidation, spin-off, spin-out, split-off, split-up, reorganization, partial or complete liquidation or other distribution of assets, issuance of rights or warrants to purchase securities or (c) any other corporate transaction or event having an effect similar to any of the foregoing.

In the event of any such transaction or event, or in the event of a change in control (as defined in the 2022 Plan), the Committee may provide in substitution for any or all outstanding awards under the 2022 Plan such alternative consideration (including cash), if any, as it may in good faith determine to be equitable under the circumstances and will require in connection therewith the surrender of all awards so replaced in a manner that complies with Section 409A of the Code. In addition, for each stock option or appreciation right with an exercise price greater than the consideration offered in connection with any such transaction or event or change in control, the Committee may in its discretion elect to cancel such stock option or appreciation right without any payment to the person holding such stock option or appreciation right. The Committee will make or provide for such adjustments to the number of shares available for issuance under the 2022 Plan and the share limits of the 2022 Plan as the Committee in its sole discretion may in good faith determine to be appropriate in connection with such transaction or event.

Transferability of Awards. Except as otherwise provided by the Committee, no stock option, appreciation right, restricted share, RSU, performance share, performance unit, cash incentive award, other award or dividend equivalents paid with respect to awards made under the 2022 Plan may be transferred by a participant except by will or the laws of descent and distribution.

Amendment and Termination of the 2022 Plan . Our board of directors generally may amend the 2022 Plan from time to time in whole or in part. However, if any amendment (i) would materially increase the benefits accruing to participants under the 2022 Plan, (ii) would materially increase the number of shares of our common stock which may be issued under the 2022 Plan, (iii) would materially modify the requirements for participation in the 2022 Plan, or (iv) must otherwise be approved by our stockholders in order to comply with applicable law or the rules of the NYSE, then such amendment will be subject to stockholder approval and will not be effective unless and until such approval has been obtained.

Our board of directors may, in its discretion, terminate the 2022 Plan at any time. Termination of the 2022 Plan will not affect the rights of participants or their successors under any awards outstanding and not exercised in full on the date of termination. No grant will be made under the 2022 Plan more than 10 years after the effective date of the 2022 Plan, but all grants made prior to such date shall continue in effect thereafter subject to the terms of the 2022 Plan.

IPO Equity Grants

The Compensation Committee approved the grant of RSU awards upon the consummation of this offering under the 2022 Plan, subject to final approval of our stockholders of the 2022 Plan, to our NEOs. Sixty percent (60%) of each RSU award is subject to performance-based vesting and will vest upon the achievement of pre-specified performance goals at the end of a three-year performance period and forty percent (40%) of each RSU award is subject to time-based vesting and will vest in three equal installments on each of the first three anniversaries of the grant date. The vesting of both the performance-based and time-based RSUs will be subject to the grantee's continued employment through the applicable vesting date. We anticipate that the RSUs granted to our NEOs will have the following grant date fair values: Mr. Kalnin: $4,083,333, Mr. Jimenez: $1,866,667 and Mr. Jacobsen: $1,866,667. Following the vesting date, these RSU awards are expected to be settled in shares of our common stock.

BKV Corporation Employee Stock Purchase Plan

In connection with this offering, our board of directors adopted, and we anticipate our stockholders will approve, the ESPP. The ESPP is intended to qualify as an "employee stock purchase plan" under Section 423 of the Code. The material terms of the ESPP are as follows:

Purpose. The purpose of the ESPP is to provide employees of the Company and certain of its subsidiaries with an opportunity to acquire a proprietary interest in the Company through the purchase of shares of our common stock.

Administration. The ESPP will be administered by the Compensation Committee (for purposes of this section, the "Committee"). Subject to the terms of the ESPP, the Committee will have the complete discretion to establish the terms and conditions of offerings under the ESPP and the subsidiaries, if any, eligible to participate in such offerings, to interpret the ESPP and to make all decisions related to the operation of the ESPP. The board of directors has the same powers as the Committee and may act in lieu of the Committee with respect to the ESPP.

Shares Available for Issuance. Subject to adjustment as described in the ESPP, the number of shares of our common stock available for awards under the ESPP is 1,000,000 shares of our common stock.

Eligibility. All employees who have been employed by the Company or a designated subsidiary (whether currently existing or subsequently established) for at least six months prior to the beginning of an Offering and who work at least 20 hours per week and more than five months per calendar year are eligible to participate in the ESPP, resulting in approximately 355 employees (including six executive officers) as eligible participants. The Committee may permit employees who work less than 20 hours per week or less than five months per year to participate and may exclude certain categories of employees from participating in any offering to the extent permitted by Section 423 of the Code, including employees who have not completed a minimum period of service with the Company and/or highly compensated employees. An employee may be excluded from participation in the ESPP if his or her participation in the ESPP is prohibited by local law or if complying with local law would cause the ESPP or an offering to violate the requirements of Section 423 of the Code. Also, in accordance with Section 423 of the Code, no employee may be granted a right to purchase shares of the Company's Class A Common Stock under the ESPP if, immediately after such grant, such employee would own stock and/or hold outstanding options to purchase stock possessing 5% or more of the total combined voting power or value of all classes of stock of the Company or any subsidiary (including in such calculation stock held directly or indirectly by or for the benefit of the employee and stock held by certain persons related to the employee) or if such option would permit his or her rights to purchase stock under all employee stock purchase plans of the Company and its subsidiaries to accrue at a rate that exceeds $25,000 of the fair market value of such stock (determined at the time the option is granted) for each calendar year in which such option is outstanding at any time.

Participation. The ESPP will permit an eligible employee to purchase shares of the Company's common stock through payroll deductions, which may not exceed 10% of the employee's eligible compensation (or such lesser or greater limit as may be determined by the Committee for a particular offering). Employees will be able to withdraw all, but not less than all, of their accumulated payroll deductions prior to the end of an offering in accordance with the terms of the offering. Participation in the ESPP will

end automatically upon termination of employment. In the event of withdrawal or termination of participation in the ESPP, a participant's accumulated payroll contributions will be refunded without interest.

Certain limitations on the number of shares of our common stock that a participant may purchase apply. For example, if an offering is over-subscribed whereby, when added together, the total number of shares of our common stock purchased by all participants in a given offering would exceed the total number of shares of our common stock remaining available under the ESPP, the Committee shall allocate such shares remaining available under the ESPP in as uniform a manner as practicable and as the Committee determines to be equitable.

Offerings; Purchase Price. The ESPP will be implemented through a series of offerings of up to a period of 27 months, which will consist of one offering period. During the offering period, payroll contributions will accumulate without interest and, on the last trading day of the offering period, accumulated payroll deductions will be used to purchase shares of our common stock.

The purchase price for each offering will be established by the Committee and may not be less than 85% of the fair market value of a share of our common stock on either the first trading day of an offering or on the purchase date, whichever is lower.

Adjustments. In the event that there occurs a change in our capital structure through such actions as an extraordinary cash or a stock dividend, a stock split, combination of shares or recapitalization, or a merger, consolidation, spin-off, split-off, spin-out, split-up, reorganization, partial or complete liquidation or other distribution of assets, issuance of rights or warrants to purchase securities, or any other corporate transaction or event having a similar effect, then in order to prevent dilution or enlargement of the benefits or potential benefits intended to be made available under the ESPP, the Committee will adjust (1) the number of shares reserved under the ESPP, (2) the number of shares by which the share reserve may increase automatically each year, (3) the purchase price of outstanding options and (4) the number of shares that are subject to purchase limits under an ongoing offering.

Dissolution or Liquidation. In the event of a proposed dissolution or liquidation of the Company, any offering then in progress will be shortened by setting a new purchase date before the proposed dissolution or liquidation and the offering will end immediately prior to the proposed dissolution or liquidation.

Change in Control. Unless otherwise determined by the Committee, in the event of a change in control (as defined in the ESPP) each outstanding option under the ESPP will be assumed or an equivalent option will be substituted by the successor corporation (or a parent or subsidiary of such successor corporation) and if the successor corporation refused to assume or substitute the options, then, unless otherwise provided by the Committee, the offering with respect to which the option relates will be shortened by setting a new purchase date, that will occur before the date of the change in control, on which the offering will end.

ESPP Amendment or Termination. The board of directors has the authority to amend or terminate our ESPP at any time. If any offering is terminated before its scheduled expiration, all amounts that have not been used to purchase shares of our common stock will be returned to participants (without interest, except as otherwise required by applicable law) as soon as administratively practicable. Unless earlier terminated by the board of directors, the ESPP shall have a term of 10 years.

Director Compensation

Name[1]	2021 Fees earned or paid in cash ($)[2]	Total($)
Chanin Vongkusolkit	—	—
Somruedee Chaimongkol	—	—
Joseph R. Davis	57,500	57,500
Akaraphong Dayananda	—	—
Thiti Mekavichai	—	—
Charles C. Miller III	57,500	57,500
Anon Sirisaengtaksin	—	—

(1) Mr. S. Vongkusolkit was elected to our board of directors effective July 19, 2022, and Ms. Mashinski and Mr.Patel were elected to our board effective September 1, 2022.

(2) In 2021, Messrs. Davis and Miller each receive an annual $50,000 cash retainers and additional $7,500 cash retainers, for service on the Compensation Committee (for Mr. Davis) and service on the Audit & Risks Committee (for Mr. Miller).

Through September 1, 2022, the non-executive members of our board of directors, other than Messrs. Davis and Miller, did not receive any compensation from the Company. Any compensation paid through such time by Banpu to our non-executive directors, including Messrs. C. Vongkusolkit, Dayananda, Mekavichai and Sirisaengtaksin and Ms. Chaimongkol, is not reflected as such compensation was not paid by us or our subsidiaries and related to such individual's services to Banpu.

On December 16, 2021, Mr. Davis, and on December 13, 2021, Messrs. Mekavichai and Miller, each purchased 6,000, 37,000 and 135,000 shares of our common stock, respectively, for a per share purchase price of $11.06 per share and an aggregate purchase price of $66,360; $409,220 and $1,493,100, respectively, under the Company's 2020 Employee Stock Purchase Plan, adopted on July 16, 2020, as amended (the "2020 ESPP"). The 2020 ESPP afforded certain employees and directors of the Company selected by the Chief Executive Officer of the Company the opportunity to purchase shares of common stock for the greater of $10.00 per share and the fair market value of a share on the date of purchase.

Our board of directors adopted the BKV Corporation Non-Employee Director Compensation Program (the "Non-Employee Director Compensation Program") which provides that, beginning on September 1, 2022, our non-employee directors will be compensated as follows:

- Each non-employee director, other than a non-employee director who serves as chairman of the board, will be entitled to receive an annual cash retainer of $75,000, and any non-employee director serving as the chairman of the board will be entitled to receive an annual cash retainer of $137,500, each of which will be paid in quarterly installments, based on calendar quarters, in arrears on a prorated basis;
- Members of our Audit & Risks Committee (other than the chairperson thereof) will be entitled to receive an additional cash retainer of $10,000, and the chairperson of the Audit & Risks Committee will be entitled to receive an additional cash retainer of $20,000, each paid in quarterly installments, based on calendar quarters, in arrears on a prorated basis;
- Members of our Compensation Committee and Governance Committee (other than the chairpersons thereof) will be entitled to receive an additional cash retainer of $5,000, and the chairperson of the Compensation Committee and chairperson of the Governance Committee will be entitled to receive an additional cash retainer of $15,000, each paid in quarterly installments, based on calendar quarters, in arrears on a prorated basis;
- Each non-employee director who is re-elected to serve, or will continue serving as a non-employee director immediately following any annual meeting of the Company's stockholders, will receive an annual grant of RSUs on the date of the Company's annual shareholder meeting with a grant date value of $140,000, if such non-employee director will not serving as the chairman of the board, or $202,500 if such non-employee director will serve as the chairman of the board, which will vest on the day prior to the first annual meeting of the Company's stockholders following the date the RSUs are granted, subject to the non-employee director's continued service; and
- Each non-employee director will be reimbursed for reasonable out-of-pocket expenses incurred in attending meetings of the board or any of its committees.

Because the Non-Employee Director Compensation Program was adopted mid-term, compensation payable thereunder will be pro-rated based on the non-employee director's service over the period beginning on the day the Non-Employee Director Compensation Program became effective through the day prior to the estimated date of the next annual meeting of the Company's stockholders. To the extent the 2022 Plan has not become effective prior to such meeting, cash will be paid in lieu of the RSU awards. Messrs. C. Vongkusolkit, Dayananda, Mekavichai, Sirisaengtaksin and S. Vongkusolkit and Ms. Chaimongkol have waived their participation in the Non-Employee Director Compensation Plan, and therefore will not receive any compensation payable thereunder.

PRINCIPAL STOCKHOLDERS

The following table sets forth certain information regarding the beneficial ownership of our common stock immediately following the completion of this offering by (i) each NEO and director of the Company, (ii) all executive officers and directors of the Company as a group; and (iii) each person known to the Company to own beneficially more than 5% of any class of our voting securities. Except as otherwise indicated, (a) the persons or entities identified in the table have sole voting and investment power with respect to all shares shown as beneficially owned by them and (b) the current directors and executive officers have not pledged any of such shares as security. All information with respect to beneficial ownership has been furnished by the respective 5% or more stockholders, directors or executive officers, as the case may be.

The following information has been presented in accordance with the SEC's rules and is not necessarily indicative of beneficial ownership for any other purpose. Under the SEC's rules, beneficial ownership of a class of capital stock as of any date includes any shares of that class as to which a person, directly or indirectly, has or shares voting power or investment power as of that date and also any shares as to which a person has the right to acquire sole or shared voting or investment power as of or within 60 days after that date through the exercise of any stock option, warrant or other right (including any conversion or redemption right).

We have based our calculation of the percentage of beneficial ownership prior to this offering on 117,325,797 shares of our common stock outstanding. We have based our calculation of the percentage of beneficial ownership after this offering on shares of our common stock outstanding immediately following the completion of this offering, assuming that the underwriters do not exercise their option to purchase additional shares.

Unless otherwise indicated, the address of each beneficial owner listed in the table below is c/o BKV Corporation, 1200 17th Street, Suite 2100, Denver, Colorado 80202.

* Less than 1%.

(1) Includes 48,884 shares of our common stock underlying outstanding TRSUs that will vest within 60 days of the date of this prospectus and 1,751,509 shares of our common stock held by Mr. Kalnin's spouse. Does not include 1,825,040 shares of our common stock underlying outstanding PRSUs (at maximum payout) that are subject to vesting to the extent that performance measures are achieved. In addition, Mr. Kalnin will receive 73,330 shares of our common stock underlying outstanding TRSUs that will vest upon consummation of this offering.

(2) Does not include 865,200 shares of our common stock underlying outstanding PRSUs (at maximum payout) that are subject to vesting to the extent that performance measures are achieved. In addition, Mr. Jimenez will receive 57,939 shares of our common stock underlying outstanding TRSUs that will vest upon consummation of this offering.

(3) Includes 27,750 shares of our common stock underlying outstanding TRSUs that will vest within 60 days of the date of this prospectus. Does not include 1,036,000 shares of our common stock underlying outstanding PRSUs (at maximum payout) that are subject to vesting to the extent that performance measures are achieved. In addition, Mr. Jacobsen will receive 41,625 shares of our common stock underlying outstanding TRSUs that will vest upon consummation of this offering.

(4) Approximately 96.1% of our outstanding shares of common stock are currently owned by BNAC, a Delaware corporation wholly owned by BOG Co., Ltd., a wholly owned subsidiary of Banpu, a public company listed on the Stock Exchange of Thailand and the ultimate parent company of BKV Corporation, BNAC, Banpu Power and BPPUS. The principal address of Banpu is 27th Floor, Thanapoom Tower, 1550 New Petchburi Road, Makkasan, Ratchathewi, Bangkok, Thailand.

CERTAIN RELATIONSHIPS AND RELATED PARTY TRANSACTIONS

We describe below transactions and series of similar transactions, during our last three fiscal years or currently proposed, to which we were a party or will be a party, in which:

- the amounts involved exceeded or will exceed $120,000; and
- any of our directors, director nominees, executive officers or beneficial holders of more than 5% of any class of our voting securities, or any immediate family member of any such person, had, or will have, a direct or indirect material interest.

Other than as described below, there have not been, nor are there any currently proposed, transactions or series of similar transactions meeting these criteria to which we have been or will be a party other than compensation arrangements, which are described where required under "*Executive Compensation*."

Stockholders' Agreement

We are party to a stockholders' agreement, dated as of May 1, 2020, with certain of our stockholders, including BNAC and Chris Kalnin. Our existing stockholders' agreement will be terminated prior to the completion of this offering.

Additionally, in connection with the closing of this offering, we will enter into our Stockholders' Agreement with BNAC. Pursuant to our Stockholders' Agreement, for so long as BNAC and Banpu beneficially own 10% or more of our voting stock, BNAC will be entitled to designate for nomination to our board of directors a number of individuals approximately proportionate to such beneficial ownership, provided that (i) from the completion of this offering until the first anniversary of the completion of this offering, at least three board seats will not be BNAC designees, (ii) from and after the first anniversary of the completion of this offering until the first date on which BNAC and Banpu beneficially own 50% or less of our voting stock, at least four board seats will not be BNAC designees, and (iii) from and after the first date on which BNAC and Banpu beneficially own 50% or less of our voting stock, a number of board seats equal to the minimum number of directors that would constitute a majority of the total number of directors comprising our board of directors will not be BNAC designees. Under our Stockholders' Agreement, we will agree to use our best efforts to cause the election of the individuals nominated by BNAC to our board of directors, including nominating such individuals to be elected as a director, recommending their election and soliciting proxies or consents in favor of their election. Our Stockholders' Agreement also provides that we and BNAC shall, to the extent permitted by law, take actions to cause our Chief Executive Officer to be included in our board of directors.

In addition, for so long as BNAC and its affiliates beneficially own shares of our voting stock representing at least 25% of our total voting power, BNAC will have the right to designate the chairman of our board of directors from among its designees. Our Stockholders' Agreement will also provide BNAC with certain information rights for so long as it continues to own shares of our voting stock representing at least 25% of our voting power. Further, we may not amend our charter or our bylaws in a manner inconsistent with the rights granted to BNAC pursuant to our Stockholders' Agreement without BNAC's consent.

Our Stockholders' Agreement will terminate on the earlier to occur of (i) such time as BNAC is no longer entitled to designate a director pursuant to our Stockholders' Agreement (except that the registration rights discussed below will survive and continue until BNAC and its affiliates no longer hold any shares of our common stock constituting registrable securities (as defined in our Stockholders' Agreement)) and (ii) the delivery of written notice by BNAC to us requesting termination of our Stockholders' Agreement.

BKV-BPP Power Joint Venture

BKV-BPP Power is jointly controlled by us and BPPUS through a board of directors (the "BKV-BPP board") consisting of eight members, four of whom are appointed by us and four of whom are appointed by BPPUS. We account for BKV-BPP Power using the equity method of accounting.

In November 2021, BKV-BPP Power acquired Temple I for an aggregate purchase price of $430.0 million. BKV-BPP Power was formed in July 2021 for the purpose of purchasing and operating Temple I and is a joint venture owned 50% by us and 50% by BPPUS, a wholly owned subsidiary of Banpu Power.

In connection with the purchase of Temple I, we made a capital contribution to BKV-BPP Power in the amount of $87.0 million and BPPUS made a capital contribution to BKV-BPP Power in the amount of $87.0 million.

BKV-BPP Loan Agreements

On October 14, 2021, BKV-BPP Power entered into a Loan Agreement (the "$141 Million Banpu Loan Agreement") with BNAC, which allowed for a single drawdown in the amount of $141.0 million. On November 1, 2021, BKV-BPP Power borrowed $141.0 million for the purpose of acquiring Temple I and working capital.

On October 15, 2021, BKV-BPP Power entered into a Loan Agreement (the "141 Million BPPUS Loan Agreement" and, together with the $141 Million Banpu Loan Agreement, the "BKV-BPP Loan Agreements") with BPPUS, which allowed for a single drawdown in the amount of $141.0 million. On November 21, 2021, BKV-BPP Power borrowed $141.0 million for the purpose of acquiring Temple I and working capital.

BKV-BPP Power's payment obligations under the BKV-BPP Loan Agreements are senior unsecured indebtedness. The BKV-BPP Loan Agreements bear interest at six-month LIBOR plus 5.25% per annum. Interest on the loans is payable on a semi-annual basis, and the loans will mature on November 1, 2023. BKV-BPP is permitted to prepay the loans at any time, with no prepayment premium. The BKV-BPP Loan Agreements include covenants that, among other things, prohibit BKV-BPP from merging, incurring liens or incurring any additional indebtedness or guarantees. The BKV-BPP Loan Agreements include financial covenants that require BKV-BPP to maintain a minimum net worth (as defined in the BKV-BPP Loan Agreements, but generally meaning total assets minus total liabilities). In the $141 Million Banpu Loan Agreement, the minimum net worth requirement is $120.0 million and in the $141 Million BPPUS Loan Agreement, the minimum net worth requirement is $40.0 million. Under the BKV-BPP Loan Agreements, BNAC and BPPUS have no recourse to us with respect to any amounts owed to them thereunder and we are not liable in any manner (and are not required to provide security) for any obligations owed to them thereunder.

BKV-BPP Power Limited Liability Company Agreement

We and BPPUS are each a party to the BKV-BPP Power LLC Agreement governing the BKV-BPP Power Joint Venture, which, among other things, provides that a general manager appointed by the BKV-BPP board will have the power to manage and administer the business and affairs of BKV-BPP Power, subject to specified matters reserved for approval by the BKV-BPP board. The appointment and removal of the general manager must be approved by both the BKV-BPP board and BPPUS. Transfer or encumbrance of a party's interest in BKV-BPP Power is permitted without prior approval of the other party or the BKV-BPP board. However, no transfer will be permitted if the transfer: (A) would subject BKV-BPP Power to U.S. federal securities law reporting requirements, (B) would cause BKV-BPP Power to lose its status as a U.S. partnership for federal income tax purposes or will cause BKV-BPP Power to be classified as a "publicly traded partnership," (C) would violate, give rise to a default under or cause any payment to become due under any credit agreement, guaranty, or similar credit document or any other material contract to which BKV-BPP Power or any affiliate is bound, or (D) occurs prior to the repayment by BKV-BPP Power of all loans and other amounts outstanding under the term loans.

In the event that either party admits in writing that it is unable to perform its obligations (including any obligation to provide additional capital contributions) under the BKV-BPP Power LLC Agreement, the non-defaulting party will be entitled to (i) sell the assets of the joint venture and dissolve the joint venture on reasonable terms deemed acceptable to the BKV-BPP board, (ii) obtain specific performance of the non-defaulting party's obligations, and/or (iii) exercise any other right or remedy provided in law or in equity.

The BKV-BPP board will determine the amount and timing of distributions of operating cash flow (which will be done no less frequently than once per quarter) and net capital proceeds (which will be distributed within three business days after becoming available for distribution). All distributions will be made on a pro-rata basis to us and BPPUS. As of September 30, 2022, no distributions have been made by BKV-BPP Power. Additional cash capital contributions will be required to be made by us and by BPPUS on

a pro-rata basis upon 30 days written notice either by us or by BPPUS; provided that the additional contributions must be expended on items included in the annual approved budget, items in response to an emergency in the event that BKV-BPP Power does not have sufficient cash reserves to address such emergency, or any other matter approved by the BKV-BPP board. Otherwise, neither us nor BPPUS will be required to provide additional capital contributions without consent.

Major decisions and significant activities of BKV-BPP Power are reserved for approval by at least a majority of the members of the BKV-BPP board, such as, among other things, any merger, consolidation, amalgamation, conversion of BKV-BPP or any of its subsidiaries, into another form or entity or other business combination of any nature, wind up, the dissolution, liquidation, commencement or any filing or petition for a voluntary bankruptcy, reorganization, debt arrangement involving BKV-BPP Power, any plan to or initial sale of BKV-BPP Power or other equity interests to the public, any amendments, restatements or revocations of its organizational documents, execution, amendment or termination of a material contract, and any amendment to or deviation from the dividend policy of the joint venture or any of its subsidiaries. Under the terms of the BKV-BPP Power LLC Agreement:

- we do not have the power to unilaterally cause BKV-BPP Power to make distributions;
- we may be required to make additional capital contributions to fund items approved in the annual budget or other matters approved by the board of BKV-BPP Power at the request of BPPUS, which would reduce the amount of cash otherwise available for dividend payments by us on our common stock or require us to incur additional indebtedness; and
- BKV-BPP Power may incur additional indebtedness in an amount greater than $1,500,000 if approved by the board of BKV-BPP Power, which debt payments would reduce the amount of cash that might otherwise be available for distributions to us.

In December 2021, we entered into an Administrative Service Agreement (the “Administrative Services Agreement”) with BKV-BPP Power. Under the Administrative Service Agreement, we provide certain operational, accounting, tax and other services as required by the Administrative Services Agreement and in return receive an annual fee of $2.6 million until December 1, 2022, with options to extend. In addition to the annual fee, we are entitled to receive reimbursement for all (i) reasonable, ordinary and necessary out-of-pocket expenses actually incurred in connection with travel, (ii) actual costs of audits, legal fees, tax return preparations and other third-party professional fees approved by BKV-BPP Power and (iii) reasonable, ordinary and necessary out-of-pocket expenses actually incurred by us in connection with the services provided by us under the Administrative Services Agreement. During the nine months ended September 30, 2022 and the year ended December 31, 2021, we recognized $2.0 million and $0.2 million, respectively, of revenues related to the services provided under the Administrative Services Agreement.

Loan Agreements

Intercompany Loan Agreements

On December 17, 2019, BKV O&G entered into the $10 Million Loan Agreement with BNAC, which allowed for a single drawdown in the amount of $10.0 million. On June 23, 2020, we entered into a novation agreement with BKV O&G and BNAC, which transferred all of BKV O&G’s rights and obligations under the $10 Million Loan Agreement to us. Also on June 23, 2020, we entered into the First Amendment to the Loan Agreement. On July 1, 2020, we borrowed $10.0 million thereunder for working capital purposes. During the year ended December 31, 2020, we paid $0.2 million in interest on the loan, and on December 31, 2020, we repaid $5.0 million of the outstanding principal amount of the loan. During the year ended December 31, 2021, we paid $0.1 million in interest on the loan and repaid the remaining outstanding principal amount of the loan in full. The First Amendment to $10 Million Loan Agreement terminated on June 20, 2021.

On September 28, 2020, we borrowed $119.0 million under the $119 Million Loan Agreement with BNAC to partially fund the Devon Barnett Acquisition and for working capital. During the year ended December 31, 2020, we paid $1.5 million in interest on the loan, and on December 16, 2020, we repaid $100.0 million of the outstanding principal amount of the loan. During the year ended December 31, 2021, we paid $0.2 million in interest on the loan, and on March 15, 2021, we repaid the remaining outstanding

principal amount of the loan in full. The $119 Million Loan Agreement terminated concurrently with repayment of the remaining principal amount.

On November 8, 2021, we borrowed $50.0 million under the $50 Million Loan Agreement with BNAC. On January 11, 2022, we repaid $15.0 million of the outstanding principal amount of the loan. On June 1, 2022, we paid $1.3 million in interest on the loan and repaid the remaining $35.0 million of the outstanding principal amount of the loan in full. The $50 Million Loan Agreement terminated concurrently with repayment of the remaining principal amount.

For additional information, see "*Management's Discussion and Analysis of Financial Condition and Results of Operations — Liquidity and Capital Resources — Loan Agreements and Credit Facilities — Intercompany Loan Agreements*."

Subordinated Intercompany Loan Agreements

On October 14, 2021, we borrowed $116.0 million under the $116 Million Loan Agreement with BNAC to redeem all of the outstanding preferred and common stock of the company owned by OCM BKV Holdings, LLC, an affiliate of Oaktree Capital Management L.P. Following such redemption, we do not have any issued and outstanding preferred stock. On June 15, 2022, we entered into the $116 Million A&R Loan Agreement, which amended and restated the $116 Million Loan Agreement to, among other things, subordinate the $116.0 million term loan owed to BNAC thereunder to the term loans we borrowed under the Term Loan Credit Agreement. On August 24, 2022, BNAC entered into a Subordination Agreement with Bangkok Bank Public Company Limited, New York Branch, which subordinated the $116.0 million term loan owed to BNAC to the revolving loans at any time outstanding under the Revolving Credit Agreement (the "August 2022 Subordination Agreement"). On September 16, 2022, we repaid the full $116.0 million balance of the loan.

On March 10, 2022, we borrowed $75.0 million under the $75 Million Loan Agreement with BNAC to fund the deposit for the Exxon Barnett Acquisition. On June 15, 2022, we entered into the $75 Million A&R Loan Agreement, which amended and restated the $75 Million Loan Agreement to, among other things, subordinate the $75.0 million term loan owed to BNAC thereunder to the term loans we borrowed under the Term Loan Credit Agreement. The August 2022 Subordination Agreement provides for the subordination of the $75.0 million term loan owed to BNAC thereunder to the revolving loans at any time outstanding under the Revolving Credit Agreement. We intend to use a portion of the net proceeds from this offering to repay in full the $75 Million A&R Loan Agreement.

For additional information, see "*Management's Discussion and Analysis of Financial Condition and Results of Operations — Liquidity and Capital Resources — Loan Agreements and Credit Facilities — Subordinated Intercompany Loan Agreements*."

Tax Sharing Agreement

Since our inception, BNAC has owned, directly and indirectly, in excess of 80% of the outstanding shares of our common stock, with the result that we have been included in BNAC's consolidated federal income tax group (as well as in certain consolidated, combined and unitary state and local income tax returns filed by BNAC). If and when BNAC's ownership of our common stock falls below 80%, we will cease to be part of BNAC's consolidated federal income tax group (a "deconsolidation event"). We are party to a Tax Sharing Agreement, dated as of May 1, 2020 (the "Existing Tax Sharing Agreement"), with BNAC, providing for payment by us to BNAC of the amounts payable by us in respect of U.S. federal income taxes and certain state and local taxes, and for certain payments by BNAC to us. We made no payments to BNAC under the Existing Tax Sharing Agreement in 2020, 2021 and as of September 30, 2022.

At the completion of this offering, we anticipate BNAC will own less than 80% of the outstanding shares of our common stock and, as a result, we will generally be deconsolidated from BNAC for federal and, in most cases, state, income tax purposes for periods beginning after completion of the offering. In anticipation of this offering, we will enter into an Amended and Restated Tax Sharing Agreement with BNAC, which sets forth the principles and responsibilities (i) governing the allocation of consolidated U.S. federal income tax liabilities and consolidated, combined and unitary state and local income tax liabilities

between us and BNAC during the periods in which we have been and are included in any consolidated or combined income tax return filed by BNAC, (ii) specifying the allocation of tax attributes and tax liabilities in connection with deconsolidation and (iii) setting forth agreements with respect to certain other tax matters.

The Amended and Restated Tax Sharing Agreement contains provisions that we believe are customary for tax sharing agreements between members of a consolidated group. In particular, we make payments to BNAC in respect of our allocable share of the U.S. federal income consolidated tax liability and state and local combined tax liability, in each case as determined on a separate return basis. In addition, we are compensated for the use of our net operating losses and other tax assets to the extent such assets reduce the U.S. federal income consolidated tax liability or state and local combined tax liability, as applicable, during the periods in which we have been and are included in any consolidated or combined income tax return filed by BNAC. The Amended and Restated Tax Sharing Agreement also includes customary indemnification clauses and survives until all obligations and liabilities of the parties arising under the agreement are satisfied.

Registration Rights

Our Stockholders' Agreement will provide BNAC and its affiliates with the right, in certain circumstances, to require us to register their shares of our common stock constituting registrable securities under the Securities Act for sale into the public markets and with certain piggyback rights, as described below. Our Stockholders' Agreement will also provide that we will pay certain expenses of BNAC and its affiliates relating to such registrations and indemnify them against certain liabilities that may arise under the Securities Act.

Demand Rights/Shelf Registration Rights

Subject to certain limitations, following the date that is six months after the consummation of this offering, BNAC and its affiliates will have the right, by delivering written notice to us, to require us to register the number of their registrable securities requested under the Securities Act. In no event later than 45 days after receiving a valid demand request, we are required to file or confidentially submit, at our discretion, with the SEC a registration statement covering all of the registrable securities covered by such demand request, subject to the limitations discussed below. We will not be obligated to effect more than two such registered offerings in any twelve-month period.

Upon the delivery of written notice to us by BNAC and its affiliates from time to time after a shelf registration statement has been declared effective by the SEC, we will facilitate a takedown of registrable securities off of an effective shelf registration statement. We will not be required to effect (i) an underwritten shelf takedown unless the offering includes securities with a total offering price (including piggyback securities and before deducting underwriting discounts) reasonably expected to exceed, in the aggregate, $5.0 million and (ii) more than two offerings demanded pursuant to this paragraph or the preceding paragraph in any twelve-month period.

In addition, if we are eligible to file a shelf registration statement on Form S-3, BNAC and its affiliates can request that we register their registrable securities for resale on a shelf registration statement.

Piggyback Rights

BNAC and its affiliates will be entitled to request to participate in, or "piggyback" on, registrations of common stock for sale by us or underwritten shelf takedowns. This piggyback right does not apply to, among other things, a registration relating to our employee benefit plans, a registration on Form S-4 or Form S-8 (or any similar successor forms) or a registration where the registrable securities are not being sold for cash.

Conditions and Limitations

The rights outlined above will be subject to conditions and limitations, including the right of the underwriters to limit the number of shares of our common stock to be included in a registration statement and our right to postpone or suspend a registration statement under specified circumstances.

Indemnification Agreements with our Directors and Officers

We intend to enter into indemnification agreements, to be effective upon the completion of this offering, with each of our directors and officers. The indemnification agreements and our governing documents will require us to indemnify our directors and officers to the fullest extent permitted by Delaware law. Subject to certain limitations, the indemnification agreements and our governing documents will also require us to advance expenses incurred by our directors and officers. For more information regarding these agreements, see "*Description of Capital Stock — Limitations of Liability and Indemnification*."

Policies and Procedures Regarding Related Party Transactions

Upon completion of this offering, we expect that our board of directors will adopt a new written Code of Business Conduct and Ethics that complies with all applicable requirements of the SEC and NYSE and that contains conflict of interest policies governing transactions involving any director, executive officer or beneficial owner of more than 5% of any class of our voting securities that could be deemed to present a conflict of interest.

Upon completion of this offering, we expect that our board of directors will adopt a written related party transactions policy, pursuant to which our Audit & Risks Committee will be responsible for reviewing and either approving, ratifying or disapproving such transactions with our directors, officers or beneficial owners of more than 5% of any class of our voting securities, or any immediate family member of any of the foregoing persons. In considering a related party transaction, our Audit & Risks Committee will take into account relevant facts and circumstances relating to whether the transaction is in the best interests of the Company, including the following:

- the materiality of the transaction to the related party and the Company;
- the business purpose for and reasonableness of the transaction; and
- whether the transaction is comparable to a transaction that could be available with an unrelated party or is on terms that the Company offers generally to persons who are not related parties.

DESCRIPTION OF CAPITAL STOCK

General

The following description summarizes certain important terms of our capital stock and of our governing documents, as each will be in effect upon the completion of this offering. For a complete description of the matters set forth in this section titled "*Description of Capital Stock*," you should refer to our governing documents, which are included as exhibits to the registration statement of which this prospectus forms a part, and to the applicable provisions of Delaware law.

Upon completion of this offering, our authorized capital stock will consist of 500,000,000 shares of common stock, $0.01 par value per share, of which shares (or shares if the underwriters exercise in full their option to purchase additional shares) will be issued and outstanding and 80,000,000 shares of preferred stock, $0.01 par value per share, of which no shares will be issued and outstanding. In addition, 10,000,000 shares of our common stock will be reserved for issuance pursuant to our 2022 Plan, including shares of common stock that may be issued upon vesting of equity awards that we expect to be granted in connection with this offering, and 1,000,000 shares of common stock will be available for purchase by employees pursuant to our ESPP. See "*Executive Compensation — BKV Corporation 2022 Equity and Incentive Compensation Plan" and "Executive Compensation — BKV Corporation Employee Stock Purchase Plan*."

BNAC owns approximately 96.1% of our common stock.

Common Stock

Holders of shares of our common stock are entitled to one vote for each share held of record on all matters on which stockholders are entitled to vote generally, including the election or removal of directors elected by our stockholders generally. Holders of our common stock do not have cumulative voting rights in the election of directors. Subject to certain nomination rights of BNAC under our Stockholders' Agreement, holders of our common stock will be entitled to elect all directors to our board of directors. See "*Certain Relationships and Related Party Transactions — Stockholders' Agreement* ."

Holders of shares of our common stock are entitled to receive dividends when, as and if declared by our board of directors out of funds legally available therefor, subject to any statutory or contractual restrictions on the payment of dividends and to any restrictions on the payment of dividends imposed by the terms of any outstanding preferred stock. See "*Dividend Policy*."

Upon our liquidation, dissolution or winding up and after payment in full of all amounts required to be paid to creditors and to the holders of preferred stock having liquidation preferences, if any, the holders of shares of our common stock will be entitled to receive pro rata our remaining assets available for distribution.

All shares of our common stock that will be outstanding at the time of the completion of the offering will be fully paid and non-assessable. Our common stock will not be subject to further calls or assessments by us. Holders of shares of our common stock do not have preemptive, subscription, redemption or conversion rights. There will be no redemption or sinking fund provisions applicable to our common stock. The rights powers, preferences and privileges of our common stock will be subject to those of the holders of any shares of our preferred stock or any other series or class of stock we may authorize and issue in the future.

Preferred Stock

No shares of preferred stock will be issued or outstanding immediately after the offering contemplated by this prospectus. Our certificate of incorporation authorizes our board of directors to establish one or more series of preferred stock (including convertible preferred stock). Unless required by law or any stock exchange, the authorized shares of preferred stock will be available for issuance without further action by the holders of our common stock. Our board of directors is able to determine, with respect to any series of preferred stock, the powers (including voting powers), preferences and relative, participating, optional or other special rights, and the qualifications, limitations or restrictions thereof, including, without limitation:

- the designation of the series;
- the number of shares of the series, which our board of directors may, except where otherwise provided in the preferred stock designation, increase (but not above the total number of authorized shares of the class) or decrease (but not below the number of shares then outstanding);
- whether dividends, if any, will be cumulative or non-cumulative and the dividend rate of the series;
- the dates at which dividends, if any, will be payable;
- the redemption or repurchase rights and price or prices, if any, for shares of the series;
- the terms and amounts of any sinking fund provided for the purchase or redemption of shares of the series;
- the amounts payable on shares of the series in the event of any voluntary or involuntary liquidation, dissolution or winding-up of our affairs;
- whether the shares of the series will be convertible into shares of any other class or series, or any other security, of us or any other entity, and, if so, the specification of the other class or series or other security, the conversion price or prices or rate or rates, any rate adjustments, the date or dates as of which the shares will be convertible and all other terms and conditions upon which the conversion may be made;
- restrictions on the issuance of shares of the same series or of any other class or series; and
- the voting rights, if any, of the holders of the series.

Dividends

The DGCL permits a corporation to declare and pay dividends on shares of its capital stock out of "surplus" or, if there is no "surplus," out of its net profits for the fiscal year in which the dividend is declared and/or the preceding fiscal year. "Surplus" is defined as the excess of the net assets of the corporation over the amount determined to be the capital of the corporation by its board of directors. The capital of the corporation is typically calculated to be (and cannot be less than) the aggregate par value of all issued shares of capital stock. Net assets equals the fair value of the total assets minus total liabilities. The DGCL also provides that dividends may not be paid out of net profits if, after the payment of the dividend, remaining capital would be less than the capital represented by the outstanding stock of all classes having a preference upon the distribution of assets. Declaration and payment of any dividend will be subject to the discretion of our board of directors. See "*Dividend Policy*."

Annual Stockholder Meetings

Our bylaws provide that annual stockholder meetings will be held at a date, time and place, if any, as determined by our board of directors or a duly authorized committee thereof. To the extent permitted under applicable law, we may conduct meetings by remote communications, including by webcast.

Anti-Takeover Provisions

Our governing documents and the DGCL contain provisions, which are summarized in the following paragraphs, that are intended to enhance the likelihood of continuity and stability in the composition of our board of directors. These provisions are intended to avoid costly takeover battles, reduce our vulnerability to a hostile or abusive change of control and enhance the ability of our board of directors to maximize stockholder value in connection with any unsolicited offer to acquire us. However, these provisions may have an anti-takeover effect and may delay, deter or prevent a merger or acquisition of the Company by means of a tender offer, a proxy contest or other takeover attempt that a stockholder might consider in its best interest, including those attempts that might result in a premium over the prevailing market price for the shares of common stock held by stockholders.

Authorized but Unissued Capital Stock

Delaware law does not require stockholder approval for any issuance of shares that are authorized and available for issuance. However, the listing requirements of the NYSE, which would apply so long as our

common stock remains listed on the NYSE, require stockholder approval of certain issuances equal to or exceeding 20% of the then outstanding voting power of our capital stock or then outstanding number of shares of common stock. These additional shares may be used for a variety of corporate purposes, including future public offerings, to raise additional capital or to facilitate acquisitions.

Our board of directors may generally issue shares of one or more series of preferred stock on terms calculated to discourage, delay or prevent a change of control of the Company or the removal of our management. Moreover, our authorized but unissued shares of preferred stock will be available for future issuances in one or more series without stockholder approval and could be utilized for a variety of corporate purposes, including future offerings to raise additional capital, to facilitate acquisitions and employee benefit plans.

One of the effects of the existence of authorized and unissued and unreserved common stock or preferred stock may be to enable our board of directors to issue shares to persons friendly to current management, which issuance could render more difficult or discourage an attempt to obtain control of the Company by means of a merger, tender offer, proxy contest or otherwise, and thereby protect the continuity of our management and possibly deprive our stockholders of opportunities to sell their shares of common stock at prices higher than prevailing market prices.

Classified Board of Directors

Our certificate of incorporation provides that our board of directors will be divided into three classes of directors, with each class to be as equal in number as possible, and with the directors serving staggered three-year terms. As a result, approximately one-third of our board of directors will be elected each year. The classification of directors will have the effect of making it more difficult for stockholders to change the composition of our board of directors. Our certificate of incorporation provides that, subject to any rights of holders of preferred stock to elect additional directors under specified circumstances, the total number of directors will be determined from time to time by the affirmative vote of a majority of the total number of directors then in office.

Delaware Law

We will be subject to the provisions of Section 203 of the DGCL regulating corporate takeovers. Section 203 of the DGCL provides that, subject to exceptions specified therein, an “interested stockholder” of a Delaware corporation shall not engage in any “business combination,” including general mergers or consolidations or acquisitions of additional shares of the corporation, with the corporation for a three-year period following the time that such stockholder becomes an interested stockholder unless:

- prior to such time, the board of directors of the corporation approved either the business combination or the transaction that resulted in the stockholder becoming an interested stockholder;
- upon consummation of the transaction that resulted in the stockholder becoming an “interested stockholder,” the interested stockholder owned at least 85% of the voting stock of the corporation outstanding at the time the transaction commenced (excluding specified shares); or
- at or subsequent to such time, the business combination is approved by the board of directors of the corporation and authorized at an annual or special meeting of stockholders, and not by written consent, by the affirmative vote of at least 66⅔% of the outstanding voting stock not owned by the interested stockholder.

Under Section 203 of the DGCL, the restrictions described above also do not apply to specified business combinations proposed by an interested stockholder following the announcement or notification of one of specified transactions involving the corporation and a person who had not been an interested stockholder during the previous three years or who became an interested stockholder with the approval of a majority of the corporation’s directors, if such transaction is approved or not opposed by a majority of the directors who were directors prior to any person becoming an interested stockholder during the previous three years or were recommended for election or elected to succeed such directors by a majority of such directors.

Except as otherwise specified in Section 203 of the DGCL, an "interested stockholder" is defined to include:

- any person that is the owner of 15% or more of the outstanding voting stock of the corporation, or is an affiliate or associate of the corporation and was the owner of 15% or more of the outstanding voting stock of the corporation at any time within three years immediately prior to the date of determination; and
- the affiliates and associates of any such person.

Under some circumstances, Section 203 of the DGCL makes it more difficult for a person who is an interested stockholder to effect various business combinations with us for a three-year period following the time such stockholder became an interested stockholder.

A Delaware corporation may "opt out" of Section 203 of the DGCL with an express provision in its original certificate of incorporation or an express provision in its certificate of incorporation or bylaws resulting from amendments approved by the holders of at least a majority of the corporation's outstanding voting shares. We do not intend to "opt out" of the provisions of Section 203 of the DGCL. The statute could prohibit or delay mergers or other takeover or change in control attempts and, accordingly, may discourage attempts to acquire us.

Removal of Directors; Vacancies and Newly Created Directorships

Under the DGCL, unless otherwise provided in our certificate of incorporation, directors serving on a classified board may be removed by the stockholders only for cause. Our certificate of incorporation provides that directors may be removed only for cause and only by the affirmative vote of the holders of at least 60% in voting power of all the then-outstanding shares of our stock entitled to vote generally in the election of directors, voting together as a single class. In addition, our certificate of incorporation provides that, subject to the rights granted to the holders of one or more series of preferred stock then outstanding or the rights granted under our Stockholders' Agreement, any vacancies on our board of directors, and any newly created directorships, will be filled by a majority of the total number of directors then in office, even if less than a quorum, or by a sole remaining director, and not by the stockholders.

No Cumulative Voting

Under the DGCL, the right to vote cumulatively does not exist unless the certificate of incorporation specifically authorizes cumulative voting. Our certificate of incorporation does not authorize cumulative voting. Therefore, stockholders holding a majority in voting power of the shares of our stock entitled to vote generally in the election of directors will be able to elect all our directors, subject to certain nomination rights of BNAC under our Stockholders' Agreement. See "*Certain Relationships and Related Party Transactions — Stockholders' Agreement*."

Special Stockholder Meetings

Our certificate of incorporation provides that, subject to the rights of the holders of any series of preferred stock, special meetings of our stockholders may be called at any time only by or at the direction of our board of directors by the affirmative vote of a majority of the total number of directors then in office, the chairman of our board of directors or our Chief Executive Officer, and may not be called by any other person or persons. Our bylaws prohibit the conduct of any business at a special meeting other than as specified in the notice for such meeting. These provisions may have the effect of deterring, delaying or discouraging hostile takeovers, or changes in control or management of the Company.

Director Nominations and Stockholder Proposals

Our bylaws establish advance notice procedures with respect to stockholder proposals and the nomination of candidates for election as directors, other than nominations made by or at the direction of the board of directors or a committee of the board of directors. In order for any matter to be "properly brought" before a meeting, a stockholder will have to comply with advance notice requirements and provide us with certain information. Generally, to be timely, a stockholder's notice must be received at our principal

executive offices not later than the close of business on the 90th day nor earlier than the close of business on the 120th day prior to the first anniversary date of the immediately preceding annual meeting of stockholders. Our bylaws also specify requirements as to the form and content of a stockholder's notice. Our bylaws allow the chairman of the meeting at a meeting of the stockholders to adopt rules and regulations for the conduct of meetings which may have the effect of precluding the conduct of certain business at a meeting if the rules and regulations are not followed. These provisions may also defer, delay or discourage a potential acquirer from conducting a solicitation of proxies to elect the acquirer's own slate of directors or otherwise attempting to influence or obtain control of the Company.

Stockholder Action by Written Consent

Under the DGCL, any action required to be taken at any annual or special meeting of the stockholders may be taken without a meeting, without prior notice and without a vote if a consent or consents in writing, setting forth the action so taken, is or are signed by the holders of outstanding stock having not less than the minimum number of votes that would be necessary to authorize or take such action at a meeting at which all shares of our stock entitled to vote thereon were present and voted, unless our certificate of incorporation provides otherwise. Our certificate of incorporation precludes stockholder action by written consent at any time when BNAC and its affiliates and subsidiaries (excluding the Company and its subsidiaries) own, in the aggregate, less than 35% in voting power of our stock entitled to vote generally in the election of directors.

Supermajority Provisions

Our governing documents provide that our board of directors is expressly authorized to make, repeal, alter, amend and rescind, in whole or in part, our bylaws by the affirmative vote of a majority of the total number of directors then in office, without the assent or vote of the stockholders in any matter not inconsistent with the laws of the State of Delaware or our certificate of incorporation. Any amendment, alteration, rescission or repeal of any provision of our bylaws, or the adoption of any provision inconsistent with our bylaws, by our stockholders requires the affirmative vote of the holders of at least 66⅔% in voting power of all the then-outstanding shares of our stock entitled to vote thereon, voting together as a single class, in addition to any vote of the holders of any class or series of our capital stock required by our governing documents or applicable law or securities exchange rule or regulation.

The DGCL provides generally that the affirmative vote of a majority of the outstanding shares entitled to vote thereon, voting together as a single class, is required to amend a corporation's certificate of incorporation, unless the certificate of incorporation requires a greater percentage.

Our certificate of incorporation provides that, in addition to any vote required by our governing documents or applicable law or securities exchange rule or regulation, the following provisions in our certificate of incorporation may be amended, altered, repealed or rescinded, in whole or in part, or any provision inconsistent therewith may be adopted, only by the affirmative vote of the holders of at least 66⅔% in voting power all the then-outstanding shares of our stock entitled to vote thereon, voting together as a single class (except that, in the case of any proposed amendment, alteration, repeal or rescission of, or the adoption of any provision inconsistent with, the following provisions, as to which the DGCL does not require the consent or vote of the stockholders or that is approved by at least 60% of our board of directors, then only the affirmative vote of the holders of a majority in voting power of all the then-outstanding shares of our stock entitled to vote thereon, voting together as a single class (in addition to any vote required by our governing documents or applicable law or securities exchange rule or regulation), will be required to amend, alter, repeal or rescind, or adopt any provision inconsistent with, the following provisions:

- the provisions requiring a 66⅔% supermajority vote for stockholders to amend our bylaws;
- the provisions providing for a classified board of directors (the election and term of our directors);
- the provisions regarding removal of directors;
- the provisions regarding filling vacancies on our board of directors and newly-created directorships;
- the provisions eliminating monetary damages for breaches of fiduciary duty by a director or officer;

- the provisions regarding indemnification and advancement of expenses to certain indemnitees in connection with certain proceedings;
- the provisions regarding stockholder action by written consent;
- the provisions regarding calling special meetings of stockholders;
- the provisions regarding competition and corporate opportunities; and
- the amendment provision requiring that the above provisions be amended with a majority vote or a 66⅔% supermajority vote, as applicable, of stockholders.

The combination of the classification of our board of directors, the lack of cumulative voting and the supermajority voting requirements in certain circumstances will make it more difficult for our existing stockholders to replace our board of directors as well as for another party to obtain control of us by replacing our board of directors. Because our board of directors has the power to retain and discharge our officers, these provisions could also make it more difficult for existing stockholders or another party to effect a change in management.

These provisions may have the effect of deterring hostile takeovers or delaying or preventing changes in control of us or our management, such as a merger, reorganization or tender offer. These provisions are intended to enhance the likelihood of continued stability in the composition of our board of directors and its policies and to discourage certain types of transactions that may involve an actual or threatened acquisition of the Company. These provisions are designed to reduce our vulnerability to an unsolicited acquisition proposal. The provisions are also intended to discourage certain tactics that may be used in proxy fights. However, such provisions could have the effect of discouraging others from making tender offers for our shares and, as a consequence, they also may inhibit fluctuations in the market price of our shares that could result from actual or rumored takeover attempts. Such provisions may also have the effect of preventing changes in management.

Dissenters' Rights of Appraisal and Payment

Under the DGCL, with certain exceptions, our stockholders will have appraisal rights in connection with a merger or consolidation of the Company. Pursuant to the DGCL, stockholders who properly request and perfect appraisal rights in connection with such merger or consolidation will have the right to receive payment of the fair value of their shares as determined by the Delaware Court of Chancery.

Stockholders' Derivative Actions

Under the DGCL, any of our stockholders may bring an action in our name to procure a judgment in our favor, also known as a derivative action, provided that the stockholder bringing the action is a holder of our shares at the time of the transaction to which the action relates or such stockholder's stock thereafter devolved by operation of law.

Choice of Forums

Our certificate of incorporation provides that unless we consent in writing to the selection of an alternative forum, the Court of Chancery of the State of Delaware will, to the fullest extent permitted by law, be the sole and exclusive forum for any (i) derivative action or proceeding brought on behalf of the Company, (ii) action asserting a claim of breach of a fiduciary duty owed by any director, officer or employee of the Company to the Company or our stockholders, (iii) action asserting a claim against the Company or any director or officer of the Company arising pursuant to any provision of the DGCL or our governing documents, or (iv) action asserting a claim against the Company or any director, officer or employee of the Company, which claim is governed by the internal affairs doctrine. Notwithstanding the foregoing sentence, the federal district courts of the United States of America will be the exclusive forum for the resolution of any complaint asserting a cause of action arising under U.S. federal securities laws, including the Securities Act and the Exchange Act. Any person or entity purchasing or otherwise acquiring any interest in shares of capital stock of the Company will be deemed to have notice of and consented to the forum provisions in our certificate of incorporation. However, the enforceability of similar forum provisions in other

companies' certificates of incorporation has been challenged in legal proceedings, and it is possible that a court could find these types of provisions to be unenforceable.

Corporate Opportunity

The DGCL permits corporations to adopt provisions renouncing any interest or expectancy of the corporation in, or in being offered an opportunity to participate in, specified business opportunities that are presented to the corporation or its officers, directors or stockholders. Our certificate of incorporation, to the fullest extent permitted by law, renounces any interest or expectancy that we have in, or right to be offered an opportunity to participate in, specified business opportunities that are from time to time presented to our officers, directors or stockholders or their respective affiliates, other than those officers, directors, stockholders or affiliates who are our or our subsidiaries' employees. Our certificate of incorporation provides that, to the fullest extent permitted by law, neither BNAC nor its affiliates or any director who is not employed by us (including any non-employee director who serves as one of our officers in both his or her director and officer capacities) or his or her affiliates will have any duty to refrain from (i) engaging in the same or similar business activities or lines of business in which we or our affiliates now engage or propose to engage or (ii) otherwise competing with us or our affiliates. In addition, to the fullest extent permitted by law, in the event that BNAC or its affiliates or any non-employee director acquires knowledge of a potential transaction or other business opportunity that may be a corporate opportunity for itself, himself or herself or its or his or her affiliates or for us or any of our affiliates, such person will have no duty to communicate or offer such transaction or business opportunity to us or any of our affiliates and they may take any such opportunity for themselves or offer it to another person or entity. Our certificate of incorporation does not renounce our interest in any corporate opportunity that is expressly offered to a non-employee director solely in his or her capacity as a director or officer of the Company. To the fullest extent permitted by law, a business opportunity will not be deemed to be a potential corporate opportunity for us if we would not be financially or legally able, or contractually permitted to undertake, the opportunity; the opportunity, from its nature, would not be in the line of our business; or the opportunity is one in which we would have no interest or reasonable expectancy.

Limitations of Liability and Indemnification

The DGCL authorizes corporations to limit or eliminate the personal liability of directors to corporations and their stockholders for monetary damages for breaches of directors' fiduciary duties, subject to certain exceptions. Our certificate of incorporation includes a provision that eliminates the personal liability of our directors and officers for monetary damages to the Company or its stockholders for any breach of fiduciary duty as a director or an officer, to the fullest extent permitted by the DGCL. The effect of these provisions is to eliminate the rights of us and our stockholders, through stockholders' derivative suits on our behalf, to recover monetary damages from a director or an officer for breach of fiduciary duty as a director or an officer, including breaches resulting from grossly negligent behavior. However, exculpation does not apply to any breaches of the duty of loyalty, any acts or omissions not in good faith or that involve intentional misconduct or knowing violation of law, any authorization of dividends or stock redemptions or repurchases paid or made in violation of the DGCL, or for any transaction from which the director derived an improper personal benefit.

Our certificate of incorporation and our bylaws generally provide that we must defend, indemnify and advance expenses to our directors and officers to the fullest extent permitted by the DGCL. We also are expressly authorized to carry directors' and officers' liability insurance providing indemnification for our directors, officers and certain employees for some liabilities. We believe that these indemnification and advancement provisions and insurance are useful to attract and retain qualified directors and executive officers.

The limitation of liability, indemnification and advancement provisions in our certificate of incorporation and our bylaws may discourage stockholders from bringing a lawsuit against directors or officers for breach of their fiduciary duty. These provisions also may have the effect of reducing the likelihood of derivative litigation against directors and officers, even though such an action, if successful, might otherwise benefit us and our stockholders. In addition, your investment may be adversely affected to the extent we pay the costs of settlement and damage awards against directors and officers pursuant to these indemnification provisions.

There is currently no pending material litigation or proceeding involving any of our directors, officers or employees for which indemnification is sought.

Indemnification Agreements

We intend to enter into an indemnification agreement with each of our directors and officers as described in "*Certain Relationships and Related Person Transactions — Indemnification Agreements with our Directors and Officers*." Insofar as indemnification for liabilities arising under the Securities Act may be permitted to directors or officers, we have been informed that in the opinion of the SEC such indemnification is against public policy and is therefore unenforceable.

Registration Rights

Our Stockholders' Agreement will provide BNAC and its affiliates with the right, in certain circumstances, to require us to register their shares of our common stock constituting registrable securities under the Securities Act for sale into the public markets and with certain piggyback rights. Our Stockholders' Agreement will also provide that we will pay certain expenses of BNAC and its affiliates relating to such registrations and indemnify them against certain liabilities that may arise under the Securities Act. See "*Certain Relationships and Related Party Transactions — Registration Rights* " for a description of these registration rights.

Transfer Agent and Registrar

Upon completion of this offering, the transfer agent and registrar for our common stock will be Broadridge Corporate Issuer Solutions, Inc. The transfer agent and registrar's address is 51 Mercedes Way, Edgewood, New York 11717.

Listing

We intend to apply for the listing of our common stock on NYSE under the symbol "BKV."

SHARES ELIGIBLE FOR FUTURE SALE

Prior to this offering, there has been no public market for our common stock, and we cannot predict the effect, if any, that market sales of shares of our common stock or the availability of shares of our common stock for sale will have on the market price of our common stock prevailing from time to time. Future sales of our common stock in the public market, or the perception that those sales may occur, could adversely affect the prevailing market price of our common stock at such time, which could make it more difficult for you to sell your shares of common stock at a time and price that you consider appropriate, and could impair our ability to raise equity capital or use our common stock as consideration for acquisitions of other businesses, investments or other corporate purposes in the future.

Sale of Restricted Securities

Immediately upon completion of this offering, there will be outstanding shares of common stock (or if the underwriters exercise in full their option to purchase additional shares). Of these outstanding shares, shares of our common stock to be sold in this offering (or shares if the underwriters exercise in full their option to purchase additional shares) will be freely tradable without further restriction or registration under the Securities Act. Any shares purchased in this offering by our affiliates, as that term is defined in Rule 144 under the Securities Act, may be sold in the public market only if registered or if they qualify for an exemption from registration under Rule 144 or Rule 701 under the Securities Act, which rules are summarized below.

BNAC's shares of common stock will be deemed "restricted securities" as defined in Rule 144 under the Securities Act. These restricted securities may be sold in the public market only if they are registered or if they qualify for an exemption from registration under Rule 144 under the Securities Act. BNAC will agree to certain lock-up restrictions with the underwriters pursuant to which it will agree, subject to specific exceptions, not to sell any of our stock for 180 days following the date of this prospectus. See "— *Lock-Up Arrangements*" below and "*Underwriting*."

As a result of the lock-up agreements described below and the provisions of Rule 144 and Rule 701 under the Securities Act, the shares of our common stock (excluding the shares to be sold in this offering) that will be available for sale in the public market are as follows:

- no shares will be eligible for sale on the date of this prospectus or prior to 180 days after the date of this prospectus; and
- shares will be eligible for sale upon the expiration of the lock-up agreements beginning 180 days after the date of this prospectus and when permitted under Rule 144 or Rule 701.

Lock-Up Arrangements

In connection with the completion of this offering, BNAC and all of our directors and executive officers will enter into lock-up agreements with the underwriters pursuant to which they will agree not to offer, pledge, sell, contract to sell, sell any option or contract to purchase, purchase any option or contract to sell, grant any option, right or warrant to purchase, lend or otherwise transfer or dispose of, directly or indirectly, any shares of common stock or any securities convertible into or exercisable or exchangeable for shares of common stock for a period of at least 180 days following the date of this prospectus, subject to certain exceptions. As a result of these contractual restrictions, shares of our common stock and the other securities subject to lock-up agreements will not be eligible for sale until these agreements expire or the restrictions are waived by the underwriters. The representatives of the underwriters may, in their discretion, release any of the securities subject to lock-up restrictions with the underwriters in whole or in part at any time. See "*Underwriting*."

Shares of our common stock which were issued in satisfaction of awards granted under the 2021 Plan are subject to resale restrictions. The holder may not, without the consent of the Company or the representatives of the underwriters (for 180 days from the date of the final prospectus), (1) sell, pledge, offer to sell, contract to sell, sell any option or contract to purchase, purchase any option or contract to sell, grant any option, right or warrant to purchase or otherwise transfer or dispose of, any shares of common stock or any securities convertible into or exercisable or exchangeable for common stock, or (2) enter into any

swap or other arrangement that transfers to another, in whole or in part, any of the economic consequences of ownership of the common stock. See "*Executive Compensation — BKV Corporation 2021 Long Term Incentive Plan*."

Rule 144

In general, under Rule 144 as in effect on the date of this prospectus, once we have been subject to public company reporting requirements for at least 90 days, a person who has beneficially owned shares proposed to be sold for at least six months, including the holding period of any prior owner other than an affiliate of us, and who is not deemed to have been one of our affiliates for purposes of the Securities Act at any time during the 90 days preceding a sale, will be entitled to sell, upon expiration of the lock-up agreements described above, such shares without complying with the manner of sale, volume limitation or notice provisions of Rule 144, subject to compliance with the public information requirements of Rule 144. Such a non-affiliated person who has beneficially owned the shares proposed to be sold for at least one year, including the holding period of any prior owner other than an affiliate of us, will be entitled to sell these shares without limitation.

In general, under Rule 144, our affiliates or persons selling shares on behalf of our affiliates will be entitled to sell upon expiration of the 180-day lock-up period described above, within any three-month period, a number of shares that does not exceed the greater of:

- 1% of the number of shares of our common stock then outstanding, which will equal approximately shares immediately after this offering (or shares if the underwriters elect to exercise in full their option to purchase additional shares); or
- the average weekly trading volume of our common stock on the NYSE during the four calendar weeks before a notice of the sale is filed on Form 144 with respect to such sale.

Sales by our affiliates or persons selling shares on behalf of our affiliates under Rule 144 also are subject to manner of sale and notice provisions and to the availability of public information about us.

Rule 701

In general, under Rule 701 under the Securities Act, any of our employees, directors, officers, consultants or advisors who purchases shares from us in connection with a compensatory stock or option plan or other written agreement before the effective date of this offering is entitled to sell such shares 90 days after the effective date of this offering in reliance on Rule 144, without having to comply with the holding period requirement of Rule 144 and, in the case of non-affiliates, without having to comply with the public information, volume limitation or notice filing provisions of Rule 144. The SEC has indicated that Rule 701 will apply to typical stock options granted by an issuer before it becomes subject to the reporting requirements of the Exchange Act, along with the shares acquired upon exercise of such options, including exercises after the date of this prospectus.

Registration Statement on Form S-8

We intend to file with the SEC a registration statement on Form S-8 under the Securities Act promptly after the completion of this offering to register shares of our common stock subject to equity-based incentive awards which were granted under the 2021 Plan, and which are reserved for future issuance under our 2022 Plan. See "*Executive Compensation — BKV Corporation 2021 Long Term Incentive Plan*" and "*Executive Compensation — BKV Corporation 2022 Equity and Incentive Compensation Plan*." The Form S-8 will also register shares of our common stock purchased under the BKV Corporation 2020 Employee Stock Purchase Plan and shares of our common stock reserved for future purchase under our 2022 Employee Stock Purchase Plan. See "*Executive Compensation — BKV Corporation Employee Stock Purchase Plan*." The registration statement on Form S-8 is expected to become effective immediately upon filing, and shares of our common stock covered by the registration statement will then become eligible for sale in the public market, subject to the Rule 144 limitations applicable to affiliates and vesting restrictions. See "*Executive Compensation — BKV Corporation 2021 Long Term Incentive Plan,*" "*Executive Compensation — BKV Corporation 2022 Equity and Incentive Compensation Plan*" and "*Executive Compensation — BKV Corporation Employee Stock Purchase Plan*."

Registration Rights

Our Stockholders' Agreement will provide BNAC and its affiliates with the right, in certain circumstances, to require us to register their shares of our common stock constituting registrable securities under the Securities Act for sale into the public markets at any time following the date that is six months after the consummation of this offering. BNAC and its affiliates will also be entitled to certain piggyback rights with respect to future registrations or underwritten shelf takedowns, subject to certain limitations. "*Certain Relationships and Related Party Transactions — Registration Rights*" contains additional information regarding such rights.

CERTAIN ERISA CONSIDERATIONS

The following is a summary of certain considerations associated with the acquisition and holding of shares of our common stock by employee benefit plans that are subject to Title I of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"), plans, individual retirement accounts and other arrangements that are subject to Section 4975 of the Code or employee benefit plans that are governmental plans (as defined in Section 3(32) of ERISA), certain church plans (as defined in Section 3(33) of ERISA), non-U.S. plans (as described in Section 4(b)(4) of ERISA) or other plans that are not subject to the foregoing but may be subject to provisions under any other federal, state, local, non-U.S. or other laws or regulations that are similar to such provisions of ERISA or the Code (collectively, "Similar Laws"), and entities whose underlying assets are considered to include "plan assets" of any such plan, account or arrangement (each, a "Plan").

This summary is based on the provisions of ERISA and the Code (and related regulations and administrative and judicial interpretations) as of the date of this registration statement. This summary does not purport to be complete, and no assurance can be given that future legislation, court decisions, regulations, rulings or pronouncements will not significantly modify the requirements summarized below. Any of these changes may be retroactive and may thereby apply to transactions entered into prior to the date of their enactment or release. This discussion is general in nature and is not intended to be all inclusive, nor should it be construed as investment or legal advice.

General Fiduciary Matters

ERISA and the Code impose certain duties on persons who are fiduciaries of a Plan subject to Title I of ERISA or Section 4975 of the Code (an "ERISA Plan") and prohibit certain transactions involving the assets of an ERISA Plan and its fiduciaries or other interested parties. Under ERISA and the Code, any person who exercises any discretionary authority or control over the administration of an ERISA Plan or the management or disposition of the assets of an ERISA Plan, or who renders investment advice for a fee or other compensation to an ERISA Plan, is generally considered to be a fiduciary of the ERISA Plan.

In considering an investment in shares of our common stock with a portion of the assets of any Plan, a fiduciary should consider the Plan's particular circumstances and all of the facts and circumstances of the investment and determine whether the acquisition and holding of shares of our common stock is in accordance with the documents and instruments governing the Plan and the applicable provisions of ERISA, the Code, or any Similar Law relating to the fiduciary's duties to the Plan, including, without limitation:

- whether the investment is prudent under Section 404(a)(1)(B) of ERISA and any other applicable Similar Laws;
- whether, in making the investment, the ERISA Plan will satisfy the diversification requirements of Section 404(a)(1)(C) of ERISA and any other applicable Similar Laws;
- whether the investment is permitted under the terms of the applicable documents governing the Plan;
- whether in the future there may be no market in which to sell or otherwise dispose of the shares of our common stock;
- whether the acquisition or holding of the shares of our common stock will constitute a "prohibited transaction" under Section 406 of ERISA or Section 4975 of the Code (see discussion under "— *Prohibited Transaction Issues*"); and
- whether the Plan will be considered to hold, as plan assets, (i) only shares of our common stock or (ii) an undivided interest in our underlying assets (see the discussion under "— *Plan Asset Issues*").

Prohibited Transaction Issues

Section 406 of ERISA and Section 4975 of the Code prohibit ERISA Plans from engaging in specified transactions involving plan assets with persons or entities who are "parties in interest," within the meaning of ERISA, or "disqualified persons," within the meaning of Section 4975 of the Code, unless an exemption is available. A party in interest or disqualified person who engages in a non-exempt prohibited transaction

may be subject to excise taxes and other penalties and liabilities under ERISA and the Code. In addition, the fiduciary of the ERISA Plan that engages in such a non-exempt prohibited transaction may be subject to excise taxes, penalties and liabilities under ERISA and the Code. The acquisition and/or holding of shares of our common stock by an ERISA Plan with respect to which the issuer, the initial purchaser, or a guarantor is considered a party in interest or a disqualified person may constitute or result in a direct or indirect prohibited transaction under Section 406 of ERISA and/or Section 4975 of the Code, unless the investment is acquired and is held in accordance with an applicable statutory, class or individual prohibited transaction exemption.

Because of the foregoing, shares of our common stock should not be acquired or held by any person investing "plan assets" of any Plan, unless such acquisition and holding will not constitute a non-exempt prohibited transaction under ERISA and the Code or a similar violation of any applicable Similar Laws.

Plan Asset Issues

Additionally, a fiduciary of a Plan should consider whether the Plan will, by investing in us, be deemed to own an undivided interest in our assets, with the result that we would become a fiduciary of the Plan and our operations would be subject to the regulatory restrictions of ERISA, including its prohibited transaction rules, as well as the prohibited transaction rules of the Code and any other applicable Similar Laws.

The Department of Labor (the "DOL") regulations provide guidance with respect to whether the assets of an entity in which ERISA Plans acquire equity interests would be deemed "plan assets" under some circumstances. Under these regulations, an entity's assets generally would not be considered to be "plan assets" if, among other things:

(a) the equity interests acquired by ERISA Plans are "publicly offered securities" (as defined in the DOL regulations) — *i.e.*, the equity interests are part of a class of securities that is widely held by 100 or more investors independent of the issuer and each other, are freely transferable, and are either registered under certain provisions of the federal securities laws or sold to the ERISA Plan as part of a public offering under certain conditions;

(b) the entity is an "operating company" (as defined in the DOL regulations) — *i.e.*, it is primarily engaged in the production or sale of a product or service, other than the investment of capital, either directly or through a majority-owned subsidiary or subsidiaries; or

(c) there is no significant investment by "benefit plan investors" (as defined in the DOL regulations) — *i.e.*, immediately after the most recent acquisition by an ERISA Plan of any equity interest in the entity, less than 25% of the total value of each class of equity interest (disregarding certain interests held by persons (other than benefit plan investors) with discretionary authority or control over the assets of the entity or who provide investment advice for a fee (direct or indirect) with respect to such assets, and any affiliates thereof) is held by ERISA Plans, individual retirement accounts and certain other Plans (but not including governmental plans, foreign plans and certain church plans), and entities whose underlying assets are deemed to include plan assets by reason of a Plan's investment in the entity.

Due to the complexity of these rules and the excise taxes, penalties and liabilities that may be imposed upon persons involved in non-exempt prohibited transactions, it is particularly important that fiduciaries, or other persons considering acquiring and/or holding shares of our common stock on behalf of, or with the assets of, any Plan, consult with their counsel regarding the potential applicability of ERISA, Section 4975 of the Code and any Similar Laws to such investment and whether an exemption would be applicable to the acquisition and holding of shares of our common stock. Purchasers of shares of our common stock have the exclusive responsibility for ensuring that their acquisition and holding of shares of our common stock complies with the fiduciary responsibility rules of ERISA and does not violate the prohibited transaction rules of ERISA, the Code or applicable Similar Laws. The sale of shares of our common stock to a Plan is in no respect a representation by us or any of our affiliates or representatives that such an investment meets all relevant legal requirements with respect to investments by any such Plan or that such investment is appropriate for any such Plan.

MATERIAL U.S. FEDERAL INCOME TAX CONSEQUENCES TO NON-U.S. HOLDERS OF OUR COMMON STOCK

The following is a general discussion of material U.S. federal income tax consequences to non-U.S. holders (as defined herein) with respect to the ownership and disposition of our common stock. This discussion applies only to non-U.S. holders that acquire our common stock in this offering and hold such stock as a capital asset within the meaning of Section 1221 of the Code (generally, property held for investment purposes). This discussion is based on current provisions of the Code, U.S. Treasury regulations promulgated under the Code, and administrative rulings and court decisions in effect, all of which are subject to change at any time, possibly with retroactive effect. We have not sought and will not seek any rulings from the IRS regarding the matters discussed below.

For purposes of this discussion, the term "non-U.S. holder" means a beneficial owner of our common stock that is not, for U.S. federal income tax purposes, an entity or arrangement treated as a partnership or any of the following:

- a citizen or individual resident of the United States;
- a corporation, or other entity treated as a corporation for U.S. federal income tax purposes, created or organized in or under the laws of the United States, any state thereof or the District of Columbia;
- an estate the income of which is subject to U.S. federal income tax regardless of its source; or
- a trust (1) if a court within the United States is able to exercise primary supervision over the administration of the trust and one or more "United States persons" (as defined in Section 7701(a)(30) of the Code) has or have the authority to control all substantial decisions of the trust, or (2) that has a valid election in effect under applicable U.S. Treasury regulations to be treated as a "United States person."

This discussion is for general information only and does not address all aspects of U.S. federal income taxation that may be important to a non-U.S. holder in light of that holder's particular circumstances or that may be applicable to holders subject to special treatment under U.S. federal income tax law (including, for example, financial institutions, brokers or dealers in securities, traders in securities that elect mark-to-market treatment, insurance companies, controlled foreign corporations, passive investment companies, holders who acquire our common stock pursuant to the exercise of employee stock options or otherwise as compensation, entities or arrangements treated as partnerships for U.S. federal income tax purposes (and partners or beneficial owners therein), holders liable for the alternative minimum tax, certain former citizens or former long-term residents of the U.S., persons who hold or are deemed to hold our common stock as part of a hedge, straddle, constructive sale, conversion transaction or other risk-reduction transaction, persons required for U.S. federal income tax purposes to conform the timing of income accruals with respect to the common stock to their financial statements under Section 451 of the Code, tax-qualified retirement plans, tax-exempt organizations, and governmental organizations, and "qualified foreign pension funds" as defined in Section 897(l)(2) of the Code and entities all of the interests of which are held by qualified foreign pension funds). In addition, this discussion does not address U.S. federal tax laws other than those pertaining to the U.S. federal income tax, nor does it address any aspects of the Medicare contribution tax on net investment income, or U.S. state or local or non-U.S. taxes. This discussion also does not specifically address any tax treaties. Accordingly, prospective investors should consult their own tax advisors regarding the U.S. federal, state, local, and non-U.S. income and other tax considerations of acquiring, holding and disposing of shares of our common stock.

If a partnership (including an entity or arrangement treated as a partnership for U.S. federal income tax purposes) holds our common stock, the tax treatment of a partner in the partnership generally will depend upon the status of the partner, the activities of the partnership and certain determinations made at the partner level. Accordingly, we urge partners in partnerships (including entities or arrangements treated as partnerships for U.S. federal income tax purposes) considering the purchase of our common stock to consult their tax advisors regarding the U.S. federal income tax considerations of the ownership and disposition of our common stock by such partnership.

THIS SUMMARY IS FOR GENERAL INFORMATION ONLY. IT IS NOT TAX ADVICE. INVESTORS CONSIDERING THE PURCHASE OF OUR COMMON STOCK ARE URGED TO

CONSULT THEIR TAX ADVISORS REGARDING THE APPLICATION OF THE U.S. FEDERAL, STATE, LOCAL AND NON-U.S. INCOME AND OTHER TAX LAWS AND ANY APPLICABLE TAX TREATIES TO THEIR PARTICULAR SITUATIONS.

Distributions on Common Stock

At or prior to the closing of this offering, our board of directors will adopt a policy pursuant to which we intend to pay dividends to stockholders.

In general, any distributions we make to a non-U.S. holder with respect to shares of our common stock that constitute dividends for U.S. federal income tax purposes will be subject to U.S. withholding tax at a rate of 30% (or such lower rate as may be specified by an applicable income tax treaty) of the gross amount distributed, unless the dividends are effectively connected with a trade or business carried on by the non-U.S. holder within the United States and, if required by an applicable income tax treaty, are attributable to a permanent establishment of the non-U.S. holder within the United States. A distribution will constitute a dividend for U.S. federal income tax purposes to the extent of our current or accumulated earnings and profits as determined for U.S. federal income tax purposes. Any distribution not constituting a dividend will be treated as first reducing the adjusted basis in the non-U.S. holder's shares of our common stock, but not below zero, and, to the extent it exceeds the adjusted basis in the non-U.S. holder's shares of our common stock, as capital gain and will be treated as described below under "— *Sale, Exchange or Other Taxable Disposition of Common Stock* ." However, except to the extent that we elect (or the paying agent or other intermediary through which you hold your shares of common stock elects) to withhold with respect to the taxable portion of the distribution only, we (or the applicable paying agent or intermediary) must generally withhold on the entire distribution, in which case you generally would be entitled to a refund from the IRS by timely filing an appropriate claim for a refund, to the extent the withholding exceeds your tax liability with respect to the distribution.

A non-U.S. holder who wishes to claim the benefit of an applicable treaty rate on dividends will be required (a) to provide the applicable withholding agent with a properly executed IRS Form W-8BEN or W-8BEN-E (or other applicable form) certifying under penalties of perjury that such holder is not a U.S. person as defined under the Code and is eligible for treaty benefits or (b) if our common stock is held through certain foreign intermediaries, to satisfy the relevant certification requirements of applicable U.S. Treasury regulations. A non-U.S. holder that does not timely furnish the required documentation, but that is eligible for a lower rate of U.S. federal withholding tax pursuant to an income tax treaty, may obtain a refund or credit of any excess amounts withheld by filing an appropriate claim for a refund with the IRS. Non-U.S. holders are urged to consult their own tax advisors regarding their possible entitlement to benefits under an applicable income tax treaty.

Dividends effectively connected with a non-U.S. holder's conduct of a U.S. trade or business (and, if required by an applicable income tax treaty, attributable to such non-U.S. holder's U.S. permanent establishment) generally will not be subject to U.S. withholding tax if the non-U.S. holder complies with applicable certification requirements. More particularly, to claim this exemption from U.S. withholding tax, the non-U.S. holder must furnish to the applicable withholding agent a valid IRS Form W-8ECI, certifying that the dividends are effectively connected with the non-U.S. holder's conduct of a trade or business within the United States. Such effectively connected dividends, although not subject to withholding tax (provided the IRS Form W-8ECI certification requirements are satisfied), generally will be subject to U.S. federal income tax on a net income basis, at the regular graduated rates applicable to U.S. persons. A non-U.S. holder that is a corporation may be subject to an additional "branch profits tax" at a rate of 30% (or such lower rate as may be specified by an applicable income tax treaty) on its "effectively connected earnings and profits," subject to certain adjustments.

The foregoing is subject to the discussion below under "— *Information Reporting and Backup Withholding*" and "— *Foreign Account Tax Compliance Act* ."

Sale, Exchange or Other Taxable Disposition of Common Stock

Subject to the discussion below under "— *Information Reporting and Backup Withholding*" and "— *Foreign Account Tax Compliance Act* ," a non-U.S. holder will generally not be subject to U.S. federal

income or withholding tax with respect to gain recognized on the sale, exchange or other taxable disposition of our common stock unless:

- the gain is effectively connected with a trade or business carried on by the non-U.S. holder within the United States and, if required by an applicable income tax treaty, is attributable to a U.S. permanent establishment of such non-U.S. holder,
- the non-U.S. holder is a nonresident alien individual and is present in the United States for 183 days or more in the taxable year of the sale, exchange or other taxable disposition and certain other conditions are satisfied, or
- we are or have been a "United States real property holding corporation" ("USRPHC") for U.S. federal income tax purposes at any time within the shorter of the five-year period ending on the date of the disposition of the common stock and the non-U.S. holder's holding period, and certain other conditions are satisfied.

Gain described in the first bullet point above (*i.e.*, gain that is effectively connected with the conduct of a trade or business in the United States) generally will be subject to U.S. federal income tax, net of certain deductions, at the regular graduated rates applicable to U.S. persons. If the non-U.S. holder is a foreign corporation, the branch profits tax at a rate of 30% (or such lower rate as may be specified by an applicable income tax treaty) also may apply to such effectively connected gain.

A non-U.S. holder described in the second bullet point above (*i.e.*, who is subject to U.S. federal income tax because the non-U.S. holder was present in the United States for 183 days or more during the taxable year of the sale, exchange or other taxable disposition of our common stock) will be subject to U.S. federal income tax at a rate of 30% (or such lower rate as may be specified under an applicable income tax treaty) on the gain derived from such sale, exchange or other taxable disposition, which may be offset by U.S. source capital losses, provided the non-U.S. holder has timely filed U.S. federal income tax returns with respect to such losses.

With respect to the third bullet point above, we are currently, and expect to continue to be for the foreseeable future, a USRPHC (and the remainder of this discussion assumes we are and will be a USRPHC). However, if our common stock is "regularly traded on an established securities market" (as defined by the U.S. Treasury regulations), a non-U.S. holder will be taxed on gain recognized on the disposition of our common stock as a result of our status as a USRPHC only if the non-U.S. holder actually or constructively holds or held more than 5% of our common stock at any time during the five-year period ending on the date of disposition or, if shorter, during the entire period the non-U.S. holder has held our common stock. If our common stock were not considered to be regularly traded on an established securities market, all non-U.S. holders would be subject to U.S. federal income tax on the sale, exchange or other taxable disposition of our common stock and a 15% withholding tax would apply to the gross proceeds from such sale, exchange or other taxable disposition of our common stock by a non-U.S. holder. Such withholding tax is not an additional tax but, rather, is credited against the actual U.S. federal income taxes owed by the non-U.S. holder (and such non-U.S. holder may obtain a refund of any amounts so withheld which exceed the non-U.S. holder's actual U.S. federal income tax liability, if any, provided that the non-U.S. holder makes the necessary filings with the IRS in a timely manner).

Information Reporting and Backup Withholding

We (or the applicable paying agent or intermediary) must report annually to the IRS and to each non-U.S. holder the amount of distributions paid to, and the tax withheld (if any) with respect to, each non-U.S. holder of our common stock. These reporting requirements apply regardless of whether withholding was reduced or eliminated by an applicable tax treaty. Copies of this information also may be made available under the provisions of a specific treaty or agreement with the tax authorities in the country in which the non-U.S. holder resides or is established.

U.S. backup withholding tax, at a rate that is currently 24%, is imposed on certain payments to persons that fail to furnish the information required under the U.S. information reporting rules. Dividends paid to a non-U.S. holder generally will be exempt from backup withholding if the non-U.S. holder provides a properly executed applicable IRS Form W-8, or otherwise establishes an exemption.

Under U.S. Treasury regulations, the payment of proceeds from the disposition of our common stock by a non-U.S. holder effected at a U.S. office of any broker (U.S. or non-U.S.), generally will be subject to information reporting and backup withholding, unless the beneficial owner certifies its status as a non-U.S. holder (generally by providing a properly executed applicable IRS Form W-8), or otherwise establishes an exemption. The payment of proceeds from the disposition of our common stock by a non-U.S. holder effected at a non-U.S. office of a broker that is neither a U.S. person nor a person having certain relationships with the United States generally will not be subject to backup withholding or information reporting. However, the payment of proceeds from a disposition of our common stock by a non-U.S. holder effected at a non-U.S. office of a broker that is a U.S. person or has certain relationships with the United States will generally be subject to information reporting, unless the beneficial owner certifies its status as a non-U.S. holder (generally by providing a properly executed applicable IRS Form W-8), or the broker has other documentary evidence in its files that the beneficial owner is a non-U.S. holder and certain other conditions are satisfied, or the beneficial owner otherwise establishes an exemption (and the broker has no knowledge or reason to know to the contrary). If the payment described in the preceding sentence is subject to information reporting, it will be subject to backup withholding if the broker has actual knowledge or reason to know that the payee is a U.S. person.

Backup withholding is not an additional tax but, rather, is credited against the actual U.S. federal income taxes owed by the non-U.S. holder. A non-U.S. holder may obtain a refund of any amounts withheld under the backup withholding rules which exceed the non-U.S. holder's actual U.S. federal income tax liability, if any, provided that the non-U.S. holder makes the necessary filings with the IRS in a timely manner.

Foreign Account Tax Compliance Act

Under Sections 1471 through 1474 of the Code and the U.S. Treasury regulations promulgated thereunder (collectively, "FATCA"), a U.S. federal withholding tax of 30% generally will be imposed on certain payments made to a "foreign financial institution" (as specifically defined under these rules) unless such institution enters into an agreement with the U.S. tax authorities to withhold on certain payments and to collect and provide to the U.S. tax authorities substantial information regarding U.S. account holders of such institution or meets other exceptions. Under FATCA and administrative guidance, a U.S. federal withholding tax of 30% generally also will be imposed on certain payments made to a "non-financial foreign entity" (as specifically defined under these rules) unless such entity provides the withholding agent with a certification identifying its direct and indirect U.S. owners or meets other exceptions. Foreign financial institutions located in jurisdictions that have an intergovernmental agreement with the U.S. governing these withholding and reporting requirements may be subject to different rules.

These withholding taxes would be imposed on dividends with respect to our common stock to foreign financial institutions or non-financial foreign entities (including in their capacity as agents or custodians for beneficial owners of our common stock) that fail to satisfy the above requirements. Prior to the issuance of proposed U.S. Treasury regulations, withholding taxes under FATCA also would have applied to gross proceeds from the disposition of our common stock. However, the proposed U.S. Treasury regulations provide that such gross proceeds are generally not subject to withholding taxes under FATCA. Taxpayers (including withholding agents) may currently rely on these proposed U.S. Treasury regulations until they are revoked or final U.S. Treasury regulations are issued.

Under certain circumstances, a non-U.S. holder might be eligible for refunds or credits of such taxes. Prospective non-U.S. holders should consult their tax advisors regarding the possible implications of FATCA on their investment in our common stock.

UNDERWRITING

Under the terms and subject to the conditions contained in an underwriting agreement dated as of the date of this prospectus (the "Underwriting Agreement"), we have agreed to sell to the underwriters named below, for whom Credit Suisse Securities (USA) LLC, BofA Securities, Inc. and Barclays Capital Inc. are acting as representatives, the following respective numbers of shares of common stock:

Underwriter	Number of Shares
Credit Suisse Securities (USA) LLC	
BofA Securities, Inc.	
Barclays Capital Inc.	
Citigroup Global Markets Inc.	
Evercore Group L.L.C.	
Jefferies LLC	
Tudor, Pickering, Holt & Co. Securities, LLC	
Susquehanna Financial Group, LLLP	
SMBC Nikko Securities America, Inc.	
Total	

The Underwriting Agreement provides that the underwriters are obligated to purchase all the shares of common stock in the offering if any are purchased, other than those shares covered by the over-allotment option described below. The Underwriting Agreement also provides that if an underwriter defaults the purchase commitments of non-defaulting underwriters may be increased or the offering may be terminated.

We have agreed to indemnify the underwriters and certain of their controlling persons against certain liabilities, including liabilities under the Securities Act, and to contribute to payments that the underwriters may be required to make in respect of those liabilities.

We have granted to the underwriters a 30-day option to purchase on a pro rata basis up to additional shares at the initial public offering price less the underwriting discounts and commissions. The option may be exercised only to cover any over-allotments of common stock.

The underwriters propose to offer the shares of common stock initially at the public offering price on the cover page of this prospectus and to selling group members at that price less a selling concession of up to $ per share. After the initial public offering the underwriters may change the public offering price and concession.

The following table summarizes the underwriting discounts and commissions payable by us to the underwriters in connection with this offering, assuming both no exercise and full exercise of the underwriters' over-allotment option.

	Per Share		Total	
	Without Over-allotment	With Over-allotment	Without Over-allotment	With Over-allotment
Underwriting discounts and commissions payable by us	$	$	$	$

The expenses of this offering that have been paid or are payable by us are estimated to be approximately $ million (excluding underwriting discounts and commissions). We have also agreed to reimburse the underwriters for certain of their expenses incurred in connection with this offering in an amount up to $.

We have agreed that, subject to certain exceptions, we will not offer, sell, contract to sell, pledge or otherwise dispose of, directly or indirectly, or file with the SEC a registration statement under the Securities Act relating to, any shares of our common stock or securities convertible into or exchangeable or exercisable

for any shares of our common stock, or publicly disclose the intention to make any offer, sale, pledge, disposition or filing, without the prior written consent of the representatives for a period of 180 days after the date of this prospectus.

The representatives of the underwriters may, in their discretion, release the shares of our common stock or other securities subject to the lock-up agreements described above in whole or in part at any time.

Our officers and directors and certain of our stockholders have agreed that they will not offer, sell, contract to sell, pledge or otherwise dispose of, directly or indirectly, any shares of our common stock or securities convertible into or exchangeable or exercisable for any shares of our common stock, enter into a transaction that would have the same effect, or enter into any swap, hedge or other arrangement that transfers, in whole or in part, any of the economic consequences of ownership of our common stock, whether any of these transactions are to be settled by delivery of our common stock or other securities, in cash or otherwise, or publicly disclose the intention to make any such offer, sale, pledge or disposition, or to enter into any such transaction, swap, hedge or other arrangement, without, in each case, the prior written consent of the representatives for a period of 180 days after the date of this prospectus, subject to certain exceptions.

We have agreed to indemnify the underwriters against liabilities under the Securities Act, or contribute to payments that the underwriters may be required to make in that respect.

We intend to apply to list the shares of common stock on the NYSE under the symbol “BKV.”

In connection with the listing of the common stock on the NYSE, the underwriters will undertake to sell round lots of 100 shares or more to a minimum of 400 beneficial owners.

Prior to this offering, there has been no public market for our common stock. The initial public offering price was determined by negotiations among us and the representatives and will not necessarily reflect the market price of the common stock following this offering. The principal factors that were considered in determining the initial public offering price included:

- the information presented in this prospectus and otherwise available to the underwriters;
- the history of, and prospects for, the industry in which we will compete;
- the ability of our management;
- the prospects for our future earnings;
- the present state of our development, results of operations and our current financial condition;
- the general condition of the securities markets at the time of this offering; and
- the recent market prices of, and the demand for, publicly traded common stock of generally comparable companies.

We cannot assure you that the initial public offering price will correspond to the price at which the common stock will trade in the public market subsequent to this offering or that an active trading market for the common stock will develop and continue after this offering.

In connection with the offering the underwriters may engage in stabilizing transactions, over-allotment transactions, syndicate covering transactions and penalty bids in accordance with Regulation M under the Exchange Act.

- Stabilizing transactions permit bids to purchase the underlying security so long as the stabilizing bids do not exceed a specified maximum.
- Over-allotment involves sales by the underwriters of shares in excess of the number of shares the underwriters are obligated to purchase, which creates a syndicate short position. The short position may be either a covered short position or a naked short position. In a covered short position, the number of shares over-allotted by the underwriters is not greater than the number of shares that they may purchase in the over-allotment option. In a naked short position, the number of shares involved is greater than the number of shares in the over-allotment option. The underwriters may close

out any covered short position by either exercising their over-allotment option and/or purchasing shares in the open market.

- Syndicate covering transactions involve purchases of the common stock in the open market after the distribution has been completed in order to cover syndicate short positions. In determining the source of shares to close out the short position, the underwriters will consider, among other things, the price of shares available for purchase in the open market as compared to the price at which they may purchase shares through the over-allotment option. If the underwriters sell more shares than could be covered by the over-allotment option, a naked short position, the position can only be closed out by buying shares in the open market. A naked short position is more likely to be created if the underwriters are concerned that there could be downward pressure on the price of the shares in the open market after pricing that could adversely affect investors who purchase in the offering.
- Penalty bids permit the representatives to reclaim a selling concession from a syndicate member when the common stock originally sold by the syndicate member is purchased in a stabilizing transaction or a syndicate covering transaction to cover syndicate short positions.

These stabilizing transactions, syndicate covering transactions and penalty bids may have the effect of raising or maintaining the market price of our common stock or preventing or retarding a decline in the market price of the common stock. As a result, the price of our common stock may be higher than the price that might otherwise exist in the open market. These transactions may be effected on the NYSE or otherwise and, if commenced, may be discontinued at any time.

The underwriters and certain of their affiliates are full service financial institutions engaged in various activities, which may include securities trading, commercial and investment banking, financial advisory, investment management, investment research, principal investment, hedging, financing and brokerage activities. The underwriters and certain of their affiliates have, from time to time, performed, and may in the future perform, various commercial and investment banking and financial advisory services for the issuer and its affiliates, for which they received, or may in the future receive, customary fees and expenses.

In the ordinary course of their various business activities, the underwriters and certain of their affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (including bank loans) for their own account and for the accounts of their customers, and such investment and securities activities may involve securities and/or instruments of the issuer or its affiliates. If the underwriters or their affiliates have a lending relationship with us, certain of those underwriters or their affiliates may hedge their credit exposure to us consistent with their customary risk management policies. Typically, the underwriters and their affiliates would hedge such exposure by entering into transactions which consist of either the purchase of credit default swaps or the creation of short positions in our securities or the securities of our affiliates, including potentially the shares of common stock offered hereby. Any such credit default swaps or short positions could adversely affect future trading prices of the shares of common stock offered hereby. The underwriters and certain of their affiliates may also communicate independent investment recommendations, market color or trading ideas and/or publish or express independent research views in respect of such securities or instruments and may at any time hold, or recommend to clients that they acquire, long and/or short positions in such securities and instruments.

A prospectus in electronic format will be made available on the web sites maintained by one or more of the underwriters, or selling group members, if any, participating in this offering and one or more of the underwriters participating in this offering may distribute prospectuses electronically. The representatives may agree to allocate a number of shares to underwriters and selling group members for sale to their online brokerage account holders. Internet distributions will be allocated by the underwriters and selling group members that will make internet distributions on the same basis as other allocations.

Notice to Prospective Investors in Canada

The common stock may be sold only to purchasers purchasing, or deemed to be purchasing, as principal that are accredited investors, as defined in National Instrument 45-106 Prospectus Exemptions or subsection 73.3(1) of the Securities Act (Ontario), and are permitted clients, as defined in National Instrument 31-103 Registration Requirements, Exemptions and Ongoing Registrant Obligations. Any resale

of the common stock must be made in accordance with an exemption from, or in a transaction not subject to, the prospectus requirements of applicable securities laws.

Securities legislation in certain provinces or territories of Canada may provide a purchaser with remedies for rescission or damages if this prospectus (including any amendment thereto) contains a misrepresentation, provided that the remedies for rescission or damages are exercised by the purchaser within the time limit prescribed by the securities legislation of the purchaser's province or territory. The purchaser should refer to any applicable provisions of the securities legislation of the purchaser's province or territory for particulars of these rights or consult with a legal advisor.

Pursuant to section 3A.3 (or, in the case of securities issued or guaranteed by the government of a non-Canadian jurisdiction, section 3A.4) of National Instrument 33-105 Underwriting Conflicts, or NI 33-105, the underwriter is not required to comply with the disclosure requirements of NI 33-105 regarding underwriter conflicts of interest in connection with this offering.

Notice to Prospective Investors in the European Economic Area

In relation to each Member State of the European Economic Area (each an "EEA State"), no common stock has been offered or will be offered pursuant to the offering to the public in that EEA State prior to the publication of a prospectus in relation to the common stock which has been approved by the competent authority in that EEA State or, where appropriate, approved in another EEA State and notified to the competent authority in that EEA State, all in accordance with the EU Prospectus Regulation, except that it may make an offer to the public in that EEA State of any shares of common stock at any time under the following exemptions under the EU Prospectus Regulation:

- to any legal entity which is a qualified investor as defined under the EU Prospectus Regulation;
- to fewer than 150 natural or legal persons (other than qualified investors as defined under the EU Prospectus Regulation), subject to obtaining the prior consent of Credit Suisse Securities (USA) LLC for any such offer; or
- in any other circumstances falling within Article 1(4) of the EU Prospectus Regulation,

provided that no such offer of the common stock shall require the Issuer or any underwriter to publish a prospectus pursuant to Article 3 of the EU Prospectus Regulation or supplement a prospectus pursuant to Article 23 of the EU Prospectus Regulation.

For the purposes of this provision, the expression an "offer to the public" in relation to the common stock in any EEA State means the communication in any form and by any means of sufficient information on the terms of the offer and any shares of common stock to be offered so as to enable an investor to decide to purchase or subscribe for any shares of common stock, and the expression "EU Prospectus Regulation" means Regulation (EU) 2017/1129.

Notice to Prospective Investors in the United Kingdom

In relation to the United Kingdom, no shares of common stock have been offered or will be offered pursuant to the offering to the public in the United Kingdom prior to the publication of a prospectus in relation to the common stock which has been approved by the Financial Conduct Authority in accordance with the transitional provision in Regulation 74 of the Prospectus (Amendment etc.) (EU Exit) Regulations 2019, except that it may make an offer to the public in the United Kingdom of any shares of common stock at any time under the following exemptions under the UK Prospectus Regulation:

- to any legal entity which is a qualified investor as defined under the UK Prospectus Regulation;
- to fewer than 150 natural or legal persons (other than qualified investors as defined under the UK Prospectus Regulation), subject to obtaining the prior consent of the representatives for any such offer; or
- in any other circumstances falling within Section 86 of the Financial Services and Markets Act 2000 (the "FSMA"),

provided that no such offer of the common stock shall require the Issuer or any underwriter to publish a prospectus pursuant to Section 85 of the FSMA or supplement a prospectus pursuant to Article 23 of the UK Prospectus Regulation.

In the United Kingdom, the offering is only addressed to, and is directed only at, "qualified investors" within the meaning of Article 2(e) of the UK Prospectus Regulation, who are also (i) persons having professional experience in matters relating to investments who fall within the definition of "investment professionals" in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order"); (ii) high net worth bodies corporate, unincorporated associations and partnerships and trustees of high value trusts as described in Article 49(2) of the Order; or (iii) persons to whom it may otherwise lawfully be communicated (all such persons being referred to as "relevant persons"). This document must not be acted on or relied on by persons who are not relevant persons. Any investment or investment activity to which this document relates is available only to relevant persons and will be engaged in only with relevant persons.

For the purposes of this provision, the expression an "offer to the public" in relation to the common stock in the United Kingdom means the communication in any form and by any means of sufficient information on the terms of the offering and any shares of common stock to be offered so as to enable an investor to decide to purchase or subscribe for any shares of common stock, and the expression "UK Prospectus Regulation" means the UK version of Regulation (EU) No 2017/1129 as amended by The Prospectus (Amendment etc.) (EU Exit) Regulations 2019, which is part of UK law by virtue of the European Union (Withdrawal) Act 2018.

Notice to Prospective Investors in the Dubai International Financial Centre

This prospectus relates to an Exempt Offer in accordance with the Offered Securities Rules of the Dubai Financial Services Authority (the "DFSA"). This prospectus is intended for distribution only to persons of a type specified in the Offered Securities Rules of the DFSA. It must not be delivered to, or relied on by, any other person. The DFSA has no responsibility for reviewing or verifying any documents in connection with Exempt Offers. The DFSA has not approved this prospectus nor taken steps to verify the information set forth herein and has no responsibility for the prospectus. The securities to which this prospectus relates may be illiquid and/or subject to restrictions on their resale. Prospective purchasers of the securities offered should conduct their own due diligence on the securities. If you do not understand the contents of this prospectus you should consult an authorized financial advisor.

Notice to Prospective Investors in Australia

No placement document, prospectus, product disclosure statement or other disclosure document has been lodged with the Australian Securities and Investments Commission, in relation to the offering. This prospectus does not constitute a prospectus, product disclosure statement or other disclosure document under the Corporations Act 2001 (the "Corporations Act"), and does not purport to include the information required for a prospectus, product disclosure statement or other disclosure document under the Corporations Act.

Any offer in Australia of the securities may only be made to persons (the "Exempt Investors") who are "sophisticated investors" (within the meaning of section 708(8) of the Corporations Act), "professional investors" (within the meaning of section 708(11) of the Corporations Act) or otherwise pursuant to one or more exemptions contained in section 708 of the Corporations Act so that it is lawful to offer the securities without disclosure to investors under Chapter 6D of the Corporations Act.

The securities applied for by Exempt Investors in Australia must not be offered for sale in Australia in the period of 12 months after the date of allotment under the offering, except in circumstances where disclosure to investors under Chapter 6D of the Corporations Act would not be required pursuant to an exemption under section 708 of the Corporations Act or otherwise or where the offer is pursuant to a disclosure document which complies with Chapter 6D of the Corporations Act. Any person acquiring securities must observe such Australian on-sale restrictions. This prospectus contains general information only and does not take account of the investment objectives, financial situation or particular needs of any particular person. It does not contain any securities recommendations or financial product advice. Before

making an investment decision, investors need to consider whether the information in this prospectus is appropriate to their needs, objectives and circumstances, and, if necessary, seek expert advice on those matters.

Notice to Prospective Investors in Switzerland

The common stock may not be publicly offered, directly or indirectly, in Switzerland within the meaning of the Swiss Financial Services Act (the "FinSA") and no application has or will be made to admit the common stock to trading on any trading venue (exchange or multilateral trading facility) in Switzerland. Neither this prospectus nor any other offering or marketing material relating to the common stock constitutes a prospectus pursuant to the FinSA, and neither this prospectus nor any other offering or marketing material relating to the common stock may be publicly distributed or otherwise made publicly available in Switzerland.

Notice to Prospective Investors in Hong Kong

The common stock may not be offered or sold in Hong Kong by means of any document other than (i) in circumstances which do not constitute an offer to the public within the meaning of the Companies Ordinance (Cap. 32, Laws of Hong Kong), or (ii) to "professional investors" within the meaning of the Securities and Futures Ordinance (Cap. 571, Laws of Hong Kong) and any rules made thereunder, or (iii) in other circumstances which do not result in the document being a "prospectus" within the meaning of the Companies Ordinance (Cap. 32, Laws of Hong Kong) and no advertisement, invitation or document relating to the common stock may be issued or may be in the possession of any person for the purpose of issue (in each case whether in Hong Kong or elsewhere), which is directed at, or the contents of which are likely to be accessed or read by, the public in Hong Kong (except if permitted to do so under the laws of Hong Kong) other than with respect to common stock which are or are intended to be disposed of only to persons outside Hong Kong or only to "professional investors" within the meaning of the Securities and Futures Ordinance (Cap. 571, Laws of Hong Kong) and any rules made thereunder.

Notice to Prospective Investors in Singapore

This prospectus has not been registered as a prospectus with the Monetary Authority of Singapore. Accordingly, this prospectus and any other document or material in connection with the offer or sale, or invitation for subscription or purchase, of the common stock may not be circulated or distributed, nor may the common stock be offered or sold, or be made the subject of an invitation for subscription or purchase, whether directly or indirectly, to persons in Singapore other than (i) to an institutional investor under Section 274 of the Securities and Futures Act, Chapter 289 of Singapore (the "SFA"), (ii) to a relevant person pursuant to Section 275(1), or any person pursuant to Section 275(1A), and in accordance with the conditions specified in Section 275 of the SFA or (iii) otherwise pursuant to, and in accordance with the conditions of, any other applicable provision of the SFA, in each case subject to compliance with conditions set forth in the SFA.

Solely for the purposes of its obligations pursuant to sections 309B(1)(a) and 309B(1)(c) of the SFA and the Securities and Futures (Capital Markets Products) Regulations 2018 of Singapore (the "CMP Regulations 2018"), the Issuer has determined, and hereby notifies all relevant persons (as defined in Section 309A of the SFA) that the shares of common stock are (A) prescribed capital markets products (as defined in the CMP Regulations 2018) and (B) Excluded Investment Products (as defined in MAS Notice SFA 04-N12: Notice on the Sale of Investment Products and MAS Notice FAA-N16: Notice on Recommendations on Investment Products).

Notice to Prospective Investors in Thailand

This prospectus does not, and is not intended to, constitute a public offering in Thailand. The common stock may not be offered or sold to persons in Thailand, unless such offering is made under the exemptions from approval and filing requirements under applicable laws, or under circumstances which do not constitute an offer for sale of the common stock to the public for the purposes of the Securities and Exchange Act of 1992 of Thailand, nor require approval from the Office of the Securities and Exchange Commission of Thailand.

Where the shares of common stock are subscribed or purchased under Section 275 of the SFA by a relevant person which is:

- a corporation (which is not an accredited investor (as defined in Section 4A of the SFA)) the sole business of which is to hold investments and the entire share capital of which is owned by one or more individuals, each of whom is an accredited investor; or
- a trust (where the trustee is not an accredited investor) whose sole purpose is to hold investments and each beneficiary is an accredited investor,

shares, debentures and units of shares and debentures of that corporation or the beneficiaries' rights and interest (howsoever described) in that trust will not be transferred within six months after that corporation or that trust has acquired the shares pursuant to an offer made under Section 275 of the SFA except:

- to an institutional investor (for corporations, under Section 274 of the SFA) or to a relevant person defined in Section 275(2) of the SFA, or to any person pursuant to an offer that is made on terms that such shares, debentures and units of shares and debentures of that corporation or such rights and interest in that trust are acquired at a consideration of not less than S$200,000 (or its equivalent in a foreign currency) for each transaction, whether such amount is to be paid for in cash or by exchange of securities or other assets, and further for corporations, in accordance with the conditions specified in Section 275 of the SFA;
- where no consideration is or will be given for the transfer; or
- where the transfer is by operation of law.

LEGAL MATTERS

The validity of the common stock offered hereby and certain other legal matters in connection with this offering will be passed upon for us by Baker Botts L.L.P., Dallas, Texas. Certain legal matters in connection with this offering will be passed upon for the underwriters by Latham & Watkins LLP, Houston, Texas. Baker Botts L.L.P. has from time to time represented and may continue to represent BKV and some of its affiliates in connection with various legal matters.

EXPERTS

The consolidated financial statements of BKV Corporation as of December 31, 2021 and 2020 and for each of the two years in the period ended December 31, 2021 included in this prospectus have been so included in reliance on the report of PricewaterhouseCoopers LLP ("PwC"), an independent registered public accounting firm, given on the authority of said firm as experts in auditing and accounting.

In connection with this registration statement, PwC completed an independence assessment to evaluate the services and relationships with the Company and its affiliates that may bear on PwC's independence under the SEC and the PCAOB independence rules for an audit period commencing January 1, 2020. PwC informed the Company's Audit & Risks Committee that one of its member firms within PricewaterhouseCoopers International Limited, each member firm of which is a separate legal entity (a "PwC member firm"), provided non-audit services during the audit period to two sister entities under common control with BKV Corporation. The services that occurred from January 2020 to June 2021, which are inconsistent with the SEC and PCAOB independence rules, involved the provision of corporate secretarial services and the disbursement of incidental payments on behalf of client management. The fees for these services totaled approximately $8,500 and $10,000, respectively, for the years ended December 31, 2021 and 2020. The provision of corporate secretarial services and the incidental payments made on behalf of client management are in contravention of SEC Rule 2-01(c)(4)(vi) of Regulation S-X.

PwC informed the Company's Audit & Risks Committee of the facts and circumstances surrounding the impermissible services, noting that (i) the PwC member firm did not make any decisions or judgments on management's behalf, and management reviewed and approved all documentation prepared by the PwC member firm, (ii) no aspect of the financial results of the sister entities or the provision of the services is included in (or has any impact on) the financial results of the Company, (iii) the services were performed by persons who were not part of the PwC audit engagement team, and (iv) the fees for the services were not material to the Company, the sister entities, the PwC member firm, or PwC. Additionally, the services do not create a mutual or conflicting interest between PwC and the Company, do not place PwC in a position of auditing its own work, and do not place PwC in a position of being an advocate for the Company.

After considering the facts and circumstances, the Company's Audit & Risks Committee concurred with PwC's conclusion that, for the reasons described above, the impermissible services did not impair PwC's objectivity and impartiality with respect to the planning and execution of the audits of the Company's consolidated financial statements as of December 31, 2021 and 2020 and for each of the two years in the period ended December 31, 2021, and that no reasonable investor would conclude otherwise.

The statements of revenues and direct operating expenses of the Barnett Assets of XTO Energy Inc. and Barnett Gathering, LLC for the years ended December 31, 2021 and 2020 included in this prospectus have been so included in reliance on the report (which contained an explanatory paragraph relating to the basis of presentation of the statements of revenues and direct operating expenses as described in Note 1 to the financial statements) of PricewaterhouseCoopers LLP, independent registered public accounting firm, given on the authority of said firm as experts in auditing and accounting.

Estimates of our natural gas reserves, related future net cash flows and the present values thereof related to our properties as of September 30, 2022 and December 31, 2021 and 2020 included elsewhere in this prospectus were based upon reserve reports prepared by independent petroleum engineers Ryder Scott Company, L.P. We have included these estimates in reliance on the authority of such firms as experts in such matters.

WHERE YOU CAN FIND MORE INFORMATION

We have filed with the SEC a registration statement on Form S-1 under the Securities Act with respect to the shares of common stock offered by this prospectus. This prospectus, which constitutes a part of the registration statement, does not contain all of the information set forth in the registration statement, some of which is contained in exhibits to the registration statement as permitted by the rules and regulations of the SEC. For further information with respect to us and our common stock, we refer you to the registration statement, including the exhibits filed as part of the registration statement. Statements contained in this prospectus concerning the contents of any contract or any other document are not necessarily complete, and each such statement is qualified in all respects by reference to the full text of such contract or other document filed as an exhibit to the registration statement.

The SEC maintains an internet website that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC at *www.sec.gov*. Our filings with the SEC, including the registration statement, are available to you for free on the SEC's internet website.

Upon completion of this offering, we will become subject to the informational and reporting requirements of the Exchange Act and, in accordance with those requirements, will file reports and proxy and information statements with the SEC. We intend to furnish to our stockholders our annual reports containing audited consolidated financial statements and the notes thereto certified by an independent public accounting firm.

We also maintain an internet website at *www.bkvcorp.com*. Information on or accessible through our website is not part of this prospectus.

INDEX TO FINANCIAL STATEMENTS

BKV CORPORATION

Audited Consolidated Financial Statements

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders of BKV Corporation

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of BKV Corporation and its subsidiaries (the "Company") as of December 31, 2021 and 2020, and the related consolidated statements of operations and comprehensive loss, of stockholders' equity, partners' capital and mezzanine equity and of cash flows for the years then ended, including the related notes (collectively referred to as the "consolidated financial statements"). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2021 and 2020, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinion

These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's consolidated financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits of these consolidated financial statements in accordance with the standards of the PCAOB and in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud.

Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion.

/s/ PricewaterhouseCoopers LLP
Denver, Colorado
August 12, 2022

We have served as the Company's auditor since 2020.

BKV CORPORATION

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
For the years ended December 31, 2021 and 2020

Note 1 — General Information

General

BKV Corporation ("BKV Corp") was formed on May 1, 2020 and is a corporation registered with the State of Delaware. BKV Corp is a growth driven energy company focused on creating value for its shareholders through organic development of its properties, as well as accretive acquisitions. BKV Corp's core business is to produce natural gas from its owned and operated upstream businesses.

Upon its incorporation, BKV Corp entered into certain agreements to acquire the net assets of BKV Oil and Gas Capital Partners, L.P. ("BKV O&G") in a common control transaction. BKV Corp also entered into a transaction to acquire Kalnin Ventures LLC ("KV") in a business combination. These two transactions resulted in the formation of a new consolidated corporate entity. The associated series of transactions further described in *Note 18 — Corporatization Event* are collectively referred to as the "Corporatization Event."

Together BKV Corp and its wholly owned subsidiaries are referred to collectively as "BKV" or the "Company." The Corporatization Event resulted in a change in reporting entity. The change in reporting entity under common control requires retrospective presentation of BKV O&G and BKV for the period presented as if the change had been in effect since the beginning of the period being presented. Accordingly, the accompanying Consolidated Statement of Operations and Comprehensive Loss for the year ended December 31, 2020 represents the consolidation of BKV O&G's results of operations for the four months ended April 30, 2020 and BKV Corp's results of operations for the eight months ended December 31, 2020.

The majority shareholder of BKV Corp is Banpu North America Corporation ("BNAC"), which owns 96.3% of BKV Corp's shares. BKV Corp's ultimate parent company is Banpu Public Company Limited, a public company listed in the Stock Exchange of Thailand. The remaining 3.7% of shares are owned by non-controlling management, director, employee and non-employee shareholders who hold shares with contingent put rights that may be exercised according to conditions stipulated in the Shareholders' Agreement.

Basis of Preparation of the Consolidated Financial Statements

The accompanying consolidated financial statements have been prepared on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America ("GAAP") and include the accounts for BKV Corp's direct and indirect wholly owned subsidiaries and entities in which BKV Corp has a controlling financial interest.

These consolidated financial statements include BKV Corp and its wholly owned subsidiaries which include:

- KV, a limited liability company formed September 19, 2013 and registered with the State of Colorado;
- BKV O&G, a limited partnership formed June 1, 2015 with the State of Delaware;
    - BKV Chaffee Corners, LLC ("Chaffee"), a limited liability company formed March 28, 2016, wholly owned subsidiary of BKV O&G, and registered with the State of Delaware;
    - BKV Chelsea LLC ("Chelsea"), a limited liability company formed November 10, 2016, wholly owned subsidiary of BKV O&G, and registered with the State of Delaware;
    - BKV Operating LLC ("Operating"), a limited liability company formed October 12, 2017, wholly owned subsidiary of BKV O&G, and registered with the State of Delaware; and
    - BKV Barnett LLC ("Barnett"), a limited liability company formed December 5, 2019, wholly owned subsidiary of BKV O&G, and registered with the State of Delaware.

BKV CORPORATION

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
For the years ended December 31, 2021 and 2020

Significant Judgments and Accounting Estimates

The preparation of these consolidated financial statements in accordance with GAAP as of and for the years ended December 31, 2021 and 2020 requires Company management to make estimates using assumptions and judgements considered reasonable, which affect the consolidated financial statements and accompanying notes. Actual results could differ from those estimates. Estimates which are particularly significant to the Company's consolidated financial statements include estimates of proved hydrocarbon reserves used in calculating depletion; estimates of unpaid revenues and unbilled costs; future cash flows from natural gas reserves on proved properties used in impairment assessments; valuation of commodity derivative instruments; the estimation of future decommissioning obligations; assignment of fair value to assets acquired and liabilities assumed in connection with acquisitions that are considered business combinations and allocating purchase price in connection with acquisitions that are considered asset acquisitions; valuation of ownership puttable shares; valuation of the Company's common stock relative to the grant date fair value of equity-based compensation, valuation of market-based performance conditions; valuation of contingent consideration associated with potential bonus payments for certain assets acquired; and valuation of deferred income tax assets.

Liquidity

As of December 31, 2021, the Company held $134.7 million of cash in operating accounts. The Company's working capital deficit as of December 31, 2021 is $269.0 million, which is largely driven by notes payable to BNAC of $166.0 million due in 2022, contingent consideration payable of $65.0 million, and current derivative liabilities of $91.2 million. For the year ended December 31, 2021, the Company's cash flows from operations was $358.1 million. In 2022, the Company paid $50.0 million of the $166.0 million of notes payable and extended the maturity of the remaining $116.0 million to December 31, 2027 (see *Note 7 — Related Parties).* As discussed in *Note 15 — Commitments and Contingencies*, the $65.0 million of contingent consideration payable as of December 31, 2021 was paid on January 18, 2022. The current derivative liabilities will settle monthly during the year ended December 31, 2022, in conjunction with the corresponding commodity sales. The Company intends to use the proceeds from the corresponding commodity sales to pay the settlements of the derivative liabilities.

In June 2022, the Company entered into a term loan and used the proceeds to fund the acquisition of operated and non-operated interests in proved reserves and certain midstream support assets in the Barnett formation. Refer to *Note 20 — Subsequent Events* for additional information regarding the acquisition. The term loan is due in five equal installments beginning in June 2023. The Company intends to make this payment with cash flows from existing and newly acquired operations.

On August 4, 2022, the Company entered an amendment to its ISDA Master Agreement with a counterparty to its derivative contracts pursuant to which the Company has agreed to terminate or novate, at the election of the Company, $100.0 million of its derivative contracts with the counterparty. To the extent the Company elects to terminate any such derivative contracts, the Company will be required to make cash payments in the applicable amount to the counterparty, which payments would be due in the aggregate by November 30, 2022. The Company intends to make such payments with cash flows from operations, inclusive of the recent acquisition of assets from XTO Energy, Inc. Refer to *Note 20 — Subsequent Events* for additional information regarding this agreement.

Note 2 — Summary of Significant Accounting Policies

The consolidated financial statements have been prepared on the historical cost basis with the exception of certain derivative financial liabilities, derivative financial assets, mezzanine equity, and certain contingent payments measured at fair value, as required by GAAP.

BKV CORPORATION

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
For the years ended December 31, 2021 and 2020

(a) Principles of Consolidation

These consolidated financial statements include financial information for BKV Corp, KV, BKV O&G, Chaffee, Chelsea, Operating, and Barnett. Accordingly, all intercompany balances and transactions between these entities have been eliminated within the consolidated financial statements. Undivided interests in natural gas properties and midstream assets are consolidated on a proportionate basis.

(b) Accounting Estimates

The preparation of these consolidated financial statements in accordance with GAAP as of and for the years ended December 31, 2021 and 2020 requires Company management to make estimates using assumptions and judgements considered reasonable, which affect the consolidated financial statements and accompanying notes. Management believes its estimates and assumptions are reasonable; however, such estimates and assumptions are subject to a number of risks and uncertainties that may cause actual results to differ materially from such estimates. Estimates which are particularly significant to the Company's consolidated financial statements include estimates of proved hydrocarbon reserves used in calculating depletion; estimates of unpaid revenues and unbilled costs; future cash flows from natural gas reserves on proved properties used in impairment assessments; valuation of commodity derivative instruments; the estimation of future decommissioning obligations; assignment of fair value to assets acquired and liabilities assumed in connection with acquisitions that are considered business combinations and allocating purchase price in connection with acquisitions that are considered asset acquisitions; valuation of ownership puttable shares; valuation of the Company's common stock relative to the grant date fair value of equity-based compensation, valuation of market-based performance conditions; valuation of contingent consideration associated with potential bonus payments for certain assets acquired; and valuation of deferred income tax assets. While Management is not aware of any significant revisions to any of its current estimates, there will likely be future revisions to its estimates resulting from matters such as revisions in estimated oil and natural gas volumes, changes in ownership interests, payouts, joint venture audits, re-allocations by purchasers or pipelines, or other corrections and adjustments common in the oil and natural gas industry, many of which require retroactive application. These types of adjustments cannot be currently estimated and will be recorded in the period in which the adjustment occurs.

(c) Acquisitions

Acquisitions are accounted for either as Business Combinations or Asset Acquisitions in accordance with Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") 805 *Business Combinations*.

Business Combinations

If the assets acquired and liabilities assumed constitute a business, the transaction is accounted for as a business combination. This method requires the recognition of the acquired identifiable assets, assumed liabilities and any non-controlling interest in the companies acquired at their fair value.

The value of the purchase price may be finalized up to a maximum of one year from acquisition date.

The acquirer shall recognize goodwill at the acquisition date, being the excess of:

- The consideration transferred, the amount of non-controlling interests and, in business combinations achieved in stages, the fair value at acquisition date of the investment previously held in the acquired company;
- Over fair value at acquisition date of acquired identifiable assets and assumed liabilities.

Factors giving rise to goodwill generally include operational synergies that are anticipated as a result of the business combination and growth expected to result in economic benefits from access to new customers

and markets. If the consideration transferred is lower than the fair value of acquired identifiable assets and assumed liabilities, an additional analysis is performed on the identification and valuation of the identifiable elements of the assets and liabilities. After having completed such additional analysis, any residual negative goodwill is recorded as a bargain purchase gain.

Asset Acquisitions

When substantially all of the gross assets acquired are concentrated in a single identifiable asset, or a group of similar identifiable assets, the acquisition is treated as an asset acquisition.

The Company accounts for asset acquisitions by performing purchase price allocations wherein the total transaction value is determined by aggregating the base purchase price, certain closing adjustments, and contingent consideration, if any. The total transaction value is then allocated to the acquired assets pro-rata based on their fair values. This allocation may cause identified assets to be recognized at amounts that are greater than their fair values. However, “non-qualifying” assets, which include financial assets and other current assets, should not be assigned an amount greater than their fair value. The determination of fair values of assets acquired requires the Company to make estimates and use valuation techniques. The transaction costs associated with asset acquisitions are capitalized as part of the assets acquired. Subsequent changes to the fair value of contingent consideration are recorded in the Other income and expense section of the Consolidated Statements of Operations and Comprehensive Loss.

(d) Cash and Cash Equivalents

Cash represents cash deposits held at financial institutions. Cash equivalents include short-term highly liquid investments of sufficient credit quality that are readily convertible to known amounts of cash and have original maturities of three months or less.

(e) Inventory

Inventories are stated at the lower of cost or net realizable value. The cost of inventories is based upon the average cost method.

(f) Income Taxes

The Company accounts for income taxes under the asset and liability method, which requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of events that have been included in the financial statements. Under this method, the Company determines deferred tax assets and liabilities on the basis of the differences between the financial statement and tax bases of assets and liabilities by using enacted tax rates in effect for the year in which the differences are expected to reverse. The effect of a change in tax rates on deferred tax assets and liabilities is recognized in income in the period that includes the enactment date.

The Company regularly reviews its deferred tax assets for recoverability and establishes a valuation allowance if it is more likely than not that some portion, or all, of a deferred tax asset will not be realized. The determination as to whether a deferred tax asset will be realized is made on a jurisdictional basis and is based on both positive and negative evidence. This evidence includes historic taxable income, projected future taxable income, the expected timing of the reversal of existing temporary differences and the implementation of tax planning strategies.

The Company records uncertain tax positions in accordance with Accounting Standards Codification (“ASC”) Topic 740 on the basis of a two-step process in which (1) the Company determines whether it is more-likely-than-not that the tax positions will be sustained on the basis of the technical merits of the position and (2) for those tax positions that meet the more-likely-than-not recognition threshold, the Company

recognizes the largest amount of tax benefit that is more than 50 percent likely to be realized upon ultimate settlement with the related tax authority.

The Company evaluates its tax positions that have been taken or are expected to be taken on income tax returns to determine if an accrual is necessary for uncertain tax positions. The Company recognizes interest and penalties as a component of tax expense. Refer to *Note 17 — Income Taxes* for further discussion.

(g) Natural Gas Properties

The Company uses the successful efforts method of accounting for natural gas producing activities, as defined within ASC 932 *Extractive Activities — Oil and Gas*. Costs to acquire mineral interests in natural gas properties, to drill and equip exploratory leases that find proved reserves, and to drill and equip development leases and related asset retirement costs are capitalized. Costs to drill exploratory wells are capitalized, or suspended, pending determination of whether the wells have proved reserves. If the Company determines the wells do not have proved reserves, the costs are charged to expense. For exploratory wells that find reserves that cannot be classified as proved when drilling is completed, costs continue to be capitalized as suspended exploratory drilling costs if there have been sufficient reserves found to justify completion as a producing well and sufficient progress is being made in assessing the reserves and the economic and operational viability of the project. If the Company determines that future appraisal drilling or development activities are unlikely to occur, associated suspended exploratory well costs are expensed. In some instances, this determination may take longer than one year. There were no exploratory wells capitalized pending determinations of whether the wells have proved reserves at December 31, 2021 and 2020. Geological and geophysical costs, including seismic studies and costs of carrying and retaining unproved properties, are charged to expense as incurred. The Company capitalizes interest on expenditures for significant exploration and development projects that last more than six months while activities are in progress to bring the assets to intended use. For the years ended December 31, 2021 and 2020, the Company had no capitalized interest costs. Costs incurred to maintain wells and related equipment are charged to expense as incurred. Capitalized amounts attributable to developed gas properties are depleted by the unit-of-production method over proved developed reserves.

Capitalized costs related to proved gas properties, including wells and related support equipment and facilities, are evaluated for impairment on an analysis of undiscounted future cash flows in accordance with ASC 360 *Property, Plant, and Equipment*. If undiscounted future cash flows are insufficient to recover the net capitalized costs related to proved properties, then the Company recognizes an impairment charge in its results of operations equal to the difference between the net capitalized costs related to proved properties and their estimated fair values based on the present value of the related future net cash flows. The Company had no impairment of proved properties during the years ended December 31, 2021 and 2020.

Undeveloped natural gas properties are tested for impairment on a regular basis, based on the results of the exploratory activity and management's evaluation. In the event of a discovery, the undeveloped natural gas properties are transferred to developed natural gas properties at net book value as soon as proved reserves are recognized. During the years ended December 31, 2021 and 2020, the Company recognized no impairments related to undeveloped natural gas properties.

(h) Midstream Assets

Midstream assets are recorded at historical cost, less depreciation. Hydrocarbon transportation and processing assets (midstream assets) are depreciated using the straight-line method over twenty-five years for compressor and meter stations, and forty years for pipelines. Routine maintenance and repairs are charged to operating expenses as incurred. Realization of the carrying value of midstream assets is reviewed for possible impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. Assets are determined to be impaired if a forecast of undiscounted estimated future net operating cash flows directly related to the assets, including any disposal value, is less than the carrying amount

of the asset. If any asset is determined to be impaired, the loss is measured as the amount by which the carrying amount of the asset exceeds its fair value. An estimate of fair value is based on the best information available, including prices for similar assets and discounted cash flows. There were no impairments recognized during the periods ended December 31, 2021 and 2020.

(i) Other Property and Equipment

Other property and equipment is stated at cost, net of accumulated depreciation. Cost includes the purchase price and, where relevant, any costs directly attributable to bringing the asset to the location and condition necessary. When significant costs are incurred subsequent to the purchase of the asset that extends the life of the asset, such costs are included in the cost of the applicable asset and depreciated over their respective useful lives. All other subsequent costs are recognized in the Consolidated Statements of Operations and Comprehensive Loss as either lease operating expense or general and administrative expense.

Realization of the carrying value of other properties and equipment is reviewed for possible impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. Assets are determined to be impaired if a forecast of undiscounted estimated future net operating cash flows directly related to the asset, including any disposal value, is less than the carrying amount of the asset. If any asset is determined to be impaired, the loss is measured as the amount by which the carrying amount of the asset exceeds its fair value. An estimate of fair value is based on the best information available, including prices for similar assets and discounted cash flows. There were no material impairments recognized during the periods ended December 31, 2021 and 2020, respectively.

The Company incurs costs in developing, configuring, integrating, and implementing a cloud computing environment for hosting internal-use software. Costs which are able to be capitalized are amortized on a straight-line basis over the useful life of the software.

Depreciation and amortization expense is included within Depreciation, depletion and amortization on the Consolidated Statements of Operations and Comprehensive Loss. Following is a listing of useful lives for other property and equipment and cloud computing costs:

	Useful Life
Buildings	39 years
Furniture, fixtures, equipment, vehicles and other	5 years
Computer hardware and software	3 – 5 years
Leasehold improvements	7 – 10 years

(j) Asset Retirement Obligations

The Company follows the provisions of ASC 410-20 *Asset Retirement Obligations,* which requires entities to record the fair value of obligations associated with the retirement of tangible, long-lived assets in the period in which they are incurred. When a liability is initially recorded, the Company capitalizes the cost by increasing the carrying amount of the related long-lived asset. Over time, the liability is accreted to its present value, and the capitalized cost is depleted over the useful life of the related asset. During the years ended December 31, 2021 and 2020, accretion expense of $10.0 million and $3.2 million, respectively, was recognized.

Revisions to estimated asset retirement obligations will result in an adjustment to the related capitalized asset and corresponding liability. Upon settlement of the liability, the Company either settles the obligation for its recorded amount or incurs a gain or loss. The Company's asset retirement obligation relates to the plugging, dismantling, removal, site reclamation and similar activities of its natural gas properties.

Asset retirement obligations are estimated at the present value of expected future net cash flows and are discounted using the Company's credit adjusted risk free rate. The Company uses unobservable inputs

in the estimation of asset retirement obligations that include, but are not limited to: costs of labor, costs of materials, profits on costs of labor and materials, the effect of inflation on estimated costs, and discount rate. Due to the subjectivity of assumptions and the relative long lives of the Company's leases, the costs to ultimately retire the Company's obligations may vary significantly from prior estimates. Assumptions used in determining estimates are reviewed annually.

(k) Leases

The Company adopted ASC 842 — *Leases* on January 1, 2020. ASC 842 requires lessees to recognize a right of use asset and corresponding lease liability on the Consolidated Balance Sheets for all leases. The Company determines if an arrangement is a lease at inception of the arrangement and if such lease will be classified as an operating lease or a finance lease. As of December 31, 2021 and 2020, all of the Company's leases are accounted for as operating leases. The Company makes use of the practical expedient that permits combining lease and non-lease components.

Right of use ("ROU") assets represent the Company's right to use an underlying asset for the lease term and lease liabilities represent the Company's obligation to make lease payments arising from the leases. ROU assets and ROU liabilities are recognized at the lease commencement date based on the present value of minimum lease payments over the lease term. Most leases do not provide an implicit interest rate; therefore, the Company used its incremental borrowing rate based on the information available at the inception date to determine the present value of the lease payments. Lease terms include options to extend the lease when it is reasonably certain that the Company will exercise that option. Lease cost for lease payments is recognized on a straight-line basis over the lease term. Certain leases have payment terms that vary based on the usage of the underlying assets.

The Company has ROU assets, and current and non-current ROU liabilities related to office space, a pipe yard, and compressor leases requiring balance sheet presentation. As of December 31, 2021 and 2020, the Company had $14.2 million and $9.9 million, respectively, of ROU assets. At December 31, 2021 and 2020, the related current ROU liabilities measured at $10.7 million and $6.5 million, respectively, and non-current ROU liabilities measured at $4.7 million and $4.6 million, respectively.

(l) Revenue Recognition

The Company recognizes revenue in accordance with ASC 606 *Revenue from Contracts with Customers* ("ASC 606"). The core principle of ASC 606 is that an entity should recognize revenue for the transfer of goods or services equal to the amount of consideration that it expects to be entitled to receive for those goods or services. The Company derives the majority of revenues from natural gas, NGL and oil sales contracts. The contracts specify each party's rights regarding the goods or services to be transferred and contain commercial substance as they impact the Company's financial statements. A high percentage of receivables balance is current, and the Company has not historically entered into contracts with counterparties that pose a credit risk without requiring adequate economic protection to ensure collection. The Company determines revenue recognition through the following five step model:

- Identification of the contract(s) with a customer
- Identification of the performance obligation(s) in the contract
- Determination of the transaction price
- Allocation of the transaction price to the performance obligation(s) in the contract
- Recognition of revenue when or as performance obligation(s) are satisfied

Natural Gas, NGLs and Oil Revenue

The Company's revenues are primarily derived from the sale of natural gas and NGLs that are extracted from the Company's natural gas wells as well as the sale of oil. Sales of natural gas, NGLs and oil

are recognized when the Company satisfies a performance obligation by transferring control of a product to a customer. Payment is generally received in the month following the sale. Timing of revenue recognition may differ from the timing of invoicing to customers; however, as the right to consideration after delivery is unconditional based on only the passage of time before payment of the consideration is due, upon delivery the Company records a receivable on the Consolidated Balance Sheets.

Under the Company's natural gas sales contracts, it delivers natural gas to the purchaser at an agreed upon delivery point for a specified index price adjusted for pricing differentials. To deliver natural gas to the agreed upon delivery point, the Company or other third parties gather, compress, process and transport the Company's natural gas. The Company maintains control of the natural gas during gathering, compression, processing, and transportation. Upon delivery of the product, the Company transfers control and recognizes revenue based on the contract price. In this scenario, the Company is the principal, and revenues are recognized on a gross basis or based on the contract price.

The Company enters into certain contracts for gathering and transportation of natural gas, NGL and oil products to deliver the products to customers. Fees incurred prior to control transfer are considered shipping and handling costs and are classified as gathering and transportation expense. Fees incurred after control transfer are included as a reduction to the transaction price. In this scenario, the Company is the agent, and revenues are recognized on a net basis.

Typically, the Company's natural gas, NGL, and oil sales contracts define the price as a formula based on the average market price, as specified on set dates each month, for the specific commodity during the month of delivery. Given the industry practice to invoice customers the month following the month of delivery and the Company's payment terms which are typically within 30 to 60 days of control transfer, no significant financing component is included within the contracts.

Non-operated Midstream Revenue

Non-operated midstream revenues are generated from the Company's undivided interest in certain midstream assets. As a non-operator the Company recognizes revenues when services are rendered by the operator based on quantities transported and measured, and contractual rates in accordance with the joint operating agreement between the Company and the operator. Revenues is recognized revenue based on the actual (known) consideration obtained from the operator because the Company does not have immediate visibility of all quantities transported. Consequently, revenue is recorded when the data is available.

Marketing Revenue

In conjunction with certain contracts for the sales of natural gas and NGLs, the Company recognizes the Company's share of net profits related to marketing revenues generated from a profit sharing agreement with a marketer. The contract includes variable components of consideration that are settled upon satisfaction of performance obligations which occurs at the point which control of the natural gas or NGL's is transferred by the purchaser to a third party. Revenues are recognized based on the underlying variable consideration pricing, and delivered volumes.

Other Considerations

In addition to revenues from natural gas, NGL and oil contracts from the Company's operated assets, BKV Corp entered into joint operating agreements as a non-operator for the sale of hydrocarbons through other operators. As a non-operator, BKV Corp recognizes revenue based on the actual (known) consideration that is obtained from the operator because BKV Corp does not have visibility into the terms of the sale. Consequently, non-operated revenue is recorded when the data is available.

The recognition of gains or losses on derivative instruments is not considered revenue from contracts with customers. The Company may use financial contracts accounted for as derivatives as economic hedges

to manage price risk associated with normal sales or in limited cases may use them for contracts the Company intends to physically settle but that do not meet all of the criteria to be treated as normal sales.

Transaction Price Allocated to Remaining Performance Obligations

For the Company's product sales that have a contract term greater than one year, the Company utilized the practical expedient in ASC 606, which does not require the disclosure of the transaction price allocated to remaining performance obligations if the variable consideration is allocated entirely to a wholly unsatisfied performance obligation. Under the Company's product sales contracts, each unit of product delivered to the customer represents a separate performance obligation; therefore, future volumes are wholly unsatisfied, and disclosure of the transaction price allocated to remaining performance obligations is not required. For the Company's product sales that have a contract term of one year or less, the Company utilized the practical expedient in ASC 606, which does not require the disclosure of the transaction price allocated to remaining performance obligations if the performance obligation is part of a contract that has an original expected duration of one year or less.

Contract Costs

Costs to obtain a contract are generally immaterial but the Company has elected the practical expedient to expense these costs as incurred if the duration of the contract is one year or less.

Please refer to *Note 9 — Revenue from Contracts with Customers* for additional disclosure.

(m) Lease Operating and Workover Expense

Lease operating expenses represent certain field employees' salaries, salt water disposal, repairs and maintenance, and other standard operating expenses. Lease operating expenses are expensed as incurred.

Workover expenses include those costs incurred to perform more substantial maintenance or remedial treatments on a well to enhance production. These costs are also expensed as incurred.

(n) Derivative Financial Instruments

The Company enters into commodity derivative instruments to reduce the effect of price volatility on a portion of the Company's future natural gas and NGL production. These activities may prevent the Company from realizing the full benefits of price increases above the levels of the derivative instruments on a portion of its future natural gas and NGL production. The commodity derivative instruments are measured at fair value and are included in the Consolidated Balance Sheets as commodity derivative assets and commodity derivative liabilities. The fair value of the Company's commodity derivative instruments are calculated using industry standard models using assumptions and inputs which are substantially observable in active markets throughout the full term of the instruments. These include market price curves, contract terms and prices, credit risk adjustments, implied market volatility and discount factors. The Company has not designated any of the derivative contracts as fair value or cash flow hedges. Therefore, the Company does not apply hedge accounting to the commodity derivative instruments. Net unsettled gains and losses on commodity derivative instruments are recorded based on the changes in the fair values of the derivative instruments and are recorded in the derivatives (losses) gains, net line on the Consolidated Statements of Operations and Comprehensive Loss. The Company's cash flow is only impacted when the actual settlements under the commodity derivative contracts result in making or receiving a payment to or from the counterparty. These settlements under the commodity derivative contracts are reflected as operating activities in the Company's Consolidated Statements of Cash Flows.

Derivative instruments (*Note 5 — Derivative Financial Instruments*) are with counterparties of high credit quality and are subject to master netting agreements, therefore the risk of nonperformance by the

counterparties is low. Risk of nonperformance of the Company, relative to counterparties liabilities is recognized accordingly in the consolidated financial statements.

(o) Accounts Receivable and Allowance for Expected Credit Losses

In June 2016, the FASB issued Accounting Standards Update ("ASU") 2016-13, Financial Instruments — Credit Losses (Topic 326): "Measurement of Credit Losses on Financial Instruments." For public business entities, the new standard became effective for annual reporting periods beginning after December 15, 2019, including interim periods within that reporting period. The Company adopted this standard effective January 1, 2020. The standard changes the impairment model for most financial assets and certain other instruments, including trade and other receivables, and requires entities to use a new forward-looking expected loss model that will result in earlier recognition of allowance for losses. The Company's receivables consist mainly of trade receivables from commodity sales and joint interest billings due from owners on properties the Company operates. The majority of these receivables have payment terms of 30 days or less. For receivables due from joint interest owners, the Company generally has the ability to withhold future revenue disbursements to recover non-payment of joint interest billings. From an evaluation of the Company's existing credit portfolio, historical credit losses have been de minimis and are expected to remain so in the future assuming no substantial changes to the business or creditworthiness of BKV Corp's business partners. There was no material impact on the Company's consolidated financial statements or disclosures upon adoption of this ASU.

(p) Fair Value of Financial Instruments

The Company follows ASC 820 *Fair Value Measurements and Disclosures ("ASC 820")* for financial and non-financial assets and liabilities. ASC 820 establishes a framework for measuring fair value and expands disclosure about fair value measurements. The standard characterizes inputs used in determining fair value based on a hierarchy that prioritizes inputs depending on the degree to which they are observable.

Level 1 Fair Value Measurements — Observable, unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities. The Company considers active markets as those in which transactions for the assets or liabilities occur in sufficient frequency and volume to provide pricing information on an ongoing basis.

Level 2 Fair Value Measurements — Observable inputs such as: (i) quoted prices for similar assets or liabilities in active markets; (ii) quote prices for identical or similar assets or liabilities in markets that are not active; or (iii) valuations based on pricing models where significant inputs (e.g., interest rates, yield curves, etc.) are observable for the assets or liabilities, are derived principally from observable market data, or can be corroborated by observable market data.

Level 3 Fair Value Measurements — Unobservable inputs, including valuations based on pricing models where significant inputs are not observable and not corroborated by market data. Unobservable inputs used to the extent that observable inputs are not available and reflect the Company's own assumptions about the assumptions market participants would use in pricing the assets or liabilities. Unobservable inputs are based on the best information available in the circumstances, which might include the Company's own data.

Financial assets and liabilities are classified based on the lowest level of input that is significant to the fair value measurement. The Company's assessment of the significance of a particular input to fair value measurement requires judgment and may affect the fair value assets and liabilities of their placement within fair value hierarchy levels.

Fair values are estimated for the majority of the Company's financial instruments. Estimations of fair value, which are based on principles such as discounting future cash flows to present value, must be weighted by the fact that the value of a financial instrument at a given time may be influenced by the market

environment (particularly liquidity), and also the fact that subsequent changes in interest rates and exchange rates are not taken into account.

Fair value of derivative financial instruments is estimated through mark-to-market of all open positions. The valuations are determined on a daily basis using observable market data based on organized and over the counter markets.

The valuation techniques that may be used to measure fair value include a market approach, an income approach and a cost approach. A market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets or liabilities. An income approach uses valuation techniques to convert future amounts to a single present amount based on current market expectations, including present value techniques, option-pricing models and the excess earnings method. The cost approach is based on the amount that currently would be required to replace the service capacity of an asset (replacement cost).

(q) Goodwill

Goodwill represents the excess of the cost of an acquisition over the fair value of the net assets acquired. Impairment may occur if the reporting unit's carrying value exceeds its fair value. Due to the nature of the goodwill arising from the acquisition of KV, as is described further in *Note 18 — Corporatization Event,* the Company's goodwill is tested at the reporting unit level, which for the Company is at the consolidated level due to the Company having one identifiable operating segment or reporting unit. Under the provisions of ASC 350 *Intangibles — Goodwill and Other*, the Company performs an impairment test for goodwill at least annually or when events and circumstances indicate the carrying value may not be recoverable. In performing the required impairment tests, the Company has the option to first assess qualitative factors to determine if it is necessary to perform a quantitative assessment for goodwill impairment. If the qualitative assessment concludes that it is more-likely-than-not that the fair value of a reporting unit is less than its carrying value, a quantitative assessment is performed. The Company's quantitative assessment utilizes present value (discounted cash flow) methods to determine the fair value of the reporting units with goodwill. Determining fair value using discounted cash flows requires considerable judgment and is sensitive to changes in underlying assumptions and market factors. Key assumptions relate to revenue growth, projected operating income growth, terminal values, and discount rates. If current expectations of future growth rates and margins are not met, or if market factors outside of the Company's control, such as factors impacting the applicable discount rate, or economic or political conditions in key markets change significantly, then goodwill allocated to the reporting unit may be impaired. Management determined there were no circumstances indicating the carrying value may not be recoverable during the years ended December 31, 2021 and 2020. There have been no impairments recorded related to goodwill as the results of the annual quantitative impairment test indicated the fair value of the assets of the group to be greater than the carrying value as of December 31, 2021 and 2020.

(r) Equity-based Compensation

The Company recognizes compensation cost related to equity-based awards in the consolidated financial statements on a straight-line basis based on estimated grant date fair value. Equity-based compensation awards which ultimately settle in cash are accounted for as liabilities, and awards which are contingently settled in cash or shares of the Company's common stock are accounted for as mezzanine equity. Mezzanine equity classified awards which are considered probable of becoming redeemable are carried on the Consolidated Balance Sheets at the greater of redemption value or initial carrying value. Changes in the redemption value of the awards result in a transfer from stockholders' equity to mezzanine equity on the Consolidated Balance Sheets of the Company.

The Company is authorized to grant equity-based compensation in the form of restricted stock units which include service conditions, and performance-based restricted stock units, which include service

conditions, market performance conditions, and non-market performance conditions. The grant date fair value is determined based on the components of the award and utilize the estimated fair value of common stock prices on the grant date, Monte Carlo simulations, and the fair market value of common stock coupled with probability assessments relative to the satisfaction of non-market performance conditions.

Compensation cost is recognized ratably on a straight-line basis over the applicable vesting or service period, as applicable. Forfeitures are estimated and recognized over the applicable vesting or service period and are re-evaluated at the end of each reporting period. Actual forfeitures are recognized as they occur by reversing the expense previously recognized for awards that were forfeited during the period. The Company's equity-based compensation is discussed further in *Note 11 — Equity-based Compensation*.

(s) Treasury Stock

The Company recognizes purchases of its own stock as a reduction to stockholders' equity or mezzanine equity in the Consolidated Balance Sheets using the cost method. Shares are held until authorized for redistribution by the Company's Board of Directors.

(t) Equity Method Investments

The Company applies the equity method of accounting to its investments over which it does not have the power to direct the activities that most significantly impact the investment's economic performance. The Company's judgment regarding the level of influence over its equity method investments includes considering key factors such as the Company's ownership interest, representation on the board of directors and participation in the policy-making decisions of equity method investees. The carrying value of the Company's equity method investments is recorded in Investment in joint venture on the Consolidated Balance Sheets. The Company's pro-rata share of earnings in equity method investments is recorded in Income from equity affiliates in the Consolidated Statements of Operations and Comprehensive Loss.

The Company evaluates its investment in the equity method investee for impairment whenever events or changes in circumstances indicate that the carrying value of its investment may have experienced an "other-than-temporary" decline in value. If such conditions exist, the Company compares the estimated fair value of the investment to its carrying value to determine if an impairment is indicated. If impairment is indicated, the Company then determines whether the impairment is "other-than-temporary" based on its assessment of all relevant factors, including consideration of the Company's intent and ability to retain its investment.

(u) Earnings (Loss) Per Common Share

Earnings (loss) per common share — basic for each period is computed by dividing net income (loss) attributable to BKV Corp by the basic weighted average number of shares outstanding during the period. The potential dilutive effect of shares is calculated using the treasury stock method or if-converted method as applicable. During periods in which the Company incurs a net loss, diluted weighted average shares outstanding are equal to basic weighted average shares outstanding because the effects of all potential shares are anti-dilutive.

(v) Business Segment Information

The Company is organized and managed and identified as one operating segment and one reportable segment.The Company measures financial performance on a consolidated basis with all operating revenues and income from operations with all operating revenues and income from operations generated in, and all assets based in the United States.

BKV CORPORATION

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
For the years ended December 31, 2021 and 2020

(w) Recently Issued Accounting Standards

In February 2016, the FASB issued Accounting Standards Update ("ASU") No. 2016-02, Leases. The objective of this ASU is to increase transparency and comparability among organizations by recognizing lease assets and liabilities on the balance sheet and disclose key information about leasing arrangements. The FASB subsequently issued various ASUs which provided additional implementation guidance, and these ASUs collectively make up ASC 842 — Leases ("ASC 842"). For non-public companies, ASC 842 had an effective date for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2021 with early adoption permitted. The Company elected early adoption and adopted ASC 842 effective January 1, 2020 using the modified retrospective method as of the adoption date. Refer to *Note 2 — Summary of Significant Accounting Policies (l) Leases* and *Note 16 — Leases* for more information on the Company's implementation of this standard.

In December 2019, the FASB issued ASU No. 2019-12, Simplifying the Accounting for Income Taxes. This ASU removes certain exceptions to the general principles in ASC 740 — Income Taxes ("ASC 740") and also simplifies portions of ASC 740 by clarifying and amending existing guidance. It is effective for interim and annual reporting periods after December 15, 2020. The Company adopted this ASU on January 1, 2021, and it did not have a material impact on the Company's consolidated financial statements.

In March 2020, the FASB issued ASU No. 2020-04, Reference Rate Reform (Topic 848): Facilitation of the Effects of Reference Rate Reform on Financial Reporting ("ASU 2020-04"), and in January 2021, issued ASU No. 2021-01, Reference Rate Reform (Topic 848): Scope ("ASU 2021-01"), to provide clarifying guidance regarding the scope of Topic 848. ASU 2020-04 was issued to provide optional guidance for a limited period of time to ease the potential burden in accounting for (or recognizing the effects of) reference rate reform on financial reporting. Generally, the guidance is to be applied as of any date from the beginning of an interim period that includes or is subsequent to March 12, 2020, or prospectively from a date within an interim period that includes or is subsequent to March 12, 2020, up to the date that the financial statements are available to be issued. ASU 2020-04 and ASU 2021-01 are effective for all entities through December 31, 2022. The Company has elected not to use the optional guidance provided by these ASUs. Please refer to *Note 7 — Related Parties* and *Note 8 — Credit Facilities* for discussion of the use of the LIBOR in connection with borrowings under the Loan Facility agreements with BNAC and credit facilities with banks.

In August 2020, the FASB issued ASU 2020-06, Debt with Conversion and Other Options and Derivatives and Hedging: Accounting for Convertible Instruments and Contracts in an Entity's Own Equity. This ASU simplifies accounting for convertible instruments by removing certain separation models for convertible instruments. For convertible instruments with conversion features that are not accounted for as derivatives under ASC 815 or do not result in substantial premiums accounted for as paid-in capital, the convertible instrument's embedded conversion features are no longer separated from the host contract. Consequently, and as long as no other feature requires bifurcation and recognition as a derivative, the convertible instrument is accounted for as a single liability (if applicable) and is measured at its amortized cost. This ASU is effective for fiscal years beginning after December 15, 2021, including interim periods within those fiscal years. Early adoption is permitted for fiscal years ending after December 15, 2020. The Company has elected early adoption of this ASU effective as of January 1, 2021, using the full retrospective method of adoption. The accompanying Consolidated Balance Sheet was adjusted as follows:

	As of December 31, 2020		
(in thousands)	**As Reported**	**Adjustment**	**As Adjusted**
Preferred Stock – mezzanine equity	$ 396	$ 94,528	$ 94,924
Additional paid in capital – permanent equity	$1,063,028	$ (94,528)	$ 968,500

The early adoption of ASU 2020-06 did not have an impact on the Company's Consolidated Statement of Operations and Compressive Loss for the year ended December 31, 2020.

BKV CORPORATION

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
For the years ended December 31, 2021 and 2020

As of December 31, 2021 and through the date the consolidated financial statements were available for issuance (see *Note 20 — Subsequent Events*), no other ASUs have been issued that are applicable to the Company and that would have a material effect on the Company's consolidated financial statements and related disclosures.

Note 3 — Natural Gas Properties & Other Property and Equipment

Accumulated depreciation, depletion and amortization for developed gas properties as of December 31, 2021 and 2020 was $267.3 million and $190.3 million, respectively. Depreciation, depletion and amortization expense for developed natural gas properties for the years ended December 31, 2021 and 2020 was $78.1 million and $79.8 million, respectively. There were no exploratory well costs pending determination of proved reserves at December 31, 2021 and 2020 and no exploratory dry hole costs during the years ended December 31, 2021 and 2020.

Midstream assets consisted of the following:

	As of December 31,	
(in thousands)	**2021**	**2020**
Compressor station	$ 6,831	$ 6,831
Meter station	654	654
Pipelines	47,878	47,828
Total	55,363	55,313
Accumulated depreciation	(7,417)	(6,069)
Midstream assets, net	$47,946	$49,244

Depreciation expense on midstream assets of $1.3 million was recognized during each of the years ended December 31, 2021 and 2020.

Other property and equipment consisted of the following:

	As of December 31,	
(in thousands)	**2021**	**2020**
Buildings	$12,675	$12,675
Furniture, fixtures, equipment and vehicles	6,555	4,046
Computer software	4,715	4,901
Leasehold improvements	1,571	1,119
Land	3,090	3,090
Total	28,606	25,831
Accumulated depreciation	(6,482)	(2,663)
Other property and equipment, net	$22,124	$23,168

Depreciation expense for other property and equipment for the years ended December 31, 2021 and 2020 was $2.8 million and $1.8 million, respectively.

Barnett Asset Acquisition

On December 17, 2019, Barnett entered into a Purchase and Sale Agreement ("PSA"), which was subsequently amended, to acquire certain operated and non-operated interests in proved reserves and related upstream assets in the Barnett formation from Devon Energy Corporation ("Seller") for $570.0 million,

subject to certain closing adjustments. The PSA included contingent payments totaling $260.0 million if certain commodity price thresholds are met during a four year period commencing January 1, 2021. The transaction closed on October 1, 2020. The acquisition was made to support the strategic growth of the Company.

Barnett paid $70.0 million into escrow in December 2019 and an additional $100.0 million in April 2020 for a total deposit of $170.0 million. At closing the Company paid an additional $319.8 million. As of the acquisition date, the fair value of the additional contingent payments was $19.7 million. See *Note 4 — Fair Value Measurements* and *Note 15 — Commitments and Contingencies* for discussion of the fair market value valuation methodology applied to the contingent consideration at the acquisition date and as of December 31, 2021, and 2020. Subsequent changes in the fair value of the contingent consideration are recognized in the Consolidated Statement of Operations and Comprehensive Loss.

The acquisition qualified as an asset acquisition as the fair value of substantially all the assets acquired were concentrated in a group of similar assets. Transaction costs incurred to acquire the assets, which amounted to $11.9 million, were capitalized and included in the cost basis of the acquired assets. Asset retirement liabilities were estimated to be $120.6 million as of the acquisition date.

The consideration was allocated to the assets acquired and liabilities assumed as follows:

(in thousands)	
Assets acquired	
Developed properties	$ 624,914
Other property and equipment	14,264
Inventory	2,784
Liabilities assumed	
Contingencies and contingent payments	(19,700)
Asset Retirement Obligations	(120,550)
Total	$ 501,712

There were no other significant acquisitions or divestitures of natural gas properties during the years ended December 31, 2021 and 2020, and there were no transfers of exploration and evaluation assets to natural gas properties.

Note 4 — Fair Value Measurements

ASC 820 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Company utilizes market data or assumptions that market participants would use in pricing the asset or liability, including assumptions about risk and the risks inherent in the inputs to the valuation technique. These inputs can be readily observable, market corroborated or generally unobservable. The Company primarily applies the income approach for recurring fair value measurements and endeavor to utilize the best available information. Accordingly, the Company utilizes valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. The Company can classify fair value balances based on the observability of those inputs.

The fair value of derivatives is based on third-party pricing models which utilize inputs that are either readily available in the public market, such as natural gas and NGL forward curves and discount rates, or can be corroborated from active markets or broker quotes. These values are compared to the values given by counterparties for reasonableness. Since natural gas and NGL swaps do not include optionality and therefore generally have no unobservable inputs, they are classified as Level 2. Derivatives are also subject to

the risk that either party to a contract will be unable to meet its obligations. The Company factors non-performance risk into the valuation of derivatives using current published credit default swap rates. As of December 31, 2021, the impact of the non-performance risk adjustment to the Company's on the fair value of commodity derivative liabilities was $4.2 million; the impact to the fair value as of December 31, 2020, was not material.

Derivative assets and liabilities measured at fair value as of December 31, 2021 and 2020 use Level 2 valuation techniques; contingent consideration is measured at fair value and as of these reporting dates uses Level 3 valuation techniques. There have been no transfers between fair value levels during the reporting periods. The fair value hierarchy for grouping these assets and liabilities is based on the significance level of inputs.

The following tables set forth by level within the fair value hierarchy of financial assets and liabilities that were accounted for at fair value on a recurring basis:

	As of December 31, 2021			
	Fair Value Measurements Using:			
(in thousands)	Quoted Prices in Active Markets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
Financial assets				
Derivative instruments	—	9,986	—	9,986
Financial liabilities				
Derivative instruments	—	114,818	—	114,818
Contingent Consideration	—	—	142,533	142,533
Mezzanine equity				
Minority ownership puttable shares	—	—	49,841	49,841
Equity-based compensation	—	—	34,006	34,006

	As of December 31, 2020			
	Fair Value Measurements Using:			
(in thousands)	Quoted Prices in Active Markets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
Financial assets				
Derivative instruments	—	15,499	—	15,499
Financial liabilities				
Derivative instruments	—	5,170	—	5,170
Contingent Consideration	—	—	12,565	12,565
Mezzanine equity				
Minority ownership puttable shares	—	—	42,288	42,288

The contingent consideration first reported in the year ended December 31, 2020 was generated from the asset acquisition described in *Note 3 — Natural Gas Properties & Other Property and Equipment.* The fair value of the contingent consideration as of December 31, 2021 and 2020 represents management's best estimate if a third party were paid to assume the contingency. The fair value was determined using forecasted

BKV CORPORATION

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
For the years ended December 31, 2021 and 2020

monthly Henry Hub Prices and West Texas Intermediate prices,and applicable credit spread and risk free rates in the application of Monte Carlo simulations. This contingency, including the settlement, is described further in *Note 15 — Commitments and Contingencies* to the audited consolidated financial statements.

The minority ownership puttable shares were recorded at fair value upon initial recognition in mezzanine equity on the Consolidated Balance Sheets. The fair market value of the Company's common stock was used to determine the carrying value of the minority ownership puttable shares in mezzanine equity on the Consolidated Balance Sheets as of December 31, 2021 and 2020. The Company's common stock was valued using both observable (Level 2) and unobservable (Level 3) inputs. The minority ownership puttable shares are further described in *Note 12 — Stockholders' Equity and Mezzanine Equity* and *Note 18 — Corporatization Event* to the consolidated financial statements.

Equity-based compensation was recorded at fair value on the date of the modification of the terms of the awards. The underlying market condition was valued using the application of Monte Carlo simulations using both observable (Level 2) and unobservable (Level 3) inputs. The remaining components of the awards were valued based on the fair market value of the common stock of the Company, which is valued consistent with valuation methodologies described for the minority ownership puttable shares. The fair market value of the Company's market condition and common stock as of December 31, 2021 were used to determine the fair market value of equity-based compensation in mezzanine equity on the Consolidated Balance Sheet as of December 31, 2021. Equity-based compensation is further described in *Note 11 — Equity-based Compensation* and *Note 12 — Stockholders' Equity and Mezzanine Equity* to the consolidated financial statements.

Quantitative data regarding the Company's Level 3 unobservable inputs are as follows:

(in thousands, except per share amounts)	Fair Value	Valuation Technique	Unobservable Input	Range or Actual
Common stock – per share – as of May 1, 2020[1]	$ 10.00	Enterprise value	Discount rate	8.9 – 10%
Common stock – per share – as of December 31, 2020[1]	$ 10.00	Enterprise value	Discount rate	8.9 – 10%
Contingent Consideration – as of December 31, 2020	$ 12,565	Monte Carlo Simulation	Risk free Rate	0.3%
			Credit Spread	6.7%
			Discount Rate	7.0%
Contingent consideration – as of December 31, 2021	$142,533	Monte Carlo Simulation	Risk Free Rate	1.0%
			Credit Spread	4.0%
			Discount Rate	5.0%
Market condition equity-based compensation per share – as of October 31, 2021	$ 10.72	Monte Carlo Simulation	Performance period dividends	3% equity capital, annually
Market condition equity-based compensation per share – as of December 31, 2021	$ 13.77	Monte Carlo Simulation	Performance period dividends	3% equity capital, annually
Common stock – per share value – as of October 31, 2021[1]	$ 11.06	Enterprise value	Discount rate	10.0%
Common stock – per share value – as of December 31, 2021[1]	$ 11.75	Enterprise value	Discount rate	7.7 – 9.5%

BKV CORPORATION

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
For the years ended December 31, 2021 and 2020

(1) The Company uses the midpoint of valuation results when estimating the fair value of common stock.

The table below sets forth the changes in the Company's Level 3 financial instruments carried at fair value on a recurring basis:

	Year ended December 31,	
(in thousands)	**2021**	**2020**
Fair value, beginning of period	$ 54,853	$ —
Contingent consideration-additions through asset acquisition (*Note 3*)	—	19,700
Contingent consideration – settlement *(Note 15)*	(65,000)	—
Minority ownership puttable share activity (*Note 12)*	511	42,288
Grant date fair value of equity-based compensation *(Note 11)*	28,990	—
Change in fair market value *(all instruments)*	207,026	(7,135)
Fair value, end of period	$ 226,380	$ 54,853

Note 5 — Derivative Financial Instruments

From time to time, the Company may utilize derivative contracts in connection with its natural gas and NGL operations to provide an economic hedge of the Company's exposure to commodity price risk associated with anticipated future natural gas and NGL production. The Company does not hold or issue derivative financial instruments for trading purposes. The derivative contracts outstanding as of December 31, 2021 and 2020 consisted of swap, enhanced three-way collar, and collar agreements, subject to master netting agreements with each individual counterparty. The following table presents gross commodity derivative balances prior to applying netting adjustments and net balances recorded in the Consolidated Balance Sheets:

	As of December 31, 2021		
(in thousands)	**Gross Amounts of Assets and Liabilities**	**Offset Adjustments**	**Net amounts of assets/liabilities**
Current derivative assets	$ 9,986	—	$ 9,986
Noncurrent derivative assets	$ —	—	$ —
Current derivative liabilities	$ 91,156	—	$ 91,156
Noncurrent derivative liabilities	$ 23,662	—	$ 23,662

	As of December 31, 2020		
(in thousands)	**Gross Amounts of Assets and Liabilities**	**Offset Adjustments**	**Net amounts of assets/liabilities**
Current derivative assets	$ 27,680	(12,196)	$ 15,484
Noncurrent derivative assets	$ 15	—	$ 15
Current derivative liabilities	$ 12,196	(12,196)	$ —
Noncurrent derivative liabilities	$ 5,170	—	$ 5,170

Enhanced Three-way Collar, Collar and Swap Contracts

Generally, enhanced three-way collar arrangements provide for a price floor, a price ceiling and either a price sub-floor or price sub-ceiling. The floating price for the enhanced three-way collar contracts is traded

for a fixed price when the floating price is not between the floor and ceiling, and for twice the contracted volumes within the contracted volumes, the sub-floor/ceiling. If the floating price is between these contracted prices, no trade occurs. A commodity swap agreement is an agreement whereby a floating price based on the underlying commodity is traded for a fixed price over a specified period. A commodity collar provides for a price floor and a price ceiling.The floating price for the collar contract is traded for a fixed price when the floating price is not between the floor and ceiling. If the floating price is between these contracted prices, no trade occurs.

The fair value of open enhanced three-way collars, collars and swap contracts reported in the Consolidated Balance Sheets may differ from that which would be realized in the event the Company terminated its position in the respective contract. Risks may arise as a result of the failure of the counterparty to the contract to comply with the terms of the contract. The loss incurred by the failure of the counterparties is generally limited to the aggregate fair value of the outstanding contracts in an unrealized gain position as well as any collateral posted with the counterparty. The Company considers the creditworthiness of each counterparty to a three-way collar, option, or swap contract in evaluating potential credit risk. Additional risks may arise from unanticipated movements in the fair value of the underlying investments.

Derivative Contracts

The Company records its derivative financial instruments related to natural gas and NGL production at fair value using a market approach and has not designated any derivatives as hedges. Derivative financial instruments are marked-to-market and presented on the Consolidated Balance Sheets as commodity derivative assets or commodity derivative liabilities with the amount of unsettled gain or loss reflected in derivative (losses) gains, net in the Consolidated Statements of Operations and Comprehensive Loss. Derivative financial instruments that settle throughout the year are recorded as derivative (losses) gains, net in the Consolidated Statements of Operations and Comprehensive Loss. The following table sets forth the effect of derivative instruments on the Consolidated Statement of Operations and Comprehensive Loss:

	Year Ended December 31,	
(in thousands)	**2021**	**2020**
Total gain (loss) on settled derivative instruments	$ (268,686)	$ 10,427
Total gain (loss) on unsettled derivative instruments	(115,161)	10,329
Total gain (loss) on derivative instruments	$ (383,847)	$ 20,756

Settled derivative instrument gain (loss) for the years ended December 31, 2021, and 2020 include losses of $30.9 million and gains of $2.7 million, respectively, related to monetization of certain natural gas derivative instruments prior to their contractual settlement dates. During the year ended December 31, 2021 monetization events occurred in October and November. Pursuant to the monetization agreements, the settlements were payable in four equal installments quarterly beginning on the respective monetization dates.

As of December 31, 2021, $66.8 million of settled derivative instruments was included in accounts payable and accrued liabilities on the Company's Consolidated Balance Sheet; which included $23.2 million related to monetizations. As of December 31, 2020, $5.5 million of settled derivative instruments receivable was included in accounts receivable, net on the Company's Consolidated Balance Sheet.

Volume of Derivative Activities

Outstanding derivative contracts are measured at fair value using Level 2 valuation techniques and are included in the accompanying Consolidated Balance Sheets as derivative assets and derivative liabilities.

BKV CORPORATION

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
For the years ended December 31, 2021 and 2020

At December 31, 2021, the Company's derivative activities based on volume and contract prices, categorized by primary underlying risk and related commodity, by year, were as follows:

The following table represents natural gas commodity derivatives indexed to NYMEX Henry Hub pricing:

Instrument	MMBTU	Weighted Average Price (USD)	Weighted Average Price Sub Floor	Weighted Average Price Floor	Weighted Average Price Ceiling	Weighted Average Price Sub Ceiling	Fair Value as of December 31, 2021 (In thousands)
2022							
Swap	28,700,000	$ 3.74					$ 2,302
Enhanced three-way collars	52,185,000		$ 2.51	$ 2.57	$ 3.14	$ 3.17	$ (75,589)
Collars	6,320,000			$ 2.82	$ 3.63		$ (4,018)
2023							
Swap	3,340,000	$ 2.81					$ (1,512)
Three-way collars	8,350,000			$ 2.45	$ 3.15	$ 3.15	$ (7,587)
Collars	50,100,000			$ 2.85	$ 3.75		$ (3,097)

The following table represents natural gas liquids commodity derivatives for contracts expiring throughout the year ended December 31, 2022 and 2023 based on the applicable index listed below:

Instrument	Commodity Reference Price	GAL	Weighted Average Price (USD)	Fair Value at December 31, 2021 (In thousands)
2022				
Swap	OPIS Purity Ethane Mont Belvieu	38,325,000	$ 0.27	$ (1,244)
Swap	OPIS IsoButane Mont Belvieu Non-TET	3,832,500	$ 0.99	$ (736)
Swap	OPIS Normal Butane Mont Belvieu Non-TET	7,665,000	$ 0.98	$ (1,554)
Swap	OPIS Pentane Mont Belvieu Non-TET	7,665,000	$ 1.46	$ (1,698)
Swap	OPIS Propane Mont Belvieu Non-TET	22,995,000	$ 0.86	$ (3,830)
2023				
Swap	OPIS Purity Ethane Mont Belvieu	38,325,000	$ 0.23	$ (984)
Swap	OPIS IsoButane Mont Belvieu Non-TET	3,832,500	$ 0.80	$ (501)
Swap	OPIS Normal Butane Mont Belvieu Non-TET	3,832,500	$ 0.80	$ (504)
Swap	OPIS Pentane Mont Belvieu Non-TET	7,665,000	$ 1.28	$ (1,568)
Swap	OPIS Propane Mont Belvieu Non-TET	22,995,000	$ 0.72	$ (2,714)

Additional Disclosures about Derivative Instruments

The use of derivative instruments involves the risk that the counterparties will be unable to meet their obligations under the agreements. The Company's counterparties are primarily commercial banks and financial service institutions that management believes present minimal credit risk and its derivative contracts are with multiple counterparties to minimize its exposure to any individual counterparty. The Company performs both quantitative and qualitative assessments of these counterparties based on their credit ratings and credit default swap rates where applicable.

Subsequent activity

From December 31, 2021 and through the date the consolidated financial statements were available for issuance, the Company entered into the following commodity derivative positions for natural gas:

Instrument	MMBTU	Weighted Average Price (USD)
2022 Swaps	14,919,000	$ 4.98
2023 Swaps	56,587,000	$ 3.99

From December 31, 2021 and through the date the consolidated financial statements were available for issuance, the Company entered into the following commodity derivative positions for natural gas liquids:

Instrument	Commodity Reference Price	GAL	Weighted Average Price (USD)	Weighted Average Price Floor	Weighted Average Price Ceiling
2022					
Swap	OPIS Purity Ethane Mont Belvieu Non-TET	56,019,600	$ 0.37		
Collar	OPIS IsoButane Mont Belvieu Non-TET	2,318,400		$ 1.25	$ 1.42
Collar	OPIS Normal Butane Mont Belvieu Non-TET	3,733,800		$ 1.25	$ 1.55
Collar	OPIS Pentane Mont Belvieu Non-TET	5,665,800		$ 1.80	$ 2.18
Collar	OPIS Propane Mont Belvieu Non-TET	15,582,000		$ 1.14	$ 1.30

Note 6 — Asset Retirement Obligations

The Company has recognized an estimated liability for its asset retirement obligations related to the future costs of plugging, abandonment, and remediation of natural gas producing properties. The present value of the estimated asset retirement obligations has been capitalized as part of the carrying amount of the related natural gas properties. The liability has been accreted to its present value during the years ended December 31, 2021, and 2020.

The following table summarizes the activities of the Company's asset retirement obligations for the periods indicated:

	Year ended December 31,	
(In thousands)	2021	2020
Asset retirement obligations, beginning of period	$148,826	$ 24,293
Additions through asset acquisition (*Note 3*)	—	120,550
Liabilities incurred	923	772
Liabilities settled	(811)	—
Accretion of discount	10,030	3,211
Asset retirement obligations, end of period	158,968	148,826
Less current portion	—	—
Asset retirement obligation, long-term	$158,968	$148,826

BKV CORPORATION

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
For the years ended December 31, 2021 and 2020

Note 7 — Related Parties

During 2020, the Company entered into the First Amendment to a note payable with its majority shareholder BNAC (the "Lender") which allowed for a single drawdown in the amount of $10.0 million. On July 1, 2020, BKV Corp received $10.0 million through a drawdown pursuant to the terms of the First Amendment to the Loan Agreement with interest at 5.3%. During the years ended December 31, 2021 and 2020 the Company recorded interest expense on this loan of $0.1 million and $0.2 million, respectively, in the Consolidated Statements of Operations and Comprehensive Loss. The full balance of the loan outstanding as of December 31, 2020 was repaid during the year ended December 31, 2021.

On September 28, 2020, BKV Corp received $119.0 million in accordance with a separate loan agreement entered into with the Lender. On December 16, 2020, $100.0 million of the original principal balance was repaid to the Lender. Interest on the outstanding principal is 5.25% + six-month LIBOR. During the years ended December 31, 2021 and 2020, the Company recorded interest expense on this loan of $0.2 million and $1.5 million, respectively, in the Consolidated Statements of Operations and Comprehensive Loss. The remaining balance of the loan outstanding as of December 31, 2020 was repaid during the year ended December 31, 2021.

On October 14, 2021, the Company entered into a Loan Facility Agreement with the Lender which allowed for a single drawdown in the amount of $116.0 million on the date of the agreement. Interest on the outstanding principal is LIBOR+ 5.25% and is payable on a semi-annual basis. The outstanding balance of $116.0 million as of December 31, 2021, as amended on June 15, 2022, is due on December 31, 2027, including any unpaid interest. The applicable interest rate as of December 31, 2021 was 5.41%. Interest payable under this Loan Facility as of December 31, 2021 was $1.4 million.

On November 8, 2021, the Company entered into a Loan Facility Agreement with the Lender which allowed for a single drawdown in the amount of $50.0 million on the date of the agreement. Interest on the outstanding principal is LIBOR+ 5.25% and is payable on a semi-annual basis. The outstanding balance of $50.0 million as of December 31, 2021 is due on June 30, 2022, including any unpaid interest. In the event the Company draws on its credit facility, described further in *Note 8 — Credit Facilities*, $15.0 million of the Loan Facility is required to be paid at that time. The applicable interest rate as of December 31, 2021 was 5.46%. Interest payable under this Loan Facility as of December 31, 2021 was $0.4 million. On January, 11, 2022, and June 1, 2022 the Company repaid $15.0 million and $35.0 million, respectively, repaying the entire outstanding balance as of December 31, 2021.

LIBOR was discontinued as a global reference rate for new loans and contracts after December 31, 2021. The Loan Facility Agreements with outstanding balances as of December 31, 2021 specify that if LIBOR is no longer a widely used as a reference rate in the financial market, with mutual agreement with the Company a replacement rate will be specified. As of the date the financial statements are available to be issued, no such agreement has been reached and the Company continues to be charged interest using LIBOR rates as previously stated. Please refer to *Note 2 — Summary of Significant Accounting Policies* for discussion of FASB ASU 2020-04 and ASU 2021-01, which provides guidance related to reference rate reform.

The Company is subject to certain financial and non-financial covenants under the Loan Facility Agreements entered into on October 14, 2021 and November 8, 2021 ("2021 Lender Agreements"). The non-financial covenants prevent the Company from: incurring a lien on its, or any of its subsidiaries, assets or related revenues; incurring additional indebtedness without written consent of the Lender; incurring additional unsecured indebtedness whereby the Lender does not rank equal to holder of the new unsecured indebtedness; or conducting any business outside of the business currently conducted by the Company. The financial covenants require the Company to maintain a net worth, as defined within the 2021 Lender Agreements, of greater than $800.0 million. The Company is also required to maintain a trailing twelve-month net borrowings to EBITDAX ratio of greater than 3.0x following each draw down. The Company was in compliance with all associated covenants under the 2021 Lender Agreements as of December 31, 2021.

On March 10, 2022, the Company entered into a Loan Facility Agreement with the Lender which allowed for a single drawdown in the amount of $75.0 million on the date of the agreement. Interest on the outstanding principal is SOFR + 5.25% and is payable on a semi-annual basis. The principal balance of $75.0 million, as amended on June 15, 2022, is due on December 31, 2027, including any unpaid interest. On June 15, 2022, the Company entered into a subordination agreement with the lender whereby the $75.0 million is subordinate to the term loans of the Company under the Credit Agreement further discussed in *Note 20 — Subsequent Events*.

As of December 31, 2021 and 2020, the Company had a $30.7 million and a $1.2 million payable, respectively, to BNAC for current tax expense reflected in the Income taxes payable to related party line item on the Consolidated Balance Sheets. The amounts due to BNAC as of December 31, 2021 and 2020, respectively, related to reimbursements for income tax related items. Separately, the Company had $0.5 million receivable from BNAC as of December 31, 2021, related to shared general and administrative expenses.

As of December 31, 2021, the Company had accounts receivable from BKV-BPP Power, LLC of $1.8 million related to reimbursement for certain expenses paid on behalf of BKV-BPP Power, LLC and amounts receivable under the Administration Services Agreement between the Company and BKV-BPP Power, LLC. See *Note 13 — Equity Method Investment* for further discussion.

The Company's ultimate parent Banpu Public Company Limited is also the ultimate parent of Banpu US Power Corporation ("BPP US"), the Company's partner in a joint venture which is discussed further in *Note 13 — Equity Method Investment*. As of December 31, 2021, the Company had accounts receivable from BPP US of $1.3 million related to reimbursement for expenses incurred during the formation of the joint venture.

Note 8 — Credit Facilities

On December 22, 2021 the Company entered into an agreement with a bank (the "Bank") which provides for a revolving credit facility (the "Facility") with a limit of $55.0 million. The Facility is not secured. Advances on the Facility are required to be repaid upon the earlier of sixty days after the date of the advance, or upon the receipt of a written demand notice from the Bank. Advances from the Facility must be greater than $1.0 million. Interest on any outstanding advances is payable monthly at a rate of LIBOR +2.0%. As of December 31, 2021, the Company had no outstanding advances under this facility. LIBOR was discontinued as a global reference rate for new loans and contracts after December 31, 2021. The Facility agreement includes a provision for transition to a SOFR based interest rate upon the Company receiving notification from the Bank.

Subsequent Activities

On January 20, 2022 the Company received an advance from the Facility in the amount of $30.0 million, which was paid in February of 2022.

On March 16, 2022, the Company entered into an agreement with another bank which provides for revolving term loans and letters of credit ("Facility II") with a limit of $25.0 million. Of the $25.0 million, $15.0 million is available for cash draw downs, and in the absence of outstanding cash draw downs, the full $25.0 million is available for letters of credit. Facility II is not secured. Interest is agreed upon at the time of each cash drawn down. Facility II had one outstanding letter of credit for $14.4 million as of the date the consolidated financial statements were available for issuance.

On May 23, 2022, the Bank enacted the change to SOFR. Please refer to *Note 2 — Summary of Significant Accounting Policies* for discussion of FASB ASU 2020-04 and ASU 2021-01, which provides guidance related to reference rate reform.

On June 16, 2022, the Company received an advance from the Facility in the amount of $30.0 million. This amount was outstanding as of the date these financial statements were available for issuance.

BKV CORPORATION

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
For the years ended December 31, 2021 and 2020

Note 9 — Revenue from Contracts with Customers

The Company records sales revenue based on an estimate of the volumes delivered at estimated prices as determined by the applicable sales agreement, which is variable based on commodity pricing. The Company estimates its sales volumes based on company-measured volume readings. Natural gas, NGL and oil sales are adjusted in subsequent periods based on data received from the Company's purchasers that reflects actual volumes and prices received which is typically within two months of transfer of control to the purchaser. Historically, the difference between estimated and actual sales revenues have not been material. For the years ended December 31, 2021 and 2020, the impact of any natural gas imbalances was not significant.

In conjunction with its sales of natural gas, the Company records marketing revenues based on estimated underlying variable consideration pricing and delivered volumes. Marketing revenues are adjusted in subsequent periods based on data received from the Company's purchaser or trading partner. Historically, the difference between estimated and actual marketing revenues has not been material. The Company considers the amount of marketing revenues recognized during the year ended December 31, 2021 to be unusual.

The Company also generates revenues from its non-operated midstream interests. Midstream revenues are recognized when services are rendered based on quantities transported and measured according to the underlying contract. The Company records midstream revenue based on volumes at stated contractual rates. The Company estimates its volumes based on third-party data. Midstream revenues are adjusted in subsequent periods based on data received from the operator that reflects actual volumes which is typically within three months.

All of the Company's revenues are generated in the states of Pennsylvania and Texas. Revenues consist of the following:

	Year ended December 31, 2021		
(in thousands)	**Pennsylvania**	**Texas**	**Total**
Natural gas	$ 131,207	$465,843	$597,050
Natural gas liquids	—	225,135	225,135
Oil	—	7,560	7,560
Total production revenues	$ 131,207	$698,538	$829,745
Marketing revenues	—	52,616	52,616
Non-operated midstream revenues	6,917	—	6,917
Total	$ 138,124	$751,154	$889,278

	Year ended December 31, 2020		
(in thousands)	**Pennsylvania**	**Texas**	**Total**
Natural gas	$ 45,102	$56,656	$101,758
Natural gas liquids	—	11,952	11,952
Oil	—	1,333	1,333
Total production revenues	$ 45,102	$69,941	$115,043
Non-operated midstream revenues	7,458	—	7,458
Total	$ 52,560	$69,941	$122,501

Contract Balances

Receivables from contracts with customers are recorded when the right to consideration becomes unconditional, generally when control of the product has been transferred to the customer. Under the

BKV CORPORATION

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
For the years ended December 31, 2021 and 2020

Company's sales contracts, the Company invoices customers after its performance obligations have been satisfied, at which point payment is unconditional. As of December 31, 2020, and 2021, the Company's receivables from contracts with customers were $100.4 million and $73.8 million, respectively.

Note 10 — Accounts Payable and Accrued Liabilities

Accounts payable and accrued liabilities included in current liabilities consists of the following:

	As of December 31,	
(in thousands)	**2021**	**2020**
Accounts payable	$ 32,237	$ 8,706
Commodity derivative settlements payable	43,252	—
Commodity derivative monetizations payable	23,175	
Revenues payable	29,871	4,333
Other accrued liabilities	38,301	3,891
Total	$166,836	$16,930

Note 11 — Equity-based Compensation

On January 1, 2021 the BKV Corporation 2021 Long Term Incentive Plan (the "Plan") was established by the adoption of the Plan by the Board of Directors, which allows for the grant of incentive awards to employees and non-employee directors of the Company in the form of restricted stock units ("RSU"). Each RSU represents the contingent right to receive one share of common stock of the Company. As of December 31, 2021, the maximum number of RSU's authorized to be awarded under the Plan was 14,941,176. However, of the total authorized RSU's under the plan, only 60% may be awarded on or before December 31, 2022 without written approval of the Board of Directors of the Company. Thereafter, no more than 80% of the total RSU's may be awarded without the written approval of the Board of Directors of the Company. For accounting purposes, management evaluated grants of incentive awards from the Plan under ASC 718 — *Compensation — Stock Compensation* and determined a grant date, for all annual incentive awards, including those anticipated to be legally granted in the three years subsequent to the initial incentive award date, was established because all grant date criteria had been satisfied and compensation expense and forfeitures were accounted for accordingly. Under ASC 718 — *Compensation — Stock Compensation,* as of December 31, 2021, 14,882,898 RSU's were considered to have been granted under the plan when taking into consideration performance RSU's at the maximum performance level and time-based restricted stock units anticipated to be legally granted in the three years following the initial incentive award date. Of the awards considered granted under ASC 718 — *Compensation — Stock Compensation* during the year ended December 31, 2021, 1,969,801 RSU's are not considered legally granted.

RSU's are granted in the form of Performance-Based Restricted Stock Units ("PRSU") and Time-Based Restricted Stock Units ("TRSU"). The shares of common stock issued in settlement of the RSU's include a put right (the "Plan Put Right") available to the incentive award grant recipients (the "Participants"). If a Participant's employment is terminated due to voluntary resignation, and certain other conditions are met, a Participant is able to elect the Company to purchase the shares issued in settlement of his or her RSU's at fair market value of the Company's common stock at the time the election is made by the Participant. The Plan Put Right is only available to Participants upon the occurrence of certain events as defined in the Plan. As discussed below in "Modification of Terms," this Plan Put Right was modified on November 5, 2021 to add a one hundred eighty-one-day holding period following vesting of the RSU's. In addition, the Company has a purchase right (the "Call Right") which allows for the purchase of shares of common stock issued in the settlement of the RSU's from terminated participants at fair market value on the date of the purchase, at the Company's discretion. As discussed below in "Modification of Terms," this Call Right was modified on November 5, 2021 to add a one hundred eighty-one-day holding period following vesting of the RSU's.

These features, specifically the Plan Put Right, required the Company to treat the incentive awards as cash-settled or liability classified in the Consolidated Balance Sheets of the Company until the Plan was modified as described below. Under liability treatment, the Company incurred $26.7 million of equity-based compensation expense which is included within the Consolidated Statement of Operations as general and administrative expense. Valuation methodologies used were consistent with those described below.

Modification of terms

On November 5, 2021, the Board of Directors of the Company approved the First Amendment to the BKV Corporation 2021 Long Term Incentive Plan (the "Plan Amendment"). The Plan Amendment included a provision to require all Participants of the Plan to hold vested shares of common stock issued in settlement of RSU's for a minimum of one-hundred eighty-one days (the "Holding Period") prior to having the ability to exercise the Plan Put Right. The Amendment also applied the Holding Period to the Call Right. Upon modification, the RSU's under the plan are considered to be settled in equity, as the Holding Period is a reasonable period of time to experience the risk and rewards of an equity instrument. However, due to the existence of the Plan Put Right, the Company recognized the incentive awards within mezzanine equity on the Consolidated Balance Sheet as of the date of Plan Amendment. The fair market value of the RSU's prior to the modification was $25.3 million. This amount was transferred from liabilities into mezzanine equity on the Consolidated Balance Sheets of the Company. All Participants of the plan agreed to the terms of the Plan Amendment. See *Note 12 — Stockholders' Equity and Mezzanine Equity* for additional discussion of the Company's treatment of equity-based compensation within mezzanine equity.

The Amendment also established the Sell Fund Repurchase Program (the "Sell Fund"). Under the Sell Fund, Participants are able to tender for repurchase their vested shares of common stock to the Company after the required Holding Period, to the extent expressly permitted under their respective award agreements. On December 21, 2021, the Board of Directors of the Company approved the opening of the Company's first Sell Fund window, which closed on December 29, 2021. The opening of the Sell Fund window set forth requirements which limited participants in the number of shares that can be tendered, and a limitation whereby in aggregate, the total value of shares tendered by all Participants cannot exceed $2.0 million per year. Sell Fund windows can be opened twice per year, and the Sell Fund will remain in effect until the earlier of December 31, 2023 or the initial public offering of the Company. During the year ended December 31, 2021, the Company repurchased 9,949 shares at $11.06 per share for a total of $0.1 million.

Performance-Based Restricted Stock Units

During the year ended December 31, 2021, the Company granted 12.3 million PRSU's under the Plan taking into consideration performance shares at the maximum performance level. The PRSU's are subject to a three year vesting or performance period beginning January 1, 2021 and ending on the earlier of December 31, 2023 (the "Performance Period") or the Initial Public Offering of the Company. All PRSU's cliff vest based on and subject to the achievement of the performance criteria upon the earlier of an initial public offering of the Company, change in control, or December 31, 2023.

The table below summarizes the PRSU activity for the year ended December 31, 2021:

(in thousands, except per share amounts)	Shares	Weighted-Average Grant Date Fair Value
Unvested PRSU's at January 1, 2021	—	$ —
Granted[1]	12,257	$ 10.90
Forfeited[1]	(668)	$ (10.90)
Unvested PRSU's as of December 31, 2021	11,589	$ 10.90

(1) Granted and forfeited award amounts take into consideration performance shares at the maximum performance level

BKV CORPORATION

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
For the years ended December 31, 2021 and 2020

The PSRU's are eligible to be earned based on three performance conditions: (1) Annualized Total Shareholder Return ("TSR") of fully diluted common stock during the performance period, (2) Return on Capital Employed ("ROCE") based on the average annual performance over the Performance Period, and (3) IPO readiness which is based on the Company's capability to be listed on a public stock exchange at certain points during the performance period. Between 0% and 100% of the PRSU's at maximum performance level are eligible to be earned based on the Company achieving the following pre-established goals:

		Performance Conditions		
	Weight	Minimum Threshold (0%)	Target Threshold (50%)	Maximum Threshold (100%)
TSR	60%	5%	12.5%	20%
ROCE	20%	—%	7%	14%
IPO readiness (capability dates)	20%	12/31/2024	12/31/2023	12/31/2022

The TSR component of the awards is a market-based condition valued utilizing the Monte Carlo Simulation pricing model, which calculates multiple potential outcomes and establishes grant date fair value based on the most likely outcome. For the purposes of grant date fair value, the TSR component assumes a risk-free rate of 0.52% and volatility of 40.0%, see *Note 2 — Summary of Significant Accounting Policies (p) Fair value of Financial Instruments*, for the Level 3 unobservable input used in the determination of the grant date fair value of the TSR. The weighted average grant date fair value, considering the modification date, of the TSR component was $10.72.

ROCE and IPO readiness are considered to be non-market performance conditions. Thus, the likelihood of achievement must be reassessed at every reporting period, and compensation expense is adjusted accordingly. As of December 31, 2021, management estimates IPO readiness will be achieved at the maximum performance level or 100%, and ROCE performance to be greater than the target performance level at approximately 66%. Accordingly, adjustments were made to compensation expense during the year ended December 31, 2021 to reflect the estimated levels of achievement. In addition to the level of achievement, the adjustment takes into account the per share grant date fair value of the Company's common stock of $11.06 as of the modification date. The grant date fair value of the PSRU's presented in the activity for the year ended December 31, 2021 takes into account the grant date fair value for ROCE, IPO readiness, and TSR due to the non-market performance conditions being probable of achievement as of the modification date which establishes a grant date fair value.

As of December 31, 2021, there was $52.2 million of unrecognized compensation expense related to the PRSU awards which will be amortized over a weighted average period of 2 years.

After the modification of terms, equity-based compensation expense related to the PRSU's was $3.1 million during the year ended December 31, 2021.

Time-Based Restricted Stock Units

During the year ended December 31, 2021, the Company granted 2.6 million TRSU's under the Plan. Of the 2.6 million TRSU's granted during the year ended December 31, 2021, 2.0 million TRSU's are not considered legally granted, but meet the grant date criteria under ASC 718 *Compensation — Stock Compensation*. Under the applicable provisions of the Plan, the TRSU incentive award was anticipated to be granted in the form of four annual awards. One quarter of the annual award requires no service for vesting and vests immediately upon the grant date. The remaining three quarters of the annual award vest in equal portions upon the subsequent three anniversary dates following the grant date. The remaining annual awards are anticipated to be granted on the first, second and third anniversaries of the initial TRSU award date, subject to continued employment with the Company and board approval. Vesting for these anticipated three annual awards is expected to follow the same vesting schedule as the first annual awards based on the

legal grant date. Upon an initial public offering of the Company, all unvested and legally granted and outstanding awards under the Plan will vest immediately. Awards accounted for as granted under ASC 718 *Compensation — Stock Compensation*, but not legally granted at such time, will not vest and will be treated accordingly.

The following table summarizes the TRSU activity for the year ended December 31, 2021:

(in thousands, except per share amounts)	Shares	Weighted-Average Grant Date Fair Value
Unvested TRSU's at January 1, 2021	—	$ —
Granted[(1)]	2,626	$ 11.06
Vested	(164)	$ —
Forfeited	(134)	$ (11.06)
Unvested TRSU's as of December 31, 2021	2,328	$ 11.06

(1) Represents number of awards considered granted under ASC 718 C *ompensation — Stock Compensation*. Of these, 1,969,801 are not considered legally granted.

As of December 31, 2021, there was $22.4 million of unrecognized compensation expense related to the TRSU awards which will be amortized over a weighted average period of five years. The grant date fair value for each TRSU was $11.06 per unit, which represents the fair market value of the Company's common stock upon modification.

After the modification of terms, stock-based compensation expense related to the TRSU's was $0.5 million during the year ended December 31, 2021.

Tax Impact

During the year ended December 31, 2021, the Company recognized $6.6 million of tax benefit related to equity-based compensation.

Subsequent Activity

From December 31, 2021 and through the date the consolidated financial statements were available for issuance, the Company granted an additional 484,500 RSU's, comprised of 399,000 PRSU's (assuming maximum performance) and 85,500 TRSU's. Of the 85,500 TRSU's granted, 64,125 are not considered legally granted. In addition, of the 1,969,801 TRSU's considered granted under ASC 718 *Compensation — Stock Compensation,* but not legally granted during the year ending December 31, 2021, 620,789 of those awards have been legally granted since December 31, 2021, 134,289 of those awards were forfeited and the remaining 1,483,301 of those awards remain as considered to be granted under ASC 718 *Compensation — Stock Compensation,* but not yet legally granted.

Note 12 — Stockholders' Equity and Mezzanine Equity

On May 1, 2020, as part of the Corporatization Event described in *Note 18 — Corporatization Event*, the Company authorized 150,000,000 shares of common stock at $0.01 par and issued 94,700,000 of those shares in a private exchange with the partners in BKV O&G and the members of KV.

On December 15, 2020, the Company authorized an additional 150,000,000 shares of common stock and 80,000,000 shares of preferred stock, increasing the authorized shares of capital stock to 380,000,000.

BKV CORPORATION

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
For the years ended December 31, 2021 and 2020

Common Shares issued and outstanding

On October 1, 2020, the Company issued 22,284,000 shares of common stock to an existing investor for $222.8 million.

On December 15, 2020, the Company issued 100,000 shares of common stock to a new investor for $1.0 million, net of associated costs. These shares were issued in conjunction with the issuance of 9,900,000 shares of Series A Redeemable Preferred stock to the same investor.

In April of 2021, the Board of Directors of the Company declared a cash dividend of $0.75 per share of common stock at the time of the declaration for a total of $88.1 million which was paid to common stock shareholders in May of 2021.

As of December 31, 2021 and 2020, the Company had 117,102,214 and 117,084,000 common shares issued and outstanding, respectively. See discussion below in the *Treasury Stock* section of this note for discussion of redemptions and purchases of the Company's own common stock during the year ended December 31, 2021.

Minority Ownership Puttable Shares — Mezzanine Equity

Of the 94,700,000 shares issued on May 1, 2020, 2,228,771 shares were issued to certain non-controlling management shareholders of BKV as a part of the Corporatization of BKV and 2,000,000 shares were issued as part of the merger with KV. The shares issued to the non-controlling management shareholders include a put and call feature which requires BKV to repurchase shares from these shareholders upon the occurrence of certain events stipulated in the Stockholders' Agreement at either $10.00 per share or the fair value per share, depending on the type and timing of the triggering event. In addition, BKV may call and repurchase the shares issued to the non-controlling management shareholders upon the occurrence of certain events stipulated in the Shareholders' Agreement at either $10.00 per share or the fair value per share, depending on the type and timing of the triggering event. The Stockholders' Agreement, and these put and call features, will terminate upon completion of an initial public offering by the Company. Since the shares are not mandatorily redeemable, but can become redeemable at the option of the holder, the fair value of non-controlling management common stock shares upon issuance of $42.3 million was recognized within mezzanine equity. As of December 31, 2021 Management has determined it is probable that the shares will become redeemable at the end of the three-year period and has elected to carry the shares at redemption value, or fair value, in mezzanine equity on the Consolidated Balance Sheets. During the years ended December 31, 2021 and 2020, the Company recognized adjustments of $6.9 million and $0.0 million, respectively, to the carrying value of the shares to adjust to redemption value.

During the year ended December 31, 2021, certain shares were redeemed (see *Treasury Stock* for share counts and redemption prices) causing the specific redeemed shares to no longer retain the previously mentioned right. Accordingly, upon redemption the redeemed shares and associated carrying values were reclassified to permanent equity.

Employee Stock Purchase Plan — Mezzanine Equity

On July 16, 2020, the Company adopted the BKV Corporation Employee Stock Purchase Plan (the "ESPP"). The ESPP reserved 7,470,588 shares of common stock for purchase by eligible employees of the Company. The number of shares available is subject to adjustment based on anti-dilution provisions in the Shareholder's Agreement. The ESPP was activated on November 1, 2021 through the completion of the First Amendment to the ESPP. As amended, the ESPP allows for certain eligible non-employees and members of the Board of Directors of the Company to purchase shares under the ESPP in addition to eligible employees of the Company. As of December 31, 2021, the Company had issued 287,209 shares of common stock under the ESPP. The shares sold under the ESPP include a put right which allows for holders of the ESPP shares to require the Company to the purchase the shares upon the occurrence of certain events

stipulated by the ESPP. The shares can also be purchased by the Company, at its discretion upon the occurrence of certain events as stipulated in the ESPP. Because the shares are not mandatorily redeemable, but can become redeemable at the option of the eligible employee, non-employee or Director, the fair value of the shares of common stock sold under the ESPP of $3.3 million was recognized within mezzanine equity as of December 31, 2021. Management has determined it is probable that the shares will become redeemable and has elected to carry the shares at redemption value, or fair value, in mezzanine equity on the Consolidated Balance Sheets. During the year ended December 31, 2021, the Company recognized an adjustment of $0.1 million to the carrying value of the shares.

Equity-based Compensation — Mezzanine Equity

As discussed in *Note 11 — Equity-based Compensation,* the Plan includes the Plan Put Right which provides that, if a Participant's employment is terminated due to voluntary resignation, and certain other conditions are met, such Participant is able to elect to require the Company to purchase the shares issued in settlement of his or her RSU's at fair market value of the Company's common stock at the time the election is made by the Participant. Participants may not exercise this right for at least one-hundred eighty-one days after the vesting of the shares of common stock issued in settlement of the RSU's. Management has determined it is probable the shares issued in settlement of the RSU's upon vesting will become redeemable and has elected to carry the shares at redemption value which equals fair market value. During the year ended December 31, 2021, the Company recognized an adjustment to the pro-rata portion of the RSU's which have vested in the amount of $5.0 million.The maturities related to the redemption feature are in accordance with the vesting terms discussed in *Note 11 — Equity-based Compensation*, taking into account the three year and one hundred eighty one day holding periods. During the year ended December 31, 2021, the Company issued 116,347 shares of common stock in settlement of vested incentive awards. Those shares of common stock are included in equity-based compensation within mezzanine equity on the Consolidated Balance Sheet of the Company at redemption value or $1.4 million.

Preferred Shares — Mezzanine Equity

On December 15, 2020, the Company authorized 80,000,000 shares of preferred stock at $10.00 par value per share. Of the shares of preferred stock authorized, 9,900,000 shares were designated as par Series A Redeemable Preferred Stock ("Series A") and these designated shares were issued in a private placement for $99.0 million. Cost associated with the issuance was $4.1 million. These shares were issued in conjunction with 100,000 shares of common stock also issued on December 15, 2020.

Series A shares carry quarterly cumulative dividends at a rate of 10% per annum for the first five years, 18% per annum for years 6 through 10, and 20% per annum, thereafter. The holder may only redeem the Series A shares upon the occurrence of liquidation, winding-up, dissolution or change in control of the Company. The Company may also redeem the Series A shares, in whole or in part, at any time. Upon redemption by either party, the redemption value is at price equal to $12.25 per share plus unpaid accumulated dividends at the time of redemption. Holders of the preferred shares do not have voting rights with respect to their preferred shares, however they are allowed certain consensual rights. The Series A shares include conversion features allowing for conversion into 7,425,000 shares of a new series of preferred stock and 34,873,941 shares of common stock. However, the shares do not become convertible until 10 years from the date of issuance. The number of conversion shares are adjusted pro-rata for any redemptions prior to conversion. Since the Series A shares can become redeemable at the option of the holder, but are not mandatorily redeemable, the Series A shares are classified as mezzanine equity. As discussed in *Note 2 — Summary of Significant Accounting Policies* , the Company adopted ASU 2020-06, therefore the Company has reflected the carrying value of the Series A shares as $94.9 million within mezzanine equity on the Consolidated Balance Sheet of the Company as of December 31, 2020. In addition, management has determined it is probable the Company will exercise it redemption rights prior to the increase in cumulative

dividends after year five, therefore the carrying value of the shares is being accreted to redemption value over the expected five year period. During the year ended December 31, 2021, the Company recognized $3.7 million in related accretion.

During April of 2021, the Board of Directors of the Company declared a dividend payable to Common Stockholders which in turn required payment of the cumulative dividends on the Series A shares. During May of 2021, the Company paid $10.3 million in dividends to preferred stock shareholders. The dividend payment represented cumulative dividends for the period of December 15 through December 31, 2020, and the year ended December 31, 2021. In conjunction with the dividend, as required by the Series A shareholders agreement, the Company redeemed 501,000 shares of outstanding preferred stock for $6.1 million, of which $1.3 million represented a deemed dividend to Series A shareholders for required premiums paid upon redemption. The deemed dividend represents the difference between the redemption amount paid by the Company and the carrying value of the preferred stock prior to redemption and is reflected as such within the Consolidated Statement of Stockholders' Equity for the year ended December 31, 2021.

On October 8, 2021, the Company notified the holders of the remaining outstanding shares of preferred stock their shares would be redeemed on October 18, 2021. The Company paid $115.1 million in order to redeem the remaining outstanding shares for preferred stock, of which $25.0 million represented a deemed dividend to preferred shareholders for required premiums paid upon redemption. The deemed dividend represents the difference between the redemption amount paid by the Company and the carrying value of the preferred stock prior to redemption and is reflected as such within the Consolidated Statement of Stockholders' Equity for the year ended December 31, 2021.

As of December 31, 2021 and 2020, the Company had 0 and 9,900,000 shares of Series A shares issued and outstanding, respectively.

Treasury Stock

On October 18, 2021 the Company purchased 100,000 shares of its common stock in conjunction with the redemption of the remaining outstanding shares of Series A shares on the same date. The shares were repurchased for $1.1 million at a price of $11.06 per share.

As discussed in *Note 11 — Equity-based Compensation*, during the year ended December 31, 2021 the Company purchased 9,949 shares of its common stock for $0.1 million at a price of $11.06 per share.

During February, April and December of 2021, the Company purchased 275,393 shares of common stock from non-controlling management shareholders for $2.8 million at a price of $10.00 per share.

Note 13 — Equity Method Investment

On July 30, 2021, the Company completed the formation of a 50/50 joint venture named BKV-BPP Power, LLC (the "Joint Venture") with BPP US. The Joint Venture was formed for the sole purpose of purchasing and operating a power plant and other related activity. During August 2021, the Company contributed $43.0 million to the Joint Venture in the form of a deposit for the purchase of the Temple I power plant (the "Power Plant"). On November 1, 2021 the Joint Venture completed the purchase of the Power Plant for $440.9 million. To complete the purchase on November 1, 2021, the Company contributed an additional $44.0 million, and BPP US contributed an equal $87.0 million. In addition to the contributions from the members of the Joint Venture, $141.0 million was provided from BPP US in the form of a term loan, and $141.0 million was provided by the Company's majority shareholder BNAC also in the form of a term loan. Both term loans mature on November 1, 2023. Of the total $282.0 million term loans provided by affiliates, $15.0 million was for the purposes of working capital.

In December 2021, the Company entered into an Administrative Service Agreement (the "ASA") with the Joint Venture. Under the ASA the Company provides certain services as required by the ASA and in

return receives an annual fee of $2.6 million until December 1, 2022, with options to extend. During the year ended December 31, 2021, the Company recognized $0.2 million of revenues related to the services provided under the ASA which is included in other revenues on the Consolidated Statements of Operations and Comprehensive Loss.

The Joint Venture is independently operated and jointly controlled by BKV Corp and BPP US through a Board of Directors consisting of eight members, four of which are appointed by BKV Corp. The remaining four members of the Board of Directors of the Joint Venture are appointed by BPP US. The Joint Venture was determined to be a variable interest entity due to its need for additional funding from its members. BKV Corp has not been determined to be the primary beneficiary of the Joint Venture; while the majority of the ability to influence the significant activities of the Joint Venture is controlled by the Board of Directors, certain rights to influence the significant activities of the Joint Venture have been retained solely by BPP US as defined by the Joint Venture's LLC agreement. Accordingly, the equity method of accounting is used by BKV Corp to account for its interest in the Joint Venture. BKV Corp's initial investment, including direct transaction costs, was $88.4 million, which represents the Company's maximum exposure to loss from the investment.

During the year ended December 31, 2021, the Company recognized, based on its 50% ownership interest in the Joint Venture, earnings of $0.9 million for the period beginning November 1, 2021 through December 31, 2021.

The tables below sets forth the summarized financial information of the Joint Venture:

Balance Sheet (in thousands)	December 31, 2021
Current assets	$ 35,957
Noncurrent assets	454,333
Total assets	$ 490,290
Current liabilities	$ 24,067
Noncurrent liabilities	290,440
Total liabilities	314,507
Members' equity	175,783
Total liabilities and members' equity	$ 490,290

Income Statement (in thousands)	Period beginning November 1, 2021 through December 31, 2021
Revenues	$ 20,186
Variable operating expenses	13,388
Gross Profit	6,798
Operating expenses	9,659
Loss from operations	(2,861)
Net income	$ 1,819

Note 14 — Credit and Other Risk

Credit risk is defined as the risk of a counterparty to a contract failing to perform or pay the amounts due.

BKV CORPORATION

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
For the years ended December 31, 2021 and 2020

BKV is exposed to credit risks in its operating and financing activities. BKV's maximum exposure to credit risk is partially related to financial assets recorded on the Consolidated Balance Sheets, including commodity derivative instruments that have a positive market value. Additionally, BKV maintains its primary bank accounts with a single large, global bank.

The Company is not currently aware of any exceptional event, dispute, risks or contingent liabilities that could have a material impact on the assets and liabilities, results, financial position or operations of the Company.

The Company is subject to U.S. federal income tax as well as income in various state jurisdictions, and the Company's operating cash flow is sensitive to the amount of income taxes the Company must pay. In the jurisdictions in which the Company operates or previously operated, income taxes are assessed on earnings after consideration of all allowable deductions and credits. Changes in the types of earnings that are subject to income tax, the types of costs that are considered allowable deductions (such as intangible drilling costs) and the timing of such deductions, or the rates assessed on our taxable earnings would all impact our income taxes and resulting operating cash flow. In addition, new taxes are from time to time proposed and, if enacted, could adversely impact the Company.

Substantially all of the Company's accounts receivable result from the sale of natural gas and joint interest billings. The Company sells natural gas, NGLs and oil to fewer than five customers and bills working interest owners for costs related to development of the Company's natural gas properties. The Company does not believe that the loss of any of these customers would have a material adverse effect on the consolidated financial statements because alternative customers are readily available. As of December 31, 2021, one purchaser accounted for more than 10% of natural gas, NGL, and oil revenues and 10% of accounts receivables, respectively. As of December 31, 2020, one purchaser accounted for more than 10% of natural gas, NGL, and oil revenues and 10% of accounts receivables.

Note 15 — Commitments and Contingencies

From time to time, the Company may be subject to various claims, title matters and legal proceedings arising in the ordinary course of business, including environmental contamination claims, personal injury and property damage claims, claims related to joint interest billings and other matters under natural gas operating agreements and other contractual disputes. The Company maintains general liability and other insurance to cover some of these potential liabilities. All known liabilities are fully accrued based on the Company's best estimate of the potential loss. While the outcome and impact on the Company cannot be predicted with certainty, the Company believes that its ultimate liability with respect to any such matters will not have a significant impact or material adverse effect on its financial positions, results of operations or cash flows. Results of operations and cash flows, however, could be significantly impacted in the reporting periods in which such matters are resolved.

The Company was involved in an arbitration against an operator related to the breach of various provisions of a certain agreement related to the construction and operation of a midstream gathering system. On February 18, 2022 the Company agreed to a settlement with the operator, and as a result, received payment of $35.0 million to settle all past disputes and agreed to a midstream gathering rate going forward. As of December 31, 2021, no accrual has been recorded in respect to the damages, interest and reimbursable fees or agreed upon rates. Of the $35.0 million, $18.1 million will be considered as collection of accounts receivable which is included in the Company's Consolidated Balance Sheet as of December 31, 2021.

BKV CORPORATION

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
For the years ended December 31, 2021 and 2020

The Company has volume commitments in the form of gathering, processing and transportation agreements with various third-parties that require delivery of 1,060,029,489 dekatherms of natural gas. The majority of the agreements terminate by 2026, with one agreement extending through 2036. As of December 31, 2021, the aggregate undiscounted future payments required under these contracts total $256.2 million. The Company expects to fulfill the commitments from existing productive wells.

The Company has committed to spend $3.5 million on a field compression related capital project during the year ended December 31, 2022.

The Company may potentially be responsible for remitting lease related payments to certain leaseholders and has recorded a liability of approximately $5.7 million. Of the $5.7 million, $0.4 million was incurred during the year ended December 31, 2021. The Company will continue to evaluate these estimates and revise any recorded obligations and contingencies as necessary. During the year ended December 31, 2021, there was no change to the estimated value of $5.3 million of liabilities previously reported in the December 31, 2020 Consolidated Balance Sheet.

As a part of the consideration paid for the asset acquisition described in *Note 3 — Natural Gas Properties & Other Property and Equipment*, additional cash consideration will be required to be paid if certain hurdle rates are reached related to future average closing Henry Hub natural gas and West Texas Intermediate crude oil prices during the period beginning January 2021 through December 31, 2024. As of December 31, 2021, the 2021 portion of the arrangement is considered to be settled resulting in a settlement of $65.0 million which is reflected as contingent consideration payable within current liabilities on the Consolidated Balance Sheet as of December 31, 2021 and was paid on January 18, 2022. For the remaining years ending December 31, 2022 through 2024, average Henry Hub natural gas hurdle rates are $3.00/MMBTU, $3.25/MMBTU and $3.50/MMBTU, respectively; average West Texas Intermediate crude oil hurdle rates for the years ending December 31, 2022 through 2024 are $55.00/BBL, $60.00/BBL, and $65.00/BBL, respectively. The maximum amount payable under the arrangement is $195.0 million, or $65.0 million per year, for the years ending December 31, 2022-2024. Payments are due in the month following the end of the respective measurement period for which the hurdle rates are set. As described in *Note 4 — Fair Value Measurements*, management uses NYMEX forward pricing estimates for both Henry Hub and West Texas Intermediate hurdle rates and Monte Carlo simulations to determine the fair value of the contingent consideration. As of December 31, 2021 and 2020, the Company's estimate of the fair value of the unsettled contingent consideration was $142.5 million and $12.6 million, respectively. The change in the fair value of the contingent consideration from the acquisition date of October 1, 2020 through December 31, 2020, and for the year ended December 31, 2021 resulted in a reduction and an increase, respectively, to the associated liability on the Consolidated Balance Sheets and recognition of income and loss respectively, in the change in contingent purchase liabilities on the Consolidated Statement of Operations and Comprehensive Loss of $194.9 million and $7.1 million, respectively.

A summary of the Company's commitments, excluding leases and contingent consideration, as of December 31, 2021, is provided in the following table:

(in thousands)	2022	2023	2024	2025	2026	Thereafter	Total
Notes payable to related party	$166,000	$ —	$ —	$ —	$ —	$ —	$166,000
Interest on notes	1,787	—	—	—	—	—	1,787
Capital commitment	3,500	—	—	—	—	—	3,500
Volume commitments	56,786	52,663	36,339	19,382	14,782	76,211	256,163
Total	$228,073	$52,663	$36,339	$19,382	$14,782	$ 76,211	$427,450

BKV CORPORATION

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
For the years ended December 31, 2021 and 2020

Note 16 — Leases

The Company's operating leases consist of leases for office space and compressors. The Company does not have finance type leases. Leases with an initial term of 12 months or less are not recorded on the balance sheet. Instead, the short-term leases are recognized in expense on a straight-line basis over the lease term. Most leases include one or more options to renew, with renewal terms generally being one year, which are not recognized as part of the lease right-of-use (ROU) assets or liabilities as they are not reasonably certain to be exercised. The exercise of lease renewal options is at the discretion of the Company.

The Consolidated Statements of Operations and Comprehensive Loss include the following amounts for right-of-use-asset depreciation expense for the Company's operating leases within the indicated line items:

	Year ended December 31,	
(in thousands)	**2021**	**2020**
Depreciation, depletion and amortization	$ 389	$ 360
Lease operating and workover expense	6,876	3,145
Total	$ 7,265	$ 3,505

As of December 31, 2021, the Company's undiscounted minimum cash payment obligations for its operating lease liabilities are as follows (in thousands):

2022	$11,241
2023	947
2024	959
2025	972
2026	848
Thereafter	1,664
Total undiscounted future lease payments	$16,631
Present value adjustment	(1,226)
Net operating lease liabilities	$15,405

As of December 31, 2021 and 2020, the Company's operating leases had a weighted-average remaining lease term of 3.10 and 3.10 years, respectively, and a weighted-average discount rate of 5.06% and 5.14%, respectively. The discount rate used for operating leases is based on the Company's incremental borrowing rate at lease commencement.

BKV CORPORATION

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
For the years ended December 31, 2021 and 2020

Note 17 — Income Taxes

The Company's income tax (benefit) expense consisted of the following:

Tax (benefit) expense

	Year ended December 31,	
(in thousands)	**2021**	**2020**
Current tax expense		
United States federal income tax	$ 29,051	$ 1,232
Various state income taxes	3,176	—
Total current income tax expense	32,227	1,232
Deferred tax (benefit) expense		
United States federal income tax	(66,362)	37,750
Various state taxes	(6,391)	—
Total deferred income tax expense	(72,753)	37,750
Provision for income taxes	$ (40,526)	$ 38,982

Income tax (benefit) expense differs from the amount that would be computed by applying the U.S. statutory federal income tax rate of 21.0% to loss before taxes as a result of the following:

Reconciliation of the Effective Tax Rate

	Year ended December 31,	
(in thousands)	**2021**	**2020**
Loss before income taxes	$ 174,989	$ 4,364
Statutory rate	21.0%	21.0%
Income tax recovery based on statutory rate	$ (36,748)	$ (916)
(Increase) decrease in income taxes resulting from:		
State tax benefit, net of federal benefit	(4,114)	(148)
Change in state tax rate, net of federal effect	227	(8,793)
Deferred tax activity	(520)	45,627
Other, including tax credits	629	3,212
Income tax (benefit) expense	$ (40,526)	$ 38,982

Deferred income taxes reflect the impact of temporary differences between assets and liabilities for financial reporting purposes and such amounts as measured by tax laws. The tax effect of the temporary differences giving rise to net deferred tax assets and liabilities is as follows:

BKV CORPORATION

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
For the years ended December 31, 2021 and 2020

Recognized Deferred Income Tax Assets and Liabilities

	As of December 31,	
(in thousands)	**2021**	**2020**
Deferred tax assets		
Fair value of derivative financial instruments	$ 31,318	$ —
Asset retirement obligations	36,680	1,346
Stock compensation	6,592	—
Contingent consideration	49,193	—
Other	3,482	862
Total deferred tax asset	$127,265	$ 2,208
Deferred tax liabilities		
Property and equipment	$ (87,554)	$(37,040)
Investment in joint venture	(668)	—
Fair value of derivative financial instruments	—	(2,371)
Other	(3,539)	(46)
Total deferred tax liability	$ (91,761)	$(39,457)
Net deferred tax asset (liability)	$ 35,504	$(37,249)

In assessing the realizability of deferred tax assets, management considers whether some portion or all of the deferred tax assets will be realized based on a more-likely-than-not standard of judgment. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which the Company's temporary differences become deductible. Management considers the scheduled reversal of deferred tax assets, projected future taxable income and tax planning strategies in making this assessment. Accordingly, as of December 31, 2021 and 2020, the Company has not recognized a valuation allowance against its deferred tax assets.

The calculation of the Company's tax liabilities involves uncertainties in the application of complex tax laws and regulations. The Company gives financial statement recognition to those tax positions that it believes are more-likely-than-not to be sustained upon examination by the Internal Revenue Service or state revenue authorities. The Company monitors potential uncertain tax positions but does not anticipate any changes during 2022. The Company has no unrecognized tax benefit balances as of December 31, 2021, and 2020. The Company is generally subject to potential federal and state examination for the tax years on and after December 31, 2020.

Note 18 — Corporatization Event

Prior to May 1, 2020 BKV O&G, a limited partnership registered with the state of Delaware, was the sole investor in Chaffee, Chelsea, Operating, and Barnett. Together, these consolidated entities were referred to as the "Limited Partnership." The Limited Partnership's general partner was Kalnin Capital Partners LP (the "General Partner"), and the Limited Partnership was managed by a related party of the General Partner, KV (the "Investment Manager").

On May 1, 2020, the Limited Partnership's limited partner, an international investor, and the General Partner agreed to restructure the Limited Partnership and incorporate the BKV Corp entity. As there was no change in control, the assets and liabilities continued to be recorded at their carrying amounts with no adjustment to fair value and the results of operations for these entities from the beginning of the year (January 1, 2020) are included in the Consolidated Statement of Operations and Comprehensive Loss for the year ended December 31, 2020. This transaction also resulted in the measurement and recognition of

minority ownership puttable common stock shares valued at $22.3 million which is reflected in the Mezzanine equity section of the Consolidated Balance Sheets as of December 31, 2020 and is further described in *Note 4 — Fair Value Measurements* and *Note 12 — Stockholders' Equity and Mezzanine Equity*.

The Investment Manager was also merged into the new corporate structure through a business combination on May 1, 2020. Consideration of $20.0 million in the form of two million shares of common stock of the Company was paid for the acquisition of KV, in exchange for full ownership of KV resulting in the recognition of $18.4 million of goodwill which is reflected on the Consolidated Balance Sheets as of December 31, 2020. The business combination occurred to retain operational expertise of KV, the primary factor for the recognized goodwill. The shares issued for the acquisition of KV were recorded as minority ownership puttable shares with a value of $20.0 million, which is reflected in the Mezzanine equity section of the Consolidated Balance Sheets and is described further in *Note 4 — Fair Value Measurements* and *Note 12 — Stockholders' Equity and Mezzanine Equity*. The transaction costs associated with the acquisition were not material due to the nature of the business combination.

The fair value of assets acquired and liabilities assumed are as follows (in thousands):

Total consideration	$20,000
Assets acquired and liabilities assumed:	
Cash	$ 311
Accounts receivable	526
Other assets	753
Prepaid expenses	383
Other fixed assets	2,445
Right-of-use assets	3,980
Accounts payable and accrued expenses	(1,488)
Right-of-use liabilities	(5,327)
Total identifiable net assets	$ 1,583
Goodwill	$18,417

The accompanying Consolidated Statement of Operations and Comprehensive Loss includes activity of KV for the period beginning May 1, 2020 through December 31, 2020. KV does not independently generate revenues therefore there are no revenues or earnings(losses) included in the Company's Consolidated Statement of Operations and Comprehensive Loss from the acquisition date of May 1, 2020 to December 31, 2020 directly attributable to KV.

Note 19 — Earnings Per Share

On May 1, 2020, as part of the corporatization event described in *Note 18 — Corporatization Event*, the Company issued 92,700,000 shares to the partners of BKV O&G in exchange for all the assigned units of BKV O&G. The ownership levels resulting from the issuance of shares of BKV Corp upon Corporatization were consistent with those of BKV O&G prior to Corporatization. Accordingly, weighted average shares outstanding for the year ended December 31, 2020 is calculated assuming the shares issued upon Corporatization were issued and outstanding as of January 1, 2020.

BKV CORPORATION

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
For the years ended December 31, 2021 and 2020

The following securities could potentially dilute earnings per share in the future, but were excluded from the computation of diluted net income (loss) per share, as their effect would have been antidilutive:

	As of December 31,	
(in thousands)	**2021**	**2020**
Equity-based compensation – TRSU	2,328	—
Equity-based compensation – PRSU non-market condition[(1)]	4,635	—
Equity-based compensation – PRSU market condition[(1)]	6,953	—
Preferred shares	—	34,849

(1) Potentially dilutive share count for non-market and market conditions assumes maximum performance (see *Note 11 — Equity-based compensation*).

Note 20 — Subsequent Events

The Company has evaluated its subsequent events occurring after December 31, 2021 through August 12, 2022, which represents the date the consolidated financial statements are available to be issued. Except as outlined below, all such subsequent events are discussed with their relevant section within these notes to the consolidated financial statements. No further subsequent events have been identified.

On May 18, 2022, the Company entered into a Purchase and Sale Agreement ("PSA II") to acquire certain operated and non-operated interests in proved reserves and certain midstream support assets in the Barnett formation from XTO Energy Inc. for $750.0 million and additional contingent payments totaling $50.0 million if certain pricing thresholds are met in future periods. The Company paid a deposit of $75.0 million to XTO Energy Inc. in conjunction with entering into PSA II. The Company closed the transaction on June 30, 2022; the adjusted purchase price, excluding contingent consideration was $627.5 million which included the $75.0 million deposit.

On June 16, 2022 the Company entered into a Credit Agreement with a syndicate of lenders (the "Lenders") whereby the Company can borrow up to $600.0 million in the aggregate, in the form of multiple term loans during the period commencing with the effective date and ending six (6) months thereafter. The term loans under the Credit Agreement must be equal to or greater than $5.0 million; amounts repaid by the Company in respect to the term loans may not be re-borrowed under the Credit Agreement. Once drawn, the terms loans are required to be repaid annually in five equal installments. The term loans are not secured. On June 30, 2022, the Company drew a term loan of $570.0 million to fund the purchase of operated and non-operated interests in proved reserves and certain midstream support assets from XTO Energy, Inc. Interest is adjusted term SOFR + 4.75%. The proceeds of the term loans must be used to finance the aforementioned acquisition of assets from XTO Energy Inc.

Pursuant to an ISDA Master Agreement for derivative contracts (the "Master Agreement") between the Company and the counterparty thereto (the "Counterparty"), the Company is subject to a covenant that restricts the Company from creating, issuing, incurring, or assuming additional indebtedness in excess of $75.0 million. In June 2022, the Company entered into a term loan credit agreement and borrowed $570.0 million of term loans thereunder. In connection with the Company's exceeding this $75.0 million indebtedness threshold, on August 4, 2022, the Company executed the 3rd Amendment to the Master Agreement (the "3rd Amendment") with the Counterparty. Pursuant to the 3rd Amendment, the Company is required to novate or terminate, at the election of the Company, $100.0 million in derivative contracts by October 4, 2022. The terminations or novations are required to apply first to derivative contracts that relate to the period beginning January 2023 and ending March 2023 prior to electing to terminate or novate other derivative contracts outside of that period. As of December 31, 2021, the fair market value of the derivative contracts with the Counterparty for the period beginning January 2023 and ending March 2023 was $7.8 million. To the extent the Company elects to terminate any such derivative contracts, the Company

will be required to make cash payments in the applicable amount to the Counterparty, which payments would be due in the aggregate by November 30, 2022. The 3rd Amendment also includes a cross default provision pursuant to which a default by the Company related to the covenants under the Company's term loan credit agreement would cause a default under the Master Agreement. In addition, from and after such time that the Company satisfies the previously described obligations with respect to the novation or termination of such derivative contracts, the debt incurrence covenant in the Master Agreement would cease to apply.

Events Subsequent to Original Issuance of Financial Statements (Unaudited)

In connection with the reissuance of the Consolidated Financial Statements, the Company has evaluated subsequent events occurring after August 12, 2022, through November 18, 2022, the date the Consolidated Financial Statements were available to be reissued. All such subsequent events are outlined below.

From August 12, 2022, through the date the Consolidated Financial Statements were available for reissuance, the Company granted an additional 81,600 RSUs, comprised of 67,200 PRSUs (assuming maximum performance) and 14,400 TRSUs. Of the 14,400 TRSUs considered granted under ASC 718 Compensation-Stock Compensation, 10,800 are not considered legally granted, see *Note 11 — Equity-Based Compensation.*

With respect to the 3rd Amendment to the Master Agreement with the Counterparty, the Company terminated $100.2 million of derivative contracts through the date the Consolidated Financial Statements were available for reissuance. The Company is required to pay the $100.2 million of terminated derivative contracts by November 30, 2022. In addition, on October 18, 2022, the Company terminated $57.4 million of derivative contracts which is payable on March 31, 2023.

On August 1, 2022, the Company formed its wholly owned subsidiary BKVerde, LLC ("BKVerde"). On August 22, 2022, the Company entered into a management services agreement with a third party to provide general administrative and management services for carbon capture projects to BKVerde. Pursuant to the management services agreement, the Company is required to make quarterly payments of $2.0 million, beginning in August 2022 through February 2024. The agreement can be terminated with mutual consent from the Company and the third party. During this time period the third party will facilitate the administration and development of carbon capture projects.

On August 19, 2022, the Company received a cash advance from Facility II in the amount of $10.0 million.

On August 24, 2022, the Company entered into an agreement with another bank which provides for a revolving credit facility ("Facility III") with a limit of $100.0 million. Facility III is an unsecured facility committed through September 30, 2027. Cash draw downs and all applicable interest is payable at one, three, or six months from the date of the advance ("one month draw", "three month draw" and "six month draw", respectively). The interest period is determined by the Company at the time of the advance. The interest rate on any outstanding advances is adjusted term SOFR + 4.75%. On September 14, 2022, the Company took a six month draw of $45.0 million and a one month draw of $30.0 million. As of the date the Consolidated Financial Statements were available for reissuance, the Company had $45.0 million outstanding under Facility III. The Company repaid the one month draw of $30.0 million on Facility III on October 14, 2022.

On September 16, 2022, the Company repaid $116.0 million originally borrowed from the Lender on October 14, 2021, see *Note 7 — Related Parties.*

From the date the Consolidated Financial Statements were originally issued through November 18, 2022, the Company received advances, and repaid advances on the Facility. As of the date the Consolidated

BKV CORPORATION

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
For the years ended December 31, 2021 and 2020

Financial Statement were available for reissuance, the outstanding balance on the Facility was $45.0 million, see *Note 8 — Credit Facilities.*

Supplemental Oil and Gas Disclosures (unaudited)

The Company's operating natural gas properties are located solely in the United States.

Net capitalized costs relating to oil and gas producing activities

The following table shows the capitalized costs of natural gas properties and the related accumulated depreciation, depletion and amortization:

	As of December 31,	
(In thousands)	**2021**	**2020**
Developed properties	$1,378,629	1,297,144
Undeveloped properties	16,835	13,265
Total capitalized costs	1,395,464	1,310,409
Less: Accumulated depreciation, depletion, and amortization	(267,293)	(190,356)
Net capitalized costs	$1,128,171	$1,120,053

Costs incurred in natural gas and oil exploration and development

The table below sets forth capitalized costs incurred in natural gas property acquisition, exploration and development activities:

	As of December 31,	
(In thousands)	**2021**	**2020**
Undeveloped property acquisition costs	$ 3,569	2,064
Acquisitions	2,928	624,914
Development costs	77,634	10,711
Total cost incurred	84,131	637,689
Asset retirement obligations	923	772
Total costs incurred including asset retirement obligations	$85,054	$638,461

Natural gas, NGL and oil reserve quantities

Estimates of total proved reserves at December 31, 2021 and December 31, 2020 was based on studies performed by the Company's internal engineering function, and Ryder Scott, the Company's third-party reserve engineer. The estimates were computed using the 12-month average index price, calculated as the unweighted arithmetic average for the first day of the month price for each month during the respective year. The estimates were prepared by the Company's independent third party engineers, Ryder Scott. The process of estimating quantities of "proved" and "proved developed" natural gas, NGL and oil reserves is very complex, requiring significant subjective decisions in the evaluation of all available geological, engineering and economic data. The process also includes estimating the net cost of abandonment after salvage and was estimated and included for all properties for which an asset retirement obligation exists. The data may change substantially over time as a result of numerous factors including, but not limited to, additional development activity, evolving production history and continual reassessment of the viability of production under varying economic conditions. As a result, revisions to existing reserve estimates may occur from time to time. Although every reasonable effort is made to ensure that reserve estimates reported represent

BKV CORPORATION

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
For the years ended December 31, 2021 and 2020

the most accurate assessments possible, the subjective decisions and variances in available data make these estimates generally less precise than other estimates included within the consolidated financial statements.

The following table illustrates the Company's net proved reserves, including changes, as well as proved and proved undeveloped reserves for the periods presented, as estimated by the Company's engineering function. All reserves are located within the continental United States:

	Natural Gas (MMcf)	NGL (MBbls)	Oil (MBbls)	Total (MMcfe)
January 1, 2020	948,801	—	—	948,801
Revision of previous estimates	(382,366)	(21)	(3)	(382,510)
Extensions and discoveries	—	—	—	—
Purchase of minerals in place	1,515,255	109,820	755	2,178,705
Improved recoveries	—	—	—	—

	Natural Gas (MMcf)	NGL (MBbls)	Oil (MBbls)	Total (MMcfe)
Proved developed reserves as of:				
January 1, 2020	523,240	—	—	523,240
December 31, 2020	1,893,158	107,234	723	2,540,900
December 31, 2021	2,494,925	151,433	867	3,408,725
Proved undeveloped reserves as of:				
January 1, 2020	425,561	—	—	425,561
December 31, 2020	92,374			92,374
December 31, 2021	950,358	13,722	58	1,033,038

2021 Activity

During the year ended December 31, 2021, the Company's proved reserves increased by 1,808.5 Bcfe. The increase in proved reserves was primarily due to increasing commodity pricing improving economics, and additions to the drilling schedule for both proved developed and undeveloped reserves. The Company produced 245.8 Bcfe during the year ended December 31, 2021.

Revisions of previous estimates — Primarily consisted of upward revisions to proved developed reserves, and proved undeveloped reserves of 715.9 Bcfe and 245.6 Bcfe, respectively, as a result of higher average pricing during 2021 for natural gas, NGLs and oil. The remaining upward adjustment of 139.8 Bcfe relates to upward performance adjustments to proved developed reserves of 219.2 Bcfe offset by a downward revision to proved developed reserves of 79.4 Bcfe due to increased production costs.

Extensions and discoveries — Upon completing our evaluation of properties acquired through our Barnett Asset Acquisition, 550.1 Bcfe of proved undeveloped reserves was recognized for 123 gross (94.8 net) locations added to the Company's revised drilling schedule during 2021. Additional extensions consisted of proved undeveloped reserves of 143.2 Bcfe related to 13.0 gross (9.6 net) locations in the Marcellus Basin

recognized from acquired acreage and the revised 2021 drilling plan. Extensions related to proved developed reserves of 34.8 Bcfe consisted of 14 gross (5.9 net) newly drilled wells.

Improved recoveries — Consisted of 205.4 Bcfe of proved developed reserves recognized as a result of the application of improved recovery techniques to producing wells during the year ended December 31, 2021.

2020 Activity

During the year ended December 31, 2020, the Company's proved reserves increased by 1,684.5 Bcfe. The increase in proved reserves was due to the Barnett Asset Acquisition offset by downward revisions primarily due to lower average pricing for natural gas during 2020.The Company produced 111.7 Bcfe during the year ended December 31, 2020.

Revisions of previous estimates — Proved undeveloped reserves consisted of a downward revision of 146.7 Bcfe due to a combination of performance adjustments and lower average pricing of natural gas during 2020, and a downward revision of 186.5 Bcfe which removed locations due to lower average pricing of natural gas during 2020. Proved developed reserves were adjusted downward by 48.8 Bcfe due to lower average natural gas prices and performance.

Extensions and discoveries — There were no extensions and discoveries of proved developed or proved undeveloped reserves during the year ended December 31, 2020.

Standardized Measure of Discounted Future Net Cash Flows

The following information has been developed based on natural gas, NGL and oil reserve and production volumes estimated by the Company's engineering function. It can be used for some comparisons but should not be the only method used to evaluate the Company or its performance. Further, the information in the following table may not represent realistic assessments of future cash flows, nor should the Standardized Measure of Discounted Future Net Cash Flows Relating to Proved Natural Gas Reserves ("Standardized Measure") be viewed as representative of the current value of the Company.

The following table details the Standardized Measure related to proved reserve as of the periods presented:

Future cash flows

	As of December 31,	
(in thousands)	**2021**	**2020**
Future cash inflows	$15,029,839	$ 4,414,787
Future production costs	(6,840,969)	(2,954,242)
Future development costs[(1)]	(1,051,911)	(333,804)
Income tax expense	(1,501,984)	(98,882)
Future net cash flows	5,634,975	1,027,859
10% annual discount for estimated timing of cash flows	(3,222,086)	(517,449)
Standardized measure of discounted future net cash flows related to proved reserves	$ 2,412,889	$ 510,410

(1) Includes abandonment costs.

The following table summarizes the changes in the Standardized Measure for the years ended December 31, 2021 and 2020:

BKV CORPORATION

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

Note 1 — General Information

General

BKV Corporation ("BKV Corp") was formed on May 1, 2020 and is a corporation registered with the State of Delaware. BKV Corp is a growth driven energy company focused on creating value for its shareholders through organic development of its properties, as well as accretive acquisitions. BKV Corp's core business is to produce natural gas from its owned and operated upstream businesses.

The majority shareholder of BKV Corp is Banpu North America Corporation ("BNAC"), which owns 96.1% of BKV Corp's shares of common stock. BKV Corp's ultimate parent company is Banpu Public Company Limited, a public company listed in the Stock Exchange of Thailand. The remaining 3.9% of shares of common stock of BKV Corp are owned by non-controlling management, director, employee and non-employee shareholders who hold shares with contingent put rights that may be exercised according to conditions stipulated in the Shareholders' Agreement.

Basis of Presentation of the Unaudited Condensed Consolidated Financial Statements

These unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP"). The condensed consolidated financial statements are unaudited and should be read in conjunction with the Company's 2021 and 2020 Consolidated Financial Statements ("Annual Financial Statements") as certain disclosures and information required by GAAP for complete consolidated financial statements has been condensed or omitted. The unaudited interim financial statements, in the opinion of management, reflect all adjustments, which include normal and recurring adjustments, necessary to fairly state the Company's financial position as of September 30, 2022, and the results of operations and comprehensive income (loss) for the three and nine months ended September 30, 2022 and 2021, and cash flows for the nine months ended September 30, 2022 and 2021. The interim results are not necessarily indicative of results to be expected for the year ending December 31, 2022 or for any other future annual or interim period. The December 31, 2021 condensed consolidated balance sheet was derived from audited consolidated financial statements, but does not include all disclosures required by GAAP.

These condensed consolidated financial statements include BKV Corp and its wholly owned subsidiaries. During 2022, the following entities were formed as wholly owned subsidiaries of BKV Corp:

- BKV Midstream, LLC ("Midstream"), a limited liability company formed March 31, 2022 and registered with the State of Delaware.
- BKV North Texas, LLC ("North Texas"), a limited liability company formed March 31, 2022 and registered with the State of Delaware.
- BKV dCarbon Ventures, LLC ("BKV dCarbon Ventures"), a limited liability company formed May 31, 2022 and registered with the State of Delaware;
    - BKVerde, LLC ("BKVerde"), a limited liability company formed August 1, 2022, wholly owned subsidiary of BKV dCarbon Ventures, and registered with the State of Delaware.

On September 19, 2022, the Company dissolved BKV O&G, and all ownership interests in subsidiaries of BKV O&G were assigned to BKV Corp.

Together, BKV Corp and its wholly owned subsidiaries are referred to collectively as "BKV" or the "Company." All intercompany balances and transactions between these entities have been eliminated within the condensed consolidated financial statements.

Significant Judgments and Accounting Estimates

The preparation of financial statements in conformity with GAAP requires management to make certain estimates and assumptions that affect the amounts reported in the financial statements and the accompanying notes. There have been no significant changes to the Company's accounting estimates from those disclosed in the Company's Annual Financial Statements.

Deferred Offering Costs

The Company has capitalized legal and other third-party fees directly related to the Company's planned initial public offering ("IPO"). The deferred offering costs will be recorded as a reduction of the proceeds received from the planned offering. If the IPO is abandoned or significantly delayed, the deferred offering costs will be expensed. As of December 31, 2021, the Company had no deferred offering costs that were capitalized. As of September 30, 2022, the Company capitalized $6.2 million of deferred offering costs, which are included within other noncurrent assets on the condensed consolidated balance sheets.

Restricted Cash

Restricted cash as of September 30, 2022 consisted of cash borrowed under the Company's credit agreement contractually obligated to be used for the Exxon Barnett Acquisition (as defined in *Note 2 — Acquisition)*. The Company anticipates the restricted cash will be used for remaining transaction and integration costs. See *Note 2 — Acquisition* and *Note 8 — Debt* for further discussion.

The following table provides a reconciliation of cash, cash equivalents, and restricted cash to amounts shown in the statement of cash flows:

	As of September 30,	
(in thousands)	**2022**	**2021**
Cash and cash equivalents	167,143	86,245
Restricted cash	17,473	—
Total cash, cash equivalents and restricted cash	$184,616	$86,245

Common Shares issued and outstanding

As of September 30, 2022 and December 31, 2021, the Company had 117,325,797 and 117,102,214 common shares issued and outstanding, respectively.

Liquidity

As of September 30, 2022, the Company held $167.1 million of unrestricted cash in operating accounts. The Company's working capital deficit as of September 30, 2022 was $511.0 million, which was primarily driven by commodity derivative liabilities of $214.7 million, the current portion of long-term debt of $111.9 million, borrowings under the Company's credit facilities of $130.0 million, commodity derivative settlements of $89.7 million, and monetizations payable of $70.2 million related to an amendment to an ISDA agreement, see *Note 13 — Credit and Other Risk*. For the nine months ended September 30, 2022, the Company's cash flows from operations was $231.1 million. The Company intends to make the payments related to the current portion of long-term debt, and commodity derivative settlements and monetizations payable with cash flows from operations. The commodity derivative liabilities will settle monthly during the twelve month period ending September 30, 2023 in conjunction with the corresponding commodity sales. The Company intends to use the proceeds from the corresponding commodity sales to pay the settlements of the derivative liabilities. The Company believes cash flows provided from operations and borrowings under its credit facilities are sufficient to meet cash requirements for the next twelve months and thereafter.

On October 18, 2022, the Company terminated $57.0 million of derivative contracts which amount is payable on March 31, 2023. The Company intends to pay this amount with respect to the terminated derivative contracts with cash flows from operations.

Significant Accounting Policies

The Company's significant accounting policies are described in the notes to the consolidated financial statements for the year ended December 31, 2021 included in the Company's Annual Financial Statements. There have been no significant changes in accounting policies during the nine months ended September 30, 2022.

Recently Issued Accounting Standards

As of September 30, 2022 and through the date the condensed consolidated financial statements were available for issuance (see *Note 17 — Subsequent Events*), no other Accounting Standards Updates have been issued and not yet adopted that are applicable to the Company and that would have a material effect on the Company's condensed consolidated financial statements and related disclosures.

Note 2 — Acquisition

On May 18, 2022, the Company entered into a Purchase and Sale Agreement to acquire certain operated and non-operated interests in proved reserves and certain midstream support assets in the Barnett formation (the "2022 Barnett Assets") from XTO Energy, Inc and Barnett Gathering LLC, subsidiaries of Exxon Mobil Corporation (collectively, "Seller"), for $750.0 million (subject to working capital and other adjustments) and additional contingent payments totaling $50.0 million if certain pricing thresholds are met in future periods (the "Exxon Barnett Acquisition"). The Company paid a deposit of $75.0 million to the Seller in conjunction with entering into the Purchase and Sale Agreement. The Company closed the transaction on June 30, 2022; the adjusted purchase price, excluding contingent consideration was $627.5 million which included the $75.0 million deposit. As of the acquisition date, the fair value of the additional contingent payments was $17.2 million. See *Note 4 — Fair Value Measurements* and *Note 14 — Commitments and Contingencies* to unaudited condensed consolidated financial statements for discussion of the fair market value valuation methodology applied to the contingent consideration at the acquisition date and details of the contingent consideration, respectively. The Company funded the cash portion of the consideration with the proceeds from its term loan, refer to *Note 8 — Debt.*

The Exxon Barnett Acquisition was accounted for as a business combination; therefore the assets acquired and liabilities assumed were recorded based on the respective estimated acquisition date fair values with information available at the time, and the residual difference between the net assets and the purchase price was recorded as a bargain purchase gain. A combination of discounted cash flow models and market data was used by a third-party specialist, under the direct supervision of management, in determining the fair value of the natural gas properties, and midstream assets. Significant inputs into the calculation included future commodity prices, estimated volumes of natural gas, NGL and oil reserves, expectations for the timing and amount of future development and operating costs, future plugging and abandonment costs and a risk adjusted discount rate. The Company's assessment of the fair market value of the assets acquired and liabilities assumed is preliminary and subject to change as additional information is obtained by management. The Company expects to complete the purchase accounting, including the fair market value assessment during the twelve month period following the date of the acquisition. The Exxon Barnett Acquisition resulted in a bargain purchase gain, which was primarily caused by the increase in commodity pricing from the date the acquisition was originally negotiated through the closing date. The Exxon Barnett Acquisition was made to support the strategic growth of the Company and to achieve operational synergies with pre-existing assets in the Barnett formation. During the three and nine months ended September 30, 2022, the Company incurred $0.6 million and $4.0 million, respectively, of acquisition costs which are included in general and administrative expense on the condensed consolidated statement of operations and comprehensive income (loss). The results of operations for the assets acquired in the Exxon Barnett Acquisition since closing on June 30, 2022 are included in the Company's condensed consolidated statements of operations and comprehensive income (loss) for the three and nine months ended September 30, 2022 and include $114.8 million of total revenue and $69.9 million of income from operations.

The estimated purchase price consideration and fair value of assets acquired and liabilities assumed are as follows (in thousands):

Cash	$ 627,527
Contingent consideration	17,150
Total consideration	$ 644,677
Assets acquired and liabilities assumed:	
Inventory	$ 150
Natural gas properties – developed	664,665
Midstream assets	254,813
Other property and equipment	8,907
Property taxes	(9,039)
Deferred tax liability	(49,789)
Revenues payable	(16,612)
Asset retirement obligations	(44,765)
Total identifiable net assets	$ 808,330
Bargain purchase gain	$(163,653)

Unaudited Pro Forma Information. The following unaudited pro forma financial information represents a summary of the historical condensed consolidated results of operations for the three and nine months ended September 30, 2022 and 2021, giving effect to the Exxon Barnett Acquisition as if it had been completed on January 1, 2021. The pro forma financial information is provided for illustrative purposes only and are not intended to represent what the Company's financial position or results of operations would have been had the Exxon Barnett Acquisition occurred on the assumed date nor do they purport to project the future operating results or the financial position of the Company following the Exxon Barnett Acquisition.

The information below reflects certain nonrecurring and recurring pro forma adjustments that were directly related to the business combination based on available information and certain assumptions that the Company believes are reasonable, including (i) the increase in depletion and amortization reflecting the relative fair values and production volumes attributable to the Seller's natural gas properties and the revision to the depletion rate reflecting the reserve volumes acquired, (ii) the increase in depreciation expense reflecting the relative fair values attributable to the Seller's midstream assets and revision of useful lives reflecting the Company's estimate thereof, (iii) adjustments to interest expense as a result of the Company's indebtedness incurred to fund the purchase of the 2022 Barnett Assets further described in Note 8 — Debt and Note 7 — Related Parties for the $570.0 million term loan and $75.0 million related party note, respectively, (iv) increase in accretion expense reflective of the fair market value of asset retirement obligations, (v) increase of general and administrative expense during the nine months ended September 30, 2021, for transition services provided by the Seller upon acquisition, and a corresponding decrease of general and administrative expenses for the three months ended September 30, 2022 for the actual transition service expenses incurred by the Company, and (vi) the estimated tax impacts of the pro forma adjustments.

	Three Months Ended September 30,		Nine Months Ended September 30,	
(in thousands)	**2022**	**2021**	**2022**	**2021**
Revenues and other operating income (loss)	$ 303,794	$ (6,188)	$ 742,547	$ 279,344
Net income (loss) and comprehensive income (loss) attributable to BKV Corp.	$ 77,752	$ (220,284)	$ 220,115	$ (364,707)

Note 3 — Natural Gas Properties & Other Property and Equipment

Accumulated depreciation, depletion and amortization for developed natural gas properties as of September 30, 2022 and December 31, 2021 was $330.3 million and $267.3 million, respectively. Depreciation, depletion and amortization expense for developed natural gas properties for the three months ended

September 30, 2022 and 2021 was $28.5 million and $19.1 million, respectively, and $63.0 million and $57.7 million for the nine months ended September 30, 2022 and 2021, respectively. There were no exploratory well costs pending determination of proved reserves at September 30, 2022 and December 31, 2021 and no exploratory dry hole costs during the nine months ended September 30, 2022 and 2021.

Midstream assets consisted of the following as of the periods indicated:

(in thousands)	September 30, 2022	December 31, 2021
Compressor station	$ 37,851	$ 6,831
Meter station	654	654
Pipelines	271,754	47,878
Total	310,259	55,363
Accumulated depreciation	(9,965)	(7,417)
Midstream assets, net	$ 300,294	$ 47,946

Depreciation expense on midstream assets of $1.9 million and $0.4 million was recognized for the three months ended September 30, 2022 and 2021, respectively, and $2.5 million and $1.1 million for the nine months ended September 30, 2022 and 2021, respectively.

Other property and equipment consisted of the following as of the periods indicated:

(in thousands)	September 30, 2022	December 31, 2021
Buildings	$ 16,789	$ 12,675
Furniture, fixtures, equipment and vehicles	14,483	6,555
Computer software	4,844	4,715
Leasehold improvements	1,627	1,571
Land	3,090	3,090
Total	40,833	28,606
Accumulated depreciation	(9,218)	(6,482)
Other property and equipment, net	$ 31,615	$ 22,124

Depreciation expense for other property and equipment for the three months ended September 30, 2022 and 2021 was $1.3 million and $0.8 million, respectively, and $2.8 million and $2.2 million for the nine months ended September 30, 2022 and 2021, respectively.

Note 4 — Fair Value Measurements

Derivative assets and liabilities measured at fair value as of September 30, 2022 and December 31, 2021 use Level 2 valuation techniques; contingent consideration, minority ownership puttable shares, equity-based compensation, and assets acquired and liabilities assumed in the Exxon Barnett Acquisition are measured at fair value as of these reporting dates using Level 3 valuation techniques. There have been no transfers between fair value levels during the reporting periods. In addition, derivatives are also subject to the risk that either party to a contract will be unable to meet its obligations. The Company factors non-performance risk into the valuation of derivatives using current published credit default swap rates. As of September 30, 2022, the impact of the non-performance risk adjustment to the Company's fair value of commodity derivative liabilities was $6.8 million.

The following tables set forth by level within the fair value hierarchy, the financial assets and liabilities that were accounted for at fair value on a recurring basis:

	As of September 30, 2022			
	Fair Value Measurements Using:			
(in thousands)	Quoted Prices in Active Markets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
Financial assets				
Derivative instruments	$ —	$ 1,466	$ —	$ 1,466
Financial liabilities				
Derivative instruments	$ —	$ 265,032	$ —	$265,032
Contingent consideration	$ —	$ —	$ 190,773	$190,773
Mezzanine equity				
Minority ownership puttable shares	$ —	$ —	$ 68,102	$ 68,102
Equity-based compensation	$ —	$ —	$ 91,128	$ 91,128

	As of December 31, 2021			
	Fair Value Measurements Using:			
(in thousands)	Quoted Prices in Active Markets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
Financial assets				
Derivative instruments	$ —	$ 9,986	$ —	$ 9,986
Financial liabilities				
Derivative instruments	$ —	$ 114,818	$ —	$114,818
Contingent consideration	$ —	$ —	$ 142,533	$142,533
Mezzanine equity				
Minority ownership puttable shares	$ —	$ —	$ 49,841	$ 49,841
Equity-based compensation	$ —	$ —	$ 34,006	$ 34,006

The contingent consideration was generated from the Devon Barnett Acquisition (referred to as the Barnett Asset Acquisition in the Company's Annual Financial Statements and the "Devon Barnett Acquisition" herein) and Exxon Barnett Acquisition further described in the Annual Financial Statements and *Note 2 — Acquisition,* respectively.The fair value of the contingent consideration as of September 30, 2022 and December 31, 2021 represents management's best estimate if a third party were paid to assume the contingency. The fair values were determined using forecasted monthly Henry Hub Prices, West Texas Intermediate prices, as applicable, and the application of Monte Carlo simulations. The Exxon Barnett Acquisition and Devon Barnett Acquisition contingencies are described further in *Note 14 — Commitments and Contingencies* to the unaudited condensed consolidated financial statements.

The minority ownership puttable shares were recorded at fair value upon initial recognition in mezzanine equity on the condensed consolidated balance sheets. The fair market value of the Company's common stock was used to determine the carrying value of the minority ownership puttable shares in mezzanine equity on the condensed consolidated balance sheets as of September 30, 2022 and December 31, 2021. The Company's common stock was valued using both observable (Level 2) and unobservable (Level 3) inputs. The minority ownership puttable shares are further described in the Company's Annual Financial Statements.

When classified as mezzanine equity, equity-based compensation is recorded at fair value on the grant date, considering modification of the awards. When liability classified, equity-based compensation is recorded at fair value as of the end of the period. The underlying market condition was valued using the application of Monte Carlo simulations using both observable (Level 2) and unobservable (Level 3) inputs. The remaining

components of the awards were valued based on the fair market value of the common stock of the Company, which is valued consistent with valuation methodologies described for the minority ownership puttable shares. The fair market values of the Company's market condition and common stock as of September 30, 2022 were used to determine the fair market value of equity-based compensation in mezzanine equity on the condensed consolidated balance sheet as of September 30, 2022. Equity-based compensation is further described in *Note 11 — Equity-based Compensation* to the condensed consolidated financial statements.

Quantitative data regarding the Company's Level 3 unobservable inputs are as follows:

(in thousands, except per share amounts)	Fair Value	Valuation Technique	Unobservable Input	Range or Actual
Common stock per share value – as of September 30, 2021[1]	$ 11.06	Enterprise value	Discount rate	10%
Market condition equity-based compensation per share value – as of September 30, 2021	$ 11.01	Monte Carlo Simulation	Performance period dividends	50.0% of projected annual net income
Contingent consideration – as of December 31, 2021	$142,533	Monte Carlo Simulation	Risk Free Rate	1.0%
			Credit Spread	4.0%

(1) The Company uses the midpoint of valuation results when estimating the fair value of common stock.

The table below sets forth the changes in the Company's Level 3 fair value measurements:

(in thousands)	September 30, 2022	December 31, 2021
Balance beginning of period	$ 226,380	$ 54,853
Contingent consideration-additions from business combination	17,150	—
Contingent consideration – settlement	—	(65,000)
Minority ownership puttable share activity	78	511
Grant date fair value of equity-based compensation	28,139	28,990
Change in fair market value *(all instruments)*	78,255	207,026
Balance end of period	$ 350,002	$ 226,380

Note 5 — Derivative Instruments

From time to time, the Company may utilize derivative contracts in connection with its natural gas and NGL operations to provide an economic hedge of the Company's exposure to commodity price risk associated with anticipated future natural gas and NGL production. The Company does not hold or issue derivative financial instruments for trading purposes. The derivative contracts outstanding as of September 30, 2022 and December 31, 2021 consisted of commodity swaps, basis swaps, enhanced three-way collar, and collar agreements, subject to master netting agreements with each individual counterparty. The following table presents gross commodity derivative balances prior to applying netting adjustments and net balances recorded in the condensed consolidated balance sheets:

	As of September 30, 2022		
(in thousands)	Gross Amounts of Assets and Liabilities	Offset Adjustments	Net Amounts of Assets and Liabilities
Current derivative assets	$ 5,429	(3,963)	$ 1,466
Noncurrent derivative assets	$ 112	(112)	$ —
Current derivative liabilities	$ 218,622	(3,963)	$ 214,658
Noncurrent derivative liabilities	$ 50,486	(112)	$ 50,374

	As of December 31, 2021		
(in thousands)	Gross Amounts of Assets and Liabilities	Offset Adjustments	Net Amounts of Assets and Liabilities
Current derivative assets	$ 9,986	—	$ 9,986
Noncurrent derivative assets	$ —	—	$ —
Current derivative liabilities	$ 91,156	—	$ 91,156
Noncurrent derivative liabilities	$ 23,662	—	$ 23,662

Enhanced Three-way Collar, Collar, Commodity Swap and Basis Swap Contracts

Generally, enhanced three-way collar arrangements provide for a price floor, a price ceiling and either a price sub-floor or price sub-ceiling. The floating price for the enhanced three-way collar contracts is traded for a fixed price when the floating price is not between the floor and ceiling, and for twice the contracted volumes within the contracted volumes, the sub-floor/ceiling. If the floating price is between these contracted prices, no trade occurs. A commodity collar provides for a price floor and a price ceiling. The floating price for the collar contract is traded for a fixed price when the floating price is not between the floor and ceiling. If the floating price is between these contracted prices, no trade occurs. A commodity swap agreement is an agreement whereby a floating price based on the underlying commodity is traded for a fixed price over a specified period. Basis swaps provide a guaranteed price differential for natural gas from specified delivery points over a specified period.

The fair value of open enhanced three-way collar, collar, commodity swap, and basis swap contracts reported in the condensed consolidated balance sheets may differ from that which would be realized in the event the Company terminated its position in the respective contract. Risks may arise as a result of the failure of the counterparty to the contract to comply with the terms of the contract. The loss incurred by the failure of the counterparties is generally limited to the aggregate fair value of the outstanding contracts in an unrealized gain position as well as any collateral posted with the counterparty. The Company considers the creditworthiness of each counterparty to an enhanced three-way collar, option, commodity swap or basis swap contract in evaluating potential credit risk. Additional risks may arise from unanticipated movements in the fair value of the underlying investments.

Derivative Contracts

The Company records its derivative financial instruments related to natural gas and NGL production at fair value using a market approach and has not designated any derivatives as hedges. Derivative financial instruments are marked-to-market and presented on the condensed consolidated balance sheets as commodity derivative assets or commodity derivative liabilities with the amount of unsettled gain or loss reflected in derivative losses, net in the condensed consolidated statements of operations and comprehensive income (loss). Derivative financial instruments that settle are recorded as derivative losses, net in the condensed consolidated statements of operations and comprehensive income (loss). The following tables set forth the effect of derivative instruments on the condensed consolidated statements of operations and comprehensive income (loss):

	Three Months Ended September 30,	
(in thousands)	**2022**	**2021**
Total loss on settled derivative instruments	$(310,930)	$(101,512)
Total gain (loss) on unsettled derivative instruments	41,401	(220,817)
Total loss on derivative instruments	$(269,529)	$(322,329)

	Nine Months Ended September 30,	
(in thousands)	**2022**	**2021**
Total loss on settled derivative instruments	$(561,578)	$(123,570)
Total loss on unsettled derivative instruments	(158,734)	(377,034)
Total loss on derivative instruments	$(720,312)	$(500,604)

Settled derivative instrument loss for the nine months ended September 30, 2022 includes losses of $101.2 million related to monetization of certain natural gas derivative instruments prior to their contractual settlement dates. There were no monetizations of derivatives during the nine months ended September 30, 2021. As of September 30, 2022 and December 31, 2021, $159.9 million and $66.8 million of settled derivative instruments were included in accounts payable and accrued liabilities, respectively, on the Company's condensed consolidated balance sheets. Of these amounts, $70.2 million and $23.2 million related to monetizations, respectively. The monetizations payable as of September 30, 2022 relate to an amendment to an ISDA agreement, see *Note 13 — Credit and Other Risk.*

Volume of Derivative Activities

Outstanding derivative contracts are measured at fair value using Level 2 valuation techniques and are included in the accompanying condensed consolidated balance sheets as derivative assets and derivative liabilities.

As of September 30, 2022, the Company's derivative activities based on volume and contract prices, categorized by primary underlying risk and related commodity, by year, were as follows:

The following table represents natural gas commodity derivatives indexed to NYMEX Henry Hub pricing:

Instrument	MMBTU	Weighted Average Price (USD)	Weighted Average Price Sub Floor	Weighted Average Price Floor	Weighted Average Price Ceiling	Weighted Average Price Sub Ceiling	Fair Value as of September 30, 2022 (in thousands)
2022							
Swap	11,209,000	$ 4.41					$ (27,462)
Enhanced three-way collars	8,235,000		$ 2.51	$ 2.54	$ 2.91	$ 3.18	$ (64,581)
Collars	305,000			$ 2.75	$ 3.30		$ (1,077)
2023							
Swap	52,674,600	$ 3.90					$ (67,647)
Enhanced three-way collars	9,125,000			$ 2.45	$ 3.15	$ 3.15	$ (41,317)
Collars	41,250,000			$ 2.85	$ 3.75		$ (55,843)

The following table represents natural gas basis derivatives:

Instrument	Basis Reference Price	MMBTU	Weighted Average Basis Differential	Fair Value at September 30, 2022 (in thousands)
2022				
Swap	Transco 85	9,200,000	$ 0.46	$ 1,862
2023				
Swap	Transco 85	9,000,000	$ 0.46	$ (1,798)
Swap	TETCO M3	590,000	$ 10.68	$ 1,466

The following table represents natural gas liquids commodity derivatives for contracts expiring throughout the years ended December 31, 2022 and 2023 based on the applicable index listed below:

Instrument	Commodity Reference Price	Gallons	Weighted Average Price (USD)	Fair Value at September 30, 2022 (in thousands)
2022				
Swap	OPIS Purity Ethane Mont Belvieu	34,385,400	$ 0.34	$ (1,925)
Swap	OPIS IsoButane Mont Belvieu Non-TET	966,000	$ 0.99	$ (96)
Swap	OPIS Normal Butane Mont Belvieu Non-TET	1,932,000	$ 0.98	$ (11)
Swap	OPIS Pentane Mont Belvieu Non-TET	1,932,000	$ 1.46	$ (183)
Swap	OPIS Propane Mont Belvieu Non-TET	5,796,000	$ 0.86	$ (93)
2023				
Swap	OPIS Purity Ethane Mont Belvieu	38,325,000	$ 0.23	$ (4,289)
Swap	OPIS IsoButane Mont Belvieu Non-TET	3,832,500	$ 0.80	$ (571)
Swap	OPIS Normal Butane Mont Belvieu Non-TET	3,832,500	$ 0.80	$ (384)
Swap	OPIS Pentane Mont Belvieu Non-TET	7,665,000	$ 1.28	$ (1,522)
Swap	OPIS Propane Mont Belvieu Non-TET	22,995,000	$ 0.72	$ (2,004)

Instrument	Commodity Reference Price	Gallons	Weighted Average Price Floor	Weighted Average Price Ceiling	Fair Value as of September 30, 2022 (in thousands)
2022					
Collars	OPIS IsoButane Mont Belvieu Non-TET	2,318,400	$ 1.25	$ 1.42	$ 316
Collars	OPIS Normal Butane Mont Belvieu Non-TET	1,545,600	$ 1.25	$ 1.42	$ 211
Collars	OPIS Pentane Mont Belvieu Non-TET	5,922,000	$ 1.80	$ 2.19	$ 839
Collars	OPIS Propane Mont Belvieu Non-TET	15,968,400	$ 1.14	$ 1.31	$ 2,150
2023					
Collars	OPIS IsoButane Mont Belvieu Non-TET	9,198,000	$ 0.95	$ 1.09	$ 393

Note 6 — Asset Retirement Obligations

The Company has recognized an estimated liability for its asset retirement obligations related to the future costs of plugging, abandonment, and remediation of natural gas producing properties. The present value of the estimated asset retirement obligations has been capitalized as part of the carrying amount of the related natural gas properties. The liability has been accreted to its present value during the nine months ended September 30, 2022 and the year ended December 31, 2021.

The following table summarizes the activities of the Company's asset retirement obligations for the periods indicated:

(in thousands)	September 30, 2022	December 31, 2021
Asset retirement obligations, beginning of period	$ 158,968	$ 148,826
Additions through business combination	44,765	—
Liabilities incurred	298	923
Liabilities settled	(115)	(811)
Accretion of discount	8,874	10,030
Asset retirement obligations, end of period	212,790	158,968
Less current portion	(618)	—
Asset retirement obligations, long-term	$ 212,172	$ 158,968

Note 7 — Related Parties

On October 14, 2021, the Company entered into a Loan Agreement with its majority shareholder BNAC (the "Lender") and borrowed $116.0 million thereunder. Interest on the outstanding principal was SOFR + 5.25% and was payable on a semi-annual basis. On September 16, 2022, the Company repaid the $116.0 million principal, plus related interest, and terminated this Loan Agreement. The applicable interest rate as of September 16, 2022 was 7.96%. During the three and nine months ended September 30, 2022, the Company recognized interest expense of $2.0 million and $5.5 million, respectively.

On November 8, 2021, the Company entered into a Loan Agreement with the Lender and borrowed $50.0 million thereunder. On January, 11, 2022 and June 1, 2022, the Company repaid $15.0 million and $35.0 million, respectively. This loan agreement was terminated on June 1, 2022. The Company recorded no interest expense related to this Loan Agreement during the three months ended September 30, 2022. During the nine months ended September 30, 2022, the Company recorded interest expense of $0.9 million.

On March 10, 2022, the Company entered into a Loan Agreement (the "$75 Million Loan Agreement") with the Lender and borrowed $75.0 million thereunder. Interest on the outstanding principal is SOFR + 5.25% and is payable on a semi-annual basis. The principal balance of $75.0 million is due on December 31, 2027, including any unpaid interest. On June 15, 2022, the Company entered into a subordination agreement with the Lender whereby the $75.0 million is subordinate to the term loans under

the Company's credit agreement (as amended by that certain First Amendment to Term Loan Credit Agreement, "Term Loan Credit Agreement") further discussed in *Note 8 — Debt*. Financial covenants are consistent with those of the Term Loan Credit Agreement as discussed in *Note 8 — Debt*. Interest payable under the $75 Million Loan Agreement as of September 30, 2022 was $2.8 million. During the three and nine months ended September 30, 2022, the Company recorded interest expense of $1.5 million and $2.8 million, respectively.

As of September 30, 2022 and December 31, 2021, the Company had payables of $40.7 million and $30.7 million, respectively, to BNAC for current tax expense included in the other current liabilities line item on the condensed consolidated balance sheets. The amounts due to BNAC as of September 30, 2022 and December 31, 2021, related to reimbursements for income tax related items. Separately, the Company had a $0.2 million and a $0.5 million receivable from BNAC as of September 30, 2022 and December 31, 2021, respectively, related to shared general and administrative expenses.

As of September 30, 2022 and December 31, 2021, the Company had accounts receivable from BKV-BPP Power, LLC of $0.2 million and $1.8 million, respectively, related to reimbursement for certain expenses paid on behalf of BKV-BPP Power, LLC and amounts receivable under the Administration Services Agreement between the Company and BKV-BPP Power, LLC. See the Company's Annual Financial Statements for further discussion of the Company's equity method investments. During the three and nine months ended September 30, 2022, the Company recognized $0.7 million and $2.0 million, respectively, of revenues related to the services provided under the Administration Services Agreement which is included in other revenues on the condensed consolidated statements of operations and comprehensive income (loss).

The Company's ultimate parent Banpu Public Company Limited is also the ultimate parent of Banpu Power Corporation ("BPP US"), the Company's partner in a joint venture which is discussed further in the Company's Annual Financial Statements. See *Note 12 — Equity Method Investment* for further discussion of this joint venture. As of December 31, 2021, the Company had accounts receivable from BPP US of $1.3 million related to reimbursement for expenses incurred during the formation of the joint venture. As of September 30, 2022, the Company had no accounts receivable from BPP US.

Note 8 — Debt

On December 22, 2021, the Company entered into an agreement with Oversea-Chinese Banking Corporation Limited (the "Bank"), which agreement provides for a revolving credit facility (the "Facility") with a limit of $55.0 million. The Facility is not secured. Advances on the Facility are required to be repaid upon the earlier of 60 days after the date of the advance, or upon the receipt of a written demand notice from the Bank. Advances from the Facility must be greater than $1.0 million. Interest on any outstanding advances is payable monthly at a rate of SOFR +2.0%. On September 30, 2022, the outstanding balance of the Facility was $45.0 million which is payable on February 15, 2023, due to an extension on the related advance that the Company received on September 14, 2022.

On March 16, 2022, the Company entered into an agreement with Standard Chartered Bank, which agreement provides for revolving term loans and letters of credit ("Facility II") with a limit of $25.0 million. Of the $25.0 million, $15.0 million is available for cash draw downs, and in the absence of outstanding cash draw downs, the full $25.0 million is available for letters of credit. Facility II is an unsecured facility committed through August 31, 2024. Interest is agreed upon at the time of each cash draw down. Cash draw downs, plus all applicable interest are payable at one, three, six or twelve months from the date of the advance. Facility II had one outstanding letter of credit for $13.9 million as of the date the condensed consolidated financial statements were available for issuance. As of September 30, 2022, the Company had one $10.0 million cash draw down outstanding under Facility II. The $10.0 million cash draw down is due December 19, 2022 and bears interest at a rate of 5.44%.

On June 16, 2022, the Company entered into a Credit Agreement with a syndicate of lenders (the "Lenders") and Bangkok Bank Public Company Limited (New York Branch), as the administrative agent, whereby the Company can borrow up to $600.0 million in the aggregate, in the form of multiple term loans during the period commencing with the effective date and ending six months thereafter. The term loans under the Credit Agreement must be equal to or greater than $5.0 million; amounts repaid by the Company

in respect to the term loans may not be re-borrowed under the Credit Agreement. Once drawn, the term loans are required to be repaid annually in five equal installments; installment payments are due on each anniversary of the original draw for the respective term loan . The term loans are not secured. On June 30, 2022, the Company drew a term loan of $570.0 million to fund the Exxon Barnett Acquisition. Interest is adjusted term SOFR + 4.75%. The proceeds of the term loans must be used to finance the Exxon Barnett Acquisition. See *Note 2 — Acquisition.*

On August 24, 2022, the Company entered into an agreement with Bangkok Bank Public Company Limited (New York Branch), which agreement provides for a revolving credit facility ("Facility III") with a limit of $100.0 million. Facility III is an unsecured facility committed through September 30, 2027. Cash draw downs and all applicable interest is payable at one, three, or six months from the date of the advance ("one month draw", "three month draw" and "six month draw", respectively). The interest period is determined by the Company at the time of the advance. The interest rate on any outstanding advances is adjusted term SOFR + 4.75%. As of September 30, 2022, the Company had $75.0 million outstanding under Facility III which consisted of a six month draw for $45.0 million and one month draw of $30.0 million. The Company incurred debt issuance costs of $1.1 million, which are recorded in other current and noncurrent assets in the condensed consolidated balance sheets. On October 14, 2022, the Company repaid the one month draw of $30.0 million.

The Term Loan Credit Agreement and Facility III require the Company to maintain certain financial covenants, including requiring the asset coverage ratio to be no less than 2.00 to 1.00, the total net leverage ratio to be no greater than 2.50 to 1.00, and the consolidated fixed charge coverage ratio to be no less than 1.30 to 1.00. Additionally, Facility III requires the Company to have an accounts receivable balance from its largest purchaser that exceeds the outstanding balance on Facility III. As of September 30, 2022, the Company was in compliance with all covenants of the Term Loan Credit Agreement and Facility III.

The following table summarizes the debt balances:

(in thousands)	September 30, 2022
Credit facilities	
Facility I	$ 45,000
Facility II	10,000
Facility III	75,000
Term loan	
Current portion of Term Loan Credit Agreement	114,000
Current portion of unamortized debt issuance costs	(2,050)
Total current debt, net	241,950
Long-term portion of Term Loan Credit Agreement	456,000
Long-term portion of unamortized debt issuance costs	(4,246)
Total long-term debt, net	451,754
Total debt, net	$ 693,704

Note 9 — Revenue from Contracts with Customers

The Company records sales revenue based on an estimate of the volumes delivered at estimated prices as determined by the applicable sales agreement, which is variable based on commodity pricing. The Company estimates its sales volumes based on company-measured volume readings. Natural gas, NGL and oil sales are adjusted in subsequent periods based on data received from the Company's purchasers that reflects actual volumes and prices received which is typically within two months of transfer of control to the purchaser. Historically, the difference between estimated and actual sales revenues have not been material. For the three and nine months ended September 30, 2022 and 2021, the impact of any natural gas imbalances was not significant.

In conjunction with its sales of natural gas, the Company records marketing revenues based on estimated underlying variable consideration pricing and delivered volumes. Marketing revenues are adjusted

in subsequent periods based on data received from the Company's purchaser or trading partner. Historically, the difference between estimated and actual marketing revenues has not been material.

The Company also generates revenues from its non-operated and operated midstream assets. Midstream revenues are recognized when services are rendered based on quantities transported and measured according to the underlying contract. The Company records midstream revenue based on volumes at stated contractual rates. The Company estimates its volumes based on third-party data with respect to its proportionate share of non-operated volumes, and actual volumes for operated. Non-operated midstream revenues are adjusted in subsequent periods based on data received from the operator that reflects actual volumes which is typically within three months.

All of the Company's revenues are generated in the states of Pennsylvania and Texas. Revenues consist of the following:

	Three Months Ended September 30, 2022		
(in thousands)	**Pennsylvania**	**Texas**	**Total**
Natural gas	$ 74,614	$406,693	$481,307
Natural gas liquids	—	84,306	84,306
Oil	—	2,424	2,424
Total production revenues	$ 74,614	$493,423	$568,037
Marketing revenues	—	1,869	1,869
Midstream revenues	1,345	1,392	2,737
Total	$ 75,959	$496,684	$572,643

	Three Months Ended September 30, 2021		
(in thousands)	**Pennsylvania**	**Texas**	**Total**
Natural gas	$ 33,282	$125,942	$159,224
Natural gas liquids	—	66,371	66,371
Oil	—	1,434	1,434
Total production revenues	$ 33,282	$193,747	$227,029
Marketing revenues	—	950	950
Midstream revenues	1,557	—	1,557
Total	$ 34,839	$194,697	$229,536

	Nine Months Ended September 30, 2022		
(in thousands)	**Pennsylvania**	**Texas**	**Total**
Natural gas	$ 186,244	$ 783,281	$ 969,525
Natural gas liquids	—	247,404	247,404
Oil	—	7,544	7,544
Total production revenues	$ 186,244	$1,038,229	$1,224,473
Marketing revenues	—	7,197	7,197
Midstream revenues	4,688	1,392	6,080
Total	$ 190,932	$1,046,818	$1,237,750

	Nine Months Ended September 30, 2021		
(in thousands)	Pennsylvania	Texas	Total
Natural gas	$ 74,608	$285,108	$359,716
Natural gas liquids	—	151,165	151,165
Oil	—	5,491	5,491
Total production revenues	$ 74,608	$441,764	$516,372
Marketing revenues	—	51,246	51,246
Midstream revenues	5,529	—	5,529
Total	$ 80,137	$493,010	$573,147

Contract Balances

Receivables from contracts with customers are recorded when the right to consideration becomes unconditional, generally when control of the product has been transferred to the customer. Under the Company's sales contracts, the Company invoices customers after its performance obligations have been satisfied, at which point payment is unconditional. As of September 30, 2022 and December 31, 2021, the Company's receivables from contracts with customers were $171.2 million and $100.4 million, respectively.

Note 10 — Accounts Payable and Accrued Liabilities

Accounts payable and accrued liabilities included in current liabilities consist of the following:

(in thousands)	September 30, 2022	December 31, 2021
Accounts payable	$ 71,846	$ 32,237
Commodity derivative settlements payable	89,719	43,252
Commodity derivative monetizations payable	70,200	23,175
Revenues payable	22,899	29,871
Other accrued liabilities	63,854	38,301
Total	$ 318,518	$ 166,836

Note 11 — Equity-based Compensation

On January 1, 2021 the BKV Corporation 2021 Long Term Incentive Plan (the "Plan") was established by the adoption of the Plan by the Board of Directors, which allows for the grant of incentive awards to employees and non-employee directors of the Company in the form of restricted stock units ("RSU"). Each RSU represents the contingent right to receive one share of common stock of the Company. As of September 30, 2022, the maximum number of RSUs authorized to be awarded under the Plan was 14,941,176. However, of the total authorized RSUs under the plan, only 60% may be awarded on or before December 31, 2022 without the written approval of the Board of Directors of the Company. Thereafter, no more than 80% of the total RSUs may be awarded without the written approval of the Board of Directors of the Company. For accounting purposes, management evaluated grants of incentive awards from the Plan under ASC 718 — *Compensation-Stock Compensation* and determined a grant date, for all annual incentive awards, including those anticipated to be legally granted in the three years subsequent to the initial incentive award date, was established because all grant date criteria had been satisfied and compensation expense and forfeitures were accounted for accordingly. Under ASC 718 — *Compensation-Stock Compensation, a*s of September 30, 2022, 15,448,998, were considered to have been granted under the plan since the plan inception when taking into consideration performance RSUs at the maximum performance level and time-based restricted stock units anticipated to be legally granted in the three years following the initial incentive award date. Of the awards considered granted under ASC 718 — *Compensation-Stock Compensation* as of September 30, 2022, 1,423,941 RSUs are not considered legally granted.

RSUs are granted in the form of Performance-Based Restricted Stock Units ("PRSU") and Time-Based Restricted Stock Units ("TRSU"). The shares of common stock issued in settlement of the RSUs include a

put right (the "Plan Put Right") available to the incentive award grant recipients (the "Participants"). If a Participant's employment is terminated due to voluntary resignation, and certain other conditions are met, a Participant is able to elect the Company to purchase the shares issued in settlement of his or her RSUs at fair market value of the Company's common stock at the time the election is made by the Participant. The Plan Put Right is only available to Participants upon the occurrence of certain events as defined in the Plan. As discussed below in "Modification of Terms," this Plan Put Right was modified on November 5, 2021 to add a one hundred eighty-one-day holding period following vesting of the RSUs. In addition, the Company has a purchase right (the "Call Right") which allows for the purchase of shares of common stock issued in the settlement of the RSUs from terminated participants at fair market value on the date of the purchase, at the Company's discretion. As discussed below in "Modification of Terms," this Call Right was modified on November 5, 2021 to add a one hundred eighty-one-day holding period following vesting of the RSUs. These features, specifically the Plan Put Right, required the Company to treat the incentive awards as cash-settled or liability classified in the condensed consolidated balance sheets of the Company until the Plan was modified as described below. Under liability treatment, for the three and nine months ended September 30, 2021, the Company incurred $12.0 million and $22.8 million of equity-based compensation expense, respectively, which is included within the condensed consolidated statement of operations and comprehensive income (loss) as general and administrative expense. Under liability treatment, expense and the corresponding liability is determined based on the fair market value of the underlying common stock shares for TRSUs. For PRSUs, the non-market performance condition uses the fair market value of the underlying common stock shares coupled with the estimated level of achievement for each performance criteria. The market condition fair value is determined using a Monte Carlo Simulation which uses observable and unobservable inputs, see *Note 4 — Fair Value Measurements* for the Level 3 unobservable inputs used in both the fair value of the underlying common stock and the market condition. Observable inputs used in the market condition valuation as of September 30, 2021 are a risk-free rate of 0.34% and volatility of 40%.

Modification of terms

On November 5, 2021, the Board of Directors of the Company approved the First Amendment to the BKV Corporation 2021 Long Term Incentive Plan (the "Plan Amendment"). The Plan Amendment included a provision to require all Participants of the Plan to hold vested shares of common stock issued in settlement of RSUs for a minimum of one-hundred eighty-one days (the "Holding Period") prior to having the ability to exercise the Plan Put Right. The Amendment also applied the Holding Period to the Call Right. Upon modification, the RSUs under the plan are considered to be settled in equity, as the Holding Period is a reasonable period of time to experience the risk and rewards of an equity instrument. However, due to the existence of the Plan Put Right, the Company recognized the incentive awards within mezzanine equity on the condensed consolidated balance sheet as of the date of Plan Amendment. All Participants of the plan agreed to the terms of the Plan Amendment.

Performance-Based Restricted Stock Units

The PRSUs are subject to a three year vesting or performance period beginning January 1, 2021 and ending on the earlier of December 31, 2023 (the "Performance Period") or IPO of the Company. All PRSUs cliff vest based on and subject to the achievement of the performance criteria upon the earlier of an initial public offering of the Company, change in control, or December 31, 2023. The table below summarizes the PRSU activity for the nine months ended September 30, 2022:

(in thousands, except per share amounts)	Shares	Weighted Average Grant Date Fair Value
Unvested PRSUs at January 1, 2022	11,589	$ 10.90
Granted[(1)]	466	$ 14.67
Forfeited[(1)]	(204)	$ 10.98
Unvested PRSUs as of September 30, 2022	11,851	$ 11.09

(1) Granted and forfeited award amounts take into consideration performance shares at the maximum performance level

The PSRU's are eligible to be earned based on three performance conditions: (1) Annualized Total Shareholder Return ("TSR") of fully diluted common stock during the performance period, (2) Return on Capital Employed ("ROCE") based on the average annual performance over the Performance Period, and (3) IPO readiness which is based on the Company's capability to be listed on a public stock exchange at certain points during the performance period. Between 0% and 100% of the PRSUs at maximum performance level are eligible to be earned based on the Company achieving the following pre-established goals:

		Performance Conditions		
	Weight	Minimum Threshold (0%)	Target Threshold (50%)	Maximum Threshold (100%)
TSR	60%	5%	12.5%	20%
ROCE	20%	—%	7%	14%
IPO readiness (capability dates)	20%	12/31/2024	12/31/2023	12/31/2022

The TSR component of the awards is a market-based condition valued utilizing the Monte Carlo Simulation pricing model, which calculates multiple potential outcomes and establishes grant date fair value based on the most likely outcome. For the purposes of grant date fair value, the TSR component assumes a risk-free rate of 0.73% to 4.05% and volatility of 40% to 50%, see *Note 4 — Fair Value Measurements*, for the Level 3 unobservable input used in the determination of the grant date fair value of the TSR. The weighted average grant date fair value of the TSR component of PRSU awards granted during the nine months ended September 30, 2022 was $16.40.

ROCE and IPO readiness are considered to be non-market performance conditions. Thus, the likelihood of achievement must be reassessed at every reporting period, and compensation expense is adjusted accordingly. As of September 30, 2022, management estimates IPO readiness will be achieved at the maximum performance level or 100%, and ROCE performance to be greater than the target performance level at approximately 100%. Accordingly, adjustments were made to compensation expense during the nine months ended September 30, 2022 to reflect the estimated levels of achievement. In addition to the level of achievement, the adjustment takes into account the per share grant date fair value of the Company's common stock of as of the modification date, or grant date. The grant date fair value of the PSRUs presented in the activity for nine months ended September 30, 2022 takes into account the grant date fair value for ROCE and IPO readiness, due to the non-market performance conditions being probable of achievement as of the modification date which establishes a grant date fair value. The weighted average grant date fair value of the ROCE and IPO readiness components of PRSU awards granted during the nine months ended September 30, 2022 was $13.08.

As of September 30, 2022, there was $39.4 million of unrecognized compensation expense related to the PRSU awards which will be amortized over a weighted average period of 1.25 years.

For the three months ended September 30, 2022 and nine months ended September 30, 2022, stock-based compensation related to the PRSUs was $7.9 million, and $25.9 million, respectively, which are included in general and administrative expenses in the condensed consolidated statement of operations and compressive income (loss).

Time-Based Restricted Stock Units

Under the applicable provisions of the Plan, the TRSU incentive award was anticipated to be granted in the form of four annual awards. One quarter of the annual award requires no service for vesting and vests immediately upon the grant date. The remaining three quarters of the annual award vest in equal portions upon the subsequent three anniversary dates following the grant date. The remaining annual awards are anticipated to be granted on the first, second and third anniversaries of the initial TRSU award date, subject to continued employment with the Company and board approval. Vesting for these anticipated three annual awards is expected to follow the same vesting schedule as the first annual awards based on the legal grant date. Upon an initial public offering of the Company, all unvested and legally granted and outstanding

awards under the Plan will vest immediately. Awards accounted for as granted under ASC 718 *Compensation-Stock Compensation*, but not legally granted at such time, will not vest and will be treated accordingly. The following table summarizes the TRSU activity for the nine months ended September 30, 2022:

(in thousands, except per share amounts)	Shares	Weighted-Average Grant Date Fair Value
Unvested TRSUs at January 1, 2022	2,328	$ 11.06
Granted[1]	100	$ 13.08
Vested	(317)	$ 11.11
Forfeited	(37)	$ 11.33
Unvested TRSUs as of September 30, 2022	2,074	$ 11.16

(1) Represents number of awards considered granted under ASC 718 C *ompensation-Stock Compensation*. Of these, 74,925 are not considered legally granted.

As of September 30, 2022 there was $20.2 million of unrecognized compensation expense related to the TRSU awards which will be amortized over a weighted average period of 4.34 years.

For the three and nine months ended September 30, 2022, stock-based compensation expense related to the TRSUs was $1.2 million and $3.5 million, respectively, which are included in general and administrative expenses in the condensed consolidated statement of operations and compressive income (loss).

Note 12 — Equity Method Investment

The Company is a 50% owner of BKV-BPP Power, LLC (the “Joint Venture”) which is accounted for as an equity method investment.

During the nine months ended September 30, 2022, the Company recognized, based on its 50% ownership interest in the Joint Venture, earnings of $14.5 million.

The table below sets forth the summarized financial information of the Joint Venture:

Income Statement (in thousands)	Nine Months Ended September 30, 2022
	(unaudited)
Revenues	$ 249,605
Variable operating expenses	154,474
Gross profit	95,131
Operating expenses	39,404
Income from operations	55,727
Net income	$ 28,972

Note 13 — Credit and Other Risk

Credit risk is defined as the risk of a counterparty to a contract failing to perform or pay the amounts due.

The Company is exposed to credit risks in its operating and financing activities. The Company’s maximum exposure to credit risk is partially related to financial assets recorded on the condensed consolidated balance sheets, including commodity derivative instruments that have a positive market value. Additionally, the Company maintains its primary bank accounts with a single large, global bank.

Each of the derivative contracts entered into by the Company with counterparties (each, a “Counterparty”) is subject to the terms of an ISDA master agreement (“Master Agreement”). On August 4, 2022, the Company entered into a third amendment to a Master Agreement with a certain Counterparty,

which amendment includes a cross default provision pursuant to which a default by the Company related to the covenants under the Company's Term Loan Credit Agreement, see *Note 8 — Debt*, would cause a default under the Master Agreement. Under the third amendment, the Company also agreed to terminate or novate, at its election, at least $100.0 million of its derivative contracts. As of September 9, 2022, the Company terminated derivative contracts of $100.2 million with the counterparty to satisfy this requirement. In connection with such termination, the Company is required to make cash payments to the Counterparty in an aggregate amount of $100.2 million, of which $30.0 million was paid in September 2022, an additional $30.0 million was paid on October 31, 2022, and the remaining $40.2 million must be paid by November 30, 2022. The unpaid balance as of September 30, 2022 of $70.2 million is included in accounts payable and accrued liabilities on the condensed consolidated balance sheet of the Company. The fair market value of derivative contracts as of September 30, 2022, under the Master Agreement is $143.7 million, which consisted of $110.5 million and $33.2 million included in current commodity derivative liabilities and noncurrent commodity derivative liabilities on the Company's condensed consolidated balance sheet, respectively.

The Company is not currently aware of any exceptional event, dispute, risks or contingent liabilities that could have a material impact on the assets and liabilities, results, financial position or operations of the Company.

The Company is subject to U.S. federal income tax as well as income in various state jurisdictions, and the Company's operating cash flow is sensitive to the amount of income taxes the Company must pay. In the jurisdictions in which the Company operates or previously operated, income taxes are assessed on earnings after consideration of all allowable deductions and credits. Changes in the types of earnings that are subject to income tax, the types of costs that are considered allowable deductions (such as intangible drilling costs) and the timing of such deductions, or the rates assessed on the Company's taxable earnings would all impact the Company's income taxes and resulting operating cash flow. In addition, new taxes are from time to time proposed and, if enacted, could adversely impact the Company.

Substantially all of the Company's accounts receivable result from the sale of natural gas and joint interest billings. The Company sells natural gas, NGLs and oil to fewer than five customers and bills working interest owners for costs related to development of the Company's natural gas properties. The Company does not believe that the loss of any of these customers would have a material adverse effect on the condensed consolidated financial statements because alternative customers are readily available.

Note 14 — Commitments and Contingencies

From time to time, the Company may be subject to various claims, title matters and legal proceedings arising in the ordinary course of business, including environmental contamination claims, personal injury and property damage claims, claims related to joint interest billings and other matters under natural gas operating agreements and other contractual disputes. The Company maintains general liability and other insurance to cover some of these potential liabilities. All known liabilities are fully accrued based on the Company's best estimate of the potential loss. While the outcome and impact on the Company cannot be predicted with certainty, the Company believes that its ultimate liability with respect to any such matters will not have a significant impact or material adverse effect on its financial positions, results of operations or cash flows. Results of operations and cash flows, however, could be significantly impacted in the reporting periods in which such matters are resolved.

The Company was involved in an arbitration against an operator related to the breach of various provisions of a certain agreement related to the construction and operation of a midstream gathering system. On February 18, 2022, the Company agreed to settle with the operator, and as a result, received payment of $35.0 million to settle all past disputes and agreed to a midstream gathering rate going forward. Of the $35.0 million, $18.1 million was considered collection of accounts receivable, and the remaining $16.9 million is considered a contingent gain and is included in the condensed consolidated statement of operations and comprehensive income (loss) for the nine months ended September 30, 2022, as gain on settlement of litigation.

The Company has volume commitments in the form of gathering, processing, and transportation agreements with various third parties that require delivery of 883,990,368 dekatherms of natural gas. The

majority of the agreements terminate by 2026, with one agreement extending through 2036. As of September 30, 2022, the aggregate undiscounted future payments required under these contracts total $242.1 million. The Company expects to fulfill the commitments from existing productive wells.

The Company has committed to spend $3.5 million on a field compression related capital project by December 31, 2022.

As a part of the consideration paid for the Devon Barnett Acquisition, additional cash consideration will be required to be paid if certain hurdle rates are reached related to future average closing Henry Hub natural gas and West Texas Intermediate crude oil prices during the period beginning January 2021 through December 31, 2024. During the nine months ended September 30, 2022, the Company settled the 2021 portion of the arrangement resulting in a payment of $65.0 million and was paid on January 18, 2022. For the remaining years ending December 31, 2022 through 2024, average Henry Hub natural gas hurdle rates are $3.00/MMBTU, $3.25/MMBTU and $3.50/MMBTU, respectively; average West Texas Intermediate crude oil hurdle rates for the years ending December 31, 2022 through 2024 are $55.00/BBL, $60.00/BBL, and $65.00/BBL, respectively. The maximum amount payable under the arrangement is $195.0 million, or $65.0 million per year, for the years ending December 31, 2022-2024. Payments are due in the month following the end of the respective measurement period for which the hurdle rates are set. As described in *Note 4 — Fair Value Measurements*, management uses NYMEX forward pricing estimates for both Henry Hub and West Texas Intermediate hurdle rates and Monte Carlo simulations to determine the fair value of the contingent consideration. As of September 30, 2022 and December 31, 2021, the Company's estimate of the fair value of the unsettled contingent consideration was $172.7 million and $142.5 million, respectively. The change in the fair value of the contingent consideration for the three months ended September 30, 2022 and 2021 was a decrease of $1.7 million and an increase of $78.0 million, respectively, and increases of $30.2 million and $193.4 million for the nine months ended September 30, 2022 and 2021, respectively. This change impacted the associated liability on the condensed consolidated balance sheets as of September 30, 2022, respectively, and recognition of loss or gain, in the gain (loss) on contingent consideration liabilities on the condensed consolidated statements of operations and comprehensive income (loss), respectively.

In conjunction with the Exxon Barnett Acquisition (see *Note 2 — Acquisition)* additional cash consideration will be required to be paid by the Company if thresholds are met for future Henry Hub for the years ended December 31, 2023, and 2024. Henry Hub payouts and thresholds are as follows for the year ended December 31, 2023 : $4.00/MMBTU $10.0 million, $4.50/MMBTU $17.5 million, and $5.00/MMBTU $25.0 million. Henry Hub payouts and thresholds are as follows for the year ended December 31, 2024: $3.75/MMBTU $10.0 million, $4.25/MMBTU $17.5 million, and $4.75/MMBTU $25.0 million. Payments of the additional cash consideration are due as of January 31, of the calendar year following the applicable threshold measurement periods.The fair value of the contingent consideration as of the acquisition date of June 30, 2022, and as of September 30, 2022 was $17.2 million and $18.1 million, respectively. The change in the fair value of the contingent consideration for the three and nine months ended September 30, 2022 was $0.9 million increasing the associated liability on the condensed consolidated balance sheet and recognition of loss in the gain (loss) on contingent consideration liabilities on the condensed consolidated statement of operations and comprehensive income (loss). Refer to *Note 4 — Fair Value Measurements* for the valuation methodology and associated inputs.

On August 22, 2022, the Company entered into a management services agreement with Verde CO2 CCS, LLC ("Verde CO2") to provide general administrative and management services for carbon capture projects to BKVerde. Pursuant to the management services agreement, the Company is required to make fixed quarterly payments to Verde CO2 of $2.0 million, which payments began in August 2022 and end in February 2024. During this time period Verde CO2 will facilitate the administration and development of carbon capture projects.

A summary of the Company's commitments, excluding contingent consideration, as of September 30, 2022, is provided in the following table:

(in thousands)	2022	2023	2024	2025	2026	Thereafter	Total
Term loan payments	$ —	$114,000	$114,000	$114,000	$114,000	$114,000	$ 570,000
Credit facilities	130,000	—	—	—	—	—	130,000
Interest payable	12,057	—	—	—	—	—	12,057
Notes payable to related party	—	—	—	—	—	75,000	75,000
Interest on related party notes	2,795	—	—	—	—	—	2,795
BKVerde management fees	2,000	8,000	1,333	—	—	—	11,333
Lease payments	2,952	1,517	1,029	972	848	1,664	8,982
Capital commitment	3,500	—	—	—	—	—	3,500
Volume commitments	16,531	58,002	42,112	22,323	20,538	82,544	242,050
Total	$169,835	$181,519	$158,474	$137,295	$135,386	$273,208	$1,055,717

Note 15 — Income Taxes

The effective tax rates for the three and nine months ended September 30, 2022 were 22.9% and (2.0%), respectively, and 23.0% and 23.0% for the three and nine months ended September 30, 2021. The effective tax rates differ from the U.S. statutory federal income tax rate of 21.0% primarily due to state taxes. Additionally, for the nine months ended September 30, 2022, the decrease in the tax rate was primarily due to the recording of a bargain purchase gain on the Exxon Barnett Acquisition, which was nontaxable.

Note 16 — Earnings Per Share

Basic net income or (loss) and comprehensive income or (loss) per common share is calculated by dividing net income or (loss) available to common stockholders of the Company by the basic weighted average number of common shares outstanding for the respective period. Diluted net income (loss) and comprehensive income (loss) per common share is calculated by dividing net income (loss) available to common stockholders of the Company by the diluted weighted average number of common shares outstanding for the respective period. Diluted weighted average number of common shares outstanding and the dilutive effect of potential common shares is calculated using the treasury method for RSUs or if converted method for preferred stock. The Company includes potential shares of common stock for PRSUs in the calculation of diluted weighted average shares outstanding based on the number of common shares that would be issuable if the end of the reporting period was also the end of the performance period. During periods in which the Company incurred a net loss, diluted weighted average common shares outstanding were equal to basic weighted average of common shares outstanding because the effects of all potential common shares was anti-dilutive.

The following is a reconciliation of the Company's basic weighted average number of common shares outstanding to the diluted weighted average number of common shares outstanding:

	Three Months Ended September 30,		Nine Months Ended September 30,	
(in thousands)	2022	2021	2022	2021
Basic weighted average common shares outstanding	117,326	116,978	117,316	117,027
Add: dilutive effect of TRSUs	806	—	654	—
Add: dilutive effect of PRSUs	9,212	—	6,627	—
Diluted weighted average of common shares outstanding	127,344	116,978	124,597	117,027
Weighted average number of outstanding securities excluded from the calculation of diluted loss and comprehensive loss per share				
TRSUs	—	83	—	395
PRSUs	—	2,519	—	1,389
Preferred stock	—	33,109	—	33,927

Note 17 — Subsequent Events

The Company has evaluated its subsequent events occurring after September 30, 2022 through November 18, 2022, which represents the date the condensed consolidated financial statements were available to be issued. All such subsequent events are discussed with their relevant section within these notes to the condensed consolidated financial statements. No further subsequent events have been identified.

Report of Independent Auditors

To the Management of XTO Energy Inc.

Opinion

We have audited the accompanying statements of revenues and direct operating expenses of the Barnett Assets of XTO Energy Inc. and Barnett Gathering, LLC (the "Company"), for the years ended December 31, 2021 and 2020, including the related notes (referred to as the "statements of revenues and direct operating expenses").

In our opinion, the accompanying statements of revenues and direct operating expenses present fairly, in all material respects, the revenues in excess of direct operating expenses of the Company for the years ended December 31, 2021 and 2020 in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (US GAAS). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Statements of Revenues and Direct Operating Expenses section of our report. We are required to be independent of the Company and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Emphasis of Matter

The accompanying statements of revenues and direct operating expenses were prepared in connection with XTO Energy Inc. and Barnett Gathering LLC's divesture of the Barnett Assets and, as described in Note 1, were prepared for the purpose of complying with the rules and regulations of the Securities and Exchange Commission. The statements of revenues and direct operating expenses are not intended to be a complete presentation of the financial position, results of operations or cash flows of the Barnett Assets of XTO Energy Inc. and Barnett Gathering LLC. Our opinion is not modified with respect to this matter.

Responsibilities of Management for the Statements of Revenues and Direct Operating Expenses

Management is responsible for the preparation and fair presentation of the statements of revenues and direct operating expenses in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of the statements of revenue and direct operating expenses that are free from material misstatement, whether due to fraud or error.

In preparing the statements of revenues and direct operating expenses, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern for one year after the date the statements of revenues and direct operating expenses are available to be issued.

Auditors' Responsibilities for the Audit of the Statements of Revenues and Direct Operating Expenses

Our objectives are to obtain reasonable assurance about whether the statements of revenues and direct operating expenses as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not

absolute assurance and therefore is not a guarantee that an audit conducted in accordance with US GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the statements of revenues and direct operating expenses.

In performing an audit in accordance with US GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the statements of revenues and direct operating expenses, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the statements of revenues and direct operating expenses.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the statements of revenue and direct operating expenses.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

BARNETT ASSETS

NOTES TO THE STATEMENTS OF REVENUES AND DIRECT OPERATING EXPENSES
Years Ended December 31, 2021 and 2020 and Six Months Ended June 30, 2022 and 2021
(unaudited)

Note 1 — Basis of Presentation

XTO Energy Inc. and Barnett Gathering, LLC (together, the "Company"), wholly-owned subsidiaries of ExxonMobil Corporation owned oil and gas properties located in the Barnett Shale/Fort Worth Basin (the "Properties"), consisting of approximately 160,000 net acres, 2700 gross wells, and certain midstream gathering infrastructure. On May 18, 2022, the Company entered into a purchase and sale agreement with BKV North Texas, LLC and BKV Midstream, LLC (together, "BKV" or the "Buyer"), under which BKV agreed to acquire the Properties from the Company in a cash transaction for aggregate consideration of $750.0 million, subject to customary closing purchase price adjustments and certain additional contingent payments. The transaction closed on June 30, 2022.

The Statements of Revenues and Direct Operating Expenses (the "Statements") have been derived from the historical financial records of the Company, which represent their interests in revenues and expenses associated with the Properties, and were not accounted for as a separate subsidiary or division during the periods presented. Accordingly, a complete set of financial statements required by Regulation S-X, including a balance sheet and cash flow statement, prepared under U.S. generally accepted accounting principles ("GAAP") is not available or practicable to prepare for the Properties.

The Statements are not intended to be a complete presentation of the results of operations of the Properties as they do not include depreciation, depletion and amortization, accretion of asset retirement obligations, general and administrative expenses, interest expense, and income taxes. These costs are excluded because they are either not comparable to future operations, or they were not separately allocated to the Properties in the Company's historical accounting records. In addition to these exclusions, the Statements may not be representative of future operations due to potential changes in the business of the Buyer.

The accompanying Statements for the six months ended June 30, 2022 and 2021 are unaudited. The unaudited interim Statements have been prepared on the same basis as the annual Statements. In the opinion of management, such unaudited interim statements reflect all adjustments necessary for fair statement of the revenues and direct operating expenses of the Properties.

Note 2 — Use of Estimates in Preparation of the Statements

The preparation of these Statements requires management to make estimates and assumptions that affect the reported amounts of revenues and direct operating expenses during the respective reporting periods. Actual results may differ from the estimates and assumptions used in the preparation of the Statements.

Note 3 — Revenue Recognition

The Company generally sells crude oil and natural gas under short-term agreements at prevailing market prices. In some cases (e.g., natural gas), products may be sold under long-term agreements, with periodic price adjustments to reflect market conditions. Revenue is recognized at the amount the Company expects to receive when the customer has taken control, which is typically when title transfers and the customer has assumed the risks and rewards of ownership. The prices of certain sales are based on price indices that are sometimes not available until the next period. In such cases, estimated realizations are accrued when the sale is recognized, and are finalized when the price is available. Such adjustments to revenue from performance obligations satisfied in previous periods are not significant. Payment for revenue transactions is typically due within 30 days. Future volume delivery obligations that are unsatisfied at the end of the period are expected to be fulfilled through ordinary production or purchases. These performance obligations are based on market prices at the time of the transaction and are fully constrained due to market price volatility.

Note 4 — Direct Operating Expenses

Direct operating expenses are recognized when incurred and consist of direct operating expenses of the Properties. The direct operating expenses include lease operating expenses and deductions. Lease operating

BARNETT ASSETS

NOTES TO THE STATEMENTS OF REVENUES AND DIRECT OPERATING EXPENSES
Years Ended December 31, 2021 and 2020 and Six Months Ended June 30, 2022 and 2021
(unaudited) (continued)

expenses include lifting costs, well repair expenses, facility maintenance expenses, well workover costs, and other field-related expenses. Lease operating expenses also include overhead and expenses directly associated with support personnel, support services, equipment, and facilities directly related to oil and gas production activities. Other deductions include cost of goods sold such as gathering and transportation expenses, and purchases of third party gas. Deductions also include the associated production taxes and property taxes associated with the Properties.

Note 5 — Subsequent Events

The Company has evaluated subsequent events through September 12, 2022, the date the Statements of Revenues and Direct Operating Expenses were available to be issued, and has concluded that no events need to be reported.

BARNETT ASSETS

SUPPLEMENTAL OIL AND GAS INFORMATION (UNAUDITED)

Estimated Quantities of Proved Oil, Natural Gas, and NGL Reserve Quantities

Estimated quantities of proved natural gas, NGL and oil reserves at December 31, 2021, and December 31, 2020 and changes in the reserves during each period for the Properties, are shown below. For the years ended December 31, 2021 and 2020 all reserves are proved developed.

These estimates have been prepared in accordance with SEC regulations regarding oil and natural gas reserve reporting using the average price during the trailing 12-month period, determined as an unweighted average of the first-day-of-the-month price for each month.

Estimates of proved natural gas, NGL and oil reserves have been completed in accordance with professional engineering standards. The estimates of proved natural gas, NGL and oil reserves were prepared by the Buyer's petroleum engineers for the years ended December 31, 2021 and 2020. Those proved reserves estimates were calculated by adding back production (rolled back) and adjusting for pricing from a reserve report prepared by Ryder Scott Company L.P., an independent petroleum consulting firm engaged by the Buyer, as of June 30, 2022, as this method was deemed to provide the best estimates based on information available.

	Natural Gas (MMcf)	NGL (MBbls)	Oil (MBbls)	Total (MMcfe)
January 1, 2020	965,033	18,703	189	1,078,385
Revision of previous estimates [1]	(217,748)	(4,441)	(45)	(244,664)
Production	(85,388)	(1,435)	(19)	(94,112)
December 31, 2020	661,897	12,827	125	739,609
Revision of previous estimates [2]	359,153	6,807	77	400,457
Production	(74,076)	(1,283)	(18)	(81,882)
December 31, 2021	946,974	18,351	184	1,058,184

(1) The downward revisions of previous estimates of 244,664 MMcfe for the year ended December 31, 2020 were the result of lower product pricing.

(2) The upward revisions of previous estimates of 400,457 MMcfe for the year ended December 31, 2021 were the result of higher commodity prices and improved well performance.

BARNETT ASSETS

SUPPLEMENTAL OIL AND GAS INFORMATION (UNAUDITED) (continued)

Standardized Measure of Discounted Future Net Cash Flows

The Buyer prepared the following summary which sets forth the Buyer's future net cash flows relating to proved natural gas, NGL and oil reserves based on the standardized measure for the years ended December 31, 2021 and 2020. As discussed in Note 1 Basis of Preparation, the effects of federal income taxes are not included in the accompanying Statements, and similarly are not included in the standardized measure presented.

Future cash flows (in thousands)	As of December 31, 2021	2020
Future estimated revenues[1]	$ 2,724,244	$ 686,798
Future estimated production costs[2]	(1,190,931)	(508,748)
Future estimated development costs[2]	(121,966)	(122,467)
Future income tax expense[3]	(14,302)	(3,606)
Future net cash flows	1,397,045	51,977
10% annual discount for estimated timing of cash flows	(688,067)	(25,602)
Standardized measure of discounted future net cash flows related to proved reserves	$ 708,978	$ 26,375

(1) In accordance with SEC regulations regarding oil and natural gas reserve reporting, reserves were estimated using the average price during the trailing 12-month period, determined as an unweighted average of the first-day-of-the-month price for each month.

(2) Future production, development, site restoration and abandonment costs are derived based on current costs assuming continuation of existing economic conditions.

(3) As stated above, no provisions for future federal income taxes were included; however, provisions for future obligations under the Texas gross margin tax are included.

BARNETT ASSETS

SUPPLEMENTAL OIL AND GAS INFORMATION (UNAUDITED) (continued)

The following table summarizes the changes in the Standardized Measure of discount future net cash flows:

	For the Years Ended December 31,	
(in thousands)	**2021**	**2020**
Balance, beginning of period	$ 26,375	$ 341,528
Net change in sales and transfer prices and in production (lifting) costs related to future production	574,114	(179,269)
Changes in estimated future development costs	148	(782)
Sales and transfers of natural gas, NGLs and oil produced during the period	(188,565)	(62,952)
Net change due to revisions in quantity estimates	278,939	(104,659)
Net change in future income taxes	(4,558)	2,402
Accretion of discount	2,815	34,571
Changes in timing and other	19,710	(4,464)
Total discounted cash flow as end of period	$ 708,978	$ 26,375

The data presented should not be viewed as representing the expected cash flow from, or current value of, existing proved reserves since the computations involve significant estimates and judgments. The required projection of production and related expenditures over time requires further estimates with respect to pipeline availability, rates of demand and governmental control. Actual future prices and costs are likely to be substantially different from the prices and costs utilized in the computation of reported amounts above. Any analysis or evaluation of the reported amounts should give specific recognition to the computational methods utilized and the limitations inherent therein.

PART II INFORMATION

INFORMATION NOT REQUIRED IN PROSPECTUS

Item 13. Other Expenses of Issuance and Distribution.

The following table sets forth the various expenses, other than underwriting discounts and commissions, payable by us in connection with the offering of our common stock contemplated by this registration statement. All of the fees set forth below are estimates, except for the SEC registration fee, the Financial Industry Regulatory Authority, Inc. ("FINRA") filing fee and the NYSE listing fee.

SEC registration fee	$11,020
FINRA filing fee	15,500
NYSE listing fees	*
Transfer agent and registrar fees and expenses	*
Printing fees and expenses	*
Legal fees and expenses	*
Accounting fees and expenses	*
Miscellaneous	*
Total	$ *

* To be provided by amendment.

Item 14. Indemnification of Directors and Officers.

Our certificate of incorporation will provide that directors and officers will not be liable to the Company or its stockholders for monetary damages to the fullest extent permitted by the DGCL. In addition, if the DGCL is amended to authorize the further elimination or limitation of the liability of directors and officers, then the liability of a director or officer of the Company, in addition to the limitation on personal liability provided for in our certificate of incorporation, will be limited to the fullest extent permitted by the amended DGCL. Our bylaws will provide that the Company will indemnify, and advance expenses to, any officer or director to the fullest extent authorized by the DGCL.

Section 145 of the DGCL provides that a corporation may indemnify directors and officers as well as other employees and individuals against expenses, including attorneys' fees, judgments, fines and amounts paid in settlement in connection with specified actions, suits and proceedings whether civil, criminal, administrative, or investigative, other than a derivative action by or in the right of the corporation, if they acted in good faith and in a manner they reasonably believed to be in or not opposed to the best interests of the corporation and, with respect to any criminal action or proceeding, had no reasonable cause to believe their conduct was unlawful. A similar standard is applicable in the case of derivative actions, except that indemnification extends only to expenses, including attorneys' fees, incurred in connection with the defense or settlement of such action and the statute requires court approval before there can be any indemnification where the person seeking indemnification has been found liable to the corporation. The statute provides that it is not exclusive of other indemnification that may be granted by a corporation's certificate of incorporation, bylaws, disinterested director vote, stockholder vote, agreement or otherwise.

Our certificate of incorporation will also contain indemnification rights for our directors and our officers. Specifically, our certificate of incorporation will provide that we shall defend, indemnify and advance expenses to our officers and directors to the fullest extent authorized by the DGCL. Further, we may maintain insurance on behalf of our officers and directors against expense, liability or loss asserted incurred by them in their capacities as officers and directors.

In addition, we intend to enter into indemnification agreements, to be effective upon the completion of this offering, with our current directors and officers containing provisions that are in some respects broader than the specific indemnification provisions contained in the DGCL. The indemnification agreements will

require us, among other things, to indemnify our directors and officers against certain liabilities that may arise by reason of their status or service as directors or officers and to advance their expenses incurred as a result of any proceeding against them as to which they could be indemnified. We also intend to enter into indemnification agreements with our future directors and officers.

We intend to maintain liability insurance policies that indemnify our directors and officers against various liabilities, including certain liabilities arising under the Securities Act or the Exchange Act that may be incurred by them in their capacity as such.

The proposed form of Underwriting Agreement to be filed as Exhibit 1.1 to this registration statement provides for indemnification of our directors and officers by the underwriters against certain liabilities arising under the Securities Act or otherwise in connection with this offering.

Insofar as indemnification for liabilities arising under the Securities Act may be permitted to directors, officers or persons controlling us pursuant to the foregoing provisions, we have been informed that in the opinion of the SEC, such indemnification is against public policy as expressed in the Securities Act and is therefore unenforceable.

Item 15. Recent Sales of Unregistered Securities.

In the three years preceding the filing of this registration statement, we have issued the following unregistered securities.

Corporatization Event

The information set forth in "*Business — Our History — The Corporatization Event*" of the prospectus is incorporated herein by reference. On May 1, 2020, as part of the Corporatization Event, the Company issued 92,700,000 shares of its common stock in exchange for a contribution by the partners of BKV O&G of all of the partnership interests in BKV O&G and 2,000,000 shares of its common stock in exchange for a contribution by the members of Kalnin Ventures of all of the membership interests in Kalnin Ventures. The foregoing issuances were made under an exemption from registration provided by Section 4(a)(2) of the Securities Act, and no underwriters were involved in these transactions.

Other Equity Issuances

On October 1, 2020, the Company issued 22,284,000 shares of its common stock to an existing investor, BNAC, for $222.8 million. The foregoing issuance was made under an exemption from registration provided by Section 4(a)(2) of the Securities Act, and no underwriters were involved in this transaction.

On December 15, 2020, the Company issued 100,000 shares of its common stock to a new investor, OCM BKV Holdings, LLC, an affiliate of Oaktree Capital Management L.P., for $1.0 million, net of associated costs. These shares were issued in connection with the issuance of 9,900,000 shares of Series A Redeemable Preferred Stock, par value $10.00 per share, of the Company (the "Series A preferred stock"), to the same investor in a private placement for $99.0 million. The foregoing issuances were made under an exemption from registration provided by Section 4(a)(2) of the Securities Act and Rule 506(b) of Regulation D promulgated thereunder, and no underwriters were involved in these transactions. The Company redeemed a portion of such shares of Series A preferred stock in May 2021 and the remainder in October 2021.

2021 Plan Issuances

From January 1, 2021 through December 31, 2021, performance restricted stock units (PRSUs) were legally granted under the 2021 Plan, which, assuming vesting at maximum payout, would result in the vesting of 12,256,502 shares of the Company's common stock, and 656,595 time restricted stock units (TRSUs) were legally granted, of which 164,112 TRSUs were vested at the time of grant and 155,098 TRSUs have since vested. From December 31, 2021 and through the date of this registration statement, additional PRSUs were legally granted, which, assuming vesting at maximum payout, would result in the vesting of 466,200 shares of the Company's common stock, and 645,760 TRSUs were legally granted, of which 161,398 TRSUs were vested as of the date of this registration statement. Such awards under the 2021 Plan were granted to employees and directors of the Company or its subsidiaries. The foregoing issuances were made under an

exemption from registration provided by either (i) Rule 701 under the Securities Act as transactions pursuant to compensatory benefit plans and contracts relating to compensation; or (ii) Section 4(a)(2) of the Securities Act as transactions by an issuer not involving any public offering. Any outstanding and unvested PRSUs and TRSUs will vest in connection with this offering.

2020 ESPP Issuances

In December 2021, the Company issued 287,209 shares of its common stock through sales under the 2020 ESPP and received proceeds of approximately $3.2 million from such sales. In April 2022, the Company issued 5,125 shares of its common stock through sales under the 2020 ESPP and received proceeds of $78,310 from such sales. Such sales under the 2020 ESPP were made to certain employees and directors of the Company. The foregoing issuances were made under an exemption from registration provided by either (i) Rule 701 under the Securities Act as transactions pursuant to compensatory benefit plans and contracts relating to compensation; or (ii) Section 4(a)(2) of the Securities Act as transactions by an issuer not involving any public offering.

Item 16. Exhibits and Financial Statement Schedules.

(a) Exhibits: The list of exhibits set forth under "*Exhibit Index*" at the end of this registration statement is incorporated herein by reference.

Item 17. Undertakings.

The undersigned registrant hereby undertakes to provide to the underwriters at the closing specified in the Underwriting Agreement certificates in such denominations and registered in such names as required by the underwriters to permit prompt delivery to each purchaser.

Insofar as indemnification for liabilities arising under the Securities Act may be permitted to directors, officers and controlling persons of the registrant pursuant to the foregoing provisions, or otherwise, the registrant has been advised that in the opinion of the SEC such indemnification is against public policy as expressed in the Securities Act and is, therefore, unenforceable. In the event that a claim for indemnification against such liabilities (other than the payment by the registrant of expenses incurred or paid by a director, officer or controlling person of the registrant in the successful defense of any action, suit or proceeding) is asserted by such director, officer or controlling person in connection with the securities being registered, the registrant will, unless in the opinion of its counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by it is against public policy as expressed in the Securities Act and will be governed by the final adjudication of such issue.

The undersigned registrant hereby undertakes that:

(1) For purposes of determining any liability under the Securities Act, the information omitted from the form of prospectus filed as part of this registration statement in reliance upon Rule 430A and contained in a form of prospectus filed by the registrant pursuant to Rule 424(b)(1) or (4) or 497(h) under the Securities Act shall be deemed to be part of this registration statement as of the time it was declared effective.

(2) For the purpose of determining any liability under the Securities Act, each post-effective amendment that contains a form of prospectus shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof.

EXHIBIT INDEX

Exhibit Number	Description
1.1*	Form of Underwriting Agreement
2.1+‡	Purchase and Sale Agreement, dated December 17, 2019, between Devon Energy Production Company, L.P. and BKV Barnett, LLC
2.2+	First Amendment to Purchase and Sale Agreement, dated April 13, 2020, among Devon Energy Production Company, L.P., BKV Barnett, LLC and, solely with respect to the sections listed therein, BKV Oil & Gas Capital Partners, L.P.
2.3+	Purchase and Sale Agreement, dated May 18, 2022, between XTO Energy Inc., Barnett Gathering, LLC, BKV North Texas, LLC and BKV Midstream, LLC
3.1	Amended and Restated Certificate of Incorporation of BKV Corporation, as currently in effect

Execution Version

PURCHASE AND SALE AGREEMENT
BY AND BETWEEN
DEVON ENERGY PRODUCTION COMPANY, L.P.
AS SELLER,
AND
BKV BARNETT, LLC
AS BUYER,
EXECUTED ON DECEMBER 17, 2019

TABLE OF CONTENTS

LIST OF APPENDICES, EXHIBITS AND SCHEDULES

PURCHASE AND SALE AGREEMENT

THIS PURCHASE AND SALE AGREEMENT (as the same may be amended, restated, supplemented or otherwise modified from time to time in accordance herewith, this "***Agreement***") is entered into this 17th day of December, 2019 (the " ***Execution Date***"), between Devon Energy Production Company, L.P., an Oklahoma limited partnership ("***Seller***"), and BKV Barnett, LLC, a Delaware limited liability company (" ***Buyer***"). Buyer and Seller may be referred to collectively as the "***Parties***" or individually as a "***Party.***"

Recitals

Seller desires to sell and assign, and Buyer desires to purchase and pay for, all of the Conveyed Interests (as defined hereinafter) effective as of the Effective Time (as defined hereinafter).

NOW, THEREFORE, for and in consideration of the mutual agreements set forth in this Agreement, the benefits to be derived by each Party, and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties hereby agree as follows:

ARTICLE I
DEFINITIONS AND INTERPRETATION

1.1 ***Defined Terms***. Capitalized terms used in this Agreement shall have the meanings given such terms in *Appendix I*, unless the context otherwise requires.

1.2 ***References and Rules of Construction***. All references in this Agreement to Exhibits, Appendices, Schedules, Articles, Sections, subsections and other subdivisions refer to the corresponding Exhibits, Appendices, Schedules, Articles, Sections, subsections and other subdivisions of or to this Agreement unless expressly provided otherwise. Titles appearing at the beginning of any Exhibits, Appendices, Schedules, Articles, Sections, subsections and other subdivisions of this Agreement are for convenience only, do not constitute any part of this Agreement, and shall be disregarded in construing the language hereof. The words "this Agreement," "herein," "hereby," "hereunder," and "hereof," and words of similar import, refer to this Agreement as a whole and not to any particular Article, Section, subsection or other subdivision unless expressly so limited. The words "this Article," "this Section," and "this subsection," and words of similar import, refer only to the Article, Section or subsection hereof in which such words occur. The word "including" (in its various forms) means including without limitation. All references to "$" or "dollars" shall be deemed references to United States dollars. Each accounting term not defined in this Agreement, and each accounting term partly defined in this Agreement, to the extent not defined, will have the meaning given to it under GAAP. Pronouns in masculine, feminine or neuter genders shall be construed to state and include any other gender, and words, terms and titles (including terms defined in this Agreement) in the singular form shall be construed to include the plural and vice versa, unless the context otherwise requires. References to any agreement (including this Agreement, any Unit Agreement, and any Applicable Contract) shall mean such agreement as it may be amended, restated, supplemented or otherwise modified from time to time. References to any date shall mean such date in Oklahoma City, Oklahoma and for purposes of calculating the period of time in which any notice or action is to be given or undertaken hereunder, such period shall be deemed to begin at 12:01 A.M. on the applicable date in Oklahoma City, Oklahoma.

ARTICLE II
PURCHASE AND SALE

2.1 ***Purchase and Sale***. Subject to the terms and conditions of this Agreement, Seller agrees to sell, and solely with respect to the interests, rights and properties described in *Sections 2.1(e)*, *2.1(f)*, *2.1(i)*, *2.1(k)*, *2.1(l)*, *2.1(n)*, *2.1(o)*, *2.1(p)*, *2.1(r)*, *2.1(s)*, *2.1(t)*, *2.1(u)*, *2.1(x)*, *2.1(y)*, *2.1(z)*, *2.1(aa)*, *2.1(bb)* and *2.1(cc)*, in whole or in part, to cause its applicable Affiliates to sell, and Buyer agrees to purchase and pay for, effective as of the Effective Time, all of Seller's and such Affiliates' right, title, interest and estate, whether legal, equitable, present, contingent or reversionary, in and to the assets, interests, rights, and properties described in this *Section 2.1* (without duplication) (such right, title and interest, less and except the Excluded Assets and Other Matters, collectively, the "***Conveyed Interests***"):

(a) all oil, gas and/or mineral leases located within, covering or otherwise attributable to any of the Lands, including (but not limited to) all of the oil and gas leases described on *Exhibit A*, whether producing or non-producing, developed or undeveloped, together with (i) all amendments, renewals, extensions or ratifications thereof and all top leases thereof or covering the lands covered thereby and (ii) any and all other right, title, interest and estate of Seller or any of its Affiliates in and to the leasehold estates created thereby (including, in each case, all overriding royalty interests, production payments, net profits interests, carried interests, reversionary interests, and all other similar interests, but excluding the Non-Cost Bearing Interests), as to all depths and formations owned by Seller or its Affiliates, but subject to the terms, conditions, covenants, and obligations set forth in those leases and/or matters described on *Exhibit A* as applicable (each, a "***Lease***" and, collectively, the "***Leases***");

(b) all oil and gas wells located on any of the Lands (other than the Excluded Wells), whether producing, non-producing, plugged and abandoned, temporarily abandoned, or otherwise, including the wells described on *Exhibit B* (collectively, the "***Wells***");

(c) (i) the fee simple mineral interests in and covering the Lands, including all fee simple mineral interests described on *Exhibit C-1* (collectively, the "***Fee Minerals***") and (ii) the overriding royalty interests, non-participating royalty interests and other similar non-cost bearing interests (other than Fee Minerals) described on *Exhibit C-2* (collectively, the "***Non-Cost Bearing Interests***"), but, in the case of each of (i) and (ii), subject to the terms, conditions, covenants, limitations, and obligations of the oil and gas leases and other public real estate records maintained by the county clerk of the county in which the applicable Lands covered by those interests are located, including those that are more particularly identified and described on *Exhibit C-3*;

(d) all rights and interests in, under or derived from all spacing, pooling, production sharing, production allocation, unitization and communitization agreements, declarations and orders in effect with respect to any of the Lands, the Leases, the Wells, the Fee Minerals or the Non-Cost Bearing Interests, and the units created or designated by any of those agreements, declarations or orders (such unit agreements, the "***Unit Agreements***," and such units, the "***Units***") (Seller's and its Affiliates' right, title, interest and estate in and to the Leases, the Wells, the Fee Minerals, the Non-Cost Bearing Interests and the Units being collectively referred to hereinafter as the "***Properties***" or individually as a "***Property***");

(e) (i) (A) all Hydrocarbons produced from or allocated to the Properties from and after the Effective Time, or any combination thereof, including Hydrocarbons extracted therefrom, whether such production comes from wells located on or off the Properties and (B) all Hydrocarbons produced from or allocated to the Properties that are in storage or existing in stock tanks, pipelines and/or plants as of the Effective Time (including inventory and line fill), less any volumes of Hydrocarbons sold during the Interim Period (with respect to *clause (B)*, together with the DGS Storage Volumes, as set forth on *Schedule 2.1(e)*, the "***Hydrocarbons in Storage***"), (ii) all minerals (whether in liquid or gaseous form) produced in association with the Hydrocarbons produced from or allocated to the Properties from and after the Effective Time, and (iii) all proceeds with respect to the foregoing;

(f) all right, title and interest in all Hydrocarbons in storage pursuant to the Storage Agreement (the "***DGS Storage Volumes***");

(g) all injection, disposal, observation, water, and other wells located on the Lands (other than the Wells and the Excluded Wells), whether, plugged and abandoned, temporarily abandoned, or otherwise, including the wells described on *Exhibit D* (collectively, the "***Other Wells***");

(h) the fee simple surface estate in and covering each tract of land described on *Exhibit E-1* and all improvements, fixtures, field offices, facilities and appurtenances located thereon, but subject to the terms, conditions, covenants, limitations, and obligations reflected in the real estate records maintained by the county clerk of the county in which the applicable tracts are located (collectively, the "***Surface Fee Interests***");

(i) all of DGS's interest in the fee simple surface estate in and covering each tract of land described on *Exhibit E-2* and all improvements, fixtures, field offices, facilities and appurtenances located thereon, but subject to the terms, conditions, covenants, limitations, and obligations reflected in the real estate records maintained by the county clerk of the county in which the applicable tracts are located (collectively, the "***DGS Surface Fee Interests***");

(j) all pipelines and gathering systems, including salt water disposal pipelines located at, on or under any of the Lands, including the pipelines, gathering systems and salt water disposal systems described on *Exhibit F-1* (collectively, the "***Pipeline Systems***");

(k) all of SWGP's interest in all pipelines and gathering systems, including salt water disposal pipelines located at, on or under any of the Lands, including the pipelines, gathering systems and salt water disposal systems described on *Exhibit F-2* (collectively, the "***SWGP Pipeline Systems***");

(l) all of DGS's interest in all pipelines and gathering systems, including salt water disposal pipelines located at, on or under any of the Lands (collectively, the "***DGS Pipeline Systems***" and, together with the Pipeline Systems, SWGP Pipeline Systems and Water Disposal JV Interests, collectively, the "***Midstream Facilities***");

(m) all surface and/or subsurface leases, rights-of-way and easements, rights of ingress and egress, surface servitudes, surface permits, surface licenses, and other surface usage rights covering or pertaining to the Lands, the Properties or appurtenant to or used in connection with (i) the ownership or development of the Properties, Leases and the Units, or the installation, drilling, completion, reworking, recompletion, ownership, development, operation, use or maintenance of the Wells, the Other Wells, the Pipeline Systems, and/or the Personal and Other Property, or (ii) the production, treatment, storage, gathering, processing, transportation or disposal of Hydrocarbons or other produced substances from or attributable to the Properties, the Wells, the Units, the Fee Minerals, the Leases or the Other Wells, including those surface and/or subsurface leases, rights-of-way and easements described on *Exhibit G-1* (collectively, the "***Rights-of-Way***");

(n) all of SWGP's interest in all surface and/or subsurface leases, rights-of-way and easements, rights of ingress and egress, surface servitudes, surface permits, surface licenses, and other surface usage rights covering or pertaining to the Lands or the Properties appurtenant to or used primarily in connection with (i) the ownership or development of the Leases and the Units or Properties, or the installation, drilling, completion, reworking, recompletion, ownership, development, operation, use or maintenance of the Wells, the Other Wells, the SWGP Pipeline Systems and/or the Personal and Other Property, or (ii) the production, treatment, storage, gathering, processing, transportation or disposal of Hydrocarbons or other produced substances from or attributable to the Wells, the Units, the Fee Minerals, the Leases or the Other Wells or any other Property, including those surface and/or subsurface leases, rights-of-way and easements described on *Exhibit G-2* (collectively, the "***SWGP Rights-of-Way***");

(o) all of DEC's interest in all surface and/or subsurface leases, rights-of-way and easements, rights of ingress and egress, surface servitudes, surface permits, surface licenses, and other surface usage rights covering or pertaining to the Lands or appurtenant to or used primarily in connection with (i) the ownership or development of the Leases and the Units, or the installation, drilling, completion, reworking, recompletion, ownership, development, operation, use or maintenance of the Wells, the Other Wells, the Pipeline Systems and/or the Personal and Other Property, or (ii) the production, treatment, storage, gathering, processing, transportation or disposal of Hydrocarbons or other produced substances from or attributable to the Wells, the Units, the Fee Minerals, the Leases or the Other Wells, including those surface and/or subsurface leases, rights-of-way and easements described on *Exhibit G-3* (collectively, the "***DEC Rights-of-Way***");

(p) all surface and subsurface tangible personal property, fixtures and improvements (including any plants, ponds or pits), operational and non-operational, active or inactive, known or unknown, that are located at, on or under any of the Lands and/or Properties (including any of the following assets that are owned by DEC that are located on the Lands) or located on the DGS Surface Fee Interests to the extent related to the Properties, including, but not limited to, (i)(A) subject to approval of the transfer of the FCC Licenses, the FCC Licenses and any antenna, radio frequency transmitters and associated electronic equipment covered by and/or operated that are subject to such FCC License or that require FCC approval to transfer, (B) excepting the assets and interests described in *clause (A)*, all communication towers, SCADA and measurement technology, in each case, as set forth on *Exhibit H-1* and (C) excepting the assets and interests described in *clause (A)*, all information technology equipment and devices, including desktop computers, networking equipment and any associated peripherals, well communication devices, and any other information technology hardware, (ii) all computers and other tangible personal property located in the field offices, (iii) the vehicles and trailers set forth on *Exhibit H-2* and (iv) all materials, supplies, equipment, machinery, separators, storage facilities, processing, separation, and treatment facilities, casing, tubing, flow lines, lateral lines, associated piping, electric lines, pumps, motors, electric lines, compression equipment and facilities, platforms, pads, rods, tanks, tap connections, fittings, valves, meters and manifolds, pumping units, injection facilities, tanks, saltwater disposal facilities and improvements to any of the foregoing and any other personal property and fixtures related to or used in connection with the Conveyed Interests, excluding such items set forth in *Schedule 2.1(p)* ("***Personal and Other Property***");

(q) the cores and cuttings described on *Exhibit I* (collectively, the "***Transferred Cores***");

(r) all Applicable Contracts and all rights and obligations thereunder, including those Applicable Contracts described on *Schedule 7.7*;

(s) all Imbalances relating to the Conveyed Interests (including Imbalances maintained by DGS);

(t) originals, if available, otherwise copies of all files, records, information, and data in Seller's or its Affiliates' possession or control and to the extent relating to Seller's or its Affiliates' ownership and/or operation of the Conveyed Interests, including all: (i) land files and title records (including abstracts of title, title opinions and title curative documents), lease and land files, surveys, filings with regulatory agencies and other similar documents and records that relate to the Conveyed Interests; (ii) all Applicable Contract files; (iii) operations, production and accounting records; (iv) facility and well records; (v) maps, geological, engineering, exploration, production and other technical data that relates to the Conveyed Interests (excluding any interpretive data or

other technical analysis); and (vi) all other books, records, files and magnetic tapes containing financial or title information that relate to the Conveyed Interests (collectively, the "***Records***");

(u) all claims and causes of action (including claims for adjustments and refunds and settlements thereof) and all proceeds arising from such claims and causes of action, in each case, to the extent (i) attributable to the Conveyed Interests insofar as attributable to the period of time after the Effective Time, and (ii) not attributable to any matter for which Seller is providing indemnification hereunder;

(v) all accounts receivable for which the Purchase Price was adjusted pursuant to *Section 3.3(a)(viii)* or for which Buyer is receiving the benefit hereunder, and all claims, causes of action, and rights under liens related thereto;

(w) all Third Party geophysical and other seismic and related technical data and information relating to the Conveyed Interests, excluding any geologic and geophysical interpretations of Seller or its Affiliates, to the extent such data and information may be assigned without Third Party consent or expenditures beyond tape copying costs and expenses unless Buyer has paid such expenditures and entered into a license agreement with the applicable Third Party licensor thereof;

(x) any asset, property or interest acquired by Seller or any of its Affiliates following the Effective Time that would otherwise constitute a "***Conveyed Interest***" if owned by Seller or any of its Affiliates as of the Effective Time and for which Buyer will assume responsibility for the Post-Effective Time Expenses arising therefrom pursuant to the terms of this Agreement;

(y) all (i) trade credits, accounts receivable, take-or-pay amounts receivable, and other receivables and general intangibles, to the extent attributable to the other Conveyed Interests for periods of time from and after the Effective Time; (ii) liens and security interests in favor of Seller or any of its Affiliates under any Law or Contract to the extent arising from, or relating to, the ownership, operation, or sale or other disposition on or after the Effective Time of any of the other Conveyed Interests or to the extent arising in favor of Seller or any of its Affiliates with respect to any Conveyed Interest or any Assumed Obligation for which Buyer is providing indemnification hereunder; and (iii) indemnity, contribution, and other such rights in favor of Seller or any of its Affiliates arising under any of the Conveyed Interests to the extent attributable to the other Conveyed Interests for periods of time from and after the Effective Time or any Assumed Obligation for which Buyer is providing indemnification hereunder, except, in each case, to the extent relating to any matter for which Seller is providing indemnification hereunder;

(z) all partnership interests of any kind or character in the Tarrant Salt Water Disposal Joint Venture (the "***Water Disposal JV Interests***");

(aa) the Suspense Funds (if, and solely to the extent, the Purchase Price is adjusted downward with respect to such Suspense Funds in accordance with *Sections 3.3(b)(viii)* and *9.8*);

(bb) all audit and other similar rights (including, for purposes of clarity, the right to receive adjustments, refunds or other proceeds related to or payable in connection with the exercise of any such rights) arising under any of the Applicable Contracts or otherwise with respect to any period occurring before, on or after the Effective Time pertaining to any of the other Conveyed Interests, in each case, to the extent not related to matters for which Seller is providing indemnification hereunder;

(cc) all rights, remedies, claims, demands, damages, losses, costs, Liabilities, interest or causes of action whatsoever, at Law or in equity, known or unknown, against any Third Party which Seller or any of its Affiliates might now or subsequently may have, to the extent specifically based upon, relating to or arising out of the Assumed Obligations for which Buyer is providing indemnification hereunder, including rights to contribution under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended, breaches of statutory or implied warranties, nuisance or other tort actions, rights to punitive damages, common Law rights of contribution and all rights and remedies of any kind arising under or with respect to any Applicable Contracts ((i) whether related to periods of time occurring before, on or after the Effective Time and (ii) including audit and other similar rights (including, for purposes of clarity, the right to receive adjustments, refunds or other proceeds related to or payable in connection with the exercise of any such rights)) and, where necessary to give effect to the assignment, conveyance and/or transfer of any of the foregoing, Seller (on its own behalf and on behalf of its applicable Affiliates) grants to Buyer the right to be subrogated thereto, except, in each case, to the extent relating to matters for which Seller is providing indemnification hereunder; and (dd) if acquired by Seller prior to Closing in accordance with *Section 9.14*, the Other Working Interest Owner Interests.

The term "***Subject Properties***," as used in this Agreement, means the 100% interest on an 8/8ths basis in and to the Leases, the Wells, the Fee Minerals, the Non-Cost Bearing Interests, the Units, the Hydrocarbons and minerals described in *Section 2.1(e)* and *Section 2.1(f)*, the Other Wells, the Surface Fee Interests, the DGS Surface Fee Interests, the Pipeline Systems, the SWGP Pipeline Systems, the DGS Pipeline Systems, the Rights-of-Way, the SWGP Rights-of-Way, the DEC Rights-of-Way, and other Midstream Facilities and the Personal and Other Property of which the Conveyed Interests are the whole or a part, as applicable, less and except the Excluded Assets and Other Matters.

2.2 ***Excluded Assets and Other Matters***. Notwithstanding anything in this Agreement to the contrary, the Conveyed Interests do not include, and Seller and its Affiliates shall reserve and retain, all of the Excluded Assets and Other Matters.

2.3 ***Revenues and Expenses***.

(a) Except (i) with respect to the Designated Wells to the extent set forth below in this *Section 2.3(a)* and (ii) as expressly provided otherwise in this Agreement (including *Section 3.3* and *Section 3.6(b)*), Seller shall remain entitled to all of the rights of ownership (including the right to all

production, proceeds of production, and other proceeds) attributable to the Conveyed Interests for the period of time prior to the Effective Time and shall remain responsible (by payment, through the adjustments to the Purchase Price under this Agreement or otherwise) for all Pre-Effective Time Expenses. Except (A) with respect to the Designated Wells to the extent set forth below in this *Section 2.3(a)* and (B) as expressly provided otherwise in this Agreement (including *Section 3.3* and *Section 3.6(b)*), and subject to the occurrence of Closing, Buyer shall be entitled to all of the rights of ownership (including the right to all production, proceeds of production, and other proceeds, but excluding all proceeds for which the Purchase Price is adjusted pursuant to *Section 3.6(b)*), attributable to the Conveyed Interests for the period of time commencing at the Effective Time (including pursuant to the EnLink Agreements to be executed and delivered at Closing), and shall be responsible for (by payment, through the adjustments to the Purchase Price under this Agreement or otherwise) all Post-Effective Time Expenses (including any pre-payments made before the Effective Time for services, work or goods performed or to be performed, or delivered or to be delivered after the Effective Time if, and solely to the extent, such pre-payments (including, for purposes of clarity, the amounts and payees thereof) are identified and set forth (as of the Execution Date) on *Schedule 3.3(a)(ii)*). With respect to the Designated Wells, Buyer shall (1) be responsible (by payment, through the adjustments to the Purchase Price under this Agreement or otherwise) for all Designated Well Costs as described on the authorizations for expenditure set forth on *Schedule 2.3(a)* hereto (the "***Approved AFEs***") irrespective of whether such costs or expenses are incurred prior to, on or after the Effective Time and (2) be entitled to all production, proceeds of production, and other proceeds attributable to the Designated Wells (including, for purposes of clarity, any interest in or to the Designated Wells that is included in, or that constitutes a part of, the Other Working Interest Owner Interests, but only if and to the extent Seller acquires the Other Working Interest Owner Interests prior to Closing in accordance with *Section 9.14*) irrespective of whether such production, proceeds of production, and other proceeds are attributable to the period of time prior to, on or after the Effective Time. The amounts described in this *Section 2.3(a)* which are received or paid prior to Closing shall be accounted for in the Preliminary Settlement Statement or Final Settlement Statement, as applicable; *provided*, *however*, that the Preliminary Settlement Statement may contain estimated amounts in accordance with *Section 3.4*. Such amounts which are received or paid after Closing but prior to the date of the Final Settlement Statement shall be accounted for in the Final Settlement Statement.

(b) Subject to the terms and provisions of this Agreement, Seller shall remain responsible for, and Buyer shall have no responsibility for, nor shall the Purchase Price be adjusted upward for, any amounts actually paid or incurred by or on behalf of Seller or any of its Affiliates in connection with (i) curing, removing, Remediating or remedying (or attempting to cure, remove, Remediate or remedy), as applicable, any Title Defect or any Environmental Defect, (ii) any Specified Obligation for which Seller is providing indemnification hereunder or (iii) obtaining or attempting to obtain any consents or approvals or waivers of any Preferential Purchase Right or Consent (including any Post-Closing Consent, Medium Consent or Required Consent); *provided* that nothing in this sentence shall be construed to require Seller to incur any such amounts. Except as expressly provided otherwise in this Agreement (including *Section 3.3* and *Section 3.6(b)*), after the Parties' agreement upon the Final Settlement Statement and until the second anniversary of the Closing Date, (A) if either Party or any of their respective Affiliates receives monies belonging to the other Party or any of its respective Affiliates, including proceeds or revenues of production, then such amount shall, within 30 days after the end of the calendar month in which such amounts were received, be paid over to the proper Party, (B) if either Party or any of their respective Affiliates pays monies for Operating Expenses which are the obligation of the other Party or any of its respective Affiliates, then such other Party shall, within 30 days after the end of the calendar month in which the applicable invoice and proof of payment of such invoice were received, reimburse the Party which paid (or whose Affiliate paid) such Operating Expenses, (C) if a Party or any of its Affiliates receives an invoice of an expense or obligation (other than an expense or obligation with respect to Asset Taxes (which shall be governed by *Section 15.2*), Income Taxes or Transfer Taxes) which is owed by the other Party or any of its Affiliates, such Party (or its Affiliate) receiving the invoice shall promptly forward such invoice to the Party obligated to pay the same and such Party obligated to pay shall promptly pay such obligation to the obligee thereof, and (D) if an invoice or other evidence of an obligation (other than an obligation with respect to Asset Taxes (which shall be governed by *Section 15.2*), Income Taxes or Transfer Taxes) is received by a Party or any of its Affiliates, which is partially an obligation of both Seller and Buyer (and/or their respective Affiliates), then the Parties shall consult with each other, and each shall promptly pay its portion of such obligation to the obligee thereof.

(c) Each of Seller and Buyer shall be permitted to offset any Operating Expenses owed by such Party to the other Party pursuant to this *Section 2.3* against amounts owing by the second Party to the first Party pursuant to this *Section 2.3*; *provided* that (i) such amounts to be offset are undisputed and liquidated in amount and (ii) written notice of the offset is provided by the offsetting Party to the other Party at least five (5) Business Days prior to such offset.

ARTICLE III
PURCHASE PRICE

3.1 ***Purchase Price***. Subject to the terms and conditions set forth in this Agreement, the purchase price for the transfer of the Conveyed Interests and the transactions contemplated hereby shall be $770,000,000.00 (the "***Purchase Price***"), as adjusted pursuant to this Agreement, and shall be payable by Buyer to Seller in accordance with this Agreement by wire transfer in immediately available funds to a bank account of Seller (the details of which shall be provided by Seller to Buyer in the Preliminary Settlement Statement).

3.2 ***Deposit***. Contemporaneously with the execution of this Agreement, (a) the Parties and the Escrow Agent are entering into the Escrow Agreement, and (b) Buyer is depositing on the Execution Date by wire transfer in same day funds with the Escrow Agent an amount equal to $70,000,000 (such amount, including all interest earned thereon, the "***Deposit***"). If Closing occurs, the Deposit shall be disbursed to Seller and applied toward the Adjusted Purchase Price at Closing. Otherwise, the Deposit shall be handled in accordance with *Section 14.2*.

3.3 ***Adjustment to Purchase Price***. The Purchase Price shall be adjusted as follows (without duplication), and the resulting amount shall be in this Agreement called the "***Adjusted Purchase Price***":

(a) The Purchase Price shall be adjusted upward by the following amounts:

(i) an amount equal to (A) all proceeds and revenues actually received by Buyer attributable to the sale of Seller's and DGS's

net revenue interest share of all Hydrocarbons in Storage (in each case net of any Burdens payable to Third Parties) to the extent such Hydrocarbons in Storage are sold prior to the Closing Date, net of expenses paid by Buyer (other than (1) Operating Expenses, (2) other expenses taken into account pursuant to *Section 3.3(b)*, (3) Income Taxes, (4) Asset Taxes and (5) Transfer Taxes) that are paid to Third Parties and are attributable to the post-production marketing of those Hydrocarbons (such as, gathering, compression, storage, processing, treatment, and transportation expenses and marketing fees) and not reimbursed to Buyer by a Third Party purchaser and (B) for Hydrocarbons in Storage other than those described in *clause (A)* above, the value of Seller's and DGS's net revenue interest share of all such Hydrocarbons in Storage to be based upon the contract price for those Hydrocarbons in effect as of the Effective Time, or if there is no such contract price, $1.50/MMBtu for gaseous Hydrocarbons and $20.00/bbl for liquid Hydrocarbons;

(ii) an amount equal to all Post-Effective Time Expenses paid by or economically borne by Seller (or offset against proceeds and revenues attributable to Seller's net revenue interest share of Hydrocarbons produced from the Conveyed Interests), whether paid or offset before or after the Effective Time, in each case, as set forth on *Schedule 3.3(a)(ii)*;

(iii) the amount described on *Schedule 3.3(a)(iii)*;

(iv) the amount of all Asset Taxes allocated to Buyer in accordance with *Section 15.2* but that are paid or otherwise economically borne by Seller;

(v) to the extent that Seller or any of its Affiliates has underproduced any Hydrocarbons as of the Effective Time as shown with respect to the net Well Imbalances set forth in *Schedule 7.10*, as complete and final settlement of all such Well Imbalances attributable to the Conveyed Interests, an amount equal to the product of the underproduced gaseous Hydrocarbon volumes times $1.50/MMBtu;

(vi) to the extent that Seller or any of its Affiliates has over-delivered any Hydrocarbons as of the Effective Time as shown with respect to the net Pipeline Imbalances set forth in *Schedule 7.10*, as complete and final settlement of all such Pipeline Imbalances attributable to the Conveyed Interests, an amount equal to the product of the over-delivered gaseous Hydrocarbon volumes times $1.50/MMBtu;

(vii) the Overhead Costs;

(viii) to the extent Seller has not been reimbursed prior to the delivery of the Final Settlement Statement pursuant to *Section 3.6(a)*, the aggregate amount of accounts receivable with respect to the total amount of costs and expenses paid by or will be paid by Seller on behalf of, or that are chargeable to, any Third Party with respect to any Subject Property attributable to the time period from and after the Effective Time (and as set forth on *Schedule 3.3(a)(viii)* for the portion of such costs and expenses paid by Seller prior to the Execution Date), which such adjustment shall not be made at Closing, but shall be made in connection with the Final Settlement Statement and taken into account in the Final Price;

(ix) an amount equal to all proceeds and revenues actually received by Buyer attributable to the sale of Hydrocarbons produced from or allocated to the Conveyed Interests prior to the Effective Time, net of all Burdens (*provided*, *that* to the extent such a netting for Burdens is made, Buyer shall assume the obligation to pay the netted amounts to the Persons to whom such amounts are due); and

(x) any other amount provided for elsewhere in this Agreement as an upward adjustment to the Purchase Price or otherwise agreed upon in writing by Seller and Buyer as an upward adjustment to the Purchase Price.

(b) The Purchase Price shall be adjusted downward by the following amounts:

(i) an amount equal to all proceeds and revenues (y) actually received by Seller or its Affiliates or (z) that would have been received by Seller or its Affiliates if Seller would have acquired the Other Working Interest Owner Interests as of the Effective Time, in each case of (y) and (z), attributable to the sale of Seller's and its Affiliate's net revenue interest share of Hydrocarbons produced from or allocable to (A) the Conveyed Interests, in each case, attributable to the period of time commencing at the Effective Time or (B) the Designated Wells, in each case, attributable to the period of time commencing prior to, on or after the Effective Time, in each case of (A) and (B), net of expenses paid or economically borne by Seller (other than (1) Operating Expenses, (2) other expenses taken into account pursuant to *Section 3.3(a)*, (3) Income Taxes, (4) Asset Taxes and (5) Transfer Taxes) that are paid to Third Parties and are attributable to the post-production marketing of those Hydrocarbons (such as gathering, compression, storage, processing, treatment, and transportation expenses and marketing fees) and not reimbursed to Seller by a Third Party purchaser;

(ii) the amount of all Asset Taxes allocated to Seller in accordance with *Section 15.2* but that are paid or otherwise economically borne by Buyer;

(iii) any reduction to the Purchase Price pursuant to Seller's election under *Section 5.3(d)(i)*;

(iv) any reduction to the Purchase Price pursuant to Seller's election under *Section 6.1(c)(i)*;

(v) the Allocated Value of the Conveyed Interests excluded from the transactions contemplated hereby pursuant to *Sections 4.1(b)*, *5.3(d)(ii)*, *5.4(c)*, *5.5(a)(i)*, *5.5(a)(iii)*, *5.5(b)(i)*, *5.5(b)(ii)* or *6.1(c)(ii)*;

(vi) to the extent that Seller or any of its Affiliates has overproduced any Hydrocarbons as of the Effective Time including as shown with respect to the net Well Imbalances set forth in *Schedule 7.10*, as complete and final settlement of all such Well Imbalances attributable to the Conveyed Interests, an amount equal to the product of the overproduced gaseous Hydrocarbon volumes times $1.50/MMBtu;

(vii) to the extent that Seller or any of its Affiliates has under-delivered any Hydrocarbons as of the Effective Time including as shown with respect to the net Pipeline Imbalances set forth in *Schedule 7.10*, as complete and final settlement of all such Pipeline Imbalances attributable to the Conveyed Interests, an amount equal to the product of the under-delivered gaseous Hydrocarbon volumes times $1.50/MMBtu;

(viii) an amount equal to Suspense Funds that are held by Seller or any of its Affiliates as of the Closing Date or a date after Closing when the Liability to such Suspense Funds are transferred from Seller to Buyer, in each case, in accordance with *Section 9.8*;

(ix) the Allocated Other Working Interest Owner Amount if the Other Working Interest Owner Interest is not acquired by Seller prior to Closing; and

(x) any other amount provided for elsewhere in this Agreement as a downward adjustment to the Purchase Price or otherwise agreed upon in writing by Seller and Buyer as a downward adjustment to the Purchase Price.

3.4 ***Adjustment Methodology***. When available, actual figures will be used for the adjustments to the Purchase Price at Closing. To the extent actual figures are not available, good faith estimates (including those with respect to expenses and revenues) will be used subject to final adjustments in accordance with *Section 3.6* and *Section 3.7*.

3.5 ***Preliminary Settlement Statement***. Not later than 5 Business Days prior to the Scheduled Closing Date, Seller shall prepare (in good faith and in accordance with the provisions of this Agreement) and submit to Buyer for review a draft settlement statement (the "***Preliminary Settlement Statement***") that shall set forth the Adjusted Purchase Price, reflecting each adjustment made in accordance with this Agreement as of the date of preparation of such Preliminary Settlement Statement and the calculation of the adjustments used to determine such amount (including as a result of the EnLink Agreements to be executed and delivered at Closing), together with (x) reasonable supporting summary documentation and (y) the designation of Seller's accounts for the wire transfers of funds as set forth in *Section 3.1* and *Section 12.3(g)*. Within two Business Days after receipt of the Preliminary Settlement Statement, Buyer may (without waiving any of its rights or remedies under this Agreement or otherwise), but shall not be obligated to, deliver to Seller a written report containing all changes with the explanation therefor that Buyer proposes to be made to the Preliminary Settlement Statement (based upon Buyer's knowledge at such time). The Parties shall in good faith attempt to agree on the Preliminary Settlement Statement as soon as possible after Seller's receipt of Buyer's written report. The Preliminary Settlement Statement, as agreed upon by the Parties, will be used to adjust the Purchase Price at Closing; *provided* that if the Parties do not agree on an adjustment set forth in the Preliminary Settlement Statement prior to the Closing, the amount of such adjustment set forth in the Preliminary Settlement Statement as presented by Seller (as modified by any subsequent agreements by the Parties) will be used to adjust the Purchase Price at Closing, absent manifest error.

3.6 ***Final Settlement Statement***.

(a) On or before 120 days after the Closing, Seller shall deliver to Buyer a final settlement statement (the "***Final Settlement Statement***") prepared by Seller in good faith based on actual income and expenses during the Interim Period and which takes into account all final adjustments made to the Purchase Price and shows the resulting final Adjusted Purchase Price (the "***Final Price***"), which Final Settlement Statement shall include reasonable supporting summary documentation. The Final Settlement Statement shall set forth the actual proration of the amounts required by this Agreement. As soon as practicable, and in any event within 30 days after receipt of the Final Settlement Statement, except with respect to the matters addressed in *Section 5.3(j)* and *Section 6.1(f)* (if applicable), Buyer will deliver to Seller a written report containing any proposed changes to the Final Settlement Statement and an explanation of any such changes and the reasons therefor (the "***Dispute Notice***"). Any matters included in a Dispute Notice shall be resolved pursuant to *Section 3.7* and as resolved shall become part of the Final Settlement Statement and Final Price, as applicable. Any changes not so specified in the Dispute Notice shall be deemed waived and Seller's determinations with respect to all such elements of the Final Settlement Statement that are not addressed specifically in the Dispute Notice shall prevail. If Buyer fails to timely and properly deliver a Dispute Notice to Seller containing changes Buyer proposes to be made to the Final Settlement Statement, the Final Settlement Statement as delivered by Seller and the Final Price set forth therein will be deemed to be correct and mutually agreed upon by the Parties, and will, without limiting *Section 15.2(c)*, be final and binding on the Parties and not subject to further audit or arbitration. If the Adjusted Purchase Price as paid at Closing pursuant to the Preliminary Settlement Statement is less than the Final Price, then, subject to *Section 5.3(j)* and *Section 6.1(f)* (if applicable), such shortage shall be paid by Buyer to Seller within 10 days after final determination of such owed amounts in accordance herewith. If the Adjusted Purchase Price as paid at Closing pursuant to the Preliminary Settlement Statement is more than the Final Price, then, subject to *Section 5.3(j)* and *Section 6.1(f)* (if applicable), such overage shall be paid by Seller to Buyer within 10 days after final determination of such owed amounts in accordance herewith. All amounts paid by any Party pursuant to this *Section 3.6* shall be delivered in United States currency by wire transfer of immediately available funds to the account specified in writing by the relevant Party.

(b) At the Closing, if applicable, Buyer shall deposit into the Escrow Account an amount equal to the Defect Escrow Amount. The "***Defect Escrow Amount***" shall mean (i) the aggregate amount of Title Defect Amounts asserted by Buyer with respect to all uncured Title Defects that were timely and properly asserted by Buyer pursuant to *Section 5.3(a)* and that Seller has elected to cure in good faith or are the subject of a Title Dispute (including any dispute as to whether Seller has cured such asserted Title Defects), *plus* (ii) the Remediation Amounts or Allocated Values, as applicable, asserted by Buyer for all uncured Environmental Defects that were timely and properly asserted by Buyer pursuant to *Section 6.1(a)* and that are the subject of a Disputed Environmental Matter (including any dispute as to whether Seller has cured such asserted Environmental Defects or as to whether Seller or Buyer is entitled to the remedy under *Section 6.1(c)(ii)*), *less* (iii) to the extent offsetting the Title Defect Amounts, the aggregate amount of Title Benefits Amounts asserted by Seller with respect to all Title Benefits that were timely and properly asserted by Seller pursuant to *Section 5.3(b)* and that Buyer has conceded or are the subject of a Title Dispute, in each case as applicable, after application of the Individual Title Defect Threshold or the Individual Environmental Threshold, as applicable, and (without duplication of the application thereof) the Title Defect Deductible, the Environmental Defect Deductible and other limitations set forth in *Section 5.3(i)* or *Section 6.1(e)*, as applicable; *provided* that in no event shall the Defect Escrow Amount be less than zero. The Defect Escrow Amount shall be released from time to time to the Party entitled to such amount as determined pursuant to this Agreement, and the Parties shall instruct the Escrow Agent accordingly. Subject to the Parties' rights under *Section 5.3(j)* and *Section 6.1(f)*, as applicable, to the extent a Title Defect or Environmental Defect is cured or Remediated, as applicable, prior to the Title Defect Cure Deadline or Environmental Defect Cure Deadline, as applicable, and the Title Defect Amount, Remediation Amount or Allocated Value, as applicable, for the applicable Title Defect Property or Environmental Defect Property is part of the Defect Escrow Amount, then such Title Defect Amount, Remediation Amount or Allocated Value, as applicable, to the extent corresponding to such cure shall be released to

Seller. Subject to the Parties' rights under *Section 5.3(j)* and *Section 6.1(f)*, as applicable, to the extent a Title Defect or Environmental Defect is not cured or Remediated, as applicable, prior to the Title Defect Cure Deadline or Environmental Defect Cure Deadline, as applicable, and the Title Defect Amount, Remediation Amount or Allocated Value, as applicable, for the applicable Title Defect Property or Environmental Defect Property is part of the Defect Escrow Amount, then such Title Defect Amount, Remediation Amount or Allocated Value, as applicable, to the extent corresponding to such failure to cure shall be released to (A) Seller or Buyer, as applicable, in accordance with any agreement between the Parties or (B) to the Party entitled to such amount upon final resolution of each unresolved Title Dispute or unresolved Disputed Environmental Matter pursuant to *Section 5.3(j)* or *Section 6.1(f)*, as applicable.

(c) Notwithstanding anything to the contrary in this Agreement (including, for purposes of clarity, this *Section 3.6*), excepting those matters for which a Party is obligated to provide indemnification pursuant to *Article XIII* or under *Section 2.3(b)* or *Section 15.2(e)*, if the Final Price set forth in the Final Settlement Statement is mutually agreed upon by Seller and Buyer or determined pursuant to *Section 3.6(a)*, (i) the Final Settlement Statement and the Final Price shall, without limiting *Section 15.2(c)*, be final and binding on the Parties, and, without limitation of Seller's indemnity obligations with respect to the Specified Obligations, shall be the final accounting for any and all Operating Expenses and there shall be no adjustment for, or obligation to pay, any Operating Expenses between the Parties following the Final Settlement Statement and (ii) after the date that is two years following the Closing Date, there shall be no obligation of the Parties to account to one another for proceeds and revenues with respect to any Hydrocarbons produced from and/or allocated to the Conveyed Interests prior to the Effective Time.

3.7 ***Disputes***.

(a) If Seller and Buyer are unable to resolve the matters addressed in a Dispute Notice (if any), for a 30-day period following written notice from either Party, an officer or representative designated by each Party shall attempt to resolve such dispute.

(b) If Seller and Buyer are unable to resolve their dispute within the period set forth in *Section 3.7(a)*, either Party may initiate the arbitration process set forth in this *Section 3.7(b)* by sending a written notice to the other Party (the "***Arbitration Notice***") within 20 days of the expiration of the 30-day period described in *Section 3.7(a)*. Each Party shall, within 14 Business Days after the delivery of the Arbitration Notice, summarize its position with regard to such dispute in a written document of 20 pages or less and submit such summaries to the Houston, Texas office of Deloitte Touche Tohmatsu Limited, or such other Person as the Parties may mutually select (the "***Accounting Arbitrator***"), together with the Dispute Notice, the Arbitration Notice, the Final Settlement Statement and any other documentation such Party may desire to submit. Within 20 Business Days after receiving the Parties' respective submissions, the Accounting Arbitrator shall render a decision choosing either Seller's position or Buyer's position with respect to each matter addressed in any Dispute Notice, based on the materials submitted to the Accounting Arbitrator as described above. Once appointed, the Accounting Arbitrator shall have no *ex parte* communication with either Party related to the Dispute Notice. Any decision rendered by the Accounting Arbitrator pursuant hereto shall, without limiting *Section 15.2(c)*, be final, conclusive and binding on Seller and Buyer and will be enforceable against the Parties in any court of competent jurisdiction. The Accounting Arbitrator shall act as an expert for the limited purpose of determining the specific dispute submitted by either Party and may not award damages, interest or penalties to either Party with respect to any matter, except as otherwise provided in the following sentence. The costs of the Accounting Arbitrator and the reasonable legal costs and other expenses incurred by the Parties in connection with the arbitration shall be borne pro rata between the Parties with each Party being responsible for such costs and expenses to the extent the Accounting Arbitrator has not selected such Party's position on an aggregate dollar basis with respect to all amounts submitted for resolution by the Accounting Arbitrator.

3.8 ***Allocated Values***. Solely for the purposes of determining the value of Conveyed Interests in connection with any Title Defect, Environmental Defect, Preferential Purchase Right, Required Consent, Casualty Loss and/or breach of Special Warranty under this Agreement, Buyer and Seller have allocated the Purchase Price among (a) the Leases set forth on *Exhibit A*, (b) the Wells set forth on *Exhibit B*, (c) the Conveyed Interests identified on *Schedule I-2* and (d) the Conveyed Interests identified on *Schedule I-3*. The value so allocated to (w) a particular Lease identified on *Exhibit A*, (x) a particular Well identified on *Exhibit B*, (y) a particular Conveyed Interest identified on *Schedule I-2* or (z) a particular Conveyed Interest identified on *Schedule I-3* may be referred to as "***Allocated Value***" for that Lease, Well or Conveyed Interest, as applicable. Buyer and Seller agree that such allocation is reasonable and shall not take any position inconsistent therewith, including in notices to holders of Preferential Purchase Rights. Seller, however, makes no representations or warranties as to the accuracy of such value or allocation.

3.9 ***Withholding***. Buyer shall be entitled to deduct and withhold from the consideration otherwise payable to any Person pursuant to this Agreement such amounts as may be required to be deducted and withheld with respect to Taxes; *provided, however,* other than with respect to any withholding as a result of Seller's failure to provide the forms described in *Section 12.2(j)*, Buyer shall provide at least five Business Days' written notice to Seller if Buyer intends to withhold any amounts under this *Section 3.9*. To the extent that amounts are so withheld and paid over to the appropriate Taxing Authority, such withheld amounts shall be treated for all purposes of this Agreement as having been paid to the Person in respect of whom such deduction and withholding was made by Buyer.

ARTICLE IV
ACCESS / DISCLAIMERS

4.1 ***Access***.

(a) From and after the Execution Date until the earlier to occur of (x) the Closing Date and (y) the date on which the Agreement is terminated in accordance with its terms, but subject to the other provisions of this *Section 4.1* and obtaining any required consents of any applicable Third Parties (which Seller shall use its good faith and commercially reasonable efforts to obtain without any obligation to expend any monies or undertake any obligations (other than requesting such consents) in connection with obtaining such access), Seller and its applicable Affiliates shall afford to Buyer and its Representatives ("***Buyer's Representatives***") reasonable access, during normal business hours, to the Subject Properties, all material Records and such other

Records requested by Buyer that are in Seller's or any of its Affiliates' possession or control, at such time and to the extent reasonably necessary to conduct the title or environmental review for the purposes of *Article V* and *Article VI*. Buyer shall give Seller reasonable prior written notice before physically accessing any of the Subject Properties, and Seller or its designee shall have the right, but not the obligation, to accompany Buyer and Buyer's Representatives at Seller's sole cost whenever Buyer and/or Buyer's Representatives physically access any Subject Property. All due diligence evaluation of the Subject Properties (including all investigations and inspections) conducted by Buyer or any Buyer's Representative shall be conducted at Buyer's sole cost, risk and expense and any conclusions made from any examination done by Buyer or any Buyer's Representative shall result from Buyer's own independent review and judgment.

(b) Subject to, and without limitation of, the terms set forth in this *Section 4.1(b)*, from the Execution Date until the Environmental Defect Claim Date, Buyer's inspection right with respect to the Environmental Condition of the Subject Properties shall be limited to conducting a Phase I ESA of the Subject Properties. Such Phase I ESA of the Subject Properties shall be limited to visual inspections of the Subject Properties and review of Records relating to the Subject Properties, and, in conducting such Phase I ESA, Buyer shall not operate any equipment or conduct any testing or sampling of soil, groundwater, air, or other substances or materials (including any testing or sampling for Hazardous Substances, Hydrocarbons or NORM). Notwithstanding anything in this Agreement to the contrary, Buyer shall not have access to, and shall not be permitted to, conduct any Phase I ESA of any Subject Property if neither Seller nor any of its Affiliates has the authority to grant access for such Phase I ESA or Seller's request for such access has been denied; *provided*, *however*, that Seller shall use its commercially reasonable good faith efforts to obtain such access without the obligation to expend any monies or undertake any obligations (other than requesting such consents) in connection with obtaining such access. If Buyer determines in good faith that a Phase I ESA determines that sampling, testing, or other investigative activities (a "***Phase II ESA***") are necessary in order for Buyer to prove the existence of or determine the Remediation Amount for, as applicable, an Environmental Defect that could reasonably be expected to exceed the Individual Environmental Threshold as determined by Buyer in good faith and Buyer desires to perform any such Phase II ESA, Buyer shall, prior to the Environmental Defect Claim Date, (i) furnish Seller with a written description of the proposed scope of such Phase II ESA, including a description of the specific activities to be conducted, and a description of the approximate location and expected timing of such activities and (ii) obtain the prior written consent of Seller (such consent to be given at Seller's sole discretion) to undertake such Phase II ESA. If the proposed Phase II ESA unreasonably interferes with the normal operations of the Subject Properties or otherwise may cause an undue risk of harm to the site, Seller may request an appropriate modification of the Phase II ESA. If Seller denies a good faith request by Buyer to undertake such Phase II ESA on any Subject Property pursuant to the foregoing provisions of this *Section 4.1(b)*, Buyer shall have the right to exclude such Subject Property from the Conveyed Interests to be conveyed to Buyer at Closing in which event the Purchase Price shall be reduced by the Allocated Value of such Subject Property(ies) (and such Subject Property(ies) shall thereafter constitute Excluded Assets and Other Matters for all purposes of this Agreement). Any Phase I ESA and approved Phase II ESA shall be conducted by an Approved Buyer Environmental Consultant. Buyer shall obtain all permits necessary to conduct any approved Phase II ESA from any applicable Governmental Authorities prior to performing such approved Phase II ESA.

(c) Buyer shall coordinate its access rights, environmental property assessments, physical inspections and other due diligence evaluation of the Subject Properties with Seller to minimize any inconvenience to or unreasonable interruption of the conduct of business by Seller. To the extent provided to Buyer in advance, Buyer shall abide by Seller's safety rules, regulations and operating policies while conducting its due diligence evaluation of the Subject Properties, including any access to, and environmental or other inspection or assessment of, the Subject Properties. Buyer hereby defends, indemnifies, and holds harmless Seller and each Seller Indemnified Party from and against any and all Liabilities arising out of, resulting from or relating to any field visit, environmental or other inspection or assessment, or other due diligence evaluation conducted by Buyer or any Buyer's Representative with respect to the Subject Properties, **EVEN IF SUCH LIABILITIES ARISE OUT OF OR RESULT FROM, IN WHOLE OR IN PART, THE SOLE, ACTIVE, PASSIVE, CONCURRENT OR COMPARATIVE NEGLIGENCE, STRICT LIABILITY OR OTHER FAULT OF, OR THE VIOLATION OF LAW BY, ANY SELLER INDEMNIFIED PARTY, EXCEPTING ONLY LIABILITIES TO THE EXTENT ACTUALLY RESULTING FROM THE ACTUAL FRAUD, GROSS NEGLIGENCE OR WILLFUL MISCONDUCT OF SELLER OR ANY OTHER SELLER INDEMNIFIED PARTY.**

(d) Buyer acknowledges that any entry into Seller's offices or onto the Subject Properties shall be at Buyer's sole risk, cost and expense, and, subject to the terms hereof and that none of the Seller Indemnified Parties shall be liable in any way for any injury, loss or damage arising out of such entry that may occur to Buyer or any of Buyer's Representatives pursuant to this Agreement. Buyer hereby fully waives and releases any and all Liabilities against all of the Seller Indemnified Parties for any injury, death, loss or damage to any of Buyer's Representatives or their property in connection with Buyer's due diligence evaluation of the Subject Properties, **EVEN IF SUCH LIABILITIES ARISE OUT OF OR RESULT FROM, IN WHOLE OR IN PART, THE SOLE, ACTIVE, PASSIVE, CONCURRENT OR COMPARATIVE NEGLIGENCE, STRICT LIABILITY OR OTHER FAULT OF, OR THE VIOLATION OF LAW BY, ANY SELLER INDEMNIFIED PARTY, EXCEPTING ONLY LIABILITIES ACTUALLY RESULTING FROM THE ACTUAL FRAUD, GROSS NEGLIGENCE OR WILLFUL MISCONDUCT OF SELLER OR ANY OTHER SELLER INDEMNIFIED PARTY.**

(e) If an Environmental Defect Notice is submitted by Buyer, Buyer agrees to contemporaneously provide Seller copies of all final environmental reports and test results prepared by Buyer and/or any of Buyer's Representatives (including Buyer's environmental consulting or engineering firm), which contain data collected or generated from Buyer's and/or any of Buyer's Representatives' due diligence with respect to the Subject Properties that are the subject of the Environmental Defect Notice. Seller shall not be deemed by its or its representatives' receipt of said documents to have made any representation or warranty, express, implied or statutory, as to the condition of the Subject Properties or the accuracy of said documents or the information contained therein.

(f) Upon completion of Buyer's due diligence evaluation of the Subject Properties, Buyer shall at its sole cost and expense and without any cost or expense to Seller or any of its Affiliates (i) repair all damages done to any Subject Properties in connection with Buyer's and/or any of Buyer's Representatives' due diligence evaluation (including any due diligence conducted by Buyer's environmental consulting or engineering firm), (ii) if applicable, restore the Subject Properties to the approximate same condition as they were prior to commencement of any such due diligence evaluation and (iii) remove all equipment, tools and other property brought onto the Subject Properties in connection with such due diligence evaluation. Any material surface disturbance to the Subject Properties (including the leasehold associated therewith) resulting from such due diligence will be promptly corrected by Buyer at Buyer's sole cost and expense.

(g) During all periods that Buyer and/or any of Buyer's Representatives (including Buyer's environmental consulting or engineering firm) are on the Subject Properties, Buyer shall maintain, at its sole cost and expense, customary policies of insurance in accordance with its ordinary course of business. Upon request by Seller, Buyer shall provide evidence of such insurance to Seller prior to entering any of the Subject Properties.

4.2 ***Confidentiality***. Buyer acknowledges that, pursuant to its right of access to the Records or the Subject Properties, Buyer and/or Buyer's Representatives (including Buyer's environmental consulting or engineering firm) will become privy to confidential and other information of Seller and/or Seller's Affiliates and Buyer shall ensure that such confidential information (a) shall not be used for any purpose other than in connection with the transactions contemplated by this Agreement and (b) shall be held confidential by Buyer and Buyer's Representatives (including Buyer's environmental consulting or engineering firm) in accordance with the terms of the Confidentiality Agreement. If the Closing should occur, the foregoing confidentiality restriction on Buyer shall terminate as of the Closing Date (except as to (i) such portion of the Conveyed Interests that are not conveyed to Buyer pursuant to the provisions of this Agreement, (ii) the Excluded Assets and Other Matters, and (iii) information related to Seller or Seller's Affiliates (to the extent unrelated to the Conveyed Interests or the ownership or operation thereof)).

4.3 ***Disclaimers***.

(a) EXCEPT AS AND TO THE LIMITED EXTENT EXPRESSLY SET FORTH IN *ARTICLE VII*, THE CERTIFICATE DELIVERED BY SELLER PURSUANT TO *SECTION 12.3(l)* OR THE SPECIAL WARRANTY SET FORTH IN THE ASSIGNMENTS AND DEEDS, AND EXCEPT FOR FRAUD, (i) SELLER MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS, STATUTORY OR IMPLIED, AND (ii) SELLER EXPRESSLY DISCLAIMS ALL LIABILITY AND RESPONSIBILITY FOR ANY REPRESENTATION, WARRANTY, STATEMENT OR INFORMATION MADE OR COMMUNICATED (ORALLY OR IN WRITING) TO BUYER OR ANY OF ITS AFFILIATES, EMPLOYEES, AGENTS, CONSULTANTS OR REPRESENTATIVES (INCLUDING ANY OPINION, INFORMATION, PROJECTION OR ADVICE THAT MAY HAVE BEEN PROVIDED TO BUYER BY ANY SELLER INDEMNIFIED PARTY). BUYER ACKNOWLEDGES AND AGREES THAT BUYER CANNOT AND WILL NOT RELY ON OR FORM ANY CONCLUSIONS FROM SELLER'S METHODOLOGIES FOR THE DETERMINATION AND CALCULATION OF BURDENS WITH RESPECT TO THE CONVEYED INTERESTS.

(b) EXCEPT AS AND TO THE LIMITED EXTENT EXPRESSLY REPRESENTED OTHERWISE IN *ARTICLE VII*, THE CERTIFICATE DELIVERED BY SELLER PURSUANT TO *SECTION 12.3(l)* OR THE SPECIAL WARRANTY SET FORTH IN THE ASSIGNMENTS AND DEEDS, AND EXCEPT FOR FRAUD AND WITHOUT LIMITING THE GENERALITY OF THE FOREGOING, SELLER EXPRESSLY DISCLAIMS ANY REPRESENTATION OR WARRANTY, EXPRESS, STATUTORY OR IMPLIED, AS TO (i) TITLE TO ANY OF THE CONVEYED INTERESTS, (ii) THE CONTENTS, CHARACTER OR NATURE OF ANY REPORT OF ANY PETROLEUM ENGINEERING CONSULTANT, OR ANY ENGINEERING, GEOLOGICAL OR SEISMIC DATA OR INTERPRETATION, RELATING TO THE CONVEYED INTERESTS, (iii) THE QUANTITY, QUALITY OR RECOVERABILITY OF HYDROCARBONS IN OR FROM THE CONVEYED INTERESTS, (iv) ANY ESTIMATES OF THE VALUE OF THE CONVEYED INTERESTS OR FUTURE REVENUES TO BE GENERATED BY THE CONVEYED INTERESTS, (v) THE PRODUCTION OF OR ABILITY TO PRODUCE HYDROCARBONS FROM THE CONVEYED INTERESTS, (vi) THE MAINTENANCE, REPAIR, CONDITION, QUALITY, SUITABILITY, DESIGN OR MARKETABILITY OF THE CONVEYED INTERESTS, (vii) THE CONTENT, CHARACTER OR NATURE OF ANY INFORMATION MEMORANDUM, REPORTS, BROCHURES, CHARTS OR STATEMENTS PREPARED BY SELLER OR THIRD PARTIES WITH RESPECT TO THE CONVEYED INTERESTS, (viii) ANY OTHER MATERIALS OR INFORMATION THAT MAY HAVE BEEN MADE AVAILABLE TO BUYER OR ITS AFFILIATES, OR ITS OR THEIR RESPECTIVE EMPLOYEES, AGENTS, CONSULTANTS OR REPRESENTATIVES IN CONNECTION WITH THE TRANSACTIONS CONTEMPLATED BY THIS AGREEMENT OR ANY DISCUSSION OR PRESENTATION RELATING THERETO AND (ix) ANY IMPLIED OR EXPRESS WARRANTY OF FREEDOM FROM PATENT OR TRADEMARK INFRINGEMENT. EXCEPT AS AND TO THE LIMITED EXTENT EXPRESSLY REPRESENTED OTHERWISE IN *ARTICLE VII*, THE CERTIFICATE DELIVERED BY SELLER PURSUANT TO *SECTION 12.3(l)* OR THE SPECIAL WARRANTY SET FORTH IN THE ASSIGNMENTS AND DEEDS, SELLER EXPRESSLY DISCLAIMS ANY REPRESENTATION OR WARRANTY, EXPRESS, STATUTORY OR IMPLIED, AS TO THE MERCHANTABILITY, FREEDOM FROM LATENT VICES OR DEFECTS, FITNESS FOR A PARTICULAR PURPOSE OR CONFORMITY TO MODELS OR SAMPLES OF MATERIALS OF ANY OF THE CONVEYED INTERESTS, RIGHTS OF A PURCHASER UNDER APPROPRIATE STATUTES TO CLAIM DIMINUTION OF CONSIDERATION OR RETURN OF THE PURCHASE PRICE, IT BEING EXPRESSLY UNDERSTOOD AND AGREED BY THE PARTIES THAT BUYER SHALL BE DEEMED TO BE OBTAINING THE CONVEYED INTERESTS IN THEIR PRESENT STATUS, CONDITION AND STATE OF REPAIR, "AS IS" AND "WHERE IS" WITH ALL FAULTS OR DEFECTS (KNOWN OR UNKNOWN, LATENT, DISCOVERABLE OR UNDISCOVERABLE), AND THAT BUYER HAS MADE OR CAUSED TO BE MADE SUCH INSPECTIONS AS BUYER DEEMS APPROPRIATE.

(c) SUBJECT TO, AND WITHOUT LIMITATION OF, SELLER'S REPRESENTATIONS AND WARRANTIES SET FORTH IN *SECTION 7.18* (AND ITS INDEMNITY OBLIGATIONS RELATED THERETO), AND EXCEPT FOR FRAUD, (i) SELLER HAS NOT AND WILL NOT MAKE ANY OTHER REPRESENTATION OR WARRANTY REGARDING ANY MATTER OR CIRCUMSTANCE RELATING TO ENVIRONMENTAL LAWS, THE RELEASE OF MATERIALS INTO THE ENVIRONMENT OR THE PROTECTION OF HUMAN HEALTH, SAFETY, NATURAL RESOURCES OR THE ENVIRONMENT, OR ANY OTHER ENVIRONMENTAL CONDITION OF THE CONVEYED INTERESTS, (ii) NOTHING IN THIS AGREEMENT OR OTHERWISE SHALL BE CONSTRUED AS SUCH A REPRESENTATION OR WARRANTY, AND (iii) SUBJECT TO BUYER'S RIGHTS UNDER *SECTION 6.1*, BUYER SHALL BE DEEMED TO BE TAKING THE CONVEYED INTERESTS "AS IS" AND "WHERE IS" WITH ALL FAULTS FOR PURPOSES OF THEIR ENVIRONMENTAL CONDITION AND THAT BUYER HAS MADE OR CAUSED TO BE MADE SUCH ENVIRONMENTAL INSPECTIONS AS BUYER DEEMS APPROPRIATE.

(d) BUYER ACKNOWLEDGES AND AGREES THAT BUYER CANNOT RELY ON OR FORM ANY CONCLUSIONS FROM SELLER'S METHODOLOGIES FOR THE DETERMINATION AND REPORTING OF ANY TAXES THAT WERE UTILIZED FOR ANY TAX PERIOD (OR PORTION OF ANY STRADDLE PERIOD) BEGINNING PRIOR TO THE CLOSING DATE FOR PURPOSES OF CALCULATING AND REPORTING TAXES ATTRIBUTABLE TO ANY TAX PERIOD (OR PORTION OF ANY STRADDLE PERIOD) BEGINNING AFTER THE CLOSING DATE, IT BEING UNDERSTOOD THAT BUYER MUST MAKE ITS OWN DETERMINATION AS TO THE PROPER METHODOLOGIES THAT CAN OR SHOULD BE USED FOR ANY SUCH LATER TAX RETURN.

(e) SELLER AND BUYER AGREE THAT, TO THE EXTENT REQUIRED BY APPLICABLE LAW TO BE EFFECTIVE, THE DISCLAIMERS OF CERTAIN REPRESENTATIONS AND WARRANTIES CONTAINED IN THIS *SECTION 4.3* ARE "CONSPICUOUS" DISCLAIMERS FOR THE PURPOSE OF ANY APPLICABLE LAW.

ARTICLE V
TITLE MATTERS; CASUALTY; TRANSFER RESTRICTIONS

5.1 ***General Disclaimer of Title Warranties and Representations***. Except as and to the limited extent expressly represented otherwise in *Sections 7.9, 7.14, 7.15*, *7.17, 7.19(a)*, *7.20*, *7.25, 7.26*, *7.31* or *7.32*, the certificate delivered by Seller pursuant *to Section 12.3(l)* (solely to the extent relating to *Sections 7.9, 7.14, 7.15*, *7.17, 7.19(a)*, *7.20*, *7.25, 7.26*, *7.31* or *7.32*) or the Special Warranty set forth in the Assignments and Deeds and without limiting Buyer's remedies for Title Defects set forth in this *Article V*, Seller makes no warranty or representation, express, implied, statutory or otherwise, with respect to Seller's title to any of the Conveyed Interests, and Buyer hereby acknowledges and agrees that Buyer's sole remedy for any defect of title, including any Title Defect, with respect to Seller's title to any of the Conveyed Interests shall be (a) as set forth in *Section 5.3*, (b) pursuant to the Special Warranty set forth in the Assignments and Deeds in compliance with *Section 5.2* below and as may otherwise be limited by this Agreement and (c) as set forth in *Sections 7.9, 7.14, 7.15*, *7.17, 7.19(a)*, *7.20*, *7.25, 7.26*, *7.31* or *7.32* and the certificate delivered by Seller pursuant to *Section 12.3(l)* (solely to the extent relating to *Sections 7.9, 7.14, 7.15*, *7.17, 7.19(a)*, *7.20*, *7.25, 7.26, 7.31* or *7.32*).

5.2 ***Special Warranty***.

(a) Special Warranty of Defensible Title. If Closing occurs, then the Assignments and Deeds shall contain a special warranty of title whereby Seller shall warrant Defensible Title of Seller and its Affiliates to the applicable Conveyed Interests unto Buyer and its successors and assigns against every Person whomsoever lawfully claiming or to claim the same or any part thereof by, through or under Seller or any of its Affiliates, but not otherwise, subject, however, to the Permitted Encumbrances (the "***Special Warranty***"); *provided*, *however*, that, except with respect to any Liability of Seller for any claim asserted in writing by Buyer to Seller in accordance with this *Section 5.2* and the applicable Assignment or Deed, as applicable, before the expiration of the Survival Period for breach of the Special Warranty, the Special Warranty shall cease and terminate at the end of the Survival Period. The Special Warranty shall be subject to the further limitations and provisions of this *Section 5.2*.

(b) Recovery on Special Warranty.

(i) Buyer's Assertion of Special Warranty Breaches. Prior to the expiration of the period of time commencing as of the Closing Date and ending at 5:00 P.M. (Central Time) on the fourth anniversary thereof (the "***Survival Period***"), Buyer shall be entitled to furnish Seller a Title Defect Notice meeting the requirements of *Section 5.3(a)* setting forth any and all matters which Buyer intends to assert as a breach of the Special Warranty (collectively, the "***Special Warranty Notices***" and, individually, a "***Special Warranty Notice***"). Seller shall have a reasonable opportunity (not to exceed 90 days from delivery of a Special Warranty Notice by Buyer), but not the obligation, to cure any breach of the Special Warranty asserted by Buyer pursuant to this *Section 5.2(b)*. Buyer shall reasonably cooperate (at Seller's sole cost and expense) with any attempt by Seller to cure any such breach. For all purposes of this Agreement, Buyer shall be deemed to have waived, and Seller shall have no further Liability for, any breach of the Special Warranty that Buyer fails to assert by a Special Warranty Notice given to Seller before the expiration of the Survival Period.

(ii) Limitations on Special Warranty. Recovery by Buyer for any breach by Seller or any of its Affiliates of the Special Warranty shall be limited to an amount (without any interest accruing thereon) equal to (A), with respect to the Leases set forth on *Exhibit A* (limited to the Barnett Formation), the Wells set forth on *Exhibit B* (limited to the currently producing formation) and the Conveyed Interests set forth on *Schedule I-2* (limited to the currently completed formation), the reduction to the Purchase Price to which Buyer would have been entitled had Buyer asserted the defect giving rise to such breach of the Special Warranty as a Title Defect prior to the Title Defect Claim Date pursuant to *Section 5.3* and taking into account the last sentence of this *Section 5.2(b)(ii)*, and (B), with respect to all other Conveyed Interests, the amount necessary to be paid to remove the applicable Encumbrance(s) from such Conveyed Interests (net to Seller's and its Affiliates' interest). With respect to those Conveyed Interests described in *clause (A)* above, in no event shall the recovery by Buyer exceed the Allocated Value of the affected Conveyed Interest (or portion thereof affected by such breach) and Buyer shall not be entitled to recover any amount for any breach of the Special Warranty to the extent that the same Title Defect is or has been taken into account for the reduction of the Purchase Price calculated pursuant to the other provisions of this *Article V*. The Individual Title Defect Threshold and the Title Defect Deductible shall not apply to any recovery for any breach by Seller or any of its Affiliates of the Special Warranty.

5.3 ***Notice of Title Defects; Defect Adjustments***.

(a) Title Defect Notices. As a condition to Buyer asserting any claim with respect to any alleged Title Defect, Buyer must deliver claim notices to Seller meeting the requirements of this *Section 5.3(a)* (collectively, the "***Title Defect Notices***" and, individually, a "***Title Defect Notice***") not later than the Title Defect Claim Date setting forth any matters which Buyer intends to assert as a Title Defect pursuant to this *Section 5.3(a)*. For all purposes of this Agreement, the Assignments and Deeds and notwithstanding anything in this Agreement, the Assignments or the Deeds to the contrary, Buyer shall be deemed to have waived, and Seller shall have no Liability for, any Title Defect which Buyer fails to timely and properly assert as a Title Defect by a Title Defect Notice received by Seller before the Title Defect Claim Date, but subject to *Section 5.1*; *provided*, *however*, that, such waiver shall not apply to any Title Defect that is a breach of the Special Warranty. To be effective, each Title Defect Notice shall be in writing, and shall include (i) a description of the alleged Title Defect and the individual Conveyed Interest affected by the alleged Title Defect (each such Lease, Well or Conveyed Interest set forth on *Schedule I-2*, a "***Title Defect Property***"), (ii) the Allocated Value of each Title Defect Property, (iii) supporting documents (which may include landman's reports and title run sheets) reasonably necessary for Seller to identify the alleged Title Defect with respect to each Title Defect Property, and (iv) with respect to each Title Defect Property (any and all of which supporting documents may be furnished via access to a web link or ftp site (in lieu of other means of delivery)), the amount by which Buyer reasonably believes the Allocated Value of the Title Defect Property is reduced by such alleged Title Defect and the computations upon which Buyer's belief is based, in each case, in accordance with *Section 5.3(g)*. Notwithstanding anything to the contrary in this Agreement, the failure of any Title Defect Notice to include any of the information or documentation identified or described in *Section 5.3(a)(i)* through *Section 5.3(a)(iv)* above shall not render such Title Defect Notice void or ineffective if such Title Defect Notice otherwise materially complies with the requirements set forth in this *Section 5.3(a)* and provides Seller with sufficient information to evaluate the alleged Title Defect. Notwithstanding anything in this Agreement to the contrary, and for the avoidance of doubt, Buyer shall not have the right to assert any Title Defect with respect to any Conveyed Interests other than (A) the Leases set forth on *Exhibit A* (limited to the Barnett

Formation), (B) the Wells set forth on *Exhibit B* (limited to the currently producing formation for each such Well) or (C) the Conveyed Interests set forth on *Schedule I-2* (limited to the currently completed formation for each such Conveyed Interest). To give Seller an opportunity to commence reviewing and curing Title Defects, Buyer agrees to use commercially reasonable efforts (without the obligation to expend any monies or undertake any obligations) to give Seller, at least once every 2 calendar weeks prior to the Title Defect Claim Date, written notice of all alleged Title Defects (as well as any claims that would be claims under the Special Warranty) discovered by Buyer during the preceding 2 calendar weeks, which notice may be preliminary in nature and amended, modified, supplemented, replaced and/or withdrawn (in-whole or in-part) at any time prior to the Title Defect Claim Date; *provided* that the failure of Buyer to provide preliminary notice of any Title Defects shall not be deemed to waive, limit, restrict or otherwise prejudice Buyer's right to assert a Title Defect on or before the Title Defect Claim Date in accordance with this *Section 5.3(a)*. Buyer shall also promptly upon discovery, furnish Seller with written notice of any Title Benefit (1) which is actually discovered by Buyer prior to the Title Defect Claim Date, including to the extent Buyer is notified thereof by any of Buyer's or any of its Affiliates' employees, title attorneys, landmen or other title examiners while conducting Buyer's due diligence with respect to the Conveyed Interests prior to the Title Defect Claim Date and (2) as to which Buyer believes in good faith actually exists of record.

(b) Title Benefit Notices. Seller shall have the right, but not the obligation, to deliver to Buyer on or before the Title Defect Claim Date with respect to each Title Benefit a notice (a "***Title Benefit Notice***") including (i) a description of the alleged Title Benefit and the individual Lease or Well affected by such alleged Title Benefit (each such Conveyed Interest, a "***Title Benefit Property***"), (ii) with respect to each Title Benefit Property, the amount by which Seller reasonably believes the Allocated Value of such Title Benefit Property is increased by such alleged Title Benefit, (iii) the computations upon which Seller's belief is based in accordance with *Section 5.3(h)* and (iv) supporting documents reasonably necessary for Buyer to identify such Title Benefit. Other than any Title Benefits which Buyer reports to Seller pursuant to *Section 5.3(a)*, Seller shall be deemed to have waived any Title Benefit which Seller fails to assert as a Title Benefit in a Title Benefit Notice delivered to Buyer on or before the Title Defect Claim Date.

(c) Seller's Right to Cure. Seller shall have the right, but not the obligation, to attempt, at its sole cost, to cure any alleged Title Defects at any time prior to 5:00 p.m. Central Time on the date that is 60 days after the Closing Date (the "***Title Defect Cure Deadline***"); *provided,* that Seller shall only be permitted to exercise such right to elect to cure (or attempt to cure) any such Title Defect during the period between the Closing Date and the Title Defect Cure Deadline if such Title Defect is reasonably capable of being cured by Seller prior to the Title Defect Cure Deadline (as reasonably determined by Seller in good faith). During the period of time from Closing to the expiration of the Title Defect Cure Deadline, Buyer agrees to afford Seller and its officers, employees and other authorized representatives reasonable access, during normal business hours, to the Subject Properties and all Records in Buyer's or any of its Affiliates' possession in order to facilitate Seller's attempt to cure any such Title Defects; *provided* that the indemnity provisions in *Sections 4.1(c)* and *4.1(d)* shall apply to Seller mutatis mutandis. An election by Seller to attempt to cure a Title Defect shall be without prejudice to its other rights under this *Section 5.3* and shall not constitute an admission against interest or a waiver of Seller's right to dispute the existence, nature or value of, or cost to cure, the alleged Title Defect. Seller shall provide Buyer written notice of Seller's good faith election to cure any Title Defect no later than 10 Business Days after the Title Defect Claim Date ("***Cure Notice***"), and the failure to provide notice by such date shall be deemed an election not to cure (or to attempt to cure) by Seller. Such Cure Notice shall identify each individual Title Defect to be cured by Seller. In the event the Seller fails to deliver a Cure Notice within 10 Business Days after the Title Defect Claim Date or fails to deliver a Cure Notice electing to cure a Title Defect identified in the Title Defect Notice, as applicable, Seller shall waive the right to cure such Title Defects.

(d) Remedies for Title Defects. Subject to Seller's continuing right to (x) dispute the existence of a Title Defect and/or the Title Defect Amount asserted with respect thereto as described in *Section 5.3(j)* and (y) cure (or attempt to cure) any Title Defect pursuant to, and in accordance with, *Section 5.3(c),* and subject to the limitations set forth in *Section 5.3(i)* and the rights of the Parties pursuant to *Section 14.1(f)*, in the event that Seller has not cured a Title Defect that has been timely and properly asserted by Buyer in accordance with *Section 5.3(a)* by the expiration of the Title Defect Cure Deadline, and such Title Defect has not been expressly waived by Buyer, Seller shall, at its sole option, elect to:

(i) reduce the Purchase Price or Final Price, as applicable, by the Title Defect Amount determined pursuant to *Section 5.3(g)* or *Section 5.3(j)*; or

(ii) if the Title Defect Amount of any Title Defect applicable to a Title Defect Property equals or exceeds fifty percent (50%) of the Allocated Value of such Title Defect Property, unless Buyer otherwise elects to waive the applicable Title Defect prior to the Closing, Seller may retain such Title Defect Property and reduce the Purchase Price by an amount equal to the Allocated Value (or portion thereof allocable thereto) of such Title Defect Property, in which event the Parties shall, subject to *Article X* and *Article XI*, proceed to the Closing, and such Title Defect Property shall be retained by Seller (and shall, for purposes of clarity, thereafter be deemed to constitute an Excluded Asset and Other Matters for all purposes of this Agreement). For purposes of clarity, (1) if the Title Defect Amount does not exceed 50% of the Allocated Value of such Title Defect Property, then a downward Purchase Price adjustment shall be made in accordance with *Section 5.3(d)(i)* above and (2) notwithstanding anything to the contrary herein, Seller may only elect the remedy set forth in *clause (ii)* above prior to the Closing Date.

In the event that, as of the Closing Date, there are Title Defects with respect to which (A) Seller has not elected to cure pursuant to the Cure Notice and (B) Seller has not notified Buyer that it disputes the Title Defect or the Title Defect Amount, the Purchase Price shall be reduced at Closing by the aggregate Title Defect Amount of such Title Defects as determined pursuant to *Section 5.3(g)* less any Title Benefits with respect to which Buyer has not disputed (or deemed to have conceded pursuant to *Section 5.3(e)*) the Title Benefit or Title Benefit Amount, subject to the limitations in *Section 5.3(e)* and *Section 5.3(i)*. If Seller and Buyer are unable to agree on any Title Defect, Title Benefit, Title Defect Amount or Title Benefit Amount at the Closing, Buyer's good faith determination with respect to such Title Defect, Title Benefit, Title Defect Amount or Title Benefit Amount shall be utilized for purposes of determining the Defect Escrow Amount at Closing.

(e) Remedies for Title Benefits. With respect to each Title Benefit Property reported under *Sections 5.3(a)* or *5.3(b)*, Buyer shall notify Seller in writing on or before the date that is five Business Days prior to the Scheduled Closing Date whether Buyer (i) concedes the Title Benefit asserted therein or (ii) disputes such Title Benefit and/or the Title Benefit Amount thereof, in which case such Title Benefit shall be deemed to be a Title Dispute and the

provisions of *Section 5.3(j)* shall apply. If Buyer fails to notify Seller by such date with respect to such a Title Benefit, Buyer shall be deemed to have conceded such Title Benefit. Title Benefits Amounts shall in no event result in an increase to the Purchase Price, and shall only be applied in the manner set forth in *Section 5.3(i)*.

(f) Exclusive Remedy. Except for Fraud, Buyer's rights under the Special Warranty, and Buyer's right to terminate this Agreement pursuant to *Section 14.1(f)*, and without limitation of any of Seller's indemnity obligations hereunder with respect to *Sections 7.9*, *7.14*, *7.15*, *7.17*, *7.19(a)*, *7.20*, *7.25*, *7.26*, *7.31* or *7.32*, and *Sections 10.4* and *11.4*, *Section 5.3(d)* shall be the exclusive right and remedy of Buyer with respect to Seller's failure to have Defensible Title with respect to any Lease or Well, or any other title matter with respect to any Subject Property, and Buyer hereby waives any and all other rights or remedies with respect thereto. For the avoidance of doubt, the foregoing shall not limit each Party's rights and obligations under *Section 5.5*.

(g) Title Defect Amount. The amount by which the Allocated Value of a Title Defect Property is reduced as a result of the existence of a Title Defect shall be the "***Title Defect Amount***" for such Title Defect Property and shall be determined in accordance with the following terms and conditions (without duplication):

(i) if Buyer and Seller agree on the Title Defect Amount, then that amount shall be the Title Defect Amount;

(ii) if the Title Defect is an Encumbrance that is undisputed and liquidated in amount, then the Title Defect Amount shall be the amount necessary to be paid to remove the Title Defect from such Title Defect Property;

(iii) if the Title Defect represents a decrease of (A) Seller's Net Revenue Interest for a Title Defect Property such that Seller's Net Revenue Interest for such Title Defect Property is less than (B) the Net Revenue Interest set forth for such Title Defect Property on *Exhibit A*, *Exhibit B* or *Schedule I-2*, then the Title Defect Amount shall be the product of the Allocated Value of such Title Defect Property *multiplied* by a fraction, the numerator of which is the Net Revenue Interest decrease and the denominator of which is the Net Revenue Interest set forth for such Title Defect Property on *Exhibit A*, *Exhibit B* or *Schedule I-2*, as applicable;

(iv) if the Title Defect represents an increase of (A) Seller's Working Interest for a Title Defect Property such that Seller's Working Interest for such Title Defect Property is in excess of (B) the Working Interest set forth for such Title Defect Property on *Exhibit A*, *Exhibit B* or *Schedule I-2*, as applicable, without a proportionate increase of Seller's Net Revenue Interest for such Title Defect Property, then the Title Defect Amount shall be the product of the Allocated Value of such Title Defect Property *multiplied* by a fraction, the numerator of which is the Working Interest increase and the denominator of which is the Working Interest set forth for such Title Defect Property on *Exhibit A*, *Exhibit B* or *Schedule I-2*, as applicable;

(v) if the Title Defect represents a discrepancy where (A) the actual Net Acres for such Title Defect Property is less than (B) the Net Acres set forth on *Exhibit A* for such Title Defect Property, then the Title Defect Amount shall be the product obtained by *multiplying* such Net Acre decrease by the Allocated Value (on a per Net Acre dollar amount basis) for such Title Defect Property;

(vi) if the Title Defect represents an obligation or Encumbrance upon or other defect in title to the Title Defect Property of a type not described above (which shall include any Title Defect which causes Seller not to have Defensible Title in and to a Title Defect Property with respect to any portion, but not the entirety, of such Title Defect Property), then the Title Defect Amount shall be determined by taking into account the Allocated Value of the affected Title Defect Property, the portion of the Title Defect Property affected by the Title Defect, the legal effect of the Title Defect, the potential economic effect of the Title Defect over the life of the affected Title Defect Property, the other applicable methodologies set forth in this *Section 5.3(g)*, and if any, the values placed upon the affected Title Defect Property by Buyer and Seller and such other reasonable factors as are necessary to make a proper evaluation;

(vii) the Title Defect Amount with respect to a Title Defect Property shall be determined without duplication of any costs or losses included in another Title Defect Amount hereunder; and

(viii) notwithstanding anything in this *Article V* to the contrary, the aggregate Title Defect Amounts attributable to the effects of all Title Defects upon any Title Defect Property shall not exceed the Allocated Value of such Title Defect Property (or portion thereof affected by such Title Defects).

If an individual Title Defect affects more than one Title Defect Property, the Title Defect Amounts for each such Title Defect Property shall be aggregated for purposes of determining whether the Title Defect Amounts of any such individual Title Defect in the aggregate exceed the Individual Title Defect Threshold. Further, if a Lease set forth on *Exhibit A* has the same Lease Number as one or more other Leases set forth on *Exhibit A*, for purposes of *Article V*, the Allocated Value of such Lease shall be the aggregate of the amounts set forth under the column titled "Allocated Values" for each such Lease with the same Lease Number.

(h) Title Benefit Amount. The Title Benefit Amount resulting from a Title Benefit shall be determined in accordance with the following methodology, terms and conditions (without duplication):

(i) if Buyer and Seller agree on the Title Benefit Amount, then that amount shall be the Title Benefit Amount;

(ii) if the Title Benefit represents an increase of (A) Seller's Net Revenue Interest for a Title Benefit Property by more than (B) the Net Revenue Interest set forth for such Title Benefit Property on *Exhibit A*, *Exhibit B* or *Schedule I-2*, then the Title Benefit Amount shall be the product of the Allocated Value of such Title Benefit Property *multiplied* by a fraction, the numerator of which is the Net Revenue Interest increase and the denominator of which is the Net Revenue Interest set forth for such Title Benefit Property on *Exhibit A*, *Exhibit B* or *Schedule I-2*, as applicable;

(iii) if the Title Benefit represents a discrepancy where (A) the actual Net Acres for such Title Benefit Property is greater than (B) the Net Acres set forth on *Exhibit A* for such Title Benefit Property, then the Title Benefit Amount shall be the product obtained by *multiplying* such Net Acre increase by the Allocated Value (on a per Net Acre dollar amount basis) for such Title Benefit Property; and

(iv) if the Title Benefit is of a type not described above (including the circumstances where a Title Benefit affects a portion, but not the entirety of any Lease), then the Title Benefit Amounts shall be determined by taking into account the Allocated Value of the Title Benefit Property, the portion of such Title Benefit Property affected by such Title Benefit, the legal effect of the Title Benefit, the potential economic effect of the Title Benefit over the life of such Title Benefit Property, the other applicable methodologies set forth in this *Section 5.3(h)*, if any, the values placed upon the Title Benefit by Buyer and Seller and such other reasonable factors as are necessary to make a proper evaluation.

(i) Title Defect Threshold and Deductible. (i) Subject to the last sentence of *Section 5.3(g)*, in no event shall there be any adjustments to the Purchase Price or other remedies provided by Seller hereunder for any individual Title Defect for which the Title Defect Amount for a Title Defect Property does not exceed $[***] (the "***Individual Title Defect Threshold***"); and (ii) in no event shall there be any adjustment to the Purchase Price or other remedies provided by Seller hereunder for any Title Defect for which the Title Defect Amount for a Title Defect Property exceeds the Individual Title Defect Threshold unless (A) the amount of the sum of (x) the aggregate Title Defect Amounts of all such Title Defect Properties where the Individual Title Defect Threshold is exceeded (but excluding any Title Defect Amounts attributable to Title Defects to the extent cured by Seller on or prior to the Title Defect Cure Deadline) less (y) the aggregate Title Benefit Amount of all Title Benefits, exceeds (B) an amount equal to [***] percent ([***]%) of the unadjusted Purchase Price, or, in the event Seller does not acquire the Other Working Interest Owner Interests prior to Closing Date in accordance with *Section 9.14*, an amount equal to [***] percent ([***]%) of the unadjusted Purchase Price less the Allocated Other Working Interest Owner Amount (the "***Title Defect Deductible***"), after which point Buyer shall be entitled to adjustments to the Purchase Price or other applicable remedies available hereunder, but only to the extent that the amount by which the sum of *clause (A)* above exceeds the Title Defect Deductible.

(j) Title Dispute Resolution. Seller and Buyer shall attempt to agree on matters regarding (i) all Title Defects, Title Benefits, Title Defect Amounts and Title Benefit Amounts, and (ii) the adequacy of any curative materials provided by Seller to cure any alleged Title Defect (any disagreements between the Parties as to *clauses (i)* and/or *(ii)*, collectively "***Title Disputes***") prior to the Title Defect Cure Deadline. Subject to, and without limitation of, *Section 10.4* and *Section 11.4* (and the Parties respective rights and remedies with respect thereto), if Seller and Buyer are unable to agree by the Title Defect Cure Deadline, the Title Disputes shall be exclusively and finally resolved pursuant to this *Section 5.3(j)*. There shall be a single arbitrator, who shall be a title attorney with at least 15 years' experience reviewing oil and gas titles involving properties in the State of Texas, as selected by the mutual agreement of Buyer and Seller within 15 days after the Dispute Date (the "***Title Arbitrator***"). If the Parties do not mutually agree upon the Title Arbitrator in accordance with this *Section 5.3(j)*, the Houston, Texas office of the AAA shall appoint the Title Arbitrator under such conditions as the AAA in its sole discretion deems necessary or advisable. The place of arbitration shall be Houston, Texas and the arbitration shall be conducted in accordance with the AAA Rules, to the extent such rules do not conflict with the terms of this *Section 5.3(j)*. Each of Buyer and Seller shall submit to the Title Arbitrator, with a simultaneous copy to the other Party, its proposed resolution of the applicable Title Dispute no later than 10 Business Days after the appointment of the Title Arbitrator pursuant to this *Section 5.3(j)*. The proposed resolution of the applicable Title Dispute shall include the best offer of the submitting Party in a single monetary amount that such Party is willing to pay or accept (as applicable) to settle the applicable Title Dispute. The Title Arbitrator's determination shall be made within 20 days after the end of such ten Business Day period after the submission of the Title Disputes and shall be final and binding upon both Parties, without right of appeal and shall be enforceable against the Parties in a court of competent jurisdiction. Once appointed, the Title Arbitrator shall have no *ex parte* communication with either Party related to Title Disputes. In making his determination, the Title Arbitrator shall make a determination of the Title Disputes submitted based solely on the single written submission of Seller and Buyer (and without any additional or supplemental submittals by any Party, except to the extent the Title Arbitrator requests additional information from either Party), shall be bound by the rules set forth in *Section 5.3(g)* and *Section 5.3(h)* and, subject to the foregoing, may consider such other matters as, in the opinion of the Title Arbitrator, are necessary to make a proper determination. The Title Arbitrator, however, may not award Buyer a greater Title Defect Amount than the Title Defect Amount claimed by Buyer in its applicable Title Defect Notice or a greater Title Benefit Amount than that claimed by Seller in its applicable Title Benefit Notice. The Title Arbitrator shall act as an expert for the limited purpose of determining the specific Title Disputes submitted by either Party, and may not award damages, interest or penalties to either Party with respect to any matter except as otherwise provided in the following sentence. The costs of the Title Arbitrator (and the AAA, if applicable) and the reasonable legal costs and expenses incurred by the Parties in connection with the arbitration shall be borne pro rata between the Parties with each Party being responsible for such costs and expenses to the extent the Title Arbitrator has not selected such Party's position on an aggregate dollar basis with respect to all amounts submitted for resolution by the Title Arbitrator. To the extent the award of the Title Arbitrator with respect to any Title Defect Amount or Title Benefit Amount is not taken into account as an adjustment to the Purchase Price in the Final Settlement Statement, then within 10 days after the date the Title Arbitrator delivers written notice to Buyer and Seller of his award with respect to a Title Dispute, and, subject to *Section 5.3(i)*, the amount, if any, so awarded to a Party shall first be satisfied out of the balance of the Defect Escrow Amount remaining after the application of *Section 3.6(b)* and, then, if applicable, the owing Party shall pay to the owed Party any outstanding awarded amount.

(k) Walk-Right Title Dispute Resolution. In the event a Party notifies the other Party of the intention to terminate this Agreement in accordance with *Section 14.1(f)*, Seller or Buyer may, prior to giving effect to *Section 14.1(f)*, as applicable, elect to submit all Title Disputes to the Title Arbitrator in accordance with the procedures set forth in *Section 5.3(j)*; *provided*, that notwithstanding anything to the contrary in *Section 5.3(j)*, such proceeding shall be solely to determine whether the aggregate adjustments pursuant to *Section 10.4* or *Section 11.4*, as applicable, in respect of any Title Disputes would, when taken together with all other adjustments pursuant to *Section 10.4* or *Section 11.4*, trigger the termination right under *Section 14.1(f)*. For the avoidance of doubt, if Seller or Buyer elect to submit to the Title Arbitrator in accordance with this *Section 5.3(k),* no Party may terminate this Agreement pursuant to *Section 14.1(f)* until final resolution of such arbitration unless the termination right under *Section 14.1(f)* would otherwise apply solely by virtue of any undisputed Title Defect Amounts, together the other aggregate adjustments pursuant to *Section 10.4* or *Section 11.4*, as applicable.

5.4 ***Casualty or Condemnation Loss***.

(a) Notwithstanding anything in this Agreement to the contrary but without limitation of Seller's indemnity obligations hereunder, from and after the Effective Time, if Closing occurs, Buyer shall assume all risk of loss with respect to production of Hydrocarbons through normal depletion (including watering out of any well, collapsed casing or sand infiltration of any well) and the depreciation of Conveyed Interests due to ordinary wear and tear, in each case, with respect to the Conveyed Interests, and Buyer shall not assert such matters as Casualty Losses or Title Defects hereunder.

(b) If, after the Execution Date but prior to the Closing Date, any portion of the Conveyed Interests is damaged or destroyed by fire or other casualty or is taken in condemnation or under right of eminent domain (each, a "***Casualty Loss***"), then Seller shall (i) in the case of any material Casualty Loss, promptly notify Buyer in writing following the occurrence of such Casualty Loss, which notice shall include reasonable detail of the nature of such Casualty Loss and (ii) if the Closing occurs, at the Closing, (A) pay to Buyer all sums received by Seller or any of its Affiliates from any Person with respect to such Casualty Loss and (B) assign, transfer and set over to Buyer, or subrogate Buyer to, all of Seller's and its Affiliates' respective right, title and interest (if any) in and to any insurance claims, unpaid awards and other rights and remedies against or with respect to any Person arising out of, or in connection with, such Casualty Loss. Neither Seller nor any of its Affiliates shall compromise, settle or adjust any amounts payable by reason of, or in connection with, any material Casualty Loss without the prior written consent of Buyer.

(c) If, after the Execution Date, but prior to the Closing Date, all or any portion of any of the Conveyed Interests is taken in condemnation or under right of eminent domain by any Governmental Authority, the affected Conveyed Interests (or portions thereof) shall be excluded from the Conveyed Interests to be conveyed to Buyer at the Closing to the extent of the interest affected by such condemnation or right of eminent domain and the Purchase Price will be reduced by the Allocated Value of such affected Conveyed Interests (or portion thereof).

(d) If in the event that the Parties have failed to agree in good faith by Closing on the Casualty Loss amount, such Casualty Loss amount will be determined by a single independent arbitrator with relevant experience in accordance with the procedures set forth in *Section 5.3(j)* (including with respect to the selection of such arbitrator), *mutatis mutandis*.

5.5 ***Preferential Purchase Rights and Consents to Assign***.

(a) With respect to each Preferential Purchase Right set forth on *Schedule 7.9*, not later than 10 days after the Execution Date, except for those Preferential Purchase Rights set forth on *Schedule 5.5*, which shall be sent within 80 days after the Execution Date (and, with respect to each Preferential Purchase Right that is not set forth on *Schedule 7.9* but is discovered by either Party after the Execution Date and before the Closing Date, not later than 10 days after the discovery thereof (or, if discovered by Buyer, no later than 10 days after Buyer notifies Seller in writing of such Preferential Purchase Rights)), Seller shall (x) send to the holder of each such Preferential Purchase Right a written notice in material compliance with the underlying agreement, Contract, Lease, Permit and/or Law applicable to or otherwise giving rise to such Preferential Purchase Right, requesting a waiver of such Preferential Purchase Right and (y) provide Buyer with a true and complete copy of each such notice promptly after Seller's delivery thereof in accordance with this *Section 5.5(a)*. In the event any delay in Closing results in an additional notice requirement or exercise period under any applicable Preferential Purchase Right, Seller shall be permitted to provide such notice or comply with such exercise period thereunder and shall promptly notify Buyer in writing if it takes any such action. Seller shall use commercially reasonable efforts to obtain waivers of all Preferential Purchase Rights prior to the Scheduled Closing Date; *provided*, *however*, Seller shall not be obligated to expend any monies or undertake any obligations (other than requesting such waivers) in connection with such obtaining waivers of such Preferential Purchase Rights. Seller covenants and agrees that it shall promptly provide written notice to Buyer after becoming aware of any actual or threatened dispute, disagreement or Proceeding affecting or with respect to any Preferential Purchase Right affecting or relating to the transactions contemplated by this Agreement.

(i) If, prior to Closing, any holder of a Preferential Purchase Right notifies Seller that it intends to consummate the purchase of the Conveyed Interests to which its Preferential Purchase Right applies, then (w) the Conveyed Interest(s) (or portion(s) thereof) that are subject to such Preferential Purchase Right shall be excluded from the Conveyed Interests to be assigned to Buyer at Closing (but only to the extent of the portion(s) of such Conveyed Interest(s) affected by such Preferential Purchase Right), (x) such Conveyed Interest(s) (or portion(s) thereof) shall, subject to the remaining provisions of this *Section 5.5(a)(i)*, thereafter constitute Excluded Assets and Other Matters, (y) the Purchase Price shall be reduced at Closing by the Allocated Value of such Conveyed Interest (or portion thereof) so excluded. Seller shall be entitled to all proceeds paid by any Person exercising a Preferential Purchase Right prior to Closing and (z) notwithstanding the foregoing, Seller shall continue to conduct operations in the ordinary course during the period beginning on the Closing Date and ending 180 days thereafter with respect to the applicable Conveyed Interests subject to such Preferential Purchase Rights. If (A) on or before 180 days following the Closing Date, such holder of such Preferential Purchase Right fails to consummate the purchase of the Conveyed Interest (or portion thereof) covered by such Preferential Purchase Right, or (B) such Preferential Purchase Right holder waives in writing such Preferential Purchase Right at any time during the 180-day period following the Closing Date, and, in each case, there is no pending or threatened dispute, disagreement or Proceeding with respect to any matter related to any such Preferential Purchase Right, then (1) Seller shall promptly notify Buyer in writing thereof, (2) Buyer shall purchase, on or before the date that is ten Business Days following receipt of such notice, such Conveyed Interest(s) (or portion(s) thereof) that were so excluded from the Conveyed Interests assigned to Buyer at Closing, under the terms of this Agreement and for a price equal to the amount by which the Purchase Price was reduced at Closing with respect to such excluded Conveyed Interest(s) (or portion(s) thereof) (as such amount is appropriately adjusted in accordance with the other terms of this Agreement) and (3) Seller shall assign to Buyer such Conveyed Interest(s) (or portion(s) thereof) pursuant to an instrument in substantially the same form as the Assignment or Deed, as applicable, and such Conveyed Interest(s) (or portion(s) thereof) shall cease to be Excluded Assets and Other Matters; *provided*, *however*, that notwithstanding anything to the contrary herein, Buyer shall have the right to elect (in its sole discretion) not to purchase or acquire any Conveyed Interests (or portion(s) thereof) that are subject to or affected by a Preferential Purchase Right that is described in *subclause (A)* of this *Section 5.5(a)(i)* if there is an unresolved dispute, disagreement or Proceeding with respect to such Preferential Purchase Right on the date that is 180 days following the Closing Date.

(ii) If (A) a Preferential Purchase Right has been waived in writing by the applicable holder thereof prior to Closing or (B) as of the Closing, the time period for the exercise of any Preferential Purchase Right expires without being exercised or waived in writing by the holder thereof and, in

each case, there is no pending or threatened dispute, disagreement or Proceeding with respect to any matter related to any such Preferential Purchase Right, then, the Conveyed Interests that are subject to such Preferential Purchase Rights shall be sold to Buyer at Closing pursuant to the provisions of this Agreement.

(iii) If, as of the Closing, (A) the time period for exercising any Preferential Purchase Right has not expired without exercise prior to Closing (and such Preferential Purchase Right has not been waived in writing by the holder thereof) or (B) there is any pending or threatened dispute, disagreement or Proceeding with respect to any matter related to any Preferential Purchase Right, then (unless Buyer expressly agrees otherwise in writing) (x) the Conveyed Interest(s) (or portion(s) thereof) subject to any such Preferential Purchase Right shall be excluded from the Conveyed Interests assigned to Buyer at Closing, (y) such Conveyed Interest(s) (or portion(s) thereof) shall, subject to the remaining provisions of this *Section 5.5(a)(iii)*, thereafter constitute Excluded Assets and Other Matters, and (z) the Purchase Price shall be adjusted downward at Closing by the Allocated Value attributable to the affected Conveyed Interests. If, prior to the date that is 180 days following the Closing, such Preferential Purchase Right expires without exercise by the holder thereof (or is otherwise waived in writing by the holder thereof) and, as of such date, there is no pending or threatened dispute, disagreement or Proceeding with respect to any matter related to such Preferential Purchase Right, then (1) Seller shall promptly notify Buyer in writing thereof, (2) Buyer shall purchase, on or before the date that is ten Business Days following receipt of such notice, such Conveyed Interest(s) (or portion(s) thereof) that were so excluded from the Conveyed Interests assigned to Buyer at Closing, under the terms of this Agreement and for a price equal to the amount by which the Purchase Price was reduced at Closing with respect to such excluded Conveyed Interest(s) (or portion(s) thereof) (as such amount is appropriately adjusted in accordance with the other terms of this Agreement) and (3) Seller shall assign to Buyer such Conveyed Interest(s) (or portion(s) thereof) pursuant to an instrument in substantially the same form as the Assignment and such Conveyed Interest(s) (or portion(s) thereof) shall cease to be Excluded Assets and Other Matters.

(b) With respect to each Consent set forth on *Schedule 7.4* (other than, for purposes of clarity, the Post-Closing Consents or FCC Consents), Seller, not later than 10 days after the Execution Date (and, other than Post-Closing Consents or FCC Consents, with respect to each such Consent that is required to be set forth on *Schedule 7.4* but is not set forth on *Schedule 7.4* and is discovered by either Party after the Execution Date and before the Closing Date), not later than 10 days after the discovery thereof (or, if discovered by Buyer, no later than 10 days after Buyer notifies Seller in writing of such Consent), shall

(i) deliver to the holder of each such Consent a written notice in material compliance with the applicable underlying agreement, Contract, Lease, Permits or Law applicable to or otherwise giving rise to such Consent seeking such holder's consent to the transactions contemplated hereby (or waiver thereof) and

(ii) provide Buyer with a true and complete copy of each such notice promptly after Seller's delivery thereof in accordance with this *Section 5.5(b)*. Seller covenants and agrees that it shall promptly provide written notice to Buyer upon becoming aware of any actual or threatened dispute, disagreement or Proceeding affecting or related to any Consent.

(iii) If, as of the Closing, (A) Seller fails to obtain any Required Consent (or waiver in writing by the holder thereof) set forth in *Schedule 7.4* or any Required Consent (or waiver in writing by the holder thereof) that is required to be set forth on *Schedule 7.4* but is not set forth on *Schedule 7.4* and is discovered by either Party after the Execution Date and before the Closing Date or (B) there is any pending or threatened dispute, disagreement or Proceeding with respect to any matter related to any Required Consent, then, in each case (unless Buyer, in its sole discretion, elects to expressly waive such consent in writing), (1) the Conveyed Interest(s) (or portion(s) thereof) that are subject to any such Required Consent shall be excluded from the Conveyed Interests to be assigned to Buyer at Closing, (2) such Conveyed Interest(s) (or portion(s) thereof) shall, subject to the remaining provisions of this *Section 5.5(b)(i)*, thereafter constitute Excluded Assets and Other Matters and (3) the Purchase Price shall be reduced at Closing by the Allocated Value of such Conveyed Interest(s) (or portion(s) thereof). In the event that (x) any such Required Consent (or a waiver in writing by the holder thereof) is obtained prior to the date that is 180 days following Closing and (y) as of such date, there is no pending or threatened dispute, disagreement or Proceeding with respect to any matter related to such Required Consent, then, (a) Seller shall deliver written notice thereof to Buyer and (b) on the date that is ten Business Days after such notice is delivered to Buyer (i) Buyer shall purchase the Conveyed Interest(s) (or portion(s) thereof) that were so excluded as a result of such un-obtained and/or disputed Required Consent and pay to Seller the amount by which the Purchase Price was reduced at Closing with respect to such Conveyed Interest(s) (or portion(s) thereof) (as such amount is appropriately adjusted in accordance with the other terms of this Agreement) and (ii) Seller shall assign to Buyer such Conveyed Interest(s) (or portion(s) thereof) pursuant to an instrument in substantially the same form as the Assignment and such Conveyed Interest(s) (or portion(s) thereof) shall cease to be Excluded Assets and Other Matters. Notwithstanding the foregoing sentence, Buyer shall have the right, but not the obligation, to waive any Required Consent (in Buyer's sole discretion) by delivering written notice to Seller. If such a waiver is delivered to Seller and, at such time, the Closing has occurred, then Seller shall promptly assign to Buyer the Conveyed Interest(s) subject to any such waived Required Consent, and Buyer shall pay to Seller an amount equal to the amount by which the Purchase Price was reduced at Closing with respect to such Conveyed Interest(s) (as such amount is appropriately adjusted in accordance with the other terms of this Agreement), and Buyer shall thereafter have no claim against Seller in connection with Seller's failure to obtain such Required Consent (or a waiver in writing by the holder thereof) and shall release and indemnify the Seller Indemnified Parties from any Liability to the extent arising from the failure to obtain such Required Consent (or a waiver in writing by the holder thereof).

(iv) If, as of the Closing, (A) Seller fails to obtain any Medium Consent (or waiver in writing by the holder thereof) set forth in *Schedule 7.4* or any Medium Consent (or waiver in writing by the holder thereof) that is required to be set forth on *Schedule 7.4* but is not set forth on *Schedule 7.4* and is discovered by either Party after the Execution Date and before the Closing Date or (B) there is any pending or threatened dispute, disagreement or Proceeding with respect to any matter related to any Medium Consent, then, in each case (unless Buyer, in its sole discretion, elects to expressly waive such consent in writing), (1) the Conveyed Interest(s) (or portion(s) thereof) that are subject to any such Medium Consent shall be excluded from the Conveyed Interests to be assigned to Buyer at Closing, (2) such Conveyed Interest(s) (or portion(s) thereof) shall, subject to the remaining provisions of this *Section 5.5(b)(ii)*, thereafter constitute Excluded Assets and Other Matters and (3) the Purchase Price shall be reduced at Closing by the Allocated Value of such Conveyed Interest(s) (or portion(s) thereof). If, as of the date that is 180 days following the Closing, (x) any such Medium Consent (or a waiver in writing by the holder thereof) is obtained or (y) as of such date, any such Medium Consent is not obtained (or a waiver in writing by the holder thereof is not obtained) and (A) there is no pending or threatened dispute, disagreement or Proceeding with respect to any matter related to such Medium Consent and (B) such Medium Consent is not denied in writing by the holder thereof, then, (a) Seller shall deliver written notice thereof to Buyer and (b) on the date that is ten Business Days after such notice is delivered to Buyer (i) Buyer shall purchase the Conveyed Interest(s) (or portion(s) thereof) that were so excluded as a result of such previously un-obtained and/or disputed Medium Consent and pay to Seller the amount by which the Purchase Price was reduced at Closing with respect to such Conveyed Interest(s) (or portion(s) thereof) (as such amount is appropriately adjusted in accordance with the other terms of this Agreement) and (ii) Seller shall assign to

Buyer such Conveyed Interest(s) (or portion(s) thereof) pursuant to an instrument in substantially the same form as the Assignment or Deed, as applicable, and such Conveyed Interest(s) (or portion(s) thereof) shall cease to be Excluded Assets and Other Matters. Notwithstanding the foregoing sentence, Buyer shall have the right, but not the obligation, to waive any Medium Consent (in Buyer's sole discretion) by delivering written notice to Seller. If such a waiver is delivered to Seller and, at such time, the Closing has occurred, then Seller shall promptly assign to Buyer the Conveyed Interest(s) subject to any such waived Medium Consent, and Buyer shall pay to Seller an amount equal to the amount by which the Purchase Price was reduced at Closing with respect to such Conveyed Interest(s) (as such amount is appropriately adjusted in accordance with the other terms of this Agreement), and Buyer shall thereafter have no claim against Seller in connection with Seller's failure to obtain such Medium Consent (or a waiver in writing by the holder thereof) and shall release and indemnify the Seller Indemnified Parties from any Liability to the extent arising from the failure to obtain such Medium Consent (or a waiver in writing by the holder thereof).

(v) Prior to Closing, other than Post-Closing Consents (and subject to and except as otherwise provided in *Section 9.3*), and, with respect to any Medium Consents or Required Consents that are excluded at Closing pursuant to this *Section 5.5*, for a period of 180 days after Closing, Seller and Buyer shall use their respective commercially reasonable efforts to obtain all Consents listed on *Schedule 7.4* (and any Consent that is not set forth on *Schedule 7.4* but is discovered by either Party after the Execution Date and before the Closing Date); *provided*, *however*, that neither Party shall be required to expend any monies or undertake any obligations (other than requesting such Consents) in order to obtain any such Consent (other than any ordinary course transfer fees expressly set forth in the underlying instrument, which transfer fees are described on *Schedule 5.5(b)(iii)* (which shall be borne by Buyer)). Subject to the foregoing, Buyer agrees to cooperate in good faith with Seller to provide Seller with any information or documentation that may be reasonably requested in writing by Seller and/or the Third Party holder(s) of such Consents in order to facilitate the process of obtaining such Consents, if, and to the extent, such requested information or documentation is in Buyer's or any of its Affiliates' possession or control and is not subject to any confidentiality and/or non-disclosure restrictions prohibiting or restricting Buyer's disclosure thereof.

(vi) Other than Post-Closing Consents, Required Consents, Medium Consents or the FCC Consents, if Seller fails to obtain a Consent, and as of such date, there is no pending or threatened dispute, disagreement or Proceeding with respect to any matter related to such Consent and such Consent has not been denied in writing, then the Conveyed Interest(s) (or portion(s) thereof) subject to such un-obtained Consent shall nevertheless be assigned by Seller to Buyer at Closing as part of the Conveyed Interests and Buyer shall have no claim against Seller and hereby releases and indemnifies the Seller Indemnified Parties from any Liability to the extent arising from the failure to obtain such Consent.

(c) With respect to any Post-Closing Consents or any post-Closing notice or other similar requirements applicable to the transfer of the Conveyed Interests in connection with the transactions contemplated hereby ("***Buyer Consent/Notice Requirements***"), (i) Buyer shall use commercially reasonable efforts to comply with such Buyer Consent/Notice Requirements, (ii) Buyer shall have no claim against, and hereby releases and indemnifies the Seller Indemnified Parties from any Liability to the extent relating to compliance with such Buyer Consent/Notice Requirements, (iii) Buyer assumes and shall be solely responsible from and after Closing for any Liabilities arising from the failure to comply with or to have obtained any such Buyer Consent/Notice Requirements and (iv) Seller shall cooperate in good faith with Buyer in connection with any such Buyer Consent/Notice Requirements.

(d) The provisions of this *Section 5.5* shall apply *mutatis mutandis* to the applicable Affiliate of Seller (versus Seller) in the case of any of the Conveyed Interests are owned by such Affiliate of Seller; provided, however, that, notwithstanding the foregoing, Seller shall (i) cause such Affiliates to comply with and fulfill any and all such applicable obligations set forth in this *Section 5.5* and (ii) remain liable and responsible for all purposes of this Agreement for any such Affiliate's failure to comply with and fulfill any such obligations set forth in this *Section 5.5*.

ARTICLE VI
ENVIRONMENTAL MATTERS

6.1 ***Environmental Defects***.

(a) Assertions of Environmental Defects. As a condition to Buyer asserting any claim with respect to any alleged Environmental Defect, Buyer must deliver claim notices to Seller meeting the requirements of this *Section 6.1(a)* (collectively the "***Environmental Defect Notices***" and individually an "***Environmental Defect Notice***") not later than the Environmental Defect Claim Date setting forth any matters which, in Buyer's reasonable opinion, constitute Environmental Defects and which Buyer intends to assert as Environmental Defects pursuant to this *Section 6.1*. Subject to, and without limitation of, *clause (vi)* of *Schedule 13.1(b)* and Seller's representations and warranties set forth in *Section 7.18* (and, in each case, Seller's indemnity obligations related thereto), for all other purposes of this Agreement, Buyer shall be deemed to have waived, and Seller shall have no Liability for, (i) any Environmental Defect which Buyer fails to assert as an Environmental Defect by a timely and properly delivered Environmental Defect Notice received by Seller before the Environmental Defect Claim Date and (ii) any Environmental Condition that is not an Environmental Defect, with such liabilities becoming "***Buyer's Environmental Liabilities.***" To be effective, each Environmental Defect Notice shall be in writing and shall include (A) a description of the matter constituting the alleged Environmental Defect (including the applicable Environmental Law violated or implicated thereby, if any) and the Conveyed Interest(s) affected by such alleged Environmental Defect (each, an "***Environmental Defect Property***"), (B) the Allocated Value of each Environmental Defect Property (or portions thereof) affected by such alleged Environmental Defect, as applicable (*provided* nothing herein shall prevent Buyer from asserting an Environmental Defect for a Conveyed Interest where the Allocated Value is zero), (C) supporting documents reasonably necessary for Seller to identify the existence of such alleged Environmental Defect (any and all of which supporting documents may be furnished via access to a web link or ftp site (in lieu of other means of delivery)), and (D) a calculation of the Remediation Amount (itemized in reasonable detail) that Buyer asserts is attributable to such alleged Environmental Defect with respect to each Environmental Defect Property. Notwithstanding anything to the contrary in this Agreement, the failure of an Environmental Defect Notice to include any of the information or documentation identified or described in *Section 6.1(a)(A)* through *Section 6.1(a)(D)* above shall not render such Environmental Defect Notice void or ineffective if such Environmental Defect Notice otherwise materially complies with the requirements set forth in this *Section 6.1(a)* and provides Seller with sufficient information to evaluate the alleged Environmental Defect. Buyer's calculation of the Remediation Amount included in the Environmental Defect Notice must describe in reasonable detail the Remediation proposed for the alleged Environmental Defect that gives rise to the asserted Environmental Defect and identify

all assumptions used by Buyer in calculating the Remediation Amount, including the standards that Buyer asserts must be met to comply with Environmental Laws.

(b) Seller's Right to Cure. Seller shall have the right, but not the obligation, to cure any asserted Environmental Defect on or before the Closing Date (the "***Environmental Defect Cure Deadline***"). To give Seller an opportunity to commence reviewing and curing Environmental Defects, Buyer agrees to use reasonable efforts to give Seller written notice of all alleged Environmental Defects discovered by Buyer as soon as practical under the circumstance, which notice may be preliminary in nature and supplemented prior to the Environmental Defect Claim Date; *provided* that the failure to deliver such preliminary notice shall not affect Buyer's right to submit an Environmental Defect Notice with respect to such Environmental Defects. An election by Seller to attempt to cure an Environmental Defect shall be without prejudice to its other rights under this *Section 6.1* and shall not constitute an admission against interest or a waiver of Seller's right to dispute the existence, nature or value of, or cost to Remediate, the alleged Environmental Defect. Seller shall be entitled to provide Buyer notice of Seller's election to cure any Environmental Defect no later than 5 Business Days after the Environmental Defect Claim Date, and the failure to provide notice by such date shall be deemed an election not to cure (or to attempt to cure) by Seller.

(c) Remedies for Environmental Defects. Subject to Seller's right to dispute the existence of an Environmental Defect in accordance with *Section 6.1(f)* and/or the Remediation Amount asserted with respect thereto, and subject to the limitations in *Section 6.1(e)* and the rights of the Parties pursuant to *Section 14.1(f)*, in the event that Seller has not cured an Environmental Defect that has been timely and properly asserted by Buyer in accordance with *Section 6.1(a)* by the expiration of the Environmental Defect Cure Deadline and such Environmental Defect has not been waived by Buyer, Seller shall elect to:

(i) reduce the Purchase Price or Final Price, as applicable, by the applicable Remediation Amount; or

(ii) retain the entirety of the applicable Environmental Defect Property, in which event the Purchase Price shall be reduced by an amount equal to the Allocated Value of such Environmental Defect Property, provided the remedy set forth in this *Section 6.1(c)(ii)* shall only be available, if the Remediation Amount applicable to such Environmental Defect equals or exceeds the greater of (A) seventy-five percent (75%) of the Allocated Value of the applicable Environmental Defect Property and (B) $750,000, and, in each case of an Environmental Defect Property that is not a Lease or Well, the applicable Environmental Defect Property would not be, as determined by Buyer in good faith, material with respect to the use, value or operation of the Conveyed Interests related to and including such Environmental Defect Property, taken as a whole, from and after the Closing; *provided* that Buyer shall have the right to elect the remedy set forth in this *Section 6.1(c)(ii)* if such remedy is available but is not elected by Seller. In connection with the remedy set forth in this *Section 6.1(c)(ii)*, Seller acknowledges and agrees that (y) it shall retain all Liabilities and obligations of any kind related or applicable to any such Environmental Defect Property (including, for purposes of clarity, with respect to the Environmental Defect(s) applicable thereto) and (z) such Environmental Defect Property shall thereafter constitute an Excluded Asset and Other Matters for all purposes of this Agreement.

In the event that, as of the Closing Date, there are Environmental Defects with respect to which (A) Seller has not elected to Remediate pursuant to *Section 6.1(b)* or failed to Remediate all or part thereof prior to the Environmental Defect Cure Deadline and (B) Seller has not disputed the alleged Environmental Defect or the alleged Remediation Amount, the Purchase Price shall be reduced at Closing by the aggregate Remediation Amount of such Environmental Defects (or, the Allocated Value of the applicable Environmental Defect Property in the event Seller has retained such Environmental Defect Property pursuant to this *Section 6.1(c)(ii)*), subject to the limitations in *Section 6.1(e)*. If Seller and Buyer are unable to agree on the existence or scope of any Environmental Defect or the Remediation Amount at the Closing, Buyer's good faith determination with respect to such Environmental Defect or Remediation Amount shall be utilized for purposes of determining the Defect Escrow Amount at the Closing. If the Purchase Price is reduced for any Environmental Defect pursuant to this *Section 6.1* or if the Purchase Price would have been reduced for any Environmental Defect but for the application of the Individual Environmental Threshold or the Environmental Defect Deductible, Buyer shall be deemed to have assumed responsibility for such Environmental Defect and for all Liabilities with respect thereto and Buyer's obligations with respect to the foregoing shall be deemed to constitute Assumed Obligations. Subject to and without limitation of, *clause (vi)* of *Schedule 13.1(b)* and Seller's representations and warranties set forth in *Section 7.1*8 (and, in each case, Seller's indemnity obligations related thereto) and Buyer's rights to terminate this Agreement pursuant to *Section 14.1(f)*, Buyer shall also be deemed to have assumed responsibility for any and all Environmental Conditions which do not constitute an Environmental Defect under this Agreement and for all Liabilities with respect thereto and Buyer's obligations with respect to the foregoing shall be deemed to constitute Assumed Obligations.

(d) Exclusive Remedy. Subject to and without limitation of, *clause (vi)* of *Schedule 13.1(b)* and Seller's representations and warranties set forth in *Section 7.18* (and, in each case, Seller's indemnity obligations related thereto) and Buyer's rights to terminate this Agreement pursuant to *Section 14.1(f)* or under *Article XIII* solely with respect to *clauses (vi)* and *(viii)* of *Schedule 13.1(b)*, to any Environmental Condition with respect to any Conveyed Interest or other environmental matter. With respect to all Non-Cost Bearing Interests, (i) there shall be deemed to be no Environmental Defect and (ii) Buyer shall not be entitled to assert Environmental Defects with respect to such interests.

(e) Environmental Threshold and Deductible. (i) Subject to the last sentence of this *Section 6.1(e)*, in no event shall there be any adjustment to the Purchase Price or other remedies provided by Seller for any individual Environmental Defect for which the Remediation Amount (net to Seller's interests) for an Environmental Defect Property does not exceed $[***] (the "***Individual Environmental Threshold***"); and (ii) in no event shall there be any adjustment to the Purchase Price or other remedies provided by Seller for any Environmental Defect for which the Remediation Amount for an Environmental Defect Property exceeds the Individual Environmental Threshold unless (A) the amount of the sum of the aggregate Remediation Amounts of all such Environmental Defect Properties where the Individual Environmental Threshold is exceeded (but excluding any Remediation Amounts attributable to any Environmental Defects to the extent cured by Seller prior to the Environmental Defect Cure Deadline and any Conveyed Interests subject to Environmental Defects that are retained by Seller, pursuant to *Section 6.1(c)(ii)*) exceeds (B) an amount equal to [***] percent ([***]%) of the unadjusted Purchase Price, or, in the event Seller does not acquire the Other Working Interest Owner Interests prior to the Closing Date in accordance with *Section 9.14*, the amount equal to [***] percent ([***]%) of the unadjusted Purchase Price less the Allocated Other Working Interest Owner Amount (the "***Environmental Defect Deductible***"), after which point Buyer shall be entitled to adjustments to the Purchase Price or other applicable remedies available hereunder, but only to the extent that the amount

by which the sum of *clause (A)* above exceeds the Environmental Defect Deductible. If an individual Environmental Defect affects more than one Environmental Defect Property, the Remediation Amounts for each such Environmental Defect Property shall be aggregated for purposes of determining whether the Remediation Amounts of any such Environmental Defects in the aggregate exceed the Individual Environmental Threshold. For the avoidance of doubt, if an Environmental Defect is of a similar type or circumstance as another Environmental Defect (e.g., Environmental Defects related to separate air permits), such Environmental Defects shall not be aggregated for purposes of determining the Individual Environmental Threshold.

(f) Environmental Dispute Resolution. Seller and Buyer shall attempt to agree on (i) all Environmental Defects and Remediation Amounts prior to the Environmental Defect Cure Deadline and (ii) the adequacy of any cure by Seller of any asserted Environmental Defect prior to the Environmental Defect Cure Deadline (any disagreements between the Parties as to items (i) and/or (ii), collectively, the "***Disputed Environmental Matters***"). If Seller and Buyer are unable to agree by the Environmental Defect Cure Deadline, the Disputed Environmental Matters shall be exclusively and finally resolved by arbitration pursuant to this *Section 6.1(f)*. There shall be a single arbitrator, who shall be an environmental attorney with at least 15 years' experience pertaining to environmental matters involving oil and gas producing properties in the State of Texas, as selected by the mutual agreement of Buyer and Seller within 15 days after the Dispute Date (the "***Environmental Arbitrator***"). If the Parties do not mutually agree upon the Environmental Arbitrator in accordance with this *Section 6.1(f)*, the Houston, Texas office of the AAA shall appoint such Environmental Arbitrator under such conditions as the AAA in its sole discretion deems necessary or advisable. The place of arbitration shall be Houston, Texas, and the arbitration shall be conducted in accordance with the AAA Rules, to the extent such rules do not conflict with the terms of this *Section 6.1(f)*. Each of Buyer and Seller shall submit to the Environmental Arbitrator, with a simultaneous copy to the other Party, a single written statement of its position on the Disputed Environmental Matters in question, together with a copy of this Agreement and any supporting material that such Party desires to furnish, not later than the tenth Business Day after appointment of the Environmental Arbitrator. The Environmental Arbitrator's determination shall be made within 20 days after the end of such ten Business Day period after the submission of the Disputed Environmental Matters and shall be final and binding upon both Parties, without right of appeal and shall be enforceable against the Parties in a court of competent jurisdiction. Once appointed, the Environmental Arbitrator shall have no *ex parte* communication with either Party related to Disputed Environmental Matters. In making his determination, the Environmental Arbitrator shall make a determination of the Disputed Environmental Matters submitted based solely on the single written submission of Seller and Buyer (and without any additional or supplemental submittals by any Party, except to the extent the Environmental Arbitrator requests additional information from either Party), shall be bound by the rules set forth in this *Section 6.1* and, subject to the foregoing, may consider such other legal and industry matters as in the opinion of the Environmental Arbitrator are necessary or helpful to make a proper determination. The Environmental Arbitrator, however, may not award Buyer a greater Remediation Amount than the Remediation Amount claimed by Buyer in its applicable Environmental Defect Notice. The Environmental Arbitrator shall act as an expert for the limited purpose of determining specific Disputed Environmental Matters submitted by either Party and may not award damages, interest or penalties to either Party with respect to any matter, except as otherwise provided in the following sentence. The costs of the Environmental Arbitrator (and the AAA, if applicable) and the reasonable legal costs and expenses incurred by the Parties in connection with the arbitration shall be borne pro rata between the Parties with each Party being responsible for such costs and expenses to the extent the Environmental Arbitrator has not selected such Party's position on an aggregate dollar basis with respect to all amounts submitted for resolution by the Environmental Arbitrator. To the extent that the award of the Environmental Arbitrator with respect to any Remediation Amount is not taken into account as an adjustment to the Purchase Price in the Final Settlement Statement, then within ten days after the date the Environmental Arbitrator delivers written notice to Buyer and Seller of his award with respect to any Remediation Amount, and, subject to *Section 6.1(e)*, the amount, if any, so awarded to a Party shall first, be satisfied out of the balance of the Defect Escrow Amount remaining after application of *Section 3.6(b)* and, then, if applicable, the owing Party shall pay to the owed Party any outstanding awarded amounts. Notwithstanding anything herein to the contrary, if there is any dispute as to an Environmental Defect that affects whether either Party may elect to exclude the Environmental Defect Property pursuant to *Section 6.1(c)(ii)* with respect to an Environmental Defect, then the applicable Environmental Defect Property shall be excluded from the Conveyed Interests assigned at Closing and the Allocated Value of such Environmental Defect Property shall be paid into the Escrow Account at Closing. If the Environmental Arbitrator determines that such Party does not have the right to elect to exclude the Environmental Defect Property pursuant to *Section 6.1(c)(ii)* with respect to an Environmental Defect, then within ten days after the date on which the Environmental Arbitrator delivers written notice to Buyer and Seller of such determination, (A) Seller shall assign to Buyer the retained Environmental Defect Property pursuant to an instrument in substantially the same form as the Assignment and (B) the Allocated Value less the determined Remediation Amount, if any, shall first, be paid to Seller out of the balance of the Defect Escrow Amount remaining after the application of *Section 3.6(b)* and, then, if applicable, by Buyer.

(g) Walk-Right Environmental Dispute Resolution. In the event a Party notifies the other Party of the intention to terminate this Agreement in accordance with *Section 14.1(f)*, Seller or Buyer may, prior to giving effect to *Section 14.1(f)*, as applicable, elect to submit all Disputed Environmental Matters to the Environmental Arbitrator in accordance with the procedures set forth in *Section 6.1(f)*; *provided*, that notwithstanding anything to the contrary in *Section 6.1(f)*, such proceeding shall be solely to determine whether the aggregate adjustments pursuant to *Section 10.4* or *Section 11.4*, as applicable, in respect of any Disputed Environmental Matters would, when taken together with all other adjustments pursuant to *Section 10.4* or *Section 11.4*, trigger the termination right under *Section 14.1(f)*. For the avoidance of doubt, if Seller or Buyer elect to submit to the Environmental Arbitrator in accordance with this *Section 6.1(g),* no Party may terminate this Agreement pursuant to *Section 14.1(f)* until final resolution of such arbitration unless the termination right under *Section 14.1(f)* would otherwise apply solely by virtue of any undisputed Remediation Amounts, together the other aggregate adjustments pursuant to *Section 10.4* or *Section 11.4*, as applicable.

6.2 ***NORM, Asbestos, Wastes and Other Substances***. Buyer acknowledges that the Conveyed Interests have been used for exploration, development, and production of oil and gas and that there may be petroleum, produced water, wastes, or other substances or materials located in, on or under the Conveyed Interests or associated with the Conveyed Interests. Equipment and sites included in the Conveyed Interests may contain asbestos, NORM or other Hazardous Substances. NORM may affix or attach itself to the inside of wells, materials, and equipment as scale, or in other forms. The wells, materials, and equipment located on the Conveyed Interests or included in the Conveyed Interests may contain asbestos, NORM and other wastes or Hazardous Substances. NORM containing material and/or other wastes or Hazardous Substances may have come in contact with various environmental media, including water, soils or sediment. Special procedures may be required for the assessment, remediation, removal, transportation, or disposal of any affected environmental media, wastes, asbestos, NORM and other Hazardous Substances from the Conveyed Interests. Notwithstanding anything in this Agreement to the contrary, Buyer shall not be permitted to claim any Environmental Defect on the account of the presence of NORM or asbestos-containing materials that are

non-friable, unless and only to the extent such presence of NORM or asbestos-containing materials that are non-friable constitutes an Environmental Condition resulting in a violation of Environmental Laws.

ARTICLE VII
REPRESENTATIONS AND WARRANTIES OF SELLER

Seller represents and warrants (and with respect to any Subject Property that is not operated by Seller, Seller represents and warrants to Seller's Knowledge) to Buyer, (a) with respect to all Conveyed Interests other than the Other Working Interest Owner Interests, as of the Execution Date and the Closing Date, and (b) with respect to the Other Working Interest Owner Interests if acquired by Seller prior to the Closing Date, as of the Other Working Interest Owner Acquisition Date and the Closing Date, in each case of (a) and (b), as follows:

7.1 ***Organization, Existence and Qualification***. Seller is a limited partnership duly formed and validly existing under the Laws of the State of Oklahoma. Seller, and each of Seller's Affiliates holding or owning any of the Conveyed Interests, has all requisite power and authority to own and operate its property (including the Conveyed Interests) and to carry on its business as now conducted. Seller is duly licensed or qualified to do business as a foreign limited partnership in all jurisdictions in which it carries on business or owns assets and such qualification is required by Law.

7.2 ***Authorization, Approval and Enforceability***. Seller and any of its Affiliates has full power and authority to enter into and perform this Agreement and the Transaction Documents to which it is a party and the transactions contemplated herein and therein. The execution, delivery, and performance by Seller and any of its Affiliates holding or owning any interest in the Conveyed Interests of this Agreement and each other Transaction Document to which it is a party have been duly and validly authorized and approved by all necessary limited partnership action on the part of Seller or its Affiliates, as applicable. Assuming the due authorization, execution and delivery by the other parties to such documents, this Agreement is, and the Transaction Documents to which Seller and its Affiliates is a party when executed and delivered by Seller and its Affiliates will be, the valid and binding obligations of Seller and its Affiliates and enforceable against Seller and its Affiliates in accordance with their respective terms, subject to the effects of bankruptcy, insolvency, reorganization, moratorium, and similar Laws, as well as to principles of equity (regardless of whether such enforceability is considered in a proceeding in equity or at law).

7.3 ***No Conflicts***. Assuming the receipt of all Regulatory Approvals and Consents and the waiver of, or compliance with, all Preferential Purchase Rights applicable to the transactions contemplated hereby, the execution, delivery, and performance by Seller and its Affiliates of this Agreement and the Transaction Documents to which it is a party and the consummation of the transactions contemplated herein and therein will not (a) conflict with or result in a breach of any provisions of the organizational documents of Seller or each of Seller's Affiliates holding or owning any of the Conveyed Interests, (b) except for Permitted Encumbrances, result in a default, breach or violation or the creation of any Encumbrance or give rise to any right of termination, cancellation, or acceleration under any of the terms, conditions, or provisions of any note, bond, mortgage, indenture, or other Applicable Contract to which Seller, and each of Seller's Affiliates holding or owning any of the Conveyed Interests, is a party or by which Seller or any of Seller's Affiliates holding or owning any of the Conveyed Interests may be bound or (c) violate any Law applicable to Seller, each of Seller's Affiliates holding or owning any of the Conveyed Interests, except in the case of *clauses (b)* and *(c)* where such default, breach, violation, Encumbrance, termination, cancellation, acceleration or violation would not be reasonably expected to have a Material Adverse Effect.

7.4 ***Consents***. There are no restrictions to assignment, including requirements for consents from Third Parties to any assignment (in each case), that Seller, or any of Seller's Affiliates holding or owning any of the Conveyed Interests, is required to obtain in connection with the transfer of the Conveyed Interests by Seller, and each of Seller's Affiliates holding or owning any of the Conveyed Interests, to Buyer or the consummation of the transactions contemplated by this Agreement by Seller and any of its Affiliates holding or owning any of the Conveyed Interests (each, a "***Consent***"), except (a) as set forth in *Schedule 7.4*, (b) for Post-Closing Consents, (c) for any Preferential Purchase Rights applicable to the transactions contemplated by this Agreement which are set forth on *Schedule 7.9*, (d) any notice to be given after consummation of the transactions contemplated hereby and (e) for any Regulatory Approvals. *Schedule 7.4* includes a complete and correct list of all Consents (other than Post-Closing Consents, Preferential Purchase Rights, notices to be given after consummation of the transactions contemplated hereby and any Regulatory Approvals) relating to the Conveyed Interests and/or the consummation of the transactions contemplated by this Agreement.

7.5 ***Bankruptcy***. There are no bankruptcy, reorganization, insolvency or receivership proceedings pending, being contemplated by or, to Seller's Knowledge, threatened in writing against Seller or any of its respective Affiliates.

7.6 ***Litigation***. Except as set forth in *Schedule 7.6* or *Schedule 9.11* (such litigation matters, the "***Scheduled Litigation***"), as of the Execution Date (a) there is no suit, litigation, arbitration or Proceeding by any Third Party or before any Governmental Authority (i) pending against Seller (with respect to the Conveyed Interests) or any of Seller's Affiliates holding or owning any of the Conveyed Interests (with respect to the Conveyed Interests) of which Seller or any of its Affiliates has received service or written notice or (ii) to Seller's Knowledge, threatened in writing against Seller (with respect to the Conveyed Interests) or any of Seller's Affiliates holding or owning any of the Conveyed Interests (with respect to the Conveyed Interests) that, in either instance, is applicable to or otherwise binding upon the Conveyed Interests, (b) none of Seller or any of its Affiliates is subject to any outstanding Order with respect to the ownership, operation, use and/or development of any of the Conveyed Interests or the performance of this Agreement or any Transaction Document and (c) to Seller's Knowledge, none of the Conveyed Interests (including, for purposes of clarity, with respect to the ownership, operation, use and/or development thereof) is subject to or otherwise burdened by any outstanding Order. This *Section 7.6* does not include any matters with respect to Taxes, which shall be exclusively addressed in *Section 7.12*.

7.7 ***Material Contracts***.

(a) *Schedule 7.7* sets forth, as of the Execution Date, a true, complete and accurate list of all Applicable Contracts of the type described below (such Applicable Contracts, collectively, the "***Material Contracts***"):

(i) any Applicable Contract that can reasonably be expected to result in aggregate payments by Seller, or any of Seller's Affiliates holding or owning any of the Conveyed Interests, of more than $100,000 during the remainder of the current or any subsequent fiscal year (based solely on the terms thereof and current volumes, without regard to any expected increase in volumes or revenues);

(ii) any Applicable Contract that can reasonably be expected to result in aggregate revenues to Seller, or any of Seller's Affiliates holding or owning any of the Conveyed Interests, of more than $100,000 during the remainder of the current or any subsequent fiscal year (based solely on the terms thereof and current volumes, without regard to any expected increase in volumes or revenues);

(iii) any Hydrocarbon purchase and sale, transportation, gathering, treating, processing or similar Applicable Contract that is not terminable without penalty on 30 days' or less notice;

(iv) any indenture, mortgage, loan, credit lien, sale-leaseback or similar Applicable Contract affecting any of the Conveyed Interests which will not be released on or prior to the Closing;

(v) any Applicable Contract that constitutes a lease under which Seller, or any of Seller's Affiliates holding or owning any of the Conveyed Interests, is the lessor or the lessee of real or personal property which lease (A) cannot be terminated by Seller without penalty upon 60 days' or less notice and (B) involves (y) an annual base rental of more than $50,000 or (z) the payment of more than $150,000 in the aggregate for related services to any contract counterparty;

(vi) any Applicable Contract between Seller, on the one hand, and any Affiliate of Seller, on the other hand, which will be binding on or otherwise burden Buyer or any of the Conveyed Interests after the Closing Date;

(vii) any Applicable Contract that constitutes or contains a farmout or farmin agreement, partnership agreement, area of mutual interest agreement (or similar provision with respect to the Conveyed Interests), non-compete agreement, exploration agreement, participation agreement, development agreement, unit operating agreement, joint operating agreement, joint venture agreement, acreage trade, exchange or contribution agreement, drilling contract, carry agreement, net profits interest agreement, purchase and sale agreement, production sharing agreement, unit agreement, or any other similar Applicable Contract, in each case, where any material obligation thereof have not been fully performed and will be binding upon Buyer and/or the Conveyed Interests after the Effective Time;

(viii) any salt water disposal, gathering, processing, transportation or other similar Applicable Contract;

(ix) any Applicable Contract containing "tag-along" or "drag-along" rights, preferential rights or other similar rights of, or applicable to, any Person, including, without limitation, any "change of control" or other similar provision to the extent relating to the Water Disposal JV Interests;

(x) any Applicable Contract to sell, lease, farmout, exchange, transfer or otherwise dispose of all or any portion of any of the Conveyed Interests (other than with respect to the production of Hydrocarbons in the ordinary course) from and after the Effective Time, but excluding rights of reassignment upon the intent to abandon any Conveyed Interest;

(xi) Any Applicable Contract that provides for a call upon, option to purchase or similar right with respect to the Conveyed Interests;

(xii) Any Applicable Contract with any express drilling or development obligations on the part of Seller or any of its Affiliates to the extent such obligation has not been fulfilled;

(xiii) Any Applicable Contract that contains provisions (a) requiring Seller or any of its Affiliates to exclusively deal with or purchase its total requirements or a minimum amount of any product or service from a Third Party, (b) requiring Seller or any of its Affiliates to be the exclusive provider of any product or service to any Third Party, (c) requiring one party to extend to the other party terms that have been granted to a third party that are more favorable than those under that agreement or (d) containing non-compete obligations; and

(xiv) Any Applicable Contract where the primary purpose thereof was to indemnify another Person to the extent such obligation has not been fulfilled.

(b) Except as set forth in *Schedule 7.7-(i)*, there exists no material breach, violation or default under any Material Contract by Seller or its Affiliates or, to Seller's Knowledge, as of the Execution Date, by any other Person that is a party to such Material Contract, and no event has occurred that with notice or lapse of time or both would constitute any breach, violation or default under any such Material Contract by Seller, any of Seller's Affiliates, or, to Seller's Knowledge, as of the Execution Date, any other Person who is a party to such Material Contract, and, as of the Execution Date, none of Seller or any of Seller's Affiliates has given or received any unresolved written notice of any actual, potential or threatened termination, cancellation, breach, violation or default with respect to any Material Contract.

(c) Except as set forth in *Schedule 7.7-(ii)*, to Seller's Knowledge (i) there exists no material default under any other Applicable Contract by Seller, its Affiliates or, as of the Execution Date, any other Person that is a party to such other Applicable Contract, (ii) no event has occurred that with notice or lapse of time or both would constitute any default under any such other Applicable Contract by Seller, any of Seller's Affiliates or, as of the Execution Date, any other Person who is a party to such other Applicable Contract and (iii) as of the Execution Date, none of Seller or any of Seller's Affiliates has given or received any unresolved written notice of any actual, potential or threatened termination, cancellation or default with respect to any other Applicable Contract.

(d) As of the Execution Date, none of Seller or any of its Affiliates has received any written notice disputing Seller's or any of its Affiliates'

legal right of access with respect to any Property that remains unresolved or outstanding. Except as set forth on *Exhibits A*, *G-1*, *G-2*, or *G-3* or *Schedule 7.7(d)*, to Seller's Knowledge, no Property is subject to any restriction on use of the surface in connection with Hydrocarbon operations that would materially and adversely affect such use or operations as currently used and operated.

(e) As of the Execution Date, Seller has delivered or made available to Buyer true and complete copies of each Material Contract and any and all amendments, modifications and supplements thereto.

7.8 ***No Violation of Laws***. Except as set forth in *Schedule 7.8*, neither Seller nor Seller's Affiliates holding or owning any of the Conveyed Interests has received any unresolved written notice that it is in violation in any material respect of applicable Laws with respect to the ownership, operation, use and/or development of any of the Conveyed Interests. Other than matters which have been resolved and for which there are no outstanding fines, penalties or material settlement amounts related thereto for which Buyer would be responsible, except as set forth in *Schedule 7.8*, the Subject Properties are, Seller's and its Affiliates' ownership, operation, use and development of the Subject Properties is and, to Seller's Knowledge, as of the Execution Date, any applicable Third Party's ownership, operation, use and development of the Subject Properties is, in material compliance with the provisions and requirements of all applicable Laws of any Governmental Authority. This *Section 7.8* does not include any matters with respect to Environmental Laws or Laws related to Taxes, which shall be exclusively addressed in *Article VI* and *Section 7.12*, respectively.

7.9 ***Preferential Rights***. Except as set forth in *Schedule 7.9*, (a) with respect to the Conveyed Interests operated by Seller or any of Seller's Affiliates, and (b) with respect to the Conveyed Interests that are not operated by Seller or any of its Affiliates, to Seller's Knowledge, there are no preferential purchase rights, rights of first refusal or other similar rights that are applicable to the transfer of the Conveyed Interests in connection with the transactions contemplated hereby (each a "***Preferential Purchase Right***"). *Schedule 7.9* contains a complete and correct list of all Preferential Purchase Rights relating to the Conveyed Interests and/or the consummation of the transactions contemplated by this Agreement.

7.10 ***Imbalances***. To Seller's Knowledge, *Schedule 7.10* sets forth all Imbalances associated with the Conveyed Interests as of the Effective Time.

7.11 ***Current Commitments***. *Schedule 7.11* sets forth, as of the Execution Date, all approved authorizations for expenditures and other approved capital commitments, individually equal to or greater than $100,000 (net to Seller's and its Affiliates' collective interest) (the "***AFEs***") relating to the Conveyed Interests to drill or rework any Wells for which all or any part of the activities anticipated in such AFEs have not been completed by the Execution Date.

7.12 ***Taxes***. Except as set forth in *Schedule 7.12*, during the period of Seller's ownership of the Conveyed Interests,

(a) all material Asset Taxes that have become due and payable by Seller or its Affiliates and all income and other material Taxes that have become due and payable by the Tarrant Salt Water Disposal Joint Venture have been properly paid in full;

(b) all material Tax Returns with respect to Asset Taxes required to have been filed by Seller or its Affiliates and all income and other material Tax Returns required to have been filed by the Tarrant Salt Water Disposal Joint Venture have been timely filed and all such Tax Returns are true, correct and complete in all material respects;

(c) no Tax audits or administrative or judicial proceedings are being conducted, are presently pending or have been threatened in writing, in each case, with respect to Asset Taxes or any Taxes imposed on the Tarrant Salt Water Disposal Joint Venture;

(d) there are no Encumbrances on any of the Conveyed Interests (including the assets of the Tarrant Salt Water Disposal Joint Venture) attributable to Taxes other than statutory liens for current period Taxes that are not yet due and payable;

(e) none of Seller or any its Affiliates has received written notice of any pending claim with respect to material Asset Taxes or with respect to income or other material Taxes of the Tarrant Salt Water Disposal Joint Venture, and there is no assessment, deficiency, or adjustment (in each case which remains unresolved) that has been asserted in writing, proposed in writing or, to the Knowledge of the Seller or its Affiliates, threatened in writing with respect to such Taxes;

(f) the Tarrant Salt Water Disposal Joint Venture has, at all times, been properly treated as a disregarded entity or partnership for U.S. federal (and applicable state) income Tax purposes; and

(g) other than the Water Disposal JV Interests and the Other Working Interest Owner Interests, none of the Conveyed Interests is subject to any tax partnership agreement or is otherwise treated, or required to be treated, as held in an arrangement requiring a partnership income Tax Return to be filed under Subchapter K of Chapter 1 of Subtitle A of the Code.

7.13 ***Brokers' Fees***. None of Seller or any of its Affiliates has incurred any Liability, contingent or otherwise, for brokers' or finders' fees or other similar forms of compensation as an intermediary relating to the transactions contemplated by this Agreement for which Buyer or any Affiliate of Buyer shall have any responsibility.

7.14 ***Ownership of Water Disposal JV Interests***.

(a) Seller is the record and beneficial owner of fifty percent (50%) of the partnership interests in the Tarrant Salt Water Disposal Joint

Venture, free and clear of Encumbrances (other than restrictions on transfer pursuant to applicable (i) securities Laws and (ii) its governing organizational documents).

(b) The delivery by Seller of the Assignment of Water Disposal JV Interests will vest Buyer with good title to fifty percent (50%) of the partnership interests in the Tarrant Salt Water Disposal Joint Venture, free and clear of all Encumbrances (other than restrictions on transfer pursuant to applicable (i) securities Laws and (ii) its governing organizational documents).

7.15 ***Capitalization of the Tarrant Salt Water Disposal Joint Venture***.

(a) The Water Disposal JV Interests constitute fifty percent (50%) of the partnership interests in the Tarrant Salt Water Disposal Joint Venture.

(b) Except as set forth on *Schedule 7.15(b)*, there is no outstanding option, consent, right of first offer, right of first refusal, tag along right, drag along right or other right entitling any Person to purchase or otherwise acquire the Water Disposal JV Interests.

(c) Prior to the Closing Date, Buyer has been provided access to a complete and accurate copy of the Joint Venture Agreement (including all amendments and modifications thereto) which is the governing organizational document for the Tarrant Salt Water Disposal Joint Venture. Seller is in compliance in all material respects with all of its obligations, covenants and agreements thereunder and, to Seller's Knowledge, as of the Execution Date, there is no unresolved dispute thereunder.

7.16 ***Payment of Burdens***. Except as set forth on (i) *Schedule 7.16*, (ii) *Schedule 7.6* or (iii) *Schedule 9.11* (and in each case of (ii) and (iii), including the facts and circumstances related thereto and/or the outcomes thereof) and except for funds that are being held in suspense in accordance with applicable Laws and constitute Suspense Funds, all Burdens due and payable by or on behalf of Seller, any of its Affiliates or, to Seller's Knowledge, as of the Execution Date, any Third Party with respect to the Conveyed Interests have been fully, timely and properly calculated and paid in all material respects and are not in arrears, or, if not paid, Seller or the applicable Affiliate is contesting the same in good faith in the normal course of business as set forth on *Schedule 7.16*.

7.17 ***Payout Balances***. To Seller's Knowledge, *Schedule 7.17* contains a complete list of the status of any "payout" balance, as of the Effective Time, with respect to Wells operated by Seller (or its Affiliates) subject to a reversion or other adjustment at some level of cost recovery or payout (or passage of time or other event other than termination of a Lease by its terms).

7.18 ***Environmental Matters***. Except as described on *Schedule 7.18* as of the Execution Date:

(a) neither Seller nor any of its Affiliates has received, nor to Seller's Knowledge has any Third Party operator of any of the Conveyed Interests received, any written notice of violation of, or non-compliance, in each case, in any material respect, with, any Environmental Laws applicable or relating to the Conveyed Interests where such violation or non-compliance has not been previously cured and Remediated or otherwise resolved; (b) to Seller's Knowledge, the Conveyed Interests (including Seller's and its applicable Affiliates' ownership, operation, use, maintenance and development thereof and the operation, use, maintenance and development by any applicable Third Party operator thereof) are in compliance with Environmental Laws in all material respects, and (c) to Seller's Knowledge, there has been no unresolved release of Hazardous Substances on or from the Conveyed Interests that violates in any material respect any Environmental Law or with respect to which material Remediation is presently required under Environmental Laws. Notwithstanding any other provision in this Agreement, the representations and warranties in this *Section 7.18* are the only representations and warranties of Seller in this Agreement with respect to any Environmental Law or environmental matter relating to the Conveyed Interests.

7.19 ***Liens and Encumbrances; Status of the Leases and Units***.

(a) Seller and its Affiliates holding and/or owning any of the Conveyed Interests shall convey such Conveyed Interests to Buyer free and clear of all liens, mortgages and other Encumbrances, if any, created by, through or under Seller or any of its Affiliates (other than Permitted Encumbrances), and at or prior to the Closing, Seller and its Affiliates holding Conveyed Interests shall cause its lenders, or other Third Parties, with liens or Encumbrances on the Conveyed Interests, if any, securing indebtedness for borrowed money to execute and deliver all documentation necessary to release all such liens and Encumbrances.

(b) Excluding matters addressed in Seller's representations and warranties set forth in *Section 7.16* and facts, circumstances or other matters that could have been or are asserted as Title Defects pursuant to *Article V* (including those that could have been or are asserted as Title Defects pursuant to *Article V* but for application of the Individual Title Defect Threshold), as of the Execution Date, (A) to Seller's Knowledge, none of Seller, any of its Affiliates or any Third Party operator of any of the Conveyed Interests is in default with respect to any of its material obligations under or in respect of any of the Leases or Units and (B) none of Seller, any of its Affiliates or, to Seller's Knowledge, any Third Party that is a party to any Lease or Unit has not received from any other party to any such Lease or Unit any written notice of any unresolved default under any such Lease or of such party's cancellation or termination of, or intent or threat to cancel or terminate, any such Lease or Unit.

7.20 ***Take-or-Pay or Bonus Payments; Non-Consent Elections***. Except as set forth on *Schedule 7.20*, none of Seller or any of its Affiliates are obligated, under a take-or-pay, advance payment or similar arrangement, or by virtue of an election to non- consent or not participate in a past or current operation on a Property pursuant to any applicable operating agreement or other similar agreement or arrangement, to produce or deliver Hydrocarbons, or allow Hydrocarbons to be produced or delivered, without receiving full payment at the time of production or delivery in an amount that corresponds to Seller's or

its Affiliate's Net Revenue Interest in the production of Hydrocarbons attributable to such Property. Except (a) as set forth on *Schedule 7.20*, or where an "APO Working Interest" and "APO Net Revenue Interest" is set forth on *Exhibit A*, *Exhibit B* or *Schedule I-2*, and (b) for any interest or matter that has reverted, Seller and its Affiliates have not elected nor been deemed to have elected as a non-consenting party with respect to any Well, proposal or other operations with respect to any of the Conveyed Interests.

7.21 ***Receipt of Revenues***. Except (a) as set forth on *Schedule 7.21*, (b) with respect to Conveyed Interests that are not operated by Seller or any of its Affiliates, (c) for customary netting or offsets made in the ordinary course of business and (d) for other netting or offsets permitted under the terms of written Contracts, to Seller's Knowledge, as of the Execution Date, Seller and any of its Affiliates holding and/or owning any of the Conveyed Interests is timely receiving the full share of proceeds to which Seller or such Affiliate is entitled from the sale of Hydrocarbons produced from or allocable to the Conveyed Interests and all other income, revenues and proceeds earned from or with respect to any of the Conveyed Interests, without suspense or counterclaim, netting or set-off.

7.22 ***Suspense Funds***. *Schedule 7.22* sets forth (i) a true, complete and accurate list of all funds, proceeds of production, unclaimed property and related escheat obligations attributable and/or related to the Conveyed Interests that are due and owing to any Person and held in suspense by or on behalf of Seller or any of its Affiliates as of the date(s) set forth on such schedule (collectively, the "***Suspense Funds***"), (ii) if known, a general description of the reason(s) they are being held in suspense and (iii) if known, a true, complete and accurate list of the name or names of the Persons claiming any Suspense Funds or to whom any Suspense Funds are owed.

7.23 ***Credit Support***. *Schedule 7.23* sets forth a true and complete list of all Governmental Bonds, surety bonds, letters of credit, guarantees, and other forms of credit support currently maintained, posted or otherwise provided by or on behalf of Seller or any of its Affiliates with respect to the Conveyed Interests (including with respect to the ownership, operation, development or use thereof) (collectively, the "***Credit Support***"). True and complete copies of all such Credit Support have been made available to Buyer prior to the Execution Date (other than Credit Support which also relates to assets or obligations of Seller and its Affiliates other than the Conveyed Interests or Subject Properties).

7.24 ***Plugging and Abandonment; Wells; Access Rights***. Except as set forth on *Schedule 7.24*, as of the Execution Date, (i) neither Seller nor any of its Affiliates has received any notices or demands from Governmental Authorities or other Third Parties to plug or abandon or dismantle any Wells that currently requires such plugging or abandonment to occur, (ii) to Seller's Knowledge, there are no Wells that Seller, any of its Affiliates or the relevant Third Party operator thereof is currently obligated by any applicable Leases, Applicable Contracts, instruments, agreements, Laws or other Permits to commence plugging, abandonment or dismantling, as applicable, on or prior to the Execution Date, excluding, for the avoidance of doubt, Wells that are currently subject to exceptions to a requirement to plug or abandon issued by a Governmental Authority and (iii) to Seller's Knowledge, the Wells that have been plugged and abandoned by Seller or its Affiliates have been plugged and abandoned in a manner that complies in all material respects with all applicable Leases, Applicable Contracts, instruments, agreements, Laws and other Permits. To Seller's Knowledge, (A) subject to Permitted Encumbrances, all Wells drilled and completed by Seller or any of its Affiliates that are included in the Conveyed Interests have been drilled and completed within the applicable limits permitted by, and in accordance with the applicable terms and conditions of, all applicable Leases, Applicable Contracts and pooling and unit agreements or other similar orders and (B) *Schedule 7.24* identifies all shut-in, temporarily abandoned or other inactive Wells operated by Seller or any of its Affiliates that are located on or within any of the Lands as of November 18, 2019.

7.25 ***Carried Obligations***. Except for Seller's and its Affiliates' respective express obligations under the Material Contracts (including obligations with respect to non-consenting interest owners) and obligations with respect to non-participating fee simple mineral or working interest owners and drilling and normal ongoing lease operating expenses relating to the Wells, none of Seller or any of its Affiliates has any obligation to carry or bear any other interest owner's share of any expenses, obligations or any similar Liabilities which exceed, individually or in the aggregate, two hundred fifty thousand dollars ($250,000.00) (net to Seller's and its Affiliates' collective interests in the applicable Conveyed Interests).

7.26 ***Areas of Mutual Interest***. Except as set forth on *Schedule 7.7*, neither Seller nor any of its Affiliates nor any of the Conveyed Interests is subject to any area of mutual interest agreements or agreements that include non-competition restrictions or other similar restrictions on doing business that would be binding on Buyer, any Affiliates of Buyer or the Conveyed Interests after Closing.

7.27 ***Oil and Gas Operations***.

(a) Other than any issues which have been resolved and for which there are no outstanding fines, penalties or material settlement amounts related thereto for which Buyer would be responsible (other than as set forth in any Material Contract or arising in the ordinary course of business), subject to Permitted Encumbrances, all wells included in the Conveyed Interests drilled by Seller or its Affiliates have been drilled and (if completed) completed in material compliance with all applicable oil and gas leases, pooling and unit agreements, and applicable Laws; and

(b) Except for matters as would not reasonably be expected to result in a Material Adverse Effect on the Conveyed Interests, no well included in the Conveyed Interests is subject to penalties on allowables because of any overproduction or any other violation of applicable laws that would prevent such well from being entitled to its full legal and regular allowable from and after the Closing Date as prescribed by any Governmental Authority.

7.28 ***Additional Drilling Obligations***. Except as set forth at *Schedule 7.28*, (a) neither Seller nor any of its Affiliates has any express obligation to drill additional wells or conduct other material development operations in order to earn or continue to hold during the primary term of any lease included in the Conveyed Interests and (b) none of Seller or any of its Affiliates has been advised by a lessor under any lease affecting the Conveyed Interests of any unresolved requirements or demands to drill additional wells or conduct additional development operations.

7.29 ***Permits***. Except as set forth on *Schedule 7.29*, Seller and its applicable Affiliates have obtained and hold all permits, licenses, variances, exemptions, orders, franchises, approvals and authorizations of all Governmental Authorities necessary for the lawful conduct of business or the lawful ownership, use and operation of the Conveyed Interests ("***Seller Permits***"), except for Seller Permits whereby the failure to obtain or hold would not, individually or in the aggregate, reasonably be expected to result in a Material Adverse Effect on the Conveyed Interests covered thereby. Except as set forth on *Schedule 7.29*, Seller and its Affiliates are in compliance with the terms of Seller Permits, except where the failure to comply would not, individually or in the aggregate, reasonably be expected to result in a Material Adverse Effect on the Conveyed Interests covered thereby.

7.30 ***Payment of Expenses***. Except (a) as set forth on *Schedule 7.30* and (b) for other netting or offsets permitted under the terms of written Contracts, to Seller's Knowledge, all expenses of twenty-five thousand dollars ($25,000.00) or more (including all bills for labor, materials and supplies used or furnished for use in connection with the Conveyed Interests, and excluding all Taxes which shall be exclusively addressed in *Section 7.12*), relating to the ownership or operation of the Conveyed Interests and that are due by Seller or any of its Affiliates, have been, and are being, paid by Seller or its applicable Affiliate(s) (timely, and before the same become delinquent) or, with respect to the Conveyed Interests that are not operated by Seller or any of its Affiliates, netted, in a manner consistent with Seller's customary practices and procedures, except such expenses as are disputed in good faith by Seller and set forth on *Schedule 7.30*.

7.31 ***Gathering Assets***. Except as set forth on *Schedule 7.31*, Seller, SWGP, DGS and DEC, as applicable, hold good and defensible title, free and clear of all claims and Encumbrances (other than Permitted Encumbrances), in all material respects to the Pipeline Systems, SWGP Pipeline System and DGS Pipeline System and all other personal property assets used or held by Seller, SWGP, DGS and DEC in connection therewith (collectively, the "***Gathering Assets***"), and to the Rights-of-Way, SWGP Rights-of-Way and DEC Rights-of-Way to the extent necessary to use and operate the Gathering Assets in the same manner as they are currently used and operated by Seller and its Affiliates. To Seller's Knowledge, the Gathering Assets are in working order and repair (excluding normal wear and tear) adequate in all material respects for operation as currently being operated. Except as set forth in *Schedule 7.31*, Seller (and its Affiliates) with respect to the Conveyed Interests (a) is not a "natural gas company" engaged in the transportation of natural gas in interstate commerce under the Natural Gas Act of 1938, as amended, or has operated, or provided services, using any Conveyed Interest in a manner that subjects it, any Third Party operator of any Conveyed Interest or any future owner of any Conveyed Interest to the jurisdiction of, or regulation by, the Federal Energy Regulatory Commission ("***FERC***") (i) as a natural gas company under the Natural Gas Act of 1938 (other than pursuant to a certificate of limited jurisdiction as described below), or (ii) as a common carrier pipeline under the Interstate Commerce Act, (b) does not hold any general or limited jurisdiction certificate of public convenience and necessity issued by FERC other than a blanket sale for resale certificate issued by operation of applicable Law or a blanket certificate issued to permit participation in capacity release transactions or (c) is not a gas utility or common carrier subject to the jurisdiction of any Governmental Authority, in each case, in connection with any Gathering Asset. As of the Execution Date, no rate refunds, rebates, offsets or like obligations are accrued or owed by Seller or any of its Affiliates with respect to services related to the Gathering Assets. As of the Execution Date, there is no adverse regulatory proceeding before FERC or any state regulatory agency pending or, to Seller's Knowledge, threatened in writing against or involving Seller or any of its Affiliates in connection with any Gathering Asset.

7.32 ***ROW Instruments***. Seller, SWGP, DGS and DEC, as applicable, hold good and defensible title evidenced of record or documentation in Seller's possession, free and clear of all claims and Encumbrances (other than Permitted Encumbrances), in all material respects to all Rights-of-Way, SWGP Rights-of-Way or DEC Rights-of-Way (collectively, the "***ROW Instruments***"). Seller and its Affiliates are in compliance with all terms and conditions of all ROW Instruments, except where the failure to comply would not, individually or in the aggregate, reasonably be expected to result in a Material Adverse Effect on the Conveyed Interests covered thereby.

7.33 ***Affiliate Contracts and Arrangements***. Except as otherwise set forth on *Schedule 7.33* and except for the Excluded Assets and Other Matters, (a) none of Seller or any of its Affiliates are involved in any business arrangement or relationship or any Contracts with any of Seller's Affiliates relating to any of the Conveyed Interests or the ownership, operation, development and/or use thereof that, in each case, will (i) not be terminated on or prior to the Closing or (ii) be applicable to, binding upon or otherwise burden any of the Conveyed Interests and/or the ownership, operation, development and/or use of any of the Conveyed Interests from and after the Closing and (b) none of Seller's Affiliates owns any material asset, property, right or interest of any kind, whether tangible or intangible, that is primarily used in connection with the ownership, operation, use and/or development of any of the Conveyed Interests that is not otherwise included in (or constitutes a part of) the Conveyed Interests.

ARTICLE VIII
REPRESENTATIONS AND WARRANTIES OF BUYER

Buyer represents and warrants to Seller, as of the Execution Date and the Closing Date, as follows:

8.1 ***Organization, Existence and Qualification***. Buyer is a limited liability company duly formed, validly existing and in good standing under the Laws of the State of Delaware and has all requisite power and authority to own and operate its property and to carry on its business as now conducted. Buyer is duly licensed or qualified to do business as a foreign limited liability company in all jurisdictions in which it carries on business or owns assets and such qualification is required by Law except where the failure to be so qualified would not have a material adverse effect upon the ability of Buyer to consummate the transactions contemplated by this Agreement or perform its obligations hereunder.

8.2 ***Authorization, Approval and Enforceability***. Buyer has full power and authority to enter into and perform this Agreement, the Transaction Documents to which it is a party and the transactions contemplated herein and therein. The execution, delivery, and performance by Buyer of this Agreement and the Transaction Documents have been duly and validly authorized and approved by all necessary limited liability company action on the part of Buyer. This Agreement is, and the Transaction Documents to which Buyer is a party, when executed and delivered by Buyer, will be the valid and binding obligations of Buyer and enforceable against Buyer in accordance with their respective terms, subject to the effects of bankruptcy, insolvency, reorganization, moratorium, and similar Laws, as well as to principles of equity (regardless of whether such enforceability is considered in a proceeding in equity or at law).

8.3 ***No Conflicts***. The execution, delivery, and performance by Buyer of this Agreement and the Transaction Documents to which it is a party and the consummation of the transactions contemplated herein and therein will not (a) conflict with or result in a breach of any provisions of the organizational or other governing documents of Buyer, (b) result in a default or the creation of any Encumbrance or give rise to any right of termination, cancellation or acceleration under any of the terms, conditions or provisions of any note, bond, mortgage, indenture, license or other agreement to which Buyer is a party or by

which Buyer or any of its property may be bound or (c) violate any Law applicable to Buyer or any of its property, except in the case of *clauses (b)* and *(c)* where such default, Encumbrance, termination, cancellation, acceleration or violation would not, individually or in the aggregate, have a material adverse effect upon the ability of Buyer to consummate the transactions contemplated by this Agreement or perform its obligations hereunder.

8.4 ***Consents***. Except for Post-Closing Consents and Regulatory Approvals, there are no consents or other restrictions on assignment, including requirements for consents from any Third Party or any Governmental Authority to any assignment, in each case, that Buyer is required to obtain in connection with the consummation of the transactions contemplated by this Agreement by Buyer.

8.5 ***Insolvency***. There are no bankruptcy, reorganization, insolvency or receivership proceedings pending, being contemplated by or, to Buyer's Knowledge, threatened against Buyer or any Affiliate of Buyer.

8.6 ***Litigation***. As of the Execution Date, there is no investigation, lawsuit, litigation or arbitration by any Person or before any Governmental Authority pending, or to Buyer's Knowledge, threatened against Buyer or any of its Affiliates that has or would have a material adverse effect upon the ability of Buyer to consummate the transactions contemplated by this Agreement or perform its obligations hereunder.

8.7 ***Regulatory***. Assuming the receipt of all Regulatory Approvals, Buyer will, upon Closing, be qualified under Law to own and assume operatorship of the Conveyed Interests in all jurisdictions where the Conveyed Interests are located, and the consummation of the transactions contemplated by this Agreement will not cause Buyer to be disqualified as such an owner or operator. To the extent required by any Laws, Buyer will, upon Closing, maintain lease bonds, area-wide bonds or any other surety bonds as may be required by, and in accordance with, all Laws governing the ownership and operation of the Conveyed Interests and will, upon Closing, have filed any and all reports necessary for such ownership and/or operation with all Governmental Authorities having jurisdiction over such ownership and/or operation. To Buyer's Knowledge, there is no fact or condition with respect to Buyer or its obligations hereunder that may cause any Governmental Authority to withhold its unconditional approval of the transactions contemplated hereby to the extent approval by such Governmental Authority is required by Law.

8.8 ***Financing***. Buyer shall have, as of the Scheduled Closing Date (or the date that is the end of the 10 Business Day period described in *Section 14.1(c)*, if applicable) and at Closing, access to sufficient cash in immediately available funds with which to (a) pay the Closing Payment due at Closing, (b) consummate the transactions contemplated by this Agreement and (c) perform its obligations under this Agreement and the Transaction Documents.

8.9 ***Independent Evaluation***. Buyer (a) is sophisticated in the evaluation, purchase, ownership and operation of oil and gas properties and related facilities, (b) is capable of evaluating, and hereby acknowledges that it has so evaluated, the merits and risks of the Conveyed Interests, Buyer's acquisition, ownership, and operation thereof, and its obligations hereunder, and (c) is able to bear the economic risks associated with the Conveyed Interests, Buyer's acquisition, ownership, and operation thereof, and its obligations hereunder. In making its decision to enter into this Agreement and to consummate the transactions contemplated hereby, Buyer has, notwithstanding anything to the contrary contained in this Agreement, relied on (and shall be deemed to have relied on), except for Fraud (i) the express terms of this Agreement and the Transaction Documents (including all express representations, warranties, covenants and agreements of Seller set forth herein), Seller's certificate to be delivered at Closing pursuant to *Section 12.3(l)* and the special warranty of Defensible Title set forth in the Assignment(s) and Deed(s), (ii) its own independent investigation and evaluation of the Conveyed Interests and the advice of its own legal, tax, economic, environmental, engineering, geological and geophysical advisors and the express provisions of this Agreement and not on any comments, statements, projections or other materials made or given by any Representatives, consultants or advisors of Seller or any Affiliates of Seller and (iii) its own due diligence pertaining to the Conveyed Interests as Buyer has deemed adequate. Without limiting the foregoing and except for Fraud, Buyer acknowledges Seller's disclaimer of representations and warranties set forth in *Section 4.3* and expressly disclaims reliance on any representation or warranty not set forth in *Article VII*, the certificate delivered by Seller pursuant to *Section 12.3(l)* or the Special Warranty set forth in the Assignments and Deeds.

8.10 ***Brokers' Fees***. None of Buyer or Buyer's Affiliates has incurred any Liability, contingent or otherwise, for brokers' or finders' fees or other similar forms of compensation as an intermediary relating to the transactions contemplated by this Agreement or the Transaction Documents for which Seller or any of Seller's Affiliates has or shall have any responsibility.

8.11 ***Accredited Investor***. Buyer is an "accredited investor," as such term is defined in Regulation D of the Securities Act of 1933, as amended, and will acquire the Conveyed Interests for its own account and not with a view to a sale, distribution, or other disposition thereof in violation of the Securities Act of 1933, as amended, and the rules and regulations thereunder, any applicable state blue sky Laws or any other applicable securities Laws.

8.12 ***Sanctions***. Neither Buyer, nor, to Buyer's Knowledge, any executive officer or member of the board of directors of Buyer, any individual shareholder with over 5% ownership of Buyer has been the subject of United States sanctions Laws administered by OFAC, including, OFAC's Specially Designated Nationals and Blocked Persons List, and economic or financial sanctions or trade embargoes imposed, administered, or enforced from time to time by the United Nations Security Council.

ARTICLE IX
CERTAIN AGREEMENTS

9.1 ***Conduct of Business***. Except (w) as set forth in *Schedule 9.1*, (x) for the operations covered by the AFEs and other capital commitments described in *Schedule 7.11* and/or, (y) for actions taken in connection with emergency situations to protect life or property or to maintain the environment and/or (z) for actions consented to in writing by Buyer (which consent shall not be unreasonably delayed, withheld or conditioned), including consent by e-mail:

(a) Seller shall (and shall cause its Affiliates to), from and after the Execution Date until Closing:

(i) maintain (or cause its Affiliates to maintain), and if Seller or one of its Affiliates is the operator thereof, operate, the Conveyed Interests in the usual and ordinary manner consistent with its past practice or where Seller or an Affiliate of Seller is not the operator of the Conveyed Interests will continue their action as a non-operator in the ordinary course of business; *provided*, that Seller shall have no obligation to maintain in full force and effect any Lease or any other Conveyed Interest if such Lease or other Conveyed Interest terminates pursuant to its existing terms or where a reasonably prudent operator would not maintain the same;

(ii) maintain the books of account and Records relating to the Conveyed Interests in the usual and ordinary manner, in accordance with its usual accounting practices and applicable Law;

(iii) subject to Seller's customary insurance practices (including annual adjustments, if applicable), maintain insurance coverage on the Conveyed Interests in the amounts and types currently in force;

(iv) maintain in all material respects all material Permits that are maintained by Seller or any of its Affiliates with respect to the Conveyed Interests as of the Execution Date;

(v) should Seller or any of its Affiliates receive (or desire to make) any proposals to drill additional Wells on the Subject Properties, or to conduct other operations which require consent of non-operators under the applicable operating agreement, Seller will notify Buyer of, and consult with Buyer concerning, such proposals but any decisions with respect to proposals shall be made by Seller, so long as the decisions are made in the ordinary course of business;

(vi) use good faith efforts to (A) promptly provide written notice to Buyer of any matter, fact or circumstance that arises during the Interim Period that, if such matter, fact or circumstance was in existence as of the Execution Date, would have been required to be set forth on a Schedule to any of Seller's representations and warranties pursuant to the terms and conditions set forth in this Agreement and (B) add, supplement and amend Seller's applicable Schedule(s) to its representations and warranties pursuant to and consistent with *Section 9.5*; and

(vii) timely pay any and all Asset Taxes that become due and payable.

(b) except as expressly contemplated by this Agreement, Seller shall not (and Seller shall cause its Affiliates not to), from and after the Execution Date until Closing:

(i) except in the case of any Contracts that are crude oil, condensate, and natural gas purchase and sale, gathering, transportation, and marketing arrangements entered into in the ordinary course of business that are terminable on not more than 60 days' notice (without the payment of a fee or penalty), enter into an Applicable Contract that, if entered into on or prior to the Execution Date, would be required to be listed in *Schedule 7.7*;

(ii) terminate (unless such Material Contract terminates pursuant to its stated terms), modify or amend, in each case, in any material respect, the terms of any Material Contract or waive, release grant or transfer any material rights in any Material Contract;

(iii) commit to make any capital expenditures or propose (or consent or non-consent to) any in a single operation (or series of related operations) reasonably expected to cost Seller or any of its Affiliates in excess of $50,000 or make or commit to make any individual operating expenditure in excess of $50,000;

(iv) transfer, sell, abandon, surrender mortgage, pledge, hypothecate, dispose of or otherwise Encumber (excluding any Permitted Encumbrances) any of the Conveyed Interests (or permit any Affiliate to do any of the foregoing), other than (A) the transfer, sale, or disposal of Hydrocarbons in the ordinary course of business and (B) the sale of equipment that is no longer necessary in the operation of the Conveyed Interests or for which replacement equipment has been, or will be on or prior to Closing, obtained;

(v) amend or modify or take any action to permit the amendment or modification of the applicable governing organizational documents and any related agreements for the Tarrant Salt Water Disposal Joint Venture;

(vi) create, assume, incur, guarantee or voluntarily become liable for any indebtedness for borrowed money or take any action that permits the foregoing, in each case, with respect to the Tarrant Salt Water Disposal Joint Venture;

(vii) adopt any plan of reorganization, liquidation or dissolution of the Tarrant Salt Water Disposal Joint Venture;

(viii) settle, cancel or compromise any claim or other Proceeding in a manner that would adversely affect in any material respect the ownership, operation or use of the Conveyed Interests, taken as a whole, or for which Buyer would have any Liability in excess of $10,000.00 from and after the Effective Time;

(ix) (A) grant any overriding royalty or other Burden to any Person and (B) consent to, grant or otherwise convey any overriding royalty interest or other Burden on any Lease except to the extent required under any Material Contract, and in such event, only to the extent that it would not reduce the NRI for any Conveyed Interest below that set forth for such Conveyed Interest on *Exhibit* A, Exhibit *B* or *Exhibit I-2*, as applicable;

(x) delay or postpone the payment of accounts payable or other liabilities outside the ordinary course of business;

(xi) enter into, amend or modify (other than terminate or release) any transactions with any of its Affiliates relating to or affecting the Conveyed Interests or Buyer;

(xii) enter into any Contract that would have constituted a Material Contract if it would have been in effect or existence as of the Execution Date; or

(xiii) commit to do any of the foregoing.

(c) Buyer acknowledges that Seller and its Affiliates own undivided interests in certain of the properties comprising the Subject Properties with respect to which Seller or any of its Affiliates is not the operator, and Buyer agrees that the acts or omissions of any other working interest owner (including any Third Party operator) or any other Person who is not Seller or an Affiliate of Seller shall not constitute a breach of the provisions of this *Section 9.1*, and no action required by a vote of working interest owners shall constitute such a breach so long as Seller and its Affiliates have voted their respective interests in a manner that complies with the provisions of this *Section 9.1*.

9.2 ***Successor Operator***. Buyer acknowledges that it desires to succeed Seller as operator of those Subject Properties or any portion thereof that Seller or any of its Affiliates currently operates. Buyer further acknowledges and agrees that Seller does not covenant or warrant that Buyer will become successor operator of such Subject Properties. Seller agrees, however, that, as to the Subject Properties it or any of its Affiliates operates, it shall use its commercially reasonable efforts to support Buyer's effort to become successor operator of such Subject Properties (without the obligation to expend any monies or undertake any obligations (other than to provide such support)) effective as of Closing (at Buyer's sole cost and expense) and to designate, to the extent legally possible and permitted under any applicable joint operating agreement or other Contract, Buyer as successor operator of such Subject Properties effective as of the Closing. Should Buyer for any reason not succeed Seller or any of its applicable Affiliates as operator of any Subject Properties at Closing, for 120 days after Closing, Seller shall continue to use commercially reasonable efforts to support Buyer's effort to become successor operator of such Subject Properties (at Buyer's sole cost and expense); *provided*, *however*, Seller shall not be obligated to expend any monies or undertake any obligations (other than to provide such support).

9.3 ***Governmental Bonds and Guarantees***.

(a) Buyer acknowledges that none of the bonds, letters of credit and guarantees, if any, posted by Seller or its Affiliates with any Governmental Authority and/or relating to the Conveyed Interests, including those set forth in *Schedule 9.3(a)* (the "***Governmental Bonds***"), are transferable to Buyer. On or before the Closing Date, Buyer shall obtain, or cause to be obtained in the name of Buyer, replacements for such Governmental Bonds to the extent such replacements are necessary (i) for Buyer's ownership or operation of the Conveyed Interests, and (ii) to permit the cancellation of the Governmental Bonds posted by Seller and/or any Affiliate of Seller with respect to the Conveyed Interests at Closing, or, if Seller is continuing to operate the Conveyed Interests post-Closing as a service pursuant to the Transition Services Agreement, on the date such service terminates under the Transition Services Agreement. In addition, at or prior to Closing, Buyer shall deliver to Seller evidence of the posting of bonds or other security with all applicable Governmental Authorities meeting the requirements of such Governmental Authorities to own and, if applicable, operate the Conveyed Interests.

(b) Buyer shall cooperate with Seller in order to cause Seller and its Affiliates to be released, as of the Closing Date, from all Credit Support and all obligations under the Designated Midstream Contracts. Without limiting the foregoing, if required by a counterparty to any Credit Support or Designated Midstream Contract, Buyer shall, and, if applicable, shall cause its Affiliates to, provide, effective as of the Closing Date, such replacements of such Credit Support or such guarantees, performance bonds, letters of credit, escrow accounts and other forms of financial assurance as may be required by such counterparties in order to release Seller and its Affiliates from all obligations under such Credit Support and Designated Midstream Contracts; *provided*, that Buyer's obligation to provide replacements of such Credit Support or such guarantees, performance bonds, letters of credit, escrow accounts and other forms of financial assurance as may be required by such counterparties in order to release Seller and its Affiliates from all obligations under the Designated Midstream Contracts shall not exceed $135,500,000. Buyer shall use good faith efforts to provide guarantees, performance bonds, letters of credit, escrow accounts and other forms of financial assurance as may be required by such counterparties in order to release Seller and its Affiliates from all obligations under all other Applicable Contracts and in connection with its obligations under *Section 9.13*.

(c) In the event that (i) any counterparty to any such Credit Support or any Designated Midstream Contract does not release Seller or any of its Affiliates from all of their obligations under such Credit Support or such Designated Midstream Contract (which failure or refusal by any such counterparty to release Seller or any of its Affiliates from any of their obligations under such Credit Support or such Designated Midstream Contract is not caused by, related to or the result of any action or inaction by or on behalf of Seller or any of its Affiliates (other than the failure by Seller or any of its Affiliates to agree to any obligations or to provide or continue any guarantees, performance bonds, letters of credit, escrow accounts or other financial assurance which, for the avoidance of doubt, neither Seller nor its Affiliates shall be required to do)), or (ii) any Governmental Authority does not permit the cancellation of any Governmental Bond posted by Seller and/or any Affiliate of Seller with respect to the Conveyed Interests (which refusal by any such Governmental Authority to permit the cancellation of any such Governmental Bond is not caused by, related to or the result of any action or inaction by or on behalf of Seller or any of its Affiliates (other than the failure by Seller or any of its Affiliates to agree to any obligations or to provide or continue any guarantees, performance bonds, letters of credit, escrow accounts or other financial assurance which, for the avoidance of doubt, neither Seller nor its Affiliates shall be required to do)), then, in each case, from and after Closing, or, if Seller is continuing to operate the Conveyed Interests post-Closing as a service pursuant to the Transition Services Agreement, on the date such service terminates under the Transition Services Agreement, Buyer shall indemnify Seller or any applicable Affiliate of Seller, as applicable, against all amounts incurred by Seller or any Affiliate of Seller, as applicable, under such Credit Support, such Designated Midstream Contract or such Governmental Bond (and all costs incurred in connection with such Credit Support, such Designated Midstream Contract or such Governmental Bond) if applicable to the Conveyed Interests acquired by Buyer. Notwithstanding anything in this Agreement to the contrary, any cash placed in escrow by Seller or any Affiliate of Seller pursuant to the Credit Support must be returned to Seller as soon as is reasonably practicable following the release of such cash from any such escrow and shall be deemed an Excluded Asset and Other Matter for all purposes hereunder.

9.4 ***Record Retention***. Buyer shall and shall cause its successors and assigns to, for a period of seven years following Closing, (a) retain the Records, (b) provide Seller, its Affiliates and its and their respective officers, employees and representatives with reasonable access to the Records during

normal business hours for review and copying at Seller's expense, and (c) provide Seller, its Affiliates and its and their respective officers, employees and representatives with reasonable access, during normal business hours, to materials received or produced after Closing relating to any indemnity claim made under *Section 13.2* for review and copying at Seller's expense.

9.5 ***Amendment of Schedules***. Buyer agrees that, with respect to the representations and warranties of Seller contained in this Agreement, Seller shall have the continuing right until 5 Business Days prior to Closing to add, supplement or amend the Schedules to its representations and warranties with respect to any matter hereafter arising which was not in existence on the Execution Date and, if existing on the Execution Date or thereafter, would have been required to be set forth or described in such Schedules. For all purposes of this Agreement, including for purposes of determining whether the conditions set forth in *Article X* have been fulfilled, the Schedules to Seller's representations and warranties contained in this Agreement shall be deemed to include only that information contained therein on the Execution Date and shall be deemed to exclude all information contained in any additional, supplement or amendment thereto; *provided*, *however*, that if Closing shall occur, then Buyer shall not be entitled to make a claim for a breach of Seller's representations or warranties with respect thereto pursuant to the terms of this Agreement.

9.6 ***Employees***.

(a) From and after the Execution Date until the date that is 12 calendar months after the earlier to occur of (i) the Closing Date and (ii) the termination of this Agreement pursuant to *Section 14.1*, except to the extent set forth in the rest of this *Section 9.6*, Buyer will not, and will cause its Affiliates not to directly solicit (and Buyer will not cause any Third Party to solicit on behalf of Buyer) for employment any employee of Seller or any Affiliate of Seller (other than Offered Employees) whom Buyer or its Affiliates have met or come in contact with as a result of evaluating the transactions contemplated hereunder, without obtaining the prior written consent of Seller.

(b) *Schedule 9.6* sets forth a list of the job title, job location and job description of those employees of Seller or any Affiliate of Seller to whom Buyer or its Affiliate may, but shall not be obligated to, offer employment, with each such offer to be effective as of 12:01 A.M. on the Employment Effective Date applicable to the particular Offered Employee. The "***Employment Effective Date***" with respect to an Offered Employee shall be the first day following the end of the applicable term of the Transition Services Agreement associated with the services provided by such Offered Employee; *provided*, *however*, that Buyer may elect, in its discretion, to cause the Employment Effective Date with respect to an Offered Employee to be the Closing Date by providing written notice to Seller of those Offered Employees to whom such election shall apply with such notice to be provided to Seller no later than 30 days prior to the Closing Date. Notwithstanding the preceding provisions of this paragraph, with respect to any Offered Employee who is on a leave of absence as of the Employment Effective Date otherwise applicable to such Offered Employee, employment of such Offered Employee with Buyer or its Affiliate shall be effective as of 12:01 A.M. on such later date as such individual returns to work. Within five Business Days following the Execution Date, Seller shall provide the following information to Buyer with respect to each employee listed on *Schedule 9.6*: (i) name, (ii) date of hire and (iii) base salary or hourly wage rate, as applicable. Each offer of employment that Buyer or its Affiliate elects to make must be made no later than the Employment Offer Deadline.

(c) With respect to each employee to whom Buyer or its Affiliate chooses to offer employment pursuant to *Section 9.6(b)* above (each, an "***Offered Employee***"), such offer shall be in writing, subject to the Closing having occurred and shall provide that Buyer shall, or shall cause its Affiliate to, provide to each Offered Employee for a period of at least 12 months after the Closing Date (i) a rate of base salary or wages, as applicable, the bonus opportunities that are no less favorable than those provided to similar situated employees of Buyer and its Affiliates immediately prior to the Closing Date, and (ii) other employee benefits, plans, programs and other arrangements that are no less favorable than those provided to similar situated employees of Buyer and its Affiliates.

(d) Each offer of employment made by Buyer or its Affiliate to an Offered Employee shall be made no later than 5 Business Days prior to the Employment Effective Date applicable to such Offered Employee (the "***Employment Offer Deadline***"). Buyer or Buyer's Affiliate shall provide to Seller a notice of each offer to be made to an Offered Employee no later than two (2) Business Days before issuing any such offer to an Offered Employee.

(e) The provisions of this *Section 9.6* are solely for the benefit of the Parties and nothing in this Agreement express or implied shall confer upon any employee, Offered Employee or any legal representative or beneficiary thereof any rights or remedies, including any right to employment, or continued employment for any specified period, of any nature or kind whatsoever. Nothing in this *Section 9.6*, express or implied, shall be deemed an amendment of any employee benefit plan, bonus plan or arrangement, equity or equity-based compensation plan or arrangement, or any other employee benefit plan, agreement, arrangement, program, practice or understanding that is sponsored maintained, provided or contributed to by Seller or any of its Affiliates for the benefit of any Offered Employee.

9.7 ***Information Technology***. Prior to the transfer by Seller to Buyer of any desktop, network gear, data center gear and any other information technology equipment that may contain proprietary information of Seller, Seller shall be entitled to erase any and all data, software and other information from any such desktop, network gear, data center gear and any other information technology equipment, but only to the extent such data, software or other information does not relate to the Conveyed Interests (excluding any Excluded Assets or Other Matters), and Seller shall remove any data, software or other information related to the Conveyed Interests (excluding any Excluded Assets or Other Matters) and provide such data, software or other information to Buyer prior to erasing as described above.

9.8 ***Suspense Funds***. Notwithstanding anything in this Agreement to the contrary, but subject to, and without limitation of, the Specified Obligations and Seller's representations and warranties set forth in *Section 7.21* (and Seller's indemnity obligations with respect thereto), if, and solely to the extent, the Preliminary Settlement Statement or the Final Settlement Statement includes a downward adjustment to the Purchase Price with respect to any Suspense Funds identified on *Schedule 7.21* pursuant to *Section 3.3(b)(viii)*, then, with respect to such Suspense Funds, Buyer shall, from and after the Closing Date (or, with respect to any such Suspense Funds for which there is a downward adjustment to the Purchase Price pursuant to *Section 3.3(b)(viii)* in

the Final Settlement Statement, from and after the date of the final determination of the Final Price in accordance with *Section 3.6* or *Section 3.7*, as applicable), assume and fulfill, perform, pay and discharge (or cause to be fulfilled, performed, paid and discharged) all Liabilities arising from, based upon, related to or associated with the payment of all such Suspense Funds.

9.9 ***FCC Licenses***.

(a) Not later than ten Business Days after the Closing Date, Buyer and Seller shall file or cause to be filed with the FCC all appropriate applications with respect to the assignment to Buyer of the FCC Licenses (the "***FCC Assignment Applications***"). The FCC Assignment Applications and any supplemental information furnished in connection therewith shall be in substantial compliance with the FCC Rules or be responsive to a request of the FCC.

(b) Buyer and Seller shall furnish to each other such necessary information and reasonable assistance as the other may reasonably request in connection with the preparation, filing and prosecution of the FCC Assignment Applications. Buyer and Seller shall bear their own expenses in connection with the preparation, filing and prosecution of the FCC Assignment Applications. Buyer and Seller shall each use their commercially reasonable efforts (in each case, without the obligation to expend any monies or undertake any obligations (other than customary filing fees associated with the filing of applications for the assignment of FCC Licenses)) to prosecute the FCC Assignment Applications and shall furnish to the FCC any documents, materials or other information reasonably requested by the FCC.

(c) Until the date the FCC Assignment Applications are approved, Seller shall hold the benefit of the usage of the FCC Licenses in trust for Buyer to the extent it is lawfully able to do so, and where not lawfully able to do so, Buyer and Seller shall make such other arrangements as between themselves to provide Buyer with the benefit of such FCC Licenses.

9.10 ***Regulatory Matters***.

(a) If applicable, Seller and Buyer shall (i) make or cause to be made an appropriate filing of a Notification and Report Form pursuant to the Hart-Scott-Rodino Antitrust Improvements Act of 1976, as amended (the "***HSR Act***") with respect to the transactions contemplated hereby as promptly as practicable, but in no event later than twenty days, after the Execution Date, and Seller and Buyer shall bear their own costs and expenses incurred in connection with such filings, *provided* that Buyer shall bear all of the filing fees in connection therewith, and (ii) use their commercially reasonable efforts (for each Party with respect to this *clause (ii)*, without the obligation to expend any monies or undertake any obligations) to respond at the earliest practicable date to any requests for additional information made by the Antitrust Division of the Department of Justice (the "***DOJ***"), the Federal Trade Commission (the "***FTC***") or any other Governmental Authority, to take all actions necessary to cause the waiting periods under the HSR Act and any other Laws to terminate or expire at the earliest possible date, to resist in good faith, at each of their respective cost and expense, any assertion that the transactions contemplated hereby constitute a violation of Laws, and to eliminate every impediment under any Laws that may be asserted by any Governmental Authority so as to enable the Closing to occur as soon as reasonably possible in accordance herewith, all to the end of expediting consummation of the transactions contemplated hereby. In connection with this *Section 9.10(a)*, the Parties shall, to the extent permitted by Laws, (A) cooperate in all respects with each other in connection with any filing, submission, investigation or inquiry, (B) promptly inform the other Party of any communication received by such Party from, or given by such Party to, the DOJ or the FTC or any other Governmental Authority and of any material communication received or given in connection with any proceeding by a private party, in each case, regarding the transactions contemplated hereby, (C) have the right to review in advance, and to the extent practicable each shall consult the other on, any filing made with, or written materials to be submitted to, the DOJ, the FTC or any other Governmental Authority or, in connection with any proceeding by a private party, any other Person, in connection with the transactions contemplated hereby and (D) consult with each other in advance of any meeting, discussion, telephone call or conference with the DOJ, the FTC or any other Governmental Authority or, in connection with any proceeding by a private party, with any other Person, and to the extent not expressly prohibited by the DOJ, the FTC or any other Governmental Authority or Person, give the other Party the opportunity to attend and participate in such meetings and conferences, in each case, regarding the transactions contemplated hereby.

(b)

(i) Within three Business Days of the Execution Date, Buyer shall provide Seller with written notice of whether Buyer has elected to submit a formal joint voluntary notice to CFIUS in accordance with the DPA and the regulations and rules promulgated thereunder, including 31 C.F.R. § 800.401, et. seq. (the "***CFIUS Filing***"). If Buyer elects not to make a CFIUS Filing, then Seller shall have three Business Days from the date of Buyer's election not to make the CFIUS Filing to request that Buyer make the CFIUS Filing. If neither Party elects to make the CFIUS Filing, and CFIUS does not request a CFIUS Filing, a CFIUS Filing will not be made and *Sections 9.10(b)(ii), 10.6* (as it relates to CFIUS) and *11.6* (as it relates to CFIUS) of this Agreement will no longer apply.

(ii) If a Party elects to make the CFIUS Filing, Seller and Buyer shall (i) prepare and file, or cause the preparation and filing of, as promptly as reasonably practicable but in no event later than 15 Business Days after either Party elects to make the CFIUS Filing, (A) a pre-filing joint voluntary notice with CFIUS pursuant to the DPA and 31 C.F.R. § 800.401(f) and, (B) as soon as practicable after (but no earlier than five Business Days after) the pre-filing, a formal joint voluntary notice with CFIUS; (ii) provide any other information or submissions requested by CFIUS or any other agency or branch of the U.S. government in connection with CFIUS review or investigation of the transactions contemplated by this Agreement within the timeframes required by the DPA unless CFIUS agrees in writing to an extension of such timeframe; (iii) provide each other with the reasonable opportunity to review and comment on any information or submission provided to CFIUS, with the exception of personal identifier information required under Section 800.402(c)(6)(vi)(B) of the CFIUS regulations; (iv) coordinate and cooperate fully with each other in exchanging such information and provide such assistance as the other Party may reasonably request in connection with the foregoing; (v) promptly inform the other Party of any communication (orally or in writing) received by such Party from, or given by such Party to, CFIUS, including by promptly providing copies to the other Party of any such written communications; (vi) permit the other Party to review in advance any communication that it gives to, and consult with each other in advance of any meeting, substantive telephone call or conference with CFIUS, and to the extent not prohibited by CFIUS, give the other Party the opportunity to attend and participate in any in-person meetings with CFIUS; and (vii) use, or cause their respective Affiliates to use, their reasonable best efforts to obtain CFIUS Approval as promptly as practical after the Execution Date. With respect to Buyer, such reasonable best efforts shall include providing all such commitments or assurances as may be necessary, requested or imposed by CFIUS, including, without limitation, entering into a letter of assurance, national security agreement, or other similar arrangement in relation to the Conveyed Interests.

9.11 ***Settlement Agreements***. From and after the Closing, Buyer agrees to comply with, assume and perform all of the obligations set forth on *Schedule 9.11*.

9.12 ***Reserved***.

9.13 ***NAESB Base Contracts***. Buyer shall use commercially reasonable efforts to negotiate with the counterparties set forth on *Schedule 9.13* to enter into a NAESB Base Contract for the Sale and Purchase of Natural Gas prior to Closing on terms mutually agreed to by the Parties; *provided*, *however*, that, Subject to *Section 9.3(b)*, Buyer's commercially reasonable efforts shall not include the obligation to expend any monies or undertake any obligations (other than the obligation to negotiate with such counterparties).

9.14 ***Other Working Interest Owner Interests***. Seller shall be permitted to acquire the Other Working Interest Owner Interests prior to Closing, and in such event the Other Working Interest Owner Interests shall automatically become Conveyed Interests hereunder. In the event the Other Working Interest Owner Interests are not part of the Conveyed Interests at Closing, Buyer shall make a separate offer for the Other Working Interest Owner Interests on the same terms and conditions set forth herein (other than the Purchase Price) simultaneously with Closing. The consideration paid by Buyer to Seller for the Other Working Interest Owner Interests shall be the Allocated Other Working Interest Owner Amount. For the avoidance of doubt, the Parties agree that the Allocated Other Working Interest Owner Amount attributable to the Other Working Interest Owner Interests is (a) not intended to reflect the fair market value of the Other Working Interest Owner Interests for Tax purposes and (b) being used solely for the purpose of applying the provisions of this Agreement.

9.15 ***Financial Cooperation***.

(a) Seller acknowledges that Buyer, or its Affiliates (including its successors and assigns) may be required to include statements of revenues and direct operating expenses and other financial information relating to the Conveyed Interests for one or more years or interim periods ending on or prior to, or including, the Closing (but not to exceed two (2) fiscal years plus, on an unaudited basis, the interim period in 2020 prior to the Closing Date), in documents filed by Buyer or its Affiliates or assignee with the Securities and Exchange Commission (the "***SEC***") pursuant to the Securities Act of 1933 (as amended, the "***Securities Act***"), or in materials relating to a securities offering under Rule 144A of the Securities Act, and that such financial statements may be required to be independently audited (together with any supplementary oil and gas information required by ASC 932-235, the "***Requisite Financial Statement Information***"). From and after the Closing Date and for two years after Closing, Seller shall maintain, and, at Buyer's request (and at Buyer's sole cost and expense), provide Buyer (or its applicable Affiliate, successor or assignee) and its auditor reasonable access during normal business hours to, any financial information and records (to the extent that such information is available) and personnel of Seller and its Affiliates (the "***Seller Group***") and use commercially reasonable efforts to, at Buyer's sole cost and expense, provide reasonable access during normal business hours to Seller Group's accounting firm, in each case, as Buyer (or its applicable Affiliate, successor or assignee) may reasonably request for the sole purpose of Buyer (or its applicable Affiliate, successor or assignee) and its auditor, and its representatives, creating and, to the extent required by Law, auditing, the Requisite Financial Statement Information; *provided*, that Seller's commercially reasonable efforts shall be without the obligation to expend any monies or undertake any obligations (other than the obligation to request access). Notwithstanding anything to the contrary, (i) Seller shall in no event be required to create new records or financial statements relating to the Conveyed Interests or otherwise and (ii) the access to be provided to Buyer shall not interfere with Seller's ability to prepare its own financial statements or its regular conduct of business. Seller and its Affiliates shall not be required to (A) deliver or cause the delivery of any legal opinions or make any representations in connection with such cooperation described herein, (B) take any action that Seller reasonably believes could result in a violation of applicable Law, Seller's, or such Affiliate's, organization documents, any contractual obligation or any confidentiality arrangement or the waiver of any legal or other applicable privilege, (C) agree to pay any fees, reimburse any expenses, incur any costs or Liabilities (unless Buyer has advanced the funds necessary to cover such expenses, costs or Liabilities) or give any indemnities; *provided*, *however*, nothing in this *clause (C)* shall be construed to limit Seller's express obligations set forth in this *Section 9.15* or (D) be a party to any agreement, certificate, instrument or other document with respect to the Buyer's debt or equity financings.

(b) Upon request of Buyer, Seller shall request the external audit firm that audits the Requisite Financial Statement Information to consent to the inclusion or incorporation by reference of its audit opinion with respect to the audited financial statements included in the Requisite Financial Statement Information in any such registration statement, report or other document. Seller shall use its commercially reasonable efforts to, at Buyer's sole cost and expense, provide Buyer and Buyer's independent accountants with access to (i) audit work papers of the Seller Group's independent accountants and (ii) management representation letters delivered by any member of the Seller Group, as applicable, or on behalf of Seller Group to the Seller Group's independent accountants; *provided*, *however*, that Seller's commercially reasonable efforts shall not include the obligation to expend any monies or undertake any obligations (other than the obligation to request access).

(c) Buyer shall be responsible for, and obligated to promptly reimburse Seller for, all reasonable costs and expenses (including third person or internal resources and personnel) incurred by Seller or its Affiliates to the extent associated with preparing and obtaining the Requisite Financial Statement Information and otherwise complying with this *Section 9.15*.

(d) All of the information provided by Seller pursuant to this *Section 9.15* is given without any representation or warranty, express or implied, and no member of Seller Group shall have any liability or responsibility with respect thereto.

(e) Buyer shall indemnify Seller, its respective Affiliates, Seller's and each of its Affiliates' respective directors, managers, officers, stockholders, partners, members, employees and representatives, each member of Seller Group, and each of their respective heirs, successors and permitted assigns, each in their capacity as such, from, against and in respect of any losses or other Liabilities imposed on, sustained, incurred or suffered by, or asserted against, any of them, whether in respect of Third Party claims, direct claims or otherwise, directly or indirectly relating to, arising out of or resulting from the provision to or use by Buyer, any of its Affiliates or Representatives of information utilized in connection with the preparation or audit of the Requisite Financial Statement Information or otherwise pursuant to this *Section 9.15* to the fullest extent permitted by applicable Law, in each case, except in the case of Fraud and the foregoing obligations shall survive termination of this Agreement for a period of ten years after the Closing.

(f) Except to the extent included in any filings made pursuant to the Securities Act or the Securities Exchange Act of 1934, as amended, Buyer agrees to hold all information provided or made available to Buyer and its Affiliates pursuant to this *Section 9.15* and that is not otherwise part of or related to the Conveyed Interests that are conveyed to Buyer pursuant to the provisions of this Agreement confidential and agrees not to use any such information other than in connection with the preparation of any such filings.

ARTICLE X
BUYER'S CONDITIONS TO CLOSING

The obligations of Buyer to consummate the transactions provided for in this Agreement are subject, at the option of Buyer, to the satisfaction (or waiver in writing by Buyer), on or prior to Closing of each of the following conditions precedent:

10.1 ***Representations***. The representations and warranties of Seller set forth in *Article VII* (a) that are not Specified Representations shall be true and correct (without regard to materiality or Material Adverse Effect qualifiers) on and as of the Closing Date as though such representations and warranties had been made or given on and as of the Closing Date (other than representations and warranties that refer to a specified date, which need only be true and correct on and as of such specified date), except for those breaches, if any, of such representations and warranties that would not, individually or the aggregate, reasonably be expected to result in a Material Adverse Effect and (b) that are Specified Representations shall be true and correct on and as of the Closing Date as though such representations and warranties had been made or given on and as of the Closing Date.

10.2 ***Performance***. Seller shall have performed or complied with all material obligations, agreements, and covenants contained in this Agreement in all material respects as to which performance or compliance by Seller is required prior to or at the Closing Date.

10.3 ***No Legal Proceedings***. No material suit, action, litigation or other Proceeding instituted by any Third Party seeking to restrain, prohibit, enjoin, or declare illegal the transactions contemplated by this Agreement shall be pending before any Governmental Authority.

10.4 ***Title Defects; Environmental Defects; Required Consents; Preferential Purchase Rights; Casualty Losses; Other Excluded Conveyed Interests***. Subject to the Individual Title Defect Threshold and the Individual Environmental Threshold, as applicable, without duplication, the sum of (i) the amount by which (x) the sum of all Title Defect Amounts determined pursuant to *Section 5.3(g)* with respect to Title Defects asserted in any Title Defect Notice submitted on or before the Title Defect Claim Date and agreed to by the Parties prior to the Closing or if not so agreed prior to the Closing, as finally determined pursuant to *Section 5.3(k)* less (y) the sum of all Title Benefit Amounts determined pursuant to *Section 5.3(h)* with respect to Title Benefits asserted in a Title Benefit Notice submitted on or before the Title Defect Claim Date and agreed to by the Parties prior to Closing, or if not so agreed prior to Closing, as finally determined pursuant to *Section 5.3(k)*, exceeds the Title Defect Deductible, (ii) the amount by which all Remediation Amounts for Environmental Defects Properties determined pursuant to *Section 6.1(a)* (other than any Conveyed Interests withheld from the assignment at Closing under *Section 6.1(c)(ii)*) with respect to Environmental Defects asserted by Buyer on or before the Environmental Defect Claim Date and agreed to by the Parties prior to the Closing or if not so agreed prior to the Closing, as finally determined pursuant to *Section 6.1(g)* exceeds the Environmental Defect Deductible, (iii) the aggregate amount of all Casualty Losses determined pursuant to *Section 5.4*, (iv) the Allocated Value of any Conveyed Interests excluded at Closing pursuant to *Section 5.5(a)*, *Section 5.5(b)(i)* or *Section 6.1(c)(ii)* and (v) the aggregate amount of all Allocated Values for Conveyed Interests which are excluded from the transaction due to Seller's denial of Buyer's reasonable Phase II ESA request pursuant to *Section 4.1(b)*, shall be less than 20% of the unadjusted Purchase Price.

10.5 ***Closing Deliverables***. Seller shall have delivered (or be ready, willing and able to deliver at Closing) to Buyer the documents and other items required to be delivered by Seller under *Section 12.3*.

10.6 ***Regulatory Approvals***. All Regulatory Approvals shall have been received or satisfied.

ARTICLE XI
SELLER'S CONDITIONS TO CLOSING

The obligations of Seller to consummate the transactions provided for in this Agreement are subject, at the option of Seller, to the satisfaction (or waiver by Seller), on or prior to Closing of each of the following conditions precedent:

11.1 ***Representations***. The representations and warranties of Buyer set forth in *Article VIII* (a) that are qualified by materiality qualifiers shall be true and correct in all respects (such qualifiers by their terms shall be applicable for purposes of this *Section 11.1*), and (b) that are not qualified by materiality qualifiers shall be true and correct in all material respects, in each case, on and as of the Closing Date, with the same force and effect as though such representations and warranties had been made or given on and as of the Closing Date (other than representations and warranties that refer to a specified date, which need only be true and correct on and as of such specified date).

11.2 ***Performance***. Buyer shall have performed or complied with all material obligations, agreements, and covenants contained in this Agreement in all material respects as to which performance or compliance by Buyer is required prior to or at the Closing Date.

11.3 ***No Legal Proceedings***. No material suit, action, litigation or other Proceeding instituted by any Third Party seeking to restrain, prohibit, or declare illegal the transactions contemplated by this Agreement shall be pending before any Governmental Authority.

11.4 ***Title Defects; Environmental Defects; Required Consents; Preferential Purchase Rights; Casualty Losses; Other Excluded***

Conveyed Interests. Subject to the Individual Title Defect Threshold and the Individual Environmental Threshold, as applicable, without duplication, the sum of (i) the amount by which (x) the sum of all Title Defect Amounts determined pursuant to *Section 5.3(g)* with respect to Title Defects asserted in any Title Defect Notice submitted on or before the Title Defect Claim Date and agreed to by the Parties prior to the Closing or if not so agreed prior to the Closing, as finally determined pursuant to *Section 5.3(k)* less (y) the sum of all Title Benefit Amounts determined pursuant to *Section 5.3(h)* with respect to Title Benefits asserted in a Title Benefit Notice submitted on or before the Title Defect Claim Date and agreed to by the Parties prior to Closing, or if not so agreed prior to Closing, as finally determined pursuant to *Section 5.3(j)* exceeds the Title Defect Deductible, (ii) the amount by which all Remediation Amounts for Environmental Defects Properties determined pursuant to *Section 6.1(a)* (other than any Conveyed Interests withheld from the assignment at Closing under *Section 6.1(c)(ii)*) with respect to Environmental Defects asserted by Buyer on or before the Environmental Defect Claim Date and agreed to by the Parties prior to the Closing or if not so agreed prior to the Closing, as finally determined pursuant to *Section 6.1(g)* exceeds the Environmental Defect Deductible, (iii) the aggregate amount of all Casualty Losses determined pursuant to *Section 5.4* and (iv) the Allocated Value of any Conveyed Interests excluded at Closing pursuant to *Section 5.5(a)*, *Section 5.5(b)(i)* or *Section 6.1(c)(ii)*, shall be less than 20% of the unadjusted Purchase Price.

11.5 ***Closing Deliverables***. Buyer shall have delivered (or be ready, willing and able to deliver at Closing) to Seller the Closing Payment, the documents and other items required to be delivered by Buyer under *Section 12.3*.

11.6 ***Regulatory Approvals***. All Regulatory Approvals shall have been received or satisfied.

ARTICLE XII
CLOSING

12.1 ***Date of Closing***. Subject to the conditions stated in this Agreement, the sale by Seller and the purchase by Buyer of the Conveyed Interests pursuant to this Agreement (the "***Closing***") shall occur on the date that is 120 days after the Execution Date, or such other date as Buyer and Seller may agree upon in writing (such date, the "***Scheduled Closing Date***," unless extended pursuant to *Section 14.1(b)*). The date on which the Closing actually occurs shall be the "***Closing Date.***"

12.2 ***Place of Closing***. Closing shall be held at the offices of Seller at 333 W. Sheridan Ave, Oklahoma City, OK 73102-5010, or such other location as Buyer and Seller may agree upon in writing.

12.3 ***Closing Obligations***. At Closing, the following documents shall be delivered and the following events shall occur, the execution of each document and the occurrence of each event being a condition precedent to the others and each being deemed to have occurred simultaneously with the others:

(a) Seller and Buyer shall execute, acknowledge, and deliver the DEPCO Assignment, in sufficient counterparts to facilitate recording in the applicable counties where the Conveyed Interests are located, covering all of the Conveyed Interests other than the Conveyed Interests conveyed pursuant to the SWGP Assignment, the DEC Assignment, the DGS Assignment, the DGS Surface Deed, the Deeds and the Assignment of Water Disposal JV Interests;

(b) Seller shall cause (i) SWGP to, and Buyer shall, execute, acknowledge, and deliver the SWGP Assignment, in sufficient counterparts to facilitate recording in the applicable counties where the Conveyed Interests owned or held by SWGP are located, (ii) DEC to, and Buyer shall, execute, acknowledge, and deliver the DEC Assignment, in sufficient counterparts to facilitate recording in the applicable counties where the Conveyed Interests owned or held by DEC are located and (iii) DGS to, and Buyer shall, execute, acknowledge, and deliver the DGS Assignment, in sufficient counterparts to facilitate recording in the applicable counties where the Conveyed Interests owned or held by DGS are located;

(c) Seller and Buyer shall execute and deliver assignments, on appropriate forms, of federal Leases and state Leases comprising portions of the Conveyed Interests, if any, in sufficient counterparts to facilitate filing with the applicable Governmental Authority;

(d) Seller and Buyer shall execute, acknowledge and deliver the Mineral Deed and Surface Deed conveying the Fee Minerals and the Surface Fee Interests, respectively, in sufficient counterparts to facilitate recording in the applicable counties;

(e) Seller shall cause DGS to, and Buyer shall, execute, acknowledge, and deliver the DGS Surface Deed conveying the DGS Surface Fee Interests, in sufficient counterparts to facilitate recording in the applicable counties;

(f) Seller and Buyer shall execute and deliver the Preliminary Settlement Statement;

(g) Buyer shall deliver to Seller, to the account designated in the Preliminary Settlement Statement, by direct bank or wire transfer in same day funds, the Closing Payment (the amount of the Deposit will be applied by Seller to the Purchase Price effective as of the Closing);

(h) Buyer and Seller shall execute and deliver joint written instructions to the Escrow Agent to distribute the Deposit to Seller;

(i) Seller shall execute and deliver, on forms supplied by Buyer and reasonably acceptable to Seller, transfer orders or letters in lieu thereof directing all purchasers of production to make payment to Buyer of proceeds attributable to production from the Conveyed Interests from and after the Effective Time, for delivery by Buyer to the purchasers of production;

(j) Seller (or its regarded owner for U.S. federal income tax purposes) shall, and Seller shall cause SWGP (or its regarded owner for U.S. federal income tax purposes), DEC and DGS to, deliver executed certificates of non-foreign status that meet the requirements set forth in Treasury Regulation §

1.1445-2(b)(2) (and in connection with Seller's disposition of the Tarrant Salt Water Disposal Joint Venture, that meet the requirements of an Internal Revenue Service Form W-9 or other certificate that excuses withholding under Section 1446(f) of the Code);

(k) to the extent required under any Law or Governmental Authority, Seller and Buyer shall deliver federal and state change of operator forms designating Buyer as the operator of the Subject Properties currently operated by Seller or any of its Affiliates;

(l) an authorized officer of Seller shall execute and deliver a certificate, dated as of Closing Date, certifying that the conditions set forth in *Section 10.1* and *Section 10.2* have been fulfilled and, if applicable, any exceptions to such conditions that have been waived by Buyer;

(m) an authorized officer of Buyer shall execute and deliver a certificate, dated as of Closing, certifying that the conditions set forth in *Section 11.1* and *Section 11.2* have been fulfilled and, if applicable, any exceptions to such conditions that have been waived by Seller;

(n) Seller and Buyer shall execute and deliver the License Agreement covering Seller's rights to geological and geophysical data set forth on *Exhibit O-1*;

(o) Seller and Buyer shall execute, acknowledge, and deliver the Assignment of Water Disposal JV Interests;

(p) (i) SWGP and Buyer shall execute, acknowledge, and deliver any T-4B pipeline transfer certification(s) to transfer responsibility for operating the applicable Conveyed Interests to Buyer and (ii) Buyer shall provide written evidence that Buyer has obtained a valid, active Form P-5 organizational registration from the Railroad Commission of Texas and posted any associated financial assurance required to operate the applicable Conveyed Interests;

(q) (i) Buyer shall execute and deliver the EnLink Agreements and (ii) Seller shall cause the EnLink Entities to execute and deliver the EnLink Agreements; *provided* that, Seller shall not be obligated to expend any monies or undertake any obligation or accommodation in connection therewith;

(r) Buyer shall deliver any instruments and documents required by *Section 9.3*;

(s) Buyer shall deliver the Defect Escrow Amount, if any, into the Escrow Account;

(t) Seller and Buyer shall execute and deliver the Transition Services Agreement;

(u) Seller shall deliver the certificates of title for the transfer and conveyance of title to the vehicles and trailers set forth on *Exhibit H-2* to the extent such certificates are in Seller's possession at Closing, and, if not, promptly following Closing; and

(v) Seller and Buyer shall execute and deliver any other agreements, instruments and documents that are required by other terms of this Agreement to be executed and/or delivered at Closing or reasonably necessary to effectuate the transactions contemplated by this Agreement.

12.4 ***Records***. In addition to the obligations set forth under *Section 12.3* above, but notwithstanding anything in this Agreement to the contrary, no later than 30 days following the Closing Date, Seller shall make available to Buyer the Records in their current form and format as maintained by Seller as of the Effective Time, for pickup from Seller's offices during normal business hours; *provided* that Seller may retain written or electronic copies of the Records; *provided*, *further* that Seller shall not be required to conduct processing, conversion, compiling or any other further work with respect to the delivery of the Records pursuant to this *Section 12.4*.

ARTICLE XIII
ASSUMPTION; INDEMNIFICATION; SURVIVAL

13.1 ***Assumption by Buyer; Specified Obligations***.

(a) Subject to, and without limitation of Buyer's express rights to indemnity (or any of its express rights to reimbursement of any costs and/or expenses) under this Agreement or any other Transaction Document, from and after Closing, Buyer shall assume and hereby agrees to fulfill, perform, pay and discharge (or cause to be fulfilled, performed, paid and discharged) all Liabilities of Seller and its Affiliates, known or unknown, arising from, based upon, related to or associated with the Conveyed Interests, including the use, ownership, or operation thereof, in each case, regardless of whether such Liabilities arose prior to, at or after the Effective Time, including obligations to (i) furnish makeup gas and/or settle Imbalances according to the terms of applicable gas sales, processing, gathering or transportation Contracts, (ii) pay working interests, Burdens and other interest owners' revenues or proceeds attributable to sales of Hydrocarbons (including the methodology for calculating the same utilized by Buyer from and after the Closing), including the Suspense Funds (if, and solely to the extent, (x) such Suspense Funds are assigned, conveyed and transferred to Buyer or accounted for in accordance with *Section 9.8* and (y) such Suspense Funds are in an amount that is sufficient to pay to the applicable Third Party(ies) the full amount(s) owed to such Third Party(ies) related thereto), (iii) pay the applicable Governmental Authority any amounts subject to escheat obligations pursuant to applicable Law, (iv) Decommission the Conveyed Interests (the "***Decommissioning Obligations***"), including those Wells and/or Other Wells that are required by Law, any Governmental Authority, Leases or Applicable Contracts to be plugged and/or abandoned as of the Effective Time, (v) subject to, and without limitation of, the Parties' respective rights, remedies, obligations and Liabilities set forth in *Article VI* and Seller's representations and warranties set forth in *Section 7.18* (and Seller's indemnity obligations related thereto), relating to all of Buyer's Environmental Liabilities and to clean up, restore and/or Remediate the premises covered by or related to the Conveyed Interests in accordance with applicable Leases, Rights-of-Way, SWGP Rights-of-Way, DEC Rights-of-Way, Applicable Contracts and Laws, (vi) perform all obligations applicable to or imposed on the lessee, owner, or operator under the applicable Leases and the Applicable Contracts that are assigned, conveyed and/or transferred to Buyer hereunder, or as required by any Law, (vii) collect any accounts receivable transferred by Seller to Buyer at, or in connection with, the Closing pursuant to *Section 2.1(v)*, (viii) perform all applicable obligations under the Applicable Contracts that are conveyed to Buyer as part of the Conveyed Interests and (ix) the matters set forth on *Schedule 9.11* (all of said Liabilities described in this *Section 13.1(a)*, subject to the exclusions below, are referred to in this Agreement as the "***Assumed Obligations***"); *provided*, *however*, that, notwithstanding the foregoing, Buyer has no obligation to assume (and does not assume), and the Assumed Obligations shall not include (or be deemed or construed to include), any Liabilities to the extent that they

are Specified Obligations for which Seller is obligated to indemnify Buyer under *Section 13.2(c)*, as may be limited or excluded by *Section 13.4 or Schedule 13.8*, or to the extent set forth in *clause (iii)* of *Schedule 13.1(b)* (as expressly described in *clause (iii)* of *Schedule 13.1(b)*, including the limitations set forth therein).

(b) The provisions of *Schedule 13.1(b)* are incorporated herein by reference.

13.2 ***Indemnities of Seller***. Effective as of Closing, but subject to the applicable limitations and exclusions set forth in *Section 13.4* and *Schedule 13.8*, Seller shall be responsible for, shall pay on a current basis, and hereby defends, indemnifies, holds harmless and forever releases Buyer and its Affiliates, and all of its and their respective stockholders, partners, members, directors, officers, managers, employees, attorneys, consultants, agents and other Representatives (collectively, the "***Buyer Indemnified Parties***") from and against any and all Liabilities, without duplication, whether or not relating to Third Party Claims (except as otherwise expressly provided in *Schedule 13.1(b)*) or incurred in asserting, preserving or enforcing any of their respective rights hereunder, arising from or based upon:

(a) any breach or inaccuracy of any representation or warranty made by Seller in *Article VII* or in the certificate delivered by Seller pursuant to *Section 12.3(l)*;

(b) any breach, nonfulfillment of or failure to perform by or on behalf of Seller or any of its Affiliates any of Seller's covenants or agreements under this Agreement; or

(c) the Specified Obligations.

13.3 ***Indemnities of Buyer***. Effective as of Closing, Buyer shall assume and be responsible for, shall pay on a current basis, and hereby defends, indemnifies, holds harmless and forever releases Seller and its Affiliates, and all of their respective stockholders, partners, members, directors, officers, managers, employees, attorneys, consultants, agents and other Representatives (collectively, the "***Seller Indemnified Parties***") from and against any and all Liabilities, without duplication, whether or not relating to Third Party Claims or incurred in asserting, preserving or enforcing any of their respective rights hereunder arising from or based upon:

(a) any breach or inaccuracy of any representation or warranty made by Buyer in *Article VIII* or in the certificate delivered by Buyer pursuant to *Section 12.3(m)*;

(b) any breach, nonfulfillment of or failure to perform by or on behalf of Buyer or any of its Affiliates any of Buyer's covenants or agreements under this Agreement; or

(c) the Assumed Obligations.

13.4 ***Limitation on Liability***.

(a) Seller shall not have any Liability for any indemnification under *Section 13.2(a)*, (i) for any individual Liability unless the amount owed or payable by Seller with respect to such Liability exceeds $50,000, and (ii) until and unless the aggregate amount of all Liabilities exceeding the threshold described in *clause (i)* above and for which Claim Notices are delivered by Buyer exceeds the Indemnity Deductible, and then only to the extent such Liabilities exceed the Indemnity Deductible; *provided*, *however*, that the limitations set forth in this *Section 13.4(a)* shall not apply to or otherwise limit any Liability arising out of, or based upon, any breach or inaccuracy of any of the Specified Representations or the Other Representations (or any of Seller's indemnity obligations related thereto).

(b) Notwithstanding anything in this Agreement to the contrary, except with respect to Seller's Liability for indemnity obligations with respect to any breach or inaccuracy of any of its Specified Representations or the Other Representations, Seller shall not be required to indemnify Buyer under *Section 13.2(a)* for aggregate Liabilities in excess of an amount equal to 25% of the unadjusted Purchase Price, or, in the event Seller does not acquire the Other Working Interest Owner Interests prior to the Closing Date in accordance with *Section 9.14*, an amount equal to 25% of the unadjusted Purchase Price less the Allocated Other Working Interest Owner Amount; *provided*, *however*, that the limitations set forth in this *Section 13.4(b)* shall not apply to any Liability (or Seller's related indemnity obligations) arising out of, or based upon, Fraud.

(c) Notwithstanding anything in this Agreement to the contrary, Seller shall not be required to indemnify Buyer under this Agreement for aggregate Liabilities in excess of an amount equal to 100% of the unadjusted Purchase Price, or, in the event Seller does not acquire the Other Working Interest Owner Interests prior to the Closing Date in accordance with *Section 9.14*, an amount equal to 100% of the unadjusted Purchase Price less the Allocated Other Working Interest Owner Amount; *provided*, *however*, that the limitations set forth in this *Section 13.4(c)* shall not apply to any Liability (or Seller's related indemnity obligations) arising out of, or based upon, Fraud.

(d) Notwithstanding anything herein to the contrary, for purposes of determining the indemnity obligations set forth in this *Article XIII*, (i) when determining whether a breach or inaccuracy of any Party's representations or warranties contained in this Agreement has occurred or (ii) when calculating the amount of Liabilities incurred, arising out of or relating to any such breach or inaccuracy of any such representation or warranty by either Party, in each case, all references to materiality, material adverse effect and other similar qualifications (or correlative terms) contained in such representation or warranty shall be disregarded.

13.5 ***Express Negligence***. THE DEFENSE, INDEMNIFICATION, HOLD HARMLESS, RELEASE, ASSUMED OBLIGATIONS AND LIMITATION OF LIABILITY PROVISIONS PROVIDED FOR IN THIS AGREEMENT SHALL BE APPLICABLE WHETHER OR NOT THE LIABILITIES IN QUESTION AROSE OR RESULTED SOLELY OR IN PART FROM THE GROSS, SOLE, ACTIVE, PASSIVE, CONCURRENT OR COMPARATIVE NEGLIGENCE, STRICT LIABILITY OR OTHER FAULT OR VIOLATION OF LAW OF OR BY ANY INDEMNIFIED PARTY. BUYER AND SELLER ACKNOWLEDGE THAT THIS STATEMENT COMPLIES WITH THE EXPRESS NEGLIGENCE RULE AND IS "CONSPICUOUS."

13.6 ***Exclusive Remedy***. Notwithstanding anything in this Agreement to the contrary, except in the case of Fraud, from and after Closing, *Sections 4.1(c), 4.1(d), 5.5(b)*, *5.5(c)*, *9.3, 9.15*, *13.2* and *13.3*, the Special Warranty set forth in the Assignments and Deeds (as, and to the extent, limited by *Section 5.2(b)*), the covenants that are to be performed after Closing by the express terms thereof (and the Parties' respective rights and remedies related thereto), contain the Parties' exclusive remedies against each other with respect to the transactions contemplated hereby, including breaches of the representations, warranties, covenants and agreements of the Parties contained in this Agreement or in any document or certificate delivered pursuant to this Agreement. Except in the case of Fraud or as specified in *Sections 4.1(c), 4.1(d), 5.5(b)*, *5.5(c)*, *9.3, 9.15*, *13.2* and *13.3*, as applicable, and the Special Warranty in the Assignments and Deeds, as applicable (as, and to the extent, limited by *Section 5.2(b)*), effective as of Closing, each Party, on its own behalf and on behalf of the Buyer Indemnified Parties or Seller Indemnified Parties, as applicable, hereby releases, remises and forever discharges the other Party and its Affiliates and all of such Persons' equityholders, partners, members, directors, officers, employees, agents, advisors, and representatives from any and all suits, legal or administrative proceedings, claims, demands, damages, losses, costs, Liabilities, interest or causes of action whatsoever, at law or in equity, known or unknown, which such Party or its Indemnified Parties might now or subsequently have, based on, relating to or arising out of this Agreement, the transactions contemplated by this Agreement, the ownership, use or operation of any of the Conveyed Interests or the Subject Properties prior to Closing or the condition, quality, status or nature of any of the Conveyed Interests or the Subject Properties prior to Closing, including rights to contribution under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended, and any similar Environmental Law, breaches of statutory or implied warranties, nuisance or other tort actions, rights to punitive damages, common law rights of contribution and rights under insurance maintained by such Party or any of its Affiliates (except as provided in *Section 5.4*).

13.7 ***Indemnification Procedures***. All claims for indemnification under *Sections 4.1(c), 5.5(b)*, *5.5(c)*, *9.3, 9.15*, *13.2 and 13.3* shall be asserted and resolved as follows:

(a) For purposes of *Sections 4.1(c)* and *9.3*, and this *Article XIII*, the term "***Indemnifying Party***" when used in connection with particular Liabilities shall mean the Party or Parties having an obligation to indemnify another Party and/or other Person(s) with respect to such Liabilities pursuant to *Sections 4.1(c)* and *9.3*, or this *Article XIII*, and the term "***Indemnified Party***" when used in connection with particular Liabilities shall mean the Party and/or other Person(s) having the right to be indemnified with respect to such Liabilities by the Indemnifying Party pursuant to *Sections 4.1(c)* and *9.3*, or this *Article XIII*.

(b) To make a claim for indemnification under *Sections 4.1(c)*, *5.5(b)*, *5.5(c)*, *9.3*, *9.15*, *13.2* or *13.3*, an Indemnified Party shall promptly notify the Indemnifying Party in writing of its claim under this *Section 13.7*, including, the specific details of and specific basis under this Agreement for its claim (the "***Claim Notice***"). In the event that the claim for indemnification is based upon a claim by a Third Party against the Indemnified Party (a "***Third Party Claim***"), the Indemnified Party shall provide its Claim Notice promptly after the Indemnified Party has actual knowledge of the Third Party Claim and shall enclose a copy of all papers (if any) served with respect to the Third Party Claim; *provided* that the failure of any Indemnified Party to give notice of a Third Party Claim as provided in this *Section 13.7(b)* shall not relieve the Indemnifying Party of its obligations under *Sections 4.1(c)*, *5.5(b)*, *5.5(c)*, *9.3*, *9.15*, *13.2* or *13.3* (as applicable) except to the extent such failure results in insufficient time being available to permit the Indemnifying Party to effectively defend against the Third Party Claim or otherwise materially prejudices the Indemnifying Party's ability to defend against the Third Party Claim. In the event that the claim for indemnification is based upon an inaccuracy or breach of a representation, warranty, covenant or agreement, the Claim Notice shall specify the representation, warranty, covenant or agreement that was inaccurate or breached.

(c) In the case of a claim for indemnification based upon a Third Party Claim, the Indemnifying Party shall have 30 days from its receipt of the Claim Notice to notify the Indemnified Party whether it admits or denies its obligation to defend and indemnify the Indemnified Party against such Third Party Claim at the sole cost and expense of the Indemnifying Party. The Indemnified Party is authorized, prior to and during such 30-day period, at the expense of the Indemnifying Party, to file any motion, answer or other pleading that it shall deem necessary or appropriate to protect its interests or those of the Indemnifying Party and that is not prejudicial to the Indemnifying Party.

(d) If the Indemnifying Party admits its obligation to defend and indemnify the Indemnified Party against a Third Party Claim, it shall have the right and obligation to diligently defend and indemnify, at its sole cost and expense, the Indemnified Party against such Third Party Claim. Subject to this *Section 13.7(d)*, the Indemnifying Party shall have full control of such defense and proceedings, including any compromise or settlement thereof. If requested by the Indemnifying Party, the Indemnified Party agrees to cooperate in contesting any Third Party Claim which the Indemnifying Party elects to contest. The Indemnified Party may participate in, but not control, at its own expense (except for and excluding any Third Party Claim which is finally determined to be covered under Seller's indemnification obligations set forth in *clause (xi)* of *Schedule 13.1(b)*), any defense or settlement of any Third Party Claim controlled by the Indemnifying Party pursuant to this *Section 13.7(d)*. An Indemnifying Party shall not, without the written consent of the Indemnified Party, (i) settle any Third Party Claim or consent to the entry of any judgment with respect thereto which does not include an unconditional written release of the Indemnified Party from all Liability in respect of such Third Party Claim or (ii) settle any Third Party Claim or consent to the entry of any judgment with respect thereto in any manner that may materially and adversely affect the Indemnified Party (other than as a result of money damages covered by the indemnity).

(e) If the Indemnifying Party does not admit its obligation, or admits its obligation to defend and indemnify the Indemnified Party against a Third Party Claim but fails to diligently prosecute, indemnify against or settle such Third Party Claim, then the Indemnified Party shall have the right to defend against the Third Party Claim at the sole cost and expense of the Indemnifying Party, with counsel of the Indemnified Party's choosing, subject to the right of the

Indemnifying Party to admit its liability and assume the defense of the Third Party Claim at any time prior to settlement or final determination thereof. If the Indemnifying Party has not yet admitted its obligation to defend and indemnify the Indemnified Party against a Third Party Claim, the Indemnified Party shall send written notice to the Indemnifying Party of any proposed settlement and the Indemnifying Party shall have the option for ten days following receipt of such notice to (i) admit in writing its obligation to indemnify the Indemnified Party from and against the liability and consent to such settlement, (ii) if liability is so admitted, reject, in its reasonable judgment, the proposed settlement, or (iii) deny liability. Any failure by the Indemnifying Party to respond to such notice shall be deemed to be an election under subsection (iii) above.

(f) In the case of a claim for indemnification not based upon a Third Party Claim, the Indemnifying Party shall have 30 days from its receipt of the Claim Notice to (i) cure the Liabilities complained of, (ii) admit its liability for such Liability or (iii) dispute the claim for such Liabilities. If the Indemnifying Party does not notify the Indemnified Party within such 30-day period that it has cured the Liabilities or that it disputes the claim for such Liabilities, the Indemnifying Party shall be deemed to dispute the claim for such Liabilities.

(g) Notwithstanding anything to the contrary in this Agreement, except as provided in *clause (iv)* of *Schedule 13.1(b)*, the Parties acknowledge and agree that an Indemnified Party shall have the right (in its discretion) to assert, without duplication of recovery with respect to the same claim, a claim under applicable clause of *Section 13.2* or *Section 13.3*, as applicable, even if such claim could be brought under, or is foreclosed from being brought under, any other clause of *Section 13.2* or *Section 13.3*, as applicable, for any reason.

13.8 ***Survival***. The provisions of *Schedule 13.8* are incorporated herein by reference.

13.9 ***Non-Compensatory Damages***. None of the Buyer Indemnified Parties nor Seller Indemnified Parties shall be entitled to recover from Seller or Buyer, or their respective Affiliates, any special, indirect, consequential, punitive, exemplary, remote or speculative damages, or damages for lost profits of any kind arising under or in connection with this Agreement or the transactions contemplated hereby, except to the extent any such Party suffers such damages to a Third Party, which damages (including costs of defense and reasonable attorneys' fees incurred in connection with defending against such damages) shall not be excluded by this provision as to recovery hereunder. Subject to the preceding sentence, Buyer, on behalf of each of the Buyer Indemnified Parties, and Seller, on behalf of each of the Seller Indemnified Parties, waive any right to recover special, indirect, consequential, punitive, exemplary, remote or speculative, or damages for lost profits of any kind, arising under or in connection with this Agreement or the transactions contemplated hereby. Notwithstanding anything to the contrary in this *Section 13.9* or any other provision of this Agreement, nothing in this *Section 13.9* shall be construed as limiting any Person's ability to recover any direct damages (including lost profits that are direct damages) as provided under Texas law.

13.10 ***Waiver of Right to Rescission***. Seller and Buyer acknowledge that, following Closing, the payment of money, as limited by the terms of this Agreement, shall be adequate compensation for breach of any representation, warranty, covenant or agreement contained in this Agreement or for any other claim arising in connection with or with respect to the transactions contemplated by this Agreement. As the payment of money shall be adequate compensation, following Closing, Buyer and Seller waive any right to rescind this Agreement or any of the transactions contemplated hereby.

13.11 ***Treatment of Indemnification Payments***. For all Tax purposes, Buyer and Seller agree to treat (and will cause each of their respective Affiliates to treat) any indemnification payment made under this *Article XIII* as an adjustment to the Purchase Price.

13.12 ***Disclaimer of Application of Anti-Indemnity Statutes***. THE PARTIES ACKNOWLEDGE AND AGREE THAT THE PROVISIONS OF ANY ANTI-INDEMNITY STATUTE RELATING TO OILFIELD SERVICES AND ASSOCIATED ACTIVITIES SHALL NOT BE APPLICABLE TO THIS AGREEMENT AND/OR THE TRANSACTIONS CONTEMPLATED HEREBY.

ARTICLE XIV
TERMINATION, DEFAULT AND REMEDIES

14.1 ***Right of Termination***. This Agreement and the transactions contemplated in this Agreement may be terminated at any time prior to Closing by delivery of written notice to the other Party:

(a) by the mutual prior written consent of Seller and Buyer;

(b) by either Seller or Buyer if Closing has not occurred on or before the 31 st day after the Scheduled Closing Date (or such later date as agreed to in writing by Seller and Buyer); *provided*, *however*, that if (i) Buyer shall have determined not to file with CFIUS pursuant to *Section 9.10(b)*, and (ii) Seller, at Seller's option, determined that a CFIUS filing would be made, and (iii) the conditions set forth in *Sections 10.6 and 11.6* have not been met by the Scheduled Closing Date; and (iv) neither Buyer nor Seller has terminated the Agreement pursuant to *Section 14.1(e)*, then on or before the earlier to occur of (A) the date that is 10 Business Days following CFIUS Approval and (B) the date that is 90 days after the Scheduled Closing Date set forth in *Section 12.1* (the "***CFIUS Closing Date***");

(c) by Seller, at Seller's option, if (i) any of the conditions set forth in *Article XI* (other than *Section 11.4* and *Section 11.6*) have not been satisfied (or waived in writing by Seller) as of the Scheduled Closing Date (or the CFIUS Closing Date, if applicable), and, following written notice thereof from Seller to Buyer specifying the reason such condition is unsatisfied (including any breach by Buyer of this Agreement), such condition remains unsatisfied for a period of ten Business Days after Buyer's receipt of written notice thereof from Seller and (ii) as of the Scheduled Closing Date (or the CFIUS Closing Date, if applicable), Seller is ready, willing and able (subject to obtaining or satisfying the Regulatory Approvals) to perform all of its agreements contained herein which are to be performed or observed by Seller at or in connection with the Closing;

(d) by Buyer, at Buyer's option, if (i) any of the conditions set forth in *Article X* (other than *Section 10.4* and *Section 10.6*) have not been satisfied (or waived in writing by Buyer) as of the Scheduled Closing Date (or the CFIUS Closing Date, if applicable), and, following written notice thereof from Buyer to Seller specifying the reason such condition is unsatisfied (including any breach by Seller of this Agreement), such condition remains unsatisfied for a period of ten Business Days after Seller's receipt of written notice thereof from Buyer and (ii) as of the Scheduled Closing Date (or the CFIUS Closing Date, if applicable), Buyer is ready, willing and able (subject to obtaining or satisfying the Regulatory Approvals) to perform all of its agreements contained herein which are to be performed or observed by Buyer at or in connection with the Closing;

(e) by either Seller or Buyer if (i) any Governmental Authority shall have issued a final non-appealable order enjoining or otherwise prohibiting the consummation of the transactions contemplated by this Agreement or (ii) CFIUS has informed Seller in a final decision at the end of the investigation time period allowed under the DPA that there is no mitigation that will resolve the identified national security risk associated with the transactions contemplated by this Agreement;

(f) by Buyer if the condition set forth in *Section 10.4* is not satisfied as of the Scheduled Closing Date (or the CFIUS Closing Date, if applicable) or by Seller if the condition set forth in *Section 11.4* is not satisfied as of the Scheduled Closing Date (or the CFIUS Closing Date, if applicable); *provided*, *however*, that neither Party shall be entitled to terminate this Agreement pursuant to *Sections 14.1(b)* through *14.1(e)* above if such Party or its Affiliates are, at such time, in material breach of this Agreement.

14.2 ***Effect of Termination***.

(a) If this Agreement, including the obligation to close the transactions contemplated hereby, is terminated pursuant to any provision of *Section 14.1* hereof, then, except for the provisions of *Article I*, *Sections 4.1(c)* through *4.1(e)*, *4.2*, *4.3*, *9.6(a)*, *9.15*, *13.9*, this *Section 14.2*, *Section 14.3*, *Article XV* (other than *Sections 15.2(a)* through *(g)*, *15.7*, *15.8*, *15.16*, and *15.18*) and such of the defined terms in *Appendix I* to give context to the surviving provisions, this Agreement shall forthwith become void and the Parties shall have no Liability or obligation hereunder.

(b) If Seller has the right to terminate this Agreement pursuant to *Section 14.1(c)* because a condition set forth in *Sections 11.1*, *11.2*, or *11.5* has not been satisfied, (A) all of the conditions in *Article X* (excluding (i) conditions that, by their terms, cannot be satisfied until the Closing and (ii) the condition set forth in *Section 10.6*) have been satisfied (or waived in writing by Buyer) (unless the failure to satisfy such condition arises from the action or inaction by Buyer or any Buyer Indemnified Party) and (B) Seller is ready, willing and able (subject to obtaining or satisfying the Regulatory Approvals) to perform its obligations under *Section 12.3*, then, in such event, Seller shall have the right to, at its option, as Seller's sole and exclusive remedy, terminate this Agreement pursuant to *Section 14.1(c)* and Buyer shall be obligated to jointly with Seller instruct the Escrow Agent to disburse the Deposit to Seller as liquidated damages and not as a penalty for such termination, free and clear of any claims thereon by Buyer or any of its Affiliates, and thereafter, all other rights, remedies and obligations of any Party arising under this Agreement (except for the provisions that survive pursuant to *Section 14.2(a)*, which shall remain in full force and effect) are hereby expressly waived by the Parties. THE PARTIES ACKNOWLEDGE AND AGREE THAT (x) SELLER'S ACTUAL DAMAGES RESULTING FROM A TERMINATION UNDER *SECTION 14.1(c)* MAY BE DIFFICULT, IF NOT IMPOSSIBLE TO CALCULATE, (y) THE DEPOSIT IS A FAIR AND REASONABLE ESTIMATE OF SELLER'S LIQUIDATED DAMAGES IN LIGHT OF THE UNCERTAINTIES IN CALCULATING THE ACTUAL DAMAGES THAT WOULD BE SUFFERED BY SELLER UNDER THE CIRCUMSTANCES SET FORTH IN THIS *SECTION 14.2(b)* AND (z) SUCH LIQUIDATED DAMAGES ARE NOT A PENALTY.

(c) If Buyer has the right to terminate this Agreement pursuant to *Section 14.1(d)* because a condition set forth in *Sections 10.1*, *10.2* or *10.5* has not been satisfied, (A) all of the conditions in *Article XI* (excluding (i) conditions that, by their terms, cannot be satisfied until the Closing and (ii) the condition set forth in *Section 11.6*) have been satisfied (or waived in writing by Seller) (unless the failure to satisfy such condition arises from the action or inaction by Seller or any Seller Indemnified Party) and (B) Buyer is ready, willing and able (subject to obtaining or satisfying the Regulatory Approvals) to perform its obligations under *Section 12.3*, then, in such event, Buyer shall have the right, at its option, to (i) in lieu of terminating this Agreement, to obtain all remedies available at law or in equity, including specific performance by Seller or (ii) terminate this Agreement by written notice to Seller and Seller shall be obligated to jointly with Buyer instruct the Escrow Agent to disburse the Deposit to Buyer, free and clear of any claims thereon by, through or under Seller or any of its Affiliates, and thereafter, all other rights, remedies and obligations of any Party arising under this Agreement (except for the provisions that survive pursuant to *Section 14.2(a)*, which shall remain in full force and effect) are hereby expressly waived by the Parties. Seller hereby agrees not to raise any objections to the availability of the equitable remedy of specific performance to specifically enforce the terms and provisions of this Agreement pursuant to this *Section 14.2(c)*. Buyer shall not be required to provide any bond or other security in connection with seeking an injunction or injunctions to enforce specifically the terms and provisions of this Agreement pursuant to this *Section 14.2(c)*.

(d) Without limitation of any of Buyer's rights or remedies under *Section 14.2(c)* above, in the event that (i) this Agreement is terminated under *Section 14.1* and (ii) Seller is not entitled to receive the (y) Deposit under *Section 14.2(b)* or (z) CFIUS Termination Fee under *Section 14.2(e)*, then Seller and Buyer shall, within two (2) Business Days of the date of such termination, jointly instruct the Escrow Agent to disburse to Buyer the Deposit, free and clear of any claims thereon by, through or under Seller or any of its Affiliates. For the avoidance of doubt, if the Agreement is terminated by either Party (A) pursuant to *Section 14.1(f)* or (B) any other provision set forth in *Section 14.1* and at the time of such termination the conditions set forth in *Section 10.4* or *Section 11.4* are not satisfied, then, notwithstanding the foregoing, Seller and Buyer shall, within two (2) Business Days of the date of such termination, jointly instruct the Escrow Agent to disburse to Buyer the Deposit, free and clear of any claims thereto by, through or under Seller or any of its Affiliates.

(e) If (i) Seller or Buyer terminates this Agreement pursuant to *Section 14.1(e)* or (ii) Seller or Buyer terminate this Agreement pursuant to *Section 14.1(b)* and *Section 10.6* (as it relates to CFIUS) and *Section 11.6* (as it relates to CFIUS) have not been satisfied, then Seller and Buyer shall, within two (2) Business Days of the date of such termination, jointly instruct the Escrow Agent to disburse to Seller the Deposit as the CFIUS Termination Fee as Seller's sole and exclusive remedy for such termination as liquidated damages and not as a penalty, free and clear of any claims thereon by, through or under Buyer or any of its Affiliates. THE PARTIES ACKNOWLEDGE AND AGREE THAT (x) SELLER'S ACTUAL DAMAGES RESULTING FROM A TERMINATION DESCRIBED IN THE FIRST SENTENCE OF THIS *SECTION 14.2(E)*, MAY BE DIFFICULT, IF NOT IMPOSSIBLE TO CALCULATE, (y) THE CFIUS TERMINATION FEE IS A FAIR AND REASONABLE ESTIMATE OF SELLER'S LIQUIDATED DAMAGES IN LIGHT OF THE UNCERTAINTIES IN CALCULATING THE ACTUAL DAMAGES THAT WOULD BE SUFFERED BY SELLER UNDER THE CIRCUMSTANCES SET FORTH IN THIS *SECTION 14.2(E)* AND (z) SUCH LIQUIDATED DAMAGES ARE NOT A PENALTY.

14.3 ***Return of Documentation and Confidentiality***. Upon termination of this Agreement, Buyer shall destroy or return to Seller all title, engineering, geological and geophysical data, environmental assessments and/or reports, maps and other information furnished by or on behalf of Seller to Buyer or prepared by or on behalf of Buyer in connection with its due diligence investigation of the Conveyed Interests, in each case, in accordance with the Confidentiality Agreement and, if Buyer elects to destroy any such information, an officer of Buyer shall certify the destruction of such information to Seller in writing.

ARTICLE XV
MISCELLANEOUS

15.1 ***Appendices, Exhibits and Schedules***. All of the Appendices, Exhibits and Schedules referred to in this Agreement are hereby incorporated into this Agreement by reference and constitute a part of this Agreement. Each Party to this Agreement and its counsel have received a complete set of Appendices, Exhibits and Schedules prior to and as of the execution of this Agreement.

15.2 ***Expenses and Taxes***. Except as otherwise specifically provided in this Agreement, all fees, costs and expenses incurred by the Parties in negotiating this Agreement or in consummating the transactions contemplated by this Agreement shall be paid by the Party incurring the same, including legal and accounting fees, costs and expenses.

(a) Seller shall be allocated and bear all Asset Taxes attributable to any Tax period (or portion of any Straddle Period) ending prior to the Effective Time, and Buyer shall be allocated and bear all Asset Taxes attributable to any Tax period (or portion of any Straddle Period) that begins at or after the Effective Time.

(b) For purposes of determining the allocations in *Section 15.2(b)*, (i) Asset Taxes that are attributable to the severance or production of Hydrocarbons (other than such Asset Taxes described in *clause (iii)*, below) shall be allocated to the period in which the severance or production giving rise to such Asset Taxes occurred, (ii) Asset Taxes that are based upon or related to sales or receipts or imposed on a transactional basis (other than such Asset Taxes described in *clause (i)* or *(iii)*), shall be allocated to the period in which the transaction giving rise to such Asset Taxes occurred, and (iii) Asset Taxes that are ad valorem, property or other Asset Taxes imposed on a periodic basis pertaining to a Straddle Period shall be allocated between the portion of such Straddle Period ending immediately prior to the Effective Time and the portion of such Straddle Period beginning at the Effective Time by prorating each such Asset Tax based on the number of days in the applicable Straddle Period that occur before the date on which the Effective Time occurs, on the one hand, and the number of days in such Straddle Period that occur on or after the date on which the Effective Time occurs, on the other hand. For purposes of *clause (iii)* of the preceding sentence, the period for such Asset Taxes shall begin on the date on which ownership of the applicable Conveyed Interests gives rise to Liability for the particular Asset Tax and shall end on the day before the next such date.

(c) To the extent the actual amount of an Asset Tax is not known at the time an adjustment is to be made with respect to such Asset Tax pursuant to *Section 3.3*, *3.5* or *3.6*, as applicable, the Parties shall utilize the most recent information available in estimating the amount of such Asset Tax for purposes of such adjustment. To the extent the actual amount of an Asset Tax (or the amount thereof paid or economically borne by a Party) is ultimately determined to be different than the amount (if any) that was taken into account in the Final Settlement Statement as finally determined pursuant to *Section 3.6*, timely payments will be made from one Party to the other to the extent necessary to cause each Party to bear the amount of such Asset Tax that is allocable to such Party under this *Section 15.2*.

(d) Subject to the Transition Services Agreement:

(i) Subject to *Section 15.2(d)(ii)*, after the Closing Date, Buyer shall (x) be responsible for paying any Asset Taxes relating to any Tax period that ends before or includes the Closing Date that become due and payable after the Closing Date and shall file with the appropriate Taxing Authority any and all Tax Returns required to be filed after the Closing Date with respect to such Asset Taxes, (y) submit each such Tax Return to Seller for its review and comment reasonably in advance of the due date therefor, and (z) timely file any such Tax Return, incorporating any reasonable comments received from Seller prior to the due date therefor.

(ii) Notwithstanding *Section 15.2(d)(i)*, and to the extent permissible under applicable Law, with respect to any Conveyed Interests of which Seller is the operator, Seller shall be responsible for the payment to the applicable Taxing Authority of any severance Asset Taxes through the production month in which the Closing occurs, and the preparation and timely filing of any Tax Return relating to such Asset Taxes, and the payment to the applicable Taxing Authority of any sales or use Asset Taxes attributable to any Tax period (or portion thereof) ending on or prior to the Closing Date, and the preparation and timely filing of any Tax Return relating to such Asset Taxes. Seller shall prepare (or cause to be prepared) in accordance with past practices (unless otherwise required by applicable Law) and file (or cause to be filed) the U.S. federal income Tax Return (and related Schedules K-1) of the Tarrant Salt Walter Disposal Joint Venture for the 2019 Tax period, and to the extent Seller or any of its Affiliates is appointed as the "partnership representative" (as defined in Section 6223 of the Code and the applicable Treasury Regulations) on such Tax Return, such Seller or Affiliate, as applicable, shall use commercially reasonable efforts to make a "push-out" election under Section 6226 of the Code with respect to any imputed underpayment that is asserted with respect to such Tax Return. Buyer shall prepare (or cause to be prepared) in accordance with past practices (unless otherwise required by applicable Law) and file (or cause to be filed) the U.S. federal income Tax Return (and related Schedules K-1) for the 2020 Tax period, allocating all items of income, gain, loss, deduction and credit allocable to the Water Disposal JV Interest between Seller and Buyer based on the "interim closing method" under Section 706 of the Code and the Treasury Regulations thereunder, and Buyer shall submit such Tax Return to Seller for its review and comment reasonably in advance of the due date therefor and timely file any such Tax Return incorporating any reasonable comments received from Seller prior to the due date therefor.

The Parties agree that (x) this *Section 15.2(d)* is intended to solely address the timing and manner in which certain Tax Returns relating to Asset Taxes are filed and the Asset Taxes shown thereon are paid to the applicable Taxing Authority, and (y) nothing in this *Section 15.2(d)* shall be interpreted as altering the

manner in which Asset Taxes are allocated to and economically borne by the Parties or a Party's right to indemnification pursuant to *Article XIII* (except for any penalties, interest or additions to Tax imposed as a result of any breach by a Party of its obligations under this *Section 15.2(d)*, which shall be borne by such Party).

(e) All required documentary, filing and recording fees and expenses in connection with the filing and recording of the assignments, conveyances or other instruments required to convey title to the Conveyed Interests to Buyer shall be borne by Buyer. Any and all sales, use, transfer, stamp, documentary, registration or similar Taxes incurred or imposed with respect to the transactions described in this Agreement (collectively, "***Transfer Taxes***") shall be borne by Buyer; *provided* that Seller shall pay or cause to be paid to the applicable Governmental Authorities any Transfer Taxes that it is required by Law to collect and remit; *provided*, *however*, that Seller shall not collect sales Tax with respect to the transfer of Hydrocarbons in storage pursuant to this Agreement to the extent that Buyer has provided to Seller at or prior to Closing a valid resale certificate establishing such transfer as an exempt sale for resale under applicable Law. Buyer shall indemnify and hold Seller harmless from and against such Transfer Taxes within 30 days of Seller's written demand therefor. If Seller (not Buyer) is required by applicable Law to appeal or protest the assessment of Transfer Taxes, the appeal or protest of such proposed assessment shall be treated as an item for which Seller is entitled to indemnification and if Buyer provides a written request and instructs Seller to do so, Seller shall prosecute the protest or appeal; in such event Buyer shall pay all out-of-pocket expenses of Seller (including attorneys' fees) incurred by Seller in connection with such appeal or protest. Seller and Buyer shall reasonably cooperate in good faith to minimize, to the extent permissible under applicable Law, the amount of any such Transfer Taxes.

(f) The Parties shall cooperate fully, as and to the extent reasonably requested by the other Party, in connection with the filing of Tax Returns and any audit, litigation, or other proceeding with respect to Taxes relating to the Conveyed Interests. Such cooperation shall include (i) the retention and (upon another Party's request) the provision of records and information that are relevant to any such Tax Return or audit, litigation or other proceeding and making employees available on a mutually convenient basis to provide additional information and explanation of any material provided under this Agreement, (ii) in connection with the provision of the Preliminary Settlement Statement and Final Settlement Statement, providing to Buyer supporting tax information used in the determination of the Preliminary Settlement Statement and Final Settlement Statement, including ad valorem and property tax information for the 2019 taxable period and the 2020 taxable period (to the extent such information is in Seller's possession at such time and not otherwise in Buyer's possession) identifying the type of property, relevant account numbers, tax collector and appraiser, status of the assessed property, percentage of ownership, taxable values, and the applicable gross tax liability, and (iii) with respect to the 2020 taxable period, prior to the Closing, authorizing Buyer and any of its applicable designees to engage with the applicable Taxing Authority in connection with determination of the values used in the assessment of ad valorem taxes of the Conveyed Interests and providing to Buyer any information reasonably requested by Buyer that is in Seller's possession and relevant to making any such determination. The Parties agree to retain all books and records with respect to Tax matters pertinent to the Conveyed Interests relating to any Tax period beginning before the Closing Date until the later of (1) seven years or (2) the expiration of the statute of limitations of the respective Tax periods and to abide by all record retention agreements entered into with any Governmental Authority.

(g) Seller shall reasonably cooperate with Buyer to cause the Tarrant Salt Water Disposal Joint Venture and any tax partnership identified on *Schedule 7.12* to make a valid election under Section 754 of the Code (and any comparable elections for any applicable state income tax purposes) for the taxable year during which the Closing occurs.

15.3 ***Assignment***. Subject to the provisions of *Section 15.18*, this Agreement may not be assigned by either Party without the prior written consent of the other Party and any such assignment without such consent shall be void ab initio. Notwithstanding the foregoing, Buyer shall have the right to designate an Affiliate of Buyer as an assignee for all or part of the Conveyed Interests to be conveyed by Seller at Closing. No assignment of any rights hereunder by a Party shall relieve such Party of any obligations and responsibilities hereunder. Any assignment or other transfer by Buyer or its successors and assigns of any of the Conveyed Interests shall not relieve Buyer or its successors or assigns of any of their obligations (including indemnity obligations) hereunder, as to the Conveyed Interests so assigned or transferred.

15.4 ***Preparation of Agreement***. Both Seller and Buyer and their respective counsel participated in the preparation of this Agreement. In the event of any ambiguity in this Agreement, no presumption shall arise based on the identity of the draftsman of this Agreement.

15.5 ***Publicity***. Seller and Buyer shall promptly consult with each other with regard to all press releases or other public or private announcements issued or made at or prior to Closing concerning this Agreement or the transactions contemplated in this Agreement, and, except as may be required by applicable Laws or the applicable rules and regulations of any Governmental Authority or stock exchange or as described in the remaining provisions of this *Section 15.5*, neither Buyer nor Seller shall issue any such press release or other public or private announcement without the prior written consent of the other Party (which shall not be unreasonably withheld or delayed). Subject to, and without limitation of, *Section 15.22*, the Parties and their Affiliates shall be obligated to hold all specific terms and provisions of this Agreement strictly confidential until the expiration of two years after the Closing under this Agreement; *provided*, *however*, that the foregoing shall not (a) restrict disclosures by Buyer or Seller that are required by applicable securities or other Laws or regulations or the applicable rules of any stock exchange having jurisdiction over the disclosing Party or its Affiliates; *provided* that such disclosures shall be made only to the extent required thereunder, (b) prevent Buyer or Seller from recording the Assignment, the SWGP Assignment, the DEC Assignment, the DGS Assignment, the DGS Surface Deed, any Deed and any federal or state assignments delivered at Closing or from complying with any disclosure requirements of Governmental Authorities that are applicable to the transfer of the Conveyed Interests from Seller to Buyer, (c) prevent Buyer or Seller from making any disclosure of information relating to this Agreement if made in a manner, under conditions and to Persons that would be permitted under the Confidentiality Agreement so long as such Person continues to hold such information confidential on the same terms as set forth in this *Section 15.5*, and (d) prevent Seller from making disclosures in connection with complying with Preferential Purchase Rights and other transfer restrictions applicable to the transactions contemplated hereby.

15.6 ***Notices***. All notices and communications required or permitted to be given hereunder shall be given in writing and shall be delivered personally, or sent by bonded overnight courier, or mailed by U.S. Express Mail, Federal Express or United Parcel Service Express Delivery or by certified or

registered United States Mail with all postage fully prepaid, or sent by electronic mail ("***email***") transmission (*provided* that the acknowledgment of the receipt of such email is requested and received, excluding automatic receipts) addressed to the appropriate Party at the address for such Party shown below or at such other address as such Party shall have theretofore designated by written notice delivered to the Party giving such notice:

If to Seller:

Devon Energy Production Company, L.P.
333 W. Sheridan Ave
Oklahoma City, OK 73102-5010
Attention: Bobby Saadati, Vice President, Business Development
Email: [***]

With copies to (which shall not constitute notice):

Attention: Matt Johnson, VP of Corporate Development
Email: [***]

Any notice given in accordance herewith shall be deemed to have been given when delivered to the addressee in person, or by courier, or transmitted by email transmission during normal business hours on a Business Day (or if delivered or transmitted after 5:00 pm. Central Time on a Business Day or on a day other than a Business Day, then on the next Business Day), or upon actual receipt by the addressee during normal business hours on a Business Day after such notice has either been delivered to an overnight courier or deposited in the United States Mail or with Federal Express or United Parcel Service, as the case may be (or if delivered after 5:00 p.m. Central Time on a Business Day or on a day other than a Business Day, then on the next Business Day). Either Party may change their contact information for notice by giving written notice to the other Party in the manner provided in this *Section 15.6*. If the date specified in this Agreement for giving any notice or taking any action is not a Business Day (or if the period during which any notice is required to be given or any action taken expires on a date which is not a Business Day), then the date for giving such notice or taking such action (and the expiration date of such period during which notice is required to be given or action taken) shall be the next day which is a Business Day.

15.7 ***Further Cooperation***. Until the 4 year anniversary of Closing, Buyer and Seller shall execute and deliver, or shall cause to be executed and delivered from time to time, such further instruments of conveyance and transfer, and shall take such other actions as any Party may reasonably request to convey and deliver the Conveyed Interests to Buyer, and to accomplish the orderly transfer of the Conveyed Interests to Buyer in the manner contemplated by this Agreement. Subject to, and without limitation of, *Section 2.3*, (a) if any Party receives monies belonging to the other, such amount shall immediately be paid over to the proper Party and (b) if an invoice or other evidence of an obligation is received by a Party, which is partially an obligation of both Seller and Buyer pursuant to this Agreement, then the Parties shall consult with each other, and each shall promptly pay its portion of such obligation to the obligee.

15.8 ***Filings, Notices and Certain Governmental Approvals***. Promptly after Closing and without limiting the Parties' obligations under the Transition Services Agreement to the extent Seller continues to operate the Conveyed Interests pursuant to the Transition Services Agreement, Buyer shall, at its sole expense, (a) record all assignments and deeds, including the Assignments and the Deeds executed at Closing in the records of the applicable Governmental Authority (including any federal or state agencies, if applicable), (b) if applicable, send notices to vendors supplying goods and services for the

Conveyed Interests and to the operator of the applicable Subject Properties of the assignment of the Conveyed Interests to Buyer, (c) actively pursue and obtain the unconditional approval of all applicable Governmental Authorities of the assignment of the Conveyed Interests to Buyer, (d) file and actively pursue approvals from the applicable Governmental Authority of all federal and state change of operator forms set forth in *Section 12.3(k)*, and (e) actively pursue all other consents and approvals that may be required in connection with the assignment of the Conveyed Interests to Buyer and the assumption of the Liabilities assumed by Buyer hereunder, in each case, that shall not have been obtained prior to Closing.

15.9 ***Entire Agreement; Conflicts***. THIS AGREEMENT, THE APPENDICES, EXHIBITS AND SCHEDULES HERETO, THE TRANSACTION DOCUMENTS AND THE CONFIDENTIALITY AGREEMENT COLLECTIVELY CONSTITUTE THE ENTIRE AGREEMENT BETWEEN THE PARTIES PERTAINING TO THE SUBJECT MATTER HEREOF AND SUPERSEDE ALL PRIOR AGREEMENTS, UNDERSTANDINGS, NEGOTIATIONS, AND DISCUSSIONS, WHETHER ORAL OR WRITTEN, OF THE PARTIES PERTAINING TO THE SUBJECT MATTER OF THIS AGREEMENT. THERE ARE NO WARRANTIES, REPRESENTATIONS, OR OTHER AGREEMENTS BETWEEN THE PARTIES RELATING TO THE SUBJECT MATTER OF THIS AGREEMENT EXCEPT AS SPECIFICALLY SET FORTH IN THIS AGREEMENT AND THE SPECIAL WARRANTY SET FORTH IN THE ASSIGNMENTS AND DEEDS, AND NEITHER PARTY SHALL BE BOUND BY OR LIABLE FOR ANY ALLEGED REPRESENTATION, PROMISE, INDUCEMENT, OR STATEMENTS OF INTENTION NOT SO SET FORTH. IN THE EVENT OF A CONFLICT BETWEEN: (a) THE TERMS AND PROVISIONS OF THIS AGREEMENT AND THE TERMS AND PROVISIONS OF ANY SCHEDULE OR EXHIBIT HERETO; OR (b) THE TERMS AND PROVISIONS OF THIS AGREEMENT AND THE TERMS AND PROVISIONS OF ANY TRANSACTION DOCUMENT, THE TERMS AND PROVISIONS OF THIS AGREEMENT SHALL GOVERN AND CONTROL; *PROVIDED*, *HOWEVER*, THAT THE INCLUSION IN ANY OF THE SCHEDULES OR EXHIBITS HERETO OR ANY TRANSACTION DOCUMENT OF TERMS AND PROVISIONS NOT ADDRESSED IN THIS AGREEMENT SHALL NOT BE DEEMED A CONFLICT, AND ALL SUCH ADDITIONAL PROVISIONS SHALL BE GIVEN FULL FORCE AND EFFECT, SUBJECT TO THE PROVISIONS OF THIS *SECTION 15.9*.

15.10 ***Parties in Interest***. Notwithstanding anything in this Agreement to the contrary, nothing in this Agreement, expressed or implied, is intended to confer on any Person other than the Parties or their respective successors and permitted assigns, or the Parties' respective related Indemnified Parties hereunder any rights, remedies or Liabilities under or by reason of this Agreement; *provided* that only a Party and its successors and permitted assigns will have the right to enforce the provisions of this Agreement on its own behalf or on behalf of any of its related Indemnified Parties (but shall not be obligated to do so).

15.11 ***Successors and Permitted Assigns***. The terms and provisions of this Agreement shall be binding upon and inure to the benefit of Buyer and Seller and their respective successors and permitted assigns.

15.12 ***Amendment***. This Agreement may be amended, restated, supplemented or otherwise modified only by an instrument in writing executed by both Parties and expressly identified as an amendment, restatement, supplement or modification.

15.13 ***Waiver; Rights Cumulative***. Any of the terms, covenants, representations, warranties, or conditions hereof may be waived only by a written instrument executed by or on behalf of the Party waiving compliance. No course of dealing on the part of either Party, or their respective officers, employees, agents, or representatives, and no failure by a Party to exercise any of its rights under this Agreement, shall, in any such case, operate as a waiver thereof or affect in any way the right of such Party at a later time to enforce the performance of such provision. No waiver by either Party of any condition, or any breach of any term, covenant, representation, or warranty contained in this Agreement, in any one or more instances, shall be deemed to be or construed as a further or continuing waiver of any such condition or breach or a waiver of any other condition or of any breach of any other term, covenant, representation, or warranty. The rights of the Parties under this Agreement shall be cumulative, and the exercise or partial exercise of any such right shall not preclude the exercise of any other right.

15.14 ***Governing Law; Dispute Resolution; Jury Waiver***. THIS AGREEMENT AND ANY CLAIM, CONTROVERSY OR DISPUTE ARISING UNDER OR RELATED TO THIS AGREEMENT OR THE TRANSACTIONS CONTEMPLATED HEREBY OR THE RIGHTS, DUTIES AND THE LEGAL RELATIONS AMONG THE PARTIES HERETO AND THERETO ("***DISPUTES***") SHALL BE GOVERNED AND CONSTRUED IN ACCORDANCE WITH THE LAWS OF THE STATE OF TEXAS, EXCLUDING ANY CONFLICTS OF LAW RULE OR PRINCIPLE THAT MIGHT REFER CONSTRUCTION OF SUCH PROVISIONS TO THE LAWS OF ANOTHER JURISDICTION. THE PARTIES AGREE TO SUBMIT ALL DISPUTES TO BINDING ARBITRATION IN HOUSTON, TEXAS SUCH ARBITRATION TO BE CONDUCTED AS FOLLOWS: THE ARBITRATION PROCEEDING SHALL BE SUBMITTED BY THE PARTIES TO A PANEL OF THREE INDEPENDENT AND IMPARTIAL ARBITRATORS WITH AT LEAST 10 YEARS KNOWLEDGE OR EXPERIENCE IN THE OIL AND GAS INDUSTRY, ONE SELECTED BY EACH OF THE PARTIES WITHIN THIRTY DAYS AFTER RECEIPT OF WRITTEN NOTICE FROM THE OTHER PARTY AND A THIRD SELECTED BY THE FIRST TWO ARBITRATORS (EACH AN "***ARBITRATOR***", AND COLLECTIVELY THE "***ARBITRATORS***"). THE THIRD ARBITRATOR, SELECTED BY THE FIRST TWO ARBITRATORS, SHALL BE A PERSON HAVING SUBSTANTIAL EXPERIENCE AND RECOGNIZED EXPERTISE IN OIL AND GAS INDUSTRY. THE ARBITRATION SHALL BE CONDUCTED IN ACCORDANCE WITH THE COMMERCIAL ARBITRATION RULES OF THE AMERICAN ARBITRATION ASSOCIATION. ANY AWARD ENTERED IN THE ARBITRATION SHALL BE MADE BY A WRITTEN OPINION STATING THE REASONS AND BASIS FOR THE AWARD MADE AND ANY PAYMENT DUE PURSUANT TO THE ARBITRATION SHALL BE MADE WITHIN FIFTEEN (15) DAYS OF THE ARBITRATORS' DECISION. THE FINAL DECISION SHALL BE BINDING AND NON-APPEALABLE AND MAY BE FILED IN A COURT OF COMPETENT JURISDICTION AND MAY BE ENFORCED BY BUYER OR SELLER AS A FINAL JUDGMENT OF SUCH COURT. EACH PARTY SHALL BEAR ITS OWN COSTS AND EXPENSES OF THE ARBITRATION, *PROVIDED*, *HOWEVER*, THAT THE COSTS OF EMPLOYING THE ARBITRATORS SHALL BE BORNE 50% BY THE SELLER AND 50% BY THE BUYER. IN ENTERING INTO THIS *SECTION 15.14*, THE PARTIES ACKNOWLEDGE THAT THEY ARE VOLUNTARILY AND KNOWINGLY WAIVING THEIR RIGHTS TO JURY TRIAL.

15.15 ***Severability***. If any term or other provision of this Agreement is invalid, illegal, or incapable of being enforced by any rule of Law or public policy, all other conditions and provisions of this Agreement shall nevertheless remain in full force and effect so long as the economic or legal substance of the transactions contemplated hereby is not affected in any adverse manner to either Party. Upon such determination that any term or other provision is invalid,

illegal, or incapable of being enforced, the Parties shall negotiate in good faith to modify this Agreement so as to effect the original intent of the Parties as closely as possible in an acceptable manner to the end that the transactions contemplated hereby are fulfilled to the extent possible.

15.16 ***Removal of Name***. As promptly as practicable, but in any case within 60 days after the Closing Date, Buyer shall eliminate the names "Devon Energy Production Company, L.P.," "Devon" and any variants thereof from the Subject Properties and, except with respect to such grace period for eliminating existing usage, shall have no right to use any logos, trademarks or trade names belonging to Seller or any of its Affiliates.

15.17 ***Counterparts***. This Agreement may be executed in any number of counterparts, and each such counterpart hereof shall be deemed to be an original instrument, but all of such counterparts shall constitute for all purposes one agreement. Any signature hereto delivered by a Party by electronic transmission (including scanned documents delivered by email) shall be deemed an original signature hereto, and execution and delivery by such means shall be binding upon all Parties.

15.18 ***Like-Kind Exchange***. Buyer and Seller agree that either or both of Seller and Buyer may elect to treat the acquisition or sale of the Conveyed Interests as an exchange of like- kind property under Section 1031 of the Code (an "***Exchange***"), *provided* that the Closing shall not be delayed by reason of the Exchange. Each Party agrees to use reasonable efforts to cooperate with the other Party in the completion of such an Exchange including an Exchange subject to the procedures outlined in Treasury Regulation § 1.1031(k)-1 and/or Internal Revenue Service Revenue Procedure 2000-37. Each of Seller and Buyer shall have the right at any time prior to Closing to assign all or a part of its rights under this Agreement to a qualified intermediary (as that term is defined in Treasury Regulation § 1.1031(k)-1(g)(4)(iii)) or an exchange accommodation titleholder (as that term is defined in Internal Revenue Service Revenue Procedure 2000-37) to effect an Exchange. Each Party acknowledges and agrees that neither an assignment of a Party's rights under this Agreement nor any other actions taken by a Party or any other Person in connection with the Exchange shall release either Party from, or modify, any of its liabilities and obligations (including indemnity obligations to the other Party) under this Agreement, and neither Party makes any representations as to any particular Tax treatment that may be afforded to any other Party by reason of such assignment or any other actions taken in connection with the Exchange. Either Party electing to treat the acquisition or sale of the Conveyed Interests as an Exchange shall be obligated to pay all additional costs incurred hereunder as a result of the Exchange, and in consideration for the cooperation of the other Party, the Party electing Exchange treatment shall agree to pay all costs associated with the Exchange and to indemnify and hold the other Party, its Affiliates, and their respective former, current and future partners, members, shareholders, owners, officers, directors, managers, employees, agents and representatives harmless from and against any and all liabilities and Taxes arising out of, based upon, attributable to or resulting from the Exchange or transactions or actions taken in connection with the Exchange that would not have been incurred by the other Party but for the electing Party's Exchange election.

15.19 ***Specific Performance***. Each Party acknowledges that Buyer or, from and after Closing, Seller would be damaged irreparably if the obligations of the other Party under this Agreement are not performed in accordance with their specific terms or otherwise breached (or threatened to be breached). Accordingly, each Party agrees that Buyer or, from and after Closing, Seller may seek to enforce specifically the obligations of the other Party under this Agreement, without (a) the requirement of proving actual damages or posting of a bond or other security or (b) without prejudice to any other rights or remedies available to either Party under this Agreement; *provided* that any right to specifically enforce the provisions of this Agreement to compel Closing shall terminate upon termination of this Agreement under *Section 14.1*.

15.20 ***Liability Matters***. Buyer and Seller shall not, and shall cause the Buyer Indemnified Parties and the Seller Indemnified Parties not to, assert or threaten any claim or other method of recovery, in contract, in tort or under statute or other applicable Law, against any Person other than Buyer and Seller. Buyer and Seller, as applicable, shall be liable for all attorneys' fees and court costs arising from its breach of this *Section 15.20*.

15.21 ***Reliance***. Notwithstanding anything to the contrary in this Agreement, (a) Buyer has relied upon and will be deemed to have relied upon for all purposes of this Agreement all of Seller's express indemnification obligations set forth in this Agreement or any other Transaction Document and all of Seller's express representations, warranties, covenants and agreements set forth in this Agreement and in each other Transaction Document (including, for purposes of clarity, the special warranty of Defensible Title set forth in the Assignment(s)) and (b) the waivers, assumptions, releases and disclaimers set forth in this Agreement and any other Transaction Document shall not limit any Party's indemnification obligations, representations, warranties, covenants or agreements expressly set forth in this Agreement or any other Transaction Document.

15.22 ***Confidentiality***. If the Closing occurs, (a) the Confidentiality Agreement shall terminate with respect to the Parties and (b) for a period of one (1) year following the Closing Date, Seller shall keep, and shall take commercially reasonable efforts (without the obligation to expend any monies or undertake any obligations) to cause its Affiliates to keep, to the extent permitted by Law, strictly confidential all of the Records and all confidential information, data, documents and other instruments disclosed to Seller or any of its Affiliates by or on behalf of Buyer (collectively, the "***Confidential Information***"), except for (i) such Confidential Information (A) that becomes, through no violation of the provisions of this *Section 15.22* by Seller or its Affiliates, part of the public domain by publication or otherwise, (B) which is obtained by Seller or its Affiliates from a source that is not known to it to be prohibited from disclosing such Confidential Information to Seller or its Affiliates by an obligation of confidentiality to Buyer, or (C) which is developed independently by Seller or its Affiliates without use of, or reliance upon, any of the Confidential Information or (ii) disclosures of Confidential Information (A) in the course of any trial or other legal Proceeding involving Seller or its Affiliates, (B) as required by any applicable securities Law or legal process or other Law (including any subpoena, interrogatory, or other similar requirement for such information to be disclosed) or the rules of any applicable national stock exchange, or (C) as is necessary to allow Seller or its Affiliates to manage or operate the Excluded Assets and Other Matters or Seller's or its Affiliates' other assets or Specified Obligations. In any such circumstance outlined in *clause (ii)(A)* or *(ii)(B)* above, Seller will promptly give Buyer written notice of such required disclosure and take commercially reasonable efforts (without the obligation to expend any monies or undertake any obligations) to disclose only that portion of the Confidential Information as Seller is advised in writing by outside legal counsel that it is reasonably required to disclose and will exercise its commercially reasonable efforts (without the obligation to expend any monies or undertake any obligations) to obtain reliable assurance that confidential treatment will be accorded to such Confidential Information.

15.23 ***Exclusivity***. From and after the Execution Date until the earlier to occur of the Closing or the termination of this Agreement in accordance with *Section 14.1*, except as permitted by *Section 9.1*, Seller shall not, and shall cause each of its Affiliates and each of its and their respective Representatives not to, (a) enter into any agreement (binding or nonbinding), solicit, initiate, encourage, share information for the purpose of marketing or selling any or all of the Conveyed Interests or negotiate with any Person (other than Buyer or Buyer's Representatives (solely in their respective capacities as Representatives of Buyer)) with respect to any other transaction of any kind involving or related to the sale (whether by merger, stock or asset sale or any other similar acquisition, consolidation or combination of any of the foregoing, other than, for purposes of clarity, any such transaction resulting in a change of control of Seller's ultimate parent entity) of any or all of the Conveyed Interests or (b) assist, encourage or permit any effort or attempt by any Person (other than Buyer or Buyer's Representatives (solely in their respective capacities as a Representative of Buyer)) to attempt to do or seek to do any of the foregoing. Notwithstanding the foregoing sentence of this *Section 15.23*, Seller, its Affiliates and each of its and their respective Representatives shall have the limited right to state in response to Third Party inquiries about the Conveyed Interests that Seller is subject to the terms and conditions of a purchase and sale agreement with respect to the Conveyed Interests.

"***Environmental Condition***" means (a) a physical condition or circumstance in, on, under or migrating from any of the Conveyed Interests (including the air, soil, subsurface, surface waters, ground waters and sediments) that causes a Conveyed Interest (or Seller or any of its Affiliates with respect to a Conveyed Interest) to be in violation of, or not in compliance with, any Environmental Law, (b) the existence with respect to any of the Conveyed Interests (including the operation, use or maintenance thereof) of any environmental pollution, contamination, degradation, damage or injury for which remedial or

corrective action (including, for purposes of clarity, Remediation) is presently required (or if known, would be presently required) under applicable Environmental Law or (c) the failure of any Conveyed Interest (or Seller or any of its Affiliates with respect to any Conveyed Interest, including the ownership, operation, use or maintenance thereof) to be in compliance with operational or permitting requirements imposed under Environmental Laws applicable to the Conveyed Interests.

"***Environmental Defect***" means an Environmental Condition with respect to any Conveyed Interest (other than Non-Cost Bearing Interests).

"***Environmental Defect Claim Date***" means 5:00 P.M. (Central Time) on the date that is 60 days after the Execution Date.

"***Environmental Defect Cure Deadline***" has the meaning set forth in *Section 6.1(b)*.

"***Environmental Defect Deductible***" has the meaning set forth in *Section 6.1(e)*.

"***Environmental Defect Notice***" and "***Environmental Defect Notices***" have the meaning set forth in *Section 6.1(a)*.

"***Environmental Defect Property***" has the meaning set forth in *Section 6.1(a)*.

"***Environmental Laws***" means all Laws in effect as of or prior to the Execution Date relating to the pollution or protection of the environment (including natural resources), Hazardous Substances and those Laws relating to the generation, processing, treatment, storage, transportation, disposal or other management thereof. The term "***Environmental Laws***" does not include (a) good or desirable operating practices or standards that may be employed or adopted by other oil and gas well operators or recommended by a Governmental Authority, or (b) the Occupational Safety and Health Act of 1970, 29 U.S.C. § 651 et seq., as amended, or any other Law governing worker safety or workplace conditions.

"***Escrow Account***" means the account established pursuant to the Escrow Agreement.

"***Escrow Agent***" means Wells Fargo Bank, National Association.

"***Escrow Agreement***" means that certain Escrow Agreement to be entered into as of the Execution Date by and among the Parties and the Escrow Agent, substantially in the form attached hereto as *Exhibit P*.

"***Exchange***" has the meaning set forth in *Section 15.18*.

"***Excluded Assets and Other Matters***" means (a) all of Seller's corporate minute books, financial, budget, Tax records and other business records (excluding Tax records) that relate to Seller's business generally (other than those (i) directly related to the ownership and operation of the Conveyed Interests or (ii) related to any of the Assumed Obligations for which Buyer is providing indemnification hereunder); (b) all of Seller's Tax records;(c) to the extent that they do not relate to the Assumed Obligations for which Buyer is providing indemnification hereunder, all trade credits, all bank accounts, all receivables of Seller and all other proceeds, income or revenues of Seller attributable to the Conveyed Interests and attributable to any period of time prior to the Effective Time; (d) to the extent that they do not relate to the Assumed Obligations for which Buyer is providing indemnification hereunder, and except for those described in *Section 2.1(u)*, *Section 2.1(y)*, *Section 2.1(bb)* and/or *Section 2.1(cc)*, any and all claims and causes of action of Seller that are attributable to periods of time prior to the Effective Time (including claims for adjustments or refunds); (e) subject to *Section 5.4*, all rights and interests of Seller (i) under any policy or agreement of insurance or indemnity, (ii) under any bond, or (iii) to any insurance or condemnation proceeds or awards arising, in each case, from acts, omissions or events or damage to or destruction of property; (f) except to the extent of the adjustments set forth in *Section 3.3(a)(i)*, Seller's rights with respect to all Hydrocarbons produced and sold from the Conveyed Interests with respect to all periods prior to the Effective Time (except for and excluding all Hydrocarbons produced and sold from the Designated Wells); (g) all claims of Seller or any of its Affiliates for refunds of, rights to receive funds from any Governmental Authority, or loss carryforwards or credits with respect to (i) Asset Taxes attributable to any Tax period (or portion of any Straddle Period) ending prior to the Effective Time, (ii) Income Taxes of Seller or any of its Affiliates, or (iii) any Taxes attributable to the Excluded Assets and Other Matters; (h) all servers and all intangible information technology assets, including (i) computer, server, proprietary and Seller and its Affiliates' specific software and (ii) any other intangible information technology assets; (i) to the extent that they do not relate to the Assumed Obligations for which Buyer is providing indemnification hereunder, all rights, benefits and releases of Seller or its Affiliates under or with respect to any Contract that are attributable to periods of time prior to Closing; (j) all of Seller's proprietary computer software, patents, trade secrets, copyrights, names, trademarks, logos and other intellectual property; (k) all documents and instruments of Seller that may be protected by an attorney-client privilege or any attorney work product doctrine (other than title opinions); (l) all data that cannot be disclosed to Buyer as a result of confidentiality arrangements under agreements with Third Parties; *provided*, *that* Seller shall use its commercially reasonable efforts to obtain a waiver of such restrictions in order to permit disclosure to Buyer (without the obligation to expend any monies or undertake any obligations (other than requesting such waivers) in connection with such disclosure); (m) solely to the extent related to the Specified Obligations, all audit rights of Seller arising under any of the Applicable Contracts or otherwise with respect to any of the Excluded Assets and Other Matters, except for any Imbalances assumed by Buyer; (n) all geophysical and other seismic and related technical data and information including the seismic and related technical data set forth on *Exhibit O-2*; (o) documents prepared or received by Seller or its Affiliates with respect to (i) lists of prospective purchasers for such transactions compiled by Seller, (ii) bids submitted by other prospective purchasers of the Conveyed Interests, (iii) analyses by Seller or its Affiliates of any bids submitted by any prospective purchaser, (iv) correspondence between or among Seller, its Representatives, and any prospective purchaser other than Buyer, and (v) correspondence between Seller or any of its Representatives with respect to any of the bids, the prospective purchasers or the transactions contemplated by this Agreement; (p) any fee simple surface estate to the extent not in or covering any tract of land described on *Exhibit E-1* or *Exhibit E-2*; (q) any leases, Contracts, rights and other assets specifically listed on *Exhibit Q*; (r) Suspense Funds held by Seller for which the Purchase Price was adjusted pursuant to *Section 3.3(b)(viii)*; (s) all personnel files and personnel records of Seller; (t) all data contained on back-up tapes or disaster recovery tapes; (u) any personal property of Seller that is not Personal and Other Property; (v) any cores and cuttings of Seller that are not Transferred Cores and associated core storage contracts; (w) all telephone equipment, smartphones, tablets, and other mobility devices, (x) all personal property set forth on *Schedule 2.1(p)*, (y) the Excluded Wells, (y) any hedge, derivative, swap, collar, put, call, cap, option or other similar contract or arrangement and any other swap, debt or other similar contract, instrument or arrangement to which Seller or any of its Affiliates is a party or that is otherwise binding upon or burdens Seller, any of its Affiliates or any of the Conveyed Interests, (z) any assets described in *Section 2.1(m)*, *2.1(n)*, *2.1(o)* or *2.1(t)* that are not assignable, (aa) any assets, properties or other interests

described or set forth in *Section 2.1* that are excluded from the Conveyed Interests that are assigned, conveyed and/or transferred to Buyer in accordance with this Agreement (including, for purposes of clarity, any such assets, properties or other interests that are excluded pursuant to *Sections 4.1(b)*, *5.3(d)(ii)*, 5.4(c), *5.5(a)(i)*, *5.5(a)(iii)*, *5.5(b)(i)*, *5.5(b)(ii)* or *6.1(c)(ii)*) and (bb) the Excluded Transportation.

"***Excluded Transportation***" means 200,000 dth/day of firm capacity under that certain Firm Transportation Agreement between DGS and Gulf Crossing Pipeline Company LLC, effective as of September 1, 2019, from Sherman (Enterprise, Receipt SLN 22329) to Rock Springs/Scott Mtn Gulf South Lease, Delivery SLN 22340, for the remainder of the term of the agreement.

"***Excluded Wells***" means all oil and gas wells and portions of the oil and gas leases associated with such wells, insofar and only insofar to the extent necessary to own and operate such wells, in each case, as identified and described on *Exhibit R*.

"***Execution Date***" has the meaning set forth in the first paragraph in this Agreement.

"***FCC***" shall mean the Federal Communications Commission.

"***FCC Assignment Applications***" has the meaning set forth in *Section 9.9(a)*.

"***FCC Consents***" means those consents from the FCC for the assignment of the FCC Licenses to Buyer.

"***FCC Licenses***" means the FCC licenses associated with the SCADA system that is part of Personal and Other Property, as further described on *Exhibit T*.

"***FCC Rules***" shall mean Title 47 of the Code of Federal Regulations, as amended from time to time, and any policies or published decisions issued pursuant to such regulations or the Communications Act of 1934.

"***Fee Minerals***" has the meaning set forth in *Section 2.1(c)*.

"***FERC***" has the meaning set forth in *Section 7.31*.

"***Final Price***" has the meaning set forth in *Section 3.6(a)*.

"***Final Settlement Statement***" has the meaning set forth in *Section 3.6(a)*.

"***Fraud***" means actual fraud by a Party (as determined pursuant to a final, non-appealable order of a court of competent jurisdiction), which involves a knowing and intentional misrepresentation by such Party or a knowing and intentional concealment of facts, with the intent of inducing any other Party to enter into this Agreement and upon which such other Party has relied to its detriment (as opposed to any fraud claim based on constructive knowledge, negligent misrepresentation or a similar theory under applicable Law).

"***FTC***" has the meaning set forth in *Section 9.10(a)*.

"***GAAP***" means generally accepted accounting principles in the United States as interpreted as of the Execution Date.

"***Gas Gathering***, ***Processing and Purchase Contract***" means that certain Gas Gathering, Processing and Purchase Contract substantially in the form attached hereto as *Exhibit J*.

"***Gathering Assets***" has the meaning set forth in *Section 7.31*.

"***GoForth Gas Gathering Agreement***" means that certain GoForth Gas Gathering Agreement substantially in the form attached hereto as *Exhibit K*.

"***Governmental Authority***" means any federal, state, local, municipal, tribal or other government; any governmental, regulatory or administrative agency, commission, body or other authority exercising or entitled to exercise any administrative, executive, judicial, legislative, regulatory or Taxing Authority or power; and any court or governmental tribunal.

"***Governmental Bonds***" has the meaning set forth in *Section 9.3(a)*.

"***Hazardous Substances***" means any pollutants, contaminants, toxins or hazardous or extremely hazardous substances, materials, wastes, constituents, compounds, or chemicals that are regulated by, or may form the basis of liability under, any Environmental Laws, including NORM and other substances referenced in *Section 6.2*.

"***HSR Act***" has the meaning set forth in *Section 9.10(a)*.

"***Hydrocarbons***" means all oil, gas, condensate, and other hydrocarbons (whether or not that hydrocarbon is in liquid or gaseous form).

"***Hydrocarbons in Storage***" has the meaning set forth in *Section 2.1(e)*.

"***Imbalances***" means all Well Imbalances and Pipeline Imbalances.

"***Income Taxes***" means (i) all Taxes based upon, measured by, or calculated with respect to gross or net income, gross or net receipts or profits (including franchise Taxes and any capital gains, alternative minimum, and net worth Taxes, but excluding ad valorem, property, excise, severance, production, sales, use, real or personal property transfer or other similar Taxes), (ii) Taxes based upon, measured by, or calculated with respect to multiple bases (including corporate franchise, doing business or occupation Taxes) if one or more of the bases upon which such Tax may be based, measured by, or calculated with respect to is included in *clause (i)* above, or (iii) withholding Taxes measured with reference to or as a substitute for any Tax included in *clauses (i)* or (ii) above.

"***Indemnified Party***" has the meaning set forth in *Section 13.7(a)*.

"***Indemnifying Party***" has the meaning set forth in *Section 13.7(a)*.

"***Indemnity Deductible***" means an amount equal to [***] percent ([***]%) of the unadjusted Purchase Price, or, in the event Seller does not acquire the Other Working Interest Owner Interests prior to the Closing Date in accordance with *Section 9.14*, an amount equal to [***] percent ([***]%) of the unadjusted Purchase Price less the Allocated Other Working Interest Owner Amount.

"***Individual Environmental Threshold***" has the meaning set forth in *Section 6.1(e)*.

"***Individual Title Defect Threshold***" has the meaning set forth in *Section 5.3(i)*.

"***Interim Period***" means that period of time commencing at the Effective Time and ending at 7:00 A.M. (Central Time) on the Closing Date.

"***Joint Venture Agreement***" means the Joint Venture Agreement (as amended, supplemented and restated) effective as of June 1, 2005, by and between Chief Oil & Gas LLC and XTO Energy Inc.

"***Knowledge***" means (a) with respect to Seller and its Affiliates, the actual knowledge (without investigation) of the following Persons: (i) Bobby Saadati, Vice President of Business Development, (ii) Trent Tarp, Business Development Lead, (iii) Kevin Harwi, Land Manager, (iv) Gloria Contreras, Senior Supervisor JV Accounting, (v) Joel Stafford, Senior Counsel – Tax, (vi) Garrett Jackson, Vice President of Operations and (vii) Greg Jacob, Vice President of Mid Continent Business Unit and (b) with respect to Buyer, the actual knowledge (without investigation) of the following Persons: (i) Matt Johnson, Vice President of Corporate Development and (ii) Jamie Luckenbill, Senior Director of Land.

"***Lands***" means the lands located in Denton County, Parker County, Tarrant County and Wise County, each in the State of Texas.

"***Law***" means any applicable statute, law, rule, regulation, ordinance, order, code, ruling, writ, injunction, permit, decree or other official act of or by any Governmental Authority.

"***Lease Number***" means the number set forth on *Exhibit A* under the column titled "Lease No.".

"***Leases***" has the meaning set forth in *Section 2.1(a)*.

"***Liabilities***" means any and all claims, obligations, causes of action, payments, charges, judgments, assessments, liabilities, losses, damages, penalties, fines, costs and expenses, including (a) liabilities, costs, losses and damages for personal injury, death, property damage, environmental damage, or Remediation, (b) any action, proceeding, order or suit by a Governmental Authority with respect to any of the foregoing and (c) any reasonable attorneys' fees, legal or other expenses incurred in connection with any of the foregoing.

"***License Agreement***" means that certain seismic license agreement, substantially in the form attached hereto as *Exhibit O-1*.

"***Material Adverse Effect***" means an event or circumstance that, individually or in the aggregate, results or would be reasonably likely to result in a material adverse effect on (x) the ownership, operation or value of the Conveyed Interests, taken as a whole and as currently operated as of the Execution Date, or (y) the ability of Seller or any of its Affiliates to consummate the transactions contemplated by this Agreement; *provided*, *however*, that the term "Material Adverse Effect" shall not include any material adverse effect resulting from: (a) entering into this Agreement or the announcement of the transactions contemplated by this Agreement; (b) any action or omission of Seller taken in accordance with the terms of this Agreement or with the prior consent of Buyer; (c) changes in general market, economic, financial, or political conditions (including changes in commodity prices, fuel supply or transportation markets, interest or rates), regardless of location; (d) changes in conditions or developments generally applicable to the oil and gas industry; (e) acts of God, including hurricanes, storms or other naturally occurring events; (f) acts or failures to act of a Governmental Authority; (g) civil unrest, any outbreak of disease or hostilities, terrorist activities or war or any similar disorder; (h) matters that are cured or no longer exist by the earlier of Closing and the termination of this Agreement; (i) any reclassification or recalculation of reserves in the ordinary course of business; (j) changes in the prices of any Hydrocarbons; (k) a change in Laws and any

interpretations thereof from and after the Execution Date; (l) changes in service costs applicable to the oil and gas industry in the United States; (m) strikes and labor disturbances and (n) natural declines in well performance; *provided further, however*, that the exceptions in *clauses (f), (k)* and *(l),* may be taken into account in determining whether an event constitutes, gives rise to, causes, or creates a "Material Adverse Effect" to the extent the effect thereof has a disproportionally adverse effect on Seller or the Conveyed Interests, as compared to other similarly situated participants in the industry in which Seller operates.

"***Material Contracts***" has the meaning set forth in *Section 7.7(a)*.

"***Medium Consent***" means [***].

"***Midstream Facilities***" has the meaning set forth in *Section 2.1(l)*.

"***Mineral Deed***" means the Mineral Deed substantially in the form attached to this Agreement as *Exhibit M*.

"***Net Acre***" means, as computed separately with respect to each Lease identified on *Exhibit A* (in each case, limited to the Barnett Formation), (a) the gross number of mineral acres in the lands covered by that Lease multiplied by (b) the undivided fee simple mineral interest (expressed as a percentage) in the lands covered by that Lease (as determined by aggregating the fee simple mineral interests owned by each lessor of that Lease in the lands) multiplied by (c) Seller's undivided percentage interest that is burdened with the obligation to bear and pay costs and expenses in that Lease; *provided*, *that* if the items in *(b)* or *(c)* vary as to different tracts or depths covered by such Lease, a separate calculation shall be done for each such tract or depth. For example, if a Lease in which Seller owns an undivided 50% working interest covers a 20-acre tract in which the lessors of such Lease own an undivided one-half (1/2) fee mineral interest and a separate and distinct 40-acre tract in which the lessors of such Lease own an undivided one fourth (1/4) fee mineral interest, then the Lease would cover ten Net Acres (i.e., (20 × 0.5 × 0.5) + (40 × 0.25 × 0.5) = 10).

"***Net Revenue Interest***" means, the interest (expressed as a decimal or percentage) in and to all Hydrocarbons produced, saved, and sold from or allocated to (a) a Lease (or a tract thereof, if applicable) identified on *Exhibit A* (limited to the Barnett Formation), (b) a Well identified on *Exhibit B* (limited to the currently producing formation for such Well) or (c) a Well identified on *Schedule I-2* (limited to the currently completed formation), as applicable, and in each case, after giving effect to all Third Party Burdens; *provided*, *that* if such interest varies as to different tracts or depths covered by such Lease, a separate calculation shall be done for each such tract or depth. For the avoidance of doubt, references to Net Revenue Interest set forth on *Exhibit A, Exhibit B* or *Schedule I-2,* as applicable, shall refer to the figures reflected in the column titled (i) "Net Revenue Interest" in *Exhibit A* or (ii) "BPO Net Revenue Interest" and "APO Net Revenue Interest" in *Exhibit B* or *Schedule I-2*, as applicable.

"***Non-Cost Bearing Interests***" has the meaning set forth in *Section 2.1(c)*.

"***NORM***" means naturally occurring radioactive material.

"***OFAC***" means the United States Department of the Treasury's Office of Foreign Assets Control.

"***Offered Employee***" has the meaning set forth in *Section 9.6(c)*.

"***Operating Expenses***" means all Post-Effective Time Expenses and Pre-Effective Time Expenses.

"***Order***" means any writ, judgment, injunction, decree, ruling, sentence, subpoena, award or other similar order issued, made, entered and/or rendered by or on behalf of any Governmental Authority, in each case, whether preliminary or final, arising from any suit, litigation, arbitration or other Proceeding brought by any Third Party against Seller or its Affiliates.

"***Other Representations***" means the representations and warranties in *Sections 7.12*, *7.14*, *7.15* and *7.19(a)*.

"***Other Wells***" has the meaning set forth in *Section 2.1(g)*.

"***Other Working Interest Owner***" means the Person set forth on *Schedule OWIO*.

"***Other Working Interest Owner Acquisition Date***" means the date on which Seller acquires the Other Working Interest Owner Interests.

"***Other Working Interest Owner Interests***" has the meaning set forth in *Schedule 9.14*.

"***Overhead Costs***" means an amount equal to $1,000,000 per calendar month (prorated on a daily basis for any partial month) during the period between the Effective Time and the Closing Date.

"***Party***" and "***Parties***" have the meaning set forth in the first paragraph in this Agreement.

"***Permit***" means all permits, licenses, orders, approvals, consents, variances, registrations, waivers, authorizations, franchises and similar instruments of all Governmental Authorities that are required to permit Seller's (or its Affiliate's, as applicable) ownership or operation of the Conveyed Interests.

"***Permitted Encumbrances***" means:

(a) the terms and conditions of all Leases and all Burdens if the net cumulative effect of such Leases and Burdens (i) does not (A) operate to reduce the Net Revenue Interest of Seller and its Affiliates with respect to any Lease (or a tract thereof, if applicable), Well or Conveyed Interest identified on *Exhibit A*, *Exhibit B* or *Schedule I-2*, as applicable, to an amount less than the Net Revenue Interest for such Lease (or such tract thereof, if

applicable), Well or Conveyed Interest on *Exhibit A*, *Exhibit B* or *Schedule I-2*, as applicable, (B) obligate Seller or any of its Affiliates to bear a Working Interest with respect to any Lease (or a tract thereof, if applicable), Well or Conveyed Interest identified on *Exhibit A*, *Exhibit B* or *Schedule I-2*, as applicable, in any amount greater than the Working Interest set forth on *Exhibit A*, *Exhibit B* or *Schedule I-2*, as applicable, for that Lease (or that tract thereof, if applicable), that Well or that Conveyed Interest (unless the Net Revenue Interest for that Lease (or that tract thereof, if applicable), that Well or that Conveyed Interest is accompanied by at least the same proportional increase in the Net Revenue Interest set forth on *Exhibit A*, *Exhibit B* or *Schedule I-2*, as applicable, in the same or greater proportion as any increase in such Working Interest) or (C) operate to reduce the Net Acres of Seller or any of its Affiliates with respect to any Lease (or a tract thereof, if applicable) identified on *Exhibit A* to an amount less than the Net Acres for such Lease (or such tract thereof, if applicable) on *Exhibit A* and (ii) would not reasonably be expected to materially impair the ownership, operation or use of any of the Conveyed Interests as currently owned and operated;

(b) Preferential Purchase Rights set forth on *Schedule 7.9*, Required Consents set forth on *Schedule 7.4*, and customary maintenance of uniform interest restrictions contained in joint operating agreements;

(c) liens for Taxes not yet due or delinquent or, if delinquent, that are being contested in good faith and, with respect to any contests, set forth on *Schedule PE*;

(d) Post-Closing Consents;

(e) except to the extent triggered prior to the Execution Date, conventional rights of reassignment arising upon final intention to abandon or release any of the Conveyed Interests;

(f) all Laws, and all rights reserved to or vested in any Governmental Authority (i) to control or regulate any Conveyed Interest in any manner; (ii) by the terms of any right, power, franchise, grant, license or permit, or by any provision of Law, to terminate such right, power, franchise, grant, license or permit or to purchase, condemn, expropriate or recapture or to designate a purchaser of any of the Conveyed Interests; (iii) to use such property in a manner which does not materially impair the use of such property for the purposes for which it is currently owned and operated; or (iv) to enforce any obligations or duties affecting the Conveyed Interests to any Governmental Authority with respect to any right, power, franchise, grant, license or permit;

(g) easements, conditions, covenants, restrictions, servitudes, permits, rights- of-way, surface leases, and other rights in the Conveyed Interests for the purpose of operations, facilities, roads, alleys, highways, railways, pipelines, transmission lines, transportation lines, distribution lines, power lines, telephone lines, removal of timber, grazing, logging operations, canals, ditches, reservoirs and other like purposes, or for the joint or common use of real estate, rights-of-way, facilities and equipment, which, in each case, do not and would not reasonably be expected to materially impair the ownership, operation or use of any of the Conveyed Interests as currently owned and operated;

(h) vendors, carriers, warehousemen's, repairmen's, mechanics', workmen's, materialmen's, construction or other like liens arising by operation of Law in the ordinary course of business or incident to the construction or improvement of any property in respect of obligations which are not yet delinquent or which are being contested in good faith by appropriate proceedings by or on behalf of Seller and, with respect to any contests, set forth on *Schedule PE*;

(i) normal and customary liens created under operating agreements for the operation of the Conveyed Interests or by operation of Law in respect of obligations that are not yet delinquent and pursuant to which Seller is not in default or which are being contested in good faith by appropriate proceedings by or on behalf of Seller and, with respect to any contests, set forth on *Schedule PE*;

(j) any Encumbrance affecting the Conveyed Interests that is discharged by Seller at or prior to Closing;

(k) (i) any matters expressly referenced or any depths not expressly referenced, in each case, and set forth on *Exhibit A*, *Exhibit B* or *Schedule I-2*, including any depth limitations, any Encumbrance or any defect that applies solely to a depth or formation that is not included on *Exhibit A* and (ii) all matters (and any outcomes thereof) set forth in *Schedule 7.6* or *Schedule 9.11*;

(l) mortgage liens burdening a lessor's interest in the Conveyed Interests that (i) postdates the creation of the applicable Lease or (ii) pre-dates the creation of the applicable Lease and (A) is not in foreclosure proceedings of which Seller or any of its Affiliates has received service or written notice or (B) which have been subordinated to the applicable Lease;

(m) the terms and conditions of all Material Contracts if the net cumulative effect of such Material Contracts (1) do not (i) operate to reduce the Net Revenue Interest of Seller and its Affiliates with respect to any Lease (or a tract thereof, if applicable), Well or Conveyed Interest identified on *Exhibit A*, E*xhibit B* or *Schedule I-2*, as applicable, to an amount less than the Net Revenue Interest for such Lease (or such tract thereof, if applicable), Well or Conveyed Interest on *Exhibit A*, *Exhibit B* or *Schedule I-2*, as applicable, (ii) obligate Seller or any of its Affiliates to bear a Working Interest with respect to any Lease (or a tract thereof, if applicable), Well or Conveyed Interest identified on *Exhibit A*, *Exhibit B* or *Schedule I-2*, as applicable, in any amount greater than the Working Interest set forth on *Exhibit A*, *Exhibit B* or *Schedule I-2*, as applicable, for that Lease (or that tract thereof, if applicable), that Well or the Conveyed Interest (unless the Net Revenue Interest for that Lease (or that tract thereof, if applicable), that Well or Conveyed Interest increases in the same or greater proportion as any increase in such Working Interest) or (iii) operate to reduce the Net Acres of Seller or any of its Affiliates with respect to any Lease (or a tract thereof, if applicable) identified on *Exhibit A* to an amount less than the Net Acres for such Lease (or such tract thereof, if applicable) and (2) would not reasonably be expected to materially impair the ownership, operation or use of any of the Conveyed Interests as currently owned and operated;

(n) defects based upon the failure to record any federal or state Leases or any assignments of interests in such Leases in any applicable county records, if such Leases were properly filed in the applicable federal or state offices;

(o) defects based on the failure to recite marital status in a document or omission of successors or heirship or estate proceedings, unless Buyer provides affirmative evidence that such failure or omission has resulted in another Person's superior claim of title to the relevant Conveyed Interest;

(p) defects that have been cured by applicable Laws of limitations or prescription;

(q) any Encumbrance or loss of title to the extent solely resulting from Seller's conduct of business in compliance with *Section 9.1*;

(r) defects arising from any prior oil and gas lease relating to the lands covered by a Lease not being surrendered of record, unless Buyer provides evidence that such prior oil and gas lease is still in effect and may result in another Person's superior claim of title to the Conveyed Interests in the relevant Lease or the relevant Wells;

(s) defects or irregularities resulting from or related to probate proceedings or the lack thereof, which defects or irregularities have been outstanding for ten (10) years or more unless Buyer provides evidence that a competing chain of title exists as to the applicable Conveyed Interests;

(t) defects based solely on (i) lack of information in Seller's files or (ii) references to an unrecorded document(s) to which neither Seller nor any Affiliate of Seller is a party, if such document is dated earlier than January 1, 1950 and is not in Seller's files;

(u) defects arising out of lack of survey, unless a survey is expressly required by applicable Laws;

(v) defects or irregularities resulting from liens, production payments, or mortgages that have expired by their own terms or the enforcement of which are barred by applicable statutes of limitations;

(w) the expiration of any Lease set forth on *Schedule I-1* pursuant to the express terms thereof;

(x) decreases in the Net Revenue Interest of Seller or increases in the Working Interest of Seller with respect to any Lease (or a tract thereof, if applicable) identified on *Exhibit A*, Well identified on *Exhibit B* or Conveyed Interest identified on *Schedule I-2* resulting from an amendment or other modification from and after the Execution Date of drilling and spacing units, pooled units, secondary recovery units, unitization agreements, communitization agreements, or other units, including pursuant to the Unit Agreement and/or the unit operating agreement for that Lease (or that tract thereof, if applicable) or Well and/or any redetermination of the participation factor or other similar measurement, in each case, only if (i) occurring from and after the Execution Date and (ii) with respect to Conveyed Interests operated by Seller, solely to the extent any such amendment and/or modification is expressly approved by Buyer;

(y) decreases in the Net Revenue Interest of Seller with respect to any Lease (or a tract thereof, if applicable) identified on *Exhibit A*, any Well identified on *Exhibit B* or any Conveyed Interest identified on *Schedule I-2* required to allow other working interest owners to make up past underproduction or pipelines to make up past under deliveries provided such make up obligations are identified on *Schedule 7.11* attached hereto;

(z) increases in the Working Interest of Seller with respect to any Lease (or a tract thereof, if applicable) identified on *Exhibit A*, any Well identified on *Exhibit B* or any Conveyed Interest identified on *Schedule I-2* resulting from contribution requirements with respect to defaulting co-owners under applicable operating agreements; and

(aa) defects based on or arising out of the failure of Seller or a Third Party operator to enter into, be party to, or be bound by, pooling provisions, a pooling agreement, production sharing agreement or other similar agreement with respect to any horizontal Well that crosses more than one Lease or tract, to the extent such Well (i) has been permitted by any applicable Governmental Authority or (ii) the allocation of Hydrocarbons produced from such Well among such Lease or tracts is based upon the length of the "*as drilled*" horizontal wellbore open for production, the total length of the horizontal wellbore, or other methodology that is intended to reasonably attribute to each such Lease or tract its share of such production.

"***Person***" means any individual, firm, corporation, company, partnership (general and limited), limited liability company, joint venture, association, trust, estate, unincorporated organization, Governmental Authority or any other entity.

"***Personal and Other Property***" has the meaning set forth in *Section 2.1(p)*.

"***Phase I ESA***" means an environmental site assessment performed pursuant to ASTM Standard E1527, or any similar environmental assessment that does not involve any sampling, testing, invasive or other similar activities.

"***Phase II ESA***" has the meaning set forth in *Section 4.1(b)*.

"***Pipeline Imbalance***" means any imbalance between (a) the quantity of Hydrocarbons attributable to the Conveyed Interests that are delivered by Seller or DGS to a counterparty under any Contract relating to the purchase and sale, gathering, transportation, storage, processing (including any production handling and processing at a separation facility) or marketing of Hydrocarbons and (b) the quantity of Hydrocarbons attributable to the Conveyed Interests that are redelivered to Seller or DGS by such counterparty pursuant to the relevant Contract, together with any appurtenant rights and obligations concerning

production balancing thereunder (ignoring any such difference to the extent resulting from any Hydrocarbon retained by such counterparty as fuel or for Hydrocarbon losses pursuant to such Contract).

"***Pipeline Systems***" has the meaning set forth in *Section 2.1(j)*.

"***Post-Closing Consents***" means the consents and approvals from Governmental Authorities or any other Third Party for the assignment of the Conveyed Interests to Buyer that are customarily obtained or otherwise required to be obtained after the assignment of properties similar to the Conveyed Interests, including, for the avoidance of doubt, any BIA and tribal consents.

"***Post-Effective Time Expenses***" means (a) the Designated Well Costs and (b) all operating costs and expenses and capital expenditures with respect to the ownership, development and/or operation of the Conveyed Interests and attributable to the time period from and after the Effective Time, including costs and expenses for services rendered (including (i) pursuant to the EnLink Agreements and (ii) overhead costs charged by Third Party operators), work performed, goods and materials furnished, activities undertaken, and operations conducted (or to be rendered, performed, furnished, undertaken, or conducted) and other matters attributable to the ownership or operation of the Conveyed Interests (such as costs of insurance, Governmental Bonds, and guarantees and any lease maintenance payments or rentals) but excluding Overhead Costs and Liabilities attributable to (x) curing (or attempting to cure) any Title Defect or Remediating (or attempting to Remediate) any Environmental Defect by Seller or any of its Affiliates pursuant to the terms of this Agreement, (y) Income Taxes, Asset Taxes, and Transfer Taxes, and (z) obligations to pay revenues or proceeds attributable to sales of Hydrocarbons to Third Parties, including Suspense Funds (if, and to the extent, such Suspense Funds are assigned, conveyed and transferred to Buyer or accounted for in accordance with *Section 9.8*).

"***Pre-Effective Time Expenses***" means (other than the Designated Well Costs) all operating costs and expenses and capital expenditures with respect to the ownership, development and/or operation of the Conveyed Interests and attributable to the time period prior to the Effective Time, including costs and expenses for services rendered (including overhead costs charged by Third Party operators) work performed, goods and materials furnished, activities undertaken, and operations conducted (or to be rendered, performed, furnished, undertaken, or conducted) and other matters attributable to the ownership or operation of the Conveyed Interests (such as costs of insurance, Governmental Bonds, and guarantees and any lease maintenance payments or rentals) but excluding Liabilities attributable to (A) Income Taxes, Asset Taxes, and Transfer Taxes, (B) obligations to pay revenues or proceeds attributable to sales of Hydrocarbons to Third Parties, including Suspense Funds, (C) any Environmental Condition, Environmental Defect, or other environmental matter, (D) Decommissioning Obligations, (E) personal injury or death, property damage, or violation of any Law, and (F) obligations with respect to Imbalances.

"***Preferential Purchase Right***" has the meaning set forth in *Section 7.9*.

"***Preliminary Settlement Statement***" has the meaning set forth in *Section 3.5*.

"***Proceeding***" means any proceeding, arbitration, action, suit or other legal or quasi-legal proceeding of any kind or nature before or by any Governmental Authority or any arbitration tribunal.

"***Property***" or "***Properties***" has the meaning set forth in *Section 2.1(d)*.

"***Purchase Price***" has the meaning set forth in *Section 3.1*.

"***Records***" has the meaning set forth in *Section 2.1(t)*.

"***Regulatory Approvals***" means (i) CFIUS Approval and (ii), if applicable, the waiting period under the HSR Act applicable to the consummation of the sale and purchase of the Conveyed Interests contemplated hereby shall have expired or been terminated.

"***Remediation***" means, with respect to an Environmental Condition, the implementation and completion of any and all investigatory, cleanup, monitoring, remedial, removal, response, construction, closure, disposal, treatment, containment, mitigation or other corrective actions, including monitoring, to the extent but only to the extent required under Environmental Laws to correct, remedy or remove such Environmental Condition.

"***Remediation Amount***" means, with respect to an Environmental Defect, the present value as of the Closing Date (using an annual discount rate of 8%) of the cost (net to Seller's interest prior to the consummation of the transactions contemplated by this Agreement) of the most cost effective Remediation of such Environmental Defect.

"***Representatives***" means, with respect to a Person, such Person's managers, members, directors, officers, employees, agents, contractors, investment bankers, financing sources, reserve engineers, attorneys, accountants and other advisors and representatives.

"***Required Consent***" means any Consent for which the failure to obtain such Consent (or a waiver in writing by the holder thereof) would cause (a) the assignment, conveyance or transfer of the Conveyed Interest(s) affected thereby to Buyer to be void, voidable, invalid, unenforceable and/or nullified, or (b) the termination of or right to terminate any Lease or an Applicable Contract, in each case, under the express terms of the underlying Lease or Applicable Contract containing such Consent.

"***Requisite Financial Statement Information***" has the meaning set forth in *Section 9.15(a)*.

"***Rights-of-Way***" has the meaning set forth in *Section 2.1(m)*.

"***ROW Instruments***" has the meaning set forth in *Section 7.32*.

"***SCADA***" means Supervisory Control and Data Acquisition.

"***Scheduled Closing Date***" has the meaning set forth in *Section 12.1*.

"***Scheduled Litigation***" has the meaning set forth in *Section 7.6*.

"***SEC***" has the meaning set forth in *Section 9.15(a)*.

"***Securities Act***" has the meaning set forth in *Section 9.15(a)*.

"***Seller***" has the meaning set forth in the first paragraph in this Agreement.

"***Seller Group***" has the meaning set forth in *Section 9.15(a)*.

"***Seller Indemnified Parties***" has the meaning set forth in *Section 13.3*.

"***Seller Permits***" has the meaning set forth in *Section 7.29*.

"***Special Warranty***" has the meaning set forth in *Section 5.2(a)*.

"***Special Warranty Notice***" and "***Special Warranty Notices***" have the meaning set forth in *Section 5.2(b)(i)*.

"***Specified Obligations***" has the meaning set forth in *Schedule 13.1(b)*.

"***Specified Representations***" means the representations and warranties in *Sections 7.1*, *7.2*, *7.3*, *7.5* and *7.13*.

"***Storage Agreement***" means that certain Agreement for Intrastate Gas Storage Service dated March 7, 2014, between SWG Pipeline, L.L.C. and DGS.

"***Straddle Period***" means any Tax period beginning before and ending after the Effective Time.

"***Subject Properties***" has the meaning set forth in *Section 2.1*.

"***Surface Deed***" means the Surface Deed substantially in the form attached to this Agreement as *Exhibit N-2*.

"***Surface Fee Interests***" has the meaning set forth in *Section 2.1(h)*.

"***Survival Period***" has the meaning set forth in *Section 5.2(b)(i)*.

"***Suspense Funds***" has the meaning set forth in *Section 7.22*.

"***SWGP***" means Southwestern Gas Pipeline, LLC., a Texas limited liability company.

"***SWGP Assignment***" means the Assignment, Bill of Sale and Conveyance from SWGP to Buyer substantially in the form attached to this Agreement as *Exhibit L-4*.

"***SWGP Pipeline Systems***" has the meaning set forth in *Section 2.1(k)*.

"***SWGP Rights-of-Way***" has the meaning set forth in *Section 2.1(n)*.

"***Tarrant Salt Water Disposal Joint Venture***" means the partnership created and formed pursuant to that the Joint Venture Agreement effective as of June 1, 2005, by and between Chief Oil & Gas LLC and XTO Energy Inc., for the purpose of participating in the drilling and operation of a salt water disposal well located on a tract of land in Tarrant County, Texas.

"***Tax Return***" means any return, declaration, report, claim for refund, or information return or statement relating to Taxes, including any schedule or attachment thereto, and including any amendment thereof, filed with or submitted to, or required to be filed with or submitted to, any Governmental Authority.

"***Taxes***" means (i) any taxes, assessments, fees, and other governmental charges in the nature of a tax imposed by any Governmental Authority, including income, profits, gross receipts, employment, stamp, occupation, premium, alternative or add-on minimum, ad valorem, real property, personal property, transfer, real property transfer, value added, sales, use, customs, duties, capital stock, franchise, excise, withholding, social security (or similar), unemployment, disability, payroll, windfall profit, severance, production, estimated or other tax, including any interest, penalty or addition thereto and (ii) any liability in respect of any item described in *clause (i)* above that arises by reason of a contract, assumption, transferee or successor liability, operation of Law

(including by reason of participation in a consolidated, combined or unitary Tax Return) or otherwise.

"***Taxing Authority***" means, with respect to any Tax, the governmental entity or political subdivision thereof that imposes such Tax, and the agency (if any) charged with the collection of such Tax for such entity or subdivision, including any governmental or quasi-governmental entity or agency that imposes, or is charged with collecting, social security or similar charges or premiums.

"***Third Party***" means any Person other than a Party or an Affiliate of a Party.

"***Third Party Claim***" has the meaning set forth in *Section 13.7(b)*.

"***Title Arbitrator***" has the meaning set forth in *Section 5.3(j)*.

"***Title Benefit***" has the meaning set forth in *Schedule TB*.

"***Title Benefit Amount***" means an amount equal to the increase in the Allocated Value for each Title Benefit Property, as determined pursuant to *Section 5.3(h)* and/or *Section 5.3(j)*.

"***Title Benefit Notice***" has the meaning set forth in *Section 5.3(b)*.

"***Title Benefit Property***" has the meaning set forth in *Section 5.3(b)*.

"***Title Defect***" means any Encumbrance, defect or other matter (other than Permitted Encumbrances) that causes Seller not to have Defensible Title in and to any Lease (or a tract thereof, if applicable) set forth on *Exhibit A* (solely with respect to the Barnett Formation), any Well set forth on *Exhibit B* (solely with respect to the currently producing formation) or any Conveyed Interest set forth on *Schedule I-2* (solely with respect to the currently completed formation) as of the Effective Time and as of the Title Defect Claim Date; *provided* that the following shall not be considered Title Defects:

(a) defects arising out of the lack of corporate or other entity authorization unless Buyer provides affirmative evidence that such corporate or other entity action may result in another Person's superior claim of title to the relevant Conveyed Interest;

(b) defects based on a gap in Seller's chain of title in the federal, state, county or parish records or other records of a Governmental Authority as to the Conveyed Interests, unless Buyer affirmatively shows such gap to exist in such records by an abstract of title, title opinion or landman's title chain, which documents (if any) shall be included in a Title Defect Notice;

(c) defects that are solely based upon any of the Preferential Purchase Rights set forth on *Schedule 7.9*, Required Consents set forth on Schedule 7.4 or any customary maintenance of uniform interest restrictions set forth in a joint operating agreement; and

(d) such Title Defects as Buyer has expressly waived in writing or is deemed to have been expressly waived pursuant to the terms of this Agreement.

"***Title Defect Amount***" has the meaning set forth in *Section 5.3(g)*.

"***Title Defect Claim Date***" means 5:00 P.M. (Central Time) on the date that is 75 days after the Execution Date.

"***Title Defect Cure Deadline***" has the meaning set forth in *Section 5.3(c)*.

"***Title Defect Deductible***" has the meaning set forth in *Section 5.3(i)*.

"***Title Defect Notice***" and "***Title Defect Notices***" have the meaning set forth in *Section 5.3(a)*.

"***Title Defect Property***" has the meaning set forth in *Section 5.3(a)*.

"***Title Disputes***" has the meaning set forth in *Section 5.3(j)*.

"***Transaction Documents***" means those documents executed pursuant to or in connection with this Agreement.

"***Transfer Taxes***" has the meaning set forth in *Section 15.2(e)*.

"***Transferred Cores***" has the meaning set forth in *Section 2.1(q)*.

"***Transition Services Agreement***" means the Transition Services Agreement in a form and substance substantially similar to the form attached to this Agreement as *Exhibit U*.

"***Treasury Regulations***" means the regulations promulgated by the United States Department of the Treasury pursuant to and in respect of provisions of the Code. All references in this Agreement to sections of the Treasury Regulations shall include any corresponding provision or provisions of succeeding, similar, substitute, proposed or final Treasury Regulations.

"***Unit Agreements***" has the meaning set forth in *Section 2.1(d)*.

"***Units***" has the meaning set forth in *Section 2.1(d)*.

"***Water Disposal JV Interests***" has the meaning set forth in *Section 2.1(z)*.

"***Well Imbalance***" means any imbalance at the wellhead between the amount of Hydrocarbons produced from a Well and allocated to the interests of Seller therein and the shares of production from the relevant Well to which Seller is entitled, together with any appurtenant rights and obligations concerning future in kind and/or cash balancing at the wellhead.

"***Wells***" has the meaning set forth in *Section 2.1(b)*.

"***Working Interest***" means, the interest (expressed as a decimal or percentage) that is burdened with the obligation to bear and pay costs and expenses of maintenance, development and operations for (a) a Lease (or a tract thereof, if applicable) identified on *Exhibit A* (limited to the Barnett Formation), (b) a Well identified on *Exhibit B* (limited to the currently producing formation for such Well), or (c) a Well identified on *Schedule I-2* (limited to the currently completed formation) as applicable, but without regard to the effect of any Burdens; *provided*, *that* if such interest varies as to different tracts or depths covered by such Lease, a separate calculation shall be done for each such tract or depth. For the avoidance of doubt, references to Working Interest set forth on *Exhibit A* or *Exhibit B*, as applicable, shall refer to the figures reflected in the column titled (i) "Working Interest" in *Exhibit A* or (ii) "BPO Working Interest" and "APO Working Interest" in *Exhibit B* or *Schedule I-2*, as applicable.

Exhibit 2.2

EXECUTION VERSION

FIRST AMENDMENT TO PURCHASE AND SALE AGREEMENT

This First Amendment to Purchase and Sale Agreement (this " ***Amendment***"), dated as of April 13, 2020 (the " ***Amendment Execution Date***"), is made and entered into by and between Devon Energy Production Company, L.P., an Oklahoma limited partnership ("***Seller***"), BKV Barnett, LLC, a Delaware limited liability company ("***Buyer***"), and, solely with respect to *Sections 3.1(b)*, *3.2*, *8.1*, *8.2*, *8.3, 8.4, 8.8*, *9.17*, *13.3* and *14.2(f)* of the PSA, BKV Oil & Gas Capital Partners, L.P., a Delaware limited partnership ("***BKVLP***"). Seller and Buyer may be referred to collectively as the " ***Parties***" or individually as a "***Party***." Capitalized terms used but not defined in this Amendment shall have the meanings given to such terms in the PSA (as hereinafter defined).

WHEREAS, Seller and Buyer have entered into, and desire to amend, that certain Purchase and Sale Agreement dated as of December 17, 2019 (as further amended, restated or supplemented from time to time, the "***PSA***").

NOW, THEREFORE, in consideration of the mutual promises and covenants set forth herein, and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties hereby agree as follows:

1. **Initial Deposit**. The Parties hereby acknowledge and agree that, (a) contemporaneously with the execution of the PSA, (i) the Parties and the Escrow Agent entered into the Escrow Agreement, and (ii) Buyer deposited on the Execution Date by wire transfer in same day funds with the Escrow Agent an amount equal to $70,000,000, and, (b) contemporaneously with the execution of this Amendment, the Parties will execute the joint written instructions attached hereto as **Annex I** and deliver such instructions to the Escrow Agent to transfer the Initial Deposit from the Escrow Agent to Seller which, upon such transfer to Seller, shall be disbursed or retained pursuant to the terms and conditions set forth in the PSA, as amended by this Amendment.

2. **Amendment to the PSA**. Notwithstanding anything to the contrary in the PSA, including Section 9.5 of the PSA, the Parties agree that the following amendments to the PSA are made effective as of the Execution Date:

(a) Exhibit A to the PSA is hereby deleted in its entirety and replaced with *Exhibit A* attached hereto.

(b) Exhibit B to the PSA is hereby deleted in its entirety and replaced with *Exhibit B* attached hereto.

(c) Exhibit G-1 to the PSA is hereby deleted in its entirety and replaced with *Exhibit G-1* attached hereto.

(d) Exhibit H-2 to the PSA is hereby deleted in its entirety and replaced with *Exhibit H-2* attached hereto.

(e) Exhibit I to the PSA is hereby deleted in its entirety and replaced with *Exhibit I* attached hereto.

(f) Exhibit L-1 to the PSA is hereby deleted in its entirety and replaced with *Exhibit L-1* attached hereto.

(g) Exhibit L-3 to the PSA is hereby deleted in its entirety and replaced with *Exhibit L-3* attached hereto.

(h) Exhibit L-4 to the PSA is hereby deleted in its entirety and replaced with *Exhibit L-4* attached hereto.

(i) Exhibit L-5 to the PSA is hereby deleted in its entirety and replaced with *Exhibit L-5* attached hereto.

(j) Exhibit M to the PSA is hereby deleted in its entirety and replaced with *Exhibit M* attached hereto.

(k) Exhibit N-1 to the PSA is hereby deleted in its entirety and replaced with *Exhibit N-1* attached hereto.

(l) Exhibit N-2 to the PSA is hereby deleted in its entirety and replaced with *Exhibit N-2* attached hereto.

(m) Exhibit O-1 to the PSA is hereby deleted in its entirety and replaced with *Exhibit O-1* attached hereto.

(n) Exhibit O-2 to the PSA is hereby deleted in its entirety and replaced with *Exhibit O-2* attached hereto.

(o) References to Exhibit U in the PSA are hereby deleted in their entirety and replaced with "**Reserved**".

(p) *Schedule 3.1(b)* attached hereto shall be added as a schedule to the PSA.

(q) Schedule 7.7 to the PSA is hereby deleted in its entirety and replaced with *Schedule 7.7* attached hereto.

(r) Schedule 7.18 to the PSA is hereby deleted in its entirety and replaced with *Schedule 7.18* attached hereto.

(s) Schedule 9.6 to the PSA is hereby deleted in its entirety and replaced with *Schedule 9.6* attached hereto.

(t) Schedule 9.13 to the PSA is hereby deleted in its entirety and replaced with *Schedule 9.13* attached hereto.

(u) Schedule ABEC to the PSA is hereby deleted in its entirety and replaced with *Schedule ABEC* attached hereto.

(v) Schedule I-2 to the PSA is hereby deleted in its entirety and replaced with *Schedule I-2* attached hereto.

(w) *Schedule OM* attached hereto shall be added as a schedule to the PSA.

(x) All references to "Purchase Price" used in the provisions of the PSA are hereby deleted and replaced with "Cash Purchase Price" unless otherwise specified in this Amendment.

(y) All references to "Adjusted Purchase Price" used in the provisions of the PSA are hereby deleted and replaced with "Adjusted Cash Purchase Price" unless otherwise specified in this Amendment.

(z) All references to "the certificate delivered by Seller pursuant to *Section 12.3(l)*" and/or "Seller's certificate to be delivered at Closing pursuant to *Section 12.3(l)*", in each case, used in the provisions of the PSA are hereby deleted and are replaced with "the certificate delivered by Seller on the Amendment Execution Date".

(aa) Section 2.3(b) to the PSA shall be amended to delete the following parenthetical beginning on the seventh line of such provision "(including any Post-Closing Consent, Medium Consent or Required Consent)" and replace such parenthetical with the following: "(including any Post-Closing Consent or Required Consent)".

(bb) Section 3.1 to the PSA is hereby deleted in its entirety and replaced with the following:

"3.1 ***Purchase Price and Earnout Amount***.

(a) Purchase Price. Subject to the terms and conditions set forth in this Agreement, the purchase price for the transfer of the Conveyed Interests and the transactions contemplated hereby shall be the sum of (i) $570,000,000.00 (the "***Cash Purchase Price***"), as adjusted pursuant to this Agreement, and (ii) the Earnout Amount, if any (the Earnout Amount, if any, together with the Cash Purchase Price, the "***Purchase Price***"). The Cash Purchase Price shall be payable by Buyer to Seller in accordance with this Agreement by wire transfer in immediately available funds to a bank account of Seller (the details of which shall be provided by Seller to Buyer in the Preliminary Settlement Statement). The Earnout Amount, if payable, shall be paid pursuant to *Section 3.1(b)* below.

(b) Earnout Amount.

(i) First Earnout Payment.

(A) If the 2021 WTI Price equals or exceeds any of the thresholds set forth in *Schedule 3.1(b)* under the column titled "WTI Threshold" (each, a "***WTI Threshold***" and collectively the "***WTI Thresholds***"), Buyer and Buyer Parent shall together pay Seller, by wire transfer of immediately available funds to a bank account designated by Seller in writing to Buyer no later than five (5) days prior to the 2021 Earnout Payment Date, no later than thirty (30) days following the applicable Determination Date (the "***2021 Earnout Payment Date***"), the amount set forth in *Schedule 3.1(b)* under the column titled "WTI Annual Earnout Amount" for the highest WTI Threshold satisfied by the 2021 WTI Price.

(B) If the 2021 Henry Hub Price equals or exceeds any of the thresholds set forth in *Schedule 3 1(b)* under the column title "Henry Hub Threshold" (each a "***Henry Hub Threshold***" and collectively the "***Henry Hub Thresholds***"), Buyer and Buyer Parent shall together pay Seller, by wire transfer of immediately available funds to a bank account designated by Seller in writing to Buyer no later than five (5) days prior to the 2021 Earnout Payment Date, on or before the 2021 Earnout Payment Date the amount set forth in *Schedule 3.1(b)* under the column titled "Henry Hub Annual Earnout Amount" for the highest Henry Hub Threshold satisfied by the 2021 Henry Hub Price.

(C) Any amounts described in *Section 3.1(b)(i)(A)* and *Section 3.1(b)(i)(B)* shall be collectively referred to as the "***First Earnout Payment***".

(ii) Second Earnout Payment.

(A) If the 2022 WTI Price equals or exceeds any of the WTI Thresholds, Buyer and Buyer Parent shall together pay Seller, by wire transfer of immediately available funds to a bank account designated by Seller in writing to Buyer no later than five (5) days prior to the 2022 Earnout Payment Date, no later than thirty (30) days following the applicable Determination Date (the "***2022 Earnout Payment Date***"), the amount set forth in *Schedule 3.1(b)* under the column titled "WTI Annual Earnout Amount" for the highest WTI Threshold satisfied by the 2022 WTI Price.

(B) If the 2022 Henry Hub Price equals or exceeds any of the Henry Hub Thresholds, Buyer and Buyer Parent shall together pay Seller, by wire transfer of immediately available funds to a bank account designated by Seller in writing to Buyer no later than five (5) days prior to the 2022 Earnout Payment Date, on or before the 2022 Earnout Payment Date the amount set forth in *Schedule 3.1(b)* under the column titled "Henry Hub Annual Earnout Amount" for the highest Henry Hub Threshold satisfied by the 2022 Henry Hub Price.

(C) Any amounts described in *Section 3.1(b)(ii)(A)* and *Section 3.1(b)(ii)(B)* shall be collectively referred to as the "***Second Earnout Payment***".

(iii) Third Earnout Payment.

(A) If the 2023 WTI Price equals or exceeds any of the WTI Thresholds, Buyer and Buyer Parent shall together pay Seller, by wire transfer of immediately available funds to a bank account designated by Seller in writing to Buyer no later than five (5) days prior to the 2023 Earnout Payment Date, no later than thirty (30) days following the applicable Determination Date (the "***2023 Earnout Payment Date***"), the amount set forth in *Schedule 3.1(b)* under the column titled "WTI Annual Earnout Amount" for the highest WTI Threshold satisfied by the 2023 WTI Price.

(B) If the 2023 Henry Hub Price equals or exceeds any of the Henry Hub Thresholds, Buyer and Buyer Parent shall together pay Seller, by wire transfer of immediately available funds to a bank account designated by Seller in writing to Buyer no later than five (5) days prior to the 2023 Earnout Payment Date, on or before the 2023 Earnout Payment Date the amount set forth in *Schedule 3.1(b)* under the column titled "Henry Hub Annual Earnout Amount" for the highest Henry Hub Threshold satisfied by the 2023 Henry Hub Price.

(C) Any amounts described in *Section 3.1(b)(iii)(A)* and *Section 3.1(b)(iii)(B)* shall be collectively referred to as the "***Third Earnout Payment***".

(iv) Fourth Earnout Payment.

(A) If the 2024 WTI Price equals or exceeds any of the WTI Thresholds, Buyer and Buyer Parent shall together pay Seller, by wire transfer of immediately available funds to a bank account designated by Seller in writing to Buyer no later than five (5) days prior to the 2024 Earnout Payment Date, no later than thirty (30) days following the applicable Determination Date (the "***2024 Earnout Payment Date***"), the amount set forth in *Schedule 3.1(b)* under the column titled (y) "WTI Annual Earnout Amount" for the highest WTI Threshold satisfied by the 2024 WTI Price.

(B) If the 2024 Henry Hub Price equals or exceeds any of the Henry Hub Thresholds, Buyer and Buyer Parent shall together pay Seller, by wire transfer of immediately available funds to a bank account designated by Seller in writing to Buyer no later than five (5) days prior to the 2024 Earnout Payment Date, on or before the 2024 Earnout Payment Date the amount set forth in *Schedule 3.1(b)* under the column titled "Henry Hub Annual Earnout Amount" for the highest Henry Hub Threshold satisfied by the 2024 Henry Hub Price.

(C) Any amounts described in *Section 3.1(b)(iv)(A)* and *Section 3.1(b)(iv)(B)* shall be collectively referred to as the "***Fourth Earnout Payment***".

(v) Notwithstanding anything in this Agreement to the contrary, if any index or publisher used or referenced in calculating any Earnout Payment ceases to exist at any time on or prior to the final Determination Date, the Parties will promptly negotiate (in good faith) to identify and mutually agree upon a replacement index or publisher, as applicable, for the applicable Determination Date(s)."

(cc) Section 3.2 to the PSA is hereby deleted in its entirety and replaced with the following:

"3.2 ***Deposit***.

(a) Initial Deposit. Contemporaneously with the execution of this Agreement, (a) the Parties and the Escrow Agent are entering into the Escrow Agreement, and (b) Buyer is depositing on the Execution Date by wire transfer in same day funds with the Escrow Agent an amount equal to $70,000,000 (such amount, including all interest earned thereon, the "***Initial Deposit***"). Prior to Closing, the Parties may, by delivering executed joint written instructions to the Escrow Agent, transfer the Initial Deposit to Seller to thereafter be held or disbursed, as applicable, in accordance with the terms of this Agreement.

(b) Additional Deposit. In connection with the applicable rights and obligations of the Parties under this *Section 3.2(b)* and *Section 14.1*, on or before April 30, 2020 (the "***Additional Deposit Deadline***"), Buyer and Buyer Parent shall together deliver to Seller, by wire transfer of immediately available funds to a bank account designated by Seller in writing to Buyer at least five days in advance of the Additional Deposit Deadline, an amount equal to $100,000,000 (such amount, including all interest earned thereon, the "***Additional Deposit***"). If the Additional Deposit is not delivered to Seller by the Additional Deposit Deadline, Seller shall have the rights and remedies set forth in this Agreement in Sections *14.1(g)* and *14.2(f)*. The Additional Deposit, together with the Initial Deposit for an aggregate amount of $170,000,000 (plus all interest earned thereon), shall constitute the "***Deposit***" and shall be held pursuant to the terms of this Agreement.

(c) Disbursement of the Deposit. If Closing occurs, the Deposit shall be retained by Seller and applied toward the Adjusted Cash Purchase Price at Closing. Otherwise, the Deposit shall be handled in accordance with *Section 14.2*."

(dd) Section 3.3 of the PSA shall be amended to delete the first sentence thereof and replace such sentence with the following:

"3.3 ***Adjustment to the Cash Purchase Price***. The Cash Purchase Price shall be adjusted as follows (without duplication), and the resulting amount shall be in this Agreement called the "***Adjusted Cash Purchase Price***":".

(ee) Section 3.3(b)(v) of the PSA shall be amended to delete the reference to "*5.5(b)(ii)*".

(ff) Section 3.8 of the PSA is hereby deleted in its entirety and replaced with the following:

"3.8 ***Allocated Values***. Solely for the purposes of determining the value of Conveyed Interests in connection with any Title Defect, Environmental Defect, Preferential Purchase Right, Required Consent, Casualty Loss and/or breach of Special Warranty under this Agreement, Buyer and Seller have allocated the Purchase Price among (a) the Leases set forth on *Exhibit A*, (b) the Wells set forth on *Exhibit B*, (c) the Conveyed Interests identified on *Schedule I-2* and (d) the Conveyed Interests identified on *Schedule I-3*, as set forth in this *Section 3.8*. The "***Allocated Value***" at any particular date of determination for (i) each (A) Lease set forth on *Exhibit A* and (B) each Well set forth on *Exhibit B*, shall be equal to the sum of (1) the portion of the Cash Purchase Price attributable to such Lease set forth on *Exhibit A* or such Well set forth on *Exhibit B*, as applicable, under the column titled "Allocated Value" on *Exhibit A* for such Lease or *Exhibit B* for such Well, as applicable, plus (2) the product of (y) the Earnout Amount actually paid by Buyer as of such date of determination multiplied by (z) the percentage listed under the column titled "% of Earnout Amount, to the extent paid by Buyer" for such Lease set forth on *Exhibit A* or such Well set forth on *Exhibit B*, as applicable, and (ii) each Conveyed Interest identified on *Schedule I-2* or *Schedule I-3*, shall be equal to the portion of the Cash Purchase Price attributable to such Conveyed Interest identified on (A) *Schedule I-2* under the column titled "Allocated Value" on *Schedule I-2* for such Conveyed Interest or (B) *Schedule I-3* under the column titled "Amount" on *Schedule I-3* for such Conveyed Interest. Buyer and Seller agree that such allocation is reasonable and shall not take any position inconsistent therewith, including in notices to holders of Preferential Purchase Rights. Seller, however, makes no representations or warranties as to the accuracy of such value or allocation."

(gg) Section 5.1 of the PSA is hereby deleted in its entirety and replaced with the following:

"5.1 ***General Disclaimer of Title Warranties and Representations***. Except as and to the limited extent expressly represented otherwise in *Sections 7.9, 7.14*, 7.*15*, *7.17*, *7.19(a)*, *7.20*, *7.25, 7.26, 7.31* or *7.32,* the certificate delivered by Seller on the Amendment Execution Date (solely to the extent relating to *Sections 7.9, 7.14*, 7.*15*, *7.17*, *7.19(a)*, *7.20*, *7.25, 7.26, 7.31* or *7.32*) or the Special Warranty set forth in the Assignments and Deeds and without limiting Buyer's remedies for Title Defects set forth in this Article V, Seller makes no warranty or representation, express, implied, statutory or otherwise, with respect to Seller's title to any of the Conveyed Interests, and Buyer hereby acknowledges and agrees that Buyer's sole remedy for any defect of title, including any Title Defect, with respect to Seller's title to any of the Conveyed Interests shall be (a) as set forth in *Section 5.3*, (b) pursuant to the Special Warranty set forth in the Assignments and Deeds in compliance with *Section 5.2* below and as may otherwise be limited by this Agreement and (c) as set forth in *Sections 7.9, 7.14*, 7.*15*, *7.17*, *7.19(a)*, *7.20*, *7.25, 7.26, 7.31* or *7.32* and the certificate delivered by Seller on the Amendment Execution Date (solely to the extent relating to *Sections 7.9, 7.14*, 7.*15*, *7.17*, *7.19(a)*, *7.20*, *7.25, 7.26, 7.31* or *7.32*)."

(hh) Section 5.3(i) of the PSA shall be amended to delete, in each case, the reference to "one percent (1%) of the unadjusted Purchase Price" and replace such with "one percent (1%) of the Original Purchase Price".

(ii) The following language shall be added as Section 5.5(a)(iv) of the PSA:

"(iv) Notwithstanding anything to the contrary set forth in *Section 5.5(a)(iii)*, if Buyer elects to change the Scheduled Closing Date consistent with the terms and conditions set forth in *Section 12.1*, and, as of the Closing, (A) the time period for exercising any Preferential Purchase Right has not expired without exercise by the holder thereof prior to the Closing (and such Preferential Purchase Right has not been waived in writing by the holder thereof) and (B) there is no pending or threatened dispute, disagreement or Proceeding with respect to any matter related to such Preferential Purchase Right, then, the Conveyed Interests that are subject to such Preferential Purchase Right shall be sold to Buyer at Closing pursuant to the provisions of this Agreement, and Buyer shall be solely responsible for complying with the terms of such Preferential Purchase Right and shall be entitled to the proceeds, if any, associated with the exercise of such Preferential Purchase Right by the applicable holder thereof."

(jj) Section 5.5(b)(ii) of the PSA is hereby deleted in its entirety and replaced with the following: "**Reserved**."

(kk) Sections 5.5(b)(iii) and 5.5(b)(iv) of the PSA are hereby deleted in their entirety and replaced with the following:

"(iii) Prior to Closing, other than Post-Closing Consents (and subject to and except as otherwise provided in *Section 9.3*), and, with respect to any Required Consents that are excluded at Closing pursuant to this *Section 5.5*, for a period of 180 days after Closing, Seller and Buyer shall use their respective commercially reasonable efforts to obtain all Consents listed on *Schedule 7.4* (and any Consent that is not set forth on *Schedule 7.4* but is discovered by either Party after the Execution Date and before the Closing Date); *provided*, *however*, that neither Party shall be required to expend any monies or undertake any obligations (other than requesting such Consents) in order to obtain any such Consent (other than any ordinary course transfer fees expressly set forth in the underlying instrument, which transfer fees are described on *Schedule 5.5(b)(iii)* (which shall be borne by Buyer)). Subject to the foregoing, Buyer agrees to cooperate in good faith with Seller to provide Seller with any information or documentation that may be reasonably requested in writing by Seller and/or the Third Party holder(s) of such Consents in order to facilitate the process of obtaining such Consents, if, and to the extent, such requested information or documentation is in Buyer's or any of its Affiliates' possession or control and is not subject to any confidentiality and/or non-disclosure restrictions prohibiting or restricting Buyer's disclosure thereof.

(iv) Other than Post-Closing Consents, Required Consents or the FCC Consents, if Seller fails to obtain a Consent, and as of such date, there is no pending or threatened dispute, disagreement or Proceeding with respect to any matter related to such Consent and such Consent has not been denied in writing, then the Conveyed Interest(s) (or portion(s) thereof) subject to such un-obtained Consent shall nevertheless be assigned by Seller to Buyer at Closing as part of the Conveyed Interests and Buyer shall have no claim against Seller and hereby releases and indemnifies the Seller Indemnified Parties from any Liability to the extent arising from the failure to obtain such Consent."

(ll) The following language shall be added as Section 5.5(e) of the PSA:

"(e) Notwithstanding anything in this Agreement to the contrary, with respect to (i) each Consent set forth on *Schedule 7.4* (other than, for purposes

of clarity, the Post-Closing Consents or FCC Consents) and (ii) each Preferential Purchase Right set forth on *Schedule 7.9* to the extent related to any of the Conveyed Interests set forth on *Schedule I-3*, in each case of (i) and (ii), Buyer acknowledges that Consent requests and notices to only such Preferential Purchase Right holders, as applicable, will not be resent after the Amendment Execution Date and Buyer shall have no claim against, and hereby releases and indemnifies, the Seller Indemnified Parties from any Liability relating to such Consents or such Preferential Purchase Rights, as applicable, to the extent arising from the failure of the Parties to consummate Closing on the Original Scheduled Closing Date."

(mm) Section 6.1(e) of the PSA shall be amended to delete, in each case, the reference to "one percent (1%) of the unadjusted Purchase Price" and replace such with "one percent (1%) of the Original Purchase Price".

(nn) The lead-in paragraph of Article VII of the PSA is hereby deleted in its entirety and replaced with the following:

"Seller represents and warrants (and with respect to any Subject Property that is not operated by Seller, Seller represents and warrants to Seller's Knowledge) to Buyer, (a) with respect to all Conveyed Interests other than the Other Working Interest Owner Interests, as of the Execution Date and the Amendment Execution Date, and (b) with respect to the Other Working Interest Owner Interests if acquired by Seller prior to the Amendment Execution Date, as of the Other Working Interest Owner Acquisition Date and the Amendment Execution Date, in each case of (a) and (b), as follows:"

(oo) The lead-in paragraph of Article VIII of the PSA is hereby deleted in its entirety and replaced with the following:

"Buyer represents and warrants to Seller, as of the Execution Date, the Amendment Execution Date and the Closing Date, as follows (solely with respect to Buyer), and solely with respect to *Sections 8.1*, *8.2*, *8.3*, *8.4* and *8.8*, Buyer Parent represents and warrants to Seller, as of the Amendment Execution Date and the Closing Date, as follows:"

(pp) Sections 8.1 through 8.4 of the PSA are hereby deleted in their entity and replaced with the following:

"8.1 ***Organization, Existence and Qualification.***

(a) Buyer is a limited liability company duly formed, validly existing and in good standing under the Laws of the State of Delaware and has all requisite power and authority to own and operate its property and to carry on its business as now conducted. Buyer is duly licensed or qualified to do business as a foreign limited liability company in all jurisdictions in which it carries on business or owns assets and such qualification is required by Law except where the failure to be so qualified would not have a material adverse effect upon the ability of Buyer to consummate the transactions contemplated by this Agreement or perform its obligations hereunder.

(b) As of the Amendment Execution Date and, only if the Corporatization Transaction does not occur prior to the Closing Date, the Closing Date, Buyer Parent is a limited partnership duly formed, validly existing and in good standing under the Laws of the State of Delaware and has all requisite power and authority to own and operate its property and to carry on its business as now conducted. As of the Amendment Execution Date and, only if the Corporatization Transaction does not occur before the Closing Date, the Closing Date, Buyer Parent is duly licensed or qualified to do business as a foreign limited partnership in all jurisdictions in which it carries on business or owns assets and such qualification is required by Law except where the failure to be so qualified would not have a material adverse effect upon the ability of Buyer Parent to consummate the transactions contemplated by this Agreement or perform its obligations hereunder.

(c) If the Corporatization Transaction occurs prior to the Closing Date, as of the Closing Date, Buyer Parent is a corporation duly formed, validly existing and in good standing under the Laws of the State of Delaware and has all requisite power and authority to own and operate its property and to carry on its business as now conducted. If the Corporatization Transaction occurs prior to the Closing Date, as of the Closing Date, Buyer Parent is duly licensed or qualified to do business as a foreign corporation in all jurisdictions in which it carries on business or owns assets and such qualification is required by Law except where the failure to be so qualified would not have a material adverse effect upon the ability of Buyer Parent to consummate the transactions contemplated by this Agreement or perform its obligations hereunder.

8.2 ***Authorization, Approval and Enforceability.***

(a) Buyer has full power and authority to enter into and perform this Agreement, the Transaction Documents to which it is a party and the transactions contemplated herein and therein. The execution, delivery, and performance by Buyer of this Agreement and the Transaction Documents have been duly and validly authorized and approved by all necessary limited liability company action on the part of Buyer. This Agreement is, and the Transaction Documents to which Buyer is a party, when executed and delivered by Buyer, will be the valid and binding obligations of Buyer and enforceable against Buyer in accordance with their respective terms, subject to the effects of bankruptcy, insolvency, reorganization, moratorium, and similar Laws, as well as to principles of equity (regardless of whether such enforceability is considered in a proceeding in equity or at law).

(b) As of the Amendment Execution Date and the Closing Date, Buyer Parent has full power and authority to enter into and perform this Agreement, the Transaction Documents to which it is a party and the transactions contemplated herein and therein. As of the Amendment Execution Date and the Closing Date, the execution, delivery, and performance by Buyer Parent of this Agreement and the Transaction Documents have been duly and validly authorized and approved by all necessary limited partnership or corporate action, as applicable, on the part of Buyer Parent. As of the Amendment Execution Date and the Closing Date, this Agreement is, and the Transaction Documents to which Buyer Parent is a party, when executed and delivered by Buyer Parent, will be the valid and binding obligations of Buyer Parent and enforceable against Buyer Parent in accordance with their respective terms, subject to the effects of bankruptcy, insolvency, reorganization, moratorium, and similar Laws, as well as to principles of equity (regardless of whether such enforceability is considered in a proceeding in equity or at law).

8.3 ***No Conflict***. The execution, delivery, and performance by each of Buyer and Buyer Parent of this Agreement and the Transaction Documents to which Buyer or Buyer Parent is a party and the consummation of the transactions contemplated herein and therein will not (a) conflict with or result in a breach of any provisions of the organizational or other governing documents of Buyer or Buyer Parent, (b) result in a default or the creation of any Encumbrance or give rise to any right of termination, cancellation or acceleration under any of the terms, conditions or provisions of any note, bond, mortgage, indenture, license or other agreement to which Buyer or Buyer Parent is a party or by which Buyer or Buyer Parent or any of their respective property may be bound or (c) violate any Law applicable to Buyer, Buyer Parent or any of their respective property, except in the case of *clauses (b)* and *(c)* where such default, Encumbrance, termination, cancellation, acceleration or violation would not, individually or in the aggregate, have a material adverse effect upon the ability of Buyer or Buyer Parent to consummate the transactions contemplated by this Agreement or perform its obligations hereunder.

8.4 ***Consents***. Except for Post-Closing Consents and Regulatory Approvals, there are no consents or other restrictions on assignment, including requirements for consents from any Third Party or any Governmental Authority to any assignment, in each case, that Buyer or Buyer Parent is required to obtain in connection with the consummation of the transactions contemplated by this Agreement by Buyer or Buyer Parent."

(qq) Section 8.8 of the PSA is hereby deleted in its entirety and replaced with the following:

"8.8 ***Financing***. Buyer shall have, (a) as of the Additional Deposit Deadline, access to sufficient cash in immediately available funds with which to pay the Additional Deposit; (b) as of the Scheduled Closing Date and at Closing, access to sufficient cash in immediately available funds with which to (i) pay the Closing Payment due at Closing, (ii) consummate the transactions contemplated by this Agreement and (iii) perform its obligations under this Agreement and the Transaction Documents (except for and excluding those obligations set forth in *clause (c)* of this *Section 8.8*); and (c) as of each Earnout Payment Date, access to sufficient cash in immediately available funds with which to pay such Earnout Payment."

(rr) The second sentence of Section 9.3(a) of the PSA is hereby deleted in its entirety and replaced with the following:

"On or before the Closing Date, Buyer shall obtain, or cause to be obtained in the name of Buyer, replacements for such Governmental Bonds to the extent such replacements are necessary (i) for Buyer's ownership or operation of the Conveyed Interests, and (ii) to permit the cancellation of the Governmental Bonds posted by Seller and/or any Affiliate of Seller with respect to the Conveyed Interests at Closing."

(ss) The first sentence of Section 9.3(c) of the PSA is hereby deleted in its entirety and replaced with the following:

"In the event that (i) subject to, and without limitation of *Section 9.3(b)*, any counterparty to any such Credit Support or any Designated Midstream Contract does not release Seller or any of its Affiliates from all of their obligations under such Credit Support or such Designated Midstream Contract (which failure or refusal by any such counterparty to release Seller or any of its Affiliates from any of their obligations under such Credit Support or such Designated Midstream Contract is not caused by, related to or the result of any action or inaction by or on behalf of Seller or any of its Affiliates (other than the failure by Seller or any of its Affiliates to agree to any obligations or to provide or continue any guarantees, performance bonds, letters of credit, escrow accounts or other financial assurance which, for the avoidance of doubt, neither Seller nor its Affiliates shall be required to do)), or (ii) any Governmental Authority does not permit the cancellation of any Governmental Bond posted by Seller and/or any Affiliate of Seller with respect to the Conveyed Interests (which refusal by any such Governmental Authority to permit the cancellation of any such Governmental Bond is not caused by, related to or the result of any action or inaction by or on behalf of Seller or any of its Affiliates (other than the failure by Seller or any of its Affiliates to agree to any obligations or to provide or continue any guarantees, performance bonds, letters of credit, escrow accounts or other financial assurance which, for the avoidance of doubt, neither Seller nor its Affiliates shall be required to do)), then, in each case, from and after Closing, Buyer shall indemnify Seller or any applicable Affiliate of Seller, as applicable, against all amounts incurred by Seller or any Affiliate of Seller, as applicable, under such Credit Support, such Designated Midstream Contract or such Governmental Bond (and all costs incurred in connection with such Credit Support, such Designated Midstream Contract or such Governmental Bond) if applicable to the Conveyed Interests acquired by Buyer."

(tt) Section 9.13 of the PSA shall be deleted in its entirety and replaced with the following:

"9.13 ***NAESB Base Contracts***. Buyer shall use, and shall cause Concord, as applicable, to use, commercially reasonable efforts to negotiate with the counterparties set forth on *Schedule 9.13* to enter into a NAESB Base Contract for the Sale and Purchase of Natural Gas prior to Closing on terms mutually agreed to by the Parties; *provided*, *however*, that, subject to *Section 9.3(b)*, Buyer's or Concord's, as applicable, commercially reasonable efforts shall not include the obligation to expend any monies or undertake any obligations (other than the obligation to negotiate with such counterparties)."

(uu) The following language shall be added as Section 9.16 of the PSA:

"9.16 ***Gulf South Firm Transportation Agreement and Southern Company Confirmations.***

(a) On or prior to May 30, 2020, the Parties shall (i) execute and file with FERC the Joint Petition for Temporary Waiver of Capacity Release Regulations and Policies and (ii) thereafter, execute and/or deliver, or shall cause to be executed and/or delivered, any information, documentation or otherwise, and shall take such other actions, as may be requested by FERC or the other Party related to such joint petition to obtain the requested waivers on or prior to Closing.

(b) Notwithstanding anything in this Agreement to the contrary and without limiting or modifying the Parties obligations set forth in *Section 13.1(a)* or *Section 13.1(b)*, in the event FERC does not grant the waivers requested pursuant to the Joint Petition for Temporary Waiver of Capacity Release Regulations and Policies on or prior to the date that is fifteen days before the Scheduled Closing Date, the Parties hereby agree that the assignment of

the Gulf South Firm Transportation Agreement from Seller to Buyer will occur on the date on which the Transition Services Agreement terminates in accordance with its terms (the "***Subsequent Conveyance Date***"). To the extent FERC does not grant the waivers requested pursuant to the Joint Petition for Temporary Waiver of Capacity Release Regulations and Policies on or prior to the date that is fifteen days before the Scheduled Closing Date, Buyer hereby agrees to comply with all FERC capacity release requirements to facilitate the transactions contemplated by this *Section 9.16*. Following the Subsequent Conveyance Date, the Gulf South Firm Transportation Agreement will be deemed to automatically transfer to Buyer pursuant to the terms and conditions set forth in the Assignments. Except as otherwise set forth in this *Section 9.16(b)* and subject to any agency agreement executed by the Parties or any Third Party pursuant to the terms and conditions set forth in the Transition Services Agreement, the Gulf South Firm Transportation Agreement will be treated as a "Conveyed Interest" under this Agreement from and after Closing.

(c) Notwithstanding anything in this Agreement to the contrary and without limiting or modifying the Parties obligations set forth in *Section 13.1(a)* or *Section 13.1(b)*, the Parties hereby agree that the novation of the Southern Company Confirmations from Seller to Concord Energy, LLC ("***Concord***") (as marketing agent for Buyer) will occur on the Subsequent Conveyance Date and Seller shall use commercially reasonable efforts to effectuate such novation as of such date. Except as otherwise set forth in this *Section 9.16(c)*, the Southern Company Confirmation will be treated as a "Conveyed Interest" under this Agreement from and after Closing."

(vv) The following language shall be added as Section 9.17 of the PSA:

"9.17 ***Certain Buyer Parent Restrictions and Obligations***.

(a) From and after the Amendment Execution Date until the Additional Deposit Deadline, Buyer Parent shall continue to own and control, directly or indirectly, all of the assets and interests which are directly or indirectly owned or controlled by BKVLP as of the Amendment Execution Date.

(b) From and after the Amendment Execution Date until the 2024 Earnout Payment Date, Buyer Parent will maintain sufficient credit or other capital resources to fund the obligations under this Agreement, including the payment of the Additional Deposit pursuant to *Section 3.2(b)* and the Earnout Payments, if applicable, pursuant to *Section 3.1(b)*, and Buyer Parent will provide Seller audited year-end financial statements (prepared in accordance with GAAP) evidencing such sufficient credit or capital resources of Buyer Parent on an annual basis within ninety (90) days after the end of the applicable calendar year; *provided however*, Seller agrees to keep such financial statements confidential and such financial statements shall be provided to Seller subject to a mutually acceptable confidentiality agreement executed by the Parties.

(c) Simultaneously with the Corporatization Transaction, BKVLP shall cause BKVCorp to execute and deliver to Seller an assumption agreement in form reasonably acceptable to and enforceable by Seller (the "***BKVCorp Assumption***") pursuant to which BKVCorp acknowledges and agrees that it is bound by all of BKVLP's obligations under this Agreement."

(ww) The following language shall be added as Section 9.18 of the PSA:

"9.18 ***Transition Services Agreement***. The Parties hereby agree that the Transition Services Agreement to be executed and delivered at Closing pursuant to *Section 12.3(t)* shall (a) have a term no longer than three calendar months following the Closing Date, (b) be limited to accounting, marketing, tax matters and information system services, in each case, to be further defined therein and (c) include covenants whereby the Parties agree to act in good faith to execute and deliver at Closing agency agreements or any other similar agreement as may be necessary or required to perform the marketing services pursuant to the terms and conditions set forth in the Transition Services Agreement."

(xx) The following language shall be added as Section 9.19 of the PSA:

"Section 9.19. ***Other Matters***. The provisions of Section 1 of *Schedule OM* are incorporated herein by reference.".

(yy) Sections 10.1, 10.2, 10.3, 10.4 and 10.6 are each hereby deleted in their entirety and replaced with "**Reserved.**".

(zz) Sections 11.1 and 11.2 of the PSA shall be deleted in their entirety and replaced with the following:

"11.1 ***Representations***. The representations and warranties of (a) Buyer set forth in *Article VIII* and (b) Buyer Parent set forth in *Sections 8.1*, *8.2, 8.3* and *8.4*, in each case of (a) and (b), (i) that are qualified by materiality qualifiers shall be true and correct in all respects (such qualifiers by their terms shall be applicable for purposes of this *Section 11.1*), and (ii) that are not qualified by materiality qualifiers shall be true and correct in all material respects, in each case, on and as of the Closing Date, with the same force and effect as though such representations and warranties had been made or given on and as of the Closing Date (other than representations and warranties that refer to a specified date, which need only be true and correct on and as of such specified date).

11.2 ***Performance***. (a) Buyer shall have performed or complied with all material obligations, agreements, and covenants contained in this Agreement in all material respects as to which performance or compliance by Buyer is required prior to or at the Closing Date and (b) Buyer Parent shall have performed or complied with *Section 9.17* in all material respects prior to the Closing Date."

(aaa) Section 11.4 of the PSA shall be amended to delete the reference to "20% of the unadjusted Purchase Price" and replace such with "20% of the Original Purchase Price".

(bbb) Section 12.1 of the PSA is hereby deleted in its entirety and replaced with the following:

"12.1 ***Date of Closing***. Subject to the conditions stated in this Agreement, the sale by Seller and the purchase by Buyer of the Conveyed Interests pursuant to this Agreement (the "***Closing***") shall occur on (a) December 31, 2020, (b) an earlier date elected by Buyer in writing and delivered to Seller no later than forty-five days prior to such elected date, or (c) such other date as Buyer and Seller may agree upon in writing (such date, the "***Scheduled Closing Date***"). For the avoidance of doubt, if Buyer does not so notify Seller of such elected date in connection with *clause (b)* above in compliance therewith, the Scheduled Closing Date shall be December 31, 2020 (unless Buyer and Seller agree otherwise in writing pursuant to *clause (c)* above). If *Section 9.19(c)* applies, subject to the conditions stated in this Agreement, Closing shall occur on the Extension Date. The date on which the Closing actually occurs shall be the "***Closing Date.***"

(ccc) Sections 12.3(h) and 12.3(l) of the PSA are each hereby deleted in their entirety and replaced with "**Reserved;**"

(ddd) Section 12.3(m) of the PSA is hereby deleted in its entirety and replaced with the following:

"(m) (i) an authorized officer of Buyer shall execute and deliver a certificate, dated as of Closing, certifying that the conditions set forth in *Section 11.1* and *Section 11.2* have been fulfilled (solely as to Buyer) and, if applicable, any exceptions to such conditions that have been waived by Seller and (ii) an authorized officer of Buyer Parent shall execute and deliver a certificate, dated as of Closing, certifying that the conditions set forth in *Section 11.1* and *Section 11.2* have been fulfilled (solely as to Buyer Parent) and, if applicable, any exceptions to such conditions that have been waived by Seller;"

(eee) Section 12.3(q) of the PSA is hereby deleted in its entirety and replaced with the following:

"(q) the provisions of Section 2 of *Schedule OM* are incorporated herein by reference.".

(fff) Section 12.3(v) of the PSA is hereby deleted in its entirety and replaced with the following:

"(v) the provisions of Section 3 of *Schedule OM* are incorporated herein by reference.".

(ggg) Clause (a) of Section 13.2 of the PSA is hereby deleted in its entirety and replaced with the following:

"(a) any breach or inaccuracy of any representation or warranty made by Seller in *Article VII* or in the certificate delivered by Seller on the Amendment Execution Date;"

(hhh) Section 13.3 of the PSA is hereby deleted in its entirety and replaced with the following:

"13.3 ***Indemnities of Buyer***. Effective as of Closing, Buyer and Buyer Parent (solely with respect to the provisions set forth in *Sections 3.1(b)*, *8.1*, *8.2*, *8.3*, *8.4*, *8.8* and *9.17*), shall assume and be responsible for, shall pay on a current basis, and hereby defends, indemnifies, holds harmless and forever releases Seller and its Affiliates, and all of their respective stockholders, partners, members, directors, officers, managers, employees, attorneys, consultants, agents and other Representatives (collectively, the "***Seller Indemnified Parties***") from and against any and all Liabilities, without duplication, whether or not relating to Third Party Claims or incurred in asserting, preserving or enforcing any of their respective rights hereunder arising from or based upon:

(a) any breach or inaccuracy of any representation or warranty made by Buyer in *Article VIII* or Buyer Parent (solely with respect to *Sections 8.1*, *8.2*, *8.3* and *8.4*) or in the certificates delivered by Buyer and Buyer Parent pursuant to *Section 12.3(m)*;

(b) any breach, nonfulfillment of or failure to perform by or on behalf of Buyer, Buyer Parent (solely with respect to *Sections 3.1(b)* and *9.17*) or any of their Affiliates of any of Buyer's or Buyer Parent's (solely with respect to *Sections 3.1(b)* and *9.17*) covenants or agreements under this Agreement; or

(c) the Assumed Obligations."

(iii) Sections 13.4(b) and 13.4(c) of the PSA are hereby deleted in their entirety and replaced with following:

"(b) Notwithstanding anything in this Agreement to the contrary, except with respect to Seller's Liability for indemnity obligations with respect to any breach or inaccuracy of any of its Specified Representations or the Other Representations, Seller shall not be required to indemnify Buyer under *Section 13.2(a)* for aggregate Liabilities in excess of an amount equal to 25% of the aggregate unadjusted Purchase Price paid by Buyer (or, if applicable, Buyer Parent) as of the applicable date of determination, or, in the event Seller does not acquire the Other Working Interest Owner Interests prior to the Closing Date in accordance with *Section 9.14*, an amount equal to 25% of the aggregate unadjusted Purchase Price paid by Buyer (or, if applicable, Buyer Parent) as of the applicable date of determination less the Allocated Other Working Interest Owner Amount; *provided*, *however*, that the limitations set forth in this *Section 13.4(b)* shall not apply to any Liability (or Seller's related indemnity obligations) arising out of, or based upon, Fraud.

(c) Notwithstanding anything in this Agreement to the contrary, Seller shall not be required to indemnify Buyer under this Agreement for aggregate Liabilities in excess of an amount equal to 100% of the aggregate unadjusted Purchase Price paid by Buyer (or, if applicable, Buyer Parent) as of the applicable date of determination, or, in the event Seller does not acquire the Other Working Interest Owner Interests prior to the Closing Date in accordance with *Section 9.14*, an amount equal to 100% of the aggregate unadjusted Purchase Price paid by Buyer (or, if applicable, Buyer Parent) as of the applicable date of determination less the Allocated Other Working Interest Owner Amount; *provided*, *however*, that the limitations set forth in this *Section 13.4(c)* shall not apply to any Liability (or Seller's related indemnity obligations) arising out of, or based upon, Fraud."

(jjj) Section 13.6 of the PSA is hereby deleted in its entirety and replaced with the following:

"13.6. ***Exclusive Remedy***. Notwithstanding anything in this Agreement to the contrary, except in the case of Fraud, from and after Closing, *Sections 4.1(c)*, *4.1(d)*, *5.5(b)*, *5.5(c)*, *5.5(e)*, *9.3*, *9.15*, *13.2* and *13.3*, the Special Warranty set forth in the Assignments and Deeds (as, and to the extent, limited by *Section 5.2(b)*), and the covenants that are to be performed after Closing by the express terms thereof (and the Parties' respective rights and remedies related thereto) contain the Parties' exclusive remedies against each other with respect to the transactions contemplated hereby, including breaches of the representations, warranties, covenants and agreements of the Parties contained in this Agreement or in any document or certificate delivered pursuant to this Agreement. Except in the case of Fraud or as specified in *Sections 4.1(c)*, *4.1(d)*, *5.5(b)*, *5.5(c)*, *5.5(e)*, *9.3*, *9.15*, *13.2* and *13.3*, as applicable, and the Special Warranty in the Assignments and Deeds, as applicable (as, and to the extent, limited by *Section 5.2(b)*), effective as of Closing, each Party, on its own behalf and on behalf of the Buyer Indemnified Parties or Seller Indemnified Parties, as applicable, hereby releases, remises and forever discharges the other Party and its Affiliates and all of such Persons' equityholders, partners, members, directors, officers, employees, agents, advisors, and representatives from any and all suits, legal or administrative proceedings, claims, demands, damages, losses, costs, Liabilities, interest or causes of action whatsoever, at law or in equity, known or unknown, which such Party or its Indemnified Parties might now or subsequently have, based on, relating to or arising out of this Agreement, the transactions contemplated by this Agreement, the ownership, use or operation of any of the Conveyed Interests or the Subject Properties prior to Closing or the condition, quality, status or nature of any of the Conveyed Interests or the Subject Properties prior to Closing, including rights to contribution under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended, and any similar Environmental Law, breaches of statutory or implied warranties, nuisance or other tort actions, rights to punitive damages, common law rights of contribution and rights under insurance maintained by such Party or any of its Affiliates (except as provided in *Section 5.4*)."

(kkk) The first sentence of Section 13.7 of the PSA is hereby deleted in its entirety and replaced with the following:

"13.7 ***Indemnification Procedures***. All claims for indemnification under *Sections 4.1(c)*, *5.5(b)*, *5.5(c)*, *5.5(e)*, *9.3*, *9.15*, *13.2* and *13.3* shall be asserted and resolved as follows:"

(lll) Section 13.7(b) of the PSA is hereby deleted in its entirety and replaced with the following:

"(b) To make a claim for indemnification under *Sections 4.1(c)*, *5.5(b)*, *5.5(c)*, *5.5(e)*, *9.3*, *9.15*, *13.2* or *13.3*, an Indemnified Party shall promptly notify the Indemnifying Party in writing of its claim under this *Section 13.7*, including, the specific details of and specific basis under this Agreement for its claim (the "***Claim Notice***"). In the event that the claim for indemnification is based upon a claim by a Third Party against the Indemnified Party (a " ***Third Party Claim***"), the Indemnified Party shall provide its Claim Notice promptly after the Indemnified Party has actual knowledge of the Third Party Claim and shall enclose a copy of all papers (if any) served with respect to the Third Party Claim; *provided* that the failure of any Indemnified Party to give notice of a Third Party Claim as provided in this *Section 13.7(b)* shall not relieve the Indemnifying Party of its obligations under *Sections 4.1(c)*, *5.5(b)*, *5.5(c)*, *5.5(e)*, *9.3*, *9.15*, *13.2* or *13.3* (as applicable) except to the extent such failure results in insufficient time being available to permit the Indemnifying Party to effectively defend against the Third Party Claim or otherwise materially prejudices the Indemnifying Party's ability to defend against the Third Party Claim. In the event that the claim for indemnification is based upon an inaccuracy or breach of a representation, warranty, covenant or agreement, the Claim Notice shall specify the representation, warranty, covenant or agreement that was inaccurate or breached."

(mmm) Section 14.1 of the PSA is hereby deleted in its entirety and replaced with the following:

"14.1 ***Right of Termination***. This Agreement and the transactions contemplated in this Agreement may be terminated at any time prior to Closing by delivery of written notice to the other Party:

(a) by the mutual prior written consent of Seller and Buyer;

(b) **Reserved**;

(c) by Seller, at Seller's option, if Closing does not occur on the Scheduled Closing Date (unless *Section 9.19(c)* applies, in which case on the Extension Date) other than as a result of Seller's failure to satisfy the condition set forth in *Section 10.5*, which, if not timely cured by Seller (or otherwise waived in writing by Buyer) would give Buyer the right to terminate this Agreement pursuant to *Section 14.1(d)*. For the avoidance of doubt, if the other requirements of Buyer specified in *Section 14.1(d)(ii)* and *Section 14.1(d)(iii)* below are not satisfied, Seller may terminate this Agreement pursuant to this *Section 14.1(c)*;

(d) by Buyer, at Buyer's option, if (i) the condition set forth in *Section 10.5* is not satisfied by Seller (or waived in writing by Buyer) as of the Scheduled Closing Date (unless *Section 9.19(c)* applies, in which case as of the Extension Date) and, following written notice thereof from Buyer to Seller specifying the reason such condition is unsatisfied (including any breach by Seller of *Section 12.3*), such condition remains unsatisfied for a period of ten Business Days after Seller's receipt of written notice thereof from Buyer, (ii) as of the Scheduled Closing Date (unless *Section 9.19(c)* applies, in which case as of the Extension Date), the conditions set forth in *Article XI* have been satisfied or waived by Seller (with respect to *Section 11.6*, for the avoidance of doubt, subject to *Section 9.10(b)*), and (iii) as of the Scheduled Closing Date (unless *Section 9.19(c)* applies, in which case as of the Extension Date), Buyer is ready, willing and able (subject to obtaining or satisfying the Regulatory Approvals) to perform all of its agreements contained herein which are to be performed or observed by Buyer at or in connection with the Closing (including, for the avoidance of doubt, delivery of the Closing Payment in accordance with *Section 12.3(g)*); *provided*, *however*, that notwithstanding the foregoing, Buyer shall not have the right to terminate under this *Section 14.1(d)* if Seller has the right to terminate under *Section 14.1(e)* or *Section 14.1(h)*;

(e) by either Seller or Buyer if (i) any Governmental Authority shall have issued a final non-appealable order enjoining or otherwise prohibiting the consummation of the transactions contemplated by this Agreement or (ii) CFIUS has informed Seller in a final decision at the end of the investigation time period allowed under the DPA that there is no mitigation that will resolve the identified national security risk associated with the transactions contemplated by this Agreement;

(f) by Seller if the condition set forth in *Section 11.4* is not satisfied as of the Scheduled Closing Date (unless *Section 9.19(c)* applies, in which case as of the Extension Date);

(g) by Seller if the Additional Deposit is not delivered to Seller as of the Additional Deposit Deadline;

(h) the provisions of Section 4 of *Schedule OM* are incorporated herein by reference; *provided*, *however*, that Buyer shall not be entitled to terminate this Agreement pursuant to *Sections 14.1(d)* above if Buyer or its Affiliates are, at such time, in breach of this Agreement such that the conditions set forth in *Section 11.1* or *Section 11.2* are not satisfied."

(nnn) Section 14.2 of the PSA is hereby deleted in its entirety and replaced with the following:

"14.2 ***Effect of Termination.***

(a) If this Agreement, including the obligation to close the transactions contemplated hereby, is terminated pursuant to any provision of *Section 14.1* hereof, then, except for the provisions of *Article I*, *Sections 3.2(b)*, *4.1(c)* through *4.1(e)*, *4.2*, *4.3*, *8.8*, *9.6(a)*, *9.15*, *13.9*, this *Section 14.2*, *Section 14.3*, *Article XV* (other than *Sections 15.2(a)* through *(g)*, *15.7*, *15.8*, *15.16*, and *15.18*) and such of the defined terms in *Appendix I* to give context to the surviving provisions, this Agreement shall forthwith become void and the Parties shall have no Liability or obligation hereunder.

(b) If Seller has the right to terminate this Agreement pursuant to *Section 14.1(c)*, then, in such event, Seller shall have the right to, at its option, as Seller's sole and exclusive remedy, terminate this Agreement pursuant to *Section 14.1(c)* and retain the Deposit as liquidated damages and not as a penalty for such termination, free and clear of any claims thereon by Buyer or any of its Affiliates, and thereafter, all other rights, remedies and obligations of any Party arising under this Agreement (except for the provisions that survive pursuant to *Section 14.2(a)*, which shall remain in full force and effect) are hereby expressly waived by the Parties. THE PARTIES ACKNOWLEDGE AND AGREE THAT (x) SELLER'S ACTUAL DAMAGES RESULTING FROM A TERMINATION UNDER *SECTION 14.1(c)* MAY BE DIFFICULT, IF NOT IMPOSSIBLE TO CALCULATE, (y) THE DEPOSIT IS A FAIR AND REASONABLE ESTIMATE OF SELLER'S LIQUIDATED DAMAGES IN LIGHT OF THE UNCERTAINTIES IN CALCULATING THE ACTUAL DAMAGES THAT WOULD BE SUFFERED BY SELLER UNDER THE CIRCUMSTANCES SET FORTH IN THIS *SECTION 14.2(b)* AND (z) SUCH LIQUIDATED DAMAGES ARE NOT A PENALTY.

(c) If Buyer has the right to terminate this Agreement pursuant to *Section 14.1(d)*, then, in any such event, Buyer shall have the right, at its option, to (i) in lieu of terminating this Agreement, obtain all remedies available at law or in equity, including specific performance by Seller or (ii) terminate this Agreement by written notice to Seller and Seller shall, within two (2) Business Days of the date of such termination, disburse the Deposit to Buyer, free and clear of any claims thereon by, through or under Seller or any of its Affiliates, and thereafter, all other rights, remedies and obligations of any Party arising under this Agreement (except for the provisions that survive pursuant to *Section 14.2(a)*, which shall remain in full force and effect) are hereby expressly waived by the Parties. Seller hereby agrees not to raise any objections to the availability of the equitable remedy of specific performance to specifically enforce the terms and provisions of this Agreement pursuant to this *Section 14.2(c)*. Buyer shall not be required to provide any bond or other security in connection with seeking an injunction or injunctions to enforce specifically the terms and provisions of this Agreement pursuant to this *Section 14.2(c)*.

(d) Without limitation of any of Seller's rights or remedies under *Section 14.2(b)* above, in the event that (i) this Agreement is terminated under *Section 14.1* (except pursuant to *Section 14.1(g)*) and (ii) (y) Buyer is not entitled to the disbursement of the Deposit under *Section 14.2(c)* or (z) Seller is not entitled to retain (1) the Deposit under *Section 14.2(b)* or *Section 14.2(g)* or (2) the CFIUS Termination Fee under *Section 14.2(e)*, then Seller shall be entitled, as its sole and exclusive remedy, to retain the Deposit, as liquidated damages and not as a penalty for such termination, free and clear of any claims thereon by, through or under Buyer or any of its Affiliates. THE PARTIES ACKNOWLEDGE AND AGREE THAT (A) SELLER'S ACTUAL DAMAGES RESULTING FROM A TERMINATION DESCRIBED IN THE FIRST SENTENCE OF THIS *SECTION 14.2(d)*, MAY BE DIFFICULT, IF NOT IMPOSSIBLE TO CALCULATE, (B) THE DEPOSIT IS A FAIR AND REASONABLE ESTIMATE OF SELLER'S LIQUIDATED DAMAGES IN LIGHT OF THE UNCERTAINTIES IN CALCULATING THE ACTUAL DAMAGES THAT WOULD BE SUFFERED BY SELLER UNDER THE CIRCUMSTANCES SET FORTH IN THIS *SECTION 14.2(d)* AND (C) SUCH LIQUIDATED DAMAGES ARE NOT A PENALTY.

(e) If Seller or Buyer terminates this Agreement pursuant to *Section 14.1(e)*, Seller shall be entitled to retain the Deposit as the CFIUS Termination Fee as Seller's sole and exclusive remedy for such termination as liquidated damages and not as a penalty, free and clear of any claims thereon by, through or under Buyer or any of its Affiliates. THE PARTIES ACKNOWLEDGE AND AGREE THAT (x) SELLER'S ACTUAL DAMAGES RESULTING FROM A TERMINATION DESCRIBED IN THE FIRST SENTENCE OF THIS *SECTION 14.2(e)*, MAY BE DIFFICULT, IF NOT IMPOSSIBLE TO CALCULATE, (y) THE CFIUS TERMINATION FEE IS A FAIR AND REASONABLE ESTIMATE OF SELLER'S LIQUIDATED DAMAGES IN LIGHT OF THE UNCERTAINTIES IN CALCULATING THE ACTUAL DAMAGES THAT WOULD BE SUFFERED BY SELLER UNDER THE CIRCUMSTANCES SET FORTH IN THIS *SECTION 14.2(e)* AND (z) SUCH LIQUIDATED DAMAGES ARE NOT A PENALTY.

(f) If Seller has the right to terminate this Agreement pursuant to *Section 14.1(g)*, then, in such event, Seller shall have the right to (i) terminate this Agreement by written notice to Buyer and retain the Initial Deposit (subject to Seller's right to pursue the remedy in *clause (ii)* following which shall be in addition to and not in lieu of the remedy in this *clause (i)*) and (ii) obtain all remedies available at law or in equity, including specific performance by Buyer and Buyer Parent to compel Buyer and Buyer Parent to deliver to Seller the Additional Deposit, in the case of (i) and (ii) collectively, as liquidated

damages and not as a penalty for such termination, free and clear of any claims thereon by, through or under Buyer, Buyer Parent or any of their Affiliates, and thereafter, and without limiting the rights and remedies set forth in (i) and (ii) above, all other rights, remedies and obligations of any Party arising under this Agreement (except for the provisions that survive pursuant to *Section 14.2(a)*, which shall remain in full force and effect) are hereby expressly waived by the Parties. Buyer and Buyer Parent hereby agree not to raise any objections to the availability of the equitable remedy of specific performance to specifically compel Buyer and Buyer Parent to deliver to Seller the Additional Deposit. Seller shall not be required to provide any bond or other security in connection with seeking an injunction or injunctions in connection therewith. THE PARTIES ACKNOWLEDGE AND AGREE THAT (x) SELLER'S ACTUAL DAMAGES RESULTING FROM A TERMINATION UNDER *SECTION 14.1(g)* MAY BE DIFFICULT, IF NOT IMPOSSIBLE TO CALCULATE, (y) THE DEPOSIT IS A FAIR AND REASONABLE ESTIMATE OF SELLER'S LIQUIDATED DAMAGES IN LIGHT OF THE UNCERTAINTIES IN CALCULATING THE ACTUAL DAMAGES THAT WOULD BE SUFFERED BY SELLER UNDER THE CIRCUMSTANCES SET FORTH IN THIS *SECTION 14.2(f)* AND (z) SUCH LIQUIDATED DAMAGES ARE NOT A PENALTY.

(g) The provisions of Section 5 of *Schedule OM* are incorporated herein by reference."

(ooo) The section reference "*Section 15.2(b)*" set forth in the first line of Section 15.2(b) of the PSA shall be deleted in its entirety and replaced with "*Section 15.2(a)*".

(ppp) The last sentence of Section 15.2(d)(ii) of the PSA is hereby deleted in its entirety and replaced with the following:

"With respect to the U.S. federal income Tax Return (and related Schedules K-1) and the Texas franchise Tax Return of the Tarrant Salt Walter Disposal Joint Venture for the 2020 Tax period, (A) Seller shall (i) prepare (or cause to be prepared) such Tax Returns in accordance with past practices (unless otherwise required by applicable Law), (ii) with respect to such U.S. federal income Tax Return, to the extent the Closing Date is prior to December 31, 2020, allocate all items of income, gain, loss, deduction and credit allocable to the Water Disposal JV Interest between Seller and Buyer as of the Closing Date based on the "interim closing method" under Section 706 of the Code and the Treasury Regulations thereunder, and (iii) submit such Tax Returns to Buyer for its review and comment reasonably in advance of the due date therefor; (B) Buyer shall timely file (or cause to be timely filed) such Tax Returns (as revised by Seller to incorporate Buyer's reasonable comments) and will provide copies thereof to Seller; and (C) with respect to such U.S. federal income Tax Return, Seller (or any of its Affiliates) shall be appointed as the "partnership representative" (as defined in Section 6223 of the Code and the applicable Treasury Regulations) on such Tax Return, and Seller or its Affiliate, as applicable, shall use commercially reasonable efforts to make a "push-out" election under Section 6226 of the Code with respect to any imputed underpayment that is asserted with respect to such Tax Return."

(qqq) Section 15.3 of the PSA is hereby deleted in its entirety and replaced with the following:

"15.3 ***Assignment***. Subject to the provisions of *Section 15.18*, this Agreement may not be assigned by (a) Buyer or Buyer Parent without the prior written consent of Seller; provided, however, (i) BKVLP and its applicable Affiliates shall be entitled to consummate the Corporatization Transaction and (ii) BKVLP shall be expressly permitted to assign this Agreement and all of its rights, remedies and obligations hereunder to BKVCorp in connection with, and pursuant to, the Corporatization Transaction, in each case, without the prior written consent of Seller, and provided that the BKVCorp Assumption has been delivered to Seller, or (b) Seller without the prior written consent of Buyer and Buyer Parent, in each case of (a) and (b), and any such assignment without such consent shall be void ab initio. Notwithstanding the foregoing, Buyer shall have the right to designate an Affiliate of Buyer as an assignee for all or part of the Conveyed Interests to be conveyed by Seller at Closing. No assignment of any rights hereunder by a Party or Buyer Parent shall relieve such Party or Buyer Parent of any obligations and responsibilities hereunder. Any assignment or other transfer by Buyer or its successors and assigns of any of the Conveyed Interests shall not relieve Buyer Parent, Buyer or their successors or assigns of any of their obligations (including indemnity obligations) hereunder, as to the Conveyed Interests so assigned or transferred."

(rrr) Section 15.8 of the PSA is hereby deleted in its entirety and replaced with the following:

"15.8 ***Filings, Notices and Certain Governmental Approvals***. Promptly after Closing, Buyer shall, at its sole expense, (a) record all assignments and deeds, including the Assignments and the Deeds executed at Closing in the records of the applicable Governmental Authority (including any federal or state agencies, if applicable), (b) if applicable, send notices to vendors supplying goods and services for the Conveyed Interests and to the operator of the applicable Subject Properties of the assignment of the Conveyed Interests to Buyer, (c) actively pursue and obtain the unconditional approval of all applicable Governmental Authorities of the assignment of the Conveyed Interests to Buyer, (d) file and actively pursue approvals from the applicable Governmental Authority of all federal and state change of operator forms set forth in *Section 12.3(k)*, and (e) actively pursue all other consents and approvals that may be required in connection with the assignment of the Conveyed Interests to Buyer and the assumption of the Liabilities assumed by Buyer hereunder, in each case, that shall not have been obtained prior to Closing."

(sss) Section 15.12 of the PSA is hereby deleted in its entirety and replaced with the following:

"15.12 ***Amendment***. This Agreement may be amended, restated, supplemented or otherwise modified only by an instrument in writing executed by Buyer, Buyer Parent and Seller and expressly identified as an amendment, restatement, supplement or modification."

(ttt) Sections 15.13, 15.14, 15.15, 15.17 and 15.19 of the PSA shall apply to Buyer Parent, *mutatis mutandis*, as such provisions apply to Buyer.

(uuu) Section 15.20 of the PSA is hereby deleted in its entirety and replaced with the following:

"15.20 ***Liability Matters***. Buyer and Seller shall not, and shall cause the Buyer Indemnified Parties and the Seller Indemnified Parties not to, assert or threaten any claim or other method of recovery, in contract, in tort or under statute or other applicable Law, against any Person other than Buyer, Buyer Parent (solely with respect to *Sections 3.1(b)*, *3.2*, *8.1*, *8.2*, *8.3, 8.4*, *8.8*, *9.17*, *13.3* and *14.2(f)*) and Seller. Buyer and Seller, as applicable, shall be liable for all attorneys' fees and court costs arising from its breach of this *Section 15.20*."

(vvv) The following language shall be added as Section 15.24 of the PSA:

"15.24 ***Joint and Several Liability***. The Parties agree that Buyer and Buyer Parent shall be jointly and severally liable, without duplication, for the representations and warranties, covenants, obligations and liabilities of Buyer Parent or Buyer and Buyer Parent, as applicable, set forth in *Sections 3.1(b)*, *3.2*, *8.1*, *8.2*, *8.3, 8.4*, *8.8*, *9.17*, *13.3* and *14.2(f)*."

(www) Appendix I of the PSA is hereby amended to add the following definitions:

(i) "***2021 Earnout Payment Date***" has the meaning set forth in Section 3.1(b)(i)(A).

(ii) "***2021 Henry Hub Price***" means the average of the daily Henry Hub "Midpoint" settled prices as reported in Platts Gas Daily for each day in calendar year 2021 reported prior to the applicable Determination Date.

(iii) "***2021 WTI Price***" means the average of the daily settled WTI prices reported by the CME for each day in calendar year 2021 reported prior to the applicable Determination Date.

(iv) "***2022 Earnout Payment Date***" has the meaning set forth in Section 3.1(b)(ii)(A).

(v) "***2022 Henry Hub Price***" means the average of the daily Henry Hub "Midpoint" settled prices as reported in Platts Gas Daily for each day in calendar year 2022 reported prior to the applicable Determination Date.

(vi) "***2022 WTI Price***" means the average of the daily settled WTI prices reported by the CME for each day in calendar year 2022 reported prior to the applicable Determination Date.

(vii) "***2023 Earnout Payment Date***" has the meaning set forth in Section 3.1(b)(iii)(A).

(viii) "***2023 Henry Hub Price***" means the average of the daily Henry Hub "Midpoint" settled prices as reported in Platts Gas Daily for each day in calendar year 2023 reported prior to the applicable Determination Date.

(ix) "***2023 WTI Price***" means the average of the daily settled WTI prices reported by the CME for each day in calendar year 2023 reported prior to the applicable Determination Date.

(x) "***2024 Earnout Payment Date***" has the meaning set forth in Section 3.1(b)(iv)(A).

(xi) "***2024 Henry Hub Price***" means the average of the daily Henry Hub "Midpoint" settled prices as reported in Platts Gas Daily for each day in calendar year 2024 reported prior to the applicable Determination Date.

(xii) "***2024 WTI Price***" means the average of the daily settled WTI prices reported by the CME for each day in calendar year 2024 reported prior to the applicable Determination Date.

(xiii) "***Additional Deposit***" has the meaning set forth in *Section 3.2(b)*.

(xiv) "***Additional Deposit Deadline***" has the meaning set forth in Section 3.2(b).

(xv) "***Adjusted Cash Purchase Price***" has the meaning set forth in Section 3.3.

(xvi) "***Amendment Execution Date***" means April 13, 2020.

(xvii) "***BKVCorp Assumption***" has the meaning set forth in *Section 9.17(c)*.

(xviii) "***Buyer Parent***" means, (a) prior to the consummation of the Corporatization Transaction, BKV Oil & Gas Capital Partners, L.P., a Delaware limited partnership ("***BKVLP***") and (b) from and after the consummation of the Corporatization Transaction, BKV Corporation, a Delaware Corporation ("***BKVCorp***").

(xix) "***Cash Purchase Price***" has the meaning set forth in *Section 3.1(a)*.

(xx) "***CME***" means the Chicago Mercantile Exchange.

(xxi) "***Concord***" has the meaning set forth in *Section 9.16(c)*.

(xxii) "***Corporatization Transaction***" means that certain transaction (or series of related transactions) pursuant to which BKVLP shall assign and transfer (or be deemed to have assigned and transferred), whether through operation of law or otherwise, to BKVCorp all of BKVLP's assets, interests, rights, claims, liabilities and obligations, including this Agreement and all of BKVLP's rights, remedies and obligations arising hereunder.

(xxiii) "***Determination Date***" means, with respect to each Earnout Payment, the second Wednesday of December of the applicable calendar year in which such Earnout Payment may be earned by Seller. For the avoidance of doubt, the Determination Date (a) for the First Earnout Payment, is December 8, 2021; (b) for the Second Earnout Payment, is December 14, 2022; (c) for the Third Earnout Payment, is December 13, 2023 and (d) for the Fourth Earnout Payment, is December 11, 2024.

(xxiv) "***Earnout Amount***" means the sum of (a) the First Earnout Payment, (b) the Second Earnout Payment, (c) the Third Earnout Payment and (d) the Fourth Earnout Payment, as applicable.

(xxv) "***Earnout Payment***" means each of (a) the First Earnout Payment, (b) the Second Earnout Payment, (c) the Third Earnout Payment or (d) the Fourth Earnout Payment, as applicable.

(xxvi) "***Earnout Payment Date***" means (a) the 2021 Earnout Payment Date, (b) the 2022 Earnout Payment Date, (c) the 2023 Earnout Payment Date or (d) the 2024 Earnout Payment Date, as applicable.

(xxvii) "***Enterprise Firm Transportation Agreement***" means (a) the Firm Gas Transportation Agreement for Intrastate Service No. 8710FTSA dated August 1, 2009 (as amended), by and between Enterprise Texas Pipeline LLC and DGS and (b) the NGPA Section 311 Service No. 8710FTSE dated August 1, 2009 (as amended), by and between Enterprise Texas Pipeline LLC and DGS.

(xxviii) "***Extension Date***" has the meaning set forth in clause (c) of Section 1 of *Schedule OM*.

(xxix) "***First Earnout Payment***" has the meaning set forth in Section 3.1(b)(i)(C).

(xxx) "***Fourth Earnout Payment***" has the meaning set forth in Section 3.1(b)(iv)(C).

(xxxi) "***Gulf South Firm Transportation Agreement***" means the FTS Service Agreement (Gulf South Agreement/Contract No. 51759, Devon Agreement No. 99-300-0647) between DGS and Gulf South Pipeline Company, LP dated January 1, 2020, which superseded and replaced the FT Services Agreement No. 2023 dated August 29, 2018, but effective as of September 1, 2019, between DGS and Gulf Crossing Pipeline Company LLC, less and except the Excluded Transportation.

(xxxii) "***Henry Hub Threshold***" or "***Henry Hub Thresholds***" has the meaning set forth in Section 3.1(b)(i)(B).

(xxxiii) "***Initial Deposit***" has the meaning set forth in *Section 3.1(a)*, with such amount to be transferred from the Escrow Agent to Seller on the Amendment Execution Date.

(xxxiv) "***Joint Petition for Temporary Waiver of Capacity Release Regulations and Policies***" means the Joint Petition for Temporary Waiver of Capacity Release Regulations and Policies, in a form to be mutually agreed upon by Buyer and Seller, whereby the Parties seek temporary waivers of certain FERC requirements from FERC in order to effectuate a permanent release of the firm capacity under the Gulf South Firm Transportation Agreement from Seller to Buyer on or after Closing.

(xxxv) "***Original Purchase Price***" means $770,000,000.

(xxxvi) "***Original Scheduled Closing Date***" means April 15, 2020.

(xxxvii) "***Second Earnout Payment***" has the meaning set forth in Section 3.1(b)(ii)(C).

(xxxviii) "***Southern Company Confirmations***" means (a) that certain Gas Sales Confirmation No. 370912 dated as of June 1, 2019, between DGS and Southern Company Services, Inc. and (b) that certain Gas Sales Confirmation No. 370913 dated as of June 1, 2019, between DGS and Southern Company Services, Inc.

(xxxix) "***Subsequent Conveyance Date***" has the meaning set forth in Section 9.16(b).

(xl) "***Third Earnout Payment***" has the meaning set forth in Section 3.1(b)(iii)(C).

(xli) "***WTI Threshold***" or "***WTI Thresholds***" has the meaning set forth in Section 3.1(b)(i)(A).

(xxx) Appendix I of the PSA is hereby amended to replace or amend the following definitions set forth therein with the following:

(i) "***Closing Payment***" means the Cash Purchase Price, as adjusted at Closing less (a) the Deposit and (b) if applicable, the Defect Escrow Amount.

(ii) "***Deposit***" has the meaning set forth in *Section 3.2(b)*.

(iii) "***Designated Midstream Contracts***" means:

(a) (i) the Priority Intrastate Gas Transportation Agreement dated as of October 1, 2011 (as amended), by and between Atmos Pipeline – Texas and DGS, (ii) the NGPA 311 Interruptible Gas Transportation Service Agreement dated as of October 1, 2011 (as amended), by and between Atmos Pipeline – Texas and DGS and (iii) the Subscription Agreement for Additional Transportation Capacity dated as of October 1, 2011 (as amended), by and between Atmos Pipeline – Texas and DGS;

(b) (i) the Priority Intrastate Gas Transportation Agreement dated January 1, 2017, by and between Atmos Pipeline – Texas and DGS, (ii) the NGPA 311 Interruptible Gas Transportation Service Agreement dated as of January 1, 2017, by and between Atmos Pipeline – Texas and DGS and (iii) the Subscription Agreement dated as of January 1, 2017, by and between Atmos Pipeline – Texas and DGS;

(c) the Enterprise Firm Transportation Agreement; and

(d) the Gulf South Firm Transportation Agreement.

(iv) "***Excluded Assets and Other Matters***" shall be amended to delete the reference to "*5.5(b)(ii)*" in clause (aa) of such definition.

(v) "***Excluded Transportation***" means 200,000 dth/day of firm capacity under the Gulf South Firm Transportation Agreement, from Sherman (Enterprise, Receipt SLN 22329) to Rock Springs/Scott Mtn Gulf South Lease, Delivery SLN 22340, for the remainder of the term of the agreement.

(vi) "***Indemnity Deductible***" means an amount equal to one and one-half percent (1.50%) of the Original Purchase Price, or, in the event Seller does not acquire the Other Working Interest Owner Interests prior to the Closing Date in accordance with *Section 9.14*, an amount equal to one and one-half percent (1.50%) of the Original Purchase Price less the Allocated Other Working Interest Owner Amount.

(vii) "***Transition Services Agreement***" means the Transition Services Agreement in a form to be mutually agreed upon by the Parties prior to Closing, as necessary to reflect the terms and conditions set forth in *Section 9.18*.

(yyy) Appendix I of the PSA is hereby amended to delete the following definition:

(i) "***Adjusted Purchase Price***" has the meaning set forth in Section 3.3.

(ii) "***Medium Consent***" means a Consent set forth in a Lease that (a) does not have language that such Consent cannot be unreasonably withheld by the lessor or similar language, (b) expressly requires the "express written consent" of the lessor and (c) is not a Required Consent.

3. **CFIUS Filing Election**. The Parties hereby acknowledge and agree that, following the Execution Date, (a) Buyer elected not to make a CFIUS Filing and (b) Seller elected not to request that Buyer make a CFIUS Filing, in each case, in accordance with Section 9.10(b)(i) of the PSA.

4. **Environmental Defects and Title Defects**. Buyer hereby acknowledges and agrees that (a) there are no Environmental Defects and there will be no adjustments to the Cash Purchase Price related to Environmental Defects pursuant to Sections 3.3(b)(iv) or 3.3(b)(v) of the PSA and (b) the Title Defects and Title Defect Amounts asserted in the Title Defect Notice delivered by Buyer to Seller on March 1, 2020, do not exceed the Title Defect Deductible and there will be no adjustment to the Cash Purchase Price related to Title Defects pursuant to Sections 3.3(b)(iii) or 3.3(b)(v) of the PSA excluding those contemplated in Sections 5.4(c), 5.5(a)(i) and 5.5(b)(i) of the PSA; *provided*, *however*, upon request of Buyer, from and after the Amendment Execution Date until the Closing Date, Seller shall use good faith efforts to (i) provide Buyer curative information related to the Title Defects asserted by Buyer in such Title Defect Notice and (ii) assist Buyer (at Buyer's sole cost and expense) in curing (or attempting to cure) any such Title Defects (provided that Seller's good faith efforts shall not include any obligation to expend any monies or undertake any obligations other than those set forth herein).

5. **Employment Effective Date**. Notwithstanding anything to the contrary set forth in the PSA, as amended by this Amendment, the Parties hereby agree that (a) Buyer provided written notice to Seller on March 16, 2020 of Buyer's election to cause the Employment Effective Date with respect to certain Offered Employees to be the day after the Closing Date, (b) Buyer shall be entitled to deliver to Seller an updated election notice prior to the Amendment Execution Date setting forth Buyer's updated elections with respect to Offered Employees and the Employment Effective Date of certain of such Offered Employees and (c) after the Amendment Execution Date, Buyer shall not be entitled to supplement, modify or replace such election pursuant to Section 9.6(b) of the PSA.

6. **Scheduled Closing Date**. The Parties hereby acknowledge and agree that, (a) on April 8, 2020, the Parties agreed to change the Scheduled Closing Date from April 15, 2020, to April 20, 2020 and (b) as of the Amendment Execution Date, notwithstanding anything to the contrary set forth in the PSA, such change to the Scheduled Closing Date shall be superseded by this Amendment and shall be null and void in all respects.

7. **Seller's Authorized Officer Certificate**. Attached hereto as **Annex II** is an executed authorized officer certificate of Seller, dated as of the Amendment Execution Date, certifying that the conditions set forth therein have been fulfilled as of the Amendment Execution Date and, if applicable, any exceptions to such conditions that have been waived by Buyer.

8. **Preferential Purchase Rights**. Following the Amendment Execution Date, notwithstanding anything to the contrary set forth in the PSA, Seller

shall redeliver notices to the Preferential Purchase Rights holders to reflect the terms and provisions of the PSA, as amended by this Amendment, except for and excluding notices to the Preferential Purchase Rights holders related to the Conveyed Interests set forth on Schedule I-3 to the PSA.

9. **Litigation Matters**. Notwithstanding anything to the contrary set forth in the PSA, as amended by this Amendment, Seller hereby agrees to give good faith efforts to promptly provide written notice to Buyer of any matter, fact or circumstance that arises following the Amendment Execution Date until the Closing Date that, if such matter, fact or circumstance was in existence as of the Execution Date, would have been required to be set forth on Schedule 7.6 to the PSA.

10. **Other Matters**. The Parties hereby agree to the terms and conditions set forth on Schedule OM to the PSA.

11. **Confirmation**. Except as otherwise provided herein, the provisions of the PSA shall remain in full force and effect in accordance with their respective terms following the execution of this Amendment.

12. **Conflicts**. This Amendment amends and supplements the terms and conditions of the PSA. If any provision of this Amendment is construed to conflict with any provision of the PSA (except as otherwise expressly provided in this Amendment), the provisions of this Amendment shall be deemed controlling to the extent of that conflict.

13. **Entire Agreement**. This Amendment, the PSA, the Appendices, Exhibits and Schedules to the PSA, the Transaction Documents and the Confidentiality Agreement collectively constitute the entire agreement between the Parties pertaining to the subject matter hereof and supersede all prior agreements, understandings, negotiations, and discussions, whether oral or written, of the Parties pertaining to the subject matter hereof or thereof except as specifically set forth herein or therein.

14. **Choice of Law**. THIS AMENDMENT AND ANY CLAIM, CONTROVERSY OR DISPUTE ARISING UNDER OR RELATED TO THIS AMENDMENT OR THE TRANSACTIONS CONTEMPLATED HEREBY OR THE RIGHTS, DUTIES AND THE LEGAL RELATIONS BETWEEN THE PARTIES HERETO AND THERETO SHALL BE GOVERNED AND CONSTRUED IN ACCORDANCE WITH THE LAWS OF THE STATE OF TEXAS, EXCLUDING ANY CONFLICTS OF LAW RULE OR PRINCIPLE THAT MIGHT REFER CONSTRUCTION OF SUCH PROVISIONS TO THE LAWS OF ANOTHER JURISDICTION.

15. **Dispute Resolution**. The dispute resolution procedures set forth in Section 15.14 of the PSA shall apply to disputes arising under this Amendment, *mutatis mutandis*.

16. **Assignment; Preparation of Amendment**. Sections 15.3 and 15.4 of the PSA, as amended by this Amendment, shall apply to this Amendment, *mutatis mutandis*.

17. **Amendment**. This Amendment may be amended, restated, supplemented or otherwise modified only by an instrument in writing executed by both Parties and expressly identified as an amendment, restatement, supplement or modification.

18. **Counterparts**. This Amendment may be executed in any number of counterparts, and each such counterpart hereof shall be deemed to be an original instrument, but all of such counterparts shall constitute for all purposes one agreement. Any signature hereto delivered by a Party by electronic transmission (including scanned documents delivered by email) shall be deemed an original signature hereto, and execution and delivery by such means shall be binding upon all Parties.

[Signature Page Follows.]

IN WITNESS WHEREOF, Seller, Buyer and BKVLP have executed and delivered this Amendment as of the Amendment Execution Date.

SCHEDULES

PURCHASE AND SALE AGREEMENT

This Purchase and Sale Agreement (this " **Agreement**") is made as of May 18, 2022 (the " **Execution Date**"), by and between XTO Energy Inc., a Delaware corporation, Barnett Gathering, LLC, a Texas limited liability company, both with an address of 22777 Springwoods Village Parkway, Spring, Texas 77389 (collectively "**Seller**"), BKV North Texas, LLC, a Delaware limited liability company, and BKV Midstream, LLC, a Delaware limited liability company, both with an address of 1200 17th Street, Suite 2100, Denver, CO 80202 (collectively "**Purchaser**"). Seller and Purchaser are sometimes referred to in this Agreement collectively as the "**Parties**" and individually as a "**Party**."

WITNESSETH

WHEREAS, Seller desires to sell to Purchaser the Assets (as defined below) and Purchaser is willing to purchase the Assets from Seller, upon the terms and conditions set forth in this Agreement: and

WHEREAS, Purchaser's parent company, BKV Corporation, has agreed to join the Purchase Agreement for the limited purpose of guaranteeing certain obligations of Purchaser as set forth herein;

NOW THEREFORE, in consideration of the mutual promises of the Parties contained in this Agreement, and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties agree as follows:

ARTICLE I
DEFINITIONS

Section 1.1 **Certain Defined Terms**. Capitalized terms used in this Agreement shall have the meanings given such terms as set forth in Appendix A attached to this Agreement.

ARTICLE II
PURCHASE AND SALE

Section 2.1 **Agreement to Purchase and Sell**. At the Closing, and subject to the terms and conditions of this Agreement, Purchaser agrees to purchase the Assets from Seller, and Seller agrees to sell, transfer and assign the Assets to Purchaser as reflected in Schedule 2.1, effective as of the Effective Time.

Section 2.2 **The Assets**. The term "**Assets**" shall mean all of Seller's right, title and interest in and to the following, less and except for the Excluded Assets:

(a) the oil and gas leases located within the Sale Area including those described on Exhibit A-1, and all rights incident thereto and derived therefrom, including all of Seller's royalty interests, overriding royalty interests, net profits interests, production payments, farmout interests, carried interests, reversionary interests, and all other interests of any kind or character covered by such leases (the "**Leases**");

(b) the wells located within the Sale Area including the wells described in Exhibit B and all other wells (including all disposal or injection wells) located within the Sale Area, whether such wells are producing, shut-in or abandoned (the "**Wells**");

(c) all fee mineral interests located within the Sale Area, including those associated with the Assets described in Exhibit A-4 (the "**Mineral Interests**");

(d) all rights and interests in, under or derived from all unitization or pooling agreements in effect with respect to any of the Leases or Wells and the units created thereby (the "**Units**");

(e) all Rights-of-Way, located within the Sale Area that are used primarily in connection with the ownership or operation of any of the Leases, Wells, Units or other Assets, including the Rights-of-Way set forth in Exhibit A-2;

(f) the offices together with the surface fee tracts described in Exhibit A-3 and all improvements, furniture and fixtures and related tangible personal property used primarily in connection with the offices covered thereby (the "**Assigned Surface**");

(g) all equipment, machinery, fixtures and other personal and mixed property, operational and nonoperational, known or unknown, located on any of the Leases, Wells, Units or other Assets, that are primarily used or held for use in connection with the ownership, operation or development of the Leases, Well, Units or other Assets, including the inventory set forth on Schedule 3.2(e), and pipelines, gathering systems, the Midstream Assets together with all of Seller's percentage interest in such Midstream Assets, well equipment, casing, tubing, pumps, motors, fixtures, machinery, compression equipment, flow lines, processing and separation facilities, structures, materials and other items primarily used in the ownership, operation or development of the Leases, Well, Units or other Assets;

(h) to the extent that they may be assigned, all Permits that are primarily used in connection with the ownership or operation of the other Assets;

(i) to the extent they may be assigned, the Existing Contracts;

(j) the Transferred Vehicles;

(k) all Hydrocarbons attributable to the Leases, Wells and/or Units to the extent such Hydrocarbons were produced from and after the Effective Time (subject to the Purchase Price adjustments set forth in Section 3.2(d) or Section 3.3(h)) and all Imbalances relating to the Assets;

(l) Seller's partnership interest in the Tarrant Salt Water Disposal Joint Venture; and

(m) all claims and causes of action, audit rights, manufacturer's and contractor's warranties and other rights of Seller arising under or with respect to any Existing Contracts that are attributable to periods of time from and after the Effective Time or related to the Assumed Obligations.

Section 2.3 **Excluded Assets**. The following are specifically excluded from the Assets and are reserved by Seller (collectively, " **Excluded Assets**"):

(a) all of Seller's corporate minute books, financial records and other business records that relate to Seller's business generally (including the ownership and operation of the Assets);

(b) all accounts, trade credits, accounts receivable, and all other proceeds, income or revenues attributable to the Assets with respect to any period of time prior to the Effective Time;

(c) all claims and causes of action, manufacturer's and contractor's warranties and other rights of Seller arising under or with respect to any Existing Contracts that are attributable to periods of time prior to the Effective Time (including claims for adjustments or refunds), except to the extent any of the foregoing relates to any of the Assumed Obligations;

(d) all rights and interests of Seller (i) under any policy or agreement of insurance, (ii) under any bond or (iii) to any insurance or condemnation proceeds or awards;

(e) all Hydrocarbons produced and sold from the Assets with respect to all periods prior to the Effective Time;

(f) any claim, right or interest of Seller in or to any refunds or loss carry forwards, together with any interest due thereon or penalty rebate arising therefrom, with respect to (i) any and all taxes based on net income imposed on Seller or any of its Affiliates, (ii) any Property Taxes allocable to Seller pursuant to Section 13.1, or (iii) any Property Taxes attributable to the Excluded Assets;

(g) all personal computers and associated peripherals and all radio and telephone equipment except and unless located on any of the Wells or facilities to be assigned;

(h) all documents and instruments of Seller that are protected by an attorney-client or other privilege;

(i) all data that cannot be disclosed to Purchaser as a result of confidentiality arrangements under agreements with third parties (provided that Seller has used its commercially reasonable efforts to cause such confidentiality restrictions to be waived);

(j) all audit rights arising under any of the Existing Contracts or otherwise with respect to any period prior to the Effective Time or to any of the Excluded Assets, except with respect to any Imbalances or the Assumed Obligations;

(k) all geophysical and other seismic and related technical data and information relating to the Assets;

(l) documents prepared or received by Seller or its Affiliates with respect to (i) lists of prospective purchasers for such transactions compiled by Seller or its Affiliates or their respective representatives, (ii) offers submitted by other prospective purchasers of the Assets, (iii) analyses by Seller or its Affiliates or any of their respective representatives of any offers submitted by any prospective purchaser, (iv) correspondence between or among Seller or its Affiliates or any of their respective representatives, on the one hand, and any prospective purchaser other than Purchaser, on the other hand, and (v) correspondence among Seller or its Affiliates or any of their respective representatives with respect to any other offers, the prospective purchasers, or the transactions contemplated by this Agreement;

(m) any offices, office leases, and any personal property located in or on such offices or office leases, except the Assigned Surface;

(n) the equipment and other assets specifically identified on Schedule 2.3(n);

(o) all vehicles, other than the Transferred Vehicles; and

(p) any master service agreements, blanket agreements or similar contracts.

Seller reserves access rights to the Assets post-Closing for the limited purpose of removing equipment and other assets identified on Schedule 2.3(n) from the Rosedale Warehouse (as described in Exhibit A-3).

Section 2.4 **Effective Time; Property Expenses and Revenues**. Subject to the terms hereof, ownership and possession of the Assets shall be transferred from Seller to Purchaser at the Closing, but effective as of the Effective Time. Except to the extent accounted for in the adjustments to the Purchase Price made under Section 3.2 or Section 3.3 and without duplication of any such amounts: (a) Seller shall remain entitled to all of the rights of ownership (including the right to all production, proceeds of production and other proceeds) and shall remain responsible for all Property Expenses (in each case) attributable to the Assets for the period of time prior to the Effective Time; and (b) from and after the occurrence of Closing, Purchaser shall be entitled to all of the rights of ownership (including the right to all production, proceeds of production and other proceeds) and shall be responsible for all Property Expenses (in each case) attributable to the Assets for the period of time from and after the Effective Time.

ARTICLE III
PURCHASE PRICE

Section 3.1 **Purchase Price**. The purchase price for the Assets shall be the sum of (a) SEVEN HUNDRED AND FIFTY MILLION DOLLARS ($750,000,000.00) (the "**Purchase Price**"), and (b) the First Contingent Payment and/or Second Contingent Payment, if any (the First Contingent Payment and/or Second Contingent Payment, if any, together with the Purchase Price, the "**Total Purchase Price**"). The Purchase Price shall be allocated among the Assets as set forth in Exhibit D (the "**Allocated Values**").

Section 3.2 **Upward Adjustments to the Purchase Price**. The Purchase Price shall be adjusted upward by the following (without duplication):

(a) the amount of all Property Expenses and other costs paid by Seller that are attributable to the Assets on and after the Effective Time including royalties, rentals and similar charges and expenses and capital costs billed under applicable operating agreements and all prepaid expenses, but excluding costs paid by Seller to cure and/or Remediate, as applicable, any Title Defects, Environmental Defects or Casualty Losses, or to obtain any Required Consents or waiver of any Preferential Rights;

(b) an amount equal to the value of (i) all Hydrocarbons attributable to the Assets in pipelines or in tanks (including inventory) as of the Effective Time, plus (ii) line fill, in each case, such value to be based upon the contract price in effect as of the Effective Time (or if no such contract is in effect, the market value in the area as of the Effective Time), less applicable taxes and gravity adjustments;

(c) the amount of any Property Taxes prorated to Purchaser under Section 13.1, but paid or payable by Seller;

(d) an amount equal to the absolute value of the aggregate underproduced volumes of the Imbalances as set forth on Schedule 3.2(d), if any, multiplied by $2.95 per MCF for gas imbalances;

(e) an amount equal to the value of the inventory set forth in Schedule 3.2(e);

(f) the aggregate amount associated with the AFEs identified on Schedule 3.2(f), which have been paid by Seller;

(g) an amount equal to the value of all Title Benefits in accordance with Section 4.7 below;

(h) an amount equal to the fair market value of the Transferred Vehicles required to be bought out by Seller plus any transfer costs for such Transferred Vehicles (provided that in the event any Transferred Vehicle leases can be transferred to Purchaser, then the adjustment shall only be the amount of transfer costs for such lease transfer, if any); and

(i) any other upward adjustment agreed upon by Seller and Purchaser.

Section 3.3 **Downward Adjustments to the Purchase Price**. The Purchase Price shall be adjusted downward by the following (without duplication):

(a) the amount of all proceeds and revenues received by Seller, if any, from and after the Effective Time that are attributable to the Assets from and after the Effective Time (net of any royalties, cost of goods sold, and any production, severance, sales or other similar taxes not reimbursed to Seller by the purchaser of production);

(b) an amount equal to the Allocated Value of each of the Assets that have been excluded from the transactions contemplated by this Agreement pursuant to Section 4.4(b), Section 4.8(b), Section 4.8(c), Section 4.11(b) or Section 4.13(b);

(c) subject to Section 4.6, if Seller makes the election under Section 4.4(c) with respect to any Title Defect, the Title Defect Amount with respect to such Title Defect;

(d) subject to Section 4.12, if Seller makes the election under Section 4.11(c) with respect to any Environmental Defect, the Remediation Amount with respect to such Environmental Defect;

(e) if Seller makes the election under Section 4.13(b) with respect to any Casualty Loss, the reduction in value of any Asset that is attributable to such Casualty Loss;

(f) an amount equal to the net amount of suspended funds Seller elects to transfer to Purchaser in accordance with Section 12.2;

(g) the amount of all Property Taxes prorated to Seller in accordance with Section 13.1, but paid or payable by Purchaser;

(h) an amount equal to the absolute value of the aggregate overproduced volumes of the Imbalances as set forth on Schedule 3.3(h), multiplied by $2.95 per MCF for gas imbalances; and

(i) any other downward adjustment agreed upon by Seller and Purchaser.

Section 3.4 **Payment of the Purchase Price**. Purchaser shall pay the Purchase Price, as adjusted pursuant to Section 3.2 and 3.3 above (the "**Adjusted Purchase Price**"), as follows:

(a) on the date this Agreement is executed by the Parties, Purchaser shall pay to Seller, by wire transfer of immediately available funds to an account designated by Seller, the Deposit, which Deposit shall not bear interest. If the Closing occurs, the Deposit (without interest) shall be credited towards the Purchase Price. If Closing does not occur the Deposit will be subject to the provisions of Article XV.

(b) Purchaser shall pay to Seller at Closing, the Adjusted Purchase Price as determined in accordance with Section 10.2, and subject to final adjustment pursuant to Section 12.1, less the Deposit. All such payments shall be by bank wire transfer of immediately available funds to an account designated by Seller.

Section 3.5 **Contingent Payment**.

(a) If the 2023 Henry Hub Price equals or exceeds any of the thresholds set forth in the table shown below under the column title "2023 Henry Hub Thresholds" (each, a "**2023 Henry Hub Threshold**" and collectively the "**2023 Henry Hub Thresholds**"), Purchaser shall pay Seller, by wire transfer of immediately available funds to a bank account designated by Seller, on or before January 31, 2024, the amount set forth in the table below under the column titled "2023 Henry Hub Contingent Payment Amount" for the highest 2023 Henry Hub Threshold satisfied by the 2023 Henry Hub Price. For purposes hereof, "**2023 Henry Hub Price**" means the arithmetic historical daily average for the calendar year of 2023 of the Henry Hub Natural Gas Spot Price (US Dollars per Million Btu) as posted on the Henry Hub "Midpoint" settled prices as reported in Platts Gas Daily, for each settled trading day in calendar year 2023. Any amount due described below shall be referred to as the "**First Contingent Payment**".

2023 Henry Hub Thresholds ($/Million Btu)	2023 Henry Hub Contingent Payment Amount ($USD)
$ 4.00	$ 10,000,000.00
$ 4.50	$ 17,500,000.00
$ 5.00	$ 25,000,000.00

(b) If the 2024 Henry Hub Price equals or exceeds any of the thresholds set forth in the table shown below under the column title "2024 Henry Hub Thresholds" (each, a "**2024 Henry Hub Threshold**" and collectively the "**2024 Henry Hub Thresholds**"), Purchaser shall pay Seller, by wire transfer of immediately available funds to a bank account designated by Seller, on or before January 31, 2025, the amount set forth in the table below under the column titled "2024 Henry Hub Contingent Payment Amount" for the 2024 Henry Hub Threshold satisfied by the 2024 Henry Hub Price. For purposes hereof, "**2024 Henry Hub Price**" means the arithmetic historical daily average for the calendar year of 2024 of the Henry Hub Natural Gas Spot Price (US Dollars per Million Btu) as posted on the Henry Hub "Midpoint" settled prices as reported in Platts Gas Daily, for each settled trading day in calendar year 2024. Any amount due described below shall be referred to as the "**Second Contingent Payment**".

2024 Henry Hub Thresholds ($/Million Btu)	2024 Henry Hub Contingent Payment Amount ($USD)
$ 3.75	$ 10,000,000.00
$ 4.25	$ 17,500,000.00
$ 4.75	$ 25,000,000.00

Notwithstanding anything in this Agreement to the contrary, if any index, publication, or publisher used or referenced in calculating the First Contingent Payment amount or the Second Contingent Payment amount ceases to exist at any time, the Parties will promptly negotiate (in good faith) to identify and mutually agree upon a replacement index, publication, or publisher, as applicable.

ARTICLE IV
TITLE AND ENVIRONMENTAL MATTERS AND CASUALTY LOSSES

Section 4.1 **Title Examination**. Subject to the indemnity provisions of Section 7.3 and subject to obtaining any consents or waivers from third parties that are required pursuant to the terms of the Leases, Right-of-Way and/or Existing Contracts (including any restrictions therein related to access during hunting seasons), including any third party operators of the Assets, as soon as is reasonably practicable after the Execution Date, during Seller's normal business hours and without unreasonable disruption of Seller's normal and usual operations, Seller shall make available to Purchaser all title data in Seller's or its Affiliates' possession relating to the Assets, including title opinions, abstracts of title, title status reports, division order files, and curative matters, the Existing Contracts, and records relating to the payment of rentals, royalties, shut-in gas royalties, and other payments due under any Lease or Existing Contract provided, however, that those items referenced above in this Section 4.1 that are subject to a valid legal privilege or to unwaived third party disclosure restrictions shall be excluded. Purchaser shall be permitted, at its expense, to make copies of any of such title data. Purchaser shall be entitled to perform or cause to be performed, at Purchaser's expense, such additional title examination as Purchaser deems necessary or appropriate.

Section 4.2 **Seller's Title**.

(a) General Disclaimer of Title Warranties and Representations . Without limiting Purchaser's remedies for Title Defects set forth in this Article IV, Seller makes no warranty or representation, express, implied, statutory or otherwise, with respect to title to any of the Assets and, Purchaser acknowledges and agrees that Purchaser's sole remedy for any defect of title, including any Title Defect, with respect to any of the Assets (i) before Closing, shall be as set forth in Section 4.4 and (ii) after Closing, shall be pursuant to the special warranty of title to the Wells contained in Section 4.2(b), subject to the provisions of Section 4.2(c), and Purchaser waives all other remedies.

(b) Special Warranty of Title . Upon Closing, subject to Section 4.2(c), Seller hereby warrants and agrees to defend Defensible Title to the Wells by, through or under Seller but not otherwise, subject, however, to the Permitted Encumbrances. Such special warranty of title to the Wells shall be subject to the further limitations and provisions of Section 4.2(c).

(c) Recovery on Special Warranty .

(i) Purchaser's Assertion of Title Warranty Breaches. Purchaser shall furnish Seller a Title Defect Notice meeting the requirements of Section 4.3 setting forth any matters which Purchaser intends to assert as a breach of the special warranty of title to the Wells contained in Section 4.2(b). Seller shall have a reasonable opportunity, but not the obligation, to cure any Title Defect asserted by Purchaser pursuant to this Section 4.2(c). Purchaser agrees to reasonably cooperate with any attempt by Seller to cure any such breach of the special warranty of title.

(ii) Limitations on Special Warranty. For purposes of the special warranty of title to the Wells contained in Section 4.2(b), the value of the Assets set forth in Exhibit D shall be deemed to be the Allocated Value thereof, as adjusted pursuant to this Agreement. Recovery on the special warranty of title to the Wells contained in Section 4.2(b) shall be limited to an amount (without any interest accruing thereon) equal to the reduction in the Purchase Price to which Purchaser would have been entitled had Purchaser asserted the Title Defect giving rise to such breach of the special warranty of title, as a Title Defect prior to Closing pursuant to Section 4.3, in each case taking into account the Individual Title Defect Threshold and the Aggregate Title Defect Deductible.

(iii) Purchaser shall not be entitled to protection under Seller's special warranty of title to the Wells in Section 4.2(b), with respect to (A) any matter of which Purchaser or any of its Affiliates had constructive knowledge of prior to the Defect Notice Date through public records or the title documents that Seller made available to Purchaser under Section 4.1, or (B) any matter reported to Seller after the one-year anniversary of the Closing Date.

Section 4.3 **Notice of Title Defects**. Purchaser shall notify Seller in writing of any Title Defect (each a "**Title Defect Notice**") on or before June 13, 2022 (the "**Defect Notice Date**"). Seller shall use reasonable good faith efforts to provide all due diligence requested by Purchaser in a timely manner. For all purposes of this Agreement and notwithstanding anything herein to the contrary (except for the special warranty of title to the Wells contained in Section 4.2(b)), Purchaser shall be deemed to have waived, and Seller shall have no liability for, any Title Defect that Purchaser fails to assert as a Title Defect by a Title Defect Notice received by Seller on or before the Defect Notice Date. To be effective, each Title Defect Notice shall include (a) a detailed description of the alleged Title Defect, (b) the Well affected by such Title Defect (each a "**Title Defect Property**"), (c) the Allocated Value of such Title Defect Property, (d) supporting documents reasonably necessary for Seller to verify the existence of the alleged Title Defect, and (e) the amount by which Purchaser reasonably believes the Allocated Value of such Title Defect Property is reduced by the alleged Title Defect. Seller shall have the right, but not the obligation, to elect to attempt to cure any Title Defect set forth in a Title Defect Notice, which can be cured, as reasonably determined by Seller, by written notice to Purchaser prior to Closing and, if Seller elects, then Seller shall have sixty (60) days following Closing in which to cure, at Seller's cost, the Title Defect. No adjustment to the Purchase Price will be made at Closing for any Title Defect that Seller elects to attempt to cure pursuant to this Section 4.3 and the affected Well shall be assigned to Purchaser. If any such uncured Title Defect remains uncured, as reasonably determined by Purchaser, at the end of such sixty (60) day period, then (except as provided in Section 4.4(a)) an adjustment to the Purchase Price in an amount equal to the applicable Title Defect Amount will be made as part of the Final Settlement Statement. To give Seller an opportunity to commence reviewing and curing Title Defects, Purchaser shall use its reasonable efforts to give Seller weekly written notice of all Title Defects discovered by Purchaser (together with any Title Benefits discovered by Purchaser).

Section 4.4 **Remedies for Title Defects**. Subject to Seller's continuing right to dispute the existence of a Title Defect and/or the Title Defect Amount asserted with respect thereto and subject to the Individual Title Defect Threshold and the Aggregate Title Defect Deductible, with respect to any Title Defect that (i) Seller does not elect to attempt to cure or (ii) Seller elects to attempt to cure and Seller fails to cure such Title Defect within sixty (60) days after Closing:

(a) if such Title Defect is not of a nature that would prevent Purchaser from receiving the Net Revenue Interest share of proceeds of production for a particular Well as such interest is set forth on Exhibit B and/or does not relate to liens directly or indirectly associated with the Assets, Seller shall have the right, but not the obligation, to elect to indemnify Purchaser against all Losses resulting from such Title Defect pursuant to an indemnity agreement in a form mutually agreeable to the Parties, in which event the Purchase Price shall not be reduced and the affected Title Defect Property shall be transferred to (or if after Closing, retained by) Purchaser notwithstanding and subject to such Title Defect;

(b) at or prior to Closing, Seller shall have the right, but not the obligation, to elect to exclude the affected Title Defect Property from the transactions contemplated hereby, in which event such Title Defect Property and all Assets directly relating thereto (but only to the extent relating thereto) shall be excluded from the transactions contemplated hereby and the Purchase Price shall be reduced by the Allocated Value of such Title Defect Property and related Assets; or

(c) if both Section 4.4(a) and Section 4.4(b) above are not applicable, the affected Title Defect Property shall be transferred to (or if after Closing, retained by) Purchaser notwithstanding and subject to the Title Defect and the Purchase Price shall be reduced by the Title Defect Amount of such Title Defect Property as determined in accordance with Section 4.5 below.

Except for Purchaser's (i) rights under the special warranty of title to the Wells contained in Section 4.2(b) and (ii) rights to terminate this Agreement pursuant to Section 15.1(d), the provisions set forth in this Section 4.4 shall be the sole and exclusive right and remedy of Purchaser with respect to any Title Defect or any other title matter with respect to any Asset and Purchaser hereby waives all other rights and remedies.

Section 4.5 **Title Defect Amounts**. The amount by which the Allocated Value of an affected Title Defect Property is reduced as a result of the existence of a Title Defect shall be the "**Title Defect Amount**" and shall be determined in accordance with the following:

(a) if the Title Defect results in complete failure of title to a Title Defect Property with the effect that Seller has no ownership interest in that Title Defect Property to which an individual Allocated Value is assigned, then the Purchase Price shall be decreased by the Allocated Value for that Title Defect Property;

(b) if the Title Defect is a decrease in Net Revenue Interest from the Net Revenue Interest set forth in Exhibit B for a Title Defect Property, then the Title Defect Amount shall be equal to the product of the Allocated Value of that Title Defect Property multiplied by a fraction, the numerator of which is the amount of Net Revenue Interest set forth in Exhibit B for that Title Defect Property less the actual amount of the Net Revenue Interest for such Title Defect Property and the denominator of which is the Net Revenue Interest set forth in Exhibit B for that Title Defect Property;

(c) if the Title Defect is a lien, encumbrance or other charge on the Assets that is undisputed and liquidated in amount, then the Title Defect Amount shall be the amount necessary to be paid to remove the Title Defect (but never more than the Allocated Value of the affected Title Defect Property);

(d) if Purchaser and Seller agree on the Title Defect Amount, then that amount shall be the Title Defect Amount;

(e) if the Title Defect represents an obligation, Encumbrance upon or other defect in title to the Title Defect Property of a type not described above, then the Title Defect Amount shall be determined by taking into account the Allocated Value of the Title Defect Property, the portion of the Title Defect Property affected by the Title Defect, the legal effect of the Title Defect, the potential economic effect of the Title Defect over the life of the Title Defect Property, the values placed upon the Title Defect by Purchaser and Seller and such other reasonable factors as are necessary to make a proper evaluation; provided, however, that if such Title Defect is reasonably capable of being cured, as reasonably determined by Seller, then the Title Defect Amount shall not be greater than the reasonable cost and expense of curing such Title Defect;

(f) the Title Defect Amount with respect to a Title Defect Property shall be determined without duplication of any costs or losses included in another Title Defect Amount hereunder;

(g) if a Title Defect does not affect a Title Defect Property throughout the entire remaining productive life of such Title Defect Property, such fact shall be taken into account in determining the Title Defect Amount; and

(h) notwithstanding anything to the contrary herein, the aggregate Title Defect Amounts attributable to the effects of all Title Defects upon any single Title Defect Property shall not exceed the Allocated Value of such Title Defect Property.

Section 4.6 **Title Limitations**. Notwithstanding anything to the contrary, (a) in no event shall there be any adjustments to the Purchase Price or other remedies provided by Seller for any individual Title Defect for which the Title Defect Amount does not exceed one hundred thousand dollars ($100,000.00) (the "**Individual Title Defect Threshold**"); and (b) in no event shall there be any adjustments to the Purchase Price or other remedies provided by Seller for any Title Defect that exceeds the Individual Title Defect Threshold unless the sum of the Title Defect Amounts of all such Title Defects that exceed the Individual Title Defect Threshold (excluding any Title Defects cured by Seller) exceeds fifteen million dollars ($15,000,000.00) (the "**Aggregate Title Defect Deductible**"), after which point Purchaser shall be entitled to adjustments to the Purchase Price or other remedies only with respect to such Title Defects in excess of such Aggregate Title Defect Deductible (after reducing the value of each such Title Defect by the Individual Title Defect Threshold). For the avoidance of doubt, if Seller elects to exclude a Title Defect Property affected by a Title Defect from the transactions contemplated hereby pursuant to the remedy set forth in Section 4.4(b) or indemnify Purchaser with respect to any Title Defect pursuant to the remedy set forth in Section 4.4(a), then, after such election, the Title Defect Amount and related Purchase Price adjustment relating to such excluded Assets or such Assets which Seller has provided an indemnity to Purchaser will not be counted towards the Aggregate Title Defect Deductible or for purposes of Section 8.4 and Section 9.4.

Section 4.7 **Title Benefits**. If Seller determines that the ownership of any Well entitles Seller to a larger net revenue interest or a smaller working interest (without a corresponding decrease in the net revenue interest) than that set forth on Exhibit B (a "**Title Benefit**"), then Seller shall notify Purchaser of such increase in writing on or before the Defect Notice Date, describing in such notice with reasonable detail each alleged increase so discovered and a reasonable estimate of the value attributable to the applicable Title Benefit. Purchaser shall also promptly furnish Seller with written notice of any Title Benefit that is discovered prior to the Defect Notice Date by any of Purchaser's or any of its Affiliate's employees, title attorneys, landmen or other title examiners while conducting Purchaser's due diligence with respect to the Assets. The amount of any such Title Benefit (each, a "**Title Benefit Amount**") shall be determined in the same manner as provided in Section 4.5 with respect to Title Defects.

Section 4.8 **Preferential Purchase Rights and Consents to Assign**.

(a) Seller, within fifteen (15) days following the date of Execution Date, shall send to each holder of (i) a preferential purchase right pertaining to any of the Assets (a "**Preferential Right**") and (ii) a right to consent to assignment pertaining to the Assets and the transactions contemplated hereby, a notice seeking a waiver of such Preferential Right or such holder's consent to the transactions contemplated hereby, as applicable, in accordance with the contractual provisions applicable to such right. In no event shall Seller be required to incur any liability or pay any money in order to obtain any such waiver or consent. Purchaser shall cooperate with Seller in seeking to obtain such waivers of Preferential Rights and consents to assignment and will provide reasonable collateral or security to meet reasonable financial requirements as set forth in an Existing Contract demanded by counterparties in order to obtain consents from such counterparties; provided, as between Seller and Purchaser, (i) in the event Closing should fail to occur, all such collateral and/or security shall be automatically released and be of no further force and effect, and (ii) in the event Purchaser provides such collateral or security and such counterparty fails to consent, Purchaser shall have no liability for such failure to obtain consent.

(b) If, prior to Closing, any holder of a Preferential Right notifies Seller that it intends to consummate the purchase of the Assets to which its Preferential Right applies or the time for exercising a Preferential Right has not expired and such Preferential Right has not been exercised or waived, then those Assets subject to such Preferential Right shall be excluded from the Assets to be conveyed to Purchaser under this Agreement (together with all Assets directly relating thereto but only to the extent relating thereto), and the Purchase Price shall be reduced by the Allocated Values of all such excluded

Assets and, in such event, Seller shall be entitled to all proceeds paid by any Person exercising such Preferential Right. If such holder of such Preferential Right thereafter fails to consummate the purchase of the Assets subject to such Preferential Right in accordance with the terms thereof, the time for exercising such Preferential Right has expired and such Preferential Right has not been exercised, or the Preferential Right has been waived, (i) Seller shall so notify Purchaser, (ii) Purchaser shall purchase, on or before ten (10) Business Days following receipt of such notice, such Assets that were so excluded from the Assets to be assigned to Purchaser at Closing, for a price equal to the amount by which the Purchase Price was reduced at Closing with respect to such excluded Assets and on the same other terms of this Agreement, including the adjustments in accordance with Section 3.2 and Section 3.3, and (iii) Seller shall assign to Purchaser such Assets so excluded at Closing pursuant to an instrument in substantially the same form as the Assignment.

(c) If Seller fails to obtain a Required Consent prior to Closing, then, in each case, the Asset affected by such un-obtained Required Consent (together with all Assets directly relating thereto but only to the extent relating thereto) shall be excluded from the Assets to be assigned to Purchaser at Closing, and the Purchase Price shall be reduced by the Allocated Value of such Assets so excluded. In the event that any such Required Consent (with respect to Assets excluded pursuant to this Section 4.8(c)) that was not obtained prior to the Closing Date is obtained within ninety (90) days following the Closing Date, then, within ten (10) Business Days after such Required Consent is obtained, (i) Seller shall so notify Purchaser, (ii) Purchaser shall purchase, on or before ten (10) Business Days following receipt of such notice, such Assets that were so excluded from the Assets to be assigned to Purchaser at Closing, for a price equal to the amount by which the Purchase Price was reduced at Closing with respect to such excluded Assets and on the same other terms of this Agreement, including the adjustments in accordance with Section 3.2 and Section 3.3, and (iii) Seller shall assign to Purchaser the Assets so excluded at Closing pursuant to an instrument in substantially the same form as the Assignment. If, prior to Closing, Seller fails to obtain a consent to assign and such consent to assign is not a Required Consent, then the Assets subject to such un-obtained consent shall be assigned by Seller to Purchaser at Closing as part of the Assets and Purchaser shall have no claim against Seller, Purchaser hereby releases and indemnifies the Seller Group from any Losses relating to the failure to obtain such consent, and Purchaser shall be solely responsible for any and all Losses arising from the failure to obtain such consent.

Section 4.9 **Environmental Assessment**.

(a) Prior to the Defect Notice Date, and upon reasonable prior notice to Seller (and notice and consent of the operator(s) of any of the Assets not operated by Seller or its Affiliates), and subject to the other provisions of this Section 4.9 and the indemnity provisions of Section 7.3 below, Purchaser shall have the right to enter upon the Assets, inspect the same and conduct such tests, examinations, investigations, and studies as may be necessary or appropriate to determine the environmental condition of the Assets ("**Purchaser's Environmental Assessment**"). Any such entry onto the Assets is subject to all third-party restrictions, if any, and to Seller's safety, health and environmental policies and procedures, including drug, alcohol and firearms restrictions, and shall be at Purchaser's sole risk and expense. Purchaser shall coordinate its access rights, environmental property assessments and physical inspections of the Assets with Seller and all third party operators, as applicable, to minimize any inconvenience to or interruption of the conduct of business by Seller or any such third party operator.

(b) Notwithstanding anything herein to the contrary, for anything other than a Phase I environmental property assessment, Purchaser must obtain Seller's prior written consent (which consent may be withheld, in Seller's sole discretion) and any third party operator's consent as to the scope of any proposed environmental assessment, including testing protocols or a Phase II environmental property assessment.

(c) In conducting any assessment or inspection of the Assets, Purchaser shall not operate any equipment or (except with the prior written consent of Seller, which consent may be withheld in Seller's sole discretion, and any third party operator's consent) conduct any testing or sampling of soil, groundwater or other materials (including any testing or sampling for hazardous substances or NORM).

(d) Seller or Seller's designee shall have the right to be present during any stage of any inspection or assessment by Purchaser on the Assets.

(e) During all periods prior to Closing that Purchaser or any of its representatives (including Purchaser's environmental consulting or engineering firm) are on the Assets, Purchaser shall maintain, at its sole cost and expense, and with insurers reasonably satisfactory to Seller, policies of insurance of the types and in the amounts reasonably requested by Seller. Coverage under all insurance required to be carried by Purchaser hereunder will be primary insurance. Upon request by Seller, Purchaser shall provide evidence of such insurance to Seller prior to entering the Assets.

(f) Within five (5) days of Purchaser's receipt (if performed by a third party) or completion thereof (if performed by Purchaser), Purchaser shall deliver to Seller copies of all final reports, results, data and analyses of Purchaser's Environmental Assessment. Seller shall have no confidentiality obligation with regard to such information so provided and Seller shall not be deemed (by Seller's receipt of said documents or otherwise) to have made any representation or warranty, express, implied or statutory, as to the condition of the Assets or to the accuracy of said documents or the information contained therein.

(g) Upon completion of Purchaser's due diligence, Purchaser shall at its sole cost and expense and without any cost or expense to Seller or its Affiliates, (i) repair all damage done to the Assets (including the real property and other assets associated therewith) in connection with Purchaser's due diligence investigation, (ii) restore the Assets (including the real property and other assets associated therewith) to at least the approximate same condition in which they were prior to commencement of Purchaser's due diligence investigation, and (iii) remove all equipment, tools or other property brought onto the Assets in connection with such due diligence investigation. Any disturbance to the Assets (including the real property and other assets associated therewith) resulting from the due diligence investigation conducted by or on behalf of Purchaser will be promptly corrected by Purchaser.

Section 4.10 **Environmental Defect Notice**. If Purchaser determines, as a result of Purchaser's Environmental Assessment or otherwise that there exists an Environmental Defect, Purchaser shall notify Seller thereof in writing as soon as practicable after Purchaser has knowledge thereof, but in any event on or before the Defect Notice Date (each an "**Environmental Defect Notice**"). For all purposes of this Agreement and notwithstanding anything herein to the

contrary, Purchaser shall be deemed to have waived, and Seller shall have no liability for, any Environmental Defect that Purchaser fails to assert as an Environmental Defect by an Environmental Defect Notice received by Seller on or before the Defect Notice Date. To be effective, each Environmental Defect Notice shall include: (a) a detailed description of the alleged Environmental Defect, (b) the Well or other Asset affected by such Environmental Defect (each an "**Environmental Defect Property**"), (c) the Allocated Value of such Environmental Defect Property, (d) supporting documents reasonably necessary for Seller to verify the existence of the asserted Environmental Defect, (e) the specific Environmental Law that is applicable to the Environmental Defect and the violation of such Environmental Law and (f) Purchaser's good faith estimate of the Remediation Amount. Purchaser's calculation of the Remediation Amount included in the Environmental Defect Notice for any alleged Environmental Defect must describe in reasonable detail the Remediation proposed for such Environmental Defect and identify all assumptions used by Purchaser in calculating the Remediation Amount with respect thereto, including the standards that Purchaser asserts must be met to comply with Environmental Laws. Seller shall have the right but not the obligation to attempt to Remediate any Environmental Defect Property and, if Seller so elects, then Seller shall have sixty (60) days following Closing in which to Remediate, at Seller's cost, the Environmental Defect. No adjustment to the Purchase Price will be made at Closing for any Environmental Defect that Seller elects to attempt to cure pursuant to this Section 4.10 and the affected Environmental Defect Property shall be assigned to Purchaser. If such Environmental Defect Property has not been Remediated at the end of such sixty (60) day period, then (except as provided in Section 4.11(a)) an adjustment to the Purchase Price in an amount equal to the applicable Remediation Amount will be made as part of the Final Settlement Statement.

Section 4.11 **Remedies for Environmental Defects**. Subject to Seller's continuing right to dispute the existence of an Environmental Defect and/or the Remediation Amount asserted with respect thereto and subject to the Individual Environmental Defect Threshold and the Aggregate Environmental Defect Deductible, with respect to any Environmental Defect asserted by Purchaser that (i) Seller does not elect to attempt to Remediate or (ii) Seller elects to attempt to Remediate and fails to Remediate within sixty (60) days after Closing:

(a) Seller shall have the right, but not the obligation, to elect to indemnify Purchaser against all Losses resulting from such Environmental Defect pursuant to an indemnity agreement in a form mutually agreeable to the Parties, in which event the Purchase Price shall not be reduced and the affected Environmental Defect Property shall be transferred to (or if after Closing, retained by) Purchaser notwithstanding and subject to such Environmental Defect;

(b) at or prior to the Closing, Seller shall have the right, but not the obligation, to elect to exclude the Asset subject to the Environmental Defect from the transactions contemplated hereby, in which event such Asset and all Assets directly relating thereto (but only to the extent relating thereto) shall be excluded from the transactions contemplated hereby and the Purchase Price shall be reduced by the Allocated Value of such Asset and related Assets; or

(c) if both Section 4.11(a) and Section 4.11(b) above are not applicable, the affected Environmental Defect Property shall be transferred to (or if after Closing, retained by) Purchaser notwithstanding and subject to the Environmental Defect, and the Purchase Price shall be reduced by an amount equal to the Remediation Amount for the affected Environmental Defect Property.

Except for Purchaser's rights to terminate this Agreement pursuant to Section 15.1(d), the provisions set forth in this Section 4.11 shall be the exclusive right and remedy of Purchaser with respect to any Environmental Defect or the environmental condition of any Asset and Purchaser hereby waives all other rights and remedies.

Section 4.12 **Environmental Limitations**. Notwithstanding anything to the contrary, (a) in no event shall there be any adjustments to the Purchase Price or other remedies provided by Seller for any individual Environmental Defect for which the Remediation Amount does not exceed one hundred thousand dollars ($100,000.00) (the "**Individual Environmental Defect Threshold**"); and (b) in no event shall there be any adjustments to the Purchase Price or other remedies provided by Seller for any Environmental Defect that exceeds the Individual Environmental Defect Threshold unless the sum of all Remediation Amounts of all Environmental Defects that exceed the Individual Environmental Defect Threshold (excluding any Environmental Defects Remediated by Seller) exceeds fifteen million dollars ($15,000,000.00) (the "**Aggregate Environmental Defect Deductible**"), after which point Purchaser shall be entitled to adjustments to the Purchase Price or other remedies only with respect to such Environmental Defects in excess of such Aggregate Environmental Defect Deductible (after reducing the value of each such Environmental Defect by the Individual Environmental Defect Threshold). For the avoidance of doubt, if Seller elects to exclude an Asset affected by an Environmental Defect from the transactions contemplated hereby pursuant to the remedy set forth in Section 4.11(b) or indemnify Purchaser with respect to any Environmental Defect pursuant to the remedy set forth in Section 4.11(a), then, after such election, the Remediation Amount for such Environmental Defect and related Purchase Price adjustment relating to such excluded Assets or such Assets for which Seller has provided an indemnity to Purchaser will not be counted towards the Aggregate Environmental Defect Deductible or for purposes of Section 8.4 and Section 9.4.

Section 4.13 **Casualty Loss**.

(a) Notwithstanding anything herein to the contrary from and after the Effective Time, subject to the remaining provisions of this Section 4.13, if Closing occurs, Purchaser shall assume all risk of loss with respect to production of Hydrocarbons through normal depletion (including watering out of any Well, collapsed casing or sand infiltration of any Well) and the depreciation of all Wells and/or personal property due to ordinary wear and tear, in each case, with respect to the Assets.

(b) If, after the Execution Date but prior to the Closing Date, any portion of the Assets is destroyed or taken in connection with a Casualty Loss and the loss in value of such Assets as a result of such Casualty Loss (net to Seller's interest in the Assets), in the aggregate, exceeds fifteen million dollars ($15,000,000.00) then, subject to Section 15.1(d), Purchaser shall nevertheless be required to close and Seller shall elect by written notice to Purchaser prior to Closing: (i) with Purchaser's consent, to cause the Assets adversely affected by any such Casualty Loss to be repaired or restored to at least their condition prior to such Casualty Loss, at Seller's sole cost and expense, as promptly as reasonably practicable (which repair or restoration may extend after Closing), (ii) to exclude the Assets adversely affected by such Casualty Loss and any Asset related thereto (to the extent so related) and reduce the Purchase Price by the Allocated Value of such excluded Assets or (iii) to assign the Assets adversely affected by such Casualty Loss and reduce the Purchase Price by

the loss in value of such Assets as a result of such Casualty Loss. In each case, Seller shall retain all right, title and interest (if any) in insurance claims, unpaid awards and other rights (in each case) against third parties arising out of such Casualty Loss with respect to the Assets, except to the extent the Parties otherwise agree in writing.

(c) If, after the Execution Date but prior to the Closing Date, any Casualty Loss occurs, and the loss in value of the Assets as a result of such Casualty Loss (net to Seller's interest in the Assets), in the aggregate, is equal to or less than fifteen million dollars ($15,000,000.00) then, subject to Section 15.1(d), Purchaser shall nevertheless be required to close and Seller, at Closing, shall pay to Purchaser all sums received by Seller from third parties by reason of such Casualty Losses insofar as with respect to the Assets and Seller shall assign, transfer and set over to Purchaser or subrogate Purchaser to all of Seller's right, title and interest (if any) in unpaid awards and other rights (in each case) against third parties (excluding, for the avoidance of doubt, any Losses against any member of the Seller Group) arising out of such Casualty Losses insofar as with respect to the Assets (provided, however, that Seller shall reserve and retain all rights, title, interests and claims against such third parties for the recovery of Seller's costs and expenses incurred prior to Closing in pursuing or asserting any such insurance claims or other rights against such third parties with respect to any such Casualty Loss).

(d) Notwithstanding the foregoing, if the Casualty Loss consists of any taking under condemnation or eminent domain, the Purchase Price shall be reduced by the Allocated Value of such Assets so taken.

ARTICLE V
REPRESENTATIONS AND WARRANTIES OF SELLER

Seller represents and warrants to Purchaser as follows:

Section 5.1 **Organization, Existence and Qualification**. Seller is an entity duly formed and validly existing under the Laws of the State of its organization and is in good standing under the laws of the State of its organization. Seller has all requisite power and authority to own and operate the Assets and to carry on its business with respect thereto as currently conducted. Seller is duly licensed or qualified to do business as a corporation or limited liability company, as applicable, in all jurisdictions in which the Assets are located, except where the failure to be so qualified would not reasonably be expected to have a Material Adverse Effect.

Section 5.2 **Authority, Approval and Enforceability**. Seller has the power and authority to enter into and perform this Agreement and all Transaction Documents to be delivered at Closing by Seller and the transactions contemplated hereby and thereby. The execution, delivery and performance by Seller of this Agreement have been, and the Transaction Documents to which Seller is a party will be at Closing, duly and validly authorized and approved by all necessary corporate and limited liability company action on the part of Seller. This Agreement is, and the Transaction Documents to which Seller is a party when executed and delivered by Seller will be, the valid and binding obligation of Seller and enforceable against Seller in accordance with their respective terms, subject to the effects of bankruptcy, insolvency, reorganization, moratorium and similar Laws, as well as to principles of equity (regardless of whether such enforceability is considered in a proceeding in equity or at Law).

Section 5.3 **No Conflicts**. Assuming the receipt of all applicable consents and approvals in connection with the transactions contemplated hereby and the waiver of, or compliance with, all Preferential Rights applicable to the transactions contemplated hereby, the execution, delivery and performance of this Agreement, and the Transaction Documents to be delivered by Seller at Closing, by Seller, and the consummation by Seller of the transactions contemplated hereby and thereby, will not (a) violate any provision of the organizational documents of Seller, (b) violate, or result in the creation of any Encumbrance under, any material agreement or instrument to which Seller is a party or by which Seller or any of the Assets are bound, (c) violate any judgment, order, ruling, or decree applicable to Seller as a party in interest, or (d) violate any Law applicable to Seller relating to the Assets, except in the case of subsection (b), (c) or (d) where such violation would not reasonably be expected to have a Material Adverse Effect.

Section 5.4 **Asset Taxes**. To Seller's Knowledge, except as set forth on Schedule 5.4, (a) all tax returns relating to or prepared in connection with Asset Taxes that are required to be filed by Seller have been timely filed and all such tax returns are correct and complete in all material respects, (b) all Asset Taxes that are or have become due have been timely paid in full, and Seller is not delinquent in the payment of any such taxes, or, in either case, such taxes are currently being contested in good faith by Seller, (c) none of Seller's interest in the Assets is subject to any tax partnership, or is otherwise treated, or required to be treated, as held in an arrangement requiring a partnership income tax return to be filed under Subchapter K of Chapter 1 of Subtitle A of the of the Code, as amended, or any similar state statute, and (d) there are no encumbrances for taxes on such Seller's interest in the Assets, other than Permitted Encumbrances.

Section 5.5 **Bankruptcy**. There are no bankruptcy or receivership proceedings pending, being contemplated by or, to Seller's Knowledge, threatened in writing against Seller.

Section 5.6 **Foreign Person**. Seller or, if applicable, its regarded parent, is not a "foreign person" within the meaning of Section 1445 of the Code.

Section 5.7 **Brokers**. Neither Seller nor any of its Affiliates has incurred any obligation or liability for brokers' or finders' fees relating to the transactions contemplated hereby for which Purchaser or any of its Affiliates will be liable or have any responsibility.

Section 5.8 **Preferential Rights**. To Seller's Knowledge, except as set forth in Schedule 5.8, there are no Preferential Rights that are applicable to the transfer of the Assets by Seller to Purchaser.

Section 5.9 **Litigation**. Except as set forth in Schedule 5.9, as of the date of the execution of this Agreement, there is no suit, action or litigation by or before any governmental authority, and no arbitration proceedings, (in each case) pending and served on Seller, or, to Seller's Knowledge, threatened in writing, against Seller (in each case) with respect to the Assets.

Section 5.10 **Current Commitments**. To Seller's Knowledge, Schedule 5.10 sets forth, as of the date of the execution of this Agreement, all

authorities for expenditures ("**AFEs**") that (a) relate to drilling or reworking a Well, and (b) are in excess of one hundred thousand dollars ($100,000.00), net to Seller's interest in the Assets.

Section 5.11 **Payment of Royalties**. To Seller's Knowledge, Seller has in all material respects properly and timely paid, or caused to be paid, all royalties, overriding royalties, net profits interests, production payments and other similar burdens measured by or payable out of production of Hydrocarbons due with respect the Assets.

Section 5.12 **Imbalances**. To Seller's Knowledge, Schedules 3.2(d) and 3.3(h) set forth all Imbalances associated with the Wells and other Assets as of the date provided in Schedules 3.2(d) and 3.3(h).

Section 5.13 **Material Contracts**.

(a) To Seller's Knowledge, Schedule 5.13(a) sets forth, as of the Execution Date, a true, complete and accurate list of all Existing Contracts of the type described below (the Existing Contracts on such schedule, collectively, the "**Material Contracts**"):

(i) any Existing Contract that can reasonably be expected to result in aggregate payments by Seller, or any of Seller's Affiliates holding Assets, of more than one hundred and fifty thousand dollars ($150,000.00) during the remainder of the current or any subsequent fiscal year (based solely on the terms thereof and current volumes, without regard to any expected increase in volumes or revenues);

(ii) any Existing Contract that can reasonably be expected to result in aggregate revenues to Seller, or any of Seller's Affiliates holding Assets, of more than one hundred and fifty thousand dollars ($150,000.00) during the remainder of the current or any subsequent fiscal year (based solely on the terms thereof and current volumes, without regard to any expected increase in volumes or revenues);

(iii) any Existing Contract that is a Hydrocarbon purchase and sale, transportation, gathering, treating, processing or similar Existing Contract that is not terminable without penalty on ninety (90) days' or less notice;

(iv) any Existing Contract that is an indenture, mortgage, loan, credit lien, sale-leaseback or similar Existing Contract affecting any of the Assets which will not be released on or prior to the Closing;

(v) any Existing Contract that constitutes a lease under which Seller, or any of such Seller's Affiliates holding Assets, is the lessor or the lessee of real or personal property which lease cannot be terminated by Seller without penalty upon ninety (90) days' or less notice and involves an annual base rental of more than one hundred and fifty thousand dollars ($150,000.00);

(vi) any Existing Contract with any Affiliate of Seller which will be binding on Purchaser after the Closing Date and will not be terminable by Purchaser within ninety (90) days' or less notice;

(vii) any Existing Contract that constitutes or contains a farmout or farmin agreement, exploration agreement, participation agreement, development agreement, unit operating agreement, joint venture agreement, acreage trade, exchange or contribution agreement or any other similar applicable contract, in each case, where the primary obligations thereof have not been fully performed;

(viii) any Existing Contract that is a saltwater disposal, gathering, processing, transportation or other similar Existing Contract;

(ix) any Existing Contract containing "tag-along" or "drag-along" rights or other similar rights of, or applicable to, any Person; and

(x) any Existing Contract to sell, lease, exchange, transfer or otherwise dispose of all or any portion of any of the Assets (other than with respect to the production of Hydrocarbons in the ordinary course) from and after the Effective Time, but excluding rights of reassignment upon the intent to abandon any Asset.

(b) To Seller's Knowledge, except as set forth in Schedule 5.13(b), (i) there exists no material default under any Material Contract by Seller, any of Seller's Affiliates, or by any other Person that is a party to such Material Contract, and (ii) no event has occurred that with notice or lapse of time or both would constitute any material default under any such Material Contract by Seller, any of Seller's Affiliates, or, to Seller's Knowledge, any other Person who is a party to such Material Contract, and (iii) Seller has not given or received any unresolved written notice of any actual, potential or threatened material termination, cancellation or default with respect to any Material Contract.

Section 5.14 **Advance Payments**. Except for (a) the rights of any lessor to take gas under the terms of the relevant Lease for its use on the lands covered by such Lease, (b) any throughput deficiencies and gas balancing arrangements attributable to or arising out of any Existing Contract, (c) any royalties, overriding royalties, net profits interests, carried interests, reversionary interests and other burdens, (d) any Imbalances, and/or (e) as set forth on Schedule 5.14, to Seller's Knowledge, Seller is not obligated by virtue of any take-or-pay payment, advance payment or other similar payment, to deliver Hydrocarbons attributable to the Assets, or proceeds from the sale thereof, at some future time without receiving payment thereof at or after the time of delivery.

Section 5.15 **Payout Balances**. To Seller's Knowledge, Schedule 5.15 contains a complete list of the status of any "payout" balance, as of the date provided on such Schedule, with respect to Wells operated by Seller (or its Affiliates) subject to a reversion or other adjustment at some level of cost recovery or payout (or passage of time or other event other than termination of a Lease by its terms).

Section 5.16 **Liens and Encumbrances; Status of the Leases and Units**.

(a) Seller and its Affiliates holding and/or owning any of the assets shall convey the Assets to Purchaser free and clear of all liens,

mortgages and other encumbrances (other than Permitted Encumbrances), and at or prior to the Closing, Seller and its Affiliates holding Assets shall cause its lenders, or other third parties, with liens or encumbrances on the Assets, if any, securing indebtedness for borrowed money to execute and deliver all documentation necessary to release all such liens and encumbrances.

(b) Except as set forth on Schedule 5.16(b), and except for such matters that, individually or in the aggregate, would not reasonably be expected to have a Material Adverse Effect, to Seller's knowledge, none of Seller, any of its Affiliates or any third party operator of any of the Assets is in default with respect to any of its material obligations under or in respect of any of the Leases or Units.

Section 5.17 **Receipt of Revenues**. Except (a) as set forth on Schedule 5.17, (b) with respect to Assets that are not operated by Seller or any of its Affiliates, (c) for customary netting or off-sets made in the ordinary course of business, (d) for other netting or offsets permitted under the terms of written contracts, and (e) for such matters that, individually or in the aggregate, would not reasonably be expected to have a Material Adverse Effect, to Seller's Knowledge, as of the Execution Date, Seller and any of its Affiliates holding and/or owning any of the Wells is timely receiving the full share of proceeds to which Seller or such Affiliate is entitled from the sale of Hydrocarbons produced from or allocable to the Wells and all other material income, revenues and proceeds earned from or with respect to any of the Wells, without suspense or counterclaim, netting or set-off.

Section 5.18 **Credit Support**. To Seller's Knowledge, Schedule 5.18 accurately sets forth a true and complete list of (a) all existing bonds, letters of credit, guarantees and other forms of credit support currently posted by Seller and relating to the Assets (collectively, the "**Credit Support**"), excluding for all purposes all bonds and other forms of credit support posted with governmental authorities or transportation or gathering providers in the ordinary course.

Section 5.19 **Midstream Assets**.

(a) Subject to the Permitted Encumbrances, Seller has good and valid title to all of the personal property, and good and indefeasible title to all of the Rights-of-Way and other surface interests, and gathering and pipeline systems that collectively comprise the Midstream Assets, free and clear of all claims and Encumbrances.

(b) No part of the Assets comprising the Midstream Assets is located on lands that are not subject to an easement or other surface right held by Seller (i) permitting the location of such assets on the lands covered by such easement or surface right and (ii) permitting the gathering, processing and transportation of oil and natural gas production from and through the gathering system and pipelines associated therewith except, in each case, where the failure to comply would not, individually or in the aggregate, reasonably be expected to result in a Material Adverse Effect. Seller is in compliance with all terms and conditions of all Rights-of-Way except where the failure to comply would not, individually or in the aggregate, reasonably be expected to result in a Material Adverse Effect on the interests conveyed to Purchaser thereby.

(c) To Seller's Knowledge, the Midstream Assets are in working order and repair (excluding normal wear and tear) adequate in all material respects for operation as currently being operated except where the failure to comply would not, individually or in the aggregate, reasonably be expected to result in a Material Adverse Effect.

Section 5.20 **Plugging and Abandonment**. To Seller's Knowledge, except as set forth on Schedule 5.20, and except for such matters that, individually or in the aggregate, would not reasonably be expected to have a Material Adverse Effect, as of the Execution Date, (i) neither Seller nor any of its Affiliates has received any notices or demands from governmental authorities to plug or abandon or dismantle any Wells, in each case, that currently requires such plugging or abandonment to occur, (ii) there are no Wells that Seller is currently obligated by any applicable laws or other Permits to commence plugging, abandonment or dismantling, as applicable, on or prior to the Execution Date, excluding, for the avoidance of doubt, Wells that are currently subject to exceptions to a requirement to plug or abandon issued by a governmental authority and (iii) the Wells that have been plugged and abandoned by Seller have been plugged and abandoned in a manner that complies in all material respects with all applicable laws and other Permits.

Section 5.21 **Carried Obligations**. Except for (a) Seller's respective express obligations under the Material Contracts (including obligations with respect to non-consenting interest owners), (b) obligations with respect to non-participating fee simple mineral or working interest owners, and (c) drilling and normal ongoing lease operating expenses relating to the Wells, to Seller's Knowledge, Seller does not have any obligation to carry or bear any other interest owner's share of any expenses, obligations or any similar liabilities which exceed, individually or in the aggregate, two hundred and fifty thousand dollars ($250,000.00) (net to Seller's and its Affiliates' collective interests in the applicable Assets).

Section 5.22 **Area of Mutual Interest**. To Seller's Knowledge, except as set forth on Schedule 5.22, Seller nor any of its Affiliates nor any of the Assets is subject to any area of mutual interest agreements or agreements that include non-competition restrictions or other similar restrictions on doing business that would be binding on Purchaser or the Assets after Closing.

Section 5.23 **Environmental Matters**. To Seller's Knowledge:

(a) Except as set forth in Schedule 5.23(a), Seller is not a party (directly or as successor in interest) to any agreement with, or judgment of, any governmental authority with respect to the Assets that (i) is in existence as of the date of this Agreement and (ii) is based on any Environmental Laws that relate to the future use of any of the Assets.

(b) Except as set forth in Schedule 5.23(b), Seller has not received any unresolved written notice from any Person alleging that (i) Seller is not in compliance with all Environmental Laws with respect to its ownership or operation of the Assets or (ii) Seller is otherwise legally responsible for any release of hazardous substances related to its ownership or operation of the Assets.

(c) Notwithstanding any other provision of this Article V to the contrary, this Section 5.23 contains the sole and exclusive representations and warranties of Seller concerning matters with respect to Environmental Laws.

Notwithstanding the foregoing, to the extent that Seller has made any representations or warranties in this Article V in connection with matters relating to any Assets not operated by Seller, each and every such representation and warranty shall be deemed to be qualified by the phrase "To Seller's Knowledge" to the extent such individual representations or warranties does not already contain such qualification.

ARTICLE VI
REPRESENTATIONS AND WARRANTIES OF PURCHASER

Purchaser represents and warrants to Seller as follows:

Section 6.1 **Organization, Existence and Qualification**. Purchaser is an entity duly formed and validly existing under the Laws of the State of Delaware and in good standing under the laws of the State of Texas. Purchaser has all requisite power and authority to own and operate its property (including interests in the Assets following Closing) and to carry on its business with respect thereto. Purchaser is duly licensed or qualified to do business as a limited liability company in all jurisdictions in which the Assets are located, except where the failure to be so qualified would not reasonably be expected to have a material adverse effect on Purchaser's ability to consummate the transactions contemplated by this Agreement and perform its obligations hereunder.

Section 6.2 **Authority, Approval and Enforceability**. Purchaser has the power and authority to enter into and perform this Agreement and all Transaction Documents to be delivered at Closing by Purchaser and the transactions contemplated hereby and thereby. The execution, delivery and performance by Purchaser of this Agreement have been, and the Transaction Documents to which Purchaser is a party will be at Closing, duly and validly authorized and approved by all necessary limited liability company action on the part of Purchaser. This Agreement is, and the Transaction Documents to which Purchaser is a party when executed and delivered by Purchaser will be, the valid and binding obligation of Purchaser and enforceable against Purchaser in accordance with their respective terms, subject to the effects of bankruptcy, insolvency, reorganization, moratorium and similar Laws, as well as to principles of equity (regardless of whether such enforceability is considered in a proceeding in equity or at Law).

Section 6.3 **No Conflicts**. Assuming compliance with the HSR Act, if applicable, the execution, delivery and performance of this Agreement, and the Transaction Documents to be delivered by Purchaser at Closing, by Purchaser, and the consummation by Purchaser of the transactions contemplated hereby and thereby, will not (a) violate any provision of the organizational documents of Purchaser, (b) violate or result in the creation of any Encumbrance under any material agreement or instrument to which Purchaser is a party or by which its assets are subject, (c) violate any judgment, order, ruling, or decree applicable to Purchaser as a party in interest, or (d) violate any Law applicable to Purchaser, except in the case of subsection (b), (c) or (d) where such violation would not reasonably be expected to have a material adverse effect on Purchaser's ability to consummate the transactions contemplated by this Agreement and perform its obligations hereunder.

Section 6.4 **Bankruptcy**. There are no bankruptcy or receivership proceedings pending, being contemplated by or, to Purchaser's knowledge, threatened in writing against Purchaser.

Section 6.5 **Brokers**. Neither Purchaser nor any of its Affiliates has incurred any obligation or liability for brokers' or finders' fees relating to the transactions contemplated hereby for which Seller or any of its Affiliates will be liable or have any responsibility.

Section 6.6 **Consents**. Except for compliance with the HSR Act, if applicable, there are no requirements for consents or approvals from third parties in connection with the consummation by Purchaser of the transactions contemplated by this Agreement.

Section 6.7 **No Distribution**. Purchaser is acquiring the Assets for its own account and not with the intent to make a distribution in violation of the Securities Act of 1933, as amended (and the rules and regulations pertaining thereto), or in violation of any other applicable securities Laws.

Section 6.8 **Knowledge and Experience**. Purchaser is sophisticated in the evaluation, purchase, ownership and operation of oil and gas properties and related facilities. In making its decision to enter into this Agreement and to consummate the transactions contemplated hereby, Purchaser has solely relied (a) on the representations and warranties of Seller set forth in Article V and (b) on its own independent investigation and evaluation of the Assets and the advice of its own legal, tax, economic, environmental, engineering, geological and geophysical advisors and not on any comments, statements, projections or other material made or given by any representative, consultant or advisor of Seller. Purchaser hereby acknowledges that, other than the representations and warranties made by Seller in Article V and the special warranty of title with respect to the Wells, neither Seller nor any representatives, consultants or advisors of Seller or its Affiliates will make or have made any representation or warranty, express or implied, at Law or in equity, with respect to the Assets. Purchaser is able to bear the risks of the acquisition of the Assets, and assumption of the obligations, in accordance with and as set forth in this Agreement, and understands the risks of, and other considerations relating to, a purchase of the Assets.

Section 6.9 **Regulatory**. No later than five (5) days prior to the Scheduled Closing Date and continually thereafter Purchaser shall be qualified to own and assume operatorship of oil, gas and mineral leases in all jurisdictions where the Assets are located, and the consummation of the transactions contemplated by this Agreement will not cause Purchaser to be disqualified as such an owner or operator. To the extent required by any applicable Laws, Purchaser shall, as of the Scheduled Closing Date, (a) hold all lease bonds and any other surety or similar bonds as may be required by, and in accordance with, all applicable Laws governing the ownership and operation of the Assets and (b) have filed any and all required reports necessary for such ownership and operation with all governmental authorities having jurisdiction over such ownership and operation.

Section 6.10 **Funds**. Purchaser has, and at the Closing will have, such funds as are necessary for the payment of the Purchase Price and the consummation by Purchaser of the transactions contemplated hereby, including the performance of all of Purchaser's obligations hereunder.

ARTICLE VII
PRE-CLOSING COVENANTS OF THE PARTIES

Section 7.1 **Operations**.

(a) Except (w) as set forth in Schedule 7.1, (x) for the operations covered by the AFEs described in Schedule 5.10, (y) as required in the event of an emergency to protect life, property or the environment, and (z) as expressly contemplated by this Agreement or as expressly consented to in writing by Purchaser (which consent shall not be unreasonably delayed, withheld or conditioned), Seller shall, during the Interim Period:

(i) operate or, in the case of those Assets not operated by Seller or its Affiliates, use its commercially reasonable efforts to cause to be operated, the Assets in the usual, regular and ordinary manner consistent with past practice, subject to (A) Seller's right to comply with the terms of the Leases, Existing Contracts, applicable Laws and requirements of governmental authorities and (B) interruptions resulting from force majeure, mechanical breakdown and planned maintenance; and

(ii) maintain, or cause to be maintained, the books of account and Records relating to the Assets in the usual, regular and ordinary manner and in accordance with the past practices of Seller.

(b) Except (w) as set forth in Schedule 7.1, (x) for the operations covered by the AFEs described in Schedule 5.10, (y) as required in the event of an emergency to protect life, property or the environment, and (z) as expressly contemplated by this Agreement or as expressly consented to in writing by Purchaser (which consent shall not be unreasonably delayed, withheld or conditioned), Seller shall not, during the Interim Period:

(i) terminate (unless the term thereof expires pursuant to the provisions existing therein), amend, extend or surrender any rights under any Lease or Right-of-Way; provided that Seller shall be permitted to amend any Lease to increase its pooling authority;

(ii) subject to Section 7.1(d), propose or approve any individual AFE or similar request under any Existing Contract (other than those expressly required under the terms of any Existing Contract or by any order of a governmental authority) that would reasonably be estimated to require expenditures by Seller (net to its interest) in excess of one hundred thousand dollars ($100,000.00);

(iii) transfer, sell, mortgage, pledge or dispose of any portion of the Assets other than the (A) sale and/or disposal of Hydrocarbons in the ordinary course of business and (B) sale of equipment that is no longer necessary in the operation of the Assets or for which replacement equipment has been obtained; or

(iv) commit to do any of the foregoing.

(c) Purchaser acknowledges Seller owns undivided interests in certain of the properties comprising the Assets that it is not the operator thereof, and Purchaser agrees that the acts or omissions of the other Working Interest owners (including the operators) who are not Seller or any Affiliates of Seller shall not constitute a breach by Seller of the provisions of this Section 7.1, nor shall any action required by a vote of Working Interest owners constitute such a breach so long as Seller has voted its interest in a manner that complies with the provisions of this Section 7.1.

(d) With respect to any AFE or similar request received by Seller that is estimated to cost in excess of one hundred thousand dollars ($100,000.00), Seller shall forward such AFE to Purchaser as soon as is reasonably practicable and thereafter the Parties shall consult with each other regarding whether or not Seller should elect to participate in such operation. Purchaser agrees that it will (i) timely respond to any written request for consent pursuant to this Section 7.1(d), and (ii) consent to any written request for approval of any AFE or similar request that Purchaser reasonably considers to be economically viable. In the event the Parties are unable to agree within ten (10) days (unless a shorter time, not to be less than 48 hours, is reasonably required by the circumstances and the applicable joint operating agreement and such shorter time is specified in Seller's request for consent) of Purchaser's receipt of any consent request as to whether or not Seller should elect to participate in such operation, Seller's decision shall control and such operation shall be deemed to have been consented to by Purchaser.

Section 7.2 **Governmental Bonds**. Purchaser acknowledges that none of the bonds, letters of credit and guarantees, if any, posted by Seller or its Affiliates with governmental authorities and relating to the Assets are transferable to Purchaser. On or before the Closing Date, Purchaser shall obtain replacements for all such bonds, letters of credit and guarantees to the extent such replacements are necessary for Purchaser's ownership and/or operation of the Assets. At Closing, Purchaser shall cause the cancellation of the bonds, letters of credit and guarantees posted by Seller of its Affiliates with respect to the Assets.

Section 7.3 **Indemnity Regarding Access**. Purchaser hereby defends, indemnifies and holds harmless each of the operators of the Assets and the Seller Group from and against any and all Losses arising out of, resulting from or relating to, any field visit, environmental property assessment, or other due diligence activity conducted by Purchaser or any Purchaser's Affiliates or their respect representatives (including any environmental consultant or landman) with respect to the Assets, **EVEN IF SUCH LOSSES ARISE OUT OF OR RESULT FROM, SOLELY OR IN PART, THE SOLE, ACTIVE, PASSIVE, CONCURRENT OR COMPARATIVE NEGLIGENCE, STRICT LIABILITY OR OTHER FAULT OR VIOLATION OF LAW OF OR BY A MEMBER OF THE SELLER GROUP PARTIES, EXCEPTING ONLY IN THE CASE OF THIS SECTION 7.3 LOSSES ACTUALLY RESULTING ON THE ACCOUNT OF THE GROSS NEGLIGENCE OR WILLFUL MISCONDUCT OF A MEMBER OF THE SELLER GROUP**. For the avoidance of doubt, this indemnity shall survive any termination of this Agreement, if applicable, and the Closing.

Section 7.4 **Financial Security**. As a condition of Closing, Purchaser will deliver to Seller at Closing an irrevocable performance bond in the amount of five million dollars ($5,000,000.00) in favor of Seller (the "**Performance Bond**") as additional evidence of Purchaser's financial security to guarantee Purchaser's obligations provided in Section 11.1(b). The Performance Bond shall be in a form substantially similar to the form attached as Exhibit I, issued by a financial institution acceptable to Seller, as Surety, being one with an A.M. Best Financial Strength Rating of "A" and an A.M. Best's Financial Size Category of XII.

(a) Upon occurrence of any of the following, Seller may draw on the Performance Bond, in whole or in part, without prior notice to Purchaser: (i) Seller is required in any manner to perform any Plugging and Abandonment Obligations, whether pursuant to an order or directive issued by a

governmental body or regulatory agency or otherwise; (ii) Purchaser is in default of any Plugging and Abandonment Obligation and Seller has opted to therefore perform any or all such obligations of Purchaser (provided however that nothing herein shall be construed as imposing an obligation upon Seller to so perform); or (iii) Purchaser commences proceedings or has proceedings commenced against it (which proceedings are not stayed within twenty-one (21) days of service thereof on Purchaser) in the nature of bankruptcy resulting from the insolvency or its liquidation or for the appointment of a receiver, administrator, trustee in bankruptcy or liquidator or its undertakings or assets. Provided, however, that a reorganization bankruptcy such as a Chapter 11 shall not be an event of default if Purchaser does not reject the Plugging and Abandonment Obligation, the Performance Bond remains in place and Purchaser is not in default of any Plugging and Abandonment Obligations.

(b) Seller shall release the Performance Bond in favor of Seller on or before the date that is one hundred and twenty (120) days from the date of receipt of evidence reasonably satisfactory to it that Purchaser has performed all obligations to abandon, restore and Remediate the Assets contemplated by Section 11.1(b). For purposes of this Section 7.4 and Section 11.1(b), evidence that a Plugging and Abandonment Obligation has been performed shall include written documentation as may be provided by any governmental authority under applicable law to reflect completion of a Plugging and Abandonment Obligation (including, without limitation, forms and documentation related to plugging and abandonment activities, decommissioning activities, site clearance activities and pipeline abandonment or removal activities and completion of remediation activities). Until such time as all of the Plugging and Abandonment Obligations with respect to the Assets have been performed, Seller reserves access rights to the Assets for the limited purpose of performing, documenting and/or verifying the Plugging and Abandonment Obligations, as needed.

(c) The provisions of this Section 7.4 are (i) binding on all successors and assigns of Purchaser with respect to any of the Assets and (ii) covenants running with the Assets. For the avoidance of doubt, in the event Purchaser sells, assigns or otherwise transfers less than all of the Wells to a transferee, the transferee shall be required to obtain a Performance Bond as set forth herein with respect to such transferee shall apply as to the Assets so sold, assigned or otherwise transferred, but shall not relieve Purchaser's obligation to maintain the Performance Bond as to any Assets it retains.

Section 7.5 **HSR Act**. No later than May 27, 2022, the Parties shall prepare and file with the Department of Justice Antitrust Division and the Federal Trade Commission the notification and reports form required for the transaction contemplated by the Agreement by the HSR Act, and all premerger notification filings required, if any, under comparable laws of other jurisdictions. The Parties shall request early termination of the HSR Act waiting period. Each Party shall: (a) cooperate fully with each other and shall furnish to the other such necessary information and reasonable assistance as the other may reasonably request in connection with its preparation of any filings under any premerger notification rules; (b) furnish the other Party with copies of any notices, correspondence, or other written communication received by it from any governmental authority relating to such filings; (c) permit the other Party to review and incorporate the other Party's reasonable comments in any communication given by it to any governmental authority in a manner that protects attorney client or attorney work product privilege; and (d) give the other Party reasonable prior notice of, and an opportunity to participate in any meeting with any governmental authority with respect to such filings. Each Party shall use commercially reasonable efforts to take all actions reasonably necessary and appropriate in connection with any HSR Act filing or other premerger notification to satisfy the conditions to closing and consummate the transaction contemplated by this Agreement as promptly as practicable. The Parties agree to respond promptly to any inquiries or requests for information or documentary material from the Department of Justice Antitrust Division or the Federal Trade Commission concerning such filings and to comply in all material respects with the filing requirements of the HSR Act. Notwithstanding anything in this Agreement to the contrary, in no event will either Party be obligated to propose or agree to accept any undertaking or condition, to enter into any consent decree, to make any material divestiture, to accept any material operational restriction, or take any other action that, in the reasonable judgment of the Party, could be expected to materially limit the right of the Party to own or operate all or any portion of its businesses or assets. For the avoidance of doubt, nothing in this Section 7.5 or this Agreement shall require Purchaser or Seller to propose, negotiate, effect or agree to, the sale, divestiture, license or other disposition of any assets or businesses of Purchaser or Seller (including the Assets) or otherwise take any action that limits the freedom of action with respect to, or its ability to retain or operate any of the businesses or assets of Purchaser or Seller or the Assets. Any fees or expenses related to filings required by this Section 7.5 shall be paid by the Purchaser **.**

ARTICLE VIII
PURCHASER'S CONDITIONS TO CLOSING

The obligations of Purchaser to consummate the transactions provided for herein are subject, at the option of Purchaser, to the fulfillment by Seller or waiver by Purchaser, on or prior to Closing of each of the following conditions:

Section 8.1 **Representations**. Each of the representations and warranties of Seller set forth in Article V shall be true and correct in all respects on and as of the Closing Date, with the same force and without giving effect to any qualifiers as to materiality, including a Material Adverse Effect, as though such representations and warranties had been made or given on and as of the Closing Date (other than representations and warranties that refer to a specified date, which need only be true and correct on and as of such specified date), except for those breaches, if any, of such representations and warranties that in the aggregate would not have a Material Adverse Effect.

Section 8.2 **Performance**. Seller shall have performed or complied in all material respects with all obligations, agreements, and covenants contained in this Agreement as to which performance or compliance by Seller is required prior to or at the Closing Date.

Section 8.3 **No Legal Proceedings**. No suit, action, or other proceeding by any third party shall be pending by or before any governmental authority seeking to restrain, prohibit, enjoin, or declare illegal, or seeking substantial damages in connection with, the transactions contemplated by this Agreement.

Section 8.4 **Title Defects, Environmental Defects and Casualty Loss** . Without giving effect to the Aggregate Title Defect Deductible or the Aggregate Environmental Defect Deductible, the sum of (a) the Title Defect Amounts of all uncured Title Defects exceeding the Individual Title Defect Threshold, plus (b) all Remediation Amounts for uncured Environmental Defects exceeding the Individual Environmental Defect Threshold, plus (c) the amount of loss in value of the Assets resulting from all Casualty Losses, as determined in accordance with Section 4.13, minus the aggregate Title Benefit Amounts of all Title Benefits as determined pursuant to Section 4.7, shall be less than twenty percent (20%) of the Purchase Price.

Section 8.5 **HSR Act**. If applicable, (a) the waiting period under the HSR Act applicable to the consummation of the transactions contemplated

hereby shall have expired, (b) notice of early termination shall have been received, or (c) a consent order shall have been issued (in form and substance satisfactory to Seller) by or from applicable governmental authorities.

Section 8.6 **Closing Certificate**. Seller shall have executed and delivered to Purchaser an officer's certificate, dated as of the Closing Date and substantially in the form of Exhibit F, certifying that the conditions set forth in Section 8.1 and Section 8.2 have been fulfilled and, if applicable, any exceptions to such conditions that have been waived by Purchaser.

Section 8.7 **Closing Deliverables**. Seller shall have delivered (or be ready, willing and able to deliver at Closing) to Purchaser the documents required to be delivered by Seller at Closing.

ARTICLE IX
SELLER'S CONDITIONS TO CLOSING

The obligations of Seller to consummate the transactions provided for herein are subject, at the option of Seller, to the fulfillment by Purchaser or waiver by Seller on or prior to Closing of each of the following conditions:

Section 9.1 **Representations**. Each of the representations and warranties of Purchaser set forth in Article VI shall be true and correct in all material respects on and as of the Closing Date, with the same force and effect as though such representations and warranties had been made or given on and as of the Closing Date (other than representations and warranties that refer to a specified date, which need only be true and correct on and as of such specified date).

Section 9.2 **Performance**. Purchaser shall have performed or complied in all material respects with all obligations, agreements, and covenants contained in this Agreement as to which performance or compliance by Purchaser is required prior to or at the Closing Date.

Section 9.3 **No Legal Proceedings**. No suit, action, or other proceeding by any third party shall be pending by or before any governmental authority seeking to restrain, prohibit, or declare illegal, or seeking substantial damages in connection with, the transactions contemplated by this Agreement.

Section 9.4 **Title Defects, Environmental Defects and Casualty Losses**. Without giving effect to the Aggregate Title Defect Deductible or the Aggregate Environmental Defect Deductible, the sum of (a) the Title Defect Amounts of all uncured Title Defects exceeding the Individual Title Defect Threshold, plus (b) all Remediation Amounts for uncured Environmental Defects exceeding the Individual Environmental Defect Threshold, plus (c) the amount of loss in value of the Assets resulting from all Casualty Losses, as determined in accordance with Section 4.13, minus the aggregate Title Benefit Amounts of all Title Benefits as determined pursuant to Section 4.7, shall be less than twenty percent (20%) of the Purchase Price.

Section 9.5 **HSR Act**. If applicable (a) the waiting period under the HSR Act applicable to the consummation of the transactions contemplated hereby shall have expired, (b) notice of early termination shall have been received, or (c) a consent order shall have been issued (in form and substance satisfactory to Seller) by or from applicable governmental authorities.

Section 9.6 **Closing Certificate**. Purchaser shall have executed and delivered to Seller an officer's certificate, dated as of the Closing Date and substantially in the form of Exhibit G, certifying that the conditions set forth in Section 9.1 and Section 9.2 have been fulfilled and, if applicable, any exceptions to such conditions that have been waived by Seller.

Section 9.7 **Closing Deliverables**. Purchaser shall have delivered (or be ready, willing and able to deliver at Closing) to Seller the documents and other items required to be delivered by Purchaser at Closing.

ARTICLE X
CLOSING

Section 10.1 **Time and Place of Closing**. The consummation of the transactions contemplated by this Agreement (the " **Closing**") shall be held on or before June 30, 2022 (the "**Scheduled Closing Date**"), at Seller's offices at 22777 Springwoods Village Parkway, Spring, Texas 77389; provided that if all of the conditions to that Closing are not satisfied as of the Scheduled Closing Date, then Closing shall be held three (3) Business Days after all such conditions have been satisfied or waived, or such other date as the Parties may mutually agree in writing, but in no event later than September 30, 2022 (the "**Longstop Date**").

Section 10.2 **Calculation of Adjusted Purchase Price**. Not less than five (5) Business Days prior to the Closing, Seller shall prepare and submit to Purchaser for review a draft settlement statement (the "**Preliminary Settlement Statement**") that shall set forth (a) the Adjusted Purchase Price, reflecting each adjustment made in accordance with this Agreement as of the date of preparation of such Preliminary Settlement Statement and the itemized calculation (recognizing that Seller may elect to use reasonable good faith estimates in the Preliminary Settlement Statement) and (b) the designation of Seller's accounts for the wire transfers of funds at Closing. Within three (3) Business Days of receipt of the Preliminary Settlement Statement, Purchaser will deliver to Seller a written report containing all changes with the explanation therefor that Purchaser proposes to be made to the Preliminary Settlement Statement. The Preliminary Settlement Statement, as agreed upon by the Parties, will be used to adjust the Purchase Price at Closing; provided that if the Parties do not agree upon an adjustment set forth in the Preliminary Settlement Statement, then the amount of such adjustment used to adjust the Purchase Price at Closing shall be that amount set forth in the draft Preliminary Settlement Statement delivered by Seller to Purchaser pursuant to this Section 10.2. Final adjustments to the Purchase Price shall be made pursuant to Section 12.1 below.

Section 10.3 **Failure to Close**. If the conditions to Closing have been satisfied or waived on or before the Longstop Date, and either Party fails to close, the Party failing to close shall be deemed to have breached the obligations it has undertaken hereunder to perform at Closing, and shall be subject to the provisions of Article XV below.

Section 10.4 **Closing Obligations**. At the Closing:

(a) Seller and Purchaser shall execute, acknowledge and deliver the Assignment and Surface Fee Deed in sufficient duplicate originals to allow recording in all appropriate counties;

(b) Seller and Purchaser shall execute and deliver assignments, on appropriate forms, of state, federal, tribal and other Leases of governmental authorities included in the Assets in sufficient counterparts to facilitate filing with the applicable governmental authorities;

(c) Seller and Purchaser shall acknowledge the Preliminary Settlement Statement;

(d) Seller or, if applicable, its regarded parent, shall deliver to Purchaser a non-foreign entity affidavit in the form of Exhibit H;

(e) Seller, if and as applicable, shall deliver all appropriate or required forms, applications, notices, permit transfers, declarations, to be filed with the appropriate governmental authorities having jurisdiction with respect to the transfer of operatorship to Purchaser of the Assets that are operated by Seller immediately prior to the Closing;

(f) Seller and Purchaser shall execute, acknowledge and deliver transfer orders or letters-in-lieu thereof in customary form prepared by Seller directing all purchasers of production to make payment to Purchaser of proceeds attributable to production from the Assets from and after Closing;

(g) Purchaser shall make the payment described in Section 3.4(b);

(h) Purchaser shall furnish evidence that all requirements to own and/or operate the Assets, including bonds and permits, from any governmental authority having jurisdiction, or as required by any Existing Contract, have been satisfied;

(i) Purchaser will execute and deliver the Performance Bond;

(j) Seller and Purchaser shall execute a Transition Services Agreement in a form substantially similar to the form set forth on Exhibit J; and

(k) Seller and Purchaser shall execute such other instruments and take such other actions as may be necessary to carry out their respective obligations under this Agreement.

ARTICLE XI
POST-CLOSING OBLIGATIONS

Section 11.1 **Assumed Obligations**. Without limiting Purchaser's rights to indemnity under Section 11.3 (if applicable), if the Closing occurs, from and after Closing, Purchaser hereby assumes and agrees to fulfill, perform, pay and discharge all obligations and Losses, known or unknown, with respect to the Assets or the ownership, use or operation thereof, regardless of whether such obligations or Losses arose prior to, on or after the Effective Time, including obligations and Losses relating to the following (all of such obligations and Losses, the "**Assumed Obligations**"):

(a) the payment of owners of Working Interests, royalties, overriding royalties and other interests all revenues attributable thereto, including the Suspense Funds transferred to Purchaser in accordance with Section 12.2;

(b) fully performing all plugging, decommissioning and abandonment obligations with respect to the Assets or the ownership, use or operation thereof (the "**Plugging and Abandonment Obligations**"), regardless of whether such obligations arose prior to, on, or after the Effective Time, in a good and workmanlike manner and in compliance with all Laws, including:

(i) the necessary and proper plugging, replugging, and abandonment of all wells on the Assets, whether plugged and abandoned prior to, on, or after the Effective Time;

(ii) the necessary and proper removal, abandonment, decommissioning, and disposal of all structures, pipelines, facilities, equipment, abandoned property, and junk located on or comprising part of the Assets;

(iii) the necessary and proper capping and burying of all flow lines and pipelines associated with the Assets and located on or comprising part of the Assets; and

(iv) the necessary and proper restoration of the property, both surface and subsurface, as may be required by Laws or contract;

(c) furnishing make-up gas according to the terms of applicable Existing Contracts, and to satisfy all other Imbalances, if any;

(d) the environmental and physical condition of the Assets, whether such condition existed prior to, on or after the Effective Time, including Environmental Defects, if any, with respect to the Assets, whether or not asserted by Purchaser in accordance with this Agreement, including the clean-up, restoration and remediation of all sites associated with the Assets in accordance with applicable Law, including all Environmental Laws;

(e) obligations or Losses under or imposed on the lessee, owner, or operator under the Leases, the Existing Contracts and applicable Laws; and

(f) storing, handling, transporting and disposing of or discharging all materials, substances and wastes from the Assets (including produced water, drilling fluids, NORM, and other wastes), whether present prior to, on or after the Effective Time, in accordance with applicable Laws and contracts.

Section 11.2 **Purchaser's Indemnity**. Effective upon Closing, **REGARDLESS OF FAULT**, Purchaser shall protect, defend, indemnify and hold harmless the Seller Group from and against any and all Losses arising out of, attributable to, based upon or related to:

(a) any breach of any representation or warranty made by Purchaser in Article VI of this Agreement, in the certificate delivered by Purchaser pursuant to Section 9.6, or any covenant or agreement of Purchaser contained in this Agreement; or

(b) any of the Assumed Obligations.

Section 11.3 **Seller's Indemnity**. Effective upon Closing, **REGARDLESS OF FAULT**, Seller shall protect, defend, indemnify and hold harmless the Purchaser Group from and against any and all Losses arising out of, attributable to, based upon or related to:

(a) any breach of any representation or warranty made by Seller in Article V of this Agreement, in the certificate delivered by Seller pursuant to Section 8.6; or any covenant or agreement of Seller contained in this Agreement;

(b) the Excluded Assets;

(c) Seller's failure to pay any royalties or other burdens on production to the extent relating to the production of Hydrocarbons from the Assets prior to the Effective Time;

(d) any personal injury or death attributable to Seller's or its Affiliates' operation of the Assets prior to the Effective Time, to the extent a claim relating thereto is asserted by third parties not affiliated with Purchaser and for which Purchaser's indemnity in Section 7.3 does not apply;

(e) the litigation and/or administrative proceedings set forth on Schedule 11.3(e); or

(f) matters related to taxes accruing prior to the Effective Time and more fully set forth in Article XIII.

Seller agrees Section 11.12 in no way limits the rights of the Purchaser Group under this Section 11.3.

Section 11.4 **Regardless of Fault**. The phrase "**REGARDLESS OF FAULT**" means **WITHOUT REGARD TO THE CAUSE OR CAUSES OF ANY CLAIM, INCLUDING WHETHER OR NOT A CLAIM IS CAUSED IN WHOLE OR IN PART BY**:

(a) **THE NEGLIGENCE (WHETHER SOLE, JOINT, CONCURRENT, COMPARATIVE, CONTRIBUTORY, ACTIVE, PASSIVE, GROSS OR OTHERWISE) WILLFUL MISCONDUCT, STRICT LIABILITY, OR OTHER FAULT OF ANY OF THE INDEMNIFIED PARTIES; AND/OR**

(b) **A PRE-EXISTING DEFECT, WHETHER PATENT OR LATENT, WITH RESPECT TO THE PROPERTY OF ANY OF THE PARTIES, THEIR AFFILIATES OR THEIR RESPECTIVE REPRESENTATIVES; AND/OR THE UNSEAWORTHINESS OF ANY VESSEL OR UNAIRWORTHINESS OF ANY AIRCRAFT OR MECHANICAL FAILURE OF ANY VEHICLE OF A PARTY, ITS AFFILIATES OR ANY OF THEIR RESPECTIVE REPRESENTATIVES, WHETHER CHARTERED, LEASED, OWNED, OR FURNISHED OR PROVIDED BY ANY OF THE PARTIES, THEIR AFFILIATES OR ANY OF THEIR RESPECTIVE REPRESENTATIVES.**

Section 11.5 **Limitation on Liability**.

(a) Seller shall not have any liability for any indemnification under Section 11.3(a) for any individual Loss unless the amount of such Loss exceeds two million five hundred thousand dollars ($2,500,000.00), and (ii) until and unless the aggregate amount of all such Losses for which Claim Notices are delivered by Purchaser exceeds fifteen million dollars ($15,000,000.00) (the "**Indemnity Deductible**") and then only to the extent such Losses exceed the Indemnity Deductible.

(b) Notwithstanding anything to the contrary contained in this Agreement, Seller shall not be required to indemnify the Purchaser Group (i) under Section 11.3(a) for aggregate Losses in excess of twenty-five percent (25%) of the Purchase Price, and (ii) otherwise under the terms of this Agreement for aggregate Losses in excess of one hundred percent (100%) of the Adjusted Purchase Price.

Section 11.6 **Exclusive Remedy**. Notwithstanding anything to the contrary contained in this Agreement, except with respect to any breach by Purchaser of its obligations to maintain the Performance Bond from and after Closing (in which event, Seller shall have all remedies at law or in equity on account of such breach), from and after the Closing, Section 4.8(c), Section 7.3, Section 11.2, Section 11.3, Section 11.12 and Section 12.2 contain the Parties' exclusive remedy against each other with respect to the transactions contemplated hereby and the sale of the Assets, including breaches of the representations, warranties, covenants and agreements of the Parties contained in this Agreement or in any document delivered pursuant to this Agreement.

Section 11.7 **Indemnification Procedures**. All claims for indemnification under this Agreement shall be asserted and resolved as follows:

(a) For purposes of this Agreement, the term "**Indemnifying Party**" when used in connection with particular Losses shall mean the Party or Parties having an obligation to indemnify another Party or Parties with respect to such Losses pursuant to such sections, and the term "**Indemnified Party**" when used in connection with particular Losses shall mean the Party or Parties having the right to be indemnified with respect to such Losses by another Party or Parties pursuant to such sections.

(b) To make claim for indemnification under this Agreement, an Indemnified Party shall notify the Indemnifying Party of its claim under this Section 11.7, including the specific details of and specific basis under this Agreement for its claim (the " **Claim Notice**"). In the event that the claim for

indemnification is based upon a claim by an unaffiliated third party against the Indemnified Party (a "**Third Party Claim**"), the Indemnified Party shall provide its Claim Notice promptly after the Indemnified Party has actual knowledge of the Third Party Claim and shall enclose a copy of all papers (if any) served with respect to the Third Party Claim; provided that the failure of any Indemnified Party to give notice of a Third Party Claim as provided in this Section 11.7 shall not relieve the Indemnifying Party of its indemnification obligations under this Agreement, except to the extent (and then only to the extent) such failure materially prejudices the Indemnifying Party's ability to defend against the claim. In the event that the claim for indemnification is based upon an inaccuracy or breach of a representation, warranty, covenant or agreement, the Claim Notice shall specify the representation, warranty, covenant or agreement that was inaccurate or breached.

(c) In the case of a claim for indemnification based upon a Third Party Claim, the Indemnifying Party shall have thirty (30) days from its receipt of the Claim Notice to notify the Indemnified Party whether it admits or denies its liability to defend the Indemnified Party against such Third Party Claim at the sole cost and expense of the Indemnifying Party. The Indemnified Party is authorized, prior to and during such thirty (30) day period, to file any motion, answer or other pleading that it shall deem necessary or appropriate to protect its interests or those of the Indemnifying Party and that is not prejudicial to the Indemnifying Party.

(d) If the Indemnifying Party admits its liability, it shall have the right and obligation to diligently defend, at its sole cost and expense, the Third Party Claim. The Indemnifying Party shall have full control of such defense and proceedings, including any compromise or settlement thereof unless the compromise or settlement includes the payment of any amount by (because of the Indemnity Deductible or otherwise), the performance of any obligation by or the limitation of any right or benefit of, the Indemnified Party, in which event such settlement or compromise shall not be effective without the consent of the Indemnified Party, which shall not be unreasonably withheld or delayed. If requested by the Indemnifying Party, the Indemnified Party agrees to cooperate in contesting any Third Party Claim which the Indemnifying Party elects to contest. The Indemnified Party may participate in, but not control, at its own expense, any defense or settlement of any Third Party Claim controlled by the Indemnifying Party pursuant to this Section 11.7. An Indemnifying Party shall not, without the written consent of the Indemnified Party, (i) settle any Third Party Claim or consent to the entry of any judgment with respect thereto which does not include an unconditional written release of the Indemnified Party from all liability in respect of such Third Party Claim or (ii) settle any Third Party Claim or consent to the entry of any judgment with respect thereto in any manner that may materially and adversely affect the Indemnified Party (other than as a result of money damages covered by the indemnity).

(e) If the Indemnifying Party does not admit its liability (which it will be deemed to have so done if it fails to timely respond) or admits its liability but fails to diligently prosecute or settle the Third Party Claim, then the Indemnified Party shall have the right to defend against the Third Party Claim at the sole cost and expense of the Indemnifying Party, with counsel of the Indemnified Party's choosing, subject to the right of the Indemnifying Party to admit its liability and assume the defense of the Claim at any time prior to settlement or final determination thereof. If the Indemnifying Party has not yet admitted its liability for a Third Party Claim, the Indemnified Party shall send written notice to the Indemnifying Party of any proposed settlement and the Indemnifying Party shall have the option for ten (10) days following receipt of such notice to (i) admit in writing its liability for the Third Party Claim and (ii) if liability is so admitted, reject, in its reasonable judgment, the proposed settlement.

(f) In the case of a claim for indemnification not based upon a Third Party Claim, the Indemnifying Party shall have thirty (30) days from its receipt of the Claim Notice to (i) cure the Losses complained of, (ii) admit its liability for such Loss or (iii) dispute the claim for such Losses. If the Indemnifying Party does not notify the Indemnified Party within such thirty (30) day period that it has cured the Losses or that it disputes the claim for such Losses, then the Indemnifying Party shall be deemed to be disputing the claim for such Losses.

Section 11.8 **Survival**.

(a) The (i) representations and warranties of Seller in Article V and in the certificate delivered at Closing by Seller pursuant to Section 8.6, and (ii) the covenants and agreements of Seller contained herein to be performed prior to Closing, shall, in each case, survive the Closing for a period of fourteen (14) months after the Closing Date. The representations and warranties of Purchaser contained herein shall survive the Closing for a period of fourteen (14) months, and the covenants and agreements of Purchaser contained herein shall survive without time limit.

(b) Subject to Section 11.8(a) and except as set forth in Section 11.8(c), the remainder of this Agreement shall survive the Closing without time limit. Representations, warranties, covenants and agreements shall be of no further force and effect after the date of their expiration; provided that there shall be no termination of any bona fide claim asserted pursuant to this Agreement with respect to such a representation, warranty, covenant or agreement prior to its expiration date.

(c) The indemnities in Section 11.2(a) and Section 11.3(a) shall terminate as of the termination date of each respective representation, warranty, covenant or agreement that is subject to indemnification, except, in each case, as to matters for which a specific written claim for indemnity has been delivered to the Indemnifying Party on or before such termination date. The indemnities in Section 11.3(c), Section 11.3(d), Section 11.3(e) and Section 11.3(f) shall survive the Closing for a period of eighteen (18) months after the Closing Date. The indemnities in Section 11.2(b) and Section 11.3(b) shall survive the Closing without time limit.

Section 11.9 **Waiver of Right to Rescission**. Seller and Purchaser acknowledge that, following the Closing, the payment of money, as limited by the terms of this Agreement, shall be adequate compensation for breach of any representation, warranty, covenant or agreement contained herein or for any other claim arising in connection with or with respect to the transactions contemplated by this Agreement. As the payment of money shall be adequate compensation, following the Closing, Purchaser and Seller waive any right to rescind this Agreement or any of the transactions contemplated hereby.

Section 11.10 **Non-Compensatory Damages**. No Indemnified Parties shall be entitled to recover from an Indemnifying Party or its Affiliates any indirect, special, incidental, consequential, punitive, exemplary, remote or speculative damages or damages for lost profits of any kind arising under or in

connection with this Agreement or the transactions contemplated hereby, except to the extent any such Party suffers such damages to a third party, which damages (including costs of defense and reasonable attorneys' fees incurred in connection with defending against such damages) shall not be excluded by this provision as to recovery hereunder.

Section 11.11 **Insurance**. The amount of any Losses for which any of the Purchaser Group or Seller Group is entitled to indemnification under this Agreement or in connection with or with respect to the transactions contemplated by this Agreement shall be reduced by any corresponding insurance proceeds actually received by any such indemnified Party under any insurance arrangements.

Section 11.12 **ExxonMobil Insurance**. Exxon Mobil Corporation, along with its predecessors and affiliates, including Seller, may have or have had coverage under various insurance policies ("**ExxonMobil Policies**") covering the Assets. Purchaser agrees that: (a) no insurance coverage shall be provided under the ExxonMobil Policies to Purchaser, including any policies insured or reinsured by Ancon Insurance Company Inc. or Petroleum Casualty Company (collectively "**Captives**"), (b) from and after Closing, Purchaser assumes any and all responsibilities for effecting and maintaining insurance in respect of the Assets and replacing Captives, where applicable; (c) Purchaser shall indemnify and defend Seller, its parents and Affiliates (including Captives) against, and shall hold them harmless from, any claim made after the Closing against any of the ExxonMobil Policies with respect to the Assets, including all costs and expenses (including attorneys' fees) related thereto.

ARTICLE XII
CERTAIN ADDITIONAL AGREEMENTS

Section 12.1 **Post-Closing Settlement Statement**.

(a) As soon as reasonably practicable after the Closing Date, but in no event longer than the later of (a) one hundred and fifty (150) days after the Closing Date, or (b) ninety (90) days after the end of the term of the Transition Services Agreement (the "**Final Settlement Date**"), Seller shall prepare, in accordance with this Agreement, and deliver to Purchaser, a final statement (the "**Final Settlement Statement**") setting forth each adjustment to the Purchase Price in accordance with Section 3.2 and Section 3.3. The Final Settlement Statement also will include any adjustments necessary because Seller chose to attempt to cure a Title Defect under Section 4.3 of this Agreement. As soon as reasonably practicable, but in any event within thirty (30) days after receipt of the Final Settlement Statement, Purchaser shall return to Seller a written report containing any proposed changes to the Final Settlement Statement and an explanation of any such changes and the reasons therefor (the "**Dispute Notice**"). Purchaser's failure to deliver to Seller a Dispute Notice detailing proposed changes to the Final Settlement Statement by such date shall be deemed to be an acceptance by Purchaser of the Final Settlement Statement delivered by Seller, and Seller's determinations with respect to all such adjustments in the Final Settlement Statement that are not addressed in the Dispute Notice shall prevail. The Parties shall undertake to agree on the Adjusted Purchase Price no later than the later of (a) one hundred eighty (180) days after the Closing Date, or (b) one hundred twenty (120) days after the end of the term of the Transition Services Agreement (the "**Target Settlement Date**"). If the final Purchase Price set forth in the Final Settlement Statement is mutually agreed upon by Seller and Purchaser prior to the Target Settlement Date or is deemed agreed pursuant to the foregoing (or determined by the Agreed Accounting Firm pursuant to Section 12.1(b)), the Final Settlement Statement and such final Adjusted Purchase Price (the "**Final Price**"), shall be final and binding on the Parties. Any difference in the Adjusted Purchase Price as paid at Closing pursuant to the Preliminary Settlement Statement and the Final Price shall be paid by the owing Party on or before the date that is ten (10) days following agreement or deemed agreement (or determination by the Agreed Accounting Firm, as applicable) (such date, the "**Final Payment Date**") to the owed Party. All amounts paid or transferred pursuant to this Section 12.1(a) shall be delivered in United States currency by wire transfer of immediately available funds to the account specified in writing by the relevant Party.

(b) If Seller and Purchaser cannot reach agreement on the Final Price by the Target Settlement Date, either Party may refer the remaining issues in dispute to the Agreed Accounting Firm. If such issues in dispute are submitted to the Agreed Accounting Firm for resolution, Seller and Purchaser will each enter into a customary engagement letter with the Agreed Accounting Firm at the time the issues in dispute are submitted to the Agreed Accounting Firm. Within ten (10) days of the appointment of the Agreed Accounting Firm, each of Seller and Purchaser shall present the Agreed Accounting Firm with its position on the issues in dispute with respect to the Final Price, and all other supporting information that it deems relevant, with a copy to the other Party. The Agreed Accounting Firm shall also be provided with a copy of this Agreement by Seller. Within forty-five (45) days after receipt of such materials, the Agreed Accounting Firm shall make its determination by selecting the position of either Seller or Purchaser for each of the issues presented to the Agreed Accounting Firm, which determination shall be final and binding upon all Parties and, absent manifest error, without right of appeal. In making its determination, the Agreed Accounting Firm shall be bound by the standards and rules set forth in Article IV (if applicable) and this Section 12.1 with regard to valuations. The Agreed Accounting Firm may not award damages, interest or penalties to either Party with respect to any matter. Seller and Purchaser shall each bear its own legal fees and other costs of presenting its case. Each Party shall bear one-half of the costs and expenses of the Agreed Accounting Firm.

Section 12.2 **Suspended Funds**. Seller will provide Schedule 12.2, a listing showing all estimated net proceeds from production attributable to the Assets (including positive and negative balances) which are held in suspense by Seller as of the Closing Date (the "**Suspense Funds**") because of lack of identity or address of owners, title defects, change of ownership, netting, over/under distributions or similar reasons. Together with the Final Settlement Statement, Seller shall provide Purchaser an updated Schedule 12.2, and shall credit Purchaser in the Final Settlement Statement an amount equal to the Suspense Funds reflected on such updated Schedule 12.2. For avoidance of doubt, in updating such Schedule, Seller shall have the option, but not the obligation, to retain any portion of the Suspense Funds attributable to the Assets prior to the Effective Time. Except as set forth in the preceding sentence, Purchaser shall be responsible for proper distribution of all Suspense Funds to the Persons lawfully entitled to them, and effective upon Closing, Purchaser hereby protects, defends, indemnifies and holds Seller harmless against any and all Losses associated with claims against the Suspense Funds solely as to Suspense Funds transferred to Purchaser.

Section 12.3 **Receipts and Credits**. Subject to the following sentence, after the Parties' agreement (or deemed agreement) upon the Final Settlement Statement, then, to the extent not accounted for in the Final Settlement Statement, if (i) any Party receives monies belonging to the other, including

proceeds of production, then such amount shall, within five (5) Business Days after the end of the month in which such amounts were received, be paid over to the proper Party, (ii) any Party pays monies for Property Expenses which are the obligation of the other Party hereto, then such other Party shall, within five (5) Business Days after the end of the month in which the applicable invoice and proof of payment of such invoice were received, reimburse the Party which paid such Property Expenses, (iii) a Party receives an invoice of an expense or obligation which is owed by the other Party, such Party receiving the invoice shall promptly forward such invoice to the Party obligated to pay the same, and (iv) an invoice or other evidence of an obligation is received by a Party, which is partially an obligation of both Seller and Purchaser, then the Parties shall consult with each other, and each shall promptly pay its portion of such obligation to the obligee. Notwithstanding anything herein to the contrary, from eighteen (18) months after the Closing Date, Seller shall have no liabilities or obligations with respect to pre-Effective Time Property Expenses. Each of Seller and Purchaser shall be permitted to offset any Property Expenses owed by such Party to the other Party pursuant to this Section 12.3 against amounts owing by the second Party to the first Party pursuant to this Section 12.3, but not otherwise.

Section 12.4 **Records; Retention**.

(a) Within sixty (60) days after Closing, Seller will deliver to Purchaser, at Purchaser's cost and reasonable request, copies of files, records, and data relating to the Assets (the "**Records**") including title records (including abstracts of title, title opinions, title reports, and title curative documents), the Existing Contracts, correspondence and all related matters in the possession of Seller (but excluding corporate, financial, tax, and general accounting records, any document subject to the attorney-client or other privilege, and any document, data, or other information where disclosure is restricted by agreement with a third party). Purchaser must advise Seller before Closing which such files, records and data it wants copied.

(b) Purchaser, for a period of seven (7) years following the Closing, will (a) retain the Records, (b) provide Seller, its Affiliates and its and their officers, employees and representatives with access to the Records (to the extent that Seller has not retained the original or a copy) during normal business hours for review and copying at Seller's expense, and (c) provide Seller, its Affiliates and its and their officers, employees and representatives with access, during normal business hours, to materials received or produced after the Closing relating to any indemnity claim made under Section 11.3 for review and copying at Seller's expense.

Section 12.5 **Recording**. As soon as practicable after Closing, Purchaser, at its sole cost, shall record the Assignment and Surface Fee Deed in the appropriate counties and provide Seller with copies of the recorded Assignment and Surface Fee Deed.

Section 12.6 **Filing for Approvals**.

(a) Purchaser, at its sole cost, shall no later than thirty (30) days after Closing:

(i) file for approval with any governmental authorities having jurisdiction (including state, federal, tribal, and local) the transfer documents required to effectuate the transfer of the Assets;

(ii) execute, acknowledge (if necessary), and exchange, as applicable, any applications necessary to transfer to Purchaser any transferable Permits to which the Assets are subject, and which Seller has agreed to transfer under this Agreement;

(iii) file all appropriate forms, declarations, and bonds (or other authorized forms of security) with all applicable governmental authorities and third parties relative to Purchaser's assumption of operations or the transfer of the Assets; and

(iv) prepare and execute appropriate change of operator notices and third-party ballots required under applicable operating agreements.

(b) After Closing, the Parties further agree to take all other actions required of it by governmental authorities having jurisdiction to obtain all requisite regulatory approval with respect to this transaction, and to use their commercially reasonable efforts to obtain unconditional approval by such authorities of any transfer documents requiring governmental approval in order for Purchaser to be recognized as owner of the Assets. Each Party agrees to provide the other Party with approved copies of the documents contemplated by this Section 12.6, as soon as they are available.

Section 12.7 **Further Cooperation**. After Closing, Seller and Purchaser agree to take such further actions and to execute, acknowledge and deliver all such further documents that are reasonably necessary or useful in carrying out the purposes of this Agreement or of any document delivered pursuant to this Agreement.

Section 12.8 **Audited Financials**. As soon as is reasonably practicable after the Execution Date, Seller shall initiate an audit process , to be conducted by an independent accounting firm, to prepare audited financial statements of the Assets required of Purchaser pursuant to Securities and Exchange Commission ("**SEC**") Regulation S-X and Rule 3-05. Seller shall use its commercially reasonable efforts to cause the audit process to be completed in a timely fashion; provided that the Parties acknowledge and agree that the audit will be completed post-Closing. Such audit shall be at the sole expense of Purchaser, and the scope of such audit (including the time periods covered thereby) shall be limited to what is minimally required to meet the applicable SEC regulations, as determined by the appointed accounting firm, and taking into account the ultimate Closing Date. Seller shall have the sole right to select the accounting firm (and which Party engages the accounting firm), and the processes and procedures relating to the audit shall be subject to Seller's prior approval (provided that the processes and procedures are sufficient to meet the minimum requirements of the applicable SEC Regulations, as determined by the appointed accounting firm). Without limiting the foregoing, unless otherwise agreed by Seller, the accounting firm shall not disclose information to Purchaser that is proprietary to Seller or its Affiliates, including gas and liquids sales prices. Subject to Seller's compliance with the terms of this Section 12.8, Purchaser shall have no claim against Seller, and shall release, indemnify and hold the Seller Group harmless from, any and all Losses arising out of, attributable to, based upon, or related to the audit, including without limitation all internal and external costs and expenses associated with Seller's support of the audit. For the avoidance of doubt, in the

event this Agreement is terminated pursuant to any provision of Section 15.1 (other than due to breach of this Agreement by Seller), Seller shall have no obligation to continue the audit process and Purchaser shall indemnify Seller as set forth in this Section 12.8 for all Losses incurred by Seller through the effective date of termination.

ARTICLE XIII
TAXES

Section 13.1 **Apportionment of Ad Valorem and Property Taxes**. All Property Taxes with respect to the tax period in which the Effective Time occurs shall be apportioned as of the Effective Time between Seller and Purchaser. The Parties will make final settlement of all Property Taxes by estimating the Property Taxes to be due for the tax period in which the Effective Time occurs based on the Property Taxes assessed and paid for the immediately prior tax period. Such settlement of taxes shall be part of the Final Settlement Statement between the Parties. If Property Taxes have not been paid before Closing, Purchaser shall pay the Property Taxes and shall be credited for Seller's portion of the Property Taxes under Section 3.3(g). If Property Taxes have been paid before Closing, Seller shall be credited for Purchaser's portion of the Property Taxes under Section 3.2(c). Purchaser shall be responsible for all subsequent Property Taxes and interest that are applied to the Assets for the periods or portions thereof from and after the Effective Time.

Section 13.2 **Sales Taxes**. The Purchase Price is exclusive of any sales taxes or other similar taxes in connection with the sale of the Assets. If any sales or other similar taxes are assessed, Purchaser shall be solely responsible for the payment of such taxes. Purchaser shall be responsible for any applicable conveyance, transfer and recording fees, and real estate transfer stamps or taxes imposed on the transfer of the Assets pursuant to this Agreement. If Seller is required to pay any such taxes, then Purchaser will reimburse Seller for such amounts.

Section 13.3 **Severance and Production Taxes**. Without duplication, Seller shall bear all Severance Taxes, to the extent attributable to production from the Assets before the Effective Time. Purchaser shall bear all such Severance Taxes on production from the Assets on and after the Effective Time. Seller shall withhold and pay on behalf of Purchaser all such Severance Taxes on production from the Assets between the Effective Time and the Closing Date, if the Closing Date follows the Effective Time, and the amount of any such payment shall be reimbursed to Seller as a Closing adjustment to the Purchase Price pursuant to Section 12.1. If either Party pays Severance taxes owed by the other under this Agreement, upon receipt of evidence of payment the nonpaying Party will reimburse the paying Party promptly for its proportionate share of such taxes.

Section 13.4 **Cooperation**. Each Party shall provide the other Party with reasonable information which may be required by the other Party for the purpose of preparing tax returns and responding to any audit by any taxing jurisdiction. Each Party shall cooperate with all reasonable requests of the other Party made in connection with contesting the imposition of taxes. Notwithstanding anything to the contrary in this Agreement, neither Party shall be required at any time to disclose to the other Party any tax returns or other confidential tax information.

ARTICLE XIV
DISCLAIMERS AND WAIVERS

Section 14.1 **Condition of the Assets. PURCHASER ACKNOWLEDGES AND AGREES THAT, SUBJECT TO THE PROVISIONS OF ARTICLE IV AND PURCHASER'S RIGHTS UPON A BREACH BY SELLER OF ANY OF ITS REPRESENTATIONS OR WARRANTIES CONTAINED IN ARTICLE V, PURCHASER SHALL ACQUIRE THE ASSETS (INCLUDING ASSETS FOR WHICH A DEFECT NOTICE IS GIVEN UNDER ARTICLE IV) IN AN "AS IS, WHERE IS" CONDITION AND SHALL ASSUME ALL RISKS THAT THE ASSETS MAY CONTAIN WASTE MATERIALS (WHETHER TOXIC, HAZARDOUS, EXTREMELY HAZARDOUS OR OTHERWISE) OR OTHER ADVERSE PHYSICAL CONDITIONS, INCLUDING THE PRESENCE OF UNKNOWN ABANDONED WELLS, PUMPS, PITS, PIPELINES OR OTHER WASTE OR SPILL SITES WHICH MAY NOT HAVE BEEN REVEALED BY PURCHASER'S ENVIRONMENTAL ASSESSMENT. UPON THE OCCURRENCE OF CLOSING, BUT SUBJECT TO PURCHASER'S RIGHTS UPON A BREACH BY SELLER OF ANY OF ITS REPRESENTATIONS OR WARRANTIES CONTAINED IN ARTICLE V, IF APPLICABLE, ALL RESPONSIBILITY AND LIABILITY RELATED TO SUCH CONDITIONS, WHETHER KNOWN OR UNKNOWN, FIXED OR CONTINGENT, SHALL BE TRANSFERRED FROM SELLER TO PURCHASER WITHOUT RECOURSE AGAINST SELLER. WITHOUT LIMITING THE FOREGOING BUT SUBJECT TO PURCHASER'S RIGHTS UPON A BREACH BY SELLER OF ANY OF ITS REPRESENTATIONS OR WARRANTIES CONTAINED IN ARTICLE V, IF APPLICABLE, EFFECTIVE AS OF CLOSING, PURCHASER WAIVES ITS RIGHT TO RECOVER FROM SELLER AND FOREVER RELEASES AND DISCHARGES THE SELLER GROUP FROM ANY AND ALL LOSSES, WHETHER DIRECT OR INDIRECT, KNOWN OR UNKNOWN, FORESEEN OR UNFORESEEN, THAT MAY ARISE OR MAY HAVE ARISEN PRIOR TO, ON OR AFTER THE EFFECTIVE TIME ON ACCOUNT OF OR IN ANY WAY CONNECTED WITH THE ENVIRONMENTAL OR OTHER PHYSICAL CONDITION OF THE ASSETS OR ANY VIOLATION BY SELLER, PURCHASER OR ANY OTHER PARTY OF ANY APPLICABLE LEASE, CONTRACT OR OTHER INSTRUMENT (BUT ONLY TO THE EXTENT SUCH RELATES TO THE ENVIRONMENTAL OR PHYSICAL CONDITION OF THE PROPERTY) OR OF ANY APPLICABLE EXISTING OR FUTURE ENVIRONMENTAL LAW, REGULATION, ORDER OR OTHER DIRECTIVE OF ANY GOVERNMENTAL AUTHORITY, HAVING JURISDICTION APPLICABLE THERETO, INCLUDING WITHOUT LIMITATION, ALL ENVIRONMENTAL LAWS. PURCHASER IS AWARE THAT THE ASSETS HAVE BEEN USED FOR EXPLORATION, DEVELOPMENT AND PRODUCTION OF OIL AND GAS AND THAT THERE MAY BE PETROLEUM, PRODUCED WATER, WASTES OR OTHER MATERIALS LOCATED ON OR UNDER THE LANDS COVERED BY THE LEASES (OR LANDS POOLED OR ASSOCIATED THEREWITH). EQUIPMENT AND SITES INCLUDED IN THE ASSETS MAY CONTAIN ASBESTOS, HAZARDOUS SUBSTANCES OR NORM. NORM MAY AFFIX OR ATTACH ITSELF TO THE INSIDE OF WELLS, MATERIALS AND EQUIPMENT AS SCALE, OR IN OTHER FORMS. THE WELLS, MATERIALS AND EQUIPMENT LOCATED ON THE LEASES OR LANDS POOLED OR ASSOCIATED THEREWITH MAY CONTAIN NORM AND OTHER WASTES OR HAZARDOUS SUBSTANCES, AND NORM-CONTAINING MATERIAL AND OTHER WASTES MAY HAVE BEEN BURIED, COME IN CONTACT WITH THE SOIL, OR OTHERWISE BEEN DISPOSED OF ON OR UNDER THE LANDS COVERED BY THE LEASES OR LANDS POOLED OR ASSOCIATED THEREWITH. SPECIAL PROCEDURES MAY BE REQUIRED FOR THE REMEDIATION, REMOVAL, TRANSPORTATION OR DISPOSAL OF WASTES, ASBESTOS, HAZARDOUS SUBSTANCES AND NORM FROM THE ASSETS.**

Section 14.2 **Other Disclaimers by Seller. EXCEPT AS OTHERWISE SPECIFICALLY PROVIDED FOR IN ARTICLES IV AND V OF THIS AGREEMENT, PURCHASER ACKNOWLEDGES AND AGREES THAT SELLER EXPRESSLY DISCLAIMS AND NEGATES ANY REPRESENTATION OR WARRANTY, EXPRESS, STATUTORY OR IMPLIED, AS TO (A) TITLE TO ANY OF THE ASSETS, (B) THE CONTENTS, CHARACTER OR NATURE OF ANY REPORT OF ANY PETROLEUM ENGINEERING CONSULTANT, OR ANY ENGINEERING, GEOLOGICAL OR SEISMIC DATA OR INTERPRETATION, RELATING TO THE ASSETS, (C) THE QUANTITY, QUALITY OR RECOVERABILITY OF HYDROCARBONS IN OR FROM THE ASSETS, (D) ANY ESTIMATES OF THE VALUE OF THE ASSETS OR FUTURE REVENUES GENERATED BY THE ASSETS, (E) THE ABILITY TO PRODUCE HYDROCARBONS FROM THE ASSETS, (F) THE MAINTENANCE, REPAIR, CONDITION, QUALITY, SUITABILITY, DESIGN OR MARKETABILITY OF THE ASSETS, (G) THE CONTENT, CHARACTER OR NATURE OF ANY INFORMATION MEMORANDUM, REPORTS, BROCHURES, CHARTS OR STATEMENTS PREPARED BY SELLER OR THIRD PARTIES WITH RESPECT TO THE ASSETS, (H) ANY OTHER MATERIALS OR INFORMATION THAT MAY HAVE BEEN MADE AVAILABLE TO PURCHASER OR ITS AFFILIATES, OR ITS OR THEIR EMPLOYEES, AGENTS, CONSULTANTS, REPRESENTATIVES OR ADVISORS IN CONNECTION WITH THE TRANSACTIONS CONTEMPLATED BY THIS AGREEMENT OR ANY DISCUSSION OR PRESENTATION RELATING THERETO AND (I) ANY IMPLIED OR EXPRESS WARRANTY OF FREEDOM FROM PATENT OR TRADEMARK INFRINGEMENT. EXCEPT AS AND TO THE LIMITED EXTENT EXPRESSLY REPRESENTED OTHERWISE IN ARTICLE V OF THIS AGREEMENT, SELLER FURTHER DISCLAIMS ANY REPRESENTATION OR WARRANTY, EXPRESS, STATUTORY OR IMPLIED, OF MERCHANTABILITY, FREEDOM FROM LATENT VICES OR DEFECTS, FITNESS FOR A PARTICULAR PURPOSE OR CONFORMITY TO MODELS OR SAMPLES OF MATERIALS OF ANY OF THE ASSETS, RIGHTS OF A PURCHASER UNDER APPROPRIATE STATUTES TO CLAIM DIMINUTION OF CONSIDERATION OR RETURN OF THE PURCHASE PRICE, OR RIGHTS OF A PURCHASER UNDER DECEPTIVE TRADE PRACTICE STATUTES, CONSUMER PROTECTION STATUTES OR OTHER SIMILAR STATUTES, IT BEING EXPRESSLY UNDERSTOOD AND AGREED BY THE PARTIES THAT PURCHASER SHALL BE DEEMED TO BE OBTAINING THE ASSETS IN THEIR PRESENT STATUS, CONDITION AND STATE OF REPAIR, "AS IS" AND "WHERE IS" WITH ALL FAULTS OR DEFECTS (KNOWN OR UNKNOWN, LATENT, DISCOVERABLE OR UNDISCOVERABLE), AND THAT PURCHASER HAS MADE OR CAUSED TO BE MADE SUCH INSPECTIONS AS PURCHASER DEEMS APPROPRIATE.**

ARTICLE XV
TERMINATION

Section 15.1 **Right of Termination**. This Agreement and the transactions contemplated herein may be terminated at any time prior to the Closing:

(a) by the mutual written agreement of the Parties;

(b) by delivery of written notice from Purchaser to Seller if any of the conditions set forth in Article VIII (other than the conditions set forth in Section 8.3, Section 8.4 and Section 8.5) have not been satisfied by Seller (or waived by Purchaser) by the Longstop Date;

(c) by delivery of written notice from Seller to Purchaser if any of the conditions set forth in Article IX (other than the conditions set forth in Section 9.3, Section 9.4 and Section 9.5) have not been satisfied by Purchaser (or waived by Seller) by the Longstop Date;

(d) by either Party delivering written notice to the other Party if any of the conditions set forth in Section 8.3, Section 8.4, Section 8.5, Section 9.3, Section 9.4 or Section 9.5 are not satisfied or waived by the applicable Party on or before the Longstop Date; and

(e) by either Party, at any time at and after the Scheduled Closing Date, if (i) the conditions set forth in Articles VIII and IX (other than those conditions that by their terms are to be satisfied at Closing) have been satisfied or waived in accordance with this Agreement, (ii) such Party has indicated in writing to the other Party that it is ready, willing and able to consummate the Closing, and (iii) the other Party shall have failed to consummate the Closing by the close of business on the third (3rd) Business Day following the other Party's receipt of such written notification;

Provided however, that no Party shall have the right to terminate this Agreement pursuant to clause (b), (c), (d) or (e) above if such Party is at such time in material breach of any provision of this Agreement.

Section 15.2 **Effect of Termination**. If this Agreement is terminated pursuant to any provision of Section 15.1, then, except as provided in this Section 15.2 (and except for the provisions of Section 4.2(a), Section 7.3, Section 11.10, Section 11.12, Article XIV, this Article XV, and Article XVII), this Agreement shall forthwith become void and of no further force or effect and the Parties shall have no liability or obligation hereunder.

(a) If Seller has the right to terminate this Agreement pursuant to Section 15.1(c) because of a Willful Breach by Purchaser of this Agreement, or Section 15.1(e) above, Seller shall be entitled to (1) terminate this Agreement pursuant to Section 15.1 and retain the Deposit as liquidated damages, and not as a penalty, for such termination, free and clear of any claims thereon by Purchaser, or (2) seek the specific performance of Purchaser hereunder. The Parties agree that, should Seller elect the option under subpart (1) above, the foregoing described liquidated damages are reasonable considering all of the circumstances existing as of the Execution Date and constitute the Parties' good faith estimate of the actual damages reasonably expected to result from such termination of this Agreement by Seller.

(b) If Purchaser has the right to terminate this Agreement pursuant to Section 15.1(b) because of a Willful Breach by Seller of this Agreement, or Section 15.1(e) above, Purchaser shall be entitled to (1) terminate this Agreement pursuant to Section 15.1 and receive the Deposit from Seller, and (2) seek to recover damages from Seller up to but not exceeding the amount of the Deposit. If Purchaser is entitled to the return of the Deposit pursuant to this Section 15.2(b), Seller shall return the Deposit to Purchaser within five (5) Business Days of the date this Agreement is terminated.

(c) If this Agreement is terminated for any reason other than as set forth in Section 15.2(a) or Section 15.2(b), then the Parties shall have no liability or obligation hereunder as a result of such termination, and Seller shall, within five (5) Business Days of the date this Agreement is terminated,

return the Deposit to Purchaser free and clear of any claims thereon by Seller.

(d) Subject to the foregoing, upon the termination of this Agreement neither Party shall have any other liability or obligation hereunder and following any termination of this Agreement, Seller shall be free to all the rights and benefits associated with the ownership of the Assets, including the right to sell the Assets at Seller's discretion, without any claim by Purchaser with respect thereto.

Section 15.3 **Return of Documentation and Confidentiality**. Upon any termination of this Agreement, Purchaser shall return to Seller all title, engineering, geological and geophysical data, environmental assessments and/or reports, maps, documents and other information furnished by Seller to Purchaser or prepared by or on behalf of Purchaser in connection with its due diligence investigation of the Assets and an officer of Purchaser shall certify same to Seller in writing.
